

JOHNSON OUTDOORS INC
Form 10-K
December 05, 2014

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended October 3, 2014

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-16255

JOHNSON OUTDOORS INC.
(Exact name of registrant as specified in its charter)

Wisconsin	39-1536083
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

555 Main Street, Racine, Wisconsin 53403
(Address of principal executive offices, including zip code)

(262) 631-6600
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Exchange on Which Registered
Class A Common Stock, \$.05 par value per share	NASDAQ Global MarketSM

Securities registered pursuant to section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was

Edgar Filing: JOHNSON OUTDOORS INC - Form 10-K

required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X]
No []

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes [X] No []

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K, or any amendment to this Form 10-K. [X]

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check one):

Large Accelerated Filer []

Accelerated Filer [X]

Non-Accelerated Filer [] (do not check if a smaller reporting company)

Smaller Reporting Company []

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes [] No [X]

As of November 28, 2014, 8,769,426 shares of Class A and 1,212,382 shares of Class B common stock of the registrant were outstanding. The aggregate market value of voting and non-voting common stock of the registrant held by nonaffiliates of the registrant was approximately \$118,650,000 on March 28, 2014 (the last business day preceding the registrant's most recently completed fiscal second quarter) based on approximately 4,740,000 shares of Class A common stock held by nonaffiliates as of such date. For purposes of this calculation only, shares of all voting stock are deemed to have a market value of \$25.03 per share, the closing price of the Class A common stock as reported on the NASDAQ Global MarketSM on March 28, 2014. Shares of common stock held by any executive officer or director of the registrant (including all shares beneficially owned by the Johnson Family) have been excluded from this computation because such persons may be deemed to be affiliates. This determination of affiliate status is not a conclusive determination for other purposes.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Proxy Statement for the 2015 Annual Meeting of the Shareholders of the Registrant are incorporated by reference into Part III of this report.

As used in this report, the terms "we," "us," "our," "Johnson Outdoors" and the "Company" mean Johnson Outdoors Inc. and its subsidiaries collectively, unless the context indicates another meaning.

Forward Looking Statements

Certain matters discussed in this Form 10-K are “forward-looking statements,” and the Company intends these forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and is including this statement for purposes of those safe harbor provisions. These forward-looking statements can generally be identified as such because they include phrases such as the Company “expects,” “believes,” “anticipates,” “intends” or other words of similar meaning. Similarly, statements that describe the Company’s future plans, objectives or goals are also forward-looking statements. Such forward-looking statements are subject to certain risks and uncertainties which could cause actual results or outcomes to differ materially from those currently anticipated.

Factors that could affect actual results or outcomes include the matters described under the caption “Risk Factors” in Item 1A of this report and the following: changes in economic conditions, consumer confidence levels and discretionary spending patterns in key markets; the Company’s success in implementing its strategic plan, including its targeted sales growth platforms and focus on innovation; litigation costs related to actions of and disputes with third parties, including competitors; the Company’s continued success in working capital management and cost-structure reductions; the Company’s ongoing success in meeting financial covenants in its credit agreements with its lenders; the

Company's success in integrating strategic acquisitions; the risk of future writedowns of goodwill or other long-lived assets; the ability of the Company's customers to meet payment obligations; movements in foreign currencies, interest rates or commodity costs; fluctuations in the prices of raw materials or the availability of raw materials used by the Company; the success of the Company's suppliers and customers; the ability of the Company to deploy its capital successfully; unanticipated outcomes related to outsourcing certain manufacturing processes; unanticipated outcomes related to litigation matters; and adverse weather conditions. Shareholders, potential investors and other readers are urged to consider these factors in evaluating the forward-looking statements and are cautioned not to place undue reliance on such forward-looking statements. The forward-looking statements included herein are only made as of the date of this filing. The Company assumes no obligation, and disclaims any obligation, to update such forward-looking statements to reflect subsequent events or circumstances.

Trademarks

We have registered the following trademarks, which may be used in this report: Minn Kota®, Cannon®, Humminbird®, LakeMaster®, Silva®, Eureka!®, Jetboil®, Old Town®, Ocean Kayak™, Necky®, Extrasport®, Carlisle®, SCUBAPRO®, UWATEC® and SUBGEAR®.

PART I

ITEMBUSINESS

1.

Johnson Outdoors is a leading global manufacturer and marketer of branded seasonal, outdoor recreation products used primarily for fishing from a boat, diving, paddling, hiking and camping. The Company's portfolio of well-known consumer brands has attained leading market positions due to continuous innovation, marketing excellence, product performance and quality. Company values and culture support innovation in all areas, promoting and leveraging best practices and synergies within and across its subsidiaries to advance the Company's strategic vision set by executive management and approved by the Board of Directors. The Company is controlled by Helen P. Johnson-Leipold (Chairman and Chief Executive Officer), members of her family and related entities.

The Company was incorporated in Wisconsin in 1987 as successor to various businesses.

Marine Electronics

The Company's Marine Electronic segment key brands are: Minn Kota battery-powered fishing motors for quiet trolling or primary propulsion, marine battery chargers and shallow water anchors; Humminbird sonar and GPS equipment for fishfinding, navigation and marine cartography; and Cannon downriggers for controlled-depth fishing.

Marine Electronics brands and related accessories are sold across the globe, with approximately 85% of sales coming from North America through large outdoor specialty retailers, such as Bass Pro Shops and Cabela's; large retail store chains; marine products distributors; original equipment manufacturers (OEM) of boat brands such as Tracker, Skeeter and Ranger; and internet retailers and distributors. Markets outside of North America are accessed through a network of international distributors.

Marine Electronics has achieved market share gains by focusing on product innovation, quality products and effective marketing. Such consumer marketing and promotion activities include: product placements on fishing-related television shows; print advertising and editorial coverage in outdoor, general interest and sport magazines; professional angler and tournament sponsorships; packaging and point-of-purchase materials and offers to increase consumer appeal and sales; branded websites; social media networks; and online promotions.

Outdoor Equipment

The Company's Outdoor Equipment segment key brands are: Eureka! consumer, commercial and military tents and accessories, sleeping bags, camping furniture and other recreational camping products; Jetboil portable outdoor cooking systems; and Silva field compasses.

Eureka! consumer tents, sleeping bags, camping furniture and other recreational camping products are mid- to high-price range products sold in the U.S. and Canada through independent sales representatives, primarily to camping and backpacking specialty stores, sporting goods stores, catalog and mail order houses and through internet retailers. Marketing of the Company's tents, sleeping bags and other recreational camping products is focused on building the Eureka! brand name and establishing the Company as a leader in tent design and innovation. The

Company's camping tents and sleeping bags are produced by third party manufacturing sources in Asia. Eureka! camping products are sold under license in Japan, Australia and Europe.

Eureka! commercial tents include party tents and accessories, sold primarily to general rental stores, and other commercial tents and accessories sold directly to tent erectors. The Company's commercial tent products range from 10'x10' canopies to 120' wide pole tents and other large scale frame structures and are primarily manufactured by the Company at the Company's Binghamton, New York location.

Commercial tent accessories include lighting systems, interior lining options, and mounting brackets that allow the interior of the tents to be customized to suit the occasion. The Company believes there is a niche market for commercial tents outfitted with common, easy to use accessories.

Eureka! also designs and manufactures large, heavy-duty tents and lightweight backpacking tents for the military at its Binghamton, New York location. Tents produced for military use in the last twelve months include modular general purpose tents, rapid deployment shelters and various lightweight one and two person tents. The Company manufactures military tent accessories like fabric floors and insulated thermal liners and is also a subcontract manufacturer for other providers of military tents.

Jetboil portable outdoor cooking systems are sold in the U.S. and Canada through independent sales representatives, primarily to camping and backpacking specialty stores, sporting goods stores, catalog and mail order houses and through internet retailers. Marketing of Jetboil systems is focused on building brand awareness and leadership in product features and innovation. Jetboil products are produced at both the Company's operating location in Manchester, New Hampshire and by third party manufacturing sources in Asia. Jetboil camping products are sold in approximately 30 countries around the world.

Silva field compasses are manufactured by the Company and marketed exclusively in North America where the Company owns Silva trademark rights.

Watercraft

The Company's Watercraft segment designs and markets Necky high performance sea touring kayaks; sit on top Ocean Kayaks; and Old Town canoes and kayaks for family recreation, touring, angling and tripping. With the exception of Necky fiberglass boats and Old Town wooden canoes, these brands are manufactured at the Company's facility in Old Town, Maine.

The Company uses a rotational molding process for manufacturing mid- to high-end polyethylene kayaks and canoes. The Company uses a thermoform molding process in the manufacturing of lower priced models. The Company's United States warehouse and distribution center for all of its Watercraft brands is also located in Old Town, Maine.

Watercraft accessory brands, including Extrasport personal flotation devices and Carlisle branded paddles, are produced primarily by third party sources located in North America and Asia.

The Company's kayaks, canoes and accessories are sold through multiple channels in the U.S., Europe and the Pacific Basin with an emphasis on independent specialty retailers and large outdoor retailers such as REI, L.L. Bean, Academy and Cabela's. The Company has a network of distributors who sell Company products outside of North America.

The Company's Watercraft business competes in the mid- to high-end of the product category by introducing product innovations, creating quality products and by focusing on the product-specific needs of each marketing channel. Consumer marketing and promotion activities include: print advertising and editorial coverage in outdoor, general interest and sport magazines; direct marketing; branded websites and social media networks.

Diving

The Company manufactures and markets underwater diving products for recreational divers, which it sells and distributes under the SCUBAPRO and SUBGEAR brand names.

The Company markets a complete line of underwater diving and snorkeling equipment, including regulators, buoyancy compensators, dive computers and gauges, wetsuits, masks, fins, snorkels and accessories. SCUBAPRO diving equipment is marketed to the premium segment and high performance technical diving market whereas SUBGEAR products are marketed to the mid-tier price point. Products are sold via select distribution to independent specialty dive stores worldwide. These specialty dive stores sell the Company's products over the counter as well as through their own websites. In addition, they generally provide a wide range of services to divers, including regular maintenance, product repair, diving education and travel programs. The Company also sells diving gear to dive training centers, resorts, search and rescue units and armed forces around the world.

The Company focuses on maintaining and extending the SCUBAPRO brand as the market leader in innovation and quality. The SCUBAPRO brand is positioned to incorporate the Company's latest innovations and advanced features. The SUBGEAR brand benefits from sharing SCUBAPRO's experienced research and development teams. This two brand strategy and product positioning is driven by product feature, as well as by product differentiation, price point and design. SUBGEAR is a full line brand with an emphasis on life support and an even broader range of soft goods for the global market. SCUBAPRO and SUBGEAR brands have been extended to include dive computers which had previously been marketed under the UWATEC brand.

The Company's consumer communication focuses on building brand awareness and highlighting exclusive product features and consumer benefits of the SCUBAPRO and SUBGEAR product lines. The Company's communication and distribution strategies reinforce the SCUBAPRO brand's position as the industry's quality and innovation leader. The Company markets its equipment in diving magazines, via websites, social media and through information and displays in dive specialty stores. SUBGEAR'S full line of dive equipment and accessories compete in the mid-market on the basis of quality and performance.

The Company manufactures regulators, dive computers, gauges, and instruments at its Italian and Indonesian facilities. The Company sources buoyancy compensators, neoprene goods, plastic products, proprietary materials, and other components from third parties.

Financial Information for Business Segments

As noted above, the Company has four reportable business segments. See Note 12 to the consolidated financial statements included elsewhere in this report for financial information concerning each business segment.

International Operations

See Note 12 to the consolidated financial statements included elsewhere in this report for financial information regarding the Company's domestic and international operations. See Note 1, subheading "Foreign Operations and Related Derivative Financial Instruments," to the consolidated financial statements included elsewhere in this report for information regarding risks related to the Company's foreign operations.

Research and Development

The Company commits significant resources to new product research and development in each of its business segments. Marine Electronics conducts its product research, design, engineering and software development activities at its locations in Mankato and Little Falls, Minnesota; Alpharetta, Georgia; and Eufaula, Alabama. Diving maintains research and development facilities in Zurich, Switzerland and Casarza Ligure, Italy. Research and development activities for Watercraft are performed in Old Town, Maine. Product research, design and innovation for Outdoor Equipment products are conducted at the Company's Binghamton, New York and Manchester, New Hampshire locations.

The Company expenses research and development costs as incurred, except for software development for new electronics products and bathymetry data collection and processing. These costs are capitalized once technological feasibility is established and then amortized over the expected useful life of the software or database. The amounts expensed by the Company in connection with research and development activities for each of the last three fiscal years are set forth in the Company's Consolidated Statements of Operations included elsewhere in this report.

Industry and Competitive Environment

The Company believes its products compete favorably on the basis of product innovation, product performance and marketing support and, to a lesser extent, price.

Marine Electronics: Minn Kota's main competitors in the electric trolling motors business are Motor Guide®, owned by Brunswick Corporation, and private label branded motors sourced primarily from manufacturers in Asia. Competition in this business is focused on technological innovation, product quality and durability as well as product benefits and features for fishing.

The primary competitors in the marine battery charging business are Dual Pro™, owned by Pro Charging Systems, and various Pro Mariner™ products, owned by Power Products, LLC. Competition in this business is based on charging time, reliability and battery protection. The primary competitor in shallow water anchors is Power Pole®, owned by JL Marine Systems. Competition in this business is based on secure positioning, speed of deployment and quiet operation.

Humminbird's main competitors in the market for on-boat electronics used in deep water (i.e. the Great Lakes of the United States and the world's oceans) are Raymarine®, Simrad, Furuno and Garmin™. Lowrance™ and Garmin are Humminbird's primary competitors for products used on freshwater inland lakes. Competition in this business is primarily focused on the quality of sonar imaging and display, easy to use graphical interfaces as well as the integration of mapping and GPS technology. The primary competitors in the marine cartography market are Navionics® and Jeppesen®. Competition in this business focuses primarily on quality of data and quantity of available charts for inland lakes and ocean shoreline.

Cannon's main competitors in the downrigger market are Big Jon Sports®, Walker and Scotty®. Competition in this business primarily focuses on ease of operation, speed and durability.

Outdoor Equipment: The Company's outdoor equipment brands and products compete in the sporting goods and specialty segments of the outdoor equipment market. Competitive brands with a strong position in the sporting goods channel include Coleman and private label brands. The Company also competes with specialty companies such as Kelty®, The North Face® and Marmot® on the basis of materials and innovative designs for consumers who want performance products priced at a value.

The Company's portable outdoor cooking systems compete in the specialty and higher end performance backpacking and camping markets. The primary competitor in portable outdoor cooking systems is MSR® which is owned by Cascade Designs®. Competition in this market is based on product size and weight, ease of use, reliability and performance.

The Company's competitors in the commercial tent market include Anchor Industries and Aztec for tension, frame and canopy tents. Competition in the commercial tent business is based on price, quality, structure, styling, ease of installation and technical support.

The Company sells military tents to prime vendors and third party distributors who hold supply contracts primarily with the U.S. Government. Such supply contracts can be for commercial off-the-shelf products in addition to products required to be built to unique specifications. Competitors in the military tent business include HDT®, DHS Systems, Alaska Structures®, Camel, Outdoor Venture, and Diamond Brand.

Watercraft: The Company primarily competes in this segment in the kayak and canoe product categories of the paddlesports market. The Company's main competitors in this market are Confluence Outdoor, Pelican, Wenonah

Canoe, Jackson Kayak and Legacy Paddlesports™, each of which competes on the basis of their product's design, performance, quality and price.

Diving: The main competitors in the Diving segment include Aqua Lung International, Suunto®, Atomic, Oceanic, Cressi and Mares®. Competitive advantage in the life support product category of this segment, which consists of regulators, dive computers, and buoyancy compensators, is a function of product innovation, performance, quality and safety.

Competition in the general diving product category of fins, masks, snorkels and wetsuits is characterized by low barriers to entry and numerous competitors who compete on the basis of product innovation, performance, quality and price.

Backlog

Unfilled orders for future delivery of products totaled approximately \$34 million at October 3, 2014. For the majority of its products, the Company's businesses do not receive significant orders in advance of expected shipment dates.

Employees

At October 3, 2014, the Company had approximately 1,100 regular, full-time employees. The Company considers its employee relations to be excellent. Temporary employees are utilized primarily to manage peaks in the seasonal manufacturing of products.

Patents, Trademarks and Proprietary Rights

The Company holds various patents for sonar, diving products and electric motors, amongst other products, and regularly files applications for patents. The Company has numerous trademarks and trade names which it considers important to its business, many of which are noted in this report. Historically, the Company has vigorously defended its intellectual property rights and expects to continue to do so.

Supply Chain and Sourcing of Materials

The Company manufactures some products that use parts or materials that, due to geographical distance, limited supplier capacity or availability or competing demands for such parts or materials, are only available in a cost effective manner from a single vendor or require the Company to place orders several months in advance of required delivery.

The Company attempts to mitigate product availability and these supply chain risks when possible through the purchase of safety stock, use of forecast-based supply contracts, and, to a lesser extent, with just in time inventory deliveries or supplier-owned inventory located close to the Company's manufacturing locations. The Company strives to balance the businesses' need to maintain adequate inventory levels with the cost of holding such inventory by manufacturing to forecast for high volume products, utilizing build-to-order strategies wherever possible, and by having contract-manufactured products delivered to customers directly from the supplier. The Company also seeks to manage its inventory through on-going product design and logistical initiatives with its suppliers to reduce lead times.

As most military contracts require utilization of domestic suppliers, the Company is limited to key vendors for materials used in its military tent business.

A significant driver of the delivered cost of the Company's watercraft products is fuel prices. The Company seeks to mitigate this cost through negotiated fuel surcharge rates with its shipping firms and by optimizing the loads and routing of its deliveries to customers.

Seasonality

The Company's products are outdoor recreation-related, which results in seasonal variations in sales and profitability. This seasonal variability is due to customers' increasing their inventories in the quarters ending March and June, the primary selling season for the Company's outdoor recreation products, with lower inventory volumes during the quarters ending September and December. The Company mitigates the seasonality of its businesses somewhat by encouraging customers to purchase and take delivery of products more evenly through the year. The following table shows, for the past three fiscal years, the total net sales and operating profit or loss of the Company for each quarter, as a percentage of the total year.

