THE NAVIGATORS GROUP, INC. AND SUBSIDIARIES

Notes to Interim Consolidated Financial Statements

(Unaudited)

#### Note 1. Accounting Policies

The interim consolidated financial statements are unaudited but reflect all adjustments which, in the opinion of management, are necessary to provide a fair statement of the results of The Navigators Group, Inc. and its subsidiaries for the interim periods presented on the basis of accounting principles generally accepted in the United States of America (GAAP or U.S. GAAP). All such adjustments are of a normal recurring nature. All significant intercompany transactions and balances have been eliminated. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported revenues and expenses during the reporting periods. The results of operations for any interim period are not necessarily indicative of results for the full year. The terms we , us , our and the Company as used herein mean Th Navigators Group, Inc. without its subsidiaries. These financial statements should be read in conjunction with the consolidated financial statements and notes contained in the Company s 2005 Annual Report on Form 10-K. Certain amounts for the prior year have been reclassified or restated to conform to the current year s presentation.

#### Note 2. Reinsurance Ceded

The Company s ceded earned premiums were \$88,880,000 and \$83,464,000 for the three months ended March 31, 2006 and 2005, respectively. The Company s ceded incurred losses were \$63,109,000 and \$53,435,000 for the three months ended March 31, 2006 and 2005, respectively.

#### Note 3. Segment Information

The Company s subsidiaries are primarily engaged in the underwriting and management of property and casualty insurance.

Effective in 2006, the Company classifies its business into two underwriting segments, consisting of the Insurance Companies and Lloyd s Operations, which are separately managed, and a Corporate segment. Segment data for each of the two underwriting operations include allocations of revenues and expenses of the Navigators Agencies and Parent Company s expenses and related income tax amounts previously reported separately. The Corporate segment consists of the Parent Company s investment income and related tax effect. Each segment maintains its own investments, on which it earns income and realizes capital gains or losses. Income tax expense is recorded based on the respective income of each segment. Segment data for 2005 and prior periods have been restated to reflect this change in segment reporting.

The Insurance Companies consist of Navigators Insurance Company, which includes the U.K. Branch, and NIC Insurance Company and are primarily engaged in underwriting marine insurance and related lines of business, contractors general liability insurance, and professional liability insurance. The Lloyd s Operations underwrite marine and related lines of business at Lloyd s of London. The Navigators Agencies are underwriting management companies which produce, manage and underwrite insurance and reinsurance for the Company. All segments are evaluated based on their GAAP results.

The Insurance Companies and the Lloyd s Operations performance are measured based on underwriting results which is a non-GAAP measure and the related combined ratio which is another non-GAAP measure of

underwriting profitability. Underwriting profit or loss is calculated from net earned premiums, less net losses and LAE, commission expense and other operating expenses related to underwriting activities. The combined ratio is derived by taking such net losses and LAE and operating expenses divided by net earned premiums. A combined ratio of less than 100% indicates an underwriting profit and over 100% indicates an underwriting loss.

Financial data by segment for the three months ended March 31, 2006 and 2005 was as follows:

	Three Months Ended March 31 Insurance Lloyd s							
	Companies	(	Deperations (\$ in thou		Corporate )		Total (1)

(1) Certain amounts included in the segment columns include inter-segment transactions causing certain rows not to crossfoot.

(2) The other operating expense ratio is adjusted to include commission and other income (expense).

The Insurance Companies net earned premium includes \$8,227,000 and \$8,350,000 of net earned premium from the U.K. Branch for the three months ended March 31, 2006 and 2005, respectively.

#### Note 4. Comprehensive Income

Comprehensive income encompasses net income, net unrealized capital gains and losses on available for sale securities, and foreign currency translation adjustments. Please refer to the *Consolidated Statements of Stockholders* Equity and the *Consolidated Statements of Comprehensive Income*, included herein, for the components of accumulated other comprehensive income (loss) and of comprehensive income (loss), respectively.

#### Note 5. Stock-Based Compensation

Stock based compensation is expensed as the stock awards vest with the expense being included in *other operating expenses* for the periods indicated. The amount charged to expense for stock grants was \$422,000 and \$378,000 for the three months ended March 31, 2006 and 2005, respectively. The amount charged to expense for stock options was \$240,000 and \$246,000 for the three months ended March 31, 2006 and 2005, respectively. Stock appreciation rights resulted in expense of \$829,000 and \$75,000 for the three months ended March 31, 2006 and 2005, respectively.

In addition, \$35,000 and \$35,000 were expensed for the three months ended March 31, 2006 and 2005, respectively, for stock issued annually to non-employee directors as part of their directors compensation for serving on the Company s Board of Directors.

#### Note 6. Application of New Accounting Standards

In December 2004, the Financial Accounting Standards Board (the FASB ) issued Statement of Financial Accounting Standard (SFAS ) No. 123 (revised 2004), *Share Based Payment*, which is a revision of SFAS 123, *Accounting for Stock-Based Compensation*, eliminating the alternative use of APB 25. The adoption of SFAS No. 123 (revised 2004) on January 1, 2006 had no material effect on the Company s results of operations or financial condition since the Company adopted the fair value recognition provisions of SFAS No. 123 in 2003.

#### Note 7. Lloyd s Syndicate

We record our pro rata share of Lloyd s Syndicate 1221 s assets, liabilities, revenues and expenses, after making adjustments to convert Lloyd s accounting to U.S. GAAP. The most significant U.S. GAAP adjustments relate to income recognition. Lloyd s syndicates determine underwriting results by year of account at the end of three years. We record adjustments to recognize underwriting results as incurred, including the expected ultimate cost of losses incurred. These adjustments to losses are based on actuarial analysis of syndicate accounts, including forecasts of expected ultimate losses provided by the

syndicates. At the end of the Lloyd s three year period for determining underwriting results for an account year, the syndicate will close the account year by reinsuring outstanding claims on that account year with the participants for the account s next underwriting year. The amount to close an underwriting year into the next year is referred to as the

reinsurance to close . The reinsurance to close transaction is recorded in the fourth quarter as additional written and earned premium, losses incurred, loss reserves and receivables, all in the same amount. No gain or loss is recorded on the reinsurance to close transaction.

Our Lloyd s Syndicate 1221 s stamp capacity is  $\pounds$ 112.5 million (\$197.2 million) in 2006 compared to  $\pounds$ 135.0 million (\$246.0 million) in 2005. Stamp capacity is a measure of the amount of premium a Lloyd s

syndicate is authorized to write based on a business plan approved by the Council of Lloyd s. Syndicate 1221 s capacity is expressed net of commission (as is standard at Lloyd s) of approximately 21%. The Syndicate 1221 premium recorded in the Company s financial statements is gross of commission. The Company participates for 100% and 97.5% of Syndicate 1221 s capacity for the 2006 and 2005 underwriting years, respectively. The Lloyd s Operations included in the consolidated financial statements represent the Company s participation in Syndicate 1221.

The Company provides letters of credit to Lloyd s to support its Syndicate 1221 capacity. If the Company increases its participation or if Lloyd s changes the capital requirements, the Company may be required to supply additional letters of credit or other collateral acceptable to Lloyd s, or reduce the capacity of Syndicate 1221. The letters of credit are provided through the credit facility which the Company maintains with a consortium of banks. The credit facility agreement requires that the banks vote periodically whether or not to renew the credit facility. If the banks decide not to renew credit facility, the Company will need to find other sources to provide the letters of credit or other collateral in order to continue to participate in Syndicate 1221. The renewal amendment executed in January 2005 renewed the letter of credit facility until June 30, 2007. The bank facility is collateralized by all of the common stock of Navigators Insurance Company.

#### Note 8. Income Tax - Valuation Allowance

The Company had state and local operating loss carryforwards amounting to potential future tax benefits of \$5,236,000 and \$5,009,000 at March 31, 2006 and December 31, 2005, respectively. A valuation allowance was established for the full amount of these potential future tax benefits due to the uncertainty associated with their realization.

#### Note 9. Commitments and Contingencies

Except as follows, the Company is not a party to, or the subject of, any material legal proceedings which depart from the ordinary routine litigation incident to the kinds of business it conducts.

At the end of April 2006, the Company was served as a defendant in an action in the Northern District Court of Georgia captioned *New Cingular Wireless Headquarters, LLC, et al. v. Marsh & McLennan Companies, Inc., et al.*, along with approximately 100 other defendants. While it is not possible at this very preliminary stage to predict the outcome of this litigation, the Company believes the allegations, which involve contingent commissions and bid-rigging in the insurance industry, to be without merit and intends to vigorously defend itself against them.

#### Note 10. Subsequent Event Senior Notes

On April 17, 2006, the Company completed a public debt offering of \$125 million principal amount 7% senior unsecured notes due May 1, 2016 (the Senior Notes ) and received net proceeds of \$123.5 million. The Company contributed \$100 million of the proceeds to the capital and surplus of Navigators Insurance Company and retained the remainder at the Parent Company for general corporate purposes. Interest will be paid on the Senior Notes each May 1 and November 1 with the first payment due on November 1, 2006. The Company may redeem the Senior Notes at any time and from time to time, in whole or in part, at a make-whole redemption price. The Senior Notes are the Company s only senior unsecured obligations and will rank equally with future senior unsecured indebtedness. The effective interest rate related to the Senior Notes, based on the net proceeds received, is approximately 7.15%.

### Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

#### Note on Forward-Looking Statements

Some of the statements in this Quarterly Report on Form 10-Q are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Whenever used in this report, the words estimate , expect , believe or similar expressions are intended to identify such forward-looking statements. Forward-looking statements are derived from information that we currently have and assumptions that we make. We cannot assure that anticipated results will be achieved, since results may differ materially because of both known and unknown risks and uncertainties which we face. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Factors that could cause actual results to differ materially from our forward-looking statements include, but are not limited to:

the effects of domestic and foreign economic conditions, and conditions which affect the market for property and casualty insurance;

changes in the laws, rules and regulations which apply to our insurance companies;

the effects of emerging claim and coverage issues on our business, including adverse judicial or regulatory decisions and rulings;

the effects of competition from banks and other insurers and the trend toward self-insurance;

risks that we face in entering new markets and diversifying the products and services we offer;

unexpected turnover of our professional staff;

changing legal and social trends and inherent uncertainties in the loss estimation process that can adversely impact the adequacy of loss reserves and the allowance for reinsurance recoverables, including our estimates relating to ultimate asbestos liabilities and related reinsurance recoverables;

risks inherent in the collection of reinsurance recoverable amounts from our reinsurers over many years into the future based on their financial ability and intent to meet such obligations to the Company;

risks associated with our continuing ability to obtain reinsurance covering our exposures at appropriate prices and/or in sufficient amounts and the related recoverability of our reinsured losses;

weather-related events and other catastrophes (including acts of terrorism) impacting our insureds and/or reinsurers, including, without limitation, the impact of Hurricanes Katrina, Rita, and Wilma and the possibility that our estimates of losses from Hurricanes Katrina, Rita and Wilma will prove to be materially inaccurate;

our ability to attain adequate prices, obtain new business and retain existing business consistent with our expectations;

the possibility of downgrades in our claims-paying and financial strength ratings significantly adversely affecting us, including reducing the number of insurance policies we write generally, or causing clients who require an insurer with a certain rating level to use higher-rated insurers;

the inability of our internal control framework to provide absolute assurance that all incidents of fraud or unintended material errors will be detected and prevented;

the risk that our investment portfolio suffers reduced returns or investment losses which could reduce our profitability; and

other risks that we identify in future filings with the Securities and Exchange Commission (the SEC), including without limitation the risks described under the caption Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2005.

In light of these risks, uncertainties and assumptions, any forward-looking events discussed in this Form 10-Q may not occur. You are cautioned not to place undue reliance on any forward-looking statements, which speak only as of their respective dates.

The discussion and analysis of our financial condition and results of operations contained herein should be read in conjunction with our consolidated financial statements and accompanying notes which appear elsewhere in this Form 10-Q. It contains forward-looking statements that involve risks and uncertainties. Please see Note on Forward-Looking Statements for more information. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those discussed below and elsewhere in this Form 10-Q.

#### Overview

We are an international insurance holding company focusing on specialty products for niches within the overall property/casualty insurance market. The Company consists of insurance company operations, insurance underwriting agencies and operations at Lloyd s of London. Our largest product line and most long-standing area of specialization is ocean marine insurance. We have also developed specialty niches in professional liability insurance, and in specialty liability insurance primarily consisting of contractors liability coverages. We conduct operations through our insurance company subsidiaries, our underwriting agencies (the Navigators Agencies ) and our operations at Lloyd s of London (the Lloyd s Operations ). Our insurance company subsidiaries (the Insurance Companies ) consist of Navigators Insurance Company, which includes a United Kingdom Branch (the U.K. Branch ), and NIC Insurance Company, which underwrites specialty and professional liability insurance on an excess and surplus lines basis fully reinsured by Navigators Insurance Company. The Navigators Agencies consist of five wholly-owned insurance underwriting agencies which produce, manage and underwrite insurance and reinsurance for the Company. Our Lloyd s Operations include Navigators Underwriting Agency Ltd. (NUAL ), a Lloyd s of London (Lloyd s ) underwriting agency which manages Lloyd s Syndicate 1221 through two wholly-owned Lloyd s corporate members.

While management takes into consideration a wide range of factors in planning the Company s business strategy and evaluating results of operations, there are certain factors that management believes are fundamental to understanding how the Company is managed. First, underwriting profit is consistently emphasized as a primary goal, above premium growth. Management s assessment of our trends and potential growth in underwriting profit is the dominant factor in its decisions with respect to whether or not to expand a business line, enter into a new niche, product or territory or, conversely, to contract capacity in any business line. In addition, management focuses on managing the costs of our operations. Management believes that careful monitoring of the costs of existing operations and assessment of costs of potential growth opportunities are important to our profitability. Access to capital also has a significant impact on management s outlook for our operations. The Insurance Companies operations and ability to grow their business and take advantage of market opportunities are particularly constrained by

regulatory capital requirements and rating agency assessments of capital adequacy.

The discussions that follow include tables, which contain both our consolidated and segment operating results for each of the quarters ended March 31, 2006 and 2005. In presenting our financial results we have discussed our performance with reference to underwriting results which is a non-GAAP measure and the related combined ratio which is another non-GAAP measure of underwriting profitability. We consider such measures, which may be defined differently by other companies, to be important in the understanding of our overall results

of operations. Underwriting profit or loss is calculated from premiums earned, less net losses and LAE, commission expense and other operating expenses related to underwriting activities. The combined ratio is derived by taking such net losses and LAE and expenses divided by earned premiums. A combined ratio of less than 100% indicates an underwriting profit and over 100% indicates an underwriting loss.

Although not a financial measure, management s decisions are also greatly influenced by access to specialized underwriting and claims expertise in our lines of business. We have chosen to operate in specialty niches with certain common characteristics which we believe provide us with the opportunity to use our technical underwriting expertise in order to realize underwriting profit. As a result, we have focused on underserved markets for businesses characterized by higher severity and low frequency of loss where we believe our intellectual capital and financial strength bring meaningful value. In contrast, we have avoided niches that we believe have a high frequency of loss activity and/or are subject to a high level of regulatory coverage requirements, such as workers compensation and personal automobile insurance, because we do not believe our technical expertise is of as much value in these types of businesses. Examples of niches that have the characteristics we look for include bluewater hull (which provides coverage for physical damage to, for example, highly valued cruise ships) and directors and officers liability (which covers litigation exposure of a corporation s directors and officers). These types of exposures require substantial technical expertise. We attempt to mitigate the financial impact of severe claims on our results by conservative and detailed underwriting, prudent use of reinsurance and a balanced portfolio of risks.

Our revenue is primarily comprised of premiums and investment income. The Insurance Companies derive their premiums primarily from business written by the Navigators Agencies. The Lloyd s Operations derive their premiums from business written by NUAL. Beginning in 2006, the Navigators Agencies produce and manage business only for the Insurance Companies and are reimbursed for actual costs. Prior to 2006, the Navigators Agencies received commissions and, in some cases, profit commissions on the business produced on behalf of the Insurance Companies and other unaffiliated insurers. NUAL is reimbursed for its actual costs and, where applicable, profit commissions on the business produced for Lloyd s Syndicate 1221.

Over the past three to four years, we have experienced generally beneficial market changes in our lines of business. As a result of several large industry losses in the second quarter of 2001, the marine insurance market began to experience diminished capacity and rate increases, initially in the offshore energy line of business. The marine rate increases began to level off in 2004 and into 2005. As a result of the substantial insurance industry losses resulting from Hurricanes Katrina and Rita, the marine insurance market is experiencing diminished capacity and rate increases, particularly for the offshore energy risks located in the Gulf of Mexico. The 2006 first quarter average renewal rate increase for all marine lines of business approximated 11% inclusive of offshore energy rates increases of 31% in the Lloyd s Operations and 59% in the Insurance Companies. Specialty liability losses over the past several years, particularly for our California construction liability business, also resulted in diminished capacity in the market in which we compete, as many former competitors who lacked the expertise to selectively underwrite this business have been forced to withdraw from the market. The first quarter 2006 renewal rates for the California construction liability market, the enactment of the Sarbanes-Oxley Act of 2002, together with recent financial and accounting scandals at publicly traded corporations and the increased frequency of securities-related class action litigation, has led to heightened interest in professional liability insurance generally. Average renewal premium rates increased approximately 1% in the first quarter of 2006 compared to relatively level rates in 2005 and a decrease of 3.2% in 2004 which followed substantial rate increases in 2003 and 2002, particularly for D&O insurance. D&O premium rates also increased approximately 1% in the first quarter of 2006 compared to relatively level rates in 2005 and a decrease of 3.2% in 2004 which followed substantial rate increases of approximately

Our business is cyclical and influenced by many factors. These factors include price competition, economic conditions, interest rates, weather-related events and other catastrophes including natural and man-made disasters (for example hurricanes and terrorism), state regulations, court decisions and changes in the law. The incidence and severity of catastrophes are inherently unpredictable. Although we will attempt to manage our

exposure to such events, the frequency and severity of catastrophic events could exceed our estimates, which could have a material adverse effect on our financial condition. Additionally, because our insurance products must be priced, and premiums charged, before costs have fully developed, our liabilities are required to be estimated and recorded in recognition of future loss and settlement obligations. Due to the inherent uncertainty in estimating these liabilities, we cannot assure you that our actual liabilities will not exceed our recorded amounts.

#### **Catastrophe Risk Management**

Our Insurance Companies and Lloyd s Operations have exposure to losses caused by hurricanes and other natural and man-made catastrophic events. The frequency and severity of catastrophes are unpredictable.

The extent of losses from a catastrophe is a function of both the total amount of insured exposure in an area affected by the event and the severity of the event. We continually assess our concentration of underwriting exposures in catastrophe exposed areas globally and attempt to manage this exposure through individual risk selection and through the purchase of reinsurance. We also use modeling technologies and concentration management tools that allow us to better monitor and control our accumulations of potential losses from catastrophe exposures. Despite these efforts, there remains uncertainty about the characteristics, timing and extent of insured losses given the nature of catastrophes. The occurrence of one or more severe catastrophic events could have a material adverse effect on the Company s results of operations, financial condition or liquidity.

As a result of the offshore energy losses suffered by the marine and energy market in 2005 stemming from Hurricanes Katrina and Rita, the 2006 marine reinsurance capacity has declined, reinsurance terms and conditions have tightened and reinsurance costs have dramatically increased, particularly for excess of loss reinsurance protection. As a result, through the 2006 first quarter, the Company has achieved significant improvements in pricing, terms and conditions for the offshore energy business as it renews while reducing its aggregate loss exposures in the Gulf of Mexico. The Company will also have an increased net retention for a catastrophic offshore energy loss in 2006 compared to 2005 as a result of less available reinsurance protection at an increased reinsurance cost.

