PART I - FINANCIAL INFORMATION

ITEM 1. CONSOLIDATED FINANCIAL STATEMENTS.

The reviewed consolidated financial statements of the Company, for the period covered by this report, are included elsewhere in this report, beginning at page F/S 1.

The reviewed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for the interim financial information with the instructions to Form 10-QSB and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of the Company's management, all adjustments (consisting of only normal accruals) considered necessary for a fair presentation have been included. Operating results for the six-month period ended April 30, 2004 are not necessarily indicative of the results that may be expected for the full year ending October 31, 2004.

For further information refer to the financial statements and footnotes thereto in the Company's Annual Report on Form 10-KSB for the year ended October 31, 2003 incorporated by reference herein.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

RESULTS OF OPERATIONS FOR THE PERIOD ENDED APRIL 30, 2004.

Six months ended April 30, 2004 compared to the six months ended April 30, 2003:

During the six months ended April 30, 2004, the Company realized other income of \$241,334 from the sale of zinc carbonate ore from the Company's San Salvadore mine, in accordance with a contract with Cameron Chemicals, Inc., Norfolk, Virginia. Costs associated

Edgar Filing: METALLINE MINING CO - Form 10QSB

with the Sale of the ore totaled \$134,699 for the six-month period ended April 30, 2004. There were ore sales of \$200,978 in the six-month period ended April 30, 2003. General and administrative expenses increased to \$1,191,371 for the six-month period ended April 30, 2004 as compared to \$646,892 for the six-month period ended April 30, 2003. The increase is primarily due to an increase in office and administrative expenses of \$71,126 and a \$558,289 increase in exploration expenditures. These increases were partially offset by an \$89,670 decrease in professional services. For the six months ended April 30, 2004, the Company experienced a loss of \$1,056,698, or \$0.07 per share, compared to a loss of \$570,896, or \$0.05 per share, during the comparable period in the previous year.

LIQUIDITY AND CAPITAL RESOURCES.

Metalline Mining Company (the "Company") is an exploration stage enterprise formed under the laws of the State of Nevada, on August 20, 1993, to engage in the business of mining. The Company has no operating history and is subject to all the risks inherent in a new business enterprise. The likelihood of success of the Company must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with a new business, and the competitive and regulatory environment in which the Company will operate.

Page 1

>From inception until May 1996, the Company was essentially dormant having as its only asset unpatented mining claims located in the State of Montana ("Kadex Property"). Subsequently, the Company has dropped the Kadex Property claims. Since May 1996, the focus of the Company has been the Sierra Mojada Project located in Coahuila Mexico. The Company is currently involved in exploration and reserve definition of its Sierra Mojada Property.

In order to maintain operations, the Company will have to raise additional capital through loans or through the sale of securities. If the Company is unable to raise additional capital, it may have to cease operations. The Company's plan of operation, subject to maintaining sufficient funds, calls for drilling and sampling of the red zinc manto to define an ore reserve and continued mining of zinc carbonate from the white zinc manto for delivery to Metalline's fertilizer client.

Due to the Company's lack of revenues, the Company's independent certified public accountants included a paragraph in the Company's 2003 financial statements relative to a going concern uncertainty. The Company financed its obligations during the 2002-2003 fiscal year by its sale of 956,000 shares at an average price of \$1.09 per share.

The Company's private placement of common shares was completed in the current period. The Company issued a total of 7,580,150 shares at \$1.00 per share in the six months ended April 30, 2004, and realized \$7,023,500 after private placement costs of \$556,650.

The Company is engaged in the business of mining. The Company currently owns one mining property located in Mexico known as the Sierra Mojada Property. The Company conducts its operations in Mexico through its wholly owned subsidiary corporation, Minera Metalin S.A. de C.V. ("Minera Metalin").

Edgar Filing: METALLINE MINING CO - Form 10QSB

The Sierra Mojada Property is comprised of eight concessions totaling 7,060 hectares (17,446 acres). The concessions were acquired by purchase agreements from the titled owners. The Company owns title to 100% of the concessions.

The Sierra Mojada Mining District is located in the west central part of the state of Coahuila, Mexico, near the Coahuila-Chihuahua state border some 200 kilometers south of the Big Bend of the Rio Grande River. The principal mining area extends for some 5 kilometers in an east-west direction along the base of the precipitous, 1,000 meter high, Sierra Mojada Range.