Quarter Ended	2014		Year Ended 2013		2012	
	Net Sales	Operating Profit	Net Sales	Operating Profit	Net Sales	Operating Profit
December	19%	-17%	21%	6%	19%	-17%
March	29%	69%	31%	49%	31%	65%
June	32%	56%	30%	63%	31%	66%
September	20%	-8%	18%	-18%	19%	-14%
	100%	100%	100%	100%	100%	100%

Environment and Climate Change

The Company is subject to various supranational, federal, state and local environmental laws, ordinances, regulations, and other requirements of governmental authorities. We believe we comply with such laws and regulations. Expenditures on environmental compliance have not had, and we believe in the future, will not have, a material effect on the Company's capital expenditures, earnings or competitive position. We do not believe that any direct or indirect consequences of legislation related to climate change will have a material effect on our operating costs, facilities or products.

Available Information

The Company maintains a website at www.johnsonoutdoors.com. On its website, the Company makes available, free of charge, its Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports, as soon as reasonably practical after the reports have been electronically filed or furnished to the Securities and Exchange Commission. In addition, the Company makes available on its website, free of charge, its (a) proxy statement for its annual meeting of shareholders; (b) Code of Business Conduct; (c) Code of Ethics for its Chief Executive Officer and Senior Financial and Accounting Officers; and (d) the charters for the following committees of the Board of Directors: Audit; Compensation; Nominating and Corporate Governance; and Executive. Except as specifically provided herein, the Company is not including the information contained on or available through its website as a part of, or incorporating such information by reference into, this Annual Report on Form 10-K. This report includes all material information about the Company that is included on the Company's website and is otherwise required to be included in this report. Copies of any materials the Company files with the Securities and Exchange Commission (SEC) can also be obtained free of charge through the SEC's website at www.sec.gov. The SEC's Public Reference Room can be contacted at 100 F Street, N.E., Washington, D.C. 20549, or by calling 1 (800) 732-0330.

ITEM RISK FACTORS

1A.

The risks described below are not the only risks we face. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our future business operations. If any of the events or circumstances described in the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected. In such cases, the trading price of our common stock could decline.

Our net sales and profitability depend on our ability to continue to conceive, design and market products that appeal to our consumers.

Our business depends on our ability to continue to conceive, design, manufacture and market new products and upon continued market acceptance of our product offering. Rapidly changing consumer preferences and trends make it difficult to predict how long consumer demand for our existing products will continue or what new products will be successful. A decline in consumer demand for our products, our failure to develop new products on a timely basis in anticipation of changing consumer preferences or the failure of our new products to achieve and sustain consumer acceptance could reduce our net sales and profitability.

Competition in our markets could reduce our net sales and profitability.

We operate in highly competitive markets. We compete with several large domestic and foreign companies such as Brunswick, Lowrance, Garmin, Confluence Outdoor and Aqua Lung International, with private label products sold by many of our retail customers and with other producers of outdoor recreation products. Some of our competitors have longer operating histories, stronger brand recognition and greater financial, technical, marketing and other resources than us. In addition, we may face competition from new participants in our markets because some of the outdoor recreation product industries have limited barriers to entry. We experience price competition for our products, and competition for shelf space at retailers, all of which may increase in the future. If we cannot compete in our product markets successfully in the future, our net sales and profitability will likely decline.

General economic conditions affect the Company's results.

Our revenues are affected by economic conditions and consumer confidence worldwide, but especially in the United States and Europe. In times of economic uncertainty, consumers tend to defer expenditures for discretionary items, which affects demand for our products. Moreover, our businesses are cyclical in nature, and their success is impacted by general economic conditions and specific economic conditions affecting the regions and markets we serve, the overall level of consumer confidence in the economy and discretionary income levels. Any substantial deterioration in general economic conditions that diminish consumer confidence or discretionary income can reduce our sales and adversely affect our financial results. Moreover, declining economic conditions create the potential for future impairments of goodwill and other intangible and long-lived assets that may negatively impact our financial condition and results of operations. The impact of weak consumer credit markets, corporate restructurings, layoffs, prolonged high unemployment rates, declines in the value of investments and residential real estate, higher fuel prices and increases in federal and state taxation all can negatively affect our operating results.

Intellectual property disputes relating to our products could increase our costs.

Our industry is susceptible to litigation regarding patent infringement and infringement of other intellectual property rights. We could be either a plaintiff or a defendant in trademark, patent and/or other intellectual property infringement or misappropriation claims and claims of breach of license from time to time. The prosecution or defense

of any intellectual property litigation is both costly and disruptive of the time and resources of our management and product development teams, even if the claim or defense against us is without merit. We could also be required to pay substantial damages or settlement costs to resolve intellectual property litigation. The scope of any patent or other intellectual property to which we have or may obtain rights may not prevent others from developing and selling competing products. The validity and breadth of claims covered in patents and other intellectual property involve complex legal and factual questions, and the resolution of such claims may be highly uncertain, lengthy and expensive. In addition, our patents or other intellectual property may be held invalid upon challenge, or others may claim that we have improperly or invalidly sought patent or other intellectual property protection for our technology, thus exposing us to direct or counter claims in any patent or intellectual property proceeding.

Furthermore, we may rely on trade secret law to protect technologies and proprietary information that we cannot or have chosen not to patent. Trade secrets, however, are difficult to protect. Although we attempt to maintain protection through confidentiality agreements with necessary personnel, contractors and consultants, we cannot guarantee that such contracts will not be breached. In the event of a breach of a confidentiality agreement or the divulgence of proprietary information, we may not have adequate legal remedies to maintain our trade secret protection. Litigation to determine the scope of intellectual property rights, even if ultimately successful, could be costly and could divert management's attention away from the Company's business. Any of these negative events could adversely affect our profitability or operating results.

Product recalls and other claims could affect our financial position and results of operations.

As a manufacturer and distributor of consumer products, we could be required to repurchase or recall one or more of our products if they are found to be unsafe or defective. A repurchase or recall of our products could be costly to us and could damage the reputation of our brands. If we were required to remove, or we voluntarily removed, our products from the market, our reputation could be tarnished and we might have large quantities of finished products that we could not sell. As a result, product recalls could have a material adverse effect on our business, results of operations and financial condition.

Impairment charges could impact our future financial position and results of operations.

We test our goodwill and other long-lived assets for impairment on an annual basis or when an event occurs that might reduce the fair value of the reporting unit or applicable asset or group of assets below its carrying value. Various uncertainties, including significant adverse changes in business climate, adverse actions by regulators, unanticipated competition, loss of key customers, a downturn in the economy or in discretionary income levels or changes in consumer preferences could impact the expected cash flows to be generated by an asset or group of assets, and may result in an impairment of those assets. Although any such impairment charge would be a non-cash expense, any impairment of our assets could materially increase our expenses and reduce our profitability. We recorded impairment charges totaling \$8,475 in the year ended October 3, 2014.

Sales of our products are seasonal, which causes our operating results to vary from quarter to quarter.

Sales of our products are seasonal. Historically, our net sales and profitability have peaked in our second and third fiscal quarters due to the buying patterns of our customers for our products. Seasonal variations in operating results may also cause us to increase our debt levels and interest expense primarily in the second and third fiscal quarters as we fund our working capital requirements.

The trading price of shares of our common stock fluctuates and investors in our common stock may experience substantial losses.

The trading price of our common stock has been volatile and may continue to be volatile in the future. The trading price of our common stock could decline or fluctuate in response to a variety of factors, including:

- the timing of our announcements or those of our competitors concerning significant product developments, acquisitions or financial performance;
- fluctuation in our quarterly operating results;
- substantial sales of our common stock;
- general stock market conditions; or
- other economic or external factors.

You may be unable to sell your stock at or above your purchase price.

A limited number of our shareholders can exert significant influence over the Company.

As of November 28, 2014, Helen P. Johnson-Leipold, members of her family and related entities (hereinafter the Johnson Family), held approximately 77% of the voting power of both classes of our common stock taken as a whole. This voting power would permit these shareholders, if they chose to act together, to exert significant influence over the outcome of shareholder votes, including votes concerning the election of directors, by-law amendments, possible mergers, corporate control contests and other significant corporate transactions. Moreover, certain members of the Johnson Family have entered into a voting trust agreement covering approximately 96% of our outstanding class B

common shares. This voting trust agreement permits these shareholders, if they continue to choose to act together, to exert significant influence over the outcome of shareholder votes, including votes concerning the election of directors, by-law amendments, possible mergers, corporate control contests and other significant corporate transactions.

We may experience difficulties in integrating strategic acquisitions.

We have, as part of our strategy, historically pursued strategic acquisitions. The pursuit of future growth through acquisitions, involves significant risks that could have a material adverse effect on our business. Risks associated with integrating strategic acquisitions include:

- the acquired business may experience losses which could adversely affect our profitability;
- unanticipated costs relating to the integration of acquired businesses may increase our expenses and reduce our profitability;
- the possible failure to obtain any necessary consents to the transfer of licenses or other material agreements of the acquired company;
- the possible failure to maintain customer, licensor and other relationships of the acquired company after the closing of the transaction with the acquired company;
- difficulties in achieving planned cost savings and synergies may increase our expenses;
- diversion of our management's attention could impair their ability to effectively manage our other business operations;
- unanticipated management or operational problems or liabilities may adversely affect our profitability and financial condition; and/or
- breaches of the representations or warranties or other violations of the contractual obligations required by the acquisition agreement of other parties to the acquisition transaction and any contractual remedies related thereto may not adequately protect or compensate us.

We are dependent upon certain key members of management.

Our success will depend to a significant degree on the abilities and efforts of our senior management. Moreover, our success depends on our ability to attract, retain and motivate qualified management, marketing, technical and sales personnel. These people are in high demand and often have competing employment opportunities. The labor market for skilled employees is highly competitive and we may lose key employees or be forced to increase their compensation to retain these people. Employee turnover could significantly increase our recruitment, training and other related employee costs. The loss of key personnel, or the failure to attract qualified personnel, could have a material adverse effect on our business, financial condition or results of operations.

Sources of and fluctuations in market prices of raw materials can affect our operating results.

The primary raw materials we use in manufacturing our products are metals, resins and packaging materials. These materials are generally available from a number of suppliers, but we have chosen to concentrate our sourcing with a limited number of vendors for each commodity or purchased component. We believe our sources of raw materials are reliable and adequate for our needs. However, the development of future sourcing issues related to the availability of these materials as well as significant fluctuations in the market prices of these materials may have an adverse effect on our financial results.

Our profitability is also affected by significant fluctuations in the prices of the raw materials we use in our products, including the effect of fluctuations in foreign currency exchange rates on raw materials and purchased components. We may not be able to pass along any price increases in our raw materials or other component costs to our customers. As a result, an increase in the cost of raw materials, labor or other costs associated with the manufacturing of our products could increase our costs of sales and reduce our gross margins.

Financial distress in supply chain and shortage of raw materials or components of supply.

Deteriorating industry conditions can adversely affect our supply base. Lower production levels at our major customers, volatility in certain raw material and energy costs and the global credit market crisis resulted in severe financial distress among many companies within our supply base, including higher levels of suppliers seeking receivership or bankruptcy protection or, in some cases, ceasing to conduct operations. The potential continuation or renewal of this financial distress within our supply base and/or our suppliers' inability to obtain credit from lending institutions could lead to commercial disputes and possible supply chain interruptions to our business. In addition, the potential for future and/or continued adverse industry conditions may require us to provide financial assistance or other measures to ensure uninterrupted production of key components or materials used in the production of our products. The continuation or renewal of these industry conditions could have a material adverse effect on our existing and future revenues and net income.

Additionally, in the event of catastrophic acts of nature such as fires, tsunamis, hurricanes and earthquakes or a rapid increase in production demands, either we or our customers or other suppliers may experience supply shortages of raw materials or components. This could be caused by a number of factors, including a lack of production line capacity or manpower or working capital constraints. In order to manage and reduce the costs of purchased goods and services, we and others within our industry have been rationalizing and consolidating our supply base. As a result, there is greater dependence on fewer sources of supply for certain components and materials used in our products, which could increase the possibility of a supply shortage of any particular component. If we or one of our own suppliers experience a supply shortage, we may become unable to produce the affected products if we cannot procure the components from another source. Such production interruptions could impede a ramp-up in production and could have a material adverse effect on our business, results of operations and financial condition.

We consider the production capacities and financial condition of suppliers in our selection process, and expect that they will meet our delivery requirements. However, there can be no assurance that strong demand, capacity limitations, shortages of raw materials, labor disputes or other problems will not result in any shortages or delays in the supply of components to us.

Currency exchange rate fluctuations could adversely affect the Company's results.

We have significant foreign operations, for which the functional currencies are denominated primarily in euros, Swiss francs, Hong Kong dollars, Japanese yen and Canadian dollars. As the values of the currencies of the foreign countries in which we have operations increase or decrease relative to the U.S. dollar, the sales, expenses, profits, losses, assets and liabilities of our foreign operations, as reported in our consolidated financial statements, increase or decrease, accordingly. Approximately 21% of our revenues for the year ended October 3, 2014 were denominated in currencies other than the U.S. dollar. Approximately 9% were denominated in euros and approximately 7% were denominated in Canadian dollars with the remaining 5% denominated in various other foreign currencies. We may mitigate a portion of the impact of fluctuations in certain foreign currencies on our operations through the purchase of foreign currency swaps, forward contracts and options to hedge known commitments denominated in foreign currencies or to reduce the risk of changes in foreign currency exchange rates on foreign currency borrowings.

Because we rely on foreign suppliers and we sell products in foreign markets, we are susceptible to numerous international business risks that could increase our costs or disrupt the supply of our products.

Our international operations subject us to risks, including:

- economic and political instability;
- restrictive actions by foreign governments;
- opportunity costs and reputational damage related to the presence of counterfeit versions of the Company's products in such foreign markets;
- greater difficulty enforcing intellectual property rights and weaker laws protecting intellectual property rights;
- changes in import duties or import or export restrictions;
- timely shipping of product and unloading of product, including the timely rail/truck delivery to our warehouses and/or a customer's warehouse of our products;
- complications in complying with the laws and policies of the United States affecting the importation of goods, including duties, quotas and taxes;
- required compliance with U.S. laws that impact the Company's operations in foreign jurisdictions that don't impact local operating companies; and
- complications in complying with trade and foreign tax laws.

Any of these risks, including the cost of compliance with trade and foreign tax laws, could disrupt the supply of our products or increase our expenses. In particular, the uncertainty regarding the ability of certain European countries to continue to service their sovereign debt obligations and the related financial restructuring efforts by European governments may cause the value of several European currencies, including the euro, to fluctuate, which may adversely affect our non-U.S. dollar sales and earnings. As we have manufacturing operations in Italy, a significant disruption of the political or financial systems there could put these manufacturing operations at risk, which could ultimately adversely affect our profitability or operating results.

We may be subject to disruptions or failures in our information technology systems and network infrastructures that could have a material adverse effect on our business.

We rely on the efficient and uninterrupted operation of complex information technology systems and network infrastructures to operate our business. We also hold data in various data center facilities upon which our business depends. A disruption, infiltration or failure of our information technology systems or any of our data centers as a result of software or hardware malfunctions, system implementations or upgrades, computer viruses, third-party security breaches, employee error, theft or misuse, malfeasance, power disruptions, natural disasters or accidents could cause breaches of data security, loss of intellectual property and critical data and the release and misappropriation of sensitive competitive information. Any of these events could result in the loss of key information, impair our production and supply chain processes, harm our competitive position, damage our reputation with customers, cause us to incur significant costs to remedy any damages and ultimately materially and adversely affect our business, results of operations and financial condition. While we have implemented a number of protective measures, such measures may not be adequate or implemented properly to prevent or fully address the adverse effect of such events.

The inability to successfully defend claims from taxing authorities could adversely affect our financial condition, results of operations and cash flows.

We conduct business in many countries, which requires us to interpret the income tax laws and rulings in each of those taxing jurisdictions. Due to the subjectivity of tax laws in or between those jurisdictions, as well as the subjectivity of factual interpretations, our estimates of income tax liabilities may differ from actual payments or assessments. Claims from taxing authorities related to these differences could have an adverse impact on our financial condition, results of operations and cash flows.

We are subject to environmental, safety and human rights regulations.

We are subject to supranational, federal, state, local and foreign laws and other legal requirements related to the generation, storage, transport, treatment and disposal of materials as a result of our manufacturing and assembly operations. These laws include the Resource Conservation and Recovery Act (as amended), the Clean Air Act (as amended) and the Comprehensive Environmental Response, Compensation and Liability Act (as amended). Risk of environmental liability and changes associated with maintaining compliance with environmental laws is inherent in the nature of our business and there is no assurance that material liabilities or changes would not arise.

The Company is also subject to the requirement of Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act and SEC rules related thereto to conduct due diligence and disclose and report on whether certain minerals and metals, known as “conflict minerals,” are contained in the Company’s products and whether they originate from the Democratic Republic of Congo (“DRC”) and adjoining countries. Among other things, compliance with this rule could adversely affect the sourcing, availability and pricing of such materials if they are found to be used in the manufacture of the Company’s products, and this in turn could affect the costs associated with the Company’s products. As there may be only a limited number of suppliers offering “conflict free” conflict minerals, we cannot be sure that we will be able to obtain going forward the necessary conflict minerals from such suppliers in sufficient quantities or at competitive prices. Moreover, since the Company’s supply chain structure is complex, management may have difficulty verifying the origin of these materials and if they exist within the Company’s products and, as a result, the Company may be unable to certify that its products are DRC conflict mineral free. Also, we may face reputational challenges if we determine that certain of our products contain minerals not determined to be conflict free or if we are unable to sufficiently verify the origins of all conflict minerals used in our products through the procedures we may implement.

We rely on our credit facilities to provide us with sufficient working capital to operate our business.

Historically, we have relied upon our existing credit facilities to provide us with adequate working capital to operate our business. If our lenders reduce or terminate our access to amounts under our credit facilities, we may not have sufficient capital to fund our working capital needs and/or we may need to secure additional capital or financing to fund our working capital requirements or to repay outstanding debt under our credit facilities. We can make no assurance that we will be successful in ensuring our availability of amounts under our credit facilities or in connection with raising additional capital and that any amount, if raised, will be sufficient to meet our cash flow requirements. If we are not able to maintain our borrowing availability under our credit facilities and/or raise additional capital when needed, we may be forced to sharply curtail our efforts to manufacture and promote the sale of our products or to curtail our operations. Ultimately, we may be forced to cease operations.

