FORWARD-LOOKING STATEMENTS

This document contains forward-looking statements, which can be identified by the use of words such as estimate, project, believe, intend, anticipate, plan, seek, expect and words of similar meaning. These forward-looking statements include, but are not limited to:

- statements of our goals, intentions and expectations;
- statements regarding our business plans, prospects, growth and operating strategies;
- statements regarding the asset quality of our loan and investment portfolios; and
- estimates of our risks and future costs and benefits.

These forward-looking statements are based on current beliefs and expectations of our management and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

- changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;
- general economic conditions, either nationally or in our market areas, that are worse than expected;
- competition among depository and other financial institutions;

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

- inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments;
- adverse changes in the securities markets;
- our ability to enter new markets successfully and capitalize on growth opportunities;
- our ability to successfully integrate acquired entities, if any;
- changes in consumer spending, borrowing and savings habits;
- our ability to continue to increase and manage our commercial and residential real estate, multi-family, and commercial and industrial loans;
- possible impairments of securities held by us, including those issued by government entities and government sponsored enterprises;
- the impact of the economy on our loan portfolio (including cash flow and collateral values), investment portfolio, customers and capital market activities;
- the impact of the current governmental effort to restructure the U.S. financial and regulatory system;
- changes in the financial performance and/or condition of our borrowers; and
- the effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, as well as the Securities and Exchange Commission, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. Please see Item 1A. Risk Factors.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Except as may be required by law, we disclaim any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

ITEM 1. BUSINESS

Northwest Bancshares, Inc.

Northwest Bancshares, Inc., a Maryland corporation, was incorporated in September 2009 to be the successor corporation to Northwest Bancorp, Inc., the former stock holding company for Northwest Savings Bank, upon completion of the mutual-to-stock conversion of Northwest Bancorp, MHC. The terms Northwest, the Company, we, us and our refer to Northwest Bancshares, Inc.

The conversion was completed December 18, 2009 the Company sold 68,878,267 shares of common stock at \$10.00 per share in the related offering. Concurrent with the completion of the offering, shares of Northwest Bancorp, Inc. common stock owned by public stockholders were exchanged for 2.25 shares of Northwest Bancshares, Inc. s common stock. We also issued 1,277,565 shares of common stock and contributed \$1.0 million in cash from the offering proceeds to Northwest Charitable Foundation, a charitable foundation that we established for the benefit of the communities in which Northwest Savings Bank operates. As of December 31, 2013, the Company had 94,243,713 shares outstanding and a market capitalization of approximately \$1.393 billion.

Our executive offices are located at 100 Liberty Street, Warren, Pennsylvania 16365. Our telephone number at this address is (814) 726-2140.

The Company s website (www.northwestsavingsbank.com) contains a direct link to Northwest Bancshares, Inc. s and its predecessor Northwest Bancorp, Inc. s filings with the Securities and Exchange Commission, including copies of annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these filings, if any. Information on our website shall not be considered a part of this report. Copies may also be obtained, without charge, by written request to Shareholder Relations, P.O. Box 128, Warren, Pennsylvania 16365.

Northwest Savings Bank

Northwest Savings Bank is a Pennsylvania-chartered stock savings bank headquartered in Warren, Pennsylvania, which is located in northwestern Pennsylvania. Northwest Savings Bank is a community-oriented financial institution offering personal and business banking solutions, investment management and trust services and insurance products. Through a wholly-owned subsidiary, Northwest Consumer Discount Company, it also offers consumer finance loans. Northwest Savings Bank s mutual savings bank predecessor was founded in 1896.

As of December 31, 2013, Northwest Savings Bank operated 165 community-banking offices throughout its market area in central and western Pennsylvania, western New York, eastern Ohio and Maryland. Northwest Consumer Discount Company, operates 50 consumer finance offices in Pennsylvania. Northwest Savings Bank also offers investment management and trust services and, through wholly-owned subsidiaries, actuarial and benefit plan administration services as well as property and casualty and employer benefit plan insurance. Our principal lending activities are the origination of fixed-rate loans secured by first mortgages on owner-occupied, one-to-four-family residences, shorter term consumer loans and commercial business and commercial real estate loans.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Our principal sources of funds are personal and business deposits, borrowed funds and the principal and interest payments on loans and marketable securities. Our principal source of income is interest received on loans and marketable securities. Our principal expenses are the cost of employee compensation and benefits and the interest paid on deposits and borrowed funds.

Northwest Savings Bank's principal executive office is located at 100 Liberty Street, Warren, Pennsylvania, and its telephone number at that address is (814) 726-2140.

Table of Contents

Market Area and Competition

We are headquartered in Warren, Pennsylvania, which is located in northwestern Pennsylvania, and have our highest concentration of deposits and loans in this area. Since the early 1990s, we have expanded, primarily through acquisitions, into the southwestern and central regions of Pennsylvania, as well as western New York, eastern Ohio and Maryland. As of December 31, 2013, we operated 138 community banking offices and 50 consumer finance offices in Pennsylvania, four community banking offices in Ohio, 19 community banking offices in New York and four community banking offices in Maryland. All of the aforementioned market areas are served by a number of competing financial institutions. As a result, we encounter strong competition both in attracting deposits and in originating personal and business loans. Our most direct competition for deposits comes from commercial banks, brokerage houses, other thrift institutions and credit unions in our market areas. We expect continued competition from these financial institutions in the foreseeable future. With the continued acceptance of internet banking by our customers and consumers generally, competition for deposits has increased from institutions operating outside of our market area as well as from insurance companies.

The following description of our market area is based upon information obtained from SNL Securities, the Bureau of Labor Statistics, The Federal Housing Financial Agency and the Mortgage Bankers Association.

Pennsylvania and Western New York Market Area. Our retail branch network encompasses 29 counties in Pennsylvania and five counties in western New York. In addition, through our consumer finance offices we operate in 11 additional counties in Pennsylvania. Our northwestern and southwestern Pennsylvania and western New York markets have a diverse economy driven by service businesses, technology companies and small manufacturing companies. Our southeastern Pennsylvania market is primarily driven by service businesses and serves as a bedroom community to the cities of Baltimore, Maryland and Philadelphia, Pennsylvania.

Pennsylvania is a stable banking market with a total population of approximately 12.8 million and total households of approximately 5.0 million as of December 31, 2012, the most recent data available. The Pennsylvania markets in which we operate our retail branch and consumer finance offices contain more than half of Pennsylvania's population and a similar percentage of households. Our western New York market area has a total population of approximately 2.1 million and total households of approximately 859,000 as of December 31, 2012. Our Pennsylvania and western New York market areas have experienced modest population growth rates between 2010 and 2012, reversing the recent trend of decreasing populations. As of December 31, 2012, the average median household income has decreased for the counties in which we conduct business in Pennsylvania by 1.2% from 2011 and by 7.2% in our western New York markets. The median household income for the counties in which we conduct business in Pennsylvania was \$42,754 and was \$44,620 in our western New York market area as of December 31, 2012, the most recent data available, compared to the nationwide median income level of \$50,157. However, the household income growth rate in Pennsylvania is projected to increase above the expected national average growth rates during the next five years by approximately 27.6%. Our western New York market area is projected to increase above the expected national average growth rates during the next five years by approximately 15.6%. As of December 31, 2013 the unemployment rate for Pennsylvania was 6.9% and for our western New York market area was 8.2%, both above the national average of 6.7%.

As of September 30, 2013 the change in the House Price Index for the last four quarters in Pennsylvania and our western New York market increased by 4.8% and 2.6%, respectively, compared to an increase in the national average of 8.4%. Foreclosures have receded from their record highs to the lowest levels since 2008. As of September 30, 2013, the foreclosure rates for mortgage loans on one-to-four unit residential properties in Pennsylvania and New York were 3.3% and 6.3% compared to the national average of 3.1%.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Maryland and Ohio Market Areas. In addition to operating in Pennsylvania and western New York, we also operate four community banking offices in Ashtabula and Lake counties in Ohio and four community banking offices in Baltimore and Howard counties in Maryland. Our Maryland regional economy consists of service businesses, government, and health care industries. The major employment sectors in our Ohio market are similar to our northwestern Pennsylvania market. With the exception of Ashtabula county in Ohio, these markets have an expanding population base as well as median household income levels and projected income growth rates comparable to or exceeding the state and national averages as of December 31, 2012. As of December 31, 2013 the unemployment rate for our Ohio and Maryland market areas was 7.1% and 6.4%, respectively, compared to the national average of 6.7%.

Table of Contents

As of September 30, 2013 the change in the House Price Index for the last four quarters for our Ohio and Maryland markets decreased by 0.9% and 2.2% compared to an increase in the national average of 8.4%. As of September 30, 2013 the foreclosure rates in Ohio and Maryland were 3.5% and 4.0%, respectively, compared to the national average of 3.1%.

Lending Activities

General. Our principal lending activities are the origination of fixed-rate and, to a lesser extent, adjustable-rate mortgage loans collateralized by one-to-four-family residential real estate, shorter term consumer loans and the origination of loans collateralized by multi-family residential and commercial real estate and commercial business loans. Generally, we focus our lending activities in the geographic areas where we maintain offices.

In an effort to manage interest rate risk, we have sought to make our interest-earning assets more interest rate sensitive by originating adjustable-rate loans, such as adjustable-rate residential mortgage loans and home equity lines of credit, and by originating short-term and medium-term fixed-rate consumer loans. In recent years we have emphasized the origination of commercial real estate loans and commercial business loans, which generally have adjustable rates of interest and shorter maturities than one-to-four-family residential real estate loans. We also purchase mortgage-backed securities and other types of investment securities that generally have short average lives and/or adjustable interest rates. Because we originate a substantial amount of long-term fixed-rate mortgage loans collateralized by one-to-four-family residential real estate, when possible, we originate and underwrite loans according to standards that allow us to sell them into the secondary mortgage market for purposes of managing interest-rate risk and liquidity. The sale of mortgage loans supports our strategy to grow the consumer and commercial loan portfolios by more than our portfolio of long-term fixed rate residential mortgage loans. We currently sell low-yielding fixed rate residential mortgage loans with maturities of more than 15 years, and on a more limited basis, those with maturities of 15 years or less, while retaining all adjustable rate residential mortgage loans. Although we sell a portion of the residential mortgage loans that we originate, we continue to be a portfolio lender, and at any one time hold few loans identified as held-for-sale. We currently retain servicing on the mortgage loans we sell which generates monthly service fee income. We generally retain in our portfolio all consumer loans that we originate while we periodically sell participations in the multi-family residential, commercial real estate or commercial business loans that we originate in an effort to reduce the concentration of certain individual credits and the risk associated with certain businesses, industries or geographies.

Residential Mortgage Loans. We offer residential mortgage loans with terms typically ranging from 15 to 30 years, with either fixed or adjustable interest rates. Originations of fixed rate residential mortgage loans versus adjustable rate residential mortgage loans are monitored on an ongoing basis. The percentage of adjustable rate residential mortgage originations to total originations is affected significantly by the level of market interest rates, customer preference, our interest rate sensitivity and liquidity position, as well as loan products offered by our competitors. Therefore, even when our strategy is to increase the origination of adjustable rate residential mortgage loans, market conditions may be such that there is greater demand for fixed rate mortgage loans. Adjustable rate residential mortgage loans totaled \$25.7 million, or 0.44%, of our gross loan portfolio at December 31, 2013.

Our fixed rate residential mortgage loan products offer fixed rates for up to 30 years. Whenever possible, our fixed rate residential mortgages are originated and underwritten according to secondary mortgage market guidelines in order to manage credit risk, as well as interest rate risk and liquidity. Our adjustable rate residential mortgage loans offer initial interest rate adjustment periods of one, three, and five years, terms up to 30 years and adjustments based on changes in designated market indices. All of our residential mortgage loans are amortized on a monthly basis with both principal and interest due monthly.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Regulations limit the amount that a savings bank may lend relative to appraised values of real estate securing the loans, as determined by an appraisal at the time of loan origination. Appraisals are performed by in-house appraiser staff or by appraisers deemed qualified by our chief appraiser. Such regulations permit a maximum loan-to-value of 95% for residential properties and 80% for all other real estate secured loans. We generally limit the maximum loan-to-value on both fixed- and adjustable-rate residential mortgage loans without private mortgage insurance, to 80% of the lesser of appraised values or purchase prices of real estate serving as collateral for our mortgage loans. Limited special financing programs allow for insured loans with loan-to-value ratios of up to 97%, and uninsured loans with loan-to-value ratios up to 90%. We require fire and casualty insurance, as well as a title guaranty regarding good title, on all properties securing our residential mortgage loans. We also require flood insurance for loans secured by properties located within special flood hazard areas.

Table of Contents

Included in our \$2.492 billion portfolio of residential mortgage loans are construction loans of \$22.1 million, or 0.37% of our total loan portfolio. We offer fixed-rate and adjustable-rate residential construction loans primarily for the construction of owner-occupied one-to-four-family residences in our market area to builders or to owners who have a contract for construction. Construction loans are generally structured to become permanent mortgages, and are originated with terms of up to 30 years with an allowance of up to one year for construction. Advances are made as construction is completed. In addition, we originate loans within our market area that are secured by individual unimproved or improved lots. Land loans for the construction of owner-occupied residential real estate properties are currently offered with fixed-rates for terms of up to 10 years. The maximum loan-to-value ratio for these loans is 80% of the as-completed appraised value, and the maximum loan-to-value ratio for construction loans is 95% of the lower of cost to build or as-completed appraised value. Construction lending generally involves a greater degree of credit risk than permanent residential mortgage lending, as repayment of construction loans is often dependent upon the successful completion of construction projects. Construction delays or the inability of borrowers to sell properties once construction is completed may impair borrowers' ability to repay loans. Private mortgage insurance is required for construction loans with loan-to-value ratios in excess of 80%.

Our residential mortgage loans customarily include due-on-sale clauses, which are provisions giving us the right to declare loans immediately due and payable in the event, among other things, borrowers sell or otherwise dispose of underlying real properties serving as collateral for loans.

Some financial institutions we have acquired have held loans that are serviced by others and are secured by one-to-four-family residences. At December 31, 2013, our portfolio of residential mortgage loans serviced by others totaled \$4.7 million. We currently have no plans to enter into new residential mortgage loan participations.

Home Equity Loans. Generally, our home equity loans are secured by the borrower's principal residence with a maximum loan-to-value ratio, including the principal balances of both the first and second mortgage loans, of 90% or less. Home equity loans are offered on a fixed rate basis with terms of up to 20 years. Home equity lines of credit are offered on an adjustable-rate basis with terms of up to 25 years. All home equity lines of credit are underwritten assuming the borrower is required to immediately begin making principal and interest payments using the current rates on our equivalent fixed rate products. At December 31, 2013, the disbursed portion of home equity lines of credit totaled \$313.3 million, or 5.30% of gross loans, with \$133.6 million remaining undisbursed, and our fixed-rate home equity loans totaled \$770.6 million, or 13.05% of gross loans. We generally underwrite home equity loans and lines of credit in a manner similar to our underwriting of residential mortgage loans.

Other Consumer Loans. The principal types of other consumer loans we offer are automobile loans, sales finance loans, unsecured personal loans, credit card loans, and loans secured by deposit accounts. These loans are typically offered with maturities of ten years or less.

The underwriting standards we employ for consumer loans include a determination of the applicant's credit history and an assessment of ability to meet existing obligations and payments on the proposed loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment, and additionally, from any verifiable secondary income. Creditworthiness of the applicant is of primary consideration; however, the underwriting process also includes a comparison of the value of the collateral in relation to the proposed loan amount.

Consumer loans entail greater credit risk than residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by assets that depreciate rapidly, such as automobiles, mobile homes, boats, recreation vehicles, appliances and furniture. In such cases,

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In particular, amounts realizable on the sale of repossessed automobiles may be significantly reduced based upon the condition of the automobiles and the lack of demand for used automobiles. At December 31, 2013, other consumer loans totaled \$228.3 million, or 3.87% of gross loans.

Commercial Real Estate Loans. Our multi-family commercial real estate loans are secured by multi-family residences, such as rental properties. Our commercial real estate loans are secured by nonresidential properties such as hotels, commercial offices, manufacturing facilities and retail establishments. At December 31, 2013, a significant portion of our multi-family commercial real estate and commercial real estate loans were secured by properties located within our market area. Our largest multi-family commercial real estate loan relationship at December 31, 2013 had a principal balance of \$18.6 million, and was collateralized by student housing. This loan

Table of Contents

was performing in accordance with its terms as of December 31, 2013. Our largest commercial real estate loan relationship at December 31, 2013, had a principal balance of \$65.4 million and was secured by eleven different mixed use commercial office buildings and hotels. These loans were performing in accordance with their terms as of December 31, 2013. Multi-family commercial and commercial real estate loans are offered with both adjustable interest rates and fixed interest rates. The terms of each multi-family residential and commercial real estate loan are negotiated on a case-by-case basis. We generally originate multi-family commercial and commercial real estate loans in amounts up to 80% of the appraised value of the property collateralizing the loan.

Loans secured by multi-family commercial and commercial real estate generally involve a greater degree of credit risk than residential mortgage loans and carry larger loan balances. This increased credit risk is a result of several factors, including the concentration of principal in a limited number of loans and borrowers, the effects of general economic conditions on income producing properties, and the increased difficulty of evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by multi-family commercial and commercial real estate is typically dependent upon the successful operation of the related real estate property. If the cash flow from the project is reduced, the borrower's ability to repay the loan may be impaired.

Commercial Loans. We offer commercial loans to finance various activities in our market area, some of which are secured in part by additional real estate collateral. At December 31, 2013 our largest commercial loan relationship had a principal balance of \$20.0 million, and was secured by all fixed assets of an oil refinery. This loan was performing in accordance with its terms as of December 31, 2013.

Commercial business loans are offered with both fixed and adjustable interest rates. Underwriting standards we employ for commercial business loans include a determination of the applicant's ability to meet existing obligations and payments on the proposed loan from operating cash flows generated by the applicant's business. The financial strength of each applicant also is assessed through a review of financial statements provided by the applicant.