The occurrence of additional large loss events could reduce the reinsurance coverage that is available to us and could further weaken the financial condition of our reinsurers, which could have a material adverse effect on our results of operations. Although the reinsurance agreements make the reinsurers liable to us to the extent the risk is transferred or ceded to the reinsurer, ceded reinsurance arrangements do not eliminate our obligation to pay claims to our policyholders. Accordingly, we bear credit risk with respect to our reinsurers. Specifically, our reinsurers may not pay claims made by us on a timely basis, or they may not pay some or all of these claims. Either of these events would increase our costs and could have a material adverse effect on our business. We are required to pay the losses even if a reinsurer fails to meet its obligations under the reinsurance agreement. Hurricanes Katrina and Rita increased our reinsurance recoverables significantly, which increased our credit risk.

#### **Industry Investigations**

The insurance industry has become the subject of increasing scrutiny with respect to insurance broker and agent compensation arrangements, and certain sales practices. The New York State Attorney General and other state and federal regulators have commenced investigations and other proceedings relating to the payment of contingent commissions by insurance companies to insurance brokers and agents and the extent to which such compensation has been disclosed, and the solicitation and provision of fictitious or inflated quotes. These investigations and proceedings could result in legal precedents and new industry-wide practices or legislation, rules or regulations that could significantly affect our industry and may also cause stock price volatility for companies in the insurance industry.

### THE NAVIGATORS GROUP, INC. AND SUBSIDIARIES

The Company has completed its own internal review with respect to such contingent commission arrangements and the anti-competitive sales practices discussed above. In this internal inquiry, the Company did

not find any evidence that it has engaged in the bid-rigging and price-fixing activities that are at the core of the industry investigations into these anti-competitive practices. The Company is supportive of industry efforts to encourage transparency in the disclosure of contingent commissions paid to brokers by insurers.

The reinsurance industry has also become the subject of increasing scrutiny with respect to the alleged improper use of reinsurance agreements to manipulate financial reporting results. The New York State Attorney General and other state and federal regulators have commenced investigations and other proceedings related to reinsurance agreements in which the insurance risk transferred between the ceding company and reinsurer may have been insufficient to properly account for such transactions as reinsurance in financial statements filed with insurance regulatory authorities and the SEC. Such transactions may include separate or side agreements that reduce, limit or mitigate the indemnification against loss or liability relating to the insurance risk transferred to the reinsurer in a reinsurance agreement.

As a result of these industry investigations, accounting and reporting requirements for reinsurance transactions, including risk transfer guidance used to determine when sufficient insurance risk has been transferred by the ceding company to properly account for such transactions as reinsurance, may change.

The Company believes that all of its reinsurance transactions meet the risk transfer requirements to be accounted for as prospective reinsurance in its financial statements, and also believes it has no separate side agreements that would limit the insurance risk transferred to the reinsurer under its reinsurance agreements. The Company is unable to determine any reinsurance industry financial reporting changes that could occur as a result of such investigations and the effects, if any, on its financial reporting of reinsurance transactions.

#### **Critical Accounting Policies**

It is important to understand our accounting policies in order to understand our financial statements. Management considers certain of these policies to be critical to the presentation of the financial results, since they require management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets, liabilities, revenues, expenses, and related disclosures at the financial reporting date and throughout the reporting period. Certain of the estimates result from judgments that can be subjective and complex, and consequently actual results may differ from these estimates, which would be reflected in future periods.

Our most critical accounting policies involve the reporting of the reserves for losses and loss adjustment expenses (LAE) (including losses that have occurred but were not reported to us by the financial reporting date), reinsurance recoverables, written and unearned premium, the recoverability of deferred tax assets, the impairment of invested assets, accounting for Lloyd s results and the translation of foreign currencies.

*Reserves for Losses and LAE.* Reserves for losses and LAE represent an estimate of the expected cost of the ultimate settlement and administration of losses, based on facts and circumstances then known. Actuarial methodologies are employed to assist in establishing such estimates and include judgments relative to estimates of future claims severity and frequency, length of time to develop to ultimate, judicial theories of liability and other third party factors which are often beyond our control. Due to the inherent uncertainty associated with the reserving process, the ultimate liability may be different from the original estimate. Such estimates are regularly reviewed and updated and any resulting adjustments are included in the current year s results.

*Reinsurance Recoverables.* Reinsurance recoverables are established for the portion of the loss reserves that are ceded to reinsurers. Reinsurance recoverables are determined based upon the terms and conditions of reinsurance contracts which could be subject to interpretations that differ from our own based on judicial theories of liability. In addition, we bear credit risk with respect to our reinsurers which can be significant considering that certain of the reserves remain outstanding for an extended period of time. We are required to pay losses even if a reinsurer fails to meet its obligations under the applicable reinsurance agreement.

*Written and Unearned Premium.* Written premium is recorded based on the insurance policies that have been reported to us and the policies that have been written by agents but not yet reported to us. We must estimate the amount of written premium not yet reported based on judgments relative to current and historical trends of the business being written. Such estimates are regularly reviewed and updated and any resulting adjustments are included in the current year s results. An unearned premium reserve is established to reflect the unexpired portion of each policy at the financial reporting date.

Substantially all of our business is placed through agents and brokers. Since the vast majority of the Company s gross written premium is primary or direct as opposed to assumed, the delays in reporting assumed premium generally do not have a significant effect on the Company s financial statements, since we record estimates for both unreported direct and assumed premium. We also record the ceded portion of the estimated gross written premium and related acquisition costs. The earned gross, ceded and net premiums are calculated based on our earning methodology which is generally pro-rata over the policy period. Losses are also recorded in relation to the earned premium. The estimate for losses incurred on the estimated premium is based on an actuarial calculation consistent with the methodology used to determine incurred but not reported loss reserves for reported premiums.

A portion of the Company's premium is estimated for unreported premium, mostly for the marine business written by our U.K. Branch and Lloyd's Operations. We generally do not experience any significant backlog in processing premiums. Such premium estimates are generally based on submission data received from brokers and agents and recorded when the insurance policy or reinsurance contract is bound and written. The estimates are regularly reviewed and updated taking into account the premium received to date versus the estimate and the age of the estimate. To the extent that the actual premium varies from the estimates, the difference, along with the related loss reserves and underwriting expenses, is recorded in current operations.

*Deferred Tax Assets.* We apply the asset and liability method of accounting for income taxes whereby deferred assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. In assessing the realization of deferred tax assets, management considers whether it is more likely than not that the deferred tax assets will be realized.

*Impairment of Investment Securities.* Impairment of investment securities results in a charge to operations when a market decline below cost is other-than-temporary. Management regularly reviews our fixed maturity and equity securities portfolios to evaluate the necessity of recording impairment losses for other-than-temporary declines in the fair value of investments. In general, we focus our attention on those securities whose market value was less than 80% of their cost or amortized cost, as appropriate, for six or more consecutive months. Factors considered in evaluating potential impairment include, but are not limited to, the current fair value as compared to cost or amortized cost of the security, as appropriate, the length of time the investment has been below cost or amortized cost and by how much, our intent and ability to retain the investment for a period of time sufficient to allow for an anticipated recovery in value, specific credit issues related to the issuer and current economic conditions. Other-than-temporary impairment losses result in a permanent reduction of the cost basis of the underlying investment. Significant change in impairment losses reported in the consolidated financial statements.

Accounting for Lloyd s Results. We record our pro rata share of Lloyd s Syndicate 1221 assets, liabilities, revenues and expenses, after making adjustments to convert Lloyd s accounting to U.S. GAAP. The most significant GAAP adjustments relate to income recognition. Lloyd s syndicates determine underwriting results by year of account at the end of three years. We record adjustments to recognize underwriting results as incurred, including the expected ultimate cost of losses incurred. These adjustments to losses are based on actuarial analysis of syndicate accounts, including forecasts of expected ultimate losses provided by the syndicate. At the end of the Lloyd s three-year period for determining underwriting results for an account year, the syndicate will close the account year by reinsuring outstanding claims on that account year with the

participants for the account s next underwriting year. The amount to close an underwriting year into the next year is referred to as the reinsurance to close (RITC). The RITC transaction is recorded in the fourth quarter as additional written and earned premium, losses incurred, loss reserves and receivables, all in the same amount. There are no gains or losses recorded on the RITC transaction.

*Translation of Foreign Currencies*. Financial statements of subsidiaries expressed in foreign currencies are translated into U.S. dollars in accordance with SFAS No. 52, *Foreign Currency Translation*, issued by the FASB. Under SFAS 52, functional currency assets and liabilities are translated into U.S. dollars using period end rates of exchange and the related translation adjustments are recorded as a separate component of *accumulated other comprehensive income*. Functional currencies are generally the currencies of the local operating environment. Statement of income amounts expressed in functional currencies are translated using average exchange rates. Gains and losses resulting from foreign currency transactions are recorded in *other income (expense)* in the Company s Consolidated Statements of Income.

### **Results of Operations and Overview**

The following is a discussion and analysis of our consolidated and segment results of operations for the three month period ended March 31, 2006 and 2005. All earnings per share data is presented on a per diluted share basis.

Net income for the three month period ended March 31, 2006 was \$15.5 million or \$.93 per share compared to \$9.7 million or \$0.76 per share for the three month period ended March 31, 2005. Included in these results were net realized capital gains (losses) of (\$0.02) per share and \$0.01 per share for the three months ended March 31, 2006 and 2005, respectively.

Cash flow from operations was \$29.5 million for the first quarter of 2006 compared to \$65.2 million for the 2005 first quarter. The positive cash flow contributed to the growth in invested assets and net investment income. Included in the 2005 first quarter cash flow is approximately \$24 million attributable to the settlement of the 2002 underwriting year reinsurance to close premium recorded by Lloyd s Syndicate 1221 in the 2004 fourth quarter. Paid loss activity for the 2006 first quarter included gross paid losses of approximately \$10 million for Hurricanes Katrina and Rita of which \$4 million is recoverable from reinsurers and \$1.9 million for settled asbestos claims of which \$1.1 million is due from reinsurers.

Consolidated stockholders equity increased 2% to \$478.3 million or \$28.70 per share at March 31, 2006 compared to \$470.2 million or \$28.30 per share at December 31, 2005. The increase was primarily due to net income of \$15.5 million for the first quarter of 2006, partially offset by an increase of \$9.1 million in other comprehensive loss substantially all due to net unrealized losses in the investment portfolios due to rising interest rates.