Our debt covenants may limit our ability to complete acquisitions, incur debt, make investments, sell assets, merge or complete other significant transactions.

Our credit facilities and certain other of our debt instruments include limitations on a number of our activities, including our ability to:

- incur additional debt;
- create liens on our assets or make guarantees;
- make certain investments or loans;
- pay dividends; or
- dispose of or sell assets, make acquisitions above certain amounts or enter into a merger or similar transaction.

Our credit facilities also contain a number of financial covenants. The restrictive covenants in our credit facilities may limit our ability to engage in acts that may be in our best long term interests. A breach of any of the restrictive covenants in our credit facilities could result in a default under these facilities. If a default occurs, the lenders under our credit facilities may elect to declare all outstanding borrowings, together with accrued interest, to be immediately due and payable, to terminate any commitments they have to provide further borrowings and to exercise any other rights they have under the facilities or applicable law.

Our shares of common stock are thinly traded and our stock price may be volatile.

Because our common stock is thinly traded, its market price may fluctuate significantly more than the stock market in general or the stock prices of similar companies, which are exchanged, listed or quoted on NASDAQ. We believe there are approximately 4,760,000 shares of our Class A common stock held by non-affiliates as of November 28, 2014. Thus, our common stock will be less liquid than the stock of companies with broader public ownership, and as a result, the trading price for our shares of common stock may be more volatile. Among other things, trading of a relatively small volume of our common stock may have a greater impact on the trading price for our stock than would be the case if our public float were larger.

Our business is susceptible to adverse weather conditions or events.

Our success is in part affected by adverse weather conditions, including fires, floods, tornados, severe cold and other natural disasters. Such events have the tendency to create fluctuations in demand for our products which may impact our borrowing costs, increase our expenses and reduce our profitability. Moreover, our profitability is affected by our ability to successfully manage our inventory levels and demand for our products, which, in part depends upon the efficient operation of our production and delivery systems. These systems are vulnerable to damage or interruption from the aforementioned natural disasters. Such natural disasters could adversely impact our ability to meet delivery requirements of our customers, which may result in our need to incur extra costs to expedite production and delivery of product to meet customer demand. Any of these events could negatively impact our profitability.

ITEM PROPERTIES

2.

The Company maintains leased and owned manufacturing, warehousing, distribution and office facilities throughout the world. The Company believes that its facilities are well maintained and have capacity adequate to meet its current needs.

See Note 5 to the consolidated financial statements included elsewhere in this report for a discussion of the Company's lease obligations.

As of October 3, 2014, the Company's principal manufacturing (identified with an asterisk) and other locations are:

Alpharetta, Georgia (Marine Electronics)
Antibes, France (Diving)
Barcelona, Spain (Diving)
Batam, Indonesia* (Diving and Outdoor Equipment)

Binghamton, New York* (Outdoor Equipment)

Brussels, Belgium (Diving)

Burlington, Ontario, Canada (Marine Electronics, Outdoor Equipment, Watercraft)

Casarza Ligure, Italy* (Diving)

Chai Wan, Hong Kong (Diving)

Chatswood, Australia (Diving)
El Cajon, California (Diving)
Eufaula, Alabama* (Marine Electronics)
Little Falls, Minnesota* (Marine Electronics)
Manchester, New Hampshire* (Outdoor Equipment)
Mankato, Minnesota* (Marine Electronics)
Mexicali, Mexico* (Marine Electronics)
Old Town, Maine* (Watercraft)
Wendelstein, Germany (Diving)
Yokohama, Japan (Diving)
Zurich, Switzerland (Diving)

The Company's corporate headquarters is located in a leased facility in Racine, Wisconsin.

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND
5. ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Certain information with respect to this item is included in Notes 9 and 10 to the Company's consolidated financial statements included elsewhere in this report. The Company's Class A common stock is traded on the NASDAQ Global MarketSM under the symbol: JOUT. There is no public market for the Company's Class B common stock. However, the Class B common stock is convertible at all times at the option of the holder into shares of Class A common stock on a share for share basis. As of November 28, 2014, the Company had 642 holders of record of its Class A common stock and 27 holders of record of its Class B common stock. We believe the number of beneficial owners of our Class A common stock on that date was substantially greater.

A summary of the high and low closing prices for the Company's Class A common stock during each quarter of the years ended October 3, 2014, September 27, 2013 and September 28, 2012 and is as follows:

	First Quarter			Second Quarter			Third Quarter			Fourth Quarter		
	2014	2013	2012	2014	2013	2012	2014	2013	2012	2014	2013	2012
Stock prices:												
High	\$28.70	\$21.75	\$18.75	\$28.37	\$23.84	\$19.19	\$26.36	\$25.03	\$20.60	\$27.10	\$27.03	\$21.72
Low	25.26	18.63	13.73	21.57	19.92	15.35	19.82	22.43	15.60	22.47	24.75	20.16

Dividends

The Company's Articles of Incorporation provide that no dividend, other than a dividend payable in shares of the Company's common stock, may be declared or paid upon the Class B common stock unless such dividend is declared or paid upon both classes of common stock. Whenever a dividend (other than a dividend payable in shares of Company common stock) is declared or paid upon any shares of Class B common stock, at the same time there must be declared and paid a dividend on the shares of Class A common stock equal in value to 110% of the amount per share of the dividend declared and paid on the shares of Class B common stock. Whenever a dividend is payable in shares of Company common stock, such dividend must be declared or paid at the same rate on the Class A common stock and the Class B common stock.

Pursuant to the Company's revolving credit agreement dated September 16, 2013, the Company is limited in the amount of restricted payments (primarily dividends and repurchases of common stock) made during each fiscal year. The Company may declare, and pay, dividends in accordance with historical practices, but in no event may the aggregate amount of all dividends or repurchases of common stock exceed \$10 million in any fiscal year.

On October 8, 2013, the Company's Board of Directors declared a cash dividend of \$0.075 per share of Class A common stock and \$0.068 per share of Class B common stock payable on November 7, 2013 to shareholders of record on October 24, 2013. The Company continued paying quarterly dividends of \$0.075 per share of Class A common stock and \$0.068 per share of Class B common stock for each of the four quarters of 2014 (\$0.30 per Class A share and \$0.27 per Class B share on an annualized basis). Cash dividends paid in 2014 totaled \$2,955 and dividends payable of \$739 was included in current liabilities at October 3, 2014.

While the Board of Directors of the Company presently intends to continue the payment of regular quarterly cash dividends on the Company's common stock, they monitor and evaluate the Company's dividend practice quarterly and

may elect to increase, decrease or not pay a dividend at any time. The Company's ability to pay dividends could be affected by future business performance, liquidity, capital needs, alternative investment opportunities and debt covenants in its loan agreements.

Total Shareholder Return

The graph below compares on a cumulative basis the yearly percentage change since October 2, 2009 in the total return (assuming reinvestment of dividends) to shareholders on the Class A common stock with (a) the total return (assuming reinvestment of dividends) on The NASDAQ Stock Market-U.S. Index; (b) the total return (assuming reinvestment of dividends) on the Russell 2000 Index; and (c) the total return (assuming reinvestment of dividends) on a self-constructed peer group index. The Company's peer group consists of Arctic Cat Inc., Black Diamond Inc., Brunswick Corporation, Callaway Golf Company, Escalade Inc., Garmin Ltd., Jarden Corp., Marine Products Corporation, Nautilus, Inc. and Quiksilver Inc. The graph assumes \$100 was invested on October 2, 2009 in the Company's Class A common stock, The NASDAQ Stock Market-U.S. Index, the Russell 2000 Index and the peer group index.

* \$100 invested on October 2, 2009 in stock or index, including reinvestment of dividends.

ITEMSELECTED FINANCIAL DATA

6.

The following table presents selected consolidated financial data, which should be read along with the Company's consolidated financial statements and the notes to those statements and with "Item 7 – Management's Discussion and Analysis of Financial Condition and Results of Operations" included in or referred to elsewhere in this report. The operating results for the years ended October 3, 2014, September 27, 2013 and September 28, 2012 and the balance sheet data as of October 3, 2014 and September 27, 2013, are derived from the Company's audited consolidated financial statements included elsewhere herein. The operating results for the years ended September 30, 2011 and October 1, 2010, and the balance sheet data as of September 28, 2012, September 30, 2011 and October 1, 2010 are derived from the Company's audited consolidated financial statements which are not included in this report. The historical results are not necessarily indicative of results to be expected for future periods.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Unless otherwise stated, all monetary amounts in this Management's Discussion and Analysis of Financial Condition and Results of Operations, other than per share amounts, are stated in thousands.

Executive Overview

The Company designs, manufactures and markets high quality recreational products for the outdoor enthusiast. Through a combination of innovative products, strong marketing, a talented and passionate workforce and efficient distribution, the Company seeks to set itself apart from the competition. Its subsidiaries operate as a network that promotes innovation and leverages best practices and synergies, following the strategic vision set by executive management and approved by the Company's Board of Directors.

Highlights

Due primarily to harsh, prolonged winter weather conditions across much of North America during the first half of its fiscal year, the Company experienced a significant shift in the pacing of customer orders. The Company's full fiscal 2014 revenues declined by less than 0.5% versus the prior year thanks to a strong second half which increased over the same prior year period by 7% nearly offsetting the year over year decline in the first half of the fiscal year. Operating profit in the current year fell \$8,900, or 35%, compared to last year and was significantly impacted by \$8,475 of non-cash impairment charges recognized in the third quarter of fiscal 2014 related to certain intangible assets in the Outdoor Equipment segment. These charges were offset in part by the \$1,600 cash recovery from the Jetboil indemnity escrow which is described in greater detail herein.

Results of Operations

Summary consolidated financial results from continuing operations for the fiscal years presented were as follows:

(thousands, except per share data)	2014	2013	2012
Net sales	\$425,410	\$426,461	\$412,292
Gross profit	168,613	171,049	164,322
Operating expenses	151,922	145,458	146,409
Operating profit	16,691	25,591	21,413
Interest expense	788	1,285	2,258
Other (income) expense, net	(1,519)	(354)	(771)
Income tax expense (benefit)	8,299	5,333	9,792
Net income	9,123	19,327	10,134

The Company's internal and external sales and operating profit (loss) by business segment for each of the three most recent completed fiscal years were as follows:

	2014	2013	2012
Net sales:			
Marine Electronics	\$249,561	\$247,744	\$231,234
Outdoor Equipment	47,443	44,223	35,328
Watercraft	49,492	50,858	58,201
Diving	79,559	84,536	87,995

Other / Eliminations	(645)	(900)	(466)
	\$425,410	\$426,461	\$412,292

	2014	2013	2012
Operating profit (loss):			
Marine Electronics	\$ 30,722	\$ 32,172	\$ 25,230
Outdoor Equipment	(3,726)	2,180	2,831
Watercraft	210	(2,116)	(408)
Diving	3,596	5,694	6,408
Other / Eliminations	(14,111)	(12,339)	(12,648)
	\$ 16,691	\$ 25,591	\$ 21,413

See Note 12 to the Consolidated Financial Statements included elsewhere in this report for the definition of segment net sales and operating profit.

Fiscal 2014 vs. Fiscal 2013

Net Sales

Net sales in 2014 decreased by under one half of one percent to \$425,410 compared to \$426,461 in 2013. While the first half of the year lagged the prior year by 7%, due in large part to extreme cold weather conditions across much of North America, the second half of the year increased by 7% as the weather improved and the Company saw strong demand for its new products across most of its businesses.

Net sales for the Marine Electronics business increased by \$1,817, or 1% during 2014. The uptick from fiscal 2013 was driven primarily by exceptional new product performance in the latter part of the fiscal year and growth in the Minn Kota product line.

Outdoor Equipment net sales increased \$3,220, or 7%, in 2014 as a result of a full twelve months of sales for Jetboil versus 10.5 months in the prior year as well as a 14% increase in military tent sales year over year.

The Watercraft business experienced a decrease in net sales of 3%, due primarily to our decision to exit unprofitable international markets.

Net sales for the Diving business declined \$4,977, or 6%, year-over-year, due primarily to delays in new product shipments and weak diving markets in our key regions.

Cost of Sales

Cost of sales was \$256,797, or 60.4% of net sales, on a consolidated basis for the year ended October 3, 2014 compared to \$255,412 or 59.9% of net sales, in the prior year. With the exception of resin prices in the Watercraft segment, costs of raw materials and components increased only slightly over the prior year while modest increases in labor rates were nearly offset by process improvements in each of the business segments.

Gross Profit

Gross profit of \$168,613 was 39.6% of net sales on a consolidated basis for the year ended October 3, 2014 compared to \$171,049 or 40.1% of net sales in the prior year.

Gross profit in the Marine Electronics business decreased by \$262 from the prior year despite the 1% increase in net sales due primarily to new pricing strategies which were implemented to enhance the Company's competitive position.

Outdoor Equipment gross profit increased by \$1,464 from 2013 due primarily to the increase in sales volume and improved efficiencies particularly related to the integration of Jetboil.

Gross profit in the Watercraft segment was \$101 lower than 2013 levels due primarily to the increase in resin prices and lower sales volumes, which were nearly offset by a favorable sales mix due to the segment's de-emphasis on low-margin products.

The \$3,592 decrease in gross profit of the Diving segment was driven primarily by the 6% reduction in sales volume noted above.

Operating Expenses

Operating expenses overall increased from the prior year by \$6,464. The increase was significantly driven by the \$8,475 impairment charge related to Jetboil intangible assets as well as higher health care costs, offset in part by a \$1,600 cash recovery from the Jetboil indemnity escrow, lower restructuring charges in the Watercraft segment and lower incentive compensation expense.

Operating expenses for the Marine Electronics segment increased by \$1,188 from 2013 levels. The increase was due mainly to higher sales volume related costs and higher professional services expense in the current year.

Outdoor Equipment operating expenses increased by \$7,371 from the prior year due primarily to \$8,475 of impairment charges recognized on Jetboil intangible assets, which was partially offset by a \$1,600 cash recovery from the Jetboil indemnity claim. See further discussion of the valuation of the Jetboil intangible assets at Note 18 to our accompanying consolidated financial statements included elsewhere herein.

In the Watercraft segment, operating expenses decreased \$2,427 from fiscal 2013 due primarily to lower restructuring costs related to our decision to exit international markets and lower infrastructure costs resulting from those efforts.

Operating expenses for the Diving business decreased by \$1,494, or 4%, year over year due primarily to cost containment efforts in light of lower sales volumes.

Operating Results

The Company's operating profit was \$16,691 in 2014 compared to an operating profit of \$25,591 in fiscal 2013. Marine Electronics operating profit decreased by \$1,450 to \$30,722 from \$32,172 in the prior year. The operating loss for Outdoor Equipment was \$3,726 compared to operating profit of \$2,180 in the prior year due primarily to \$6,875 of impairment charges on certain Jetboil intangible assets, net of indemnity escrow recoveries related to the acquisition, which were recognized in the third quarter. Excluding the effect of these charges, operating profit for this segment would have been \$969 higher than in the prior year. Despite a slight decline in net sales year over year, operating results for the Watercraft business increased by \$2,326 to a profit of \$210 in fiscal 2014. Operating profit for the Diving business declined \$2,098 from fiscal 2013 to \$3,596 in 2014.

Other Income and Expenses

Interest expense of \$788 decreased from the prior year by \$497, due largely to lower interest rates and lower principal balances. Interest income was approximately \$100 in both years. Net other income of \$1,434 in fiscal 2014 increased from fiscal 2013 by \$1,171. The current year other income included currency gains of \$427 and market gains and dividends of \$965 on deferred compensation plan assets. In the prior year, this line item included \$929 of currency losses which were more than offset by market gains and dividends of \$1,265 on the deferred compensation plan assets. The dividends and market gains and losses on deferred compensation plan assets recognized in the Consolidated Statement of Operations in Other (income) expense, net are offset as deferred compensation expense in our Operating expenses.

Pretax Income and Income Taxes

The Company realized pretax income of \$17,422 in fiscal 2014 compared to \$24,660 in fiscal 2013. The Company recorded income tax expense of \$8,299 in 2014, which equated to an effective tax rate of 47.6%, compared to \$5,333 in 2013, which equated to an effective tax rate of 21.6%. The 2013 tax expense reflects the net reduction of the Company's deferred tax asset valuation allowance. See further discussion of the deferred tax asset valuation allowance in Note 6 to the Consolidated Financial Statements found elsewhere in this report.

Net Income

The Company recognized net income of \$9,123, or \$0.90 per diluted common share in fiscal 2014 compared to \$19,327 in fiscal 2013, or \$1.95 per diluted common share, based on the factors discussed above.

Fiscal 2013 vs. Fiscal 2012

Net Sales

Net sales in fiscal 2013 increased 3.4% to \$426,461 compared to \$412,292 in fiscal 2012. The increase was driven primarily by the success of the Marine Electronics business and incremental sales from the acquisition of Jetboil, which more than offset declining sales in Diving and Watercraft.

Net sales for the Marine Electronics business increased by \$16,510, or 7.1% during fiscal 2013. Innovative products such as Minn Kota's i-Pilot wireless GPS trolling system and i-Pilot Link automatic boat control helped fuel the growth year-over-year.

Outdoor Equipment net sales increased \$8,895, or 25.2%, in 2013 as a result of the acquisition of Jetboil, which was offset in part by declines in the consumer camping market and in U.S. military spending.

The Watercraft business experienced a decrease in net sales of 12.6%, or \$7,343, due primarily to a de-emphasis on low-margin products and our decision to exit international markets.

Net sales for the Diving business declined \$3,459, or 3.9%, year-over-year, due primarily to continued economic turmoil in the southern European and Middle Eastern markets.

Cost of Sales

Cost of sales was \$255,412, or 59.9% of net sales on a consolidated basis for the year ended September 27, 2013 compared to \$247,970 or 60.1% of net sales in fiscal 2012. Costs of raw materials and components increased only slightly over 2012 while modest increases in labor rates were more than offset by process improvements in each of the business segments.

Gross Profit

Gross profit of \$171,049 was 40.1% of net sales on a consolidated basis for the year ended September 27, 2013 compared to \$164,322 or 39.9% of net sales for fiscal 2012.

