CITY NATIONAL CORPORATION

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)
Note 1. Summary of Significant Accounting Policies
Organization
City National Corporation (the Corporation) is the holding company for City National Bank (the Bank). The Bank delivers banking, trust are investment services through 78 offices in Southern California, the San Francisco Bay area, Nevada, New York City, Nashville, Tennessee and Atlanta, Georgia. As of June 30, 2013, the Corporation had five consolidated investment advisory affiliates and one unconsolidated subsidiary, Business Bancorp Capital Trust I. Because the Bank comprises substantially all of the business of the Corporation, references to the Company mean the Corporation and the Bank together. The Corporation is approved as a financial holding company pursuant to the Gramm-Leach-Bliley Act of 1999.
Consolidation
The consolidated financial statements of the Company include the accounts of the Corporation, its non-bank subsidiaries, the Bank and the Bank s wholly owned subsidiaries, after the elimination of all material intercompany transactions. It also includes noncontrolling interest, which is the portion of equity in a subsidiary not attributable to a parent. Redeemable noncontrolling interests are noncontrolling ownership interests that are redeemable at the option of the holder or outside the control of the issuer. The redeemable noncontrolling interests of third parties in the Corporation s investment advisory affiliates are not considered to be permanent equity and are reflected in the mezzanine section between liabilities and equity in the consolidated balance sheets. Noncontrolling interests—share of subsidiary earnings is reflected as Net income attributable to noncontrolling interest in the consolidated statements of income.
The Company s investment management and wealth advisory affiliates are organized as limited liability companies. The Corporation generally owns a majority position in each affiliate and certain management members of each affiliate own the remaining shares. The Corporation has contractual arrangements with its affiliates whereby a percentage of revenue is allocable to fund affiliate operating expenses (operating share) while the remaining portion of revenue (distributable revenue) is allocable to the Corporation and the noncontrolling owners. All majority-owned affiliates that meet the prescribed criteria for consolidation are consolidated. The Corporation is interests in investment management affiliates in which it holds a noncontrolling share are accounted for using the equity method. Additionally, the Company has various interests in variable interest entities (VIEs) that are not required to be consolidated. See Note 17 for a more detailed discussion on VIE

Use of Estimates

The Company s accounting and reporting policies conform to generally accepted accounting principles (GAAP) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and income and expenses during the reporting period. Circumstances and events that differ significantly from those underlying the Company s estimates and assumptions could cause actual financial results to differ from those estimates. The material estimates included in the financial statements relate to the allowance for loan and lease losses, the reserve for off-balance sheet credit commitments, other real estate owned (OREO), valuation of share-based compensation awards, income taxes, goodwill and intangible asset impairment, securities impairment, private equity and alternative investment impairment, valuation of assets and liabilities acquired in business combinations, including contingent consideration liabilities, subsequent valuations of acquired impaired loans, Federal Deposit Insurance Corporation (FDIC) indemnification assets, valuation of noncontrolling interest, and the valuation of financial assets and liabilities reported at fair value.

The Company has applied its critical accounting policies and estimation methods consistently in all periods presented in these financial statements. The Company s estimates and assumptions are expected to change as changes in market conditions and the Company s portfolio occur in subsequent periods.

Table of Contents

Note 1. Summary of Significant Accounting Policies (Continued)
Basis of Presentation
The Company is on the accrual basis of accounting for income and expenses. The results of operations reflect any adjustments, all of which are of a normal recurring nature, unless otherwise disclosed in this Form 10-Q, and which, in the opinion of management, are necessary for a fair presentation of the results for the periods presented. In accordance with the usual practice of banks, assets and liabilities of individual trust, agency and fiduciary funds have not been included in the financial statements. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2012.
The results for the 2013 interim periods are not necessarily indicative of the results expected for the full year. The Company has not made any significant changes in its critical accounting policies or in its estimates and assumptions from those disclosed in its 2012 Annual Report other than the adoption of new accounting pronouncements and other authoritative guidance that became effective for the Company on or after January 1, 2013. Refer to <i>Accounting Pronouncements</i> for discussion of accounting pronouncements adopted in 2013.
Certain prior period amounts have been reclassified to conform to the current period presentation.
Accounting Pronouncements
The following is a summary of accounting pronouncements that became effective during the six months ended June 30, 2013:
In October 2012, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2012-06, Busines Combinations (Topic 805): Subsequent Accounting for an Indemnification Asset Recognized at the Acquisition Date as a Result of a Government-Assisted Acquisition of a Financial Institution (ASU 2012-06). ASU 2012-06 clarifies existing guidance on the subsequent measurement of an indemnification asset recognized as a result of a government-assisted acquisition of a financial institution. Existing guidance specifies that an acquirer must record an indemnification asset at the same time as it recognizes the indemnified item in a business combination. The indemnification asset is initially and subsequently measured on the same basis as the indemnified item, subject to any contractual limitations on its amount or management s assessment of its collectability. Under ASU 2012-06, when there is a subsequent change in the cash flows expected to be collected on the indemnified asset, the reporting entity should subsequently measure the indemnification asset on the same basis as the underlying loans by taking into account the contractual limitation of the indemnification agreement. Any amortization of changes in value shall be limited to the lesser of the contractual term of the indemnification agreement and the remaining life of the indemnified assets. Adoption of ASU 2012-06 on January 1, 2013 did not have a significant impact on the Company s consolidated financial statements.

• In January 2013, the FASB issued ASU 2013-01, *Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities* (ASU 2013-01). ASU 2013-01 clarifies that ordinary trade receivables and other receivables are not in the scope of ASU

2011-11, *Balance Sheet (Topic 210), Disclosures about Offsetting Assets and Liabilities.* Specifically, ASU 2011-11 applies only to derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with specific criteria contained in the Accounting Standards Codification (ASC) or subject to a master netting arrangement or similar agreement. The Company adopted ASU 2013-01 in its first quarter 2013 reporting. Refer to Note 13 for balance sheet offsetting disclosures.

Table of Contents

Note 1. Summary of Significant Accounting Policies (Continued)

• In February 2013, the FASB issued ASU 2013-02, *Other Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Other Comprehensive Income* (ASU 2013-02). The provisions in the ASU supersede and replace the presentation requirements for reclassifications out of accumulated other comprehensive income (AOCI) in ASU 2011-05 and 2011-12. ASU 2013-02 requires entities to disclose additional information about reclassification adjustments, including (1) changes in AOCI balances by component and (2) significant items reclassified out of AOCI. The new disclosure requirements are effective for fiscal years, and interim periods within those years, beginning after December 15, 2012. The Company adopted ASU 2013-02 for its first quarter 2013 reporting. Adoption of the new guidance did not have a significant impact on the Company s consolidated financial statements.