**Revenues.** Gross written premium increased to \$263.8 million in the first quarter of 2006, from \$217.0 million in the first quarter of 2005, a 22% increase. The growth in gross written premium reflects a combination of business expansion in both new and existing lines of business coupled with premium rate changes on renewal policies. The marine business experienced growth of 20%, primarily as a result of significant rate increases in the offshore energy line of business coupled with a net modest increase in premiums in the other classes of business. Gross written premium for professional liability business written both in the Insurance Companies and Lloyd s Operations increased 12% during the 2006 first quarter. Specialty business grew 45% primarily due to continued product and geographic diversification. The premium rate changes discussed above and below for marine, specialty and professional liability are calculated primarily by comparing premium amounts on policies that have renewed. The premiums are judgmentally adjusted for exposure factors when deemed significant and sometimes represent an aggregation of several lines of business. The rate change calculations provide an indicated pricing trend and are not meant to be a precise analysis of the numerous factors that affect premium rates or the adequacy of such rates to cover all underwriting costs and generate an underwriting profit. The calculation can also be affected quarter by quarter depending on the particular policies and the number of policies that renew during that period. Due to market conditions, these rate changes may or may not apply to new business which may be more competitively priced compared to renewal business. The following table sets forth our gross and net written premium and net earned premium by segment and line of business for the periods indicated:

		2(	)06		Thr	ree Months Ended March 31,					2005

### **Gross Written Premium**

### Insurance Companies Gross Written Premium

*Marine Premium.* The 2006 first quarter gross written premium consists of 31% marine liability, 20% offshore energy, 13% protection and indemnity (P&I) and 9% bluewater hull with the remainder in several other marine related classes of business.

The marine gross written premium for the 2006 first quarter increased 20% compared to the 2005 first quarter, reflecting growth across several lines of business including offshore energy, liability and P&I. The average renewal premium rates during the first quarter of 2006 increased by approximately 11%. Navigators Insurance Company has in the past obtained its marine business through participation in the marine pool managed by the Navigators Agencies. Commencing in 2006, the marine pool has been eliminated and, therefore, all of the marine business generated by the Navigators Agencies is exclusively for the Insurance Companies. Navigators Insurance Company participated for 85% of the marine pool in 2005.

*Specialty Premium.* The business written in the first three months of 2006 consists of 52% general liability business for small general and artisan contractors, 22% excess casualty business, 12% personal umbrella business and 14% other targeted commercial risks. The specialty gross written premium for the 2006 first quarter increased 45% compared to the 2005 first quarter reflecting growth across all lines of business and premiums generated from our excess casualty business, which started in the first quarter of 2005. The average renewal premium rates decreased by approximately 6% for the contractors liability business in the 2006 first quarter.

*Professional Liability Premium.* Our insurance company subsidiaries write professional liability insurance. The 2006 first quarter consisted of 59% directors and officers liability insurance ( D&O ) for privately held and publicly traded corporations, 34% professional liability coverage for lawyers and other professionals and 7% professional liability coverage for architects and engineers. In 2002, the professional liability business was expanded to include errors and omissions insurance and employment practices liability coverages. Commencing in October 2004, our U.K. Branch began writing professional liability coverages for U.K. solicitors and, in 2005, we began writing professional liability coverages for u.K. solicitors and, in 2005, we began writing professional liability coverages for U.K. solicitors and, in 2005, we began writing professional liability coverages for U.K. solicitors and, in 2005 first quarter premium for the 2006 first quarter increased 1% compared to the 2005 first quarter. Included in the 2005 first quarter gross written premium was approximately \$1.6 million of international D&O business written by the Insurance Companies that has been renewed in the Lloyd s Operations. Average overall renewal premium rates for this business increased by approximately 1% in the 2006 first quarter.

During the 2006 first quarter, the Company entered into an agreement to acquire the renewal rights to the D&O and employment practices liability policy portfolios of Genesis Professional Liability Managers, Inc. (Genesis). The transaction does not include any past or existing liabilities of the policy portfolios. The Company will pay an annual override or fee to Genesis based on gross written premium for a two year period to the extent the Genesis business is underwritten and renewed by the Company. The Company believes that it may renew anywhere from \$5 million to \$10 million of premium from such business over an annual period. However, the Company may renew a lesser or greater amount than expected.

### Lloyd s Operations Gross Written Premium

*Marine Premium.* The 2006 first quarter consisted of 32% cargo and specie, 23% marine liability and 18% offshore energy with the remainder in several other marine related classes of business.

Our gross written premium is based on the stamp capacity of Syndicate 1221 and the percentage of such stamp capacity we provide. Our percentage of participation in the stamp capacity is 100% for 2006 compared to 97.5% for 2005. Stamp capacity is a measure of the amount of premium a Lloyd s syndicate is authorized to

		١
1	۰.	,
_		

write as determined based on a business plan approved by the Council of Lloyd s. The stamp capacity for Syndicate 1221 has been reduced to £112.5 million (\$197.2 million) in 2006 from £135 million (\$246.0 million) in 2005, which could be increased by the Company during the 2006 calendar year based on opportunities in the market place subject to approval by Lloyd s. The marine gross written premium for the first quarter of 2006 increased 23% compared to the first quarter of 2005. The average renewal premium rates increased approximately 11% in the 2006 first quarter.

*Professional Liability Premium.* Our Lloyd s Operations commenced writing international D&O business during the 2005 second quarter and produced \$2.0 million of gross written premium in the 2006 first quarter.

*Other Premium.* Other premium consists of premium for engineering and construction business which provides coverage for construction projects including machinery, equipment and loss of use due to delays and of premium for onshore energy business which principally focuses on the oil and gas, chemical and petrochemical industries with coverages primarily for property damage and business interruption.

<u>Ceded Written Premium</u>. In the ordinary course of business, we reinsure certain insurance risks with unaffiliated insurance companies for the purpose of limiting our maximum loss exposure, protecting against catastrophic losses, and maintaining desired ratios of net premiums written to statutory surplus. The relationship of ceded to written premium varies based upon the types of business written and whether the business is written by the Insurance Companies or the Lloyd s Operations.

The following tables set forth our ceded written premium by segment and major lines of business for the periods indicated:

		larch 31,

NM = not meaningful

The ratio of ceded written premium to gross written premium in the 2006 first quarter was 45.6%, compared to 46.0% the 2005 first quarter. The decrease in the ratio of ceded written premium to gross written premium in the 2006 first quarter compared to the 2005 first quarter was due to a combination of factors.

Commencing with the 2006 underwriting year, the marine pool has been eliminated and therefore, all the marine business generated by the Navigators Agencies is exclusively for the Insurance Companies. The 2005 underwriting year marine business was ceded 15% to pool members and 85% retained by the Insurance Companies. In 2005, members shared the 15% pro rata costs and benefits of all quota share and excess of loss reinsurance ceded by the pool which was also eliminated in 2006.

Also commencing with the 2006 underwriting year, our Lloyd s Operations is retaining more of Syndicate 1221 s business with the 2005 purchase of the 2.5% minority interest in Syndicate 1221 and the replacement of a 5% capacity provider with our own letter of credit funding.

Somewhat offsetting the reduction in ceded premiums due to the marine pool elimination and increased retention of business in Syndicate 1221 were changes in the 2006 reinsurance structure and amounts ceded under

marine quota share and excess of loss agreements for the Insurance Companies and Lloyd s Operations reflecting higher reinsurance costs resulting from the tightened market conditions for catastrophe loss protection as a result of the 2005 industry-wide hurricane losses.

The net effects of the items discussed above on the decrease in the ratio of ceded written premium to gross written premium were largely offset as the 2005 first quarter ceded premium was reduced by approximately \$14.5 million resulting from the cancellation of a quota share reinsurance agreement for specialty business effective March 31, 2005. Such amount represented the unearned portion of the premium ceded to the reinsurance agreement that was retained. This retained amount was offset by \$8.2 million of premiums ceded to the reinsurance agreement during the 2005 first quarter. The 2005 first quarter ratio of ceded written premium to gross written premium was 48.9%, excluding these amounts.

**Net Written Premium**. Net written premium increased 22% in the 2006 first quarter compared to the first quarter of 2005. The 2005 first quarter net written premium was increased by a reduction of approximately \$14.5 million in ceded reinsurance premium resulting from the cancellation of a quota share reinsurance agreement for specialty business effective March 31, 2005, as noted above. Such amount represented the unearned portion of the premium ceded to the reinsurance agreement that was retained. This retained amount was offset by \$8.2 million of premiums ceded to the reinsurance agreement during the 2005 first quarter. The 2006 first quarter net written premium increased approximately 30% excluding the net effect of the quota share treaty cancellation on the 2005 first quarter. The 30% increase in net written premium, when excluding these effects, in 2006 is primarily due to business expansion, and the increase in Navigators Insurance Company s portion of the marine pool to 100% in 2006 from 85% in 2005.

<u>Net Earned Premium</u>. Net earned premium, which generally lags the increase in net written premium, increased 34% in the 2006 first quarter compared to the first quarter of 2005 as a result of the increased net written premium discussed above.

<u>Commission Income</u>. Commission income from unaffiliated business was \$1.3 million compared to \$1.3 million in the first quarter of 2005.

<u>Net Investment Income</u>. Net investment income increased 65% in the 2006 first quarter compared to the same period in 2005 due to the increase in invested assets as a result of the positive cash flow from the increased premium volume and the \$123.8 million of net proceeds from the October 2005 common stock offering.

<u>Net Realized Capital Gains (Losses)</u>. Pre-tax net income included a net realized capital loss of \$424,000 for the three months ended March 31, 2006 compared to a net realized capital gain of \$167,000 for the 2005 first quarter. On an after-tax basis, the net realized capital loss was \$276,000 or \$0.02 per share compared to a net realized capital gain of \$109,000 or \$0.01 per share for the 2005 first quarter.

<u>Other Income/(Expense)</u>. Other income/(expense) for the first quarter of both 2006 and 2005 consisted primarily of foreign exchange gains and losses from our Lloyd s Operations and inspection fees related to the specialty insurance business.

### **Operating Expenses**

*Net Losses and* Loss Adjustment Expenses Incurred. The ratios of net losses and loss adjustment expenses incurred to net earned premium (loss ratios) for the 2006 and 2005 first quarters were 59.9% and 59.6%, respectively. The 2006 first quarter loss ratio was favorably impacted by 3.7 loss ratio points resulting from a \$3.8 million net redundancy of prior year loss reserves for the Insurance Companies.