Vehicle access from Torreon is by 250 kilometers on paved road to Sierra Mojada. There is a well maintained, 1200 meter, gravel airstrip. The District has high voltage electric power and is served by a rail line, which was constructed from Escalon to the district in 1891 and later connected to Monclova.

The Sierra Mojada Property has produced in excess of 10 million tons of high-grade ore that graded in excess of 30% lead, 20% zinc, 1% copper and 1 kg (31 ounces) silver per ton that was shipped directly to the smelter. The district has never had a mill to concentrate ore. All of the mining was done selectively for ore of sufficient grade to direct ship; mill grade ore was left unmined. More than 50 kilometers of underground workings are spread through the 5 kilometer by 2 kilometer area from which more than 45 mines have produced ore. The deepest workings have ore grade mineralization and provide some of the best targets for reserve development. In spite of the amount of historic work, when a map of all of the historic workings is viewed there is much more unexplored area in the 5 by 2 kilometer area than has been explored and the vertical extent greater than 100 meters is totally unexplored.

Page 2

The sediments are predominantly carbonate with some sandstone and shale and the attitudes are near horizontal. The mines are dry and the rocks are competent, there is very little unstable ground and the ore thickness is amenable to high volume mechanized mining methods. Sierra Mojada has ideal mining conditions and grades for low cost production.

Based upon the foregoing, the Company is of the opinion that the magnitude of the Sierra Mojada mineral system and its exploration potential is capable of providing new reserves for many more years of mining. However, there is no assurance as to the quantity or quality of the undeveloped reserves.

There is potential for long-term reserve expansion within the known extent of the mineral systems. There is potential to discover ore deposits in unexplored portions of the land position and at depth in unexplored stratigraphy. There is however, no assurance that the Company will have the monetary resources to continue to explore for, develop, or retrieve any of the minerals located in the Sierra Mojada Property.

In October, 1999 Minera Metalin signed a Joint Venture Letter Agreement with Minera North S. de R.L. de C.V. a wholly owned subsidiary of North Limited of Melbourne Australia, a major international mining company. The agreement allowed North to acquire a 60% participating interest in Sierra Mojada by exploring and completing a feasibility study over a "Earn In Period" of not more than 5 years.

Edgar Filing: METALLINE MINING CO - Form 10QSB

In August, 2000 Rio Tinto Ltd. purchased North Limited for its iron ore holding and subsequently terminated the agreement with Minera Metalin.

On the 15th of November, 2001 Metalline Mining Company and its Mexican Subsidiary Minera Metalin, S.A. de C.V. signed an Agreement with Minas Penoles, S.A. de C.V. and Compania Minera La Parrena, S.A. de C.V. The Agreement allows Minas Penoles to earn a 60% interest in the Sierra Mojada project by exploring and completing a feasibility study over an "Earn in Period" of not more than 5 years. Penoles and Metalline, by mutual agreement of the parties, have terminated that agreement as of November 15, 2003.

Since November 15, 2003 Metalline has been the operator of the project and is currently conducting a reserve definition drilling program at Sierra Mojada. This program is being conducted with 3 diamond drills in operation and a 4th will be added as soon as the drill can be mobilized from a previous project. Metallines' objectives are to define a reserve and conduct a feasibility based on that reserve for a mine and a zinc solvent extraction electrowinning plant at Sierra Mojada.

EFFECT OF RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS.

In May 2003, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No.150, "Accounting for Certain Financial Instruments with Characteristics of Both Liabilities and Equity" (hereinafter "SFAS No.150"). SFAS No.150 establishes standards for classifying and measuring certain financial instruments with characteristics of both liabilities and equity and requires that those instruments be classified as liabilities in statements of financial position. Previously, many of those instruments were classified as equity. SFAS No.150 is effective for financial instruments entered into or modified after May 31, 2003 and otherwise is effective at the beginning of the first interim period after June 15, 2003. The Company has not yet determined the impact of the adoption of this statement.