Commercial loans generally have higher interest rates than residential loans, but they also may involve a higher risk of default since their repayment is generally dependent on the successful operation of the borrower's business. We generally obtain personal guarantees from the borrower or a third party as a condition to originating commercial loans.

Loan Originations, Solicitation, Processing and Commitments. Upon receiving a retail loan application, we obtain a credit report and employment verification to verify specific information relating to the applicant's employment, income, and credit standing. In the case of a real estate loan, either an in-house appraiser, or an approved external appraiser, appraises the real estate intended to secure the proposed loan. A loan processor checks the loan document file for accuracy and completeness, and verifies the information provided.

For our personal loans, including residential mortgage loans, home equity loans and lines of credit, automobile loans, credit cards and other unsecured loans, we have implemented a credit approval process based on a ladder individual loan authority system. Real estate secured loans are underwritten by our licensed mortgage loan originators. Non-real estate loans are underwritten by local loan officers who are granted various levels of authority based on their lending experience and expertise. These authority levels are reviewed by the Credit Committee on at least an annual basis. As part of the approval process, we assign independent credit officers to review the creditworthiness of all loans exceeding \$500,000. If the credit officer has concerns regarding a loan that has been approved at a specific level, they have the authority to request that the loan be reviewed and approved at the next higher level.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Our commercial loan policy assigns lending limits for our various commercial loan officers and stacked authorities for commercial loan officers with the approval of regional supervisors. These individual and stacked authorities are established by the Credit Committee. The Senior Loan Committee may approve extensions of credit in excess of the stacked loan authorities. The Credit Committee meets quarterly to review the assigned lending limits and to monitor our lending policies, loan activity, economic conditions and concentrations of credit.

Our general policy is to make no loans either individually or in the aggregate to one customer in excess of \$20.0 million. Under certain circumstances; for instance well qualified customers or customers with multiple individually qualified projects, this limit may be exceeded subject to the approval of the Senior Loan Committee. Although the Board of Directors does not approve individual loans, the Chief Credit Officer reviews any loans exceeding \$20.0 million or unusual loan requests with the Board of Directors prior to the loan being approved. In addition, the Chief Credit Officer has the authority to require that the Board of Directors review any loan that has

Table of Contents

been approved by the Senior Loan Committee with which the Chief Credit Officer has specific concerns. Also, all loans originated during a calendar quarter of \$5.0 million or more are reported to the Risk Management Committee of the Board of Directors at the end of each quarter. Fire and casualty insurance is required at the time the loan is made and throughout the term of the loan, and flood insurance is required as determined by regulation. After the loan is approved, a loan commitment letter is promptly issued to the borrower. At December 31, 2013, we had commitments to originate \$175.0 million of loans.

If the loan is approved, the commitment letter specifies the terms and conditions of the proposed loan including the amount of the loan, interest rate, amortization period, maturity, a description of the required collateral and required insurance coverage. The borrower must provide proof of fire and casualty insurance on the property (and, as required, flood insurance) serving as collateral, which insurance must be maintained during the full term of the loan. Property searches are requested, as needed, on all loans secured by real property.

Loan Origination Fees. We defer loan origination fees received from borrowers and costs and amortize such amounts as an adjustment of yield over the life of the loan by using the level yield method. Deferred loan fees or costs are recognized as part of interest income immediately upon prepayment or the sale of the related loan. At December 31, 2013, we had \$2.5 million of net deferred loan origination costs. Loan origination fees vary with the volume and type of loans and commitments originated and purchased, principal repayments, and competitive conditions in the marketplace.

Income from net loan origination fees was \$8.4 million, \$11.2 million and \$7.1 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Loans-to-One Borrower. As of December 31, 2013, the largest aggregate amount loaned to one borrower, or related borrowers, totaled \$65.4 million and was secured by eleven commercial real estate properties including hotels, office and retail space. Our second largest lending relationship totaled \$53.4 million and was secured by six commercial office buildings. Our third largest lending relationship totaled \$42.5 million and was secured by a residential development. Our fourth largest lending relationship totaled \$23.6 million and was secured by six commercial real estate properties and undeveloped land. Our fifth largest lending relationship totaled \$20.0 million and was secured by business assets. All of these loans were performing in accordance with their terms at December 31, 2013.

Investment Activities

Our Board of Directors has primary responsibility for establishing and overseeing our investment policy. The Board of Directors has delegated authority to implement the investment policy to our Chief Financial Officer. The investment policy is reviewed at least annually by the Chief Financial Officer, and any changes to the policy are subject to approval by the Board of Directors. The overall objectives of the Investment Policy are to maintain a portfolio of high quality and diversified investments, to provide liquidity, and to control interest rate risk while providing an acceptable return. The investment portfolio is also used to provide collateral for qualified deposits and borrowings, to provide additional earnings when loan production is low, and to reduce our tax liability. The policy dictates that investment decisions give consideration to the safety of principal, liquidity requirements and potential returns. Either our Chief Financial Officer executes our securities portfolio transactions or another designee executes transactions as directed by the Chief Financial Officer. All purchase and sale transactions are reported to the Board of Directors on a monthly basis.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Our investment policy does not permit the purchase of complex securities and derivatives as defined in federal banking regulations and other high-risk securities, nor does it permit additional investments in non-agency mortgage-backed securities, pooled trust preferred securities, or single issuer trust preferred securities.

At the time of purchase, we designate a security as either held-to-maturity or available-for-sale based upon our ability and intentions. Securities available-for-sale are reported at market value and securities held to maturity are reported at amortized cost. A periodic review and evaluation of the available-for-sale and held-to-maturity securities portfolios is conducted to determine if the fair value of any security has declined below its carrying value and whether such decline is other-than-temporary. If impairment exists, credit related impairment losses are recorded in earnings while noncredit related impairment losses are recorded in accumulated other comprehensive income (for available for sale securities). The fair values of our securities are based on published or securities dealers' market values, when available. See note 3 to the Consolidated Financial Statements on page 75 for a detailed analysis and description of our investment portfolio and valuation techniques.

Table of Contents

We purchase debentures and mortgage-backed securities that generally are issued by the Federal Home Loan Bank, Fannie Mae, Freddie Mac or Ginnie Mae. Historically, we invested in mortgage-backed securities to achieve positive interest rate spreads with minimal administrative expense and to lower our credit risk as a result of the guarantees provided by Freddie Mac, Fannie Mae or Ginnie Mae. However, in September 2008, the Federal Housing Finance Agency placed Freddie Mac and Fannie Mae into conservatorship. The U.S. Treasury Department has established financing agreements to ensure that Freddie Mac and Fannie Mae meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed. These actions have not materially affected the markets for mortgage-backed securities issued by Freddie Mac or Fannie Mae.

Sources of Funds

General. Deposits are the major source of our funds for lending and other investment purposes. In addition to deposits, we derive funds from the amortization and prepayment of loans and mortgage-backed securities, the maturity of investment securities, operations and, if needed, borrowings. Scheduled loan principal repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are influenced significantly by general interest rates and market conditions. Borrowings may be used on a short-term basis to compensate for reductions in the availability of funds from other sources or on a longer term basis for general business purposes, including to manage interest rate risk.

Deposits. Personal and business deposits are generated from our market area by offering a broad selection of deposit instruments including checking accounts, savings accounts, money market deposit accounts, term certificate accounts and individual retirement accounts. While we accept deposits of \$250,000 or more, we do not offer premium rates for such deposits. We accept brokered deposits through the CDARS program, but generally do not solicit funds outside our market area. As of December 31, 2013, we had twelve deposits through the CDARS program with an aggregate balance of \$985,000. Deposit account terms vary according to the minimum balance required, the period of time during which the funds must remain on deposit, and the interest rate, among other factors. We regularly execute changes in our deposit rates based upon cash flow requirements, general market interest rates, competition, and liquidity requirements.

Borrowings. Deposits are the primary source of funds for our lending and investment activities and general business purposes. We also rely upon borrowings to supplement our supply of lendable funds and to meet deposit withdrawal requirements. Borrowings from the Federal Home Loan Bank of Pittsburgh typically are collateralized by a portion of our real estate loans. In addition to the Federal Home Loan Bank of Pittsburgh, we have borrowing facilities with the Federal Reserve Bank, two correspondent banks and we borrow funds, in the form of corporate repurchase agreements, from municipalities, corporations and school districts.

The Federal Home Loan Bank of Pittsburgh functions as a central bank providing credit for Northwest Savings Bank and other member financial institutions. As a member, Northwest Savings Bank is required to own capital stock in the Federal Home Loan Bank of Pittsburgh and is authorized to apply for borrowings on the security of certain of its real estate loans, provided certain standards related to creditworthiness have been met. Borrowings are made pursuant to several different programs. Each credit program has its own interest rate and range of maturities. Depending on the program, limitations on the amount of borrowings are based either on a fixed percentage of a member institution's net worth or on the Federal Home Loan Bank of Pittsburgh's assessment of the institution's creditworthiness. All of our Federal Home Loan Bank of Pittsburgh borrowings currently have fixed interest rates and original maturities of between one day and ten years.

Subsidiary Activities

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Northwest Bancshares, Inc.'s sole direct consolidated subsidiary is Northwest Savings Bank. Northwest Bancshares, Inc. also owns all of the common stock of two statutory business trusts: Northwest Bancorp Capital Trust III, a Delaware statutory business trust, and Northwest Bancorp Statutory Trust IV, a Connecticut statutory business trust (the Trusts). The Trusts have issued a total of \$100.0 million of trust preferred securities. The Trusts are not consolidated with Northwest Bancshares, Inc. At December 31, 2013, Northwest Bancshares, Inc.'s investment in the Trusts totaled \$3.1 million, and the Trusts had assets of \$103.6 million.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

Northwest Savings Bank has ten wholly-owned subsidiaries Northwest Settlement Agency, LLC, Great Northwest Corporation, Northwest Financial Services, Inc., Northwest Advisors, Inc., Northwest Consumer Discount Company, Inc., Allegheny Services, Inc., Boetger and Associates, Inc., Veracity Benefits Design, Inc., Northwest Capital Group, Inc. and The Bert Company. For financial reporting purposes all of these companies are included in the consolidated financial statements of Northwest Bancshares, Inc.

Northwest Settlement Agency, LLC provides title insurance to borrowers of Northwest Savings Bank and other lenders. At December 31, 2013, Northwest Savings Bank had an equity investment in Northwest Settlement Agency, LLC of \$3.2 million. For the year ended December 31, 2013, Northwest Settlement Agency, LLC had net income of \$419,000.

Great Northwest Corporation holds equity investments in government-assisted low-income housing projects in various locations throughout our market area. At December 31, 2013, Northwest Savings Bank had an equity investment in Great Northwest Corporation of \$8.7 million. For the year ended December 31, 2013, Great Northwest Corporation had net income of \$753,000, generated primarily from federal low-income housing tax credits.

Northwest Financial Services, Inc. provides retail brokerage services. At December 31, 2013, Northwest Savings Bank had an equity investment in Northwest Financial Services, Inc. of \$7.6 million, and for the year ended December 31, 2013, Northwest Financial Services, Inc. had net income of \$190,000.

Northwest Advisors, Inc., a federally registered investment advisor (RIA) provides investment management programs and investment portfolio planning services. At December 31, 2013 Northwest Savings Bank had an equity investment in Northwest Advisors, Inc. of \$560,000, and for the year ended December 31, 2013, Northwest Advisors, Inc. had a net income of \$271,000.

Northwest Consumer Discount Company operates 50 consumer finance offices throughout Pennsylvania. At December 31, 2013, Northwest Savings Bank had an equity investment in Northwest Consumer Discount Company of \$40.9 million and the net income of Northwest Consumer Discount Company for the year ended December 31, 2013 was \$2.3 million.

Allegheny Services, Inc. is a Delaware investment company that holds mortgage loans originated through our wholesale lending operation as well as municipal bonds. In addition, Allegheny Services, Inc. funds the operation of the Northwest Consumer Discount Company through an intercompany loan relationship. At December 31, 2013, Northwest Savings Bank had an equity investment in Allegheny Services, Inc. of \$726.6 million, and for the year ended December 31, 2013, Allegheny Services, Inc. had net income of \$16.7 million.

Boetger and Associates, Inc. is an actuarial and employee benefits consulting firm that specializes in the design, implementation and administration of qualified and non-qualified retirement plan programs. At December 31, 2013, Northwest Savings Bank had an equity investment of \$2.4 million in Boetger and Associates, Inc. and for the year ended December 31, 2013, Boetger and Associates, Inc. had net income of \$140,000.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Veracity Benefits Design, Inc. is an employee benefits firm specializing in insurance services to employer and employee groups. At December 31, 2013, Northwest Savings Bank had an equity investment of \$2.8 million in Veracity Benefits Design, Inc. and for the year ended December 31, 2013, Veracity Benefits Design, Inc. had net income of \$693,000.

Northwest Capital Group's principal activity is to own, operate and ultimately divest of properties that were acquired in foreclosure. At December 31, 2013, Northwest Savings Bank had an equity investment of \$10.8 million in Northwest Capital Group and reported net loss of \$353,000 for the year ended December 31, 2013.

The Bert Company is an employee benefits and property and casualty insurance firm specializing in commercial and personal insurance as well as retirement benefit plans. At December 31, 2013, Northwest Savings Bank had an equity investment of \$4.2 million in The Bert Company and for the year ended December 31, 2013 The Bert Company had net income of \$47,000.

As of January 1, 2014 Veracity Benefits Design, Inc. has been merged into The Bert Company and together they will be doing business as Northwest Insurance Services, Inc.

As we previously announced, on January 1, 2014 Northwest acquired Evans Capital Management, Inc. an Erie, Pennsylvania financial advisory firm with total managed assets of more than \$240.0 million.

Table of Contents

Federal regulations require insured institutions to provide 30 days advance notice to the Federal Deposit Insurance Corporation (FDIC) before establishing or acquiring a subsidiary or conducting a new activity in a subsidiary. The insured institution must also provide the FDIC such information as may be required by applicable regulations and must conduct the activity in accordance with the rules and orders of the FDIC. In addition to other enforcement and supervision powers, the FDIC may determine after notice and opportunity for a hearing that the continuation of a savings bank's ownership of or relation to a subsidiary constitutes a serious risk to the safety, soundness or stability of the savings bank, or is inconsistent with the purposes of federal banking laws. Upon the making of such a determination, the FDIC may order the savings bank to divest the subsidiary or take other actions.

Personnel

As of December 31, 2013, we had 1,855 full-time and 376 part-time employees. None of our employees are represented by a collective bargaining group. We believe we have a good working relationship with our employees.

SUPERVISION AND REGULATION

General

Northwest Savings Bank is a Pennsylvania-chartered savings bank and our deposit accounts are insured up to applicable limits by the FDIC under the Deposit Insurance Fund. Northwest Savings Bank is subject to extensive regulation by the Department of Banking and Securities of the Commonwealth of Pennsylvania (the Department of Banking), as its chartering agency, and by the FDIC, as the insurer of its deposit accounts. Northwest Savings Bank must file reports with the Department of Banking and the FDIC concerning its activities and financial condition in addition to obtaining regulatory approvals prior to entering into certain transactions including acquisitions of other financial institutions. Northwest Savings Bank is examined periodically by the Department of Banking and the FDIC to test Northwest Savings Bank's compliance with various laws and regulations. This regulation and supervision, as well as federal and state law, establishes a comprehensive framework of activities in which Northwest Savings Bank may engage and is intended primarily for the protection of the FDIC insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and with their examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes.

Any change in these laws or regulations, whether by the Department of Banking or the FDIC, could have a material adverse impact on the Company, Northwest Savings Bank and their respective operations.

As a savings and loan holding company, we are required to comply with the rules and regulations of the Board of Governors of the Federal Reserve System (the Federal Reserve Board), and is also required to file certain reports with and is subject to examination by the Federal Reserve Board. We are also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Set forth below is a brief description of certain regulatory requirements that are applicable to Northwest Savings Bank and Northwest Bancshares, Inc. The description below is limited to certain material aspects of the statutes and regulations addressed, and is not intended to be a complete description of such statutes and regulations and their effects on Northwest Savings Bank and Northwest Bancshares, Inc.

Dodd-Frank Wall Street Reform and Consumer Protection Act

In July 2010 the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) was signed into law. This law has significantly changed the current bank regulatory structure and is affecting the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many years.

Certain provisions of the Dodd-Frank Act have had a near term effect on us. For example, the law provided that the Office of Thrift Supervision, which was the primary federal regulator for Northwest Bancshares, Inc., ceased to exist one year from the date of the new law's enactment. The Federal Reserve Board is now supervising and regulating all savings and loan holding companies that were formerly regulated by the Office of Thrift Supervision, including Northwest Bancshares, Inc.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

The Dodd-Frank Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets will continue to be examined by their applicable bank regulators. The Dodd-Frank Act also weakened the federal preemption rules that have been applicable for national banks and federal savings associations, and gave state attorneys general the ability to enforce federal consumer protection laws.

Also effective July 2011 was a provision of the Dodd-Frank Act that eliminated the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse effect on our interest expense.

The Dodd-Frank Act also broadened the base for Federal Deposit Insurance Corporation insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. The Dodd-Frank Act also permanently increased the maximum amount of deposit insurance for banks, savings institutions and credit unions to \$250,000 per deposit category.

The Dodd-Frank Act required publicly traded companies to give stockholders a non-binding vote on executive compensation say-on-pay and so-called golden parachute payments. The legislation directed the Federal Reserve Board to promulgate rules prohibiting excessive compensation paid to bank holding company executives, regardless of whether the company is publicly traded or not. The legislation also provided for originators of certain securitized loans to retain a percentage of the risk for transferred credits, directed the Federal Reserve Board to regulate pricing of certain debit card interchange fees, and contained a number of reforms related to mortgage origination.