The following tables set forth our net loss and LAE reserves by segment and line of insurance business and the total case reserves and incurred but not reported ( IBNR ) reserves as of March 31, 2006 and December 31, 2005:

	Μ	arch 31, 2006 (\$ in tho	ecember 31, 2005

Total net case loss reserves	\$	228,999	\$ 228,423
Total net IBNR loss reserves		373,231	350,553
Total net loss reserves	\$	602,230	\$ 578,976

Our reserving practices and the establishment of any particular reserve reflect management s judgment concerning sound financial practice and do not represent any admission of liability with respect to any claims made against us. No assurance can be given that actual claims made and related payments will not be in excess of the amounts reserved. During the loss settlement period, it often becomes necessary to refine and adjust the estimates of liability on a claim either upward or downward. Even after such adjustments, ultimate liability may exceed or be less than the revised estimates.

There are a number of factors that could cause actual losses and loss adjustment expenses to differ materially from the amount that we have reserved for losses and loss adjustment expenses.

The process of establishing loss reserves is complex and imprecise as it must take into account many variables that are subject to the outcome of future events. As a result, informed subjective judgments as to our ultimate exposure to losses are an integral component of our loss reserving process.

IBNR loss reserves are calculated by the Company s actuaries using several standard actuarial methodologies, including the paid and incurred loss development and the paid and incurred Bornheutter-Ferguson loss methods. Additional analyses, such as frequency/severity analyses, are performed for certain books of business.

While an annual loss reserve study is conducted for each line of business, the timing of such studies varies throughout the year. Additionally, a review of the emergence of actual losses relative to expectations for

each line of business is conducted each quarter. A separate analysis of our asbestos and environmental liability exposures is also performed annually and updated quarterly. Any adjustments that result from this review are recorded in the quarter in which they are identified.

The actuarial methods generally utilize analysis of historical patterns of the development of paid and reported losses for each line of business by underwriting year. This process relies on the basic assumption that past experience, adjusted for the effects of current developments and likely trends, is an appropriate basis for predicting future outcomes. This basic assumption is particularly relevant for our marine and energy business written by our Insurance Companies and Lloyd s Operations where we generally rely on the substantial loss development data accumulated over many years to establish IBNR loss reserves for immature underwriting years.

For certain long tail classes of business where anticipated loss experience is less predictable because of the small number of claims and/or erratic claim severity patterns, estimates are based on both expected losses and actual reported losses. These classes include our California contractors liability business and directors and officers liability business, among others. For these classes, we set ultimate losses for each underwriting year reflecting several factors, including our evaluation of loss trends and the current risk environment. The expected ultimate losses are adjusted as the underwriting year matures.

While we have a significant amount of loss development data that is utilized by our actuaries to establish the IBNR loss reserves for our California contractors liability business, there have been significant changes relating to this product and its market that could affect the applicability of our data. For example, one factor that may affect reserves and claim frequency is legislation implemented in California, which generally provides consumers who experience construction defects a method other than litigation to obtain defect repairs. The law, which became effective July 1, 2002 with a sunset provision effective January 1, 2011, provides for an alternative dispute resolution system that attempts to involve all parties to the claim at an early stage. This legislation may impact claim severity, frequency and length of settlement assumptions underlying our reserves. Accordingly, our ultimate liability may exceed or be less than current estimates due to this variable, among others. There were approximately 1,021 specialty construction liability claims open at March 31, 2006 compared to 1,012 at December 31, 2005.

The professional liability business generates third-party claims which also are longer tail in nature. The professional liability policies mostly provide coverage on a claims-made basis, whereby coverage is generally provided only for those claims that are made during the policy period. These claims often involve a lengthy litigation period after being reported. Our professional liability business is relatively immature, as we first began writing the business in late 2001. Accordingly, it will take some time to better understand the reserve trends on this business. Given the limited history of this business, the actuaries generally utilize industry data to initially establish IBNR loss reserves, which are subsequently adjusted based on actual and expected claim emergence as each underwriting year matures. There were 697 professional liability claims open at March 31, 2006 compared to 638 at December 31, 2005.

At the start of each underwriting year, our actuaries and management determine an initial selected ultimate loss ratio for each line of business. Management participation generally includes the underwriter for the particular line of business, executive management, and claims and finance personnel. Generally, such determinations are based on prior year history modified where deemed appropriate for observed changes in premium rates, terms, conditions, exposures, and loss trends. Industry data is generally utilized for new lines of business.

As underwriting years age, for each subsequent quarter and following years, our actuaries, with management, continue to update and refine their estimates of selected ultimate loss ratios for each line of business, by underwriting year, using the actuarial methods referred to above and incorporating relevant factors that generally include actual loss development, recent claims activity, number and dollar amount of open claims, risk characteristics of the particular line of business, the potential effects of changes in underwriting and claims procedures, historic performance relative to expectations and the relationship of the IBNR reserve levels across

underwriting years and between similar lines of business. The output of this process results in refinements to the ultimate loss ratios. Such refinements to the ultimate loss ratios for the prior underwriting years generate prior year redundancies or deficiencies recorded in the year such refinements are made.

The following tables set forth our net loss and LAE reserves for our specialty liability and professional liability businesses as of March 31, 2006 and December 31, 2005:

			March 31, 2006										
Type of Business		Reported eserves		Net IBNR		Total Net Loss Reserves	% of IBNR to Total Net Loss Reserves

Type of Business		•				Net Loss Reserves	to Total Net Loss Reserves						
		•	\$										
Business	R	eserves	\$	IBNR	]	Reserves	Loss Reserves						
Business Specialty construction liability	R	25,329	\$	<b>IBNR</b> 141,078	]	Reserves 166,407	Loss Reserves 84.8%						

*Asbestos Liability.* Our exposure to asbestos liability principally stems from marine liability insurance written on an occurrence basis during the mid-1980s. In general, our participation on such risks is in the excess layers, which requires the underlying coverage to be exhausted prior to coverage being triggered in our layer. In many instances we are one of many insurers who participate in the defense and ultimate settlement of these claims, and we are generally a minor participant in the overall insurance coverage and settlement.

The reserves we have established for asbestos exposures at March 31, 2006 and December 31, 2005 are for: (i) the 2005 fourth quarter settlements of two large claims aggregating approximately \$28 million for excess insurance policy limits exposed to class action suits against two insureds involved in the manufacturing or distribution of asbestos products, each settlement to be paid over two years; (ii) the 2004 settlement of a large claim approximating \$25 million exposed to a class action suit which settlement will be paid over seven years starting in June 2005; (iii) other insureds not directly involved in the manufacturing or distribution of asbestos; and (iv) attritional asbestos claims that could be expected to occur over time.

The Company has now settled the four large asbestos claims where excess policy limits were exposed to class action suits which gave rise to the reserve action taken in the fourth quarter of 2003. The Company believes that there are no remaining known claims where it would suffer a material loss as a result of excess policy limits being exposed to class action suits for insureds involved in the manufacturing or distribution of asbestos

products. There can be no assurances, however, that material loss development may not arise in the future from existing asbestos claims or new claims given the evolving and complex legal environment that may directly impact the outcome of the asbestos exposures of our insureds.

Substantially all of our asbestos liability reserves are included in our marine loss reserves.

	 Months Ended ch 31, 2006	Year Ended December 31, 2005							
	(\$ in thousands)								
Gross of Reinsurance									
Beginning reserve	\$ 56,838	\$	78,421						
Incurred losses & LAE	80		(17,409)						
Calendar year payments	1,902		4,174						
Ending reserves	\$ 55,016	\$	56,838						
Net of Reinsurance									
Beginning reserve	\$ 30,372	\$	31,394						
Incurred losses & LAE	43		529						
Calendar year payments	761		1,551						
Ending reserves	\$ 29,654	\$	30,372						

Our management believes that the overall estimates for the reserves for losses and loss adjustment expenses are adequate to cover the ultimate cost of losses and loss adjustment expenses on reported and unreported claims. However, it is possible that the ultimate liability may exceed or be less than such estimates. To the extent that reserves are deficient or redundant, the amount of such deficiency or redundancy is treated as a charge or credit to earnings in the period in which the deficiency or redundancy is identified.

*Commission Expense.* Commission expense paid to unaffiliated brokers and agents is generally based on a percentage of the gross written premium and is reduced by ceding commissions the Company may receive on the ceded written premium. Commissions are generally deferred and recorded as deferred policy acquisition costs to the extent that they relate to unearned premium. Commission expense as a percentage of earned premium in the first quarter of 2006 was 13.2%, compared to 12.4% for the 2005 comparable period. The increase in the 2006 commission ratio principally reflects the reduction of ceding commissions from quota share reinsurance as more business written is being retained by the Company.

*Other Operating Expenses.* The 6% increase in other operating expenses in the first quarter of 2006, compared to the 2005 first quarter is attributable primarily to employee-related expenses resulting from expansion of the business. Included in the three months ended March 31, 2006 were \$1.5 million in the aggregate for employee stock options, stock grants and stock appreciation rights expense compared to \$699,000 for the 2005 first quarter.

**Income Taxes**. The income tax expense was \$7.6 million and \$4.5 million for the first quarters of 2006 and 2005, respectively. The effective tax rates for the 2006 and 2005 first quarters were 32.8% and 31.8%, respectively. As of March 31, 2006 and December 31, 2005, the net deferred Federal, foreign, state and local tax assets were \$35.0

million and \$28.3 million, respectively.

We are subject to the tax regulations of the United States and foreign countries in which we operate. The Company files a consolidated federal tax return, which includes all domestic subsidiaries and the U.K. Branch.