The following is a summary of recently issued accounting pronouncements:

- In February 2013, the FASB issued ASU 2013-04, *Liabilities (Topic 405): Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation is Fixed at the Reporting Date* (ASU 2013-04). ASU 2013-04 provides guidance for the recognition, measurement and disclosure of obligations resulting from joint and several liability arrangements. Examples of obligations within the scope of the ASU include debt arrangements, other contractual obligations and settled litigation. ASU 2013-04 requires entities to measure obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of the guidance is fixed at the reporting date, as the sum of (1) the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors, and (2) any additional amount the reporting entity expects to pay on behalf of its co-obligors. Required disclosures include a description of the joint-and-several arrangement and the total outstanding amount of the obligation for all joint parties. The ASU is effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. Adoption of the new guidance is not expected to have a significant impact on the Company s consolidated financial statements.
- In July 2013, the FASB issued ASU 2013-10, *Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate as a Benchmark Interest Rate for Hedge Accounting Purposes.* The new guidance permits the Fed Funds Effective Swap Rate to be used as a U.S. benchmark interest rate for hedge accounting purposes in addition to U.S. Government Treasury rates and LIBOR. The ASU is effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The Company periodically enters into interest-rate swap agreements to reduce cash flow variability on pools of floating rate loans. The swaps are tied to either the Prime rate or LIBOR consistent with the pricing index on the underlying loans. The Company does not use the Fed Funds rate for loan pricing. Adoption of the new guidance is not expected to have a significant impact on the Company s consolidated financial statements.
- In July 2013, the FASB issued ASU 2013-11, *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists.* The new guidance requires an entity to present an unrecognized tax benefit, or portion thereof, in the statement of financial position as a reduction to a deferred tax asset for a net operating loss carryforward or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward or tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position, or the the tax law of the applicable jurisdiction does not require the entity to use and the entity does not intend to use the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the statement of financial position as a liability and should not be combined with deferred tax assets. The ASU is effective for annual periods, and interim periods within those years, beginning after December 15, 2013. Adoption of the new guidance is not expected to have a significant impact on the Company s consolidated financial statements.

Table of Contents
Note 2. Business Combinations
Rochdale Investment Management
On July 2, 2012, the Company acquired Rochdale Investment Management, LLC and associated entities (collectively, Rochdale), a New York City-based investment firm that manages assets for affluent and high-net-worth clients and their financial advisors across the nation. The investment firm was acquired with both cash and contingent consideration, and operates as a wholly owned subsidiary of the Bank.
The Company recognized goodwill of approximately \$86.5 million and a client contract intangible of \$19.0 million related to the acquisition. The Company recognized a contingent consideration liability at its fair value of \$46.7 million. The contingent consideration arrangements require the Company to pay additional cash consideration to Rochdale s former shareholders at certain points in time over the next six years if certain criteria, such as revenue growth and pre-tax margin, are met. The fair value of the contingent consideration was estimated using a probability-weighted discounted cash flow model. Although the acquisition agreement does not set a limit on the total payment, the Company estimates that the total consideration payment could be in the range of \$32 million to \$74 million, but will ultimately be determined based on actual future results. The contingent consideration liability is remeasured to fair value at each reporting date until its settlement.
First American Equipment Finance
The Company acquired First American Equipment Finance (FAEF), a privately owned equipment leasing company, in an all-cash transaction on April 30, 2012. Headquartered in Rochester, New York, FAEF leases technology and office equipment nationwide. Its clients include educational institutions, hospitals and health systems, large law firms, insurance underwriters, enterprise businesses, professional service businesses and nonprofit organizations. FAEF operates as a wholly owned subsidiary of the Bank.
Excluding the effects of acquisition accounting adjustments, the Company acquired approximately \$343.0 million in assets and assumed \$325.0 million in liabilities. The Company acquired lease receivables with a fair value of \$318.3 million and assumed borrowings and nonrecourse debt with a fair value of \$320.9 million. The Company recognized goodwill of approximately \$68.4 million.

Table of Contents

Note 3. Fair Value Measurements (Continued)

At June 30, 2013, \$7.13 billion, or approximately 26 percent, of the Company s total assets were recorded at fair value on a recurring basis, compared with \$9.39 billion, or 33 percent, at December 31, 2012. The majority of these financial assets were valued using Level 1 or Level 2 inputs. Less than one percent of total assets were measured using Level 3 inputs. At June 30, 2013, \$98.9 million of the Company s total liabilities were recorded at fair value using mostly Level 2 or Level 3 inputs, compared with \$122.5 million at December 31, 2012. There were no transfers between Level 1 and Level 2 of the fair value hierarchy for assets or liabilities measured on a recurring basis during the six months ended June 30, 2013. At June 30, 2013, \$29.0 million of the Company s total assets were recorded at fair value on a nonrecurring basis, compared with \$75.3 million at December 31, 2012. These assets represent less than one percent of total assets and were measured using Level 2 and Level 3 inputs.

Recurring Fair Value Measurements

Assets and liabilities for which fair value measurement is based on significant unobservable inputs are classified as Level 3 in the fair value hierarchy. The following table provides a reconciliation of the beginning and ending balances for Level 3 assets and liabilities measured at fair value on a recurring basis for the six months ended June 30, 2013 and 2012.

Level 3 Assets and Liabilities Measured on a Recurring Basis

]		six months ended ine 30, 2013	i		For the six months ended June 30, 2012

Other (1)	74		(1,076)				46				
Balance, end of period	\$ 61,839	\$	(48,800)	\$	(11,053)	\$	66,351	\$	(9,217)		

⁽¹⁾ Other rollforward activity consists of amortization of premiums and accretion of discounts recognized on the initial purchase of securities available-for-sale and accretion of discount related to the contingent consideration liability.

Redeemable noncontrolling interest is classified as Level 3 in the fair value hierarchy and measured on a recurring basis. Refer to Note 18, *Noncontrolling Interest*, for a rollforward of activity for the six months ended June 30, 2013 and 2012.

Level 3 assets measured at fair value on a recurring basis consist of municipal auction rate securities and collateralized debt obligation senior notes that are included in securities available-for-sale. At June 30, 2013, municipal auction rate securities were valued using an average yield on California variable rate notes that were comparable in credit rating and maturity to the securities held, plus a liquidity premium. Senior notes totaling \$15.7 million at June 30, 2013 were valued using the discounted cash flow method with the following unobservable inputs:

(1) risk-adjusted discount rate consistent with similarly-rated securities, (2) prepayment rate of 2 percent, (3) default rate of 0.75 percent of performing collateral, and (4) 15 percent recovery rate with a 2-year lag.

Level 3 liabilities measured at fair value on a recurring basis consist of contingent consideration and an FDIC clawback liability that are included in other liabilities. Refer to Note 2, *Business Combinations*, for further discussion of the methodology used to value the contingent consideration liability. The FDIC clawback liability was valued using the discounted cash flow method based on the terms specified in loss-sharing agreements with the FDIC, the actual FDIC payments collected and the following unobservable inputs: (1) risk-adjusted discount rate reflecting the Bank s credit risk, plus a liquidity premium, (2) prepayment assumptions and (3) credit assumptions.

There were no purchases, sales, or transfers out of Level 3 assets measured on a recurring basis during the six months ended June 30, 2013 and 2012. Paydowns of \$3.7 million and \$1.7 million were received on Level 3 assets measured on a recurring basis for the six months ended June 30, 2013 and 2012, respectively.

Table of Contents

Note 3. Fair Value Measurements (Continued)

Nonrecurring Fair Value Measurements

Assets measured at fair value on a nonrecurring basis using significant unobservable inputs include certain collateral dependent impaired loans, OREO for which fair value is not solely based on market observable inputs, and certain private equity and alternative investments. Private equity and alternative investments do not have readily determinable fair values. These investments are carried at cost and evaluated for impairment on a quarterly basis. Due to the lack of readily determinable fair values for these investments, the impairment assessment is based primarily on a review of investment performance and the likelihood that the capital invested would be recovered.

The table below provides information about valuation method, inputs and assumptions for nonrecurring Level 3 fair value measurements. The weight assigned to each input is based on the facts and circumstances that exist at the date of measurement.