The Dodd-Frank Act contained the so-called Volcker Rule, which generally prohibits banking organizations from engaging in proprietary trading and from investing in, sponsoring or having certain relationships with hedge or private equity funds (covered funds). On December 13, 2013, federal agencies issued a final rule implementing the Volcker Rule which, among other things, requires banking organizations to restructure and limit certain of their investments in and relationships with covered funds. The final rule unexpectedly included within the interests subject to its restrictions collateralized debt obligations backed by trust-preferred securities (TRUPS CDOs). Many banking organizations had purchased such instruments because of their favorable tax, accounting and regulatory treatment and would have been subject to unexpected write-downs. In response to concerns expressed by community banking organizations, the federal agencies subsequently issued an interim final rule which grandfathered TRUPS CDOs issued before May 19, 2010 if (i) acquired by a banking organization on or before December 10, 2013 and (ii) the organization reasonably believed the proceeds from the TRUPS CDOs were invested primarily in any trust preferred security or subordinated debt instrument issued by a depository institution holding company with less than \$15 billion in assets or by a mutual holding company.

Many of the provisions of the Dodd-Frank Act have delayed effective dates and the legislation requires various federal agencies to promulgate numerous and extensive regulations over the next several years. Although the substance and scope of these regulations cannot be completely determined at this time, it is expected that at a minimum the legislation and implementing regulations will increase our operating and compliance costs.

Pennsylvania Savings Bank Law

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The Pennsylvania Banking Code of 1965, as amended (the Banking Code) contains detailed provisions governing the organization, operations, corporate powers, savings and investment authority, branching rights and responsibilities of directors, officers and employees of Pennsylvania savings banks. A Pennsylvania savings bank may locate or change the location of its principal place of business and establish an office anywhere in, or adjacent to, Pennsylvania, with the prior approval of the Department of Banking. The Banking Code delegates extensive rulemaking power and administrative discretion to the Department of Banking in its supervision and regulation of state-chartered savings banks.

The Department of Banking generally examines each savings bank not less frequently than once every two years. Although the Department of Banking may accept the examinations and reports of the FDIC in lieu of its own examination, the current practice is for the Department of Banking to conduct individual examinations. The

Table of Contents

Department of Banking may order any savings bank to discontinue any violation of law or unsafe or unsound business practice and may direct any director, officer, or employee of a savings bank engaged in a violation of law, unsafe or unsound practice or breach of fiduciary duty to show cause at a hearing before the Department of Banking why such person should not be removed. The Department of Banking may also appoint a receiver or conservator for an institution in appropriate cases.

The Banking Law Modernization Package was Pennsylvania legislation effective on December 24, 2012. The legislation was intended to update, simplify and modernize the banking laws of Pennsylvania and reduce regulatory burden where possible. The legislation, among other things, increased the threshold for investments in bank premises without Department of Banking approval from 25% of capital, surplus, undivided profits and capital securities to 100%, eliminated archaic lending requirements and pricing restrictions and changed the procedure for Pennsylvania state chartered institutions closing a branch from an application for approval to a notice. The legislation also clarified the Department of Banking's examination and enforcement authority over subsidiaries of Pennsylvania institutions and authorized the assessment of civil money penalties of up to \$25,000 under certain circumstances for violations of laws or orders related to the institution or unsafe or unsound practices or breaches of fiduciary duties.

Federal Deposit Insurance

The FDIC currently maintains the Deposit Insurance Fund (the DIF), which was created in 2006 through the merger of the Bank Insurance Fund and the Savings Association Insurance Fund. The deposit accounts of our subsidiary bank are insured by the DIF to the maximum amount provided by law. This insurance is backed by the full faith and credit of the United States Government.

As insurer, the FDIC is authorized to conduct examinations of and to require reporting by DIF-insured institutions. It also may prohibit any DIF-insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious threat to the DIF. The FDIC also has the authority to take enforcement actions against insured institutions.

The FDIC imposes assessments for deposit insurance on an insured institution quarterly according to its ranking in one of four risk categories based upon supervisory and capital evaluations. The assessment rate for an individual institution is determined according to a formula based on a weighted average of the institution's individual CAMELS component ratings plus various financial ratios. Well-capitalized institutions (generally those with CAMELS composite ratings of 1 or 2) are grouped in Risk Category I and their initial base assessment rate for deposit insurance is set at an annual rate of between 5 and 9 basis points of total assets less tangible equity. The initial base assessment rate for institutions in Risk Categories II, III and IV is set at annual rates of 14, 23 and 35 basis points, respectively. These initial base assessment rates are adjusted to determine an institution's final assessment rate based on its brokered deposits and unsecured debt. The adjustments include higher premiums for institutions that rely significantly on excessive amounts of brokered deposits, including CDARS, while providing a reduction for all institutions for their unsecured debt. Total base assessment rates after adjustments range from 2.5 to 9 basis points for Risk Category I, 9 to 24 basis points for Risk Category II, 18 to 33 basis points for Risk Category III, and 30 to 45 basis points for Risk Category IV. This assessment structure represents a change, required by the Dodd-Frank Act and effective April 1, 2011, from the FDIC's prior system, which based assessments on deposits rather than total assets less tangible equity.

Pursuant to the Dodd-Frank Act, the FDIC has established 2.0% as the designated reserve ratio (DRR) of the DIF to insured deposits. The FDIC has adopted a plan under which it will meet the statutory minimum DRR of 1.35% by September 30, 2020, the deadline imposed by the Dodd-Frank Act. The Dodd-Frank Act requires the FDIC to offset the effect on institutions with assets less than \$10 billion of the increase in the statutory minimum DRR to 1.35% from the former statutory minimum of 1.15%. The FDIC has not yet announced how it will implement this offset or how larger institutions will be affected by it.

In addition, all institutions with deposits insured by the FDIC are required to pay assessments to fund interest payments on bonds issued by the Financing Corporation, a mixed-ownership government corporation established to recapitalize a predecessor to the Deposit Insurance Fund. These assessments will continue until the Financing Corporation bonds mature in 2019.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged or is engaging in unsafe and unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or written agreement entered

Table of Contents

into with the FDIC. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Capital Requirements

Under the FDIC's regulations, federally insured state-chartered banks that are not members of the Federal Reserve System (state non-member banks), such as Northwest Savings Bank, are required to comply with minimum leverage capital requirements. For an institution determined by the FDIC to not be anticipating or experiencing significant growth and to be, in general, a strong banking organization rated composite 1 under Uniform Financial Institutions Ranking System established by the Federal Financial Institutions Examination Council, the minimum capital leverage requirement is a ratio of Tier 1 capital to total assets of 3.0%. For all other institutions, the minimum leverage capital ratio is not less than 4.0%. Tier 1 capital is the sum of common stockholder's equity, noncumulative perpetual preferred stock (including any related surplus) and minority investments in certain subsidiaries, less intangible assets (except for certain servicing rights and credit card relationships) and certain other specified items.

In addition, FDIC regulations require state non-member banks to maintain certain ratios of regulatory capital to regulatory risk-weighted assets, or risk-based capital ratios. Risk-based capital ratios are determined by allocating assets and specified off-balance sheet items to four risk-weighted categories ranging from 0.0% to 100.0% (or 200% for certain residual interests in transferred assets). State non-member banks must maintain a minimum ratio of total capital to risk-weighted assets of at least 8.0%, of which at least one-half must be Tier 1 capital. Total capital consists of Tier 1 capital plus Tier 2 or supplementary capital items, which include allowances for loan losses in an amount of up to 1.25% of risk-weighted assets, cumulative preferred stock and certain other capital instruments, and a portion of the net unrealized gain on equity securities. The includable amount of Tier 2 capital cannot exceed the amount of the institution's Tier 1 capital. In assessing an institution's capital adequacy, the FDIC takes into consideration, not only these numeric factors, but also qualitative factors, and has authority to establish higher individual capital requirements for state non-member banks where deemed necessary.

In July 2013, the FDIC and the other federal bank regulatory agencies issued a final rule that will revise their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets) and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance the acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain available-for-sale securities holdings to be included for purposes of calculating regulatory capital requirements unless a one-time opt-in or opt-out is exercised. The rule limits a banking organization's capital distributions and certain discretionary bonus payments to executive officers if the banking organization does not hold a capital conservation buffer consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The final rule also implements the Dodd-Frank Act's directive to apply to savings and loan holding companies consolidated capital requirements that are not less stringent than those applicable to their subsidiary institutions. The final rule is effective January 1, 2015. The capital conservation buffer will be phased in from January 1, 2016 to January 1, 2019, when the full capital conservation buffer will be effective.

Any institution that fails any of the FDIC capital requirements is subject to enforcement action by the FDIC. Such action may include a capital directive, a cease and desist order, civil money penalties, restrictions on an institution's operations, termination of federal deposit insurance, and the appointment of a conservator or receiver. The FDIC's capital regulation provides that such action, through enforcement proceedings or otherwise, may require a variety of corrective measures.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Northwest Savings Bank is also subject to capital guidelines of the Department of Banking. Although not adopted in regulation form, the Department of Banking requires 6% leverage capital and 10% risk-based capital. The components of leverage and risk-based capital are substantially the same as those defined by the FDIC.

The following table shows the Basel III regulatory capital levels that must be maintained to avoid limitations on capital distributions and discretionary bonus payments for the periods indicated:

Table of Contents

	Current	Basel III Regulatory Capital Requirements				
		January 1, 2015	January 1, 2016	January 1, 2017	January 1, 2018	January 1, 2019
Tier 1 common equity ratio plus capital conservation buffer		4.50%	5.125%	5.75%	6.375%	7.00%
Tier 1 risk-based capital ratio	4.00%					
Tier 1 risk-based capital ratio plus capital conservation buffer		6.00%	6.625%	7.25%	7.875%	8.50%
Total risk-based capital ratio	8.00%					
Total risk-based capital ratio plus capital conservation buffer		8.00%	8.625%	9.25%	9.875%	10.50%

Prompt Corrective Action

Under the federal prompt corrective regulations, a bank is considered to be (i) well capitalized if it has total risk-based capital of 10.0% or more, Tier 1 risk-based capital of 6.0% or more, Tier I leverage capital of 5.0% or more, and is not subject to any written capital order or directive; (ii) adequately capitalized if it has total risk-based capital of 8.0% or more, Tier I risk-based capital of 4.0% or more and Tier I leverage capital of 4.0% or more (3.0% under certain circumstances), and does not meet the definition of well capitalized; (iii) undercapitalized if it has total risk-based capital of less than 8.0%, Tier I risk-based capital of less than 4.0% or Tier I leverage capital of less than 4.0% (3.0% under certain circumstances); (iv) significantly undercapitalized if it has total risk-based capital of less than 6.0%, Tier I risk-based capital less than 3.0%, or Tier I leverage capital of less than 3.0%; and (v) critically undercapitalized if its ratio of tangible equity to total assets is equal to or less than 2.0%. Institutions that fall into an undercapitalized category are subject to a variety of mandatory and discretionary supervisory actions, including a restriction on capital distributions and the requirement to file a capital restoration plan with the regulators. Performance under the capital restoration plan must be guaranteed by the parent holding company up to the lesser of the amount of the capital deficiency when deemed undercapitalized or 5% of the institution's total assets. Federal regulations also specify circumstances under which a federal banking agency may reclassify a well capitalized institution as adequately capitalized, and may require an adequately capitalized institution to comply with supervisory actions as if it were in the next lower category (except that the Federal Deposit Insurance Corporation may not reclassify a significantly undercapitalized institution as critically undercapitalized). As of December 31, 2013, Northwest Savings Bank was well-capitalized for this purpose.

The recently proposed rules that would increase regulatory capital requirements would adjust the prompt corrective action categories accordingly.

Loans-to-One Borrower Limitation

In accordance with the Banking Code, a Pennsylvania chartered savings bank, with certain limited exceptions, may lend to a single or related group of borrowers on an unsecured basis an amount equal to 15% of its capital accounts, the aggregate of capital, surplus, undivided profits, capital securities and reserve for loan losses. We have established an internal lending limit, either individually or in the aggregate to one customer, of \$20.0 million. Under certain circumstances; for instance well qualified customers or customers with multiple individually qualified projects, this limit may be exceeded subject to the approval of the Senior Loan Committee. We currently have five credit relationships that equal or exceed our \$20.0 million internal limit.

Activities and Investments of Insured State-Chartered Banks

Federal law generally limits the activities and equity investments of state-chartered banks insured by the FDIC to those that are permissible for national banks. Under regulations dealing with equity investments, an insured state bank generally may not, directly or indirectly, acquire or retain any equity investment of a type, or in an amount, that is not permissible for a national bank. An insured state bank is not prohibited from, among other things: (i) acquiring or retaining a majority interest in a subsidiary; (ii) investing as a limited partner in a partnership the sole purpose of which is direct or indirect investment in the acquisition, rehabilitation, or new construction of a qualified housing project, provided that such limited partnership investments may not exceed 2% of the bank's total assets; (iii) acquiring up to 10% of the voting stock of a company that solely provides or reinsures liability insurance for directors, trustees or officers, or blanket bond group insurance coverage for insured depository institutions; and (iv) acquiring or retaining the voting shares of a depository institution if certain requirements are met. Activities of state banks and their subsidiaries are generally limited to those permissible for national banks. Exceptions include where the bank meets applicable regulatory capital requirements and the FDIC determines that the proposed activity does not pose a significant risk to the deposit insurance fund.

Table of Contents

The USA PATRIOT Act

The USA Patriot Act gives the federal government powers to address terrorist threats through enhanced domestic security measures, expanded surveillance powers, increased information sharing and broadened anti-money laundering requirements. The USA Patriot Act also requires the federal banking agencies to take into consideration the effectiveness of controls designed to combat money-laundering activities in determining whether to approve a merger or other acquisition application of a member institution. Accordingly, if we engage in a merger or other acquisition, our controls designed to combat money laundering would be considered as part of the application process. We have established policies, procedures and systems designed to comply with these regulations.

Holding Company Regulation

General. Federal law allows a state savings bank, such as Northwest Savings Bank, that qualifies as a Qualified Thrift Lender, as discussed below, to elect to be treated as a savings association for purposes of the savings and loan company provisions of the Home Owners Loan Act of 1933, as amended. Such election results in its holding company being regulated as a savings and loan holding company by the Federal Reserve Board rather than as a bank holding company. Northwest Bancshares, Inc. has made such an election. Therefore, Northwest Bancshares, Inc. is a savings and loan holding company within the meaning of the Home Owners Loan Act of 1933, as amended. As such, we are registered as a savings and loan holding company with the Federal Reserve Board and is subject to Federal Reserve Board regulations, examinations, supervision and reporting requirements. In addition, the Federal Reserve Board has enforcement authority over the Company and any non-savings institution subsidiaries of the Company. Among other things, this authority permits the Federal Reserve Board to restrict or prohibit activities that are determined to be a serious risk to the subsidiary savings institution.

Permissible Activities. The business activities of Northwest Bancshares, Inc. are generally limited to those activities permissible for financial holding companies under Section 4(k) of the Bank Holding Company Act of 1956, as amended, or for multiple savings and loan holding companies. A financial holding company may engage in activities that are financial in nature, including underwriting equity securities and insurance as well as activities that are incidental to financial activities or complementary to financial activities. The Dodd-Frank Act specifies that a savings and loan holding company may only engage in financial holding company activities if it meets the qualitative criteria necessary for a bank holding company to engage in such activities. A multiple savings and loan holding company is generally limited to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the Federal Reserve Board, and certain additional activities authorized by Federal Reserve Board regulations.

Federal law prohibits a savings and loan holding company, including Northwest Bancshares, Inc., directly or indirectly, or through one or more subsidiaries, from acquiring more than 5% of another savings institution or holding company thereof, without prior written approval of the Federal Reserve Board. It also prohibits, with certain exceptions, the acquisition or retention of more than 5% of a non-subsidiary company engaged in activities that are not closely related to banking or financial in nature, or acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board must consider the financial and managerial resources, future prospects of the company and institution involved, the effect of the acquisition on the risk to the federal deposit insurance fund, the convenience and needs of the community and competitive factors.

The Federal Reserve Board is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions:

- (i) the approval of interstate supervisory acquisitions by savings and loan holding companies; and
- (ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisition.

The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Qualified Thrift Lender Test. To be regulated as a savings and loan holding company (rather than as a bank holding company), Northwest Savings Bank must qualify as a Qualified Thrift Lender. To qualify as a Qualified Thrift Lender, Northwest Savings Bank must be a domestic building and loan association, as defined in the Internal Revenue Code, or comply with the Qualified Thrift Lender test. Under the Qualified Thrift Lender test, a savings institution is required to maintain at least 65% of its portfolio assets (total assets less: (1) specified liquid

Table of Contents

assets up to 20% of total assets; (2) intangibles, including goodwill; and (3) the value of property used to conduct business) in certain qualified thrift investments (primarily residential mortgages and related investments, including certain mortgage-backed and related securities) in at least nine months out of each 12-month period. As of December 31, 2013, Northwest Savings Bank met the Qualified Thrift Lender test.

Capital Requirements. Savings and loan holding companies have not historically been subjected to consolidated regulatory capital requirements. However, the Dodd-Frank Act requires the Federal Reserve Board to set, for all depository institution holding companies, minimum consolidated capital levels that are as stringent as those required for the insured depository subsidiaries. The previously discussed final rule regarding regulatory capital requirements implements the Dodd-Frank Act as to savings and loan holding companies. Consolidated regulatory capital requirements identical to those applicable to the subsidiary depository institutions will apply to savings and loan holding companies as of January 1, 2015. As is the case with institutions themselves, the capital conservation buffer will be phased in between 2016 and 2019.

Source of Strength/Capital Distributions. The Dodd-Frank Act extended to savings and loan holding companies the Federal Reserve Board's source of strength doctrine, which has long applied to bank holding companies. The Federal Reserve Board has promulgated regulations implementing the source of strength policy, which requires holding companies to act as a source of strength to their subsidiary depository institutions by providing capital, liquidity and other support in times of financial stress.

The Federal Reserve Board has issued a policy statement regarding capital distributions by bank holding companies that it has suggested is applicable to savings and loan holding companies as well. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization's capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory consultation with respect to capital distributions in certain circumstances such as where the company's net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend or the company's overall rate of earnings retention is inconsistent with the company's capital needs and overall financial condition. The ability of a holding company to pay dividends may be restricted if a subsidiary depository institution becomes undercapitalized. These regulatory policies could affect our ability to pay dividends or otherwise engage in capital distributions.