Page 3

In April 2003, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 149, "Amendment of Statement 133 on Derivative Instruments and Hedging Activities" (hereinafter "SFAS No.149"). SFAS No.149 amends and clarifies the accounting of derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities under SFAS No.133, "Accounting for Derivative Instruments and Hedging Activities". This statement is effective for contracts entered into or modified after June 30, 2003 and for hedging relationships designated after June 30, 2003. The adoption of SFAS No.149 is not expected to have a material impact on the financial position or results of operations of the Company.

In December 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No.148, "Accounting for Stock-Based Compensation - Transition and Disclosure" (hereinafter "SFAS No.148"). SFAS 148 amends SFAS 123, "Accounting for Stock-Based Compensation, " to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, the statement amends the disclosure

Edgar Filing: METALLINE MINING CO - Form 10QSB

requirements of SFAS 123 to require prominent disclosure in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The provisions of the statement are effective for financial statements for fiscal years ending after December 15, 2002. As the Company accounts for stock-based compensation using the fair value method, the adoption of SFAS 148 has no material impact on the Company's financial condition or results of operations.

In June 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No.146, "Accounting for Costs Associated with Exit or Disposal Activities" (hereinafter "SFAS No.146"). SFAS No.146 addresses significant issues regarding the recognition, measurement, and reporting of costs associated with exit and disposal activities, including restructuring activities. SFAS No.146 also addresses recognition of certain costs related to terminating a contract that is not a capital lease, costs to consolidate facilities or relocate employees, and termination benefits provided to employees that are involuntarily terminated under the terms of a one-time benefit arrangement that is not an ongoing benefit arrangement or an individual deferred-compensation contract. SFAS No.146 was issued in June 2002, effective December 31, 2002. The Company's financial position and results of operations have not been affected by adopting SFAS No.146.

In April 2002, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 145, "Rescission of FASB Statements No.4, 44, and 64, Amendment of FASB Statement No.13, and Technical Corrections" (hereinafter "SFAS No.145") which updates, clarifies, and simplifies existing accounting pronouncements. FASB No.4, which required all gains and losses from the extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of related tax effect was rescinded. As a result, FASB No. 64, which amended FASB No.4, was rescinded as it was no longer necessary. SFAS No.14 amended FASB No.13 to eliminate an inconsistency between the required accounting for sale-leaseback transactions and the required accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. Management's adoption of this statement has not affected the financial position or results of operations at October 31, 2003.

Page 4

CASH FLOWS FOR THE SIX MONTHS ENDED APRIL 30, 2004 WERE AS FOLLOWS:

During the six-month period ended April 30, 2004, the Company's cash position increased to \$6,618,833, primarily due to the sale of the Company's common stock. During the six-month period, the Company used \$831,305 in operating activities. In addition, the Company realized \$6,879,850 from the sale of Company stock and financed \$201,081 for the purchase of equipment. On June 21, 2002, the Company authorized the purchase of property and equipment from the Mineros Nortenos Cooperativa, located at the Company's Sierra Mojada Project at La Esmeralda, Coahuila, Mexico. Total purchase price, after conversion to U.S. Dollars, amounted to \$272,616. The final payment of \$38,610 due under the contract was paid June 2003.

PART II - OTHER INFORMATION

Edgar Filing: METALLINE MINING CO - Form 10QSB

ITEM 1. LEGAL PROCEEDINGS.

Minera Metalin, the Company's Mexican subsidiary, has been named as a co-defendant in a lawsuit filed in Mexico regarding the Company's purchase of two mining concessions. During the nine months ended July 31, 2003 the Company settled this suit for approximately \$36,000. The Company paid approximately \$13,800 at the time of settlement, with the balance payable in six equal installments of approximately \$3,700. The Company has met its obligation under the settlement.

ITEM 2. CHANGES IN SECURITIES.

Neither the constituent instruments defining the rights of the registrant's securities holders nor the rights evidenced by the registrant's outstanding common stock have been modified, limited, or qualified. During the six months ended April 30, 2004 the Company sold 7,436,500 shares of its common stock at a price of \$1.00 per share.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

The registrant has no outstanding senior securities.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

In February 2001 a notice of annual meeting and proxy statement were mailed to shareholders of record January 5, 2001 regarding matters to be considered at the annual shareholders meeting held March 1, 2001. Matters considered were (1) election of directors, (2) consideration and approval of the Company's 2001 Stock Option Plan, (3) consideration and approval of a proposed amendment to the Company's Articles of Incorporation to authorize a class of Preferred Shares, (4) election of outside auditors. There have been no matters submitted to a vote of security holders since March 1, 2001.