Information About Nonrecurring Level 3 Fair Value Measurements

(in thousands)	Fair Value at June 30, 2013	Valuation Method	Unobservable Inputs
Collateral dependent impaired solutions	8,774	Market	- Adjustments to external or internal appraised values (1)
			- Probability weighting of broker price opinions
			- Management assumptions regarding market trends or other relevant factors
Other real estate owned	3,031	Market	- Adjustments to external or internal appraised values (1)
			- Probability weighting of broker price opinions
			- Management assumptions regarding market trends or other relevant factors
Private equity and alternative sinvestments	686	Cost Recovery	- Management's assumptions regarding recoverability of investment based on fund financial performance, market conditions and other relevant factors

⁽¹⁾ Appraised values may be adjusted to reflect changes in market conditions that have occurred subsequent to the appraisal date, or for revised estimates regarding the timing or cost of the property sale. These adjustments are based on qualitative judgments made by management on a case-by-case basis.

Market-based valuation methods use prices and other relevant information generated by market transactions involving identical or comparable assets. Under the cost recovery approach, fair value represents an estimate of the amount of an asset expected to be recovered. The Company only employs the cost recovery approach for assets that are not readily marketable and for which minimal market-based information exists.

Note 3. Fair Value Measurements (Continued)

For assets measured at fair value on a nonrecurring basis, the following table presents the total net (losses) gains, which include charge-offs, recoveries, specific reserves, OREO valuation write-downs and write-ups, gains and losses on sales of OREO, and impairment write-downs on private equity investments, recognized in the three and six months ended June 30, 2013 and 2012:

	For the three r June		d	For the six m June	nded	
(in thousands)	2013	2	012	2013		2012
Collateral dependent impaired loans:						
Commercial	\$	\$	\$		\$	(367)
Commercial real estate mortgages	148		(1,572)	293		(1,937)
Residential mortgages	(230)		(540)	(221)		(1,122)
Real estate construction			(281)			(6,753)
Home equity loans and lines of credit			(115)	116		(62)
Installment				(138)		(107)
Other real estate owned (1)	(1,857)		(3,700)	(4,711)		(12,165)
Private equity and alternative investments			(333)	(399)		(460)
Total net losses recognized	\$ (1,939)	\$	(6,541) \$	(5,060)	\$	(22,973)

⁽¹⁾ Net losses on OREO includes \$1.9 million and \$4.7 million of net losses related to covered OREO for the three and six months ended June 30, 2013, respectively, and \$3.5 million and \$11.0 million of net losses for the three and six months ended June 30, 2012, respectively. A significant portion of net losses on covered OREO is reimbursable by the FDIC.

Fair Value of Financial Instruments

A financial instrument is broadly defined as cash, evidence of an ownership interest in another entity, or a contract that imposes a contractual obligation on one entity and conveys a corresponding right to a second entity to require delivery or exchange of a financial instrument. Refer to Note 1, *Summary of Significant Accounting Policies*, in the Company s 2012 Form 10-K for additional information on fair value measurements.

The disclosure does not include estimated fair value amounts for assets and liabilities which are not defined as financial instruments but which have significant value. These assets and liabilities include the value of customer-relationship intangibles, goodwill, affordable housing investments carried at cost, other assets, deferred taxes and other liabilities. Accordingly, the total of the fair values presented does not represent the underlying value of the Company.

Note 3. Fair Value Measurements (Continued)

The following tables summarize the carrying amounts and estimated fair values of those financial instruments that are reported at amortized cost in the Company s consolidated balance sheets. The tables also provide information on the level in the fair value hierarchy for inputs used in determining the fair value of those financial instruments. Most financial assets and financial liabilities for which carrying amount equals fair value are considered by the Company to be Level 1 measurements in the fair value hierarchy.

	June 30, 2013										
		Carrying		Total		Fair	Value	Measurements 1	Using		
(in millions)		Amount		Fair Value		Level 1		Level 2		Level 3

Securities held-to-maturity		1,398.4		1,446.6				1,446.6			
Loans and leases, net of allowance		14,540.4		14,988.6				4.5		14,984.1	
Covered loans, net of allowance		986.2		1,055.0						1,055.0	
FDIC indemnification asset		150.0		123.9						123.9	
Investment in FHLB and FRB											
stock		90.0		90.0				90.0			
Financial Liabilities:											
Deposits	\$	23,502.4	\$	23,506.9	\$		\$	22,734.5	\$	772.4	
Federal funds purchased and											
securities sold under repurchase											
agreements		1,214.2		1,214.2		1,214.2					
Other short-term borrowings		209.6		210.7				207.6		3.1	
Long-term debt		706.1		774.8				698.9		75.9	

Following is a description of the methods and assumptions used in estimating the fair values of these financial instruments:

Cash and due from banks, Due from banks interest bearing and Federal funds sold For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Securities purchased under resale agreements The fair value of securities purchased under term resale agreements is determined using a combination of quoted market prices and observable market inputs such as interest rates and credit spreads.

17

Table of Contents

Note 3. Fair Value Measurements (Continued)

Securities held-to-maturity For securities held-to-maturity, the fair value is generally determined by quoted market prices, where available, or on observable market inputs appropriate for the type of security.

Loans and leases Loans and leases, excluding covered loans, are not recorded at fair value on a recurring basis. Nonrecurring fair value adjustments are periodically recorded on impaired loans that are measured for impairment based on the fair value of collateral. Due to the lack of activity in the secondary market for the types of loans in the Company's portfolio, a model-based approach is used for determining the fair value of loans for purposes of the disclosures in the previous table. The fair value of loans is estimated by discounting future cash flows using discount rates that incorporate the Company's assumptions for current market yields, credit risk and liquidity premiums. Loan cash flow projections are based on contractual loan terms adjusted for the impact of current interest rate levels on borrower behavior, including prepayments. Loan prepayment assumptions are based on industry standards for the type of loans being valued. Projected cash flows are discounted using yield curves based on current market conditions. Yield curves are constructed by product type using the Bank's loan pricing model for like-quality credits. The discount rates used in the Company's model represent the rates the Bank would offer to current borrowers for like-quality credits. These rates could be different from what other financial institutions could offer for these loans.

Covered loans The fair value of covered loans is based on estimates of future loan cash flows and appropriate discount rates, which incorporate the Company s assumptions about market funding cost and liquidity premium. The estimates of future loan cash flows are determined using the Company s assumptions concerning the amount and timing of principal and interest payments, prepayments and credit losses.

FDIC indemnification asset The fair value of the FDIC indemnification asset is estimated by discounting estimated future cash flows based on estimated current market rates.

Investment in FHLB and FRB stock Investments in Federal Home Loan Bank of San Francisco (FHLB) and Federal Reserve Bank (FRB) stock are recorded at cost. Ownership of these securities is restricted to member banks and the securities do not have a readily determinable market value. Purchases and sales of these securities are at par value with the issuer. The fair value of investments in FRB and FHLB stock is equal to the carrying amount.

Deposits The fair value of demand and interest checking deposits, savings deposits, and certain money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit (CD) is determined by discounting expected future cash flows using the rates offered by the Bank for deposits of similar type and remaining maturity at the measurement date. This value is compared to the termination value of each CD given the Bank s standard early withdrawal penalties. The fair value reported is the higher of the discounted present value of each CD and the termination value after the recovery of prepayment penalties. The Bank reviews pricing for its CD products weekly. This review gives consideration to market pricing for products of similar type and maturity offered by other financial institutions.