As a subsidiary of a savings and loan holding company, Northwest Savings Bank must notify the Federal Reserve Board thirty days before declaring any dividend to the Company. The dividend notice may be objected to under certain circumstances, such as where the dividend raises safety or soundness concerns, the dividend would cause the savings bank to be undercapitalized or the dividend would violate a law, regulation, regulatory condition or enforcement order.

Federal Securities Laws

Our common stock is registered with the SEC under Section 12(b) of the Securities Exchange Act of 1934, as amended (the Exchange Act). We are also subject to the proxy rules, tender offer rules, insider trading restrictions, annual and periodic reporting, and other requirements of the Exchange Act.

Sarbanes-Oxley Act of 2002

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The Sarbanes-Oxley Act of 2002 was enacted to increase corporate responsibility, to provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies, and to protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws. The Sarbanes-Oxley Act generally applies to all companies that file or are required to file periodic reports with the Securities and Exchange Commission, under the Securities Exchange Act of 1934.

As directed by the Sarbanes-Oxley Act, our Chief Executive Officer and Chief Financial Officer are required to certify that our quarterly and annual reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal control over financial reporting; they have made certain disclosures to our auditors and the audit committee of the board of directors about our internal control over financial reporting; and they have included information in our quarterly and annual reports about their evaluation and whether there have been changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting.

Table of Contents

FEDERAL AND STATE TAXATION

Federal Taxation. For federal income tax purposes, Northwest Bancshares, Inc. files a consolidated federal income tax return with its wholly-owned subsidiaries on a calendar year basis. The applicable federal income tax expense or benefit is properly allocated to each subsidiary based upon taxable income or loss calculated on a separate company basis.

We account for income taxes using the asset and liability method which accounts for deferred income taxes by applying the enacted statutory rates in effect at the balance sheet date to differences between the book basis and the tax basis of assets and liabilities. The resulting deferred tax liabilities and assets are adjusted to reflect changes in tax laws.

State Taxation. As a Maryland business corporation, Northwest Bancshares, Inc. is required to file annual tax returns with the State of Maryland. In addition, Northwest Bancshares, Inc. is subject to Pennsylvania's corporate net income tax and capital stock tax. Dividends received from Northwest Savings Bank qualify for a 100% dividends received deduction and are not subject to corporate net income tax.

Northwest Savings Bank is subject to Pennsylvania's mutual thrift institutions tax based on Northwest Savings Bank's net income determined in accordance with generally accepted accounting principles, with certain adjustments. The tax rate under the mutual thrift institutions tax is 11.5%. Interest on Pennsylvania and federal obligations is excluded from net income. An allocable portion of interest expense incurred to carry the obligations is disallowed as a deduction. Northwest Savings Bank is also subject to taxes in the other states in which it conducts business. These taxes are apportioned based upon the volume of business conducted in those states as a percentage of the whole. Because a majority of Northwest Savings Bank's affairs are conducted in Pennsylvania, taxes paid to other states are not material.

The subsidiaries of Northwest Savings Bank are subject to a Pennsylvania corporate net income tax and a capital stock tax, and are also subject to other applicable taxes in the states where they conduct business.

Table of Contents

ITEM 1A. RISK FACTORS

In addition to factors discussed in the description of our business and elsewhere in this report, the following are factors that could adversely affect our future results of operations and financial condition.

Difficult market conditions have already affected us and our industry and may continue to do so.

Our performance is significantly impacted by the general economic conditions in our primary markets in Pennsylvania, New York, Ohio and Maryland. Our markets have been adversely impacted by the severe national economic recession of 2008 and 2009, and the weak economic recovery has resulted in continued uncertainty in the financial markets and the expectation of weak general economic conditions continuing. These difficult market conditions are likely to result in continued high levels of unemployment, which will further weaken an already distressed economy and could result in additional defaults of mortgage loans.

At December 31, 2013, 75.6% of our loan portfolio was secured by properties located in Pennsylvania, with a large portion of the rest of our loans secured by real estate located in New York, Ohio and Maryland. Negative economic conditions, such as high unemployment, in the markets where collateral for our mortgage loans is located could adversely affect the value of the collateral securing such loans. Declines in the U.S. housing market manifested by falling home prices and increasing foreclosures, as well as unemployment and under-employment, have all negatively impacted the credit performance of mortgage loans and resulted in significant write-downs of asset values by financial institutions. Our business, financial condition and results of operations could be adversely affected by recessionary or impaired recovery conditions that are longer or deeper than expected.

Due to concerns about the stability of the financial markets generally, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including other financial institutions. This tightening of credit and market instability has led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and lack of confidence in the financial markets may adversely affect our business, financial condition and results of operations.

It cannot be known if conditions in the financial markets will improve in the near future. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial industry.

Negative developments in the financial industry and the domestic and international credit markets may adversely affect our operations and results.

Since the latter half of 2007, negative developments in the global credit and securitization markets have resulted in uncertainty in the financial markets and a general economic downturn which has through 2013. The economic downturn has been accompanied by deteriorated loan portfolio quality at many financial institutions. In addition, the value of real estate collateral supporting many home mortgages has declined and may continue to decline. Bank and bank holding company stock prices have been negatively affected, as has the ability of banks and bank

holding companies to raise capital or borrow in the debt markets. These negative developments along with the turmoil and uncertainties that have accompanied them have heavily influenced the formulation and enactment of the Dodd-Frank Act, along with its implications as described elsewhere in this Risk Factors section. In addition to the many future rules and regulations of the Dodd-Frank Act, the potential exists for other new federal or state laws and regulations regarding lending and funding practices and liquidity standards to be enacted. Bank regulatory agencies are expected to continue to be active in responding to concerns and trends identified in examinations. Negative developments in the financial industry and the domestic and international credit markets, and the impact of new legislation in response to those developments, may negatively impact our operations by increasing our costs, restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance. In addition, these risks could affect the value of our loan portfolio as well as the value of our investment portfolio, which would also negatively affect our financial performance.

The Dodd-Frank Act, among other things, eliminated the Office of Thrift Supervision, tightened capital standards, created a new Consumer Financial Protection Bureau and will continue to result in new rules and regulations that are expected to increase our costs of operations.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act , or the Act) is significantly changing the current bank regulatory structure and affecting the lending, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act eliminated our

Table of Contents

former primary federal regulator, the Office of Thrift Supervision, and required savings and loan holding companies, such as the Company, to be regulated and supervised by the Board of Governors of the Federal Reserve Board. The Act also requires the Federal Reserve Board to set minimum capital levels for depository institution holding companies that are at least as stringent as those required for the insured depository subsidiaries, and the components of Tier 1 capital will be restricted to capital instruments that are currently considered to be Tier 1 capital for insured depository institutions. The new capital rules will be effective January 1, 2015.

The Dodd-Frank Act also broadened the base for FDIC insurance assessments. Assessments are now based on the average consolidated total assets less tangible equity capital of a financial institution. In addition, the Act created a new Consumer Financial Protection Bureau with broad powers to supervise and enforce consumer protection laws. The Consumer Financial Protection Bureau has broad rule-making authority for a wide range of consumer protection laws that apply to all banks and savings institutions such as Northwest, including the authority to prohibit unfair, deceptive or abusive acts and practices. The Consumer Financial Protection Bureau has examination and enforcement authority over all banks and savings institutions with more than \$10 billion in assets. Banks and savings institutions with \$10 billion or less in assets are examined by their applicable bank regulators. For additional changes under the Dodd-Frank Act, see *Supervision and Regulation* *Dodd-Frank Wall Street Reform and Consumer Protection Act*.

It is difficult to predict at this time the full impact that the Dodd Frank Act and implementing its regulations will have on community banks, including the lending and credit practices of such banks. Moreover, some of the provisions of the Dodd-Frank Act are not yet in effect, and the legislation requires various federal agencies to promulgate numerous and extensive regulations, some of which are still in process. Although the substance and scope of these regulations cannot be determined at this time, it is expected that the legislation and regulations, particularly those provisions relating to the new Consumer Financial Protection Bureau, may materially increase our operating and compliance costs and could limit our ability to pay dividends.

Changes in laws and regulations and the cost of compliance with new laws and regulations may adversely affect our operations and our income.

The Company and Northwest are subject to extensive regulation, supervision and examination by the Federal Reserve Board, the Department of Banking and the FDIC. These regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the ability to impose restrictions on Northwest's operations, reclassify assets, determine the adequacy of Northwest's allowance for loan losses and determine the level of deposit insurance premiums assessed. Because our business is highly regulated, the laws and applicable regulations are subject to frequent change and interpretations. Any change in these regulations and oversight, whether in the form of regulatory policy, new regulations or legislation or additional deposit insurance premiums could have a material impact on our operations.

In response to the financial crisis, Congress has taken actions that are intended to strengthen confidence and encourage liquidity in financial institutions, and the Federal Deposit Insurance Corporation has taken actions to increase insurance coverage on deposit accounts. In addition, there have been proposals made by members of Congress and others that would reduce the amount delinquent borrowers are otherwise contractually obligated to pay under their mortgage loans and limit an institution's ability to foreclose on mortgage collateral. A number of the largest mortgage lenders in the United States previously voluntarily suspended all foreclosures due to document verification deficiencies.

The potential exists for additional federal or state laws and regulations, or changes in policy, affecting lending and funding practices and liquidity standards. Moreover, bank regulatory agencies have been active in responding to concerns and trends identified in examinations, and have issued many formal enforcement orders requiring capital ratios in excess of regulatory requirements. Bank regulatory agencies, such as the Federal Reserve Board, the Department of Banking, the Consumer Financial Protection Bureau and the FDIC, govern the activities in which we

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

may engage, primarily for the protection of depositors, and not for the protection or benefit of potential investors. In addition, new laws and regulations may increase our costs of regulatory compliance and of doing business, and otherwise affect our operations. New laws and regulations may significantly affect the markets in which we do business, the markets for and value of our loans and investments, the fees we can charge and our ongoing operations, costs and profitability.

Table of Contents

We will become subject to more stringent capital requirements, which may adversely impact our return on equity, require us to raise additional capital, or constrain us from paying dividends or repurchasing shares.

In July 2013, the FDIC and the Federal Reserve Board approved a new rule that will substantially amend the regulatory risk-based capital rules applicable to Northwest. The final rule implements the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act.

The final rule includes new minimum risk-based capital and leverage ratios, which will be effective for Northwest on January 1, 2015, and refines the definition of what constitutes capital for purposes of calculating these ratios. The new minimum capital requirements will be: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 to risk-based assets capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4%. The final rule also establishes a capital conservation buffer of 2.5%, and will result in the following minimum ratios: (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 to risk-based assets capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement would be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase each year until fully implemented in January 2019. An institution will be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations will establish a maximum percentage of eligible retained income that can be utilized for such actions.

The application of more stringent capital requirements for Northwest could, among other things, result in lower returns on equity, require the raising of additional capital, and result in regulatory actions constraining us from paying dividends or repurchasing shares if we were to be unable to comply with such requirements.

The corporate governance provisions in our articles of incorporation and bylaws, and the corporate governance provisions under Maryland law, may prevent or impede the holders of our common stock from obtaining representation on our Board of Directors and may impede takeovers of the company that our board might conclude are not in the best interest of us or our stockholders.

Provisions in our articles of incorporation and bylaws may prevent or impede holders of our common stock from obtaining representation on our Board of Directors and may make takeovers of Northwest Bancshares, Inc. more difficult. For example, our Board of Directors is divided into three staggered classes. A classified board makes it more difficult for stockholders to change a majority of the directors because it generally takes at least two annual elections of directors for this to occur. Our articles of incorporation include a provision that no person will be entitled to vote any shares of our common stock in excess of 10% of our outstanding shares of common stock. This limitation does not apply to the purchase of shares by a tax-qualified employee stock benefit plan established by us. In addition, our articles of incorporation and bylaws restrict who may call special meetings of stockholders and how directors may be removed from office. Additionally, in certain instances, the Maryland General Corporation Law requires a supermajority vote of our stockholders to approve a merger or other business combination with a large stockholder, if the proposed transaction is not approved by a majority of our directors.

Changes in interest rates could adversely affect our results of operations and financial condition.

While we strive to control the impact of changes in interest rates on our net income, our results of operations and financial condition could be significantly affected by changes in interest rates. Our results of operations depend substantially on our net interest income, which is the difference between the interest income we earn on our interest-earning assets, such as loans and investment securities, and the interest expense

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

we pay on our interest-bearing liabilities, such as deposits, borrowings and trust preferred securities. Because it is difficult to perfectly match the maturities and cash flows from our financial assets and liabilities our net income could be adversely impacted by changes in the level of interest rates or the slope of the Treasury yield curve.

Changes in interest rates may also affect the average life of loans and mortgage-related securities. Decreases in interest rates can result in increased prepayments of loans and mortgage-related securities, as borrowers refinance to reduce their borrowing costs. Under these circumstances, we are subject to reinvestment risk to the extent that we are unable to reinvest the cash received from such prepayments at rates that are comparable to the rates on existing loans and investment securities. Additionally, increases in interest rates may decrease loan demand and make it more difficult for borrowers to repay adjustable rate loans. Also, increases in interest rates may extend the life of fixed rate assets, which would restrict our ability to reinvest in higher yielding alternatives, and may result in customers withdrawing certificates of deposit early so long as the early withdrawal penalty is less than the interest they could receive as a result of the higher interest rates.

Table of Contents

Changes in interest rates also affect the current fair value of our interest-earning investment securities portfolio. Generally, the value of securities moves inversely with changes in interest rates. At December 31, 2013, the fair value of our investment and mortgage-backed securities portfolio totaled \$1.141 billion. Net unrealized losses on these securities totaled \$2.6 million at December 31, 2013.

At December 31, 2013, our interest rate risk analysis indicated that the market value of our equity would decrease by 13.4% if there was an instant non-parallel 200 basis point increase in market interest rates. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations Management of Market Risk.

Historically low interest rates may adversely affect our net interest income and profitability.

During the past three years it has been the policy of the Federal Reserve Board to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed and Treasury securities. As a result, market rates on the loans we have originated and the yields on securities we have purchased have been at lower levels than available prior to 2008. As a general matter, our interest-bearing liabilities re-price or mature more quickly than our interest-earning assets, which has been one factor contributing to the increase in our interest rate spread as interest rates decreased. However, our ability to lower our interest expense will be limited at these interest rate levels while the average yield on our interest-earning assets may continue to decrease. The Federal Reserve Board has previously indicated its intention to maintain low interest rates until the unemployment rate is 6.5% or lower. Accordingly, our net interest income may be adversely affected and may even decrease, which may have an adverse effect on our profitability.

We are a community bank and our ability to maintain our reputation is critical to the success of our business and the failure to do so may materially adversely affect our performance.

We are a community bank, and our reputation is one of the most valuable components of our business. A key component of our business strategy is to rely on our reputation for customer service and knowledge of local markets to expand our presence by capturing new business opportunities from existing and prospective customers in our current market and contiguous areas. As such, we strive to conduct our business in a manner that enhances our reputation. This is done, in part, by recruiting, hiring and retaining employees who share our core values of being an integral part of the communities we serve, delivering superior service to our customers and caring about our customers and associates. If our reputation is negatively affected, by the actions of our employees, by our inability to conduct our operations in a manner that is appealing to current or prospective customers, or otherwise, our business and operating results may be adversely affected.

If the allowance for credit losses is not sufficient to cover actual loan losses, our earnings could decrease.

Our customers may not repay their loans according to the original terms, and the collateral, if any, securing the payment of these loans may be insufficient to pay any remaining loan balance. We may experience significant loan losses, which may have a material adverse effect on operating results. We make various assumptions and judgments about the collectability of the loan portfolio, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of loans. If our assumptions prove to be incorrect, the allowance for credit losses may not be sufficient to cover losses inherent in our loan portfolio, resulting in additions to the allowance. Material additions to the allowance would materially decrease net income.

Our emphasis on originating commercial real estate and commercial loans is one of the more significant factors in evaluating the allowance for loan losses. As we continue to increase the amount of such loans, increased provisions for loan losses may be necessary which would decrease our earnings.

Bank regulators periodically review our allowance for loan losses and may require an increase to the provision for loan losses or further loan charge-offs. Any increase in our allowance for loan losses or loan charge-offs as required by these regulatory authorities may have a material adverse effect on our results of operations or financial condition.

Table of Contents

We could record future losses on our investment securities portfolio.

During the year ended December 31, 2013, we recognized \$713,000 of impairment losses on investment securities. These impairment losses were on pooled trust preferred investments and were the result of the Volcker Rule discussed on page 11.

A number of factors or combinations of factors could require us to conclude in one or more future reporting periods that an unrealized loss that exists with respect to these and other securities constitutes an impairment that is other-than-temporary, which could result in material losses to us. These factors include, but are not limited to, failure by the issuer to make scheduled interest payments, an increase in the severity of the unrealized loss on a particular security, an increase in the continuous duration of the unrealized loss without an improvement in value or changes in market conditions and/or industry or issuer specific factors that would render us unable to forecast a full recovery in value. In addition, the fair values of securities could decline if the overall economy and the financial condition of some of the issuers continues to deteriorate and there remains limited liquidity for these securities.

See Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Balance Sheet Analysis Securities for a discussion of our securities portfolio and the unrealized losses related to the portfolio, as well as the Marketable Securities and Disclosures about Fair Value of Financial Instruments footnotes to the audited financial statements.

A decrease in the Federal Reserve Board's bond purchasing program may adversely affect our mortgage banking revenues.

The Federal Reserve Board has undertaken an unprecedented bond purchase program, known as quantitative easing. This program is designed to keep market interest rates low and encourage growth. A decrease in the Federal Reserve Board's bond repurchase program would likely cause an increase in market interest rates, which may reduce our loan originations by our mortgage banking subsidiary.

Proposed and final regulations could restrict our ability to originate and sell loans.