Gross profit in the Marine Electronics business increased by \$6,658 from fiscal 2012 due primarily to the 7.1% increase in sales volume.

Outdoor Equipment gross profit increased by \$2,704 from fiscal 2012 due to the acquisition of Jetboil which was offset in part by reductions in gross profit in the consumer and military tent businesses driven by decreased sales volume.

Gross profit in the Watercraft segment was \$1,537 lower than fiscal 2012 levels due primarily to the 12.6% decline in sales volume offset in part by favorable mix resulting from the de-emphasis on low-margin products during the year.

The \$1,062 decrease in gross profit of the Diving segment was driven primarily by the 3.9% reduction in sales volume noted above offset in part by the effect of price increases.

Operating Expenses

Operating expenses overall increased from the prior year by \$2,549. The increase was driven by a \$3,500 favorable settlement with an insurance carrier that was recognized as an expense reduction in fiscal 2012 and the addition of Jetboil operating expenses in fiscal 2013, which increases were offset in part by decreases in bad debt expense, health care costs and legal expense in fiscal 2013.

Operating expenses for the Marine Electronics segment decreased by \$285 from 2012 levels. The decrease was due mainly to the closure of the Italian sales office at the end of fiscal 2012 and lower legal costs in fiscal 2013, offset in part by higher volume driven expenses.

Outdoor Equipment operating expenses increased by \$3,355 from fiscal 2012 due to the Jetboil acquisition which increase was partially offset by the additional recovery of flood related losses from 2011 in fiscal 2013.

The Watercraft business saw an increase in operating expenses of \$171 from fiscal 2012, due primarily to the favorable insurance settlement of \$3,500 recognized as a reduction to operating expense in fiscal 2012 and higher restructuring costs in fiscal 2013, which were nearly offset by lower infrastructure costs in fiscal 2013 due to European and U.S. restructuring efforts. See further discussion of the impact of the insurance settlement at Note 13 to the Consolidated Financial Statements included elsewhere in this report.

Operating expenses for the Diving business decreased by \$348 year over year due primarily to the favorable impact of currency translation.

Operating Results

The Company's operating profit was \$25,591 in fiscal 2013 compared to an operating profit of \$21,413 in fiscal 2012. Marine Electronics operating profit increased by \$6,942 to \$32,172 from \$25,230 in fiscal 2012. Despite the addition of Jetboil, Outdoor Equipment operating profit declined year over year by \$651 to \$2,180. The Watercraft business incurred an operating loss in fiscal 2013 of \$2,116, compared to a loss of \$408 in fiscal 2012. Diving operating profit declined \$714 from \$6,408 in fiscal 2012 to \$5,694 in 2013.

Other Income and Expenses

Interest expense of \$1,285 decreased from fiscal 2012 by \$973, due largely to lower interest rates and lower expense related to the amortization of deferred losses on interest rate swaps. Interest income was approximately \$100 in both years. Net other income of \$263 in fiscal 2013 decreased from fiscal 2012 net other income of \$631. Fiscal 2013 other income included currency losses of \$929 which were more than offset by market gains and dividends of \$1,265 on deferred compensation plan assets. In fiscal 2012, this line item included \$213 of currency losses and market gains and dividends of \$1,320 on the deferred compensation plan assets. The dividends and market gains and losses on deferred compensation plan assets recognized in Other Income and Expense are offset as deferred compensation expense in Operating Expenses.

Pretax Income and Income Taxes

The Company realized pretax income of \$24,660 in fiscal 2013 compared to \$19,926 in fiscal 2012. The Company recorded income tax expense of \$5,333 in fiscal 2013, which equated to an effective tax rate of 21.6% for fiscal 2013, compared to \$9,792 in fiscal 2012, which equated to an effective tax rate of 49.1% for fiscal 2012. The fiscal 2013 tax expense reflects the net reduction of the Company's deferred tax asset valuation allowance. See further discussion of the deferred tax asset valuation allowance in Note 6 to the Consolidated Financial Statements found elsewhere in this report.

Net Income

The Company recognized net income of \$19,327, or \$1.95 per diluted common share in fiscal 2013 compared to \$10,134 in fiscal 2012, or \$1.03 per diluted common share, based on the factors discussed above.

Financial Condition, Liquidity and Capital Resources

The Company's cash flows from operating, investing and financing activities, as reflected in the accompanying Consolidated Statements of Cash Flows, are summarized in the following table:

(thousands)	October 3 2014	Year Ended September 27 2013	September 28 2012
Cash provided by (used for):			
Operating activities	\$33,218	\$30,003	\$31,764
Investing activities	(11,887)	(31,753)	(10,789)
Financing activities	(3,498)	(1,041)	(5,256)
Effect of foreign currency rate changes on cash	(2,734)	(419)	(1,329)
Increase (Decrease) in cash and cash equivalents	\$15,099	\$(3,210)	\$14,390

Operating Activities

The following table sets forth the Company's working capital position at the end of each of the years shown:

(thousands, except share data)	October 3 2014	September 27 2013
Current assets	\$ 197,550	\$ 188,572
Current liabilities	60,232	63,372
Working capital	\$ 137,318	125,200
Current ratio	3.3:1	3:1

Cash flows provided by operations totaled \$33,218, \$30,003 and \$31,764 in fiscal 2014, 2013 and 2012, respectively. The increase in operating cash flow over the prior year was driven largely by net changes in operating assets. Although net income declined versus the prior year, that change was significantly impacted by non-cash impairment charges recognized in the current year on certain Jetboil intangible assets of \$8,475.

Depreciation and amortization charges were \$10,863, \$10,070 and \$11,882 in fiscal 2014, 2013 and 2012, respectively.

Investing Activities

Cash flows used for investing activities were \$11,887, \$31,753 and \$10,789 in fiscal 2014, 2013 and 2012, respectively. The purchase of Jetboil in fiscal 2013 used cash of \$15,420. Expenditures for property, plant and equipment were \$13,263, \$16,333 and \$12,032 in fiscal 2014, 2013 and 2012, respectively. In general, the Company's ongoing capital expenditures are primarily related to tooling for new products and facilities and information systems improvements.

Financing Activities

The following table sets forth the Company's debt and capital structure at the end of the past two fiscal years:

(thousands, except share data)	2014	2013
Current debt	\$ 360	\$ 539
Long-term debt	7,431	7,794
Total debt	7,791	8,333
Shareholders' equity	198,458	197,668
Total capitalization	\$ 206,249	206,001
Total debt to total capitalization	4 %	4 %

Cash flows used for financing activities totaled \$3,498 in fiscal 2014 compared to \$1,041 in 2013 and \$5,256 in 2012. Payments on long-term debt were \$538, \$528 and \$6,112 in fiscal 2014, 2013 and 2012, respectively. The Company had current maturities of its long-term debt of \$360 and \$539 as of October 3, 2014 and September 27, 2013, respectively, and no outstanding borrowings on its revolving credit facilities as of the end of either fiscal year. The Company had outstanding borrowings on long-term debt (net of current maturities) of \$7,431 and \$7,794 as of October 3, 2014 and September 27, 2013, respectively.

The Company's term loans have a maturity date of September 29, 2029. Each term loan requires monthly payments of principal and interest. Interest on the aggregate outstanding amount of the term loans is based on the prime rate plus an applicable margin. The interest rate in effect on the term loans was 5.25% at October 3, 2014 and September 27, 2013.

The term loans are guaranteed in part under the United States Department of Agriculture Rural Development program and are secured with a first priority lien on land, buildings, machinery and equipment of the Company's domestic subsidiaries and a second lien on working capital and certain patents and trademarks of the Company and its subsidiaries. Any proceeds from the sale of secured property are first applied against the related term loans and then against the Revolvers (as defined below).

The aggregate term loan borrowings are subject to a pre-payment penalty. The penalty is currently 5% of the pre-payment amount, and the penalty will decrease by 1% annually on the anniversary date of the effective date of the loan agreement.

On September 16, 2013, the Company and certain of its subsidiaries entered into a new credit facility with PNC Bank National Association and certain other lenders which terminated the Amended Revolving Credit and Security agreement with PNC Bank National Association and the other lenders named therein, dated as of November 16, 2010. The new credit facility consists of a Revolving Credit Agreement dated September 16, 2013 among the Company, certain of the Company's subsidiaries, PNC Bank, National Association, as lender and as administrative agent and the other lenders named therein (the "Revolving Credit Agreement" or "Revolver"). The Revolver has a 60 month term and provides for borrowing of up to an aggregate principal amount not to exceed \$90,000 with an accordion feature that gives the Company the option to increase the maximum seasonal financing availability subject to the conditions of the Revolving Credit Agreement and subject to the approval of the lenders. The Revolver imposes a seasonal borrowing limit such that borrowing may not exceed \$60,000 from the period June 30th through October 31st of each year under the agreement.

The interest rate on the Revolver resets each quarter and is based on LIBOR plus an applicable margin. The applicable margin ranges from 1.25 percent to 2.00 percent and is dependent on the Company's leverage ratio for the trailing twelve month period. The interest rate on the Revolver at October 3, 2014 and September 27, 2013 was approximately 1.4%.

The Revolver is secured with a first priority lien on working capital assets and certain patents and trademarks of the Company and its subsidiaries and a second priority lien on land, buildings, machinery and equipment of the Company's domestic subsidiaries. The Revolving Credit Agreement limits asset or stock acquisitions to no more than \$20,000 in the event that the Company's consolidated leverage ratio is greater than 2.5 times. No limits are imposed if the Company's consolidated leverage ratio is less than 2.5 times and the remaining borrowing availability under the Revolver is greater than \$10,000 at the time of the acquisition. The Revolving Credit Agreement limits the amount of restricted payments (primarily dividends and repurchases of common stock) made during each fiscal year. The Company may declare, and pay, dividends in accordance with historical practices, but in no event may the aggregate amount of all dividends or repurchases of common stock exceed \$10,000 in any fiscal year. The Revolving Credit Agreement includes maximum leverage ratio and minimum interest coverage ratio limitations.

Concurrent with the execution of the Revolving Credit Agreement described above, Johnson Outdoors Canada Inc. repaid and terminated its Amended Revolving Credit and Security Agreement with PNC Bank Canada Branch dated as of November 16, 2010.

As of October 3, 2014, the Company held approximately \$60,135 of cash and cash equivalents in bank accounts in foreign jurisdictions.

Contractual Obligations and Off Balance Sheet Arrangements

The Company has contractual obligations and commitments to make future payments under its existing credit facilities, including interest, operating leases and open purchase orders. The following schedule details these significant contractual obligations at October 3, 2014.

	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Long-term debt	\$ 7,791	\$ 360	\$ 757	\$ 842	\$ 5,832
Operating lease obligations	22,694	6,284	7,376	4,039	4,995
Open purchase orders	47,544	47,544	-	-	-
Contractually obligated interest payments	3,481	400	744	659	1,678
Total contractual obligations	\$ 81,510	\$ 54,588	\$ 8,877	\$ 5,540	\$ 12,505

The Company utilizes letters of credit primarily as security for the payment of future claims under its workers' compensation insurance. Letters of credit outstanding at October 3, 2014 were \$691 compared to \$846 on September 27, 2013 and were included in the Company's total loan availability. The Company had no unsecured revolving credit facilities at its foreign subsidiaries as of October 3, 2014 or September 27, 2013.

The Company has no other off-balance sheet arrangements.

The Company anticipates making contributions to its defined benefit pension plans of \$663 through October 2, 2015.

Market Risk Management

Foreign Exchange Risk

The Company has significant foreign operations, for which the functional currencies are denominated primarily in euros, Swiss francs, Hong Kong dollars, Japanese yen and Canadian dollars. As the values of the currencies of the foreign countries in which the Company has operations increase or decrease relative to the U.S. dollar, the sales, expenses, profits, losses, assets and liabilities of the Company's foreign operations, as reported in the Company's consolidated financial statements, increase or decrease, accordingly. Approximately 21% of the Company's revenues for the fiscal year ended October 3, 2014 were denominated in currencies other than the U.S. dollar. Approximately 9% were denominated in euros and approximately 7% were denominated in Canadian dollars, with the remaining 5% denominated in various other foreign currencies. Changes in foreign currency exchange rates can cause unexpected financial losses or cash flow needs.

The Company mitigates the impact on its operating results of a portion of the fluctuations in certain foreign currencies through the use of foreign currency forward contracts. Foreign currency forward contracts enable the Company to lock in the foreign currency exchange rate for a fixed amount of currency to be paid or received on a specified date in the future. The Company uses such foreign currency forward contracts to mitigate the risk associated with changes in foreign currency exchange rates on financial instruments and known commitments denominated in foreign currencies.

Interest Rate Risk

The Company operates in a seasonal business and experiences significant fluctuations in operating cash flow as working capital needs increase in advance of the Company's primary selling and cash generation season, and decline as accounts receivable are collected and cash is accumulated or debt is repaid. The Company's goal in managing its interest rate risk is to maintain a mix of floating rate and fixed rate debt such that permanent non-equity capital needs are largely funded with long term fixed rate debt and seasonal working capital needs are funded with short term floating rate debt.

Commodities

Certain components used in the Company's products are exposed to commodity price changes. The Company manages this risk through instruments such as purchase orders and non-cancelable supply contracts. Primary commodity price exposures include costs associated with metals, resins and packaging materials.

Impact of Inflation

The Company anticipates that changing costs of basic raw materials may impact future operating costs and, accordingly, the prices of its products. The Company is involved in continuing programs to mitigate the impact of cost increases through changes in product design and identification of sourcing and manufacturing efficiencies. Price increases and, in certain situations, price decreases are implemented for individual products, when appropriate.

The Company's results of operations and financial condition are presented based on historical cost. The Company does not believe that inflation has significantly affected its results of operations.

Sensitivity to Changes in Value

The estimates that follow are intended to measure the maximum potential fair value or earnings the Company could lose in one year from adverse changes in market interest rates. The calculations are not intended to represent actual losses in fair value or earnings that the Company expects to incur. The estimates do not consider favorable changes in market rates. The table below presents the estimated maximum potential loss in fair value and annual income before income taxes from a 100 basis point movement in interest rates on the Company's term loans outstanding at October 3, 2014:

(thousands)	Estimated Impact on	
	Fair Value	Income Before Income Taxes
Interest rate instruments	\$ -	\$ 81

Critical Accounting Estimates

The Company's management discussion and analysis of its financial condition and results of operations are based upon the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of its assets, liabilities, sales and expenses, and related footnote disclosures. On an on-going basis, the Company evaluates its estimates for product returns, bad debts, inventories, long lived assets and goodwill, income taxes, warranty obligations, pensions and other post-retirement benefits, litigation and other subjective matters impacting the financial statements. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its consolidated financial statements. Management has discussed these policies with the Audit Committee of the Company's Board of Directors.

Allowance for Doubtful Accounts

Allowances for doubtful accounts are estimated by the individual operating companies based on estimates of losses related to customer accounts receivable balances. Estimates are developed by using standard quantitative measures based on historical losses, adjusting for current economic conditions and, in some cases, evaluating specific customer accounts for risk of loss. The establishment of reserves requires the use of judgment and assumptions regarding the potential for losses on receivable balances. Though the Company considers these balances adequate and proper,

changes in economic conditions in specific markets in which the Company operates and any specific customer collection issues the Company identifies could have a favorable or unfavorable effect on required reserve balances.

Inventories

The Company values inventory at the lower of cost (determined using the first-in first-out method) or market. Management's judgment is required to determine the reserve for obsolete or excess inventory. Inventory on hand may exceed future demand either because the product is outdated or because the amount on hand is more than will be used to meet future needs. Inventory reserves are estimated by the individual operating companies using standard quantitative measures based on criteria established by the Company. The Company also considers current forecast plans, as well as market and industry conditions in establishing reserve levels. Though the Company considers these reserve balances to be adequate, changes in economic conditions, customer inventory levels or competitive conditions could have a favorable or unfavorable effect on required reserve balances.

Deferred Taxes

The Company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. While the Company has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event the Company were to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to income in the period such determination was made. Likewise, should the Company determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax assets would increase income in the period such determination was made. See further discussion of the impact of the adjustment to the deferred tax asset valuation allowance at Note 6 to the consolidated financial statements included elsewhere in this report.

Goodwill and Other Intangible Assets Impairment

Goodwill and indefinite-lived intangible assets are tested for impairment annually or more frequently if events or changes in circumstances indicate that the assets might be impaired. Generally, annual impairment tests are performed by the Company in the fourth quarter of each fiscal year.

In assessing the recoverability of the Company's goodwill, the Company estimates the fair value of the businesses to which the goodwill relates. Fair value is estimated using a discounted cash flow analysis. If the fair value of a reporting unit exceeds its net book value, no impairment exists. When fair value is less than the carrying value of the net assets and related goodwill, an impairment test is performed to measure and recognize the amount of the impairment loss, if any. The Company recognized goodwill impairment charges of \$6,475 in 2014. See further discussion at Note 18 to the consolidated financial statements included elsewhere in this report.

The discounted cash flow analysis used to estimate fair value requires a number of key estimates and assumptions. The Company estimates the future cash flows of the reporting units based on historical and forecasted revenues and operating costs and applies a discount rate to the estimated future cash flows for purposes of the valuation. This discount rate is based on the estimated weighted average cost of capital, which includes certain assumptions made by management such as market capital structure, market betas, the risk-free rate of return and estimated costs of borrowing. Changes in these key estimates and assumptions, or in other assumptions used in this process, could materially affect our impairment analysis in a given year.

In assessing the recoverability of the Company's other indefinite lived intangible assets, the Company estimates the fair value of the various intangible assets. The fair value of trademarks and patents is estimated using the relief from royalty method. If the fair value of an intangible asset exceeds its net book value, no impairment exists. When fair value is less than the carrying value of the intangible asset, an impairment loss is recognized for the amount of the difference. The Company recognized impairment charges of \$2,000 on indefinite lived intangible assets in 2014. See

further discussion at Note 18 to the consolidated financial statements included elsewhere in this report.

A number of factors, many of which the Company has no ability to control, could affect its financial condition, operating results and business prospects and could cause actual results to differ from the estimates and assumptions that the Company uses in preparing its financial statements. These factors include: a prolonged global economic crisis, a significant decrease in demand for the Company's products, a significant adverse change in legal factors or in the business climate, an adverse action or assessment by a regulator and successful efforts by the Company's competitors to gain market share.