Other short-term borrowings The fair value of the current portion of long-term debt classified in short-term borrowings is obtained through third-party pricing sources. The fair value of nonrecourse debt is determined by discounting estimated future cash flows based on estimated current market rates. The carrying amount of the remaining other short-term borrowings is a reasonable estimate of fair value.

Long-term debt The fair value of long-term debt, excluding nonrecourse debt, is obtained through third-party pricing sources. The fair value of nonrecourse debt is determined by discounting estimated future cash flows based on estimated current market rates.

Off-balance sheet commitments, which include commitments to extend credit, are excluded from the table. A reasonable estimate of fair value for these instruments is the carrying amount of deferred fees and the reserve for any credit losses related to these off-balance sheet instruments. This estimate is not material to the Company s financial position.

18

Note 4. Securities

At June 30, 2013, the Company had total securities of \$8.60 billion, comprised of securities available-for-sale at fair value of \$7.04 billion, securities held-to-maturity at amortized cost of \$1.50 billion and trading securities at fair value of \$48.7 million. At December 31, 2012, the Company had total securities of \$10.72 billion, comprised of securities available-for-sale at fair value of \$9.21 billion, securities held-to-maturity at amortized cost of \$1.40 billion and trading securities at fair value of \$115.1 million.

The following is a summary of amortized cost and estimated fair value for the major categories of securities available-for-sale and securities held-to-maturity at June 30, 2013 and December 31, 2012:

	Amortized	Gross Unrealized	Gross Unrealized

⁽¹⁾ Securities held-to-maturity are presented in the consolidated balance sheets at amortized cost.

Note 4. Securities (Continued)

Proceeds from sales of securities available-for-sale were \$0.2 million and \$1.25 billion for the three and six months ended June 30, 2013, respectively, compared with \$5.2 million for the three and six months ended June 30, 2012. There were no sales of securities held-to-maturity during the three and six months ended June 30, 2013 and June 30, 2012. The following table provides the gross realized gains and losses on the sales and calls of securities (including trading securities):

	For the three June	months e 30,		For the six months ended June 30,					
(in thousands)	2013		2012		2013		2012		
Gross realized gains	\$ 5,790	\$	40	\$	6,836	\$	536		
Gross realized losses			(319)			(366)		
Net realized gains (losses)	\$ 5,790	\$	(279) \$	6,836	\$	170		

Interest income on securities for the three months ended June 30, 2013 and 2012 is comprised of: (i) taxable interest income of \$36.7 million and \$39.3 million, respectively (ii) nontaxable interest income of \$4.4 million and \$4.0 million, respectively, and (iii) dividend income of \$0.1 million and \$0.2 million, respectively. Interest income on securities for the six months ended June 30, 2013 and 2012 is comprised of: (i) taxable interest income of \$76.6 million and \$80.9 million, respectively (ii) nontaxable interest income of \$8.8 million and \$7.8 million, respectively, and (iii) dividend income of \$0.1 million and \$0.2 million, respectively.

The following table provides the expected remaining maturities of debt securities included in the securities portfolio at June 30, 2013, except for maturities of mortgage-backed securities which are allocated according to the average life of expected cash flows. Average expected maturities will differ from contractual maturities because of the amortizing nature of the loan collateral and prepayment behavior of borrowers.

Note 4. Securities (Continued)

Impairment Assessment

The Company performs a quarterly assessment of the debt and equity securities in its investment portfolio that have an unrealized loss to determine whether the decline in the fair value of these securities below their cost is other-than-temporary. Impairment is considered other-than-temporary when it becomes probable that an investor will be unable to recover the cost of an investment. The Company s impairment assessment takes into consideration factors such as the length of time and the extent to which the market value has been less than cost; the financial condition and near-term prospects of the issuer, including events specific to the issuer or industry; defaults or deferrals of scheduled interest, principal or dividend payments; external credit ratings and recent downgrades; and whether the Company intends to sell the security and whether it is more likely than not it will be required to sell the security prior to recovery of its amortized cost basis. If a decline in fair value is judged to be other than temporary, the cost basis of the individual security is written down to fair value which then becomes the new cost basis. The new cost basis is not adjusted for subsequent recoveries in fair value.

When there are credit losses associated with an impaired debt security and the Company does not have the intent to sell the security and it is more likely than not that it will not have to sell the security before recovery of its cost basis, the Company will separate the amount of the impairment into the amount that is credit-related and the amount related to non-credit factors. The credit-related impairment is recognized in Net impairment loss recognized in earnings in the consolidated statements of income. The non-credit-related impairment is recognized in AOCI.

Securities Deemed to be Other-Than-Temporarily Impaired

The Company recorded impairment losses in earnings on securities available-for-sale of \$0.2 million for the three and six months ended June 30, 2013 and 2012, respectively. The Company recognized \$0.2 million and \$4.0 million of non-credit-related other-than-temporary impairment in AOCI on securities available-for-sale at June 30, 2013 and 2012, respectively. No impairment losses were recognized in earnings or AOCI for securities held-to-maturity during the three and six months ended June 30, 2013.

The following table summarizes the changes in cumulative credit-related other-than-temporary impairment recognized in earnings for debt securities for the three and six months ended June 30, 2013 and 2012. Credit-related other-than-temporary impairment that was recognized in earnings is reflected as an Initial credit-related impairment if the period reported is the first time the security had a credit impairment. A credit-related other-than-temporary impairment is reflected as a Subsequent credit-related impairment if the period reported is not the first time the security had a credit impairment. Cumulative impairment is reduced for securities with previously recognized credit-related impairment that were sold or redeemed during the period. Cumulative impairment is further adjusted for other changes in expected cash flows.

Note 4. Securities (Continued)

Non-Agency CMOs

The Company held \$34.6 million of variable rate non-agency CMOs at June 30, 2013. The Company determined that \$6.2 million of these non-agency CMOs were other-than-temporarily impaired. These CMOs have a fixed interest rate for an initial period after which they become variable-rate instruments with annual rate resets. For purposes of projecting future cash flows, the current fixed coupon was used through the reset date for each security. The prevailing LIBOR/Treasury forward curve as of the measurement date was used to project all future floating-rate cash flows based on the characteristics of each security. Other factors considered in the projection of future cash flows include the current level of subordination from other CMO classes, anticipated prepayment rates, cumulative defaults and loss given default. The Company recognized \$0.2 million of credit-related impairment losses in earnings on its investments in certain variable rate non-agency CMOs for the three and six months ended June 30, 2013 and 2012, respectively. The remaining other-than-temporary impairment for these securities at June 30, 2013 and 2012 was recognized in AOCI. This non-credit portion of other-than-temporarily impairment is attributed to external market conditions, primarily the lack of liquidity in these securities, resulting in an increase in interest rate spreads for these securities. The Company also holds \$10.7 million in fixed rate non-agency CMOs at June 30, 2013, none of which have experienced any other-than-temporary impairment.

The following table provides a summary of the gross unrealized losses and fair value of investment securities that are not deemed to be other-than-temporarily impaired aggregated by investment category and length of time that the securities have been in a continuous unrealized loss position as of June 30, 2013 and December 31, 2012. The table also includes investment securities that had both a credit-related impairment recognized in earnings and a non-credit-related impairment recognized in AOCI.