The Consumer Financial Protection Bureau has issued a rule designed to clarify for lenders how they can avoid legal liability under the Dodd-Frank Act, which would hold lenders accountable for ensuring a borrower's ability to repay a mortgage. Loans that meet this qualified mortgage definition will be presumed to have complied with the new ability-to-repay standard. Under the Consumer Financial Protection Bureau's rule, a qualified mortgage loan must not contain certain specified features, including:

- excessive upfront points and fees (those exceeding 3% of the total loan amount, less bona fide discount points for prime loans);
- interest-only payments;
- negative-amortization; and

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

- terms longer than 30 years.

Also, to meet the definition of a qualified mortgage, a borrower's total monthly debt-to-income ratio may not exceed 43%. Lenders must also verify and document the income and financial resources relied upon to qualify the borrower for the loan and underwrite the loan based on a fully amortizing payment schedule and maximum interest rate during the first five years, taking into account all applicable taxes, insurance and assessments. The Consumer Financial Protection Bureau's rule on qualified mortgages could limit our ability or desire to make certain types of loans or loans to certain borrowers, or could make it more expensive/and or time consuming to make these loans, which could limit our growth or profitability.

In addition, the Dodd-Frank Act requires the regulatory agencies to issue regulations that require securitizers of loans to retain not less than 5% of the credit risk for any asset that is not a qualified residential mortgage. The regulatory agencies have issued a proposed rule to implement this requirement. The Dodd-Frank Act provides that the definition of qualified residential mortgage can be no broader than the definition of qualified mortgage issued by the Consumer Financial Protection Bureau for purposes of its regulations (as described above). Although the final rule with respect to the retention of credit risk has not yet been issued, the final rule could have a significant effect on the secondary market for loans and the types of loans we originate, and restrict our ability to make loans.

Table of Contents

We hold certain intangible assets that could be classified as impaired in the future. If these assets are considered to be either partially or fully impaired in the future, the book values of these assets would have to be written-down and the amount of the write-down would decrease earnings.

We are required to test our goodwill and other identifiable intangible assets for impairment on an annual basis and more regularly if indicators of impairment exist. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities and information concerning the terminal valuation of similar insured depository institutions. Future impairment testing may result in a partial or full impairment of the value of our goodwill or other identifiable intangible assets, or both. If an impairment determination is made in a future reporting period, our earnings and the book value of these intangible assets will be reduced by the amount of the impairment. However, the recording of such an impairment loss would have no impact on the tangible book value of our shares of common stock or our regulatory capital levels.

Strong competition may limit growth and profitability.

Competition in the banking and financial services industry is intense. We compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Many of these competitors (whether regional or national institutions) have substantially greater resources and lending limits than we have and may offer certain services that we do not or cannot provide. In addition, some have competitive advantages such as the credit union exemption from paying Federal income tax. Our profitability depends upon our ability to successfully compete in our market areas.

Future legislative or regulatory actions responding to perceived financial and market problems could impair our ability to foreclose on collateral.

There have been proposals made by members of Congress and others that would reduce the amount distressed borrowers are otherwise contractually obligated to pay under their mortgage loans and limit an institution's ability to foreclose on mortgage collateral. Were proposals such as these, or other proposals limiting our rights as a creditor, to be implemented, we could experience increased credit losses or increased expense in pursuing our remedies as a creditor.

Our exposure to municipalities may lead to operating losses.

Our municipal bond portfolio may be impacted by the effects of economic stress on state and local governments. At December 31, 2013, we had \$161.9 million invested in debt obligations of states, municipalities and political subdivisions (collectively referred to as our municipal bond portfolio). We also had \$138.2 million of loans outstanding to municipalities and political subdivisions. Widespread concern currently exists regarding the stress on state and local governments emanating from: (i) declining revenues; (ii) large unfunded liabilities to government workers; and (iii) entrenched cost structures. Debt-to-gross domestic product ratios for the majority of states have been deteriorating due to, among other factors: (i) declines in federal monetary assistance provided as the United States is currently experiencing the largest deficit in its history; and (ii) lower levels of sales and property tax revenue as unemployment remains elevated and the housing market continues to remain unstable. This concern has led to speculation about the potential for a significant deterioration in the municipal bond market, which could materially affect our results of operations, financial condition and liquidity. We may not be able to mitigate the exposure in our municipal portfolio if state and local

governments are unable to fulfill their obligations. The risk of widespread issuer defaults may also increase if there are changes in legislation that permit states, or additional municipalities and political subdivisions, to file for bankruptcy protection or if there are judicial interpretations that, in a bankruptcy or other proceeding, lessen the value of any structural protections.

Risks associated with system failures, interruptions, or breaches of security could negatively affect our earnings.

Information technology systems are critical to our business. We use various technology systems to manage our customer relationships, general ledger, deposits, and loans. We have established policies and procedures to prevent or limit the impact of system failures, interruptions, and security breaches, but such events may still occur or may not be adequately addressed if they do occur. In addition, any compromise of our systems could deter customers from using our products and services. Although we rely on security systems to provide security and

Table of Contents

authentication necessary to effect the secure transmission of data, these precautions may not protect our systems from compromises or breaches of security.

In addition, we outsource a majority of our data processing to certain third-party providers. If these third-party providers encounter difficulties, or if we have difficulty communicating with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely affected. Threats to information security also exist in the processing of customer information through various other vendors and their personnel.

The occurrence of any system failures, interruption, or breach of security could damage our reputation and result in a loss of customers and business, could subject us to additional regulatory scrutiny, or could expose us to litigation and possible financial liability. Any of these events could have a material adverse effect on our financial condition and results of operations.

Our risk management framework may not be effective in mitigating risk and reducing the potential for significant losses.

Our risk management framework is designed to minimize risk and loss to us. We seek to identify, measure, monitor, report and control our exposure to risk, including strategic, market, liquidity, credit, interest rate, compliance and operational risks. While we use a broad and diversified set of risk monitoring and mitigation techniques, these techniques are inherently limited because they cannot anticipate the existence or future development of currently unanticipated or unknown risks. Recent economic conditions and heightened legislative and regulatory scrutiny of the financial services industry, among other developments, have increased our level of risk. Accordingly, we could suffer losses as a result of our failure to properly anticipate and manage these risks.

If we are required to repurchase mortgage loans that we have previously sold, it would negatively affect our earnings.

One of our sources of non-interest income is our mortgage banking, which involves originating residential mortgage loans for sale in the secondary market under agreements that contain representations and warranties related to, among other things, the origination and characteristics of the mortgage loans. We may be required to repurchase mortgage loans that we have sold in cases of borrower default or breaches of these representations and warranties. If we are required to repurchase mortgage loans or provide indemnification or other recourse, this could increase our costs and thereby affect our future earnings. During 2013 we have experienced more frequent disputes and repurchase demands from these buyers.

Acquisitions may disrupt our business and dilute stockholder value.

We regularly evaluate merger and acquisition opportunities with other financial institutions and financial services companies. As a result, negotiations may take place and future mergers or acquisitions involving cash, debt, or equity securities may occur at any time. We would seek acquisition partners that offer us either significant market presence or the potential to expand our market footprint and improve profitability through economies of scale or expanded services.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Acquiring other banks, businesses, or branches may have an adverse effect on our financial results and may involve various other risks commonly associated with acquisitions, including, among other things:

- difficulty in estimating the value of the target company;
- payment of a premium over book and market values that may dilute our tangible book value and earnings per share in the short and long term;
- potential exposure to unknown or contingent liabilities of the target company;
- exposure to potential asset quality problems of the target company;
- potential volatility in reported income associated with goodwill impairment losses;
- difficulty and expense of integrating the operations and personnel of the target company;
- inability to realize the expected revenue increases, cost savings, increases in geographic or product presence, and/or other projected benefits;
- potential disruption to our business;
- potential diversion of our management's time and attention;
- the possible loss of key employees and customers of the target company; and

Table of Contents

- potential changes in banking or tax laws or regulations that may affect the target company.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

As of December 31, 2013, we conducted our business through our main office located in Warren, Pennsylvania, 130 other full-service offices and seven free-standing drive-up locations throughout our market area in central and western Pennsylvania, 19 offices in western New York, four offices in eastern Ohio and four offices in Maryland. Northwest Bancshares, Inc. and its wholly-owned subsidiaries also operated 50 consumer finance offices located throughout Pennsylvania. At December 31, 2013, our premises and equipment had an aggregate net book value of approximately \$146.1 million.

ITEM 3. LEGAL PROCEEDINGS

Northwest Bancshares, Inc. and its subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on our results of operations. See note 18 in the notes to the Consolidated Financial Statements on page 118.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

Our common stock is listed on the Nasdaq Global Select Market under the symbol NWBI. As of February 14, 2014, we had 23 registered market makers, 13,941 stockholders of record (excluding the number of persons or entities holding stock in street name through various brokerage firms), and 94,395,060 shares outstanding. The following table sets forth market price and dividend information for our common stock.

Year Ended		High		Low	Cash Dividends
December 31, 2013					Declared
First Quarter	\$	12.95	\$	12.04	\$ 0.00
Second Quarter	\$	13.58	\$	11.98	\$ 0.24
Third Quarter	\$	14.57	\$	12.88	\$ 0.13
Fourth Quarter	\$	15.05	\$	13.15	\$ 0.13

Year Ended		High		Low	Cash Dividends
December 31, 2012					Declared
First Quarter	\$	13.08	\$	12.14	\$ 0.12
Second Quarter	\$	13.00	\$	11.03	\$ 0.12
Third Quarter	\$	12.70	\$	11.22	\$ 0.12
Fourth Quarter	\$	12.50	\$	11.11	\$ 0.24

Payment of dividends on our shares of common stock is subject to determination and declaration by the Board of Directors and will depend upon a number of factors, including capital requirements, regulatory limitations on the payment of dividends, our results of operations and financial condition, tax considerations and general economic conditions. No assurance can be given that dividends will continue to be declared or, if declared, what the amount of dividends will be. See Supervision and Regulation Holding Company Regulation Source of Strength/Capital Distributions for additional information regarding our ability to pay dividends.

There were no sales of unregistered securities during the quarter ended December 31, 2013.

The following tables disclose information regarding repurchases of shares of common stock during the quarter ended December 31, 2013, and includes the repurchase programs announced on September 26, 2011 and December 13, 2012. The repurchase programs are for approximately 4,750,000 and 5,000,000 shares, respectively, and do not have expiration dates.

Stock Performance Graph

Set forth hereunder is a stock performance graph comparing (a) the cumulative total return on our Common Stock between December 31, 2008 and December 31, 2013, adjusted to reflect the 2.25-for-one stock split in connection with the mutual-to-stock conversion of Northwest Bancorp, MHC on December 18, 2009, (b) the cumulative total return on stocks included in the Total Return Index for the Nasdaq Stock Market (US) over such period, and (c) the cumulative total return on stocks included in the Nasdaq Bank Index over such period. Cumulative return assumes the reinvestment of dividends, and is expressed in dollars based on an assumed investment of \$100.

There can be no assurance that our stock performance will continue in the future with the same or similar trend depicted in the graph. We will not make or endorse any predictions as to future stock performance.

**ITEM 7.
OF OPERATIONS**

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS

Overview

Our principal business consists of attracting deposits and making loans secured by various types of collateral, including real estate and other assets in the markets in which we operate. Attracting and maintaining deposits is affected by a number of factors, including interest rates paid on competing investments offered by other financial and non-financial institutions, account maturities, fee structures, and levels of personal income and savings. Lending activities are affected by the demand for funds and thus are influenced by interest rates, the number and quality of lenders and regional economic conditions. Sources of funds for lending activities include deposits, borrowings, repayments on loans, cash flows from investment and mortgage-backed securities and income provided from operations.

Our earnings depend primarily on our level of net interest income, which is the difference between interest earned on our interest-earning assets, consisting primarily of loans and investment securities, and the interest paid on interest-bearing liabilities, consisting primarily of deposits, borrowed funds, and trust-preferred securities. Net interest income is a function of our interest rate spread, which is the difference between the average yield earned on our interest-earning assets and the average rate paid on our interest-bearing liabilities, as well as a function of the average balance of interest-earning assets compared to the average balance of interest-bearing liabilities. Also contributing to our earnings is noninterest income, which consists primarily of service charges and fees on loan and deposit products and services, fees related to insurance and investment management and trust services, and net gains and losses on the sale of assets. Net interest income and noninterest income are offset by provisions for loan losses, general administrative and other expenses, including employee compensation and benefits and occupancy and equipment costs, as well as by state and federal income tax expense.

Our net income was \$66.7 million, or \$0.73 per diluted share, for the year ended December 31, 2013 compared to \$63.6 million, or \$0.68 per diluted share, for the year ended December 31, 2012 and \$64.2 million, or \$0.64 per diluted share, for the year ended December 31, 2011. The loan loss provision was \$18.5 million for the year ended December 31, 2013 compared to \$26.3 million for the year ended December 31, 2012 and \$34.2 million for the year ended December 31, 2011. We recorded other-than-temporary impairment losses on securities, which were reflected as a reduction of noninterest income, of \$713,000, \$331,000 and \$937,000 for the years ended December 31, 2013, 2012 and 2011, respectively.

Other than our loans for the construction of one-to-four-family residential mortgage loans, we do not solicit interest only mortgage loans on one-to-four-family residential properties (where the borrower pays interest for an initial period, after which the loan converts to a fully amortizing loan). We also do not offer loans that provide for negative amortization of principal, such as Option ARM loans, where the borrower can pay less than the interest owed on the loan, resulting in an increased principal balance during the life of the loan. We do not directly solicit subprime loans (loans that generally target borrowers with FICO scores of less than 660) or Alt-A loans (traditionally defined as loans having less than full documentation). However, a portion of the loans originated by one of our subsidiaries, Northwest Consumer Discount Company (NCDC), consists of loans to persons with credit scores that would cause such loans to be considered subprime. NCDC has been in operation for over 25 years and has 50 offices throughout Pennsylvania. NCDC offers a variety of consumer loans for automobiles, appliances and furniture as well as residential mortgage loans. At December 31, 2013, NCDC's total loan portfolio was approximately \$106.5 million with an average loan size of \$4,139, an average FICO score of 621 and an average yield of approximately 18.0%. NCDC's total delinquency is approximately 4.9% of outstanding loans, with loans delinquent for 90 days or more at 1.7% of loans outstanding. Annual net charge-offs average approximately \$3.3 million, or 3.1% of outstanding loans, and it maintains an allowance for loan losses of \$5.5 million, or 5.1% of loans. Although loans originated through NCDC have higher average rates of delinquency and charge-offs than similar loans originated directly by Northwest Savings Bank, management believes that the higher yields on loans originated through NCDC compensate for the incremental credit risk exposure.

Critical Accounting Policies

Certain accounting policies are important to the understanding of our financial condition, since they require management to make difficult, complex or subjective judgments, some of which may relate to matters that are inherently uncertain. Estimates associated with these policies are susceptible to material changes as a result of changes in facts and circumstances, including, but without limitation, changes in interest rates, performance of the economy, financial condition of borrowers and laws and regulations. The following are the accounting policies we believe are critical.

Table of Contents

Allowance for Loan Losses. We recognize that losses will be experienced on loans and that the risk of loss varies with the type of loan, the creditworthiness of the borrower, general economic conditions and the quality of the collateral for the loan. We maintain an allowance for losses inherent in the loan portfolio. The allowance for loan losses represents management's estimate of probable losses based on all available information. The allowance for loan losses is based on management's evaluation of the collectability of the loan portfolio, including past loan loss experience, known and inherent losses, information about specific borrower situations, estimated collateral values, and current economic conditions. The loan portfolio is reviewed regularly by management in its determination of the allowance for loan losses. The methodology for assessing the appropriateness of the allowance includes a review of historical losses, peer group comparisons, industry data and economic conditions. As an integral part of their examination process, regulatory agencies periodically review our allowance for loan losses and may require us to make additional provisions for estimated losses based upon judgments different from those of management. In establishing the allowance for loan losses, loss factors are applied to various pools of outstanding loans. Loss factors are derived using our historical loss experience and may be adjusted for factors that affect the collectability of the portfolio as of the evaluation date. Commercial loans over \$1.0 million that are criticized are evaluated individually to determine the required allowance for loan losses and to evaluate the potential impairment. Although management believes that it uses the best information available to establish the allowance for loan losses, future adjustments to the allowance for loan losses may be necessary and results of operations could be adversely affected if circumstances differ substantially from the assumptions used in making the determinations. Because future events affecting borrowers and collateral cannot be predicted with certainty, there can be no assurance that the existing allowance for loan losses is adequate or that increases will not be necessary should the quality of loans deteriorate as a result of the factors discussed previously. Any material increase in the allowance for loan losses may adversely affect our financial condition and results of operations. The allowance is based on information known at the time of the review. Changes in factors underlying the assessment could have a material impact on the amount of the allowance that is necessary and the amount of provision to be charged against earnings. Such changes could impact future results. For further information related to our allowance for loan losses, see note 1(f) of the notes to the Consolidated Financial Statements on page 69.

Valuation of Investment Securities. Our investment securities are classified as either held-to-maturity or available-for-sale. Held-to-maturity securities are carried at amortized cost, while available-for-sale securities are carried at fair value. Unrealized gains or losses on available-for-sale securities, net of deferred taxes, are reported in other comprehensive income. Fair values are determined as described in note 15 of the notes to the Consolidated Financial Statements on page 110. Semi-annually (at May 31 and November 30), we validate the prices received from these third parties by comparing them to prices provided by a different independent pricing service. We have reviewed the detailed valuation methodologies provided to us by our pricing services. Additional information related to our investment securities can be found in note 1(d) of the notes to the Consolidated Financial Statements on page 68.