The income from the foreign operations is designated as either U.S connected income or non-U.S. connected income. Lloyd s is required to pay U.S. income tax on U.S. connected income (U.S. source income) written by Lloyd s syndicates. Lloyd s and the IRS have entered into an agreement whereby the amount of tax due on U.S. connected income is calculated by Lloyd s and remitted directly to the IRS. These amounts are then charged to the corporate members in proportion to their participation in the relevant syndicates. The Company s corporate members are subject to this agreement and will receive U.K. tax credits for any U.S. income tax incurred up to the U.K. income tax charge on the U.S. income. The non-U.S. connected insurance income would generally constitute taxable income under the Subpart F income section of the Internal Revenue Code since less than 50% of the Company s premium is derived within the U.K. and would therefore be subject to U.S. taxation when the Lloyd s year of account closes. Taxes are accrued at a 35% rate on our foreign source insurance income and foreign tax credits, where available, are utilized to offset U.S. tax as permitted. U.S. taxes are not accrued on the earnings of the Company s foreign agencies as these earnings are not subject to the Subpart F tax regulations. These earnings are subject to taxes under U.K. tax regulations at a 30% rate.

We have not provided for U.S. deferred income taxes on the undistributed earnings of approximately \$11 million of our non-U.S. subsidiaries since these earnings are intended to be permanently reinvested in the foreign subsidiary. However, in the future, if such earnings were distributed to the Company, taxes of approximately \$2 million would be payable on such undistributed earnings and would be reflected in the tax provision for the year in which these earnings are no longer intended to be permanently reinvested in the foreign subsidiary assuming all foreign tax credits are realized.

The Company had state and local operating loss carryforwards amounting to potential future tax benefits of \$5.2 million and \$5.0 million at March 31, 2006 and December 31, 2005, respectively. A valuation allowance was established for the full amount of these potential future tax benefits due to the uncertainty associated with their realization. The Company s state and local tax carryforwards at March 31, 2006 expire from 2021 to 2026.

#### **Segment Information**

Effective in 2006, the Company classifies its business into two underwriting segments consisting of the Insurance Companies and Lloyd s Operations, which are separately managed, and a Corporate segment. Segment data for each of the two underwriting operations include allocations of revenues and expenses of Navigators Agencies and the Parent Company expenses and related income tax amounts previously reported separately. Data for the Corporate segment consists of the Parent Company s investment income and related tax effect. Segment data for 2005 and prior periods have been restated to reflect this change in segment reporting.

We evaluate the performance of each segment based on its underwriting and net income results. The Insurance Companies and the Lloyd s Operations results are measured by taking into account net premiums earned, incurred losses and loss adjustment expenses (LAE), commission expense and other underwriting expenses. The Corporate segment consists of the Parent Company s investment income and related tax effect. Each segment also maintains its own investments, on which it earns income and realizes capital gains or losses. Our underwriting performance is evaluated separately from the performance of our investment portfolios.

Following are the financial results of the Company s two underwriting segments.

#### **Insurance** Companies

Our Insurance Companies consist of Navigators Insurance Company, including its U.K. Branch, and NIC Insurance Company. Navigators Insurance Company is our largest insurance subsidiary and has been active since 1983. It specializes principally in underwriting marine insurance and related lines of business, specialty liability insurance and professional liability insurance. NIC Insurance Company, a wholly owned subsidiary of Navigators Insurance Company, began operations in 1990. It underwrites similar types of business but on a non-admitted or surplus lines basis and is fully reinsured by Navigators Insurance Company. The Navigators Agencies produce business for the Insurance Companies.

Following are the results of operations for the Insurance Companies for the three months ended March 31, 2006 and 2005:

	Three Months End March 31, 2006	ed 2005

Net earned premiums of the Insurance Companies increased 42% in the 2006 first quarter compared to the same period last year. Such increase primarily resulted from the March 31, 2005 cancellation of a quota share reinsurance agreement for specialty business.

Underwriting results generally reflect the favorable industry market conditions over the last three to four years coupled with satisfactory loss trends in the aforementioned quarterly periods. The 2006 first quarter loss ratio was favorably impacted by 5.6 loss ratio points resulting from a \$3.8 million net redundancy of prior year loss reserves.

The approximate annualized pre-tax yields on the Insurance Companies investment portfolio, excluding net realized capital gains and losses, for the 2006 first quarter was 4.5% compared to 4.1% for the comparable 2005 period. Net investment income increased in the first three months of 2006 compared to the same period in 2005 due to the increase in the yield and the strong cash flows resulting in a larger investment portfolio including the \$120 million statutory surplus contribution from the net proceeds of our October 2005 equity offering, in an environment of gradually increasing interest rates as monetary policy tightened.

### Lloyd s Operations

The Lloyd s Operations consist of NUAL, which manages Lloyd s Syndicate 1221, Millennium Underwriting Ltd. and Navigators Corporate Underwriters Ltd. Both Millennium Underwriting Ltd. and Navigators Corporate Underwriters Ltd. are Lloyd s corporate members with limited liability and provide capacity to Lloyd s Syndicate 1221. NUAL owns Navigators Underwriting Ltd., an underwriting managing agency with its principal office in Manchester, England, which underwrites cargo and engineering business for Lloyd s Syndicate 1221. In January 2005, we formed Navigators NV in Antwerp, Belgium, a wholly owned subsidiary of NUAL. Navigators NV produces transport liability, cargo and marine liability premium on behalf of Syndicate 1221. The Lloyd s Operations and Navigators Management (UK) Limited, a Navigators Agency which produces business for the U.K. Branch, are subsidiaries of Navigators Holdings (UK) Limited located in the United Kingdom.

Lloyd s Syndicate 1221 has stamp capacity of £112.5 million (\$197.2 million) in 2006 compared to £135 million (\$246.0 million) in 2005. Stamp capacity is a measure of the amount of premium a Lloyd s syndicate is authorized to write based on a business plan approved by the Council of Lloyd s. We provide 100% and 97.5% of Syndicate 1221 s total stamp capacity in 2006 and 2005, respectively. In September 2005, the Company purchased the remaining outstanding minority interest of the Syndicate 1221 s capacity for the 2006 underwriting year.

Syndicate 1221 s stamp capacity is expressed net of commission (as is standard at Lloyd s) of approximately 21%. The Syndicate 1221 premium recorded in the Company s financial statements is gross of commission. The Lloyd s marine business had been subject to deteriorating pricing beginning in the mid-1990 s. The pricing competition showed some signs of stabilizing in 2000 and prices increased from 2001 through 2003. The marine rate increases began to level off in 2004 and into 2005. As a result of substantial insurance industry losses resulting from Hurricanes Katrina and Rita in August and September 2005, the global marine insurance market is experiencing diminished capacity and rate increases, particularly for the Gulf of Mexico offshore energy lines of business. Lloyd s presents its results on an underwriting year basis, generally closing each underwriting year after three years. We make estimates for each underwriting year and timely accrue the expected results. Our Lloyd s Operations included in the consolidated financial statements represent our participation in Syndicate 1221.

Lloyd s syndicates report the amounts of premiums, claims, and expenses recorded in an underwriting account for a particular year to the companies or individuals that participate in the syndicates. The syndicates generally keep accounts open for three years. Traditionally, three years have been necessary to report substantially all premiums associated with an underwriting year and to report most related claims, although claims may remain unsettled after the underwriting year is closed. A Lloyd s syndicate typically closes an underwriting year by reinsuring outstanding claims on that underwriting year with the participants for the next underwriting year. The ceding participants pay the assuming participants an amount based on the unearned premiums and outstanding claims in the underwriting year at the date of the assumption. Our participation in Lloyd s Syndicate 1221 is represented by and recorded as our proportionate share of the underlying assets and liabilities and results of operations of the syndicate since (i) we hold an undivided interest in each asset, (ii) we are proportionately liable for each liability and (iii) Syndicate 1221 is not a separate legal entity. At Lloyd s, the amount to close an underwriting year into the next year is referred to as the reinsurance to close ( RITC ) transaction. The RITC amounts represent the transfer of the assets and liabilities from the participants of a closing underwriting year to the participants of the next underwriting year. To the extent our participation in the syndicate changes, the RITC amounts vary accordingly. The RITC transaction is recorded in the fourth quarter as additional written and earned premium, losses incurred, loss reserves and receivables, all in the same amount. There are no gains or losses recorded on the RITC transaction.

We provide letters of credit to Lloyd s to support our participation in Syndicate 1221 s stamp capacity as discussed below under the caption *Liquidity and Capital Resources*.

Whenever a member of Lloyd s is unable to pay its debts to policyholders, such debts may be payable by the Lloyd s Central Fund. If Lloyd s determines that the Central Fund needs to be increased, it has the power to assess premium levies on current Lloyd s members up to 3% of a member s underwriting capacity in any one year. The Company does not believe that any assessment is likely in the foreseeable future and has not provided any allowance for such an assessment. However, based on the Company s 2006 capacity at Lloyd s of £112.5 million, the March 31, 2006 exchange rate of £1 equals \$1.74 and in the event of a maximum 3% assessment, the Company would be assessed approximately \$5.9 million.

Following are the results of operations of the Lloyd s Operations for the three months ended March 31, 2006 and 2005:

	Three Mon Marc 2006	2005		
	(\$ in tho	usands)		
Gross written premium	\$ 101,748	\$	87,830	
Net written premium	53,782		43,509	
Net earned premium	36,370		30,175	
Net losses and LAE	(22,163)		(17,379)	
Commission expense	(6,581)		(4,881)	
Other operating expenses	(4,975)		(5,505)	
Commission and other income (expense)	266		896	
Underwriting profit	\$ 2,917	\$	3,306	
Investment income	2,007		749	
Net realized capital (losses)	(349)		(99)	
Income before income tax expense	4,575		3,956	
Income tax expense	1,601		1,385	
Net Income	\$ 2,974	\$	2,571	
Loss and LAE ratio	60.9%		57.6%	
Commission expense ratio	18.1%		16.2%	
Other operating expense ratio (1)	13.0%		15.2%	
Combined ratio	92.0%		89.0%	

(1) Includes commission and other income (expene).

The Lloyd s Operations have been experiencing business expansion coupled with improving underwriting results as a result of the generally favorable market conditions for marine and energy business from late 2001 through 2003, and continuing to a lesser extent in 2004. Premium rate increases occurred following Hurricanes Katrina and Rita, particularly in the offshore energy business. Net earned premium ceded to the Insurance Companies in the first quarters of 2006 and 2005 was \$13,000 and \$711,000, respectively.