Т	ab	le	of	Cor	itents

Note 4. Securities (Continued)

At June 30, 2013, the Company had \$3.93 billion of securities available-for-sale in an unrealized loss position, consisting of \$3.93 billion of temporarily impaired securities and \$6.2 million of securities that had non-credit-related impairment recognized in AOCI. The Company had \$1.09 million of securities held-to-maturity in an unrealized loss position. At June 30, 2013, the Company had 687 debt securities available-for-sale and held-to-maturity in an unrealized loss position. The debt securities in an unrealized loss position include 3 U.S. Treasury notes, 33 federal agency debt securities, 29 federal agency MBS securities, 140 federal agency CMOs, 6 non-agency CMOs, 462 state and municipal securities and 14 other debt securities. The increase in unrealized losses on debt securities from the first quarter of 2013 and year-end 2012 is attributed to higher market interest rates in the current period.

Other debt securities include the Company s investment in one highly-rated corporate debt and collateralized bond obligation backed by trust preferred securities (CDOs) issued by a geographically diverse pool of small- and medium-sized financial institutions. The CDO held in securities available-for-sale at June 30, 2013 is the most senior tranche of the issue. Trading activity for the type of CDO held by the Company has been limited since 2008. Accordingly, the fair value of this security was determined using an internal pricing model that incorporates assumptions about discount rates in an illiquid market, projected cash flows and collateral performance. The CDO had a \$4.7 million net unrealized loss at June 30, 2013, which the Company attributes to the illiquid credit markets. The CDO has collateral that well exceeds the outstanding debt. The security valuation reflects the current and prospective performance of the issuers whose debt is contained in the asset pools. The Company expects to receive all remaining contractual principal and interest payments due on its CDO. Additionally, the Company does not intend to sell this security, and it is not more likely than not that it will be required to sell the security before it recovers the cost basis of its investment.

At December 31, 2012, the Company had \$2.00 billion of securities available-for-sale in an unrealized loss position, consisting of \$1.98 billion of temporarily impaired securities and \$16.2 million of securities that had non-credit related impairment recognized in AOCI. At December 31, 2012, the Company had \$156.9 million of securities held-to-maturity in an unrealized loss position. At December 31, 2012, the Company had 231 debt securities available-for-sale and held-to-maturity in an unrealized loss position. The debt securities in an unrealized loss position include 2 U.S. Treasury note, 8 federal agency debt securities, 7 federal agency MBS, 53 federal agency CMOs, 4 non-agency CMOs, 152 state and municipal securities and 5 other debt securities.

Note 5. Other Investments

FHLB and FRB Stock

The Company s investment in stock issued by the FHLB and FRB totaled \$78.0 million and \$90.0 million at June 30, 2013 and December 31, 2012, respectively. Ownership of government agency securities is restricted to member banks, and the securities do not have readily determinable market values. The Company records investments in FHLB and FRB stock at cost in Other assets of the consolidated balance sheets and evaluates these investments for impairment. The Company expects to recover the full amount invested in FHLB and FRB stock.

Private Equity and Alternative Investments

The Company has ownership interests in a limited number of private equity, venture capital, real estate and hedge funds that are not publicly traded and do not have readily determinable fair values. These investments are carried at cost in the Other assets section of the consolidated balance sheets and are net of impairment write-downs, if applicable. The Company s investments in these funds totaled \$34.9 million at June 30, 2013 and \$36.1 million at December 31, 2012. A summary of investments by fund type is provided below:

(in thousands) Fund Type	June 30, 2013	December 31, 2012
Private equity and venture capital	\$ 20,340	\$ 20,693
Real estate	8,457	9,223
Hedge	2,841	2,866
Other	3,304	3,309
Total	\$ 34,942	\$ 36,091

Note 5. Other Investments (Continued)

Management reviews these investments quarterly for impairment. The impairment assessment includes a review of the most recent financial statements and investment reports for each fund and discussions with fund management. An impairment loss is recognized if it is deemed probable that the Company will not recover the cost of an investment. The impairment loss is recognized in Other noninterest income in the consolidated statements of income. The new cost basis of the investment is not adjusted for subsequent recoveries in value. The Company recognized no impairment losses on other investments during the three months ended June 30, 2013, and recognized impairment losses of \$0.4 million during the six months ended June 30, 2013. The Company recognized impairment losses totaling \$0.3 million and \$0.5 million on its other investments during the three and six months ended June 30, 2012, respectively.

The table below provides information as of June 30, 2013 on private equity and alternative investments measured at fair value on a nonrecurring basis due to the recognition of impairment:

(in thousands)	Fair Value	Unfunded	Redemption	Redemption
Fund Type	vaiue	Commitments	Frequency	Notice Period
Private equity and venture capital (1)	\$ 686	\$ 179	None (2)	N/A

⁽¹⁾ Funds invest in securities and other instruments of public and private companies, including corporations, partnerships, limited liability companies and joint ventures.

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

Concentrations of credit risk arise when a number of clients are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions. Although the Company s lending activities are predominantly in California, and to a lesser extent, New York and Nevada, the Company has various specialty lending businesses that lend to businesses located throughout the United States of America. Excluding covered loans, at June 30, 2013, California represented 78 percent of total loans outstanding and New York and Nevada represented 7 percent and 2 percent, respectively. The remaining 13 percent of total loans outstanding represented other states. Although the Company has a diversified loan portfolio, a substantial portion of the loan portfolio and credit performance depends on the economic stability of Southern California.

Within the Company s covered loan portfolio at June 30, 2013, the five states with the largest concentration were California (36 percent), Texas (11 percent), Nevada (7 percent), New York (5 percent) and Arizona (5 percent). The remaining 36 percent of total covered loans outstanding represented other states.

Covered Loans

Covered loans represent loans acquired from the FDIC that are subject to loss-sharing agreements. Covered loans were \$868.0 million as of June 30, 2013 and \$1.03 billion as of December 31, 2012. Covered loans, net of allowance for loan losses, were \$843.6 million at June 30, 2013 and \$986.2 million at December 31, 2012.

The following is a summary of the major categories of covered loans:

(in thousands)	June 30, 2013	December 31, 2012
Commercial	\$ 8,675	\$ 10,561
Commercial real estate mortgages	789,521	931,758
Residential mortgages	5,560	5,652
Real estate construction	60,007	78,554
Home equity loans and lines of credit	3,673	3,790
Installment	560	689
Covered loans	867,996	1,031,004
Less: Allowance for loan losses	(24,414)	(44,781)
Covered loans, net	\$ 843,582	\$ 986,223

Residential	12/31/2019	5/30/2020	5/30/2020	4/30/2021	
Termination date of FDIC					
loss-sharing agreements:					
Commercial (1)	12/19/2017	5/8/2018	5/29/2018	6/30/2019	
Residential	12/31/2019	5/30/2020	5/30/2020	4/30/2021	

⁽¹⁾ The Company is subject to sharing 80% of its recoveries with the FDIC up to the termination dates of the commercial loss-sharing agreements.

The Company evaluated the acquired loans from its FDIC-assisted acquisitions and concluded that all loans, with the exception of a small population of acquired loans, would be accounted for under ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality* (ASC 310-30). Loans are accounted for under ASC 310-30 when there is evidence of credit deterioration since origination and for which it is probable, at acquisition, that the Company would be unable to collect all contractually required payments. Interest income is recognized on all acquired impaired loans through accretion of the difference between the carrying amount of the loans and their expected cash flows.