Impairment of Long-Lived Assets and Long-Lived Assets to be Disposed of

We evaluate long-lived assets for impairment whenever events or changes in circumstances, such as unplanned negative cash flow indicate that the carrying amount of an asset group may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset group to future undiscounted cash flows expected to be generated by the asset group. If such assets are determined to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. Application of alternative assumptions, such as changes in the estimate of future cash flows, could produce significantly different results. Because of the significance of the judgments and estimation processes, it is likely that materially different amounts could be recorded if we used different assumptions or if the underlying circumstances were to change.

Warranties

The Company accrues a warranty reserve for estimated costs to provide warranty services. Warranty reserves are estimated by the individual operating companies using standard quantitative measures based on criteria established by the Company. Estimates of costs to service its warranty obligations are based on historical experience, expectation of future conditions and known product issues. To the extent the Company experiences increased warranty claim activity or increased costs associated with servicing those claims, revisions to the estimated warranty reserve would be required. The Company engages in product quality programs and processes, including monitoring and evaluating the quality of its suppliers, to help minimize warranty obligations.

ITEMQUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

7A.

Information with respect to this item is included in Management's Discussion and Analysis of Financial Condition and Results of Operations under the heading "Market Risk Management."

ITEMFINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Information with respect to this item is included in the Company's consolidated financial statements attached to this report on pages F-1 to F-40.

ITEMCHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL 9. DISCLOSURE

None.

ITEMCONTROLS AND PROCEDURES

9A.

(a) Evaluation of Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that the

information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to its management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. The Company carried out an evaluation as of October 3, 2014, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of October 3, 2014 at reaching a level of reasonable assurance. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. The Company has designed its disclosure controls and procedures to reach a level of reasonable assurance of achieving the desired control objectives.

The report of management required under this Item 9A is included on page F-2 of the Company's Consolidated Financial Statements attached to this Report under the heading "Management's Report on Internal Control over Financial Reporting" and is incorporated herein by reference.

(b) Changes in Internal Control over Financial Reporting.

There was no change in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) that occurred during the Company's most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

(c) Attestation Report of Independent Registered Public Accounting Firm

McGladrey LLP, the independent registered public accounting firm who audited the Company's consolidated financial statements, has issued an attestation report on the Company's internal control over financial reporting, which is contained in the Company's consolidated financial statements under the heading "Report of Independent Registered Public Accounting Firm on Internal Control over Financial Reporting."

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Johnson Outdoors Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) of the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed to provide reasonable assurance to the Company's management and board of directors regarding the preparation and fair presentation of published financial statements. The Company's internal control over financial reporting includes those policies and procedures that:

- (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company's internal control over financial reporting as of October 3, 2014. In making this assessment, management used the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in 1992. Based on our assessment, management believes that, as of October 3, 2014, the Company's internal control over financial reporting was effective based on those criteria.

Chairman and Chief Executive Officer

/s/ David W. Johnson
Vice President and Chief Financial Officer

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Board of Directors and Shareholders
Johnson Outdoors Inc.

We have audited Johnson Outdoors Inc.'s internal control over financial reporting as of October 3, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992. Johnson Outdoors Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (a) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (b) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (c) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Johnson Outdoors Inc. maintained, in all material respects, effective internal control over financial reporting as of October 3, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of Johnson Outdoors Inc. and our report dated December 5, 2014 expressed an unqualified opinion.

/s/ McGladrey LLP
Milwaukee, Wisconsin
December 5, 2014

F-3

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders
Johnson Outdoors Inc.

We have audited the accompanying consolidated balance sheets of Johnson Outdoors Inc. as of October 3, 2014 and September 27, 2013, and the related consolidated statements of operations, comprehensive income, shareholders' equity, and cash flows for each of the three years in the period ended October 3, 2014. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Johnson Outdoors Inc. as of October 3, 2014 and September 27, 2013, and the results of their operations and their cash flows for each of the three years in the period ended October 3, 2014, in conformity with U.S. generally accepted accounting principles.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Johnson Outdoors Inc.'s internal control over financial reporting as of October 3, 2014, based on criteria established in Internal Control — Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission in 1992, and our report dated December 5, 2014 expressed an unqualified opinion on the effectiveness of Johnson Outdoors Inc.'s internal control over financial reporting.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
OCTOBER 3, 2014

(IN THOUSANDS EXCEPT SHARE AND PER SHARE AMOUNTS)

1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business

Johnson Outdoors Inc. (the “Company”) is an integrated, global outdoor recreation products company engaged in the design, manufacture and marketing of brand name outdoor equipment, diving, watercraft and marine electronics products.

Principles of Consolidation

The consolidated financial statements include the accounts of Johnson Outdoors Inc. and all majority owned subsidiaries and are stated in conformity with U.S. generally accepted accounting principles. Intercompany accounts and transactions have been eliminated upon consolidation.

Use of Estimates

The preparation of financial statements requires management to make estimates and assumptions that impact the reported amounts of assets, liabilities and operating results and the disclosure of commitments and contingent liabilities. Actual results could differ significantly from those estimates.

Fiscal Year

The Company’s fiscal year ends on the Friday nearest September 30. The fiscal year ended October 3, 2014 (hereinafter 2014) comprised 53 weeks. The fiscal years ended September 27, 2013 (hereinafter 2013), and September 28, 2012 (hereinafter 2012) each comprised 52 weeks.

Cash and Cash Equivalents

The Company considers all short-term investments in interest-bearing bank accounts, and all securities and other instruments with an original maturity of three months or less, to be equivalent to cash. Cash equivalents are stated at cost which approximates market value.

The Company maintains cash in bank accounts in excess of insured limits. The Company has not experienced any losses and does not believe that significant credit risk exists as a result of this practice.

Accounts Receivable

Accounts receivable are recorded at face value less an allowance for doubtful accounts. The allowance for doubtful accounts is based on a combination of factors. In circumstances where specific collection concerns exist, a reserve is established to reduce the amount recorded to an amount the Company believes will be collected. For all other customers, the Company recognizes allowances for doubtful accounts based on historical experience of bad debts as a percent of outstanding accounts receivable for each business unit. Uncollectible accounts are written off against the allowance for doubtful accounts after collection efforts have been exhausted. The Company typically does not require collateral on its accounts receivable.

Inventories

The Company values inventory at the lower of cost (determined using the first-in first-out method) or market. Management's judgment is required to determine the reserve for obsolete or excess inventory. Inventory on hand may exceed future demand either because the product is outdated or because the amount on hand is more than will be used to meet future needs. Inventory reserves are estimated by the individual operating companies using standard quantitative measures based on criteria established by the Company. The Company also considers current forecast plans, as well as market and industry conditions in establishing reserve levels. Though the Company considers these reserve balances to be adequate, changes in economic conditions, customer inventory levels or competitive conditions could have a favorable or unfavorable effect on required reserve balances.

Inventories at the end of the respective fiscal years consisted of the following:

	October 3 2014	September 27 2013
Raw materials	\$ 27,295	\$ 27,935
Work in process	72	198
Finished goods	38,974	48,230
	\$ 66,341	\$ 76,363

F-10

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Depreciation of property, plant and equipment is determined by straight-line methods over the following estimated useful lives:

Property improvements	5-20 years
Buildings and improvements	20-40 years
Furniture, fixtures and equipment	3-10 years

Upon retirement or disposition, cost and the related accumulated depreciation are removed from the applicable account and any resulting gain or loss is recognized in the results of operations.

Property, plant and equipment at the end of the respective years consisted of the following:

	2014	2013
Property improvements	\$633	\$596
Buildings and improvements	20,956	19,379
Furniture, fixtures and equipment	133,179	126,733
	154,768	146,708
Less accumulated depreciation	108,668	103,314
	\$46,100	\$43,394

Goodwill

The Company applies a fair value-based impairment test to the carrying value of goodwill on an annual basis as of the last day of the eleventh month of the Company's fiscal year and, if certain events or circumstances indicate that an impairment loss may have been incurred, on an interim basis.

The analysis of potential impairment of goodwill requires a two-step process. The first step is the estimation of the fair value of the applicable reporting unit. Estimated fair value is based on management judgments and assumptions and the Company cannot predict what future events may occur that could adversely affect the reported value of its goodwill. The fair values as determined by management are compared with the aggregate carrying values of the reporting units. If the fair value of the reporting unit is greater than its carrying amount, there is no impairment. If the reporting unit carrying amount is greater than the fair value, then the second step must be completed to measure the amount of impairment, if any.

The second step calculates the implied fair value of the goodwill which is compared to its carrying value. If the implied fair value is less than the carrying value, an impairment loss is recognized equal to the difference.

See Note 18 for a discussion of the impairment charges recognized as a result of the impairment tests performed in 2014. The results of the impairment tests performed in 2013 and 2012 indicated no impairment to the Company's goodwill. Due to the uncertainty of future events, the Company cannot assure that growth rates will not be lower than expected, discount rates will not increase or the projected cash flows of the individual reporting units will not decline, all of which factors could impact the carrying value of any remaining goodwill (or portion thereof) in future periods.

The changes in the carrying amount of those segments with goodwill and the composition of consolidated net goodwill for fiscal 2014 and 2013 were as follows:

	Segment			Consolidated	Gross	Consolidated	Total
	Marine Electronics	Diving	Outdoor Equipment				
Balance at September 28, 2012	\$ 10,362	\$ 4,104	\$ -	\$ 14,466	\$ 54,381	\$ 39,915	\$ 14,466
Jetboil acquisition	-	-	6,475	6,475	6,475	-	6,475
Amount attributable to movements in							
foreign currency rates	5	107	-	112	112	-	112
Balance at September 27, 2013	\$ 10,367	\$ 4,211	\$ 6,475	\$ 21,053	\$ 60,968	\$ 39,915	\$ 21,053
Impairment	-	-	(6,475)	(6,475)	-	6,475	(6,475)
Amount attributable to movements in							
foreign currency rates	-	(162)	-	(162)	(162)	-	(162)
Balance at October 3, 2014	\$ 10,367	\$ 4,049	\$ -	\$ 14,416	\$ 60,806	\$ 46,390	\$ 14,416

Other Intangible Assets

Indefinite-lived intangible assets are also tested for impairment annually and, if certain events or circumstances indicate that an impairment loss may have been incurred, on an interim basis.

During fiscal 2013, the acquisition of Jetboil resulted in indefinite-lived intangible assets of \$5,400 consisting of the Jetboil tradename. During the third quarter of fiscal 2014, forecasted cash flows related to Jetboil declined from the assumptions used in the initial valuation. This change led the Company to perform an interim impairment test on the acquired indefinite lived intangible assets by comparing their carrying value to their fair value. The fair value was determined using a relief from royalty method under the income approach which uses projected revenue allocable to the tradename and a royalty rate at which it is assumed a market participant would be willing to incur as its cost in order to manufacture a branded product. As a result of this analysis, the Company recognized an impairment charge of \$2,000 in "Goodwill and other intangible assets impairment" in the accompanying Consolidated Statements of Operations in the Outdoor Equipment segment reducing the fair value of the tradename to \$3,400. There was no additional impairment of indefinite-lived intangible assets recorded for fiscal 2014 or for the year ended September 27, 2013.

Intangible assets with definite lives are stated at cost less accumulated amortization. Amortization is computed using the straight-line method over periods ranging from 4 to 15 years. Amortization of patents and other intangible assets with definite lives was \$765, \$650 and \$1,057 for 2014, 2013 and 2012, respectively. Amortization of these definite-lived intangible assets is expected to be approximately \$749, \$726, \$481, \$367 and \$352 for fiscal years 2015, 2016, 2017, 2018 and 2019, respectively.

Intangible assets at the end of the last two years consisted of the following:

	2014			2013		
	Gross Intangible	Accumulated Amortization	Net	Gross Intangible	Accumulated Amortization	Net
Amortized other intangible assets:						
Patents	\$ 3,250	\$ (2,955)	\$ 295	\$ 3,937	\$ (3,598)	\$ 339
Trademarks	1,056	(1,051)	5	1,117	(1,112)	5
Other amortizable intangibles	6,749	(1,556)	5,193	6,586	(852)	5,734
Non-amortized trademarks	7,025	-	7,025	8,990	-	8,990
	\$ 18,080	\$ (5,562)	\$ 12,518	\$ 20,630	\$ (5,562)	\$ 15,068

Impairment of Long-Lived Assets

The Company reviews long-lived assets for impairment whenever events or changes in business circumstances such as unplanned negative cash flow indicate that the carrying amount of these assets may not be fully recoverable. In such an event, the carrying amount of the asset group is compared to the future undiscounted cash flows expected to be generated by the asset group to determine if impairment exists on these assets. If impairment is determined to exist, any related impairment loss is calculated based on the difference between the fair value and the carrying value on these assets.

Warranties

The Company provides for warranties of certain products as they are sold. Warranty reserves are estimated by the individual operating companies using standard quantitative measures based on criteria established by the Company. Estimates of costs to service its warranty obligations are based on historical experience, expectation of future conditions and known product issues. The following table summarizes the warranty activity for the three years in the period ended October 3, 2014.

Balance at September 30, 2011	\$5,155
Expense accruals for warranties issued during the period	3,740
Less current period warranty claims paid	4,144
Balance at September 28, 2012	\$4,751
Expense accruals for warranties issued during the period	2,901
Less current period warranty claims paid	2,438
Balance at September 27, 2013	\$5,214
Expense accruals for warranties issued during the period	3,717
Less current period warranty claims paid	4,853
Balance at October 3, 2014	\$4,078

Accumulated Other Comprehensive Income (Loss)

The components of "Accumulated other comprehensive income (loss)" on the accompanying Consolidated Balance Sheets as of the end of fiscal year 2014, 2013 and 2012 were as follows:

2014	2013	2012

Amounts reclassified from accumulated other comprehensive income	135	(1,973)	(1,838)
Tax effects	-	750	750
Balance at October 3, 2014	\$ 18,424	(5,646)	12,778

Earnings per Share (“EPS”)

Net income or loss per share of Class A common stock and Class B common stock is computed using the two-class method. Grants of restricted stock (whether vested or unvested) which receive non-forfeitable dividends are required to be included as part of the basic weighted average share calculation under the two-class method.

Holders of Class A common stock are entitled to cash dividends equal to 110% of all dividends declared and paid on each share of Class B common stock. The Company grants shares of unvested restricted stock in the form of Class A shares, which carry the same distribution rights as the Class A common stock described above. As such, the undistributed earnings for each period are allocated to each class of common stock based on the proportionate share of the amount of cash dividends that each such class is entitled to receive.

Basic EPS

Basic net income or loss per share is computed by dividing net income or loss allocated to Class A common stock and Class B common stock by the weighted-average number of shares of Class A common stock and Class B common stock outstanding, respectively. In periods with cumulative year to date net income and undistributed income, the undistributed income for each period is allocated to each class of common stock based on the proportionate share of the amount of cash dividends that each such class is entitled to receive. In periods where there is a cumulative year to date net loss or no undistributed income because distributions through dividends exceed net income, Class B shares are treated as anti-dilutive and, therefore, net losses are allocated equally on a per share basis among all participating securities.

For the years ended October 3, 2014, September 27, 2013 and September 28, 2012, basic income per share for Class A and Class B shares has been presented using the two class method as described above.

Diluted EPS

Diluted net income per share is computed by dividing allocated net income by the weighted-average number of common shares outstanding, adjusted for the effect of dilutive stock options, restricted stock units and non-vested restricted stock. Anti-dilutive stock options, restricted stock units and non-vested stock are excluded from the calculation of diluted EPS. The computation of diluted net income per share of Class A common stock assumes that Class B common stock is converted into Class A common stock. Therefore, diluted net income per share is the same for both Class A and Class B common shares. In periods where the Company reports a net loss, the effect of anti-dilutive stock options, restricted stock units and non-vested stock is excluded and diluted loss per share is equal to basic loss per share.

For the years ended October 3, 2014, September 27, 2013 and September 28, 2012, diluted net income per share reflects the effect of dilutive stock options and restricted stock units and assumes the conversion of Class B common stock into Class A common stock.

Stock options that could potentially dilute earnings per share in the future which were not included in the fully diluted computation because they would have been anti-dilutive totaled 0, 0 and 5,850 for the years ended October 3, 2014, September 27, 2013 and September 28, 2012, respectively. Non-vested stock that could potentially dilute earnings per share in the future which were not included in the fully diluted computation because they would have been anti-dilutive totaled 319,632, 386,409 and 495,235 for the years ended October 3, 2014, September 27, 2013 and September 28, 2012, respectively.

The following table sets forth a reconciliation of net income to dilutive earnings used in the diluted earnings per common share calculations and the computation of basic and diluted earnings per common share:

	2014	2013	2012
Net income	\$9,123	\$19,327	\$10,134
Less: Undistributed earnings reallocated to non-vested shareholders	(304)	(792)	(506)
Dilutive earnings	\$8,819	\$18,535	\$9,628
Weighted average common shares – Basic:			
Class A	8,420	8,305	8,155
Class B	1,212	1,212	1,216
Dilutive stock options and restricted stock units	3	6	8
Weighted average common shares - Dilutive	9,635	9,523	9,379
Net income per common share – Basic:			
Class A	\$0.93	\$1.98	\$1.04
Class B	\$0.84	\$1.79	\$0.94
Net income per common share – Diluted:			
Class A	\$0.90	\$1.95	\$1.03
Class B	\$0.90	\$1.95	\$1.03

Stock-Based Compensation

Stock-based compensation cost is recorded for all option grants and awards of non-vested stock and restricted stock units based on their grant-date fair value. Stock-based compensation expense is recognized on a straight-line basis over the vesting period of each award. No stock options were granted in 2014, 2013 or 2012. See Note 10 of these Notes to Consolidated Financial Statements for information regarding the Company's stock-based incentive plans, including stock options, non-vested stock, and employee stock purchase plans.