ITEM 5. OTHER INFORMATION. None.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K.

EXHIBITS.

The following exhibit is filed as part of this report: None.

REPORTS ON FORM 8-K.

No reports on Form 8-K were filed by the registrant during the period covered by this report.

F/S 10

METALLINE MINING COMPANY
An Exploration Stage Company
Notes to the Consolidated Financial Statements
April 30, 2004

The interim consolidated financial statements of Metalline Mining

Edgar Filing: METALLINE MINING CO - Form 10QSB

Company included herein have been prepared without audit, pursuant to the rules and regulations of the Securities and Exchange. Although certain information normally included in financial statements prepared in accordance with generally accepted accounting principles has been condensed or omitted, the Company believes that the disclosures are adequate to make the information presented not misleading. The accompanying interim financial statements should be read in conjunction with the audited financial statements and notes thereto included in the Company's annual report on Form 10-KSB for the fiscal year ended October 31, 2003.

The consolidated financial statements included herein reflect all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the results for interim periods. The results for interim periods are not necessarily indicative of trends or of results to be expected for a full year.

NOTE 1

PREFERRED STOCK

At its March 1, 2001 annual shareholders meeting, the Company approved a change to its articles of incorporation whereby the Company is authorized to issue one million shares of \$0.01 par value preferred stock. The specific features of the preferred stock will be determined by the Company's board of directors. There have been no preferred shares issued as of April 30, 2004.

STOCK OPTION PLAN

On March 1, 2001, the Company's shareholders approved a qualified stock option plan. The number of shares eligible for issuance under the qualified plan is to be determined by the Company's board of directors. As of April 30, 2004 there were options for 350,000 shares outstanding to officers and directors of the Company.

NOTE 2

On November 15, 2001, the Company entered into an agreement with Compania Minera La Parrena S.A. de C.V. ("Penoles") whereby Penoles may earn the right to acquire a 60% interest in certain mining concessions located in the Sierra Majada region of Coahuila, Mexico. The earn-in right is contingent upon the following: delivery by Penoles within four years of a pre-feasibility study, completion by Penoles of \$1,000,000 of qualified expenditures on the aforementioned mining concessions, and Penoles' purchase of up to 250,000 shares of Metalline's common stock at \$2.00 per share. As of April 30, 2004, Penoles had purchased 150,000 shares of common stock under this agreement. In November 2003, the agreement between the Company and Penoles was terminated by mutual consent.

NOTE 3

In December 2001 Metalline Mining Company signed an agreement with the B.O.W. Corporation of El Paso, Texas for an exclusive lease on 41 patented and 81 unpatented mining claims in the Silver Hills District at Orogrande, New Mexico. The property contains high-grade garnet deposits that will be developed for the industrial abrasive market. The agreement allows Metalline to mine, process and market any metallic, non-metallic, or other mineral mined and sold from the property by establishing the quality and marketability of the garnet and by furnishing B.O.W. a business plan and feasibility study within six months. The agreement also provides that within 12 months of completing the feasibility study, if warranted, Metalline will

Edgar Filing: METALLINE MINING CO - Form 10QSB

construct and place into production a mining and marketing operation with a minimum capacity of 25,000 tons per year of industrial garnet. As consideration for the exclusive lease, B.O.W. will receive up to 50% of net profits from the operation. The Company announced in October 2002 that the agreement has been terminated.

F/S 11

METALLINE MINING COMPANY
An Exploration Stage Company
Notes to the Consolidated Financial Statements
April 30, 2004

NOTE 4

On June 21, 2002, the Company authorized the purchase of property and equipment from the Mineros Nortenos Cooperativa, located at the Company's Sierra Majada Project at La Esmeralda, Coahuila, Mexico. Total purchase price, after conversion to U.S. Dollars, amounted to \$272,616. The final payment of \$38,610 was made in June 2003.

NOTE 5

The Company's private placement of common shares was completed in the current period. The Company issued a total of 7,580,150 shares at \$1.00 per share in the six months ended April 30, 2004, and realized \$7,023,500 after private placement costs of \$556,650.