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

The excess of cash flows expected to be collected over the carrying value of the underlying acquired impaired loans is referred to as the accretable yield. This amount is not reported in the consolidated balance sheets, but is accreted into interest income over the remaining estimated lives of the underlying pools of loans. Changes in the accretable yield for acquired impaired loans were as follows for the six months ended June 30, 2013 and 2012:

	For the six m June	ıded
(in thousands)	2013	2012
Balance, beginning of period	\$ 295,813	\$ 436,374
Accretion	(32,740)	(43,085)
Reclassifications from (to) nonaccretable yield	15,978	(10,212)
Disposals and other	(25,086)	(36,944)
Balance, end of period	\$ 253,965	\$ 346,133

The factors that most significantly affect estimates of cash flows expected to be collected, and accordingly the accretable yield balance, include: (i) changes in credit assumptions, including both credit loss amounts and timing; (ii) changes in prepayment assumptions; and (iii) changes in interest rates for variable-rate loans. Reclassifications between accretable yield and nonaccretable yield may vary from period to period as the Company periodically updates its cash flow projections. The reclassification of nonaccretable yield to accretable yield during 2013 was principally driven by positive changes in cash flows, resulting mainly from changes in credit assumptions.

The Company recorded an indemnification asset related to its FDIC-assisted acquisitions, which represents the present value of the expected reimbursement from the FDIC for expected losses on acquired loans, OREO and unfunded commitments. The FDIC indemnification asset from all FDIC-assisted acquisitions was \$117.3 million at June 30, 2013 and \$150.0 million at December 31, 2012.

Credit Quality on Loans and Leases, Excluding Covered Loans

Allowance for Loan and Lease Losses and Reserve for Off-Balance Sheet Credit Commitments

The Company accounts for the credit risk associated with lending activities through its allowance for loan and lease losses, reserve for off-balance sheet credit commitments and provision for credit losses. The provision is the expense recognized in the consolidated statements of income to adjust the allowance and reserve to the levels deemed appropriate by management, as determined through application of the Company's allowance methodology procedures. The provision for credit losses reflects management is judgment of the adequacy of the allowance for loan and lease losses and the reserve for off-balance sheet credit commitments. It is determined through quarterly analytical reviews of the loan and commitment portfolios and consideration of such other factors as the Company is loan and lease loss experience, trends in problem loans, concentrations of credit risk, underlying collateral values, and current economic conditions, as well as the results of the Company is ongoing credit review process. As conditions change, the Company is level of provisioning and the allowance for loan and lease losses and reserve for off-balance sheet credit commitments may change.

The relative significance of risk considerations used in measuring the allowance for loan and lease losses will vary by portfolio segment. For commercial loans, the primary risk consideration is a borrower s ability to generate sufficient cash flows to repay their loan. Secondary considerations include the creditworthiness of guarantors and the valuation of collateral. In addition to the creditworthiness of a borrower, the type and location of real estate collateral is an important risk factor for commercial real estate and real estate construction loans. The primary risk considerations for consumer loans are a borrower s personal cash flow and liquidity, as well as collateral value.

For commercial, non-homogenous loans that are not impaired, the Bank derives loss factors for each risk grade and loan type via a process that begins with estimates of probable losses inherent in the portfolio based upon various statistical analyses. The factors considered in the analysis include loan type, migration analysis, in which historical delinquency and credit loss experience is applied to the portfolio, as well as analyses that reflect current trends and conditions. Each portfolio of smaller balance homogeneous loans, including residential first mortgages, installment, revolving credit and most other consumer loans, is collectively evaluated for loss potential. The quantitative portion of the allowance for loan and lease losses is adjusted for qualitative factors to account for model imprecision and to incorporate the range of probable outcomes inherent in the estimates used for the allowance. The qualitative portion of the allowance attempts to incorporate the risks inherent in the portfolio, economic uncertainties, competition, and regulatory requirements and other subjective factors such as changes in underwriting standards. It also considers overall portfolio indicators, including current and historical credit losses; delinquent, nonperforming and criticized loans; portfolio concentrations; trends in volumes and terms of loans; and economic trends in the broad market and in specific industries.

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

A portion of the allowance for loan and lease losses is attributed to impaired loans that are individually measured for impairment. This measurement considers all available evidence, including as appropriate, the probability that a specific loan will default, the expected exposure of a loan at default, an estimate of loss given default, the present value of expected future cash flows discounted using the loan s contractual effective rate, the secondary market value of the loan and the fair value of collateral.

The allowance for loan and lease losses is decreased by the amount of charge-offs and increased by the amount of recoveries. Generally, commercial, commercial real estate and real estate construction loans are charged off when it is determined that advances to the borrower are in excess of the calculated current fair value of the collateral and if a borrower is deemed incapable of repayment of unsecured debt, there is little or no prospect for near term improvement and no realistic strengthening action of significance pending. Consumer loans are charged-off based on delinquency, ranging from 60 days for overdrafts to 180 days for secured consumer loans, or earlier when it is determined that the loan is uncollectible due to a triggering event, such as bankruptcy, fraud or death.

The following is a summary of activity in the allowance for loan and lease losses and period-end recorded investment balances of loans evaluated for impairment, excluding covered loans, for the three and six months ended June 30, 2013 and 2012. Activity is provided by loan portfolio segment which is consistent with the Company s methodology for determining the allowance for loan and lease losses.

Effective July 1, 2012, the Company increased the outstanding loan amount under which nonperforming loans are individually evaluated for impairment from \$500,000 or greater to \$1 million or greater. For borrowers with multiple loans totaling \$1 million or more, this threshold is applied at the total relationship level. Loans under \$1 million will be measured for impairment using historical loss factors. Loans under \$1 million that were previously reported as impaired at June 30, 2012 will continue to be reported as impaired until the collection of principal and interest is no longer in doubt, or the loans are paid or charged-off. At June 30, 2013, impaired loans included \$6.3 million of loans previously

reported as impaired that are less than \$1 million.

Table of Contents

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

Impaired loans at June 30, 2013 and December 31, 2012 included \$54.3 million and \$48.8 million, respectively, of restructured loans that are on accrual status. With the exception of restructured loans on accrual status and a limited number of loans on cash basis nonaccrual for which the full collection of principal and interest is expected, interest income is not recognized on impaired loans until the principal balance of these loans is paid off.

Troubled Debt Restructured Loans

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

The following tables provide a summary of troubled debt restructured (TDR) loans that subsequently defaulted during the three and six months ended June 30, 2013 and 2012 that had been modified as a troubled debt restructuring during the 12 months prior to their default. A loan is considered to be in default when payments are ninety days or more past due.

A restructuring constitutes a troubled debt restructuring when a lender, for reasons related to a borrower s financial difficulties, grants a concession to the borrower that it would not otherwise consider. Loans with pre-modification outstanding balances totaling \$7.5 million and \$9.6 million were modified in troubled debt restructurings during the three and six months ended June 30, 2013, respectively. Loans with pre-modification outstanding balances totaling \$43.3 million and \$66.5 million were modified in troubled debt restructurings during the three and six months ended June 30, 2012, respectively. The concessions granted in the restructurings completed in 2013 largely consisted of maturity extensions and interest rate modifications.