Income Taxes

The Company provides for income taxes currently payable and deferred income taxes resulting from temporary differences between financial statement income/loss and taxable income/loss. Accrued interest and penalties related to unrecognized tax benefits are recognized as a component of income tax expense. Deferred income tax assets and liabilities are determined based on the difference between the amounts reported in the financial statements and the tax basis of assets and liabilities, using enacted tax rates in effect in the years in which the differences are expected to reverse. Deferred income tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. A valuation allowance is established if it is more likely than not that some portion or all of a deferred income tax asset will not be realized. See Note 6 of these Notes to Consolidated Financial Statements for further discussion.

Employee Benefits

The Company and certain of its subsidiaries have various retirement and profit sharing plans. The Company does not have any significant foreign retirement plans. Pension obligations, which are generally based on compensation and years of service, are funded by payments to pension fund trustees. The Company's policy is to annually fund the minimum amount required under the Employee Retirement Income Security Act of 1974 for plans subject thereto. Other retirement costs are funded at least annually. See Note 7 of these Notes to Consolidated Financial Statements for additional discussion.

Foreign Operations and Related Derivative Financial Instruments

The functional currencies of the Company's foreign operations are the local currencies. Accordingly, assets and liabilities of foreign operations are translated into U.S. dollars at the rate of exchange existing at the end of the year. Results of operations are translated at monthly average exchange rates. Adjustments resulting from the translation of foreign currency financial statements are classified as Accumulated other comprehensive income (loss), a separate component of Shareholders' equity.

Currency gains and losses are recognized when assets and liabilities of foreign operations, denominated in other than their local currency, are converted into the local currency of the entity. Additionally, currency gains and losses are recognized through the settlement of transactions denominated in other than the local currency. The Company recognized currency gains of \$427 and \$92 in 2014 and 2012, respectively, and currency losses from transactions of \$916 in 2013 all of which were included in the "Other (income) expense, net" line of the Company's Consolidated Statements of Operations.

Because the Company operates internationally, it has exposure to market risk from movements in foreign currency exchange rates. Approximately 21% of the Company's revenues for the year ended October 3, 2014 were denominated in currencies other than the U.S. dollar. Approximately 9% were denominated in euros and approximately 7% were denominated in Canadian dollars, with the remaining 5% denominated in various other foreign currencies. The Company may mitigate the impact on its operating results of a portion of the fluctuations in certain foreign currencies through the purchase of foreign currency swaps, forward contracts and options to hedge known commitments denominated in foreign currencies or borrowings in foreign currencies. In 2014 the Company did not use foreign currency forward contracts. The Company does not enter into foreign exchange contracts for trading or speculative purposes.

Revenue Recognition

The Company recognizes revenue when all of the following criteria have been met:

- Persuasive evidence of an arrangement exists. Contracts, internet commerce agreements, and customer purchase orders are generally used to determine the existence of an arrangement.

- All substantial risk of ownership transfers to the customer. Shipping documents and customer acceptance, when applicable, are used to verify delivery.

- The fee is fixed or determinable. This is assessed based on the payment terms associated with the transaction and whether the sales price is subject to refund or adjustment.

- Collectability is reasonably assured. Collectability is assessed based on the creditworthiness of the customer as determined by credit checks and analysis, as well as by the customer's payment history.

Estimated costs of returns and allowances and discounts are accrued as a reduction to sales when revenue is recognized.

Advertising & Promotions

The Company expenses substantially all costs related to the production of advertising the first time the advertising takes place. Cooperative promotional arrangements are accrued as related revenue is earned.

Advertising and promotions expense in 2014, 2013 and 2012 totaled \$22,135, \$22,902 and \$21,745, respectively. These charges are included in Marketing and selling expenses. Capitalized advertising costs, included in Other current assets, totaled \$1,156 and \$1,165 at October 3, 2014 and September 27, 2013, respectively, and primarily included catalogs and costs of advertising which have not yet run for the first time.

Shipping and Handling Costs

Shipping and handling fees billed to customers are included in Net sales. Shipping and handling costs are included in Marketing and selling expenses and totaled \$10,675, \$10,436 and \$10,803 for 2014, 2013 and 2012, respectively.

Research and Development

The Company expenses research and development costs as incurred except for costs of software development for new electronic products which are capitalized once technological feasibility is established and are included in Furniture, Fixtures and Equipment. The gross amount capitalized related to software development was \$23,350, less accumulated amortization of \$9,324, at October 3, 2014 and \$19,968, less accumulated amortization of \$7,279, at September 27, 2013. These costs are amortized over the expected life of the software of three to seven years. Amortization expense related to capitalized software in 2014, 2013 and 2012 was \$2,045, \$1,268 and \$2,227, respectively, and is included in depreciation expense on Plant, Property and Equipment.

Fair Values

The carrying amounts of cash, cash equivalents, accounts receivable, and accounts payable approximated fair value at October 3, 2014 and September 27, 2013 due to the short maturities of these instruments. During 2014, 2013 and 2012, the Company held foreign currency forward contracts and investments in equity and debt securities that were carried at fair value. When indicators of impairment are present, the Company may be required to value certain long-lived assets such as property, plant, and equipment, and other intangibles at fair value.

Valuation Techniques

Over the Counter Derivative Contracts

The value of over the counter derivative contracts, such as interest rate swaps and foreign currency forward contracts, are derived using pricing models, which take into account the contract terms, as well as other inputs, including, where applicable, the notional values of the contracts, payment terms, maturity dates, credit risk, interest rate yield curves, and contractual and market currency exchange rates. The pricing model used for valuing interest rate swaps does not entail material subjectivity because the methodologies employed do not necessitate significant judgment, and the pricing inputs are observed from actively quoted markets.

Rabbi Trust Assets

Rabbi trust assets, used to fund amounts the Company owes to certain officers and other employees under the Company's non-qualified deferred compensation plan, are included in Other assets, and are classified as trading securities. These assets are comprised of marketable debt and equity securities that are marked to fair value based on unadjusted quoted prices in active markets.

Goodwill and Other Intangible Assets

In assessing the recoverability of the Company's goodwill and other intangible assets, the Company estimates the future discounted cash flows of the business segments to which the goodwill relates. When estimated future discounted cash flows are less than the carrying value of the net assets and related goodwill, an impairment test is performed to measure and recognize the amount of the impairment loss, if any. In determining estimated future cash flows, the Company makes assumptions regarding anticipated financial position, future earnings and other factors to determine the fair value of the respective assets.

See Note 2 of these Notes to Consolidated Financial Statements for disclosures regarding the fair value of long-term debt and Note 4 of these Notes to Consolidated Financial Statements for disclosures regarding fair value measurements.

New Accounting Pronouncements

In February 2013, the FASB issued authoritative guidance that amends the presentation of accumulated other comprehensive income and clarifies how to report the effect of significant reclassifications out of accumulated other comprehensive income. The Company adopted the guidance effective the beginning of its 2014 fiscal year. The adoption of this updated authoritative guidance did not have a significant impact on the Company's consolidated financial statements.

In May 2014, the FASB issued a new standard on revenue recognition from contracts with customers. This standard supersedes nearly all existing revenue recognition guidance and involves a five-step approach to recognizing revenue based on individual performance obligations in a contract. The new standard will also require additional qualitative and quantitative disclosures about the Company's contracts with customers, any significant judgments made in applying the revenue guidance, and the Company's assets recognized from the costs to obtain or fulfill a contract. This guidance becomes effective for the Company at the beginning of its 2018 fiscal year. The Company is currently evaluating the impact the adoption of this guidance will have on its consolidated financial statements and its related disclosures obligations.

INDEBTEDNESS

Debt was comprised of the following at October 3, 2014 and September 27, 2013:

	October 3 2014	September 27 2013
Term loans	\$7,781	\$8,142
Revolvers	-	-
Other	10	191
Total debt	7,791	8,333
Less current portion of long term debt	360	539
Less short term debt	-	-
Total long-term debt	\$7,431	\$7,794

Term Loans

The Company's term loans have a maturity date of September 29, 2029. Each term loan requires monthly payments of principal and interest. Interest on the aggregate outstanding amount of the term loans is based on the prime rate plus an applicable margin. The interest rate in effect on the term loans was 5.25% at October 3, 2014 and September 27, 2013.

The term loans are guaranteed in part under the United States Department of Agriculture Rural Development program and are secured with a first priority lien on land, buildings, machinery and equipment of the Company's domestic subsidiaries and a second priority lien on working capital and certain patents and trademarks of the Company and its subsidiaries. Any proceeds from the sale of secured property are first applied against the related term loans and then against the Revolvers (as defined below). The Company's term loans include covenants related to its current ratio, debt to net worth ratio, fixed charge ratio, minimum net worth and capital expenditures.

The aggregate term loan borrowings are subject to a pre-payment penalty. The penalty is currently 5% of the pre-payment amount, and the penalty will decrease by 1% annually on the anniversary date of the effective date of the loan agreement.

Revolvers

On September 16, 2013, the Company and certain of its subsidiaries entered into a new credit facility with PNC Bank National Association and certain other lenders which terminated the Amended Revolving Credit and Security agreement with PNC Bank National Association and the other lenders named therein, dated as of November 16, 2010. The new credit facility consists of a Revolving Credit Agreement dated September 16, 2013 among the Company, certain of the Company's subsidiaries, PNC Bank National Association, as lender and as administrative agent, and the other lenders named therein (the "Revolving Credit Agreement" or "Revolver"). The Revolver has an expiration date of September 16, 2018 and provides for borrowing of up to an aggregate principal amount not to exceed \$90,000 with an accordion feature that gives the Company the option to increase the maximum seasonal financing availability subject to the conditions of the Revolving Credit Agreement and subject to the approval of the lenders. The Revolver imposes a seasonal borrowing limit such that borrowings may not exceed \$60,000 from the period June 30th through October 31st of each year under the agreement. The Company had no borrowings against the Revolving Credit Facility as of October 3, 2014 or September 27, 2013.

The interest rate on the Revolver resets each quarter and is based on LIBOR plus an applicable margin. The applicable margin ranges from 1.25 percent to 2.00 percent and is dependent on the Company's leverage ratio for the trailing twelve month period. The interest rate on the Revolver at October 3, 2014 and September 27, 2013 was approximately 1.4%.

The Revolver is secured with a first priority lien on working capital assets and certain patents and trademarks of the Company and its subsidiaries and a second priority lien on land, buildings, machinery and equipment of the Company's domestic subsidiaries. Under the terms of the Revolver, the Company is required to comply with certain financial and non-financial covenants. The Revolving Credit Agreement limits asset or stock acquisitions to no more than \$20,000 in the event that the Company's consolidated leverage ratio is greater than 2.5 times. No limits are imposed if the Company's consolidated leverage ratio is less than 2.5 times and the remaining borrowing availability under the Revolver is greater than \$10,000 at the time of the acquisition. The Revolving Credit Agreement limits the amount of restricted payments (primarily dividends and repurchases of common stock) made during each fiscal year. The Company may declare, and pay, dividends in accordance with historical practices, but in no event may the aggregate amount of all dividends or repurchases of common stock exceed \$10,000 in any fiscal year. The Revolving Credit Agreement restricts the Company's ability to incur additional debt and includes maximum leverage ratio and minimum interest coverage ratio covenants.

Concurrent with the execution of the Revolving Credit Agreement described above, Johnson Outdoors Canada Inc. repaid and terminated its Amended Revolving Credit and Security Agreement with PNC Bank Canada Branch dated as of November 16, 2010.

Other Borrowings

The Company had no unsecured revolving credit facilities at its foreign subsidiaries as of October 3, 2014. The Company utilizes letters of credit primarily as security for the payment of future claims under its workers' compensation insurance which totaled \$691 and \$846 at October 3, 2014 and September 27, 2013, respectively. The Company had no unsecured lines of credit as of October 3, 2014 or September 27, 2013.

Aggregate scheduled maturities of long-term debt as of October 3, 2014 were as follows:

Fiscal Year	
2014	\$ 360
2015	368
2016	389
2017	410
2018	432
Thereafter	5,832
Total	\$ 7,791

Interest paid was \$672, \$915 and \$1,150 for 2014, 2013 and 2012, respectively.

The weighted average borrowing rate for short-term debt was approximately 1.4%, 2.5% and 2.6% for 2014, 2013 and 2012, respectively.

Based on the borrowing rates currently available to the Company for debt with similar terms and maturities, the fair value of the Company's long-term debt approximated its carrying value as of each of October 3, 2014 and September 27, 2013. See Note 4 of these Notes to Consolidated Financial Statements for additional disclosures regarding the fair value.

Under the Company's Revolving Credit Agreement, a change in control of the Company would constitute an event of default. A change in control would be deemed to have occurred if, among other events described in the terms of the Credit Agreement, a person or group other than the Company's Chief Executive Officer, Helen P. Johnson-Leipold, members of her family and related entities (hereinafter the Johnson Family) became or obtain rights as a beneficial owner (as interpreted under the Securities Exchange Act of 1934) of a certain percentage of the outstanding capital stock of the Company, if the Johnson Family ceases to own (without lien or encumbrance) at least a certain percentage of the shares of capital stock of the Company with voting power or if the members of the Company's Board of Directors as of the date of the Credit Agreement (together with any new directors elected to the Board who were also approved for appointment by the then serving directors) cease for any reason to constitute a majority of the Company's Board of Directors. At November 28, 2014, the Johnson Family held 3,818,267 shares or approximately 44% of the Class A common stock, 1,211,196 shares or approximately 100% of the Class B common stock and approximately 77% of the voting power of both classes of common stock taken as a whole.

3 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The following disclosures describe the Company's objectives in using derivative instruments, the business purpose or context for using derivative instruments, and how the Company believes the use of derivative instruments helps achieve the stated objectives. In addition, the following disclosures describe the effects of the Company's use of derivative instruments and hedging activities on its financial statements. See Note 4 of these Notes to Consolidated Financial Statements for disclosures regarding the fair value and effects of changes in the fair value of derivative instruments.

Foreign Exchange Risk

The Company has significant foreign operations, for which the functional currencies are denominated primarily in euros, Swiss francs, Hong Kong dollars, Japanese yen and Canadian dollars. As the values of the currencies of the foreign countries in which the Company has operations increase or decrease relative to the U.S. dollar, the sales, expenses, profits, losses, assets and liabilities of the Company's foreign operations, as reported in the Company's consolidated financial statements, increase or decrease, accordingly. Approximately 21% of the Company's revenues for the fiscal year ended October 3, 2014 were denominated in currencies other than the U.S. dollar. Approximately 9% were denominated in euros and approximately 7% were denominated in Canadian dollars, with the remaining 5% denominated in various other foreign currencies. Changes in foreign currency exchange rates can cause unexpected financial losses or cash flow needs.

The Company mitigates the impact on its operating results of a portion of the fluctuations in certain foreign currencies through the use of foreign currency forward contracts. Foreign currency forward contracts enable the Company to lock in the foreign currency exchange rate for a fixed amount of currency to be paid or received on a specified date in the future. The Company uses such foreign currency forward contracts to mitigate the risk associated with changes in foreign currency exchange rates on financial instruments and known commitments denominated in foreign currencies. None of the Company's derivative financial instruments have been designated as hedging instruments.

As of October 3, 2014 and September 27, 2013, the Company held no foreign currency forward contracts.

Interest Rate Risk

The Company operates in a seasonal business and experiences significant fluctuations in operating cash flow as working capital needs increase in advance of the Company's primary selling and cash generation season, and decline as accounts receivable are collected and cash is accumulated or debt is repaid. The Company's goal in managing its interest rate risk is to maintain a mix of floating rate and fixed rate debt such that permanent non-equity capital needs are largely funded with long term fixed rate debt and seasonal working capital needs are funded with short term floating rate debt.

The Company held no interest rate swap contracts in 2014 or 2013. As of October 3, 2014, the Company was unhedged with respect to interest rate risk on its floating rate debt.

The following discloses the location of the Company's loss reclassified from Accumulated Other Comprehensive Income ("AOCI") into net income related to previously held derivative instruments during the years ended October 3, 2014, September 27, 2013, and September 30, 2011:

Loss reclassified from AOCI into:	2014	2013	2012
Interest expense	\$-	\$138	\$789

The following discloses the location and amount of income or loss recognized for changes in the fair value of derivative instruments not designated as hedging instruments for the years ended October 3, 2014, September 27, 2013 and September 28, 2012:

Derivatives not designated as hedging instruments	Location of loss (gain) of Operations	2014	2013	2012
Foreign exchange forward contract	Other (income) expense, net	\$ -	\$ 13	\$ 306

4 FAIR VALUE MEASUREMENTS

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. A fair value hierarchy has been established based on three levels of inputs, of which the first two are considered observable and the last unobservable.

Level 1 - Quoted prices in active markets for identical assets or liabilities. These are typically obtained from real-time quotes for transactions in active exchange markets involving identical assets.

Level 2 - Inputs, other than quoted prices included within Level 1, which are observable for the asset or liability, either directly or indirectly. These are typically obtained from readily-available pricing sources for comparable instruments.

Level 3 - Unobservable inputs, where there is little or no market activity for the asset or liability. These inputs reflect the reporting entity's own assumptions of the data that market participants would use in pricing the asset or liability, based on the best information available in the circumstances.

The following table summarizes the Company's financial assets measured at fair value as of October 3, 2014:

	Level 1	Level 2	Level 3	Total
Assets:				
Rabbi trust assets	\$ 10,933	\$ -	\$ -	\$ 10,933

The following table summarizes the Company's financial assets measured at fair value as of September 27, 2013:

	Level 1	Level 2	Level 3	Total
Assets:				
Rabbi trust assets	\$ 8,948	\$ -	\$ -	\$ 8,948

Rabbi trust assets are classified as trading securities and are comprised of marketable debt and equity securities that are marked to fair value based on unadjusted quoted prices in active markets. The rabbi trust assets are used to fund

amounts the Company owes to certain officers and other employees under the Company's non-qualified deferred compensation plan. The mark-to-market adjustments are recorded in "Other (income) expense, net" in the accompanying Consolidated Statements of Operations.

F-21

The effect of changes in the fair value of financial instruments on the Consolidated Statements of Operations for the years ended October 3, 2014, September 27, 2013 and September 28, 2012, was:

	Location of (income) loss recognized in Statement of Operations	2014	2013	2012
Rabbi trust assets	Other (income) expense, net	\$(703)	\$(1,013)	\$(1,153)
Foreign currency forward contracts	Other (income) expense, net	-	13	306

Certain assets and liabilities are measured at fair value on a non-recurring basis in periods subsequent to their initial recognition. During 2014, the Company recorded a \$2,000 impairment charge in “Goodwill and other intangible assets impairment” on a trademark held by the Outdoor Equipment business reducing its fair value to \$3,400. The Company also recorded an impairment charge on goodwill held by the Outdoor Equipment business during 2014. A \$6,475 charge was included in “Goodwill and other intangible assets impairment” related to this impairment during 2014. See further discussion of these impairment charges at Note 18 of these Notes to Consolidated Financial Statements.