We conduct a quarterly review and evaluation of all investment securities to determine if any declines in fair value are other than temporary. In making this determination, we consider the period of time the securities have been in an unrealized loss position, the percentage decline in comparison to the securities' amortized cost, the financial condition of the issuer, if applicable, and the delinquency or default rates of underlying collateral. We consider our intent to sell the investment securities evaluated and the likelihood that we will not have to sell the investment securities before recovery of their cost basis. If impairment exists, credit related impairment losses are recorded in earnings while noncredit related impairment losses are recorded in accumulated other comprehensive income, net of income taxes. Any future deterioration in the fair value of an investment security, or the determination that the existing unrealized loss of an investment security is other-than-temporary, may have a material adverse affect on future earnings.

Goodwill. Goodwill is not subject to amortization but must be tested for impairment at least annually, and possibly more frequently if certain events or changes in circumstances arise. Impairment testing requires that the fair value of each reporting unit be compared to its carrying amount, including goodwill. Reporting units are identified based upon analyzing each of our individual operating segments. A reporting unit is defined as any distinct, separately identifiable component of an operating segment for which complete, discrete financial information is available that management regularly reviews. Goodwill is allocated to the carrying value of each reporting unit based on its relative fair value at the time it is acquired. Determining the fair value of a reporting unit requires a high degree of subjective management judgment. With the assistance of an independent third party, we evaluate goodwill for possible impairment using four valuation methodologies including a public market peers

Table of Contents

approach, a comparable transactions approach, a control premium approach and a discounted cash flow approach. Future changes in the economic environment or the operations of the reporting units could cause changes to these variables, which could give rise to declines in the estimated fair value of the reporting unit. Declines in fair value could result in impairment being identified. We have established June 30 of each year as the date for conducting our annual goodwill impairment assessment. Quarterly, we evaluate if there are any triggering events that would require an update to our previous assessment. The variables are selected as of June 30th and the valuation model is run to determine the fair value of each reporting unit. We did not identify any individual reporting unit where the fair value was less than the carrying value.

Deferred Income Taxes. We use the asset and liability method of accounting for income taxes. Using this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on an ongoing basis as regulatory and business factors change. A reduction in estimated future taxable income could require us to record a valuation allowance. Changes in levels of valuation allowances could result in increased income tax expense, and could negatively affect earnings.

Pension Benefits. Pension expense and obligations are dependent on assumptions used in calculating such amounts. These assumptions include discount rates, anticipated salary increases, interest costs, expected return on plan assets, mortality rates, and other factors. In accordance with U.S. generally accepted accounting principles, actual results that differ from the assumptions are amortized over average future service and, therefore, generally affect recognized expense. While management believes that the assumptions used are appropriate, differences in actual experience or changes in assumptions may affect our pension obligations and future expense.

In determining the projected benefit obligations for pension benefits at December 31, 2013 and 2012, we used a discount rate of 4.86% and 4.06%, respectively. We use the Citigroup Pension Liability Index rates matching the duration of our benefit payments as of the measurement date to determine the discount rate. Our measurement date is December 31.

Table of Contents

Balance Sheet Analysis

Assets. Total assets at December 31, 2013 were \$7.881 billion, a decrease of \$61.1 million, or 0.8%, from \$7.943 billion at December 31, 2012. This decrease in assets was primarily caused by a decrease in our marketable securities portfolio of \$96.0 million, or 7.8%, to \$1.138 billion at December 31, 2013 from \$1.234 billion at December 31, 2012.

Cash. Total cash decreased by \$59.8 million, or 13.2%, to \$391.9 million at December 31, 2013, from \$451.7 million at December 31, 2012. This decrease was a result of using cash to fund an increase in net loans receivable of \$105.7 million and a net deposit decrease of \$95.7 million.

Investment securities. Investment securities decreased by \$96.0 million, or 7.8%, to \$1.138 billion at December 31, 2013 from \$1.234 billion at December 31, 2012. This decrease was a result of using the cash flow generated from these portfolios to fund loan growth and deposit outflow instead of reinvesting in investment securities. During the year ended December 31, 2013, we recognized other-than-temporary credit related impairment charges of \$713,000 on two pooled trust preferred securities.

The following table sets forth certain information regarding the amortized cost and fair value of our available-for-sale investment securities portfolio and mortgage-backed securities portfolio at the dates indicated.

Table of Contents

Loans receivable. Net loans receivable increased by \$105.7 million, or 1.9%, to \$5.735 billion at December 31, 2013, from \$5.629 billion at December 31, 2012. During 2013 personal banking loans increased by \$67.6 million, or 1.8%, compared to last year. This increase occurred primarily in our residential mortgage loan portfolio, which increased by \$67.4 million, or 2.8%, as a result of retaining most of the loan originations by our wholesale lending operations in the current year which had been previously sold into the secondary markets in prior years. Our efforts to expand beyond traditional residential mortgage lending continued to produce results as our commercial banking loan portfolio increased by \$36.2 million, or 1.8%, to \$2.011 billion at December 31, 2013 from \$1.975 billion at December 31, 2012. Commercial real estate loans increased by \$22.6 million, or 1.4%, and commercial loans increased by \$13.6 million, or 3.5%, compared to the prior year.

Loans 30 days or more delinquent decreased by 141 loans and \$25.8 million, or 16.4%, to 3,501 loans totaling \$131.6 million at December 31, 2013 from 3,642 loans totaling \$157.4 million at December 31, 2012. Delinquencies for all classes of loans with the exception of home equity loans decreased during the year ended December 31, 2013. Delinquencies on residential mortgage loans decreased by \$6.9 million, or 10.4%, delinquencies on other consumer loans decreased by \$784,000, or 8.5%, delinquencies on commercial real estate loans decreased by \$11.3 million, or 26.8%, and delinquencies on commercial loans decreased by \$7.4 million, or 32.9%, while delinquencies on home equity loans increased by \$543,000, or 3.2%. Loans 90 days or more delinquent decreased by \$10.5 million, or 15.5%, to \$57.8 million at December 31, 2013 from \$68.3 million at December 31, 2012. This represents the lowest level of loans 90 or more days delinquent since the economic downturn began in 2008.

The following table sets forth the recorded investment in loans receivable by state (based on borrowers' domicile) at December 31, 2013.

Table of Contents

The following table sets forth the maturity or period of re-pricing of our loan portfolio at December 31, 2013. Demand loans and loans having no stated schedule of repayments and no stated maturity are reported as due in one year or less. Adjustable and floating-rate loans are included in the period in which interest rates are next scheduled to adjust rather than in which they contractually mature, and fixed-rate loans are included in the period in which the final contractual repayment is due.

At December 31, 2013 (In thousands)	Due in one year or less	Due after one year through two years	Due after two year through three years	Due after three year through five years	Due after five years	Total

Table of Contents

Deposits. Total deposits decreased by \$95.7 million, or 1.7%, to \$5.669 billion at December 31, 2013 from \$5.765 billion at December 31, 2012. Certificates of deposit decreased by \$218.7 million, or 11.6%, to \$1.667 billion at December 31, 2013 from \$1.886 billion at December 31, 2012 as customers continue to favor more liquid accounts and to utilize savings to fund living expenses. Checking accounts increased by \$34.7 million, or 2.2%, to \$1.642 billion at December 31, 2013 from \$1.607 billion at December 31, 2012. Savings and money market accounts increased by \$88.2 million, 3.9%, to \$2.360 billion at December 31, 2013 from \$2.271 billion at December 31, 2012. The increase in checking, savings and money market accounts are a result of customers allowing maturing certificates of deposit to flow into these accounts.

The following table sets forth the dollar amount of deposits in each state indicated as of December 31, 2013.

State	Balance (Dollars in thousands)	Percent
Pennsylvania	\$ 4,713,624	83.2%

(1) Represents percentage of total deposits.

(2) Represents weighted average nominal rate at year end.

Table of Contents

Borrowings. Borrowings increased by \$21.6 million, or 2.5%, to \$881.6 million at December 31, 2013 from \$860.0 million at December 31, 2012. This increase resulted primarily from funds totaling \$30.0 million with a weighted effective interest rate of 2.03% and maturities between seven and ten years being borrowed from the FHLB of Pittsburgh. Partially offsetting this increase was a decrease in reverse repurchase agreements of \$8.3 million during 2013. During 2010, we restructured \$695.0 million of FHLB borrowings reducing the annual interest cost by 0.22%, while extending the average maturities of these borrowings by approximately 3.5 years. We incurred a penalty of \$52.2 million in conjunction with this restructuring, which is being amortized as part of interest expense over the life of the borrowings. At December 31, 2013 the remaining amount to be amortized was \$28.7 million. Our next scheduled maturity of FHLB borrowings is in 2015.

The following table sets forth information concerning our borrowings at the dates and for the periods indicated.

	2013	During the years ended December 31,		2011
		2012		
		(Dollars in thousands)		
Federal Home Loan Bank of Pittsburgh borrowings:				
Average balance outstanding	\$	718,559	695,551	700,928
Maximum outstanding at end of any month during year		725,493	695,579	705,645
Balance outstanding at end of year		725,447	695,516	695,585
Weighted average interest rate during year		3.61%	3.67%	3.67%
Weighted average interest rate at end of year		3.60%	3.67%	3.67%
Reverse repurchase agreements:				
Average balance outstanding	\$	150,079	154,620	140,820
Maximum outstanding at end of any month during year		171,815	176,516	151,831
Balance outstanding at end of year		156,198	164,531	132,340
Weighted average interest rate during year		0.31%	0.34%	0.58%
Weighted average interest rate at end of year		0.31%	0.32%	0.35%
Total borrowings:				
Average balance outstanding	\$	868,638	850,171	841,748
Maximum outstanding at end of any month during year		897,268	872,040	847,449
Balance outstanding at end of year		881,645	860,047	827,925
Weighted average interest rate during year		3.04%	3.07%	3.13%
Weighted average interest rate at end of year		3.02%	3.03%	3.13%

Shareholders equity. Total shareholders equity at December 31, 2013 was \$1.157 billion, an increase of \$28.3 million, or 2.5%, from \$1.128 billion at December 31, 2012. This increase was primarily the result of net income of \$66.7 million. Partially offsetting this increase was the payment of cash dividends of \$45.9 million and the repurchase of 368,800 shares of common stock for \$4.5 million.

Average Balance Sheets

The following tables set forth average balance sheets, average yields and costs, and certain other information at and for the periods indicated. All average balances are daily average balances. Non-accrual loans are included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields set forth below include the effect of deferred fees and discounts and premiums that are amortized or accreted to interest income or expense. The average yield for loans receivable and investment securities are calculated on a fully-taxable equivalent basis.

-
- (1) Average gross loans receivable includes loans held as available-for-sale and loans placed on nonaccrual status.
 - (2) Interest income includes accretion/amortization of deferred loan fees/expenses, which was not material.
 - (3) Interest income on tax-free loans is presented on a taxable equivalent basis including adjustments as indicated.
 - (4) Interest income on tax-free investment securities is presented on a taxable equivalent basis including adjustments as indicated.
 - (5) Average balances do not include the effect of unrealized gains or losses on securities held as available-for-sale.
 - (6) Average balances include the effect of unrealized gains or losses on securities held as available-for-sale.
 - (7) Average balances include Federal Home Loan Bank advances and securities sold under agreements to repurchase.
 - (8) Net interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
 - (9) Net interest margin represents net interest income as a percentage of average interest-earning assets.
 - (10) Shown on a FTE basis. GAAP basis yields were: Loans 5.06%, 5.45% and 5.81%, respectively, Investment securities 2.28%, 3.24% and 3.63%, respectively, interest-earning assets 4.26%, 4.55% and 4.80%, respectively, GAAP basis net interest rate spreads were 3.23%, 3.30% and 3.28%, respectively, and GAAP basis net interest margins were 3.43%, 3.54% and 3.56%, respectively.

Table of Contents**Rate/Volume Analysis**

The following table presents the changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities for the year ended December 31, 2013 compared to 2012 and for the year ended December 31, 2012 compared to 2011. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to: (1) changes in volume multiplied by the prior year rate; (2) changes in rate multiplied by the prior year volume; and (3) the total increase or decrease. Changes not solely attributable to rate or volume have been allocated proportionately to the change due to volume and the change due to rate.

Comparison of Results of Operations for the Years Ended December 31, 2013 and 2012

General. Net income for the year ended December 31, 2013 was \$66.7 million, or \$0.73 per diluted share, an increase of \$3.1 million, or 5.0%, from \$63.6 million, or \$0.68 per diluted share, for the year ended December 31, 2012. The increase in net income resulted primarily from an increase in noninterest income of \$7.9 million and a decrease in provision for loan losses of \$7.8 million. These items were partially offset by a decrease in net interest income of \$11.0 million and an increase in noninterest expense of \$1.7 million. A discussion of each significant change follows.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Net income for the year ended December 31, 2013 represents a 5.88% and 0.84% return on average equity and return on average assets, respectively, compared to 5.48% and 0.79% for the year ended December 31, 2012.

Interest income. Interest income decreased by \$25.0 million, or 7.4%, to \$313.0 million for the year ended December 31, 2013 from \$338.0 million for the year ended December 31, 2012. The decrease in interest income was due both to a decrease in the average balance of interest-earning assets and a decrease in the average yield on interest-earning assets. The average balance of interest-earning assets decreased by \$71.7 million, or 1.0%, to \$7.359 billion for the year ended December 31, 2013 from \$7.431 billion for the year ended December 31, 2012. The average rate earned on interest-earnings assets decreased by 29 basis points, to 4.26% for the year ended December 31, 2013 from 4.55% for the year ended December 31, 2012. An explanation of the changes in the balances of interest-earnings assets and changes in the yield is discussed in each category below.

Interest income on loans receivable decreased by \$21.0 million, or 6.8%, to \$287.3 million for the year ended December 31, 2013 from \$308.3 million for the year ended December 31, 2012. This decrease was attributable to a decrease in the average yield, which was partially offset by an increase in the average balance of loans receivable. The average yield on loans receivable decreased by 39 basis points, to 5.06% for the year ended

Table of Contents

December 31, 2013, from 5.45% for the year ended December 31, 2012. This decrease is primarily due to the re-pricing of variable rate loans, the refinancing of existing loans to lower market interest rates and the origination of new loans in the continued low and highly competitive interest rate environment. Average loans receivable increased by \$27.3 million, or 0.5%, to \$5.682 billion for the year ended December 31, 2013 from \$5.655 billion for the year ended December 31, 2012. This increase was primarily attributable to our efforts in attracting and maintaining quality business loan relationships, as well as our decision not to sell residential mortgage loans originated through our wholesale lending division into the secondary markets.

Interest income on mortgage-backed securities decreased by \$3.9 million, or 23.4%, to \$12.8 million for the year ended December 31, 2013 from \$16.7 million for the year ended December 31, 2012. This decrease was attributable to decreases in both the average yield and the average balance of mortgage-backed securities. The average yield on mortgage-backed securities decreased by 44 basis points, to 1.83% for the year ended December 31, 2013, from 2.27% for the year ended December 31, 2012. This decrease in yield resulted from the continuation of historically low market interest rates which caused a decrease in the rates on our variable rate securities and lower relative yields on the securities that were purchased during the year. The average balance of mortgage-backed securities decreased by \$35.3 million, or 4.8%, to \$701.6 million for the year ended December 31, 2013 from \$736.9 million for the year ended December 31, 2012. This decrease in the average balance was primarily the result of redirecting cash flows to purchase government agency debentures of shorter duration as well as to fund loan growth.

Interest income on investment securities increased by \$391,000, or 3.4%, to \$11.8 million for the year ended December 31, 2013 from \$11.4 million for the year ended December 31, 2012. This increase was attributable to an increase in the average balance of investment securities of \$165.4 million, or 46.8%, to \$518.8 million for the year ended December 31, 2013 from \$353.4 million for the year ended December 31, 2012. This increase was primarily the result of using excess cash to mitigate net interest margin compression while shortening the duration of our investment securities portfolio. Partially offsetting this increase was a decrease in the average yield on investment securities of 96 basis points, to 2.28% for the year ended December 31, 2013, from 3.24% for the year ended December 31, 2012. This decrease resulted from higher yielding municipal securities maturing and being called as well as lower relative yields on the securities that were purchased during the year.

For the year ended December 31, 2013 we received dividends on FHLB stock of \$371,000 on an average balance of \$46.6 million, resulting in a yield of 0.80%. Dividends on FHLB stock totaled \$87,000 on an average balance of \$47.2 million, resulting in a yield of 0.18% for the year ended December 31, 2012. The FHLB of Pittsburgh resumed paying dividends on its member owned common stock during 2012.

Interest income on interest-earning deposits decreased by \$506,000, or 31.6%, to \$1.1 million for the year ended December 31, 2013 from \$1.6 million for the year ended December 31, 2012. This decrease is the result of a decrease in the average balance of interest-earning deposits of \$228.4 million, or 35.8%, to \$410.0 million for the year ended December 31, 2013 from \$638.4 million for the year ended December 31, 2012. This decrease is primarily the result of using excess cash to fund loan growth, deposit outflow and to purchase government agency debentures.

Interest expense. Interest expense decreased by \$14.0 million, or 18.7%, to \$61.2 million for the year ended December 31, 2013 from \$75.2 million for the year ended December 31, 2012. This decrease was primarily attributed to decreases in the interest rate paid on both deposits and borrowed funds as well as a decrease in the average balance of deposits. The average rate paid on all categories of deposit accounts decreased during the year ended December 31, 2013 due to a decrease in market interest rates. Rates on savings accounts decreased to 0.30% from 0.37%; interest-bearing demand deposit rates decreased to 0.07% from 0.10%; money market demand account rates decreased to 0.27% from 0.34% and certificates of deposit rates decreased to 1.25% from 1.69%. Also contributing to the decrease in interest expense was a shift in the mix of our deposits with average balances increasing for savings, interest-bearing checking and money market demand accounts, while decreasing for certificates of deposit. The average rate paid on borrowed funds decreased by three basis points to 3.04% for the year ended December 31, 2013, from 3.07% for the year ended December 31, 2012. The decrease in average rate paid was partially offset by an increase in the average balance of borrowed funds of \$18.5 million during the year ended December 31, 2013.