The unpaid principal balance of TDR loans was \$64.4 million, before specific reserves of \$0.6 million, at June 30, 2013 and \$94.9 million, before specific reserves of \$1.7 million, at December 31, 2012. The net decrease in TDR loans from the prior year-end was primarily attributable to payments received on existing TDR loans and to the removal of \$15.3 million of loans that were restructured in an A/B note structure in 2012 that are no longer reported as TDRs. These decreases were partially offset by the addition of \$9.6 million of loans restructured during the first six months of 2013. Loans restructured in an A/B note restructuring are not reported as TDR loans in years after the restructuring if the restructuring agreement specifies an interest rate equal to or greater than the rate the lender was willing to accept at the time of restructuring for a new loan with comparable risk, and the loan is performing based on the terms in the restructuring agreement. In an A/B restructuring, the original note is separated into two notes where the A note represents the portion of the original loan that is expected to be fully paid, and the B note is the portion of the loan that is expected to be uncollectible. The B note is charged-off at the time of restructuring. Loans modified in troubled debt restructurings are impaired loans at the time of restructuring and subject to the same measurement criteria as all other impaired loans.

During the six months ended June 30, 2013, four commercial loans, one real estate construction loan and one equity line of credit that had been restructured within the preceding 12 months were not performing in accordance with their modified terms. The defaults were primarily due to missed or late payments. All other TDR loans were performing in accordance with their restructured terms at June 30, 2013. As of June 30, 2013, commitments to lend additional funds on restructured loans totaled \$2.0 million.

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

Past Due and Nonaccrual Loans and Leases

Loans are considered past due following the date when either interest or principal is contractually due and unpaid. The following tables provide a summary of past due and nonaccrual loans, excluding covered loans, at June 30, 2013 and December 31, 2012 based upon the length of time the loans have been past due:

Credit Quality Monitoring

The Company closely monitors and assesses credit quality and credit risk in the loan and lease portfolio on an ongoing basis. Loan risk classifications are continuously reviewed and updated. The following tables provide a summary of the loan and lease portfolio, excluding covered loans, by loan type and credit quality classification as of June 30, 2013 and December 31, 2012. Nonclassified loans generally include those loans that are expected to be repaid in accordance with contractual loan terms. Classified loans are those loans that are classified as substandard or doubtful consistent with regulatory guidelines.

Credit Quality on Covered Loans

The following is a summary of activity in the allowance for losses on covered loans:

	For the three Jun		For the six m June	ended		
(in thousands)	2013		2012	2013		2012
Balance, beginning of period	\$ 42,354	\$	61,471	\$ 44,781	\$	64,565
Provision for losses	(11,927)		13,293	(2,035)		20,759

Reduction in allowance due to loan removals	(6,013)	(31,617)	(18,332)	(42,177)
Balance, end of period	\$ 24,414	\$ 43,147	24,414	\$ 43,147

The allowance for losses on covered loans was \$24.4 million, \$44.8 million and \$43.1 million as of June 30, 2013, December 31, 2012 and June 30, 2012, respectively. As a result of improvements in the portfolio s credit quality and general market conditions, the Company recorded an \$11.9 million and \$2.0 million reversal of its allowance for covered loans during the three and six months ended June 30, 2013, respectively. Provision expense was \$13.3 million and \$20.8 million for the three and six months ended June 30, 2012, respectively. The Company updates its cash flow projections for covered loans accounted for under ASC 310-30 on a quarterly basis, and may recognize provision expense or reversal of its allowance for loan losses as a result of that analysis. The provision expense or reversal of allowance on covered loans is the result of changes in expected cash flows, both amount and timing, due to loan payments and the Company s revised loss and prepayment forecasts. The revisions of the loss forecasts were based on the results of management s review of market conditions, the credit quality of the outstanding covered loans and the analysis of loan performance data since the acquisition of covered loans. The allowance for losses on covered loans is reduced for any loan removals, which occur when a loan has been fully paid off, fully charged off, sold or transferred to OREO.

Note 6. Loans, Allowance for Loan and Lease Losses, and Reserve for Off-Balance Sheet Credit Commitments (Continued)

Covered loans accounted for under ASC 310-30 are generally considered accruing and performing loans as the loans accrete interest income over the estimated life of the loan when cash flows are reasonably estimable. Accordingly, acquired impaired loans that are contractually past due are still considered to be accruing and performing loans. If the timing and amount of future cash flows is not reasonably estimable, the loans may be classified as nonaccrual loans and interest income is not recognized until the timing and amount of future cash flows can be reasonably estimated. There were no covered loans that were on nonaccrual status as of June 30, 2013 and December 31, 2012.

At June 30, 2013, covered loans that were 30 to 89 days delinquent totaled \$3.1 million and covered loans that were 90 days or more past due on accrual status totaled \$89.4 million. At December 31, 2012, covered loans that were 30 to 89 days delinquent totaled \$43.4 million and covered loans that were 90 days or more past due on accrual status totaled \$112.4 million.

Note 7. Other Real Estate Owned

Balance, end of period	\$	19,676	\$ 41,801	\$	61,477	\$	34,667	\$	82,834	\$	117,501	

At June 30, 2013, OREO was \$61.5 million and included \$41.8 million of covered OREO. At December 31, 2012, OREO was \$79.3 million and included \$58.3 million of covered OREO. The balance of OREO at June 30, 2013 and December 31, 2012 is net of valuation allowances of \$28.7 million and \$33.6 million, respectively.

Covered OREO expenses and valuation write-downs are recorded in the noninterest expense section of the consolidated statements of income and gains or losses on sale of covered OREO are recognized in the noninterest income section. Under the loss sharing agreements, 80 percent of eligible covered OREO expenses, valuation write-downs, and losses on sales are reimbursable to the Company from the FDIC and 80 percent of covered gains on sales are payable to the FDIC. The portion of these expenses that is reimbursable or income that is payable is recorded in FDIC loss sharing income (expense), net in the noninterest income section of the consolidated statements of income.

Note 8. Borrowed Funds

Short-term borrowings consist of funds with remaining maturities of one year or less and long-term debt consists of borrowings with remaining maturities greater than one year. The components of short-term borrowings and long-term debt as of June 30, 2013 and December 31, 2012 are provided below:

(in thousands) (1)	June 30, 2013	December 31, 2012
Short-term borrowings		
Current portion of senior notes:		
City National Corporation - 5.125% Senior Notes Due February 2013	\$	\$ 206,581
Federal funds purchased		1,214,200
Current portion of nonrecourse debt (5)	2,675	3,017
Total short-term borrowings	\$ 2,675	\$ 1,423,798
Long-term debt		
Senior notes:		
City National Corporation - 5.25% Senior Notes Due September 2020	\$ 297,766	\$ 297,613
Subordinated debt:		
City National Bank - 9.00% Subordinated Notes Due July 2019 (2)	49,774	49,755
City National Bank - 9.00% Subordinated Notes Due August 2019	74,886	74,876
City National Bank - Fixed and Floating Subordinated Notes due August 2019 (3)	54,916	54,909
City National Bank - 5.375% Subordinated Notes Due July 2022	148,677	148,642
Junior subordinated debt:

Nonrecourse debt (5)	75,366	75,104
Total long-term debt	\$ 706,537	\$ 706,051

⁽¹⁾ The carrying value of certain borrowed funds is net of discount and issuance costs, which are being amortized into interest expense, as well as the impact of fair value hedge accounting, if applicable.

On April 30, 2012, the Company assumed borrowings through its acquisition of FAEF. FAEF assigns the future rentals of certain lease financing loans to financial institutions on a nonrecourse basis at fixed interest rates. In return for future minimum lease rentals assigned, FAEF receives a discounted cash payment. Proceeds from discounting are reflected in the table above as nonrecourse debt.