The approximate annualized pre-tax investment yields on the Lloyd s Operations investment portfolio, excluding net realized capital gains and losses, for the 2006 first quarter was 3.5% compared to 1.6% for the comparable 2005 period. Generally, funds invested at Lloyd s have been invested with a relatively short average duration in order to meet liquidity needs. The average duration of our Lloyd s Operations invested assets at March 31, 2006 was 1.4 years. Such yields are net of interest credits to certain reinsurers for funds withheld by our Lloyd s Operations.

#### **Off-Balance Sheet Transactions**

There have been no material changes in the information concerning off-balance sheet transactions as stated in the Company s 2005 Annual Report on Form 10-K.

#### **Tabular Disclosure of Contractual Obligations**

There have been no material changes in the operating lease or capital lease information concerning contractual obligations as stated in the Company s 2005 Annual Report on Form 10-K.

Total reserves for losses and LAE were \$1.6 billion at both March 31, 2006 and December 31, 2005. There were no significant changes in the Company s lines of business or claims handling that would create a material change in the percentage relationship of the projected payments by period to the total reserves.

#### Investments

The objective of the Company s investment policy, guidelines and strategy is to maximize total investment return in the context of preserving and enhancing shareholder value and statutory surplus of the Insurance Companies. Secondarily, an important consideration is to optimize the after-tax book income.

The investments are managed by outside professional fixed-income and equity portfolio managers. The Company seeks to achieve its investment objectives by investing in cash equivalents and money market funds, municipal bonds, U.S. Government bonds, U.S. Government agency guaranteed and non-guaranteed securities, corporate bonds, mortgage-backed and asset-backed securities and common and preferred stocks. Our investment guidelines require that the amount of the consolidated fixed-income portfolio rated below A- by Standard & Poor s ( S&P ) or A3 by Moody s shall not exceed 20% of the statutory surplus of the Insurance Companies. Securities rated below BBB- by S&P or Baa3 by Moody s are not eligible to be purchased. Up to 15% of the statutory surplus of the Insurance Companies may be invested in equity securities that are actively traded on major U.S. stock exchanges. Our investment guidelines prohibit investments in derivatives other than as a hedge against foreign currency exposures or the writing of covered call options on the equity portfolio.

The Insurance Companies investments are subject to the direction and control of their respective boards of directors and our Finance Committee. The investment portfolio and the performance of the investment managers are reviewed quarterly. These investments must comply with the insurance laws of New York State, the domiciliary state of Navigators Insurance Company and NIC Insurance Company. These laws prescribe

### THE NAVIGATORS GROUP, INC. AND SUBSIDIARIES

the type, quality and concentration of investments which may be made by insurance companies. In general, these laws permit investments, within specified limits and subject to certain qualifications, in Federal, state and municipal obligations, corporate bonds, preferred stocks, common stocks, real estate mortgages and real estate.

The Lloyd s Operations investments are subject to the direction and control of the board of directors and the Investment Committee of NUAL, as well as the board of directors and Finance Committee of the Company, and represent our share of the investments held by Syndicate 1221. These investments must comply with the rules and regulations imposed by Lloyd s and by certain overseas regulators. The investment portfolio and the performance of the investment managers are reviewed quarterly.

The majority of the investment income of the Navigators Agencies is derived from fiduciary funds invested in accordance with the guidelines of various state insurance departments. These guidelines typically require investments in short-term instruments. This investment income is paid to Navigators Insurance Company.

All fixed maturity and equity securities are carried at fair value. The fair value is based on quoted market prices or dealer quotes provided by independent pricing services. The following tables show our cash and investments as of March 31, 2006 and December 31, 2005:

March 31, 2006	Fair Value	Gross Unrealized Gains		Gross Unrealized (Losses)	Cost or Amortized Cost
		(\$ in the	ousand	s)

(1) Approximately 5.6% and 10.7% of total fixed maturities investments are direct and collateralized obligations, respectively, of FNMA and FHLMC.

At March 31, 2006 and December 31, 2005, all fixed-maturity and equity securities held by us were classified as available-for-sale.

We regularly review our fixed maturity and equity securities portfolios to evaluate the necessity of recording impairment losses for other-than-temporary declines in the fair value of investments. In general, we focus our attention on those securities whose market value was less than 80% of their cost or amortized cost, as appropriate, for six or more consecutive months. Other factors considered in evaluating potential impairment include the current fair value as compared to cost or amortized cost, as appropriate, our intent and ability to retain the investment for a period of time sufficient to allow for an anticipated recovery in value, specific credit issues related to the issuer and current economic conditions.

When a security in our investment portfolio has an unrealized loss that is deemed to be other-than-temporary, we write the security down to fair value through a charge to operations. Significant changes in the factors we consider when evaluating investments for impairment losses could result in a significant change in impairment losses reported in the consolidated financial statements. There were no impairment losses recorded in our fixed maturity or equity securities portfolios in the first quarters of 2006 or 2005.

The following table summarizes all securities in an unrealized loss position at March 31, 2006 and December 31, 2005, showing the aggregate fair value and gross unrealized loss by the length of time those securities have continuously been in an unrealized loss position:

	March 3	1, 200	6		December 31, 2005

We analyze the unrealized losses quarterly to determine if any are other-than-temporary. The above unrealized losses have been determined to be temporary and generally result from changes in market conditions.

The following table shows the composition by National Association of Insurance Commissioners (NAIC) rating and the generally equivalent Standard & Poor s (S&P) and Moody s ratings of the fixed maturity securities in our portfolio with gross unrealized losses at March 31, 2006. Not all of the securities are rated by S&P and/or Moody s.

		Equivalent	Equivalent		Gross Unrealized	Loss	Fair Value			
NAIC Rating		S&P Rating	Moody s Rating		Amount	Percent of Total (\$ in tho	usands	Amount	Percent of Total	
	1	AAA/AA/A	Aaa/Aa/A	\$	18,731	93%	\$	830,400	94%	
	2	BBB	Baa		1,344	7%		51,491	6%	
	3	BB	Ba							
	4	В	В							
	5	CCC or lower	Caa or lower							
	6	N/A	N/A							
			Total	\$	20,075	100%	\$	881,891	100%	

At March 31, 2006, the gross unrealized losses in the table directly above are related to fixed maturity securities that are rated investment grade, which is defined as a security having a NAIC rating of 1 or 2, a S&P rating of BBB or higher, or a Moody s rating of Baa3 or higher. Unrealized losses on investment grade securities principally relate to changes in interest rates or changes in sector-related credit spreads since the securities were acquired. Any such unrealized losses are recognized in income, if the securities are sold, or if the decline in fair value is deemed other-than-temporary.

The scheduled maturity dates for fixed maturity securities in an unrealized loss position at March 31, 2006 are shown in the following table:

		Gross Unrealize			Fair Value	
	A	Amount	Percent of Total (\$ in thous)			Percent of Total
Due in one year or less	\$	342	2%	\$	46,084	5%
Due after one year through five years		4,413	22%		209,675	24%
Due after five years through ten years		4,274	21%		137,949	16%
Due after ten years		3,177	16%		132,775	15%
Mortgage- and asset-backed securities		7,869	39%		355,408	40%
Total fixed income securities	\$	20,075	100%	\$	881,891	100%

Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. Due to the periodic repayment of principal, the mortgage-backed and asset-backed securities are estimated to have an effective maturity of approximately 5.1 years.

Our realized capital gains and (losses) for the three months ended March 31, 2006 and 2005 were as follows:

	Three Months Ended March 31,					
		2005				
	(\$ in thousands)					
Fixed maturities:						
Gains	\$	272	\$	713		
(Losses)		(1,166)		(546)		
		(894)		167		
Equity securities:						
Gains		481				
(Losses)		(11)				
		470				
Net realized capital gains (losses)	\$	(424)	\$	167		

The following table details realized losses in excess of \$250,000 from sales and impairments during the first three months of 2006 and 2005 and the related circumstances giving rise to the loss:

Description	Date of Sale	roceeds om Sale	oss) on Sale	Impairment (\$ in thousar	Holdings at March 31, 2006 ids)	Net Unrealized (Loss)	# of Months Unrealized Loss Exceeded 20% of Cost or Amortized Cost
Three months ended March 31, 2006 and 2005:							
TIPS (1)	3/31/2006	\$ 15,418	\$ (305)				

(1) Treasury inflation protection securities (TIPS) were sold during the 2006 first quarter due to the widening breakeven yield spread between TIPS and Treasuries.

### **Reinsurance Recoverables**

We utilize reinsurance principally to reduce our exposure on individual risks, to protect against catastrophic losses, to maintain desired ratios of net written premium to statutory surplus and to stabilize loss ratios and underwriting results. Although reinsurance makes the reinsurer liable to us to the extent the risk is transferred or ceded to the reinsurer, ceded reinsurance arrangements do not eliminate our obligation to pay claims to our policyholders. Accordingly, we bear credit risk with respect to our reinsurers. Specifically, our reinsurers may not pay claims made by us on a timely basis, or they may not pay some or all of these claims. Either of these events would increase our costs and could have a material adverse effect on our business. We are required to pay the losses even if the reinsurer fails to meet its obligations under the reinsurance agreement. Hurricanes Katrina and Rita increased our reinsurance recoverables significantly which increased our credit risk.

We are protected by various treaty and facultative reinsurance agreements. Our exposure to credit risk from any one reinsurer is managed through diversification by reinsuring with a number of different reinsurers, principally in the United States and European reinsurance markets. To meet our standards of acceptability, when the reinsurance is placed, a reinsurer generally must have an A.M. Best Company and/or Standard & Poor s rating of A or better, or equivalent financial strength if not rated, plus at least \$250 million in policyholders surplus. Our Reinsurance Security Committee monitors the financial strength of our reinsurers and the related reinsurance receivables and periodically reviews the list of acceptable reinsurers. The reinsurance is placed either directly by us or through reinsurance intermediaries. The reinsurance intermediaries are compensated by the reinsurers.

An allowance for doubtful recoveries is maintained for any amounts considered to be uncollectible. At March 31, 2006 and December 31, 2005, we had allowances for uncollectible reinsurance of \$32.9 million and \$33.1 million, respectively. The allowances include \$21.6 million for uncollectible reinsurance as a result of loss reserves established in 2003 for asbestos exposures on marine and aviation business written mostly prior to 1986. Charges (recoveries) for uncollectible reinsurance amounts, all of which were recorded to incurred losses, were \$0.3 and \$1.0 million for the three months ended March 31, 2006 and 2005, respectively.