Net interest income. Net interest income decreased by \$10.9 million, or 4.2%, to \$251.9 million for the year ended December 31, 2013 from \$262.8 million for the year ended December 31, 2012. This decrease was a result of the factors previously discussed as well as a decrease in total interest-earning assets. Our net interest rate spread decreased by seven basis points, to 3.23% for the year ended December 31, 2013 from 3.30% for the year

Table of Contents

ended December 31, 2012 and our net interest margin decreased by 11 basis points, to 3.43% for the year ended December 31, 2013 from 3.54% for the year ended December 31, 2012.

Provision for loan losses. We analyze the allowance for loan losses as described in note 1(f) of the notes to the Consolidated Financial Statements on page 69. The provision for loan losses decreased by \$7.8 million, or 29.7%, to \$18.5 million for year ended December 31, 2013 from \$26.3 million for the year ended December 31, 2012. Facilitating this decrease was a decrease in non-accrual loans of \$13.0 million, or 10.8%, to \$107.2 million at December 31, 2013 from \$120.2 million at December 31, 2012. Additionally, classified loans decreased by \$13.9 million, or 5.6%, to \$236.9 million at December 31, 2013 from \$250.8 million at December 31, 2012. These changes were partially offset by elevated levels in historical charge-off factors which include years with historically high charge-off amounts and an increase in business banking loans collectively evaluated for impairment, which typically require higher reserves than personal banking loans.

In determining the amount of the current period provision, we considered current economic conditions and their impact on our markets, including unemployment levels, bankruptcy filings, and changes in real estate values which ultimately impact the quality of our loan portfolio. Net loan charge-offs decreased by \$3.9 million, or 15.9%, to \$20.4 million for the year ended December 31, 2013 from \$24.3 million for the year ended December 31, 2012. Annual net charge-offs to average loans decreased to 0.36% for the year ended December 31, 2013 from 0.43% for the year ended December 31, 2012. In managements judgment, the provision that is recorded is sufficient to bring the allowance for loan losses to a level that reflects the losses inherent in our loan portfolio relative to loan mix, economic conditions and historical loss experience.

Noninterest income. Noninterest income increased by \$7.9 million, or 13.5%, to \$66.8 million for the year ended December 31, 2013 from \$58.9 million for the year ended December 31, 2012. This increase is primarily the result of increases in the gain on sales of investments and insurance commission income as well as a decrease in loss on real estate owned. Gain on sale of investments increased by \$5.5 million, or 835.5%, to \$6.1 million for the year ended December 31, 2013 from \$654,000 for the year ended December 31, 2012 due to the sale of certain equity securities in the fourth quarter of 2013. Insurance commission income increased by \$2.3 million, or 37.9%, to \$8.6 million for the year ended December 31, 2013 from \$6.3 million for the year ended December 31, 2012 due to our acquisition of the Bert Company on December 31, 2012. Losses on real estate owned decreased by \$2.4 million, or 43.5%, to \$3.2 million for the year ended December 31, 2013 from \$5.6 million for the year ended December 31, 2012. This decrease is primarily due to historically high write-downs on commercial properties that were taken in 2012. Partially offsetting these factors was a decrease in mortgage banking income of \$3.1 million, or 65.3%, to \$1.6 million for the year ended December 31, 2013 from \$4.7 million for the year ended December 31, 2012, as most residential mortgage loan originations during 2013 were retained in our portfolio and not sold into the secondary market.

Noninterest expense. Noninterest expense increased by \$1.6 million, or 0.8%, to \$207.1 million for the year ended December 31, 2013 from \$205.5 million for the year ended December 31, 2012. This increase is primarily the result of increases in office operations, other expense and premises and occupancy costs. Office operations increased by \$1.3 million, or 9.3%, to \$14.5 million for the year ended December 31, 2013 from \$13.2 million for the year ended December 31, 2012 primarily due to increased loan collections costs. As a result of increased charitable contributions to organizations that qualify for Pennsylvania's Education Improvement Tax Credit program, for which we receive state income tax credits, other expense increased by \$865,000, or 9.5%, to \$10.0 million for the year ended December 31, 2013 from \$9.1 million for the year ended December 31, 2012. Premises and occupancy costs increased by \$773,000, or 3.4%, compared to the prior year due primarily to increased maintenance and depreciation expense. Partially offsetting these increases were decreases in marketing expense and professional services. Marketing expense decreased by \$1.5 million, or 19.7%, to \$6.3 million for the year ended December 31, 2013 from \$7.8 million for the year ended December 31, 2012 due primarily to our decision to postpone campaigns scheduled for 2013 until 2014. Professional services decreased by \$738,000, or 10.5%, to \$6.3 million for the year ended December 31, 2013 from \$7.0 million for the year ended December 31, 2012 as a result of a decrease in compliance related consulting projects that were completed in 2012.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Income taxes. Income tax expense decreased by \$37,000, or 0.1%, to \$26.3 million for the year ended December 31, 2013 from \$26.4 million for the year ended December 31, 2012. This decrease is due to a decrease in the effective tax rate from 29.3% to 28.3% which resulted from increased Pennsylvania state tax credits. Partially offsetting this decrease was an increase in income before income taxes of \$3.1 million compared to the prior year.

Table of Contents

Comparison of Results of Operations for the Years Ended December 31, 2012 and 2011

General. Net income for the year ended December 31, 2012 was \$63.6 million, or \$0.68 per diluted share, a decrease of \$591,000, or 0.9%, from \$64.2 million, or \$0.64 per diluted share, for the year ended December 31, 2011. The decrease in net income resulted primarily from a decrease in net interest income of \$3.3 million and an increase in noninterest expense of \$5.3 million. These items were partially offset by decreases in the provision for loan losses and income tax expense. A discussion of each significant change follows.

Net income for the year ended December 31, 2012 represents a 5.48% and 0.79% return on average equity and return on average assets, respectively, compared to 5.24% and 0.80% for the year ended December 31, 2011.

Interest income. Interest income decreased by \$21.2 million, or 5.9%, to \$338.0 million for the year ended December 31, 2012 from \$359.2 million for the year ended December 31, 2011. The decrease in interest income was due both to a decrease in the average balance of interest-earning assets and a decrease in the average yield earned on interest-earning assets. The average balance of interest-earning assets decreased by \$55.5 million, or 0.7%, to \$7.431 billion for the year ended December 31, 2012 from \$7.487 billion for the year ended December 31, 2011. The average rate earned on interest-earnings assets decreased by 25 basis points, to 4.55% for the year ended December 31, 2012 from 4.80% for the year ended December 31, 2011. An explanation of the changes in the balances of interest-earnings assets and changes in their yields is discussed in each category below.

Interest income on loans receivable decreased by \$11.8 million, or 3.7%, to \$308.3 million for the year ended December 31, 2012 from \$320.1 million for the year ended December 31, 2011. This decrease was attributable to a decrease in the average yield, which was partially offset by an increase in the average balance of loans receivable. The average yield on loans receivable decreased by 36 basis points, to 5.45% for the year ended December 31, 2012, from 5.81% for the year ended December 31, 2011. This decrease is primarily due to the re-pricing of variable rate loans, the refinancing of existing loans to lower market interest rates and the origination of new loans in the continued low and highly competitive interest rate environment. Average loans receivable increased by \$146.4 million, or 2.7%, to \$5.655 billion for the year ended December 31, 2012 from \$5.509 billion for the year ended December 31, 2011. This increase was primarily attributable to our efforts in attracting and maintaining quality business loan relationships, especially in our Buffalo and Rochester, New York markets, as well as strong residential mortgage loan demand throughout the year.

Interest income on mortgage-backed securities decreased by \$6.8 million, or 28.6%, to \$16.7 million for the year ended December 31, 2012 from \$23.5 million for the year ended December 31, 2011. This decrease was attributable to decreases in both the average yield and the average balance of mortgage-backed securities. The average yield on mortgage-backed securities decreased by 41 basis points, to 2.27% for the year ended December 31, 2012, from 2.68% for the year ended December 31, 2011. This decrease in yield resulted from the continuation of historically low market interest rates which caused a decrease in the rates on our variable rate securities and lower relative yields on the securities that were purchased during the year. The average balance of mortgage-backed securities decreased by \$137.5 million, or 15.7%, to \$736.9 million for the year ended December 31, 2012 from \$874.4 million for the year ended December 31, 2011. This decrease in the average balance was primarily the result of using cash flow to finance loan growth and the repurchase of our common stock.

Interest income on investment securities decreased by \$2.6 million, or 18.0%, to \$11.4 million for the year ended December 31, 2012 from \$14.0 million for the year ended December 31, 2011. This decrease was attributable to both a decrease in the yield on investment securities and a decrease in the average balance of investment securities. The average yield decreased by 39 basis points, to 3.24% for the year ended December 31, 2012, from 3.63% for the year ended December 31, 2011. This decrease in yield resulted from higher yielding municipal

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

securities maturing and being called as well as lower relative yields on the securities that were purchased during the year. The average balance of investment securities decreased by \$31.0 million, or 8.1%, to \$353.4 million for the year ended December 31, 2012 from \$384.4 million for the year ended December 31, 2011. The decrease in the average balance of investment securities was primarily the result of using cash flow to finance loan growth and the repurchase of our common stock.

During the year ended December 31, 2012 the Federal Home Loan Bank of Pittsburgh (FHLB) resumed dividend payments, which had been suspended in 2008. Dividends on FHLB stock totaled \$87,000 on an average balance of \$47.2 million, resulting in a yield of 0.18% for the year ended December 31, 2012.

Interest income on interest-earning deposits decreased by \$113,000, or 6.6%, to \$1.6 million for the year ended December 31, 2012 from \$1.7 million for the year ended December 31, 2011. This decrease is the result of a

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

decrease in the average balance of interest-earning deposits of \$26.7 million, or 4.0%, to \$638.4 million for the year ended December 31, 2012 from \$665.1 million for the year ended December 31, 2011. This decrease is primarily the result of using cash for loan growth and to repurchase our common stock during the year.

Interest expense. Interest expense decreased by \$17.6 million, or 19.0%, to \$75.2 million for the year ended December 31, 2012 from \$92.8 million for the year ended December 31, 2011. This decrease was primarily attributed to decreases in both the interest rate paid on and the average balance of deposits and borrowings. The average rate paid on all categories of deposit accounts decreased during the year ended December 31, 2012 due to a decrease in market interest rates. Rates on savings accounts decreased from 0.46% to 0.37%; interest-bearing demand deposit rates decreased from 0.12% to 0.10%; money market demand account rates decreased from 0.45% to 0.34% and certificates of deposit rates decreased from 2.14% to 1.69%. Also contributing to the decrease in interest expense was a shift in the mix of our deposits with balances increasing for savings, interest-bearing checking and money market demand accounts, while decreasing for certificates of deposit. The average rate paid on borrowed funds decreased by 6 basis points to 3.07% for the year ended December 31, 2012, from 3.13% for the year ended December 31, 2011 as the average rate on repurchase agreements decreased from 0.58% for the year ended December 31, 2011 to 0.34% for the year ended December 31, 2012. The decrease in rate was partially offset by an increase in the average balance of repurchase agreements of \$13.8 million during the year ended December 31, 2012.

Net interest income. Net interest income decreased by \$3.6 million, or 1.3%, to \$262.8 million for the year ended December 31, 2012 from \$266.4 million for the year ended December 31, 2011. This decrease was a result of the factors previously discussed as well as a decrease in total interest-earning assets. Our net interest rate spread increased by 2 basis points, to 3.30% for the year ended December 31, 2012 from 3.28% for the year ended December 31, 2011 while our net interest margin decreased by 2 basis points, to 3.54% for the year ended December 31, 2012 from 3.56% for the year ended December 31, 2011.

Provision for loan losses. We analyze the allowance for loan losses as described in note 1(f). The provision for loan losses decreased by \$7.9 million, or 22.9%, to \$26.3 million for year ended December 31, 2012 from \$34.2 million for the year ended December 31, 2011. Facilitating this decrease was a decrease in non-accrual loans of \$10.9 million, or 8.3%, to \$120.2 million at December 31, 2012 from \$131.1 million at December 31, 2011. Additionally, loans 90 or more days delinquent decreased by \$27.5 million, or 28.7%, to \$68.3 million at December 31, 2012, from \$95.8 million at December 31, 2011. These changes were partially offset by increases in historical charge-off factors and an increase in business banking loans collectively evaluated for impairment, which typically require higher reserves than personal banking loans.

In determining the amount of the current period provision, we considered the extended length of time of the current economic downturn and its impact on our markets, including unemployment levels, bankruptcy filings, and changes in real estate values which ultimately impact the quality of our loan portfolio. Net loan charge-offs decreased by \$15.1 million, or 38.5%, to \$24.3 million for the year ended December 31, 2012 from \$39.4 million for the year ended December 31, 2011. Annual net charge-offs to average loans decreased to 0.43% for the year ended December 31, 2012 from 0.72% for the year ended December 31, 2011. The provision that is recorded is sufficient, in management's judgment, to bring the allowance for loan losses to a level that reflects the losses inherent in our loan portfolio relative to loan mix, economic conditions and historical loss experience.

Noninterest income. Noninterest income decreased by \$74,000, or 0.1%, to \$58.9 million for the year ended December 31, 2012 from \$59.0 million for the year ended December 31, 2011. Losses on real estate owned increased by \$3.2 million, or 132.6%, to \$5.6 million for the year ended December 31, 2012 from \$2.4 million for the year ended December 31, 2011. Our portfolio of foreclosed properties, currently valued at \$26.2 million, continues to be actively managed and this increase resulted from losses on the sale of properties and write-downs on some of the remaining properties, primarily located in Florida. Additionally, income from bank owned life insurance decreased by \$1.1 million, or 17.6%, compared to last year as a result of death benefits received in 2011. Partially offsetting these factors was an increase in mortgage banking income of \$3.8 million, or 445.2%, to \$4.7 million for the year ended December 31, 2012 from \$858,000 for the year ended December 31, 2011,

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

as an increased number of residential mortgage loans were sold at favorable pricing levels into the secondary market. Other-than-temporary impairment losses on our investment securities portfolio decreased by \$606,000, or 64.7%, for the year ended December 31, 2012 compared to last year.

Noninterest expense. Noninterest expense increased by \$5.3 million, or 2.6%, to \$205.5 million for the year ended December 31, 2012 from \$200.2 million for the year ended December 31, 2011. This increase is

Table of Contents

primarily the result of increases in compensation and employee benefits, processing expense, professional services and real estate owned expense. Compensation and employee benefits increased by \$5.1 million, or 4.8%, to \$111.7 million for the year ended December 31, 2012 from \$106.6 million for the year ended December 31, 2011. This increase is primarily attributable to the addition of 92 full-time equivalent employees since the beginning of the current year and increased benefit costs. These personnel increases have occurred primarily in commercial lending, credit administration, loan servicing and regulatory compliance areas. As a result of outsourcing our internal audit function and the continued engagement of compliance consultants, professional services increased by \$1.8 million, or 34.1%, to \$7.0 million for the year ended December 31, 2012. Processing expense increased by \$1.7 million, or 7.1%, compared to the prior year due to regular maintenance and upgrades and our ATM replacement program. Real estate owned expenses remain elevated as we incur insurance expenses and property taxes on our \$26.2 million portfolio of foreclosed properties, as well as operating costs associated with several foreclosed commercial businesses. Partially offsetting these increases were decreases in marketing expense and federal deposit insurance premiums. Marketing expense decreased by \$2.2 million, or 21.3%, to \$7.8 million for the year ended December 31, 2012 from \$10.0 million for the year ended December 31, 2011 due to the timing of several marketing campaigns. Federal deposit insurance premiums decreased by \$1.5 million, or 21.8%, to \$5.6 million for the year ended December 31, 2012 as the assessment formula was changed to calculate premiums based on net assets rather than deposits.

Income taxes. Income tax expense decreased by \$489,000, or 1.8%, to \$26.4 million for the year ended December 31, 2012 from \$26.9 million for the year ended December 31, 2011. This decrease is due to a decrease in income before income taxes of \$1.1 million, or 1.2%, and a decrease in the effective tax rate from 29.5% to 29.3%.

Asset Quality

We actively manage asset quality through our underwriting practices and collection procedures. Our underwriting practices are focused on balancing risk and return while our collection operations focus on diligently working with delinquent borrowers in an effort to minimize losses.

Collection procedures. Our collection procedures for personal loans generally provide that when a loan is five days past due, a computer-generated late notice is sent to the borrower requesting payment. If delinquency continues, at 15 days a delinquent notice, plus a notice of a late charge, is sent and personal contact efforts are attempted, either in person or by telephone, to strengthen the collection process and obtain reasons for the delinquency. Also, plans to establish a payment program are developed. Personal contact efforts are continued throughout the collection process, as necessary. Generally, if a loan becomes 60 days past due, a collection letter is sent and the loan becomes subject to possible legal action if suitable arrangements for payment have not been made. In addition, the borrower is given information which provides access to consumer counseling services to the extent required by the regulations of the Department of Housing and Urban Development and other applicable regulators. When a loan continues in a delinquent status for 90 days or more, and a payment schedule has not been developed or kept by the borrower, we may send the borrower a notice of intent to foreclose, giving 30 days to cure the delinquency. If not cured, foreclosure proceedings are initiated.

Nonperforming assets. Loans are reviewed on a regular basis and are placed on a nonaccrual status when, in the opinion of management, the collection of all principal and/or interest is doubtful. Loans are automatically placed on nonaccrual status when either principal or interest is 90 days or more past due. Interest accrued and unpaid at the time a loan is placed on a nonaccrual status is reversed and charged against interest income.

Real estate acquired as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned until such time that it is sold. When real estate is acquired through foreclosure or by deed in lieu of foreclosure, it is recorded at the lower of the related loan balance or its fair

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

value as determined by an appraisal, less estimated costs of disposal. If the value of the property is less than the loan, less any related specific loan loss reserve allocations, the difference is charged against the allowance for loan losses. Any subsequent write-down of real estate owned or loss at the time of disposition is charged against earnings.