⁽²⁾ These notes bear a fixed interest rate of 9 percent for the initial five years from the date of issuance (July 15, 2009) and thereafter the rate is reset at the Bank s option to either LIBOR plus 6 percent or to prime plus 5 percent. These notes are callable by the Bank, subject to any prior approval requirements of the Office of the Comptroller of the Currency (OCC), on or after July 2014.

⁽³⁾ These notes bear a fixed interest rate of 9 percent for the initial five years from the date of issuance (August 12, 2009) and thereafter bear an interest rate equal to the three-month LIBOR rate plus 6 percent. The rate is reset quarterly and is subject to an interest rate cap of 10 percent throughout the term of the notes. These notes are callable by the Bank, subject to any prior approval requirements of the OCC, on or after August 2014.

⁽⁴⁾ These floating rate securities pay interest of three-month LIBOR plus 1.965 percent which is reset quarterly. As of June 30, 2013, the interest rate was approximately 2.24 percent.

⁽⁵⁾ Nonrecourse debt bears interest at an average rate of 3.88 percent as of June 30, 2013 and has maturity dates ranging from August 2013 to December 2019.

On June 20, 2012, the Bank issued \$150.0 million in subordinated notes that bear a fixed rate of interest of 5.375 percent. The notes mature on July 15, 2022. The proceeds were used for general corporate purposes.

Note 9. Shareholders Equity

On November 13, 2012, the Corporation issued 7,000,000 depositary shares, each representing a 1/40th interest in a share of 5.50% Series C non-cumulative perpetual preferred stock with a liquidation preference of \$1,000 per share (equivalent to \$25.00 per depositary share). Net proceeds, after issuance cost, were approximately \$169.9 million. Dividends on the preferred stock are payable quarterly, in arrears, if declared by the Corporation s Board of Directors. The preferred stock has no maturity date and may be redeemed in whole or in part at the option of the Corporation on any dividend payment date after five years from the date of issuance.

The components of AOCI at June 30, 2013 and December 31, 2012 are as follows:

	Jun	e 30,	December 31,
(in thousands)	20)13	2012

Note 9. Shareholders Equity (Continued)

The following table summarizes the Company s share repurchases for the three months ended June 30, 2013. All repurchases relate to shares withheld or previously owned shares used to pay taxes due upon vesting of restricted stock. There were no issuer repurchases of the Corporation s common stock as part of its repurchase plan for the three months ended June 30, 2013.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)
April 1, 2013 to April 30, 2013	359	\$ 55.53
May 1, 2013 to May 31, 2013		
June 1, 2013 to June 30, 2013	1,128	62.05
Total share repurchases	1,487	60.47

Note 10. Earnings per Common Share

The Company applies the two-class method of computing basic and diluted EPS. Under the two-class method, EPS is determined for each class of common stock and participating security according to dividends declared and participation rights in undistributed earnings. The Company grants restricted stock and restricted stock units under a share-based compensation plan that qualify as participating securities.

The computation of basic and diluted EPS is presented in the following table:

	For the three months ended June 30,			For the six months ended June 30,			ended
(in thousands, except per share amounts) Basic EPS:	2013		2012		2013		2012
Net income attributable to City National Corporation Less: Dividends on preferred stock	\$ 59,741 2,406	\$	54,758	\$	111,264 4,812	\$	101,023
Net income available to common shareholders Less: Earnings allocated to participating securities	\$ 57,335 656	\$	54,758 788	\$	106,452 1,287	\$	101,023 1,532
Earnings allocated to common shareholders	\$ 56,679	\$	53,970	\$	105,165	\$	99,491
Weighted average common shares outstanding	54,105		53,105		53,919		52,923
Basic earnings per common share	\$ 1.05	\$	1.02	\$	1.95	\$	1.88
Diluted EPS:							
Earnings allocated to common shareholders (1)	\$ 56,682	\$	53,972	\$	105,173	\$	99,496
Weighted average common shares outstanding Dilutive effect of equity awards Weighted average diluted common shares	54,105 372		53,105 268		53,919 361		52,923 294
outstanding	54,477		53,373		54,280		53,217

Diluted earnings per common share	\$ 1.04	\$ 1.01 \$	1.94	\$ 1.87

⁽¹⁾ Earnings allocated to common shareholders for basic and diluted EPS may differ under the two-class method as a result of adding common stock equivalents for options to dilutive shares outstanding, which alters the ratio used to allocate earnings to common shareholders and participating securities for the purposes of calculating diluted EPS.

The average price of the Company s common stock for the period is used to determine the dilutive effect of outstanding stock options. Antidilutive stock options are not included in the calculation of basic or diluted EPS. There were 2.4 million and 2.7 million average outstanding stock options that were antidilutive for the three months ended June 30, 2013 and 2012, respectively. There were 2.3 million average outstanding stock options that were antidilutive for the six months ended June 30, 2013 and 2012, respectively.

Table of Contents

Note 11. Share-Based Compensation

On June 30, 2013, the Company had one share-based compensation plan, the Amended and Restated City National Corporation 2008 Omnibus Plan (the Plan), which was originally approved by the Company s shareholders on April 23, 2008. No new awards have been or will be granted under predecessor plans since the adoption of the Plan. The Plan permits the grant of stock options, restricted stock, restricted stock units, cash-settled restricted stock units, performance shares, performance share units, performance units and stock appreciation rights, or any combination thereof, to the Company s eligible employees and non-employee directors. No grants of performance shares, performance share units or stock appreciation rights had been made as of June 30, 2013. At June 30, 2013, there were approximately 3.3 million shares available for future grants. Refer to the Company s Annual Report on Form 10-K for the year ended December 31, 2012 for further discussion of the Company s share-based compensation plan.

The compensation cost recognized for all share-based awards was \$5.4 million and \$10.5 million for the three and six months ended June 30, 2013, respectively, compared with \$4.3 million and \$9.0 million for the three and six months ended June 30, 2012, respectively. The total income tax benefit recognized in the consolidated statements of income for share-based compensation arrangements was \$2.3 million and \$4.4 million for the three and six months ended June 30, 2013, respectively, compared with \$1.8 million and \$3.8 million for the three and six months ended June 30, 2012, respectively. The Company received \$17.8 million and \$9.0 million in cash for the exercise of stock options during the six months ended June 30, 2013 and 2012, respectively. The actual tax benefit realized for the tax deductions from stock option exercises was \$3.5 million and \$0.9 million for the six months ended June 30, 2013 and 2012, respectively.

To estimate the fair value of stock option awards, the Company uses the Black-Scholes methodology, which incorporates the assumptions summarized in the table below:

	For the three months ended June 30,		For the six mont June 30		
	2013	2012	2013	2012	
Weighted-average volatility			28.12%	30.58%	
Dividend yield			2.15%	2.14%	
Expected term (in years)			6.15	6.11	
Risk-free interest rate			1.24%	1.44%	

Using the Black-Scholes methodology, the weighted-average grant-date fair values of options granted during the six months ended June 30, 2013 and 2012 were \$12.57 and \$11.64, respectively. The total intrinsic value of options exercised during the six months ended June 30, 2013 and 2012 was \$8.5 million and \$2.1 million, respectively.

A summary of option activity and related information for the six months ended June 30, 2013 is presented below:

		Weighted		Weighted
		Average	Aggregate	Average
	Number of	Exercise	Intrinsic	Remaining
	Shares	Price	Value	Contractual