During 2012, the Company recorded an impairment charge on a trademark held by the Marine Electronics business, reducing its fair value to \$0. A \$609 charge was included in “Administrative management, finance and information systems” expenses in the Marine Electronics segment related to this impairment during 2012.

The following table summarizes the Company’s assets measured at fair value on a non-recurring basis as of October 3, 2014 and the losses recognized as a result of this measurement in 2014. The assets and losses were all included in the Outdoor Equipment segment.

	Level 1	Level 2	Level 3	Losses incurred
Goodwill	\$ -	\$ -	\$ -	\$ 6,475
Tradename	-	-	3,400	2,000

No assets or liabilities were measured at fair value on a non-recurring basis in 2013.

The following table summarizes the Company’s assets measured at fair value on a non-recurring basis as of September 28, 2012 and the losses recognized in the Marine Electronics segment as a result of this measurement in 2012:

	Level 1	Level 2	Level 3	Losses incurred
Other Intangibles	\$-	\$-	\$-	\$609

5 LEASES AND OTHER COMMITMENTS

The Company leases certain facilities and machinery and equipment under long-term, non-cancelable operating leases. Future minimum rental commitments under non-cancelable operating leases with an initial lease term in excess of one year at October 3, 2014 were as follows:

Year	Related parties	Total
------	-----------------	-------

Edgar Filing: JOHNSON OUTDOORS INC - Form 10-K

	included in total	
2015	\$ 878	\$ 6,284
2016	939	4,393
2017	-	2,983
2018	-	2,242
2019	-	1,797
Thereafter	-	4,995

Rental expense under all leases was approximately \$8,360, \$8,627 and \$9,126 for 2014, 2013 and 2012, respectively. Rent expense to related parties was \$970, \$1,127 and \$1,124 for 2014, 2013 and 2012, respectively.

F-22

6

INCOME TAXES

The U.S. and foreign income before income taxes for the respective years consisted of the following:

	2014	2013	2012
United States	\$ 11,592	\$ 19,885	\$ 20,332
Foreign	5,830	4,775	(406)
	\$ 17,422	\$ 24,660	\$ 19,926

Income tax expense for the respective years consisted of the following:

	2014	2013	2012
Current:			
Federal (net of tax benefit from operating loss carryforward of \$0, \$0 and \$3,098, respectively)	\$ 3,888	\$ 2,832	\$ 828
State	403	470	378
Foreign	1,886	1,437	1,595
Deferred	2,122	594	6,991
	\$ 8,299	\$ 5,333	\$ 9,792

The tax effects of temporary differences that give rise to deferred tax assets and deferred tax liabilities at the end of the respective years are presented below:

	2014	2013
Deferred tax assets:		
Inventories	\$1,809	\$1,974
Compensation	10,362	7,074
Tax credit carryforwards	3,462	6,385
Net operating loss carryforwards	7,333	7,215
Other	4,635	5,109
Total gross deferred tax assets	27,601	27,757
Less valuation allowance	8,734	9,479
Deferred tax assets	18,867	18,278
Deferred tax liabilities:		
Goodwill and other intangibles	989	1,279
Depreciation and amortization	4,795	1,091
Foreign statutory reserves	503	1,114
Net deferred tax assets	\$12,580	\$14,794

F-23

The net deferred tax assets recorded in the accompanying Consolidated Balance Sheet as of the years ended October 3, 2014 and September 27, 2013 were as follows:

	2014	2013
Current assets	\$8,360	\$7,869
Non-current assets	5,353	8,039
Non-current liabilities	1,133	1,114
Net deferred tax assets	\$12,580	\$14,794

The significant differences between the statutory federal tax rate and the effective income tax rates for the Company for the respective years shown below were as follows:

	2014	2013	2012
Statutory U.S. federal income tax rate	35.0 %	35.0 %	35.0 %
Foreign rate differential	(0.5)	(4.1)	(1.0)
State income tax, net of federal benefit	4.4	4.5	3.1
Tax credit	(6.3)	(3.1)	-
Deferred tax asset valuation allowance	(4.3)	(11.5)	7.1
Unrecognized tax benefit	5.4	-	-
Goodwill impairment	10.4	-	-
Other	3.6	0.8	4.9
	47.7 %	21.6 %	49.1 %

The Company's net operating loss carryforwards and their expirations as of October 3, 2014 were as follows:

	State	United States	Foreign	Total
Year of expiration				
2015-2019	\$2,158	\$-	\$1,104	\$3,262
2020-2024	1,182	-	2,262	3,444
2025-2029	5,672	-	2,034	7,706
2030-2034	30,074	-	774	30,848
Indefinite	-	-	8,535	8,535
Total	\$39,086	\$-	\$14,709	\$53,795

The Company has tax credit carryforwards comprised of foreign tax credits, research and development and other state credits as shown in the table below.

	State	Federal	Total
Year of expiration

F-24

Under generally accepted accounting principles, the Company considers at each reporting period all available evidence, both positive and negative, to determine whether, based on the weight of that evidence, a valuation allowance is needed to reduce its deferred tax asset to an amount that is more likely than not to be realized. The determination of the need for a valuation allowance for the deferred tax assets is dependent upon management's evaluation of both positive and negative evidence. Positive evidence includes the probability of achieving forecasted future taxable income, applicable tax strategies and assessments of the current and future economic and business conditions. Negative evidence includes the Company's cumulative losses and expiring tax carryforwards.

For 2014, the negative impact to the income tax expense and primary increase to the effective tax rate was the result of the impairment charge against goodwill as discussed in Note 18. The Company had no tax value in the goodwill which resulted in no tax benefit received from the impairment charge against it.

The impact of the valuation allowance in fiscal 2014 of \$745 of tax benefit was primarily the result of earnings in Italy, Netherlands, Spain and United Kingdom offsetting operating losses in France, Japan and New Zealand. The Company believes the negative evidence continues to outweigh the positive evidence and as such, the valuation allowance will remain in place.

For 2013, the positive impact of the valuation allowance in the amount of \$2,831 on tax expense was primarily the result of the expected usage of foreign tax credits of \$3,076, offset in part by increases in foreign valuation allowances of \$244. Operating losses in France, Netherlands, New Zealand and the United Kingdom were partially offset by income in Italy, Spain and Japan.

The change in the valuation allowance in 2012 provided a negative impact of \$1,410 to the effective tax expense. This amount was primarily the result of increases in foreign valuation allowances of \$1,787, which were partially offset by U.S. usage of tax attributes totaling \$377. In fiscal 2012, the Company established a valuation allowance of \$173 against the net deferred tax assets in the New Zealand tax jurisdiction based on a cumulative earnings deficit. Additional operating losses in France, Japan, Italy, Spain and United Kingdom also increased the valuation allowance by \$1,614 in fiscal 2012.

Taxes paid were \$6,581, \$2,399 and \$3,163 for 2014, 2013 and 2012, respectively.

The decrease in deferred tax assets due to utilization of U.S. federal net operating loss carryforwards was \$0, \$0 and \$5,260 for 2014, 2013 and 2012, respectively.

In accordance with its accounting policy, the Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense. The total accrued interest and penalties with respect to income taxes was approximately \$778 and \$592 for the years ended October 3, 2014 and September 27, 2013, respectively. Interest and penalties of \$186, (\$21) and \$184 was recorded as a component of income tax expense (benefit) in the accompanying Consolidated Statements of Operations during fiscal years 2014, 2013 and 2012, respectively.

A reconciliation of the beginning and ending amount of unrecognized tax benefits for the last three fiscal years was as follows:

Balance at September 30, 2011	\$1,684
Settlement	(773)
Lapse of statute of limitations	(123)
Gross increases - tax positions in period	1,112
Balance at September 28, 2012	\$1,900

Edgar Filing: JOHNSON OUTDOORS INC - Form 10-K

Settlement	(186)
Lapse of statute of limitations	(214)
Gross increases - tax positions in period	655
Balance at September 27, 2013	\$2,155
Settlement	-
Lapse of statute of limitations	(161)
Gross increases - tax positions in period	1,097
Balance at October 3, 2014	\$3,091

F-25

The Company has not provided additional U.S. income taxes on \$113,266 of undistributed earnings of consolidated foreign subsidiaries included in shareholders' equity attributable to the Company. Such earnings could become taxable upon the sale or liquidation of these foreign subsidiaries or upon dividend repatriation. The Company's intent is for such earnings to be reinvested by the subsidiaries or to be repatriated only when it would be tax effective through the utilization of foreign tax credits. It is not practicable to estimate the amount of unrecognized withholding taxes and deferred tax liability on such earnings. As of October 3, 2014, the Company held approximately \$60,135 of cash and cash equivalents in foreign jurisdictions.

The Company is currently undergoing examinations in Italy and Germany. There was a change in unrecognized tax benefits as a result of the settlement of a tax audit in Italy in the year ended September 28, 2012. The amount of unrecognized tax benefits recognized within the next twelve months may decrease due to expiration of the statute of limitations for certain years in various jurisdictions. However, it is possible that a jurisdiction may open an audit prior to the statute expiring or one of the above audits may adjust the Company's tax filings. At this time, an estimate of the range of the reasonably possible change cannot be made.

The Company files income tax returns, including returns for its subsidiaries, with federal, state, local and foreign taxing jurisdictions. The following tax years remain subject to examination by the respective major tax jurisdictions:

Jurisdiction	Fiscal Years
United States	2011-2014
Canada	2010-2014
France	2010-2014
Germany	2009-2014
Italy	2009-2014
Japan	2012-2014
Switzerland	2004-2014

7 EMPLOYEE BENEFITS

The Company has non-contributory defined benefit pension plans covering certain U.S. employees. Retirement benefits are generally provided based on employees' years of service and average earnings. Normal retirement age is 65, with provisions for earlier retirement. The Company elected to freeze its U.S. defined benefit pension plans as of September 30, 2009 and as a result, there are no benefit accruals related to service performed after that date.

The financial position of the Company's non-contributory defined benefit plans as of fiscal year end 2014 and 2013 was as follows:

	2014	2013
Projected benefit obligation:		
Projected benefit obligation, beginning of year	\$22,051	\$25,516
Interest cost	1,078	997
Actuarial (gain) loss	3,012	(3,649)
Benefits paid	(840)	(813)
Projected benefit obligation, end of year	25,301	22,051
Fair value of plan assets:		
Fair value of plan assets, beginning of year	15,864	13,673
Actual gain on plan assets	1,795	1,861
Company contributions	732	1,143
Benefits paid	(840)	(813)
Fair value of plan assets, end of year	17,551	15,864
Funded status of the plans	(7,750)	(6,187)
Amounts recognized in the Consolidated Balance Sheets consist of:		
Current pension liabilities	189	191
Non-current pension liabilities	7,561	5,996
Accumulated other comprehensive loss	(6,981)	(5,008)
Components of accumulated other comprehensive loss:		
Net actuarial loss	(6,981)	(5,008)
Accumulated other comprehensive loss	\$(6,981)	\$(5,008)

Net periodic benefit cost for the non-contributory defined benefit pension plans for the respective years included the following pre-tax amounts:

	2014	2013	2012
Interest cost	\$ 1,078	\$ 997	\$ 1,036
Expected return on plan assets	(1,097)	(977)	(942)
Amortization of unrecognized net actuarial loss	341	666	335
Net periodic pension cost	322	686	429
Other changes in benefit obligations recognized in other comprehensive income (loss), (OCI):			
Net actuarial (gain) loss	1,974	(5,199)	2,571
Total recognized in net periodic pension cost and OCI	\$ 2,296	\$ (4,513)	\$ 3,000

The Company expects to recognize \$512 of unrecognized loss amortization as a component of net periodic benefit cost in 2015. This amount is included in accumulated other comprehensive income as of October 3, 2014.

At October 3, 2014, the aggregate accumulated benefit obligation and aggregate fair value of plan assets for plans with benefit obligations in excess of plan assets was \$25,301 and \$17,550, respectively, and there were no plans with plan assets in excess of benefit obligations. At September 27, 2013, the aggregate accumulated benefit obligation and aggregate fair value of plan assets for plans with benefit obligations in excess of plan assets was \$22,051 and \$15,864, respectively, and there were no plans with plan assets in excess of benefit obligations.

The Company anticipates making contributions to the defined benefit pension plans of \$663 through October 2, 2015.

Estimated benefit payments from the defined benefit plans to participants for each of the five years ending September 27, 2019 and the five years thereafter are as follows:

2015	\$	945
2016		1,003
2017		1,006
2018		1,049
2019		1,086
Five years thereafter		5,971

Actuarial assumptions used to determine the projected benefit obligation and net periodic pension cost as of the following fiscal years were as follows:

	Projected Benefit Obligation						Net Periodic Pension Cost					
	2014		2013		2012		2014		2013		2012	
Discount rate	4.25	%	5.00	%	4.00	%	5.00	%	4.00	%	5.00	%
Long-term rate of return	N/A		N/A		N/A		7.50	%	7.50	%	7.50	%
Average salary increase rate	N/A		N/A		N/A		N/A		N/A		N/A	

The change in discount rates in 2014 and 2012 resulted in actuarial losses of approximately \$2,640 and \$3,600, respectively. The remainder of the actuarial losses for 2014 and 2012 resulted from mortality experience and other demographic changes. The change in discount rates in 2013 resulted in an actuarial gain of approximately \$3,500. The remainder of the actuarial gain for 2013 was related to adjustments to mortality tables and other modifications to actuarial assumptions.

To determine the discount rate assumption used in the Company's pension valuation, the Company identified a benefit payout stream based on the demographics of the pension plans and constructed a hypothetical bond portfolio using high-quality corporate bonds with cash flows that matched that benefit payout stream. A yield curve was calculated based on this hypothetical portfolio which was used for the discount rate determination.

The Company determines the long-term rate of return assumption for plan assets by using the historical asset returns for various investment asset classes and adjusting them to reflect future expectations. The expected asset class returns are weighted by the targeted asset allocations, resulting in a weighted average return which is rounded to the nearest quarter percent.

The Company uses measurement dates of October 1 to determine pension expenses for each year and the last day of the fiscal year to determine the fair value of the pension assets.

F-28

The Company's pension plans' weighted average asset allocations at October 3, 2014 and September 27, 2013, by asset category were as follows:

	2014		2013	
Equity securities	74	%	76	%
Fixed income securities	24	%	23	%
Other securities	2	%	1	%
	100	%	100	%

The Company's primary investment objective for the plans' assets is to maximize the probability of meeting the plans' actuarial target rate of return of 7.5%, with a secondary goal of returning 4% above the rate of inflation. These return objectives are targeted while simultaneously striving to minimize risk of loss to the plans' assets. The investment horizon over which the investment objectives are expected to be met is a full market cycle or five years, whichever is greater.

The Company's investment strategy for the plans is to invest in a diversified portfolio that will generate average long-term returns commensurate with the aforementioned objectives while minimizing risk.

The following table summarizes the Company's pension plan assets measured at fair value as of October 3, 2014:

Description:	Level 1	Level 2	Level 3	Total
Mutual fund	\$ 17,299	\$ -	\$ -	\$ 17,299
Money market funds	36	-	-	36
Group annuity contract	-	-	216	216
Total	\$ 17,335	\$ -	\$ 216	\$ 17,551

The following table summarizes the Company's pension plan assets measured at fair value as of September 27, 2013:

Description:	Level 1	Level 2	Level 3	Total
Mutual fund	\$15,560	\$-	\$-	\$15,560
Money market funds	34	-	-	34
Group annuity contract	-	-	270	270
Total	\$15,594	\$-	\$270	\$15,864

The tables below set forth a summary of changes in fair value of the Company's Level 3 pension plan assets for the years ended October 3, 2014 and September 27, 2013:

	2014	2013
Level 3 assets, beginning of year	\$270	\$331
Purchases	7	6
Unrealized (loss) gain	(15)	1
Sales	(46)	(68)
Level 3 assets, end of year	\$216	\$270

The fair values of the money market fund and mutual fund were derived from quoted market prices as substantially all of these instruments have active markets. The fair value of the group annuity contract was derived using a discounted

cash flow model with inputs based on current yields of similar instruments with comparable durations. The asset allocation of the mutual fund is a U.S. large-cap blend based on a moderate allocation style, generally investing approximately 70% to 75% in equity securities and the remainder in fixed income securities. The annuity contract consists of high quality bonds.

F-29

The Company also has a non-qualified deferred compensation plan that provides certain officers and employees the ability to defer a portion of their compensation until a later date. The deferred amounts and earnings thereon are payable to participants, or designated beneficiaries, at specified future dates upon retirement, death or termination of employment from the Company. The deferred compensation liability, which is classified as Other liabilities on our accompanying Consolidated Balance Sheets, was approximately \$10,938 and \$8,946 as of October 3, 2014 and September 27, 2013, respectively.

A majority of the Company's full-time employees are covered by defined contribution programs. Expense attributable to the defined contribution programs was approximately \$1,061, \$931 and \$882 for 2014, 2013 and 2012 respectively.

8 PREFERRED STOCK

The Company is authorized to issue 1,000,000 shares of preferred stock in various classes and series, of which there are none currently issued and none outstanding.

9 COMMON STOCK

The number of authorized and outstanding shares of each class of the Company's common stock at the end of the respective years was as follows:

	2014	2013
Class A, \$0.05 par value:		
Authorized	20,000,000	20,000,000
Outstanding	8,769,426	8,724,984
Class B, \$0.05 par value:		
Authorized	3,000,000	3,000,000
Outstanding	1,212,382	1,212,420

Holders of Class A common stock are entitled to elect 25% of the members of the Company's Board of Directors and holders of Class B common stock are entitled to elect the remaining directors. With respect to matters other than the election of directors or any matters for which class voting is required by law, holders of Class A common stock are entitled to one vote per share while holders of Class B common stock are entitled to ten votes per share. If any dividends (other than dividends paid in shares of the Company's stock) are paid by the Company on its common stock, a dividend would be paid on each share of Class A common stock equal to 110% of the amount paid on each share of Class B common stock. Each share of Class B common stock is convertible at any time into one share of Class A common stock. During 2014 and 2013 there were 38 and 3,338 shares of Class B common stock converted into Class A common stock, respectively. There were no shares of Class A common stock converted into Class B common stock.