The Company continues to periodically monitor the financial condition and ongoing activities of its reinsurers, in order to assess the adequacy of its allowance for uncollectible reinsurance.

### Liquidity and Capital Resources

Cash flow provided by operations was \$29.5 million and \$65.2 million for the three months ended March 31, 2006 and 2005, respectively. The positive operating cash flow in the first three months of 2006 was primarily due to the increase in net written premium. Operating cash flow was used primarily to acquire additional investment assets.

The cumulative inception to date payment of gross losses from Hurricanes Katrina and Rita has approximated \$15 million of which \$10 million was paid in the 2006 first quarter. Such payments reduce cash flow for the gross amount paid until the ceded portion of the loss is collected from the reinsurers.

Investments and cash increased to \$1,195 million at March 31, 2006 from \$1,182 million at December 31, 2005. The increase was primarily due to the positive cash flow. Net investment income was \$12.6 million and \$7.6 million for the three months ended March 31, 2006 and 2005, respectively.

The approximate annualized pre-tax investment yields of the portfolio, excluding net realized capital gains and losses, for both the 2006 and 2005 first quarters were 4.3% and 3.5%, respectively. The increase in the pre-tax investment yield was due to the increase in interest rates as monetary policy continued to tighten. The positive cash flow along with the proceeds from maturities, calls and redemptions were reinvested at the higher prevailing rates. As of March 31, 2006 and December 31, 2005, all fixed maturity securities and equity securities held by us were classified as available-for-sale.

At March 31, 2006, the weighted average rating of our fixed maturity investments was AA by Standard & Poor s and Aa by Moody s. We believe that we have no significant exposure to credit risk since the fixed maturity investment portfolio consists of investment-grade bonds. At

March 31, 2006, our portfolio had an average maturity of 4.8 years and a duration of 3.6 years. Management continually monitors the composition and cash flow of the investment portfolio in order to maintain the appropriate levels of liquidity to ensure our ability to satisfy claims.

We have a credit facility provided through a consortium of banks. The credit facility was amended in January 2005 to increase the letters of credit available under the facility from \$80 million to \$115 million and to add a \$10 million line of credit facility. The expiration of the credit facility was also extended from November 10, 2005 to June 30, 2007. If at that time the banks do not renew the credit facility, we will need to find other

42

sources to provide the letters of credit or other collateral in order to continue our participation in Syndicate 1221. The credit facility, which is denominated in U.S. dollars, is utilized primarily by Navigators Corporate Underwriters Ltd. and Millennium Underwriting Ltd. to fund our participation in Lloyd s Syndicate 1221 which is denominated in British pounds. At March 31, 2006, letters of credit with an aggregate face amount of \$80.8 million were issued under the credit facility. The credit line was unused at March 31, 2006.

The credit facility is collateralized by all of the common stock of Navigators Insurance Company. The credit agreement contains covenants common to transactions of this type, including restrictions on indebtedness and liens, limitations on mergers and the sale of assets, maintaining certain consolidated tangible net worth, statutory surplus and other financial ratios. Cash dividends to shareholders are limited to \$2.5 million per year. No dividends have been declared or paid through March 31, 2006. At March 31, 2006, we were in compliance with all covenants.

An amendment to the credit facility was approved by the bank consortium in April 2006 to allow the Company to issue \$125 million of senior unsecured notes. The public debt offering of the senior notes was completed on April 17, 2006. The amendment which was for the purpose of permitting the issuance of the debt also, among other items, increased the amount of annual dividends that could be paid by the Company from \$2.5 million to \$5.0 million.

At March 31, 2006, our consolidated stockholders equity was \$478.3 million or \$28.70 per share compared to \$470.2 million or \$28.30 per share at December 31, 2005. The increase was primarily due to net income of \$15.5 million for the first three months of 2006 partially offset by an increase of \$9.1 million in other comprehensive loss substantially all due to net unrealized losses in the investment portfolios due to rising interest rates.

Our reinsurance has been placed with various U.S. and foreign insurance companies and with selected syndicates at Lloyd s. Pursuant to the implementation of Lloyd s Plan of Reconstruction and Renewal, a portion of our recoverables are now reinsured by Equitas (a separate United Kingdom authorized reinsurance company established to reinsure outstanding liabilities of all Lloyd s members for all risks written in the 1992 or prior years of account).

Time lags do occur in the normal course of business between the time gross losses are paid by the Company and the time such gross losses are billed and collected from reinsurers. Recoverable amounts at March 31, 2006 are anticipated to be billed and collected over the next several years as gross losses are paid by the Company.

Generally, for pro-rata or quota share reinsurers, including pool participants, the Company issues quarterly settlement statements for premiums less commissions and paid loss activity, which are expected to be settled within 45 days after the quarter end. The Company has the ability to issue cash calls requiring such reinsurers to pay losses whenever paid loss activity ceded to a particular reinsurance treaty exceeds a predetermined amount (generally not more than \$1 million) as set forth in the pro-rata treaty. For the Insurance Companies, cash calls must generally be paid within 30 calendar days. There is generally no specific settlement period for the Lloyd s Operations cash call provisions, but such billings are usually paid within 45 calendar days.

Generally, for excess of loss reinsurers the Company pays monthly or quarterly deposit premiums based on the estimated subject premiums over the contract period (usually one year) which are subsequently adjusted based on actual premiums determined after the expiration of the applicable reinsurance treaty. Paid losses subject to excess of loss recoveries are generally billed as they occur and are usually settled by reinsurers within 30 calendar days for the Insurance Companies and 30 business days for the Lloyd s Operations.

The Company sometimes withholds funds from reinsurers and may apply ceded loss billings against such funds in accordance with the applicable reinsurance agreements.

At March 31, 2006, approximately \$26.6 million was due from reinsurers under pro rata and excess of loss reinsurance treaties in connection with our asbestos exposures of which \$15.4 million is due from Equitas. Approximately 80% of such amounts will be due and payable to the Company over the next two years as the gross asbestos losses are billed and paid by the Company. The Company generally experiences significant collection delays for a large portion of such balances given that certain reinsurers are in run-off or otherwise no longer active in the reinsurance business. Such circumstances are considered in the Company s ongoing assessment of such reinsurance recoverables.

The Company believes that it has adequately managed its cash flow requirements related to reinsurance recoveries from its positive cash flows and the use of available short-term funds when applicable. However, there can be no assurances that the Company will be able to continue to adequately manage such recoveries in the future or that collection disputes or reinsurer insolvencies will not arise that could materially increase the collection time lags or result in recoverable write-offs causing additional incurred losses and liquidity constraints to the Company. The payment of gross claims and related collections from reinsurers with respect to Hurricanes Katrina and Rita could significantly impact the Company s liquidity needs. However, we expect to pay the 2005 hurricane losses over a period of years from cash flow and, if needed, short-term investments and expect to collect our paid reinsurance recoverables generally under the terms described above.

We primarily rely upon dividends from our subsidiaries to meet our holding company obligations. The dividends have historically come primarily from Navigators Insurance Company. At December 31, 2005, the maximum amount available for the payment of dividends by Navigators Insurance Company during 2006 without prior regulatory approval was \$35.6 million. No dividends have been paid by Navigators Insurance Company in 2006.

We believe that the cash flow generated by the operating activities of our subsidiaries will provide sufficient funds for us to meet our liquidity needs over the next twelve months. Beyond the next twelve months, cash flow available to us may be influenced by a variety of factors, including general economic conditions and conditions in the insurance and reinsurance markets, as well as fluctuations from year to year in claims experience.

In April 2006, the Company completed a public debt offering of \$125 million 7% senior unsecured notes due May 1, 2016 and contributed \$100 million of the proceeds to Navigators Insurance Company. The remaining net proceeds will remain in the Parent Company for general corporate purposes.

Condensed Parent Company balance sheets as of March 31, 2006 (unaudited) and December 31, 2005 follows:

	N	March 31, 2006 December 31, 2005 (\$ in thousands)		
Cash and short-term investments	\$	16,973	\$	16,926
Investments in subsidiaries		459,995		453,023
Other assets		7,556		6,229
Total assets	\$	484,524	\$	476,178
Accounts payable and other liabilities	\$	6,208	\$	5,940
Stockholders equity		478,316		470,238
Total liabilities and stockholders equity	\$	484,524	\$	476,178

At March 31, 2006 approximately \$4.0 million of investments are held in a tax escrow account on behalf of Navigators Insurance Company until two-year tax loss carryback periods expire.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in the information concerning market risk as stated in the Company s 2005 Annual Report on Form 10-K.

Item 4. Controls and Procedures

(a) The Chief Executive Officer and Chief Financial Officer of the Company have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under of the Securities Exchange Act of 1934, as amended (the Exchange Act )), as of the end of the period covered by this quarterly report. Based on such evaluation, such officers have concluded that as of the end of such period the Company s disclosure controls and procedures are effective in identifying, on a timely basis, material information required to be disclosed in our reports filed or submitted under the Exchange Act.

(b) There have been no changes during our first fiscal quarter in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company s internal control over financial reporting.

#### Part II - Other Information

### Item 1. Legal Proceedings

Except as follows, the Company is not a party to, or the subject of, any material legal proceedings which depart from the ordinary routine litigation incident to the kinds of business it conducts.

At the end of April 2006, the Company was served as a defendant in an action in the Northern District Court of Georgia captioned *New Cingular Wireless Headquarters, LLC, et al. v. Marsh & McLennan Companies, Inc., et al.*, along with approximately 100 other defendants. While it is not possible at this very preliminary stage to predict the outcome of this litigation, the Company believes the allegations, which involve contingent commissions and bid-rigging in the insurance industry, to be without merit and intends to vigorously defend itself against them.

Item 1a. Risk Factors

There have been no material changes from the risk factors as previously disclosed in the Company s 2005 Annual Report on Form 10-K.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

### Item 3. Defaults Upon Senior Securities

None.

# Item 4. <u>Submissions of Matters to a Vote of Security Holders</u>

None

## Item 5. Other Information

None.