10 STOCK-BASED COMPENSATION AND STOCK OWNERSHIP PLANS

The Company's current stock ownership plans provide for issuance of options to acquire shares of Class A common stock by key executives and non-employee directors. Current plans also allow for issuance of shares of restricted stock, restricted stock units or stock appreciation rights in lieu of options.

Under the Company's 2010 Long-Term Stock Incentive Plan and the 2012 Non-Employee Director Stock Ownership Plan there were 705,332 shares of the Company's Class A common stock available for grant to key executives and non-employee directors at October 3, 2014. Shares issued pursuant to the exercise of stock options or grants of restricted stock are typically issued first out of treasury stock to the extent that treasury shares are available.

F-30

The Company recognized tax benefits from the exercise of stock options and the vesting of restricted stock of \$493, \$572 and \$594 for 2014, 2013 and 2012, respectively. These amounts were recorded as increases in additional paid-in capital on the consolidated balance sheets and as cash from financing activities on the consolidated statements of cash flows.

Stock Options

All stock options have been granted at a price not less than fair market value at the date of grant and are currently exercisable. Stock options generally have a term of 10 years.

All of the Company's stock options outstanding are fully vested, with no further compensation expense to be recorded. There were no grants of stock options in 2014, 2013 or 2012.

A summary of stock option activity related to the Company's plans is shown below.

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Years)
Outstanding and exercisable at September 28, 2012	23,366	15.39		
Exercised	(8,300)	10.36		
Outstanding and exercisable at September 27, 2013	15,066	18.16		
Exercised	(3,900)	19.88		
Cancelled	(1,950)	19.88		
Outstanding and exercisable at October 3, 2014	9,216	17.07	\$ 80	0.8

The aggregate intrinsic value in the preceding table represents the total pretax intrinsic value, based on the Company's closing stock price of \$25.78 as of October 3, 2014, which would have been received by the option holders had those option holders exercised their stock options as of that date. The intrinsic values of the stock received upon exercise of such options at their date of exercise during 2014, 2013 and 2012 were \$96, \$171 and \$689, respectively.

The Company received cash proceeds from stock option exercises totaling \$78, \$86 and \$338 for the years ending October 3, 2014, September 27, 2013 and September 28, 2012, respectively.

Non-Vested Stock

All shares of non-vested stock awarded by the Company have been granted at their fair market value on the date of grant and vest either immediately or within five years after the grant date. The fair value at date of grant is based on the number of shares granted and the average of the Company's high and low Class A common stock price on the date of grant or, if the Company's shares did not trade on the date of grant, the average of the Company's high and low Class A common stock price on the last preceding date on which the Company's shares traded.

A summary of non-vested stock activity for the two year period ended October 3, 2014 related to the Company's stock ownership plans is as follows:

Shares	Weighted Average Grant Price
--------	------------------------------------

Edgar Filing: JOHNSON OUTDOORS INC - Form 10-K

Non-vested stock at September 28, 2012	493,548	\$	11.95
Non-vested stock grants	70,545		20.66
Non-vested stock cancelled	-		-
Restricted stock vested	(177,684)		11.43
Non-vested stock at September 27, 2013	386,409		13.78
Non-vested stock grants	47,934		27.70
Restricted stock vested	(114,711)		10.32
Non-vested stock at October 3, 2014	319,632	\$	17.10

F-31

Non-vested stock grantees may elect to reimburse the Company for withholding taxes due as a result of the vesting of shares by tendering a portion of the vested shares back to the Company. Shares tendered back to the Company were 24,719 and 43,464 during 2014 and 2013, respectively. The fair value of restricted stock vested during 2014, 2013 and 2012 was approximately \$3,123, \$3,607 and \$660, respectively. The weighted average grant date fair value for non-vested stock issued in 2014 was \$27.70.

Stock compensation expense, net of forfeitures, related to non-vested stock was \$1,523, \$1,400 and \$1,666 during 2014, 2013 and 2012, respectively. The tax benefit recognized during 2014, 2013 and 2012 related to stock based compensation was \$641, \$532 and \$633. Unrecognized compensation cost related to non-vested stock as of October 3, 2014 was \$2,109, which amount will be amortized to expense through November 2017 or adjusted for changes in future estimated or actual forfeitures.

Restricted Stock Units

All restricted stock units awarded by the Company have been granted at their fair market value on the date of grant and vest on the one year anniversary of the grant date. The fair value at date of grant is based on the number of units granted and the average of the Company's high and low Class A common stock trading price on the date of grant or, if the Company's shares did not trade on the date of grant, the average of the Company's high and low Class A common stock trading price on the last preceding date on which the Company's shares traded.

The Company issued 10,792 and 6,600 restricted stock units at a weighted average grant date fair value of \$22.71 and \$22.73 for the years ended October 3, 2014 and September 27, 2013, respectively. No restricted stock units were granted in 2012.

Stock compensation expense, net of forfeitures, related to restricted stock units was \$165 and \$88 for the years ended October 3, 2014 and September 27, 2013, respectively. There was no stock compensation expense related to the issuance of restricted stock units during 2012. Unrecognized compensation cost related to non-vested restricted stock units as of October 3, 2014 was \$143, which amount will be amortized to expense through September 2015 or adjusted for changes in future estimated or actual forfeitures.

Employee Stock Purchase Plan

The 2009 Employees' Stock Purchase Plan (the "Purchase Plan") provides for the issuance of shares of Class A common stock at a purchase price of not less than 85% of the fair market value of such shares on the date of grant or at the end of the offering period, whichever is lower.

The Company issued 15,969, 9,562 and 10,349 shares of Class A common stock under the Purchase Plan during the years 2014, 2013 and 2012, respectively, and recognized expense of \$57, \$41 and \$30 in 2014, 2013 and 2012, respectively.

The Company conducts transactions with certain related parties including organizations controlled by the Johnson Family and other related parties. These transactions include consulting services, aviation services, office rental, and certain administrative activities. Total costs of these transactions were \$1,246, \$1,434 and \$1,479 for 2014, 2013 and 2012, respectively. Amounts due to/from related parties were immaterial at October 3, 2014 and September 27, 2013.

SEGMENTS OF BUSINESS

The Company conducts its worldwide operations through separate business segments, each of which represent major product lines. Operations are conducted in the U.S. and various foreign countries, primarily in Europe, Canada and the Pacific Basin.

Net sales and operating profit include both sales to customers, as reported in the Company's accompanying Consolidated Statements of Operations, and inter-unit transfers, which are priced to recover costs plus an appropriate profit margin. Total assets represent assets that are used in the Company's operations in each business segment at the end of the years presented.

A summary of the Company's operations by business segment is presented below:

	2014	2013	2012
Net sales:

(1) Long term assets consist of net property, plant and equipment, net intangible assets, goodwill and other assets excluding deferred income taxes.

The Company had no single customer that accounted for more than 10% of its net sales in fiscal 2014, 2013 or 2012.

13 LITIGATION

The Company is subject to various legal actions and proceedings in the normal course of business, including those related to commercial disputes, product liability, intellectual property and environmental matters. The Company is insured against loss for certain of these matters. Although litigation is subject to many uncertainties and the ultimate exposure with respect to these matters cannot be ascertained, management does not believe the final outcome of any pending litigation will have a material adverse effect on the financial condition, results of operations, liquidity or cash flows of the Company.

In 2012, the Company received a \$3,500 settlement payment resolving an ongoing claim with its insurance carriers, which was recognized in the Company's Watercraft segment. As part of the settlement, the Company's former lawsuit filed in the U.S. District for the Eastern District of Wisconsin against its insurers was dismissed. The Company originally initiated legal proceedings in May 2005 to seek coverage from its insurers related to an intellectual property dispute between the Company and one of its competitors, which was later settled.

The Company considers the defense of its intellectual property assets to be an ordinary and necessary operating activity essential to maintaining its competitive advantages. Such activities are not of a financing nature and are not unusual or infrequent. As a result, and in accordance with the presentation guidance in the Income Statement Subtopics in ASC 225, the Company recognized all of the litigation costs incurred and the payment of the settlement in relation to this matter as a component of operating expenses. Accordingly, the insurance recovery related to these costs was also recognized in operations as a matter of consistency.

14 SIGNIFICANT EVENT

On September 12, 2011, the Company announced a temporary closure of its Binghamton, New York manufacturing facility and administrative offices due to flooding from torrential rains. The Binghamton manufacturing facility houses the Company's consumer, commercial and military tent businesses. The Company's finished goods warehouse located nearby was unaffected by the flooding and the Company was able to resume shipments of products within a few days. Production resumed on September 28, 2011.

The Company maintains insurance for both property damage and business interruption relating to catastrophic events. Business interruption coverage covers lost profits and other costs incurred. Non-refundable insurance recoveries received in excess of the net book value of damaged assets, clean up and post-event costs are recognized as income in the period received.

The Company incurred costs related to the clean-up and repair of the facility and equipment, losses of inventory and fixed assets, rental of temporary office space for administrative and R&D personnel and payroll expenses for labor idled due to the flood totaling approximately \$3,500 and recognized \$81 and \$1,578 in 2013 and 2012, respectively. The Company received approximately \$4,500 of insurance reimbursements associated with these costs. During the year ended September 27, 2013 the Company recognized a gain of \$771 under its business interruption coverage. In 2012 the Company recognized expense of \$19 and recorded a gain of \$220 related to insurance recoveries under its business interruption coverage and a gain of \$246 related to insurance proceeds received to replace fixed assets under the Company's property loss coverage. These amounts are included in "Administrative management, finance and information systems" expense in the Outdoor Equipment segment.

The Company has received all expected insurance recoveries related to this event.

15 RESTRUCTURING

On July 11, 2012, the Company announced plans to restructure certain operations related to its Watercraft segment. Specifically, the Company restructured its product sales and distribution in Europe and consolidated all of its U.S. operations at a single location in Old Town, Maine. The Company believes this plan will enhance the competitiveness and profit potential of its Watercraft business. This action resulted in the closure of sales offices in the U.K. and France, the closure of a marketing and R&D facility in Bellingham, Washington and the elimination of approximately 24 positions in the U.S. and Europe. The related charges are included in the “Administrative management, finance and information systems” line in the Company’s accompanying Consolidated Statements of Operations in the Watercraft segment. The restructuring accrual is included in the “Other current liabilities” line in the Company’s accompanying Consolidated Balance Sheets. As a result of this action the Company increased its allowance for doubtful accounts by \$60 and \$450 in 2013 and 2012, respectively. The planned actions related to this restructuring were completed at the end of 2013. The total cost of this restructuring was approximately \$2,510. The remaining restructuring liabilities should be settled by the end of the first quarter of fiscal 2015.

	Employee Termination Costs	Contract Exit Costs	Other Exit Costs	Total
Accrued restructuring liabilities as of September 30, 2011	\$ -	\$ -	\$ -	\$ -
Activity during the period ended September 28, 2012:				
Charges to earnings	574	282	162	1,018
Settlement payments	(146)	(282)	(62)	(490)
Accrued restructuring liabilities as of September 28, 2012	428	-	100	528
Activity during the period ended September 27, 2013:

16 VALUATION AND QUALIFYING ACCOUNTS

The following summarizes changes to valuation and qualifying accounts for 2014, 2013 and 2012:

	Balance at Beginning of Year	Additions Charged to Costs and Expenses	Less Deductions	Balance at End of Year
Year ended October 3, 2014				
Allowance for doubtful accounts	\$ 3,759	\$ 288	\$ 1,382	\$ 2,665
Reserves for inventory valuation	4,015	1,043	1,108	3,950
Valuation of deferred tax assets	9,479	668	1,413	8,734
Reserves for sales returns	1,129	2,553	2,254	1,428
Year ended September 27, 2013				
Allowance for doubtful accounts	\$ 4,172	\$ 769	\$ 1,182	\$ 3,759
Reserves for inventory valuation	5,679	1,269	2,933	4,015
Valuation of deferred tax assets	13,299	1,262	5,082	9,479
Reserves for sales returns	1,367	1,857	2,095	1,129
Year ended September 28, 2012				
Allowance for doubtful accounts	\$ 3,076	\$ 1,558	\$ 462	\$ 4,172
Reserves for inventory valuation	6,405	2,307	3,033	5,679
Valuation of deferred tax assets	14,300	1,461	2,462	13,299
Reserves for sales returns	1,484	1,995	2,112	1,367

17 QUARTERLY FINANCIAL SUMMARY (UNAUDITED)

The following summarizes quarterly operating results for the years presented below:

(thousands, except per share data)	First Quarter		Second Quarter		Third Quarter		Fourth Quarter	
	2014	2013	2014	2013	2014	2013	2014	2013
Net sales	\$79,100	\$87,274	\$124,273	\$132,100	\$137,133	\$129,772	\$84,904	\$77,315
Gross profit	29,929	33,814	48,846	54,084	55,819	54,337	34,019	28,814
Operating profit (loss)	(2,908)	1,526	11,546	12,638	9,332	16,133	(1,279)	(4,706)
Income (loss) before income taxes	(2,920)	610	11,214	13,063	10,105	15,510	(977)	(4,523)
Income tax expense (benefit)	(727)	363	3,810	4,126	5,407	1,856	(191)	(1,012)
Net income (loss)	\$(2,193)	\$247	\$7,404	\$8,937	\$4,698	\$13,654	\$(786)	\$(3,511)
Net income (loss) per common share - Basic:								
Class A	\$(0.22)	\$0.03	\$0.75	\$0.91	\$0.48	\$1.39	\$(0.08)	\$(0.36)
Class B	\$(0.22)	\$0.02	\$0.68	\$0.83	\$0.43	\$1.26	\$(0.07)	\$(0.33)
Net income (loss) per common share - Diluted:								
Class A	\$(0.22)	\$0.02	\$0.67	\$0.90	\$0.40	\$1.37	\$(0.08)	\$(0.35)
Class B	\$(0.22)	\$0.02	\$0.67	\$0.90	\$0.40	\$1.37	\$(0.08)	\$(0.35)

Due to changes in stock prices during the year and the timing of issuance of shares, the cumulative total of quarterly net income (loss) per share amounts may not equal the net income (loss) per share for the entire year.

18 ACQUISITION

On November 14, 2012, the Company acquired all of the outstanding common and preferred stock of Jetboil, Inc. (“Jetboil”) in a purchase transaction with Jetboil’s founders and other shareholders (the “Sellers”). Jetboil, founded and based in Manchester, New Hampshire, designs and manufactures the world’s top brand of portable outdoor cooking systems.

The \$15,420 of consideration paid in this acquisition was funded with existing cash and credit facilities. Approximately \$3,200 of the purchase price was paid into a segregated escrow account which was set aside to fund potential indemnity claims that may be made by the Company against the Sellers in connection with the inaccuracy of certain representations and warranties made by Sellers or related to the breach or nonperformance of certain other actions or conditions related to the acquisition, for a period of 15 months from the acquisition date. On February 14, 2014, within the 15 month timeframe, the Company filed an indemnity claim against the Sellers which has since been resolved by the parties. There are no further pending claims related to this acquisition. As a result of the resolution of the foregoing indemnity claim, the Company received a distribution of \$1,600 from the escrow during the Company’s third fiscal quarter, which was recorded as a favorable adjustment in “Administrative management, finance and information systems” in the accompanying Consolidated Statement of Operations in the Outdoor Equipment segment. The remaining escrow balance was released to the Sellers during the Company’s fiscal third quarter.

F-38

The following table summarizes the final fair values of the assets acquired and liabilities assumed, and the resulting goodwill acquired at the date of the Jetboil acquisition.

Recognized amounts of identifiable assets acquired and liabilities assumed	
Accounts receivable	\$1,184
Inventories	2,232
Other current assets	167
Property, plant and equipment	314
Identifiable intangible assets	10,400
Less, accounts payable and accruals	1,111
Less, deferred tax liabilities	4,241
Total identifiable net assets	8,945
Goodwill	6,475
Net assets acquired	\$15,420

The goodwill that resulted from this acquisition reflects the cash flow expected from the acquisition due primarily to expected expanded distribution and growth in all Outdoor Equipment brands and was not deductible for tax purposes. Transaction costs incurred for the acquisition totaled \$361, of which \$295 was recognized during the fiscal year ended September 27, 2013, and are included in the "Administrative management, finance and information systems" line in the Company's accompanying Consolidated Statements of Operations in the Other/Corporate segment.

The fair value assigned in the acquisition to finite lived intangible assets was as follows:

Description	Amount	Useful Life (yrs)
Patents	\$240	7
Noncontractual customer relationships	3,700	15
Non-compete agreements	1,060	4

The weighted average useful life at the date of acquisition of total amortizable intangible assets acquired in the acquisition was 12.3 years.

The acquisition included an indefinite lived tradename valued at \$5,400. During the third quarter of fiscal 2014, forecasted cash flows related to Jetboil declined from the assumptions used in the initial valuation. This change led the Company to perform an interim impairment test on the acquired indefinite lived intangible assets. The test consisted of comparing the carrying value of the assets to their fair value. The fair value was determined using a relief from royalty method under the income approach which uses projected revenue allocable to the tradename and a royalty rate at which it is assumed a market participant would be willing to incur as its cost to manufacture branded product. As a result of this analysis, the Company recognized an impairment charge of \$2,000 in "Goodwill and other intangible asset impairment" in the accompanying Consolidated Statements of Operations in the Outdoor Equipment segment.

Based on these same indicators of potential impairment, the Company also performed an impairment analysis on the goodwill related to the Outdoor Equipment-Consumer reporting unit using the income approach based on estimated cash flows. As of the measurement date of June 27, 2014, the carrying value of the reporting unit exceeded its indicated fair value. As a result, the Company proceeded to Step 2 of the impairment test and determined an impairment charge of \$6,475, the entire carrying amount, was required. The charge is included in "Goodwill and other intangible asset impairment" in the accompanying Consolidated Statements of Operations in the Outdoor Equipment segment. The Company also evaluated long-lived assets and identified no impairment on those assets.