Nonaccrual, Past Due, Restructured Loans and Nonperforming Assets. The following table sets forth information with respect to nonperforming assets. Nonaccrual loans are those loans on which the accrual of interest has ceased. Generally, when a loan is 90 days past due, we fully reverse all accrued interest thereon and cease to accrue interest thereafter. Exceptions are made for loans that have contractually matured, are in the process of being modified to extend the maturity date and are otherwise current as to principal and interest, and well secured loans that are in process of collection. Loans may also be placed on nonaccrual before they reach 90 days past due if

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

conditions exist that call into question our ability to collect all contractual interest. Other nonperforming assets represent property acquired through foreclosure or repossession. Foreclosed property is carried at the lower of its fair value less estimated costs to sell, or the principal balance of the related loan.

	2013	2012	At December 31, 2011	2010	2009
	(Dollars in thousands)				
Loans 90 days or more past due:

loans (1)	\$ 28,889	41,166	29,575	41,740	2,908
Accruing troubled debt restructured loans	50,277	48,278	39,854	10,865	18,177
Total troubled debt restructured loans	\$ 79,166	89,444	69,429	52,605	21,085

(1) Also included in nonaccrual loans above.

During the year ended December 31, 2013, gross interest income of approximately \$6.6 million would have been recorded on loans accounted for on a nonaccrual basis if the loans had been current and in accordance with their original terms throughout the year. We recognized \$696,000 of interest income on nonaccrual loans during the year ended December 31, 2013.

The following table sets forth loans 90 or more days delinquent by state (based on borrowers' domicile) at December 31, 2013.

Table of Contents

Classification of Assets. Our policies, consistent with regulatory guidelines, provide for the classification of loans considered to be of lesser quality as substandard, doubtful, or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the savings institution will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible so that their continuance as assets without the establishment of a specific loss reserve is not warranted. Assets that do not expose the savings institution to risk sufficient to warrant classification in one of the aforementioned categories, but which possess some weaknesses, are required to be designated special mention. At December 31, 2013, we had 272 loans, with an aggregate principal balance of \$58.6 million, designated as special mention.

We regularly review our asset portfolio to determine whether any assets require classification in accordance with applicable regulations. Our largest classified assets generally are also our largest nonperforming assets.

The following table sets forth the aggregate amount of our classified assets at the dates indicated.

	2013	At December 31, 2012 (In thousands)	2011
Substandard assets	\$ 250,545	271,268	242,015
Doubtful assets	3,188	4,829	5,941
Loss assets	1,321	1,049	1,237
Total classified assets	\$ 255,054	277,146	249,193

Allowance for Loan Losses. Our board of directors has approved an Allowance for Loan Losses Policy designed to provide management with a systematic methodology for determining and documenting the allowance for loan losses each reporting period. This methodology was developed to provide a consistent process and review procedure to ensure that the allowance for loan losses is in conformity with GAAP, our policies and procedures and other supervisory and regulatory guidelines.

On an ongoing basis, the Credit Administration department, as well as loan officers, branch managers and department heads, review and monitor the loan portfolio for problem loans. This portfolio monitoring includes a review of the monthly delinquency reports as well as historical comparisons and trend analysis. On an on-going basis the loan officer along with the Credit Administration department grades or classifies problem loans or potential problem loans based upon their knowledge of the lending relationship and other information previously accumulated. Credit relationships greater than or equal to \$1.0 million that have been classified as substandard or doubtful are reviewed by the Credit Administration department for possible impairment. A loan is considered impaired when, based on current information and events it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement including both contractual principal and interest payments. Our loan grading system for problem loans is described above in Classification of Assets.

If an individual loan is deemed to be impaired, we determine the proper measurement of impairment for each loan based on one of three methods: (1) the present value of expected future cash flows discounted at the loan's effective interest rate; (2) the loan's observable market price; or (3) the fair value of the collateral if the loan is collateral dependent. If the measure of the impaired loan is more or less than the recorded investment in the loan, we adjust the specific allowance associated with that individual loan accordingly.

If a substandard or doubtful loan is not considered individually for impairment, it is grouped with other loans that possess common characteristics for impairment evaluation and analysis. This segmentation is accomplished by grouping loans of similar product types, risk characteristics and industry concentration into homogeneous pools. Each pool is then analyzed based on the historical delinquency, charge-off and recovery trends over the past three years which are then extended to include the loss realization period during which the event of default occurs, additional consideration is also given to the current economic, political, regulatory and interest rate environment. This adjusted historical net charge-off amount as a percentage of loans outstanding for each group is used to estimate the measure of impairment.

Table of Contents

The individual impairment measures along with the estimated losses for each homogeneous pool are consolidated into one summary document. This summary schedule along with the supporting documentation used to establish this schedule is prepared monthly and presented to the Credit Committee on a quarterly basis. The Credit Committee is comprised of members of Senior Management from our various departments, including mortgage, consumer and commercial lending, appraising, administration and finance as well as our President and Chief Executive Officer. The Credit Committee reviews the processes and documentation presented, reviews the concentration of credit by industry and customer, discusses lending products, activity, competition and collateral values, as well as economic conditions in general and in each of our market areas. Based on this review and discussion, the appropriate allowance for loan losses is estimated and any adjustments necessary to reconcile the actual allowance for loan losses with this estimate are determined. In addition, the Credit Committee considers whether any changes to the methodology are needed. The Credit Committee also compares our delinquency trends, nonperforming asset amounts and allowance for loan loss levels to our peer group and to state and national statistics. A similar review is also performed by the Risk Management Committee of the board of directors.

In addition to the reviews by the Credit Committee and the Risk Management Committee, regulators from either the Federal Deposit Insurance Corporation or Pennsylvania State Department of Banking perform a review on an annual basis of the adequacy of the allowance for loan losses and its conformity with regulatory guidelines and pronouncements. The internal audit department also performs a regular review of the detailed supporting schedules for accuracy and reports their findings to the Audit Committee of the board of directors. Any recommendations or enhancements from these independent parties are considered by management and the Credit Committee and implemented accordingly.

We acknowledge that this is a dynamic process and consists of factors, many of which are external and beyond our control, which can change. The adequacy of the allowance for loan losses is based upon estimates using all the information previously discussed as well as current and known circumstances and events. There is no assurance that actual portfolio losses will not be substantially different than those that were estimated.

We utilize a consistent methodology each period when analyzing the adequacy of the allowance for loan losses and the related provision for loan losses. As part of the analysis, we considered the economic data in our markets such as the unemployment and bankruptcy levels as well as the changes in real estate collateral values. In addition, we considered the overall trend in asset quality, loan charge-offs and the allowance for loan losses as a percentage of nonperforming loans. We also consider the specific reserves already established for criticized loans based upon a three year average of historical charge-offs. As a result, we decreased the allowance for loan losses during the year by \$1.9 million, or 2.6%, to \$71.3 million, or 1.23% of total loans, at December 31, 2013 from \$73.2 million, or 1.28% of total loans, at December 31, 2012. The decrease in the allowance for loan losses and the related provision for loan losses is discussed above in the section Provision for loan losses.

Table of Contents

Analysis of the Allowance for Loan Losses. The following table sets forth the analysis of the allowance for loan losses for the periods indicated.

	2013	2012	Years ended December 31, 2011	2010	2009
	(Dollars in thousands)

Unallocated	4,471		4,192	
Total	\$ 76,412	100.0%	70,403	100.0%

(1) Represents percentage of loans in each category to total loans.

Liquidity and Capital Resources

Northwest Savings Bank is required to maintain a sufficient level of liquid assets, as determined by management and defined and reviewed for adequacy by the Federal Deposit Insurance Corporation during their regular examinations. The Federal Deposit Insurance Corporation, however, does not prescribe by regulation a minimum amount or percentage of liquid assets. The Federal Deposit Insurance Corporation allows us to consider any unencumbered, available-for-sale marketable security, whose sale would not impair our capital adequacy, to be eligible for liquidity. Liquidity is monitored through the use of a standard liquidity ratio of liquid assets to borrowings plus deposits. Using this formula, Northwest Savings Bank's liquidity ratio was 12.4% as of December 31, 2013. We adjust our liquidity level in order to meet funding needs of deposit outflows, repayment of borrowings and loan commitments. We also adjust liquidity as appropriate to meet our asset and liability

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

management objectives. Liquidity needs can also be met by temporarily drawing upon lines-of-credit established for such reasons. As of December 31, 2013, Northwest Savings Bank had \$2.086 billion of additional borrowing capacity available with the Federal Home Loan Bank of Pittsburgh, including a \$150.0 million overnight line of credit, as well as a \$194.1 million borrowing capacity available with the Federal Reserve Bank and \$80.0 million with two correspondent banks.

In addition to deposits, our primary sources of funds are the amortization and repayment of loans and mortgage-backed securities, maturities of investment securities and other short-term investments, and earnings and funds provided from operations. While scheduled principal repayments on loans and mortgage-backed securities are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by general interest rate levels, economic conditions, and competition. We manage the pricing of our deposits to maintain a desired deposit balance. In addition, we invest excess funds in short-term interest earning and other assets, which

Table of Contents

provide liquidity to meet lending requirements. Short-term interest-earning deposits amounted to \$293.8 million at December 31, 2013. For additional information about our cash flows from operating, financing, and investing activities, see the Statements of Cash Flows included in the Consolidated Financial Statements.

A portion of our liquidity consists of cash and cash equivalents, which are a product of our operating, investing, and financing activities. The primary sources of cash during the current year were net income and principal repayments on loans and mortgage-backed securities.

Liquidity management is both a daily and long-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the Federal Home Loan Bank of Pittsburgh and the Federal Reserve Bank of Cleveland, which provide an additional source of funds. At December 31, 2013 Northwest Savings Bank had advances of \$725.4 million from the Federal Home Loan Bank of Pittsburgh. We borrow from these sources to reduce interest rate risk and to provide liquidity when necessary.

At December 31, 2013, our customers had \$432.3 million of unused lines of credit available and \$175.0 million in loan commitments. This amount does not include the unfunded portion of loans in process. Certificates of deposit scheduled to mature in less than one year at December 31, 2013, totaled \$665.8 million. We believe that a significant portion of such deposits will remain with us.

The major sources of our cash flows are in the areas of loans, marketable securities, deposits and borrowed funds.

Deposits are our primary source of externally generated funds. The level of deposit inflows during any given period is heavily influenced by factors outside of our control, such as consumer savings tendencies, the general level of short-term and long-term market interest rates, as well as higher alternative yields that investors may obtain on competing investments such as money market mutual funds. Financial institutions, such as Northwest Savings Bank, are also subject to deposit outflows. Our net deposits decreased by \$95.7 million for the year ended December 31, 2013 and decreased by \$15.7 million and increased by \$16.0 million for the years ended December 31, 2012, and 2011, respectively.

Similarly, the amount of principal repayments on loans and the amount of new loan originations is heavily influenced by the general level of market interest rates, consumer confidence and consumer spending. Funds received from loan maturities and principal payments on loans for the years ended December 31, 2013, 2012 and 2011 were \$1.924 billion, \$1.912 billion and \$1.766 billion, respectively. Loan originations for the years ended December 31, 2013, 2012 and 2011 were \$2.110 billion, \$2.337 billion and \$1.928 billion, respectively. We also sell a portion of the loans we originate, and the cash flows from such sales for the years ended December 31, 2013, 2012 and 2011 were \$52.6 million, \$236.5 million and \$88.2 million, respectively.

We experience significant cash flows from our portfolio of marketable securities as principal payments are received on mortgage-backed securities and as investment securities mature or are called. Cash flow from the repayment of principal and the maturity or call of marketable securities for the years ended December 31, 2013, 2012 and 2011 were \$288.8 million, \$417.5 million and \$423.4 million, respectively.

When necessary, we utilize borrowings as a source of liquidity and as a source of funds for long-term investment when market conditions permit. The net cash flow from the receipt and repayment of borrowings were net increases of \$21.6 million and \$32.1 million for the years

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

ended December 31, 2013 and 2012, respectively, and a net decrease of \$63.4 million for the year ended December 31, 2011.

Other activity with respect to cash flow was the payment of cash dividends on common stock in the amount of \$45.9 million, \$56.9 million and \$43.6 million for the ended December 31, 2013, 2012 and 2011, respectively.

At December 31, 2013, stockholders' equity totaled \$1.160 billion. During 2013 our Board of Directors declared regular quarterly dividends totaling \$0.38 per share of common stock and a special dividend of \$0.12 per share of common stock in the second quarter of 2013.

We monitor the capital levels of Northwest Savings Bank to provide for current and future business opportunities and to meet regulatory guidelines for well capitalized institutions. Northwest Savings Bank is required by the Pennsylvania State Department of Banking and the FDIC to meet minimum capital adequacy requirements. At December 31, 2013, Northwest Savings Bank exceeded all regulatory minimum capital requirements and is considered to be well capitalized. In addition, as of December 31, 2013, we were not aware of

Table of Contents

any recommendation by a regulatory authority that, if it were implemented, would have a material effect on liquidity, capital resources or operations.

Regulatory Capital Requirements.

Northwest Savings Bank is subject to minimum capital requirements established by the Federal Deposit Insurance Corporation. See Supervision and Regulation Capital Requirements and Prompt Corrective Action . The following table summarizes Northwest Savings Bank's total shareholder's equity, regulatory capital, total risk-based assets, and leverage and risk-based regulatory ratios at the dates indicated.

	At December 31,	
	2013	2012
	(Dollars in thousands)	
Total shareholder's equity (GAAP capital)	\$ 1,061,163	993,990
Accumulated other comprehensive income	(2,148)	(4,733)
Less: non-qualifying intangible assets	(176,781)	(178,530)
Leverage or Tier 1 capital	882,234	810,727
Plus: Tier 2 capital (1)	64,297	64,949
Total risk-based capital	\$ 946,531	875,676
Total assets for leverage ratio	\$ 7,728,167	7,786,818
Net risk-weighted assets including off-balance sheet items	\$ 5,088,277	5,167,800
Leverage capital ratio	11.42%	10.41%
Minimum requirement	4.00%	4.00%
Risk-based capital ratio	18.60%	16.94%
Minimum requirement	8.00%	8.00%

(1) Tier 2 capital consists of the allowance for loan losses, which is limited to 1.25% of total risk-weighted assets as detailed under the regulations of the FDIC, and 45% of pre-tax net unrealized gains on securities available-for-sale.

Northwest Savings Bank is also subject to capital guidelines of the Pennsylvania Department of Banking. Although not adopted in regulation form, the Department of Banking requires 6% leverage capital and 10% risk-based capital. See Item 1. Business Supervision and Regulation Capital Requirements and Prompt Corrective Action .

Table of Contents**Contractual Obligations**

We are obligated to make future payments according to various contracts. The following table presents the expected future payments of the contractual obligations aggregated by obligation type at December 31, 2013.

	Less than one year	One year to less than three years	Payments due Three years to less than five years (In thousands)	Five years or greater	Total
Contractual obligations at December 31, 2013					
Long-term debt (1)	\$ 156,200	255,445	250,000	220,000	881,645
Junior subordinated debentures (2)				103,094	103,094
Operating leases (3)	3,808	5,704	3,646	5,144	18,302
Total	\$ 160,008	261,149	253,646	328,238	1,003,041
Commitments to extend credit	\$ 174,998				174,998

(1) See Note 10 to the consolidated financial statements, Borrowed Funds, for additional information.

(2) See Note 22 to the consolidated financial statements, Junior Subordinated Debentures/Trust Preferred Securities, for additional information.

(3) See Note 7 to the consolidated financial statements, Premises and Equipment, for additional information.

Impact of Inflation and Changing Prices

The Consolidated Financial Statements and notes thereto, presented elsewhere herein, have been prepared in accordance with generally accepted accounting principles, which require the measurement of financial position and operating results in terms of historical dollars without considering the change in the relative purchasing power of money over time and due to inflation. The impact of inflation is reflected in the increased cost of our operations. Unlike most industrial companies, nearly all of our assets and liabilities are monetary. As a result, interest rates have a greater impact on our performance than do the effects of general levels of inflation. Interest rates do not necessarily move in the same direction or to the same extent as the price of goods and services.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**Market Risk Management**

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The matching of assets and liabilities may be analyzed by examining the extent to which such assets and liabilities are interest rate sensitive and by monitoring an institution's interest rate sensitivity gap. An asset or liability is said to be interest rate sensitive within a specific time period if it will mature or re-price within that time period. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or re-pricing within a specific time period and the amount of interest-bearing liabilities maturing or re-pricing within that same time period. A gap is considered positive when the amount of interest rate sensitive assets exceeds the amount of interest rate sensitive liabilities. A gap is considered negative when the amount of interest rate sensitive liabilities exceeds the amount of interest rate sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income while a positive gap would tend to positively affect net interest income. Similarly, during a period of falling interest rates, a negative gap would tend to positively affect net interest income while a positive gap would tend to adversely affect net interest income.

Our policy is to reduce our exposure to interest rate risk generally by better matching the maturities of our interest rate sensitive assets and liabilities and by increasing the interest rate sensitivity of our interest-earning assets. We purchase adjustable-rate investment securities and mortgage-backed securities which at December 31, 2013 totaled \$314.6 million, and originate adjustable-rate loans, which at December 31, 2013, totaled \$1.771 billion or 30.0% of our gross loan portfolio. Of our \$7.236 billion of interest-earning assets at December 31, 2013, \$2.379 billion, or 32.9%, consisted of assets with adjustable rates of interest. When market conditions are favorable, we also attempt to reduce interest rate risk by lengthening the maturities of our interest-bearing liabilities by using FHLB advances as a source of long-term fixed-rate funds, and by promoting longer-term certificates of deposit.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

At December 31, 2013, total interest-earning liabilities maturing or re-pricing within one year exceeded total interest-bearing assets maturing or re-pricing in the same period by \$313.0 million, representing a negative one-year gap ratio of 3.97%.

The following table sets forth, on a carrying value basis, the amounts of interest-earning assets and interest-bearing liabilities outstanding at December 31, 2013, which are expected to re-price or mature, based upon certain assumptions, in each of the future time periods shown. Except as stated below, the amounts of assets and liabilities shown that re-price or mature during a particular period were determined in accordance with the earlier of the term of re-pricing or the contractual term of the asset or liability. We believe that these assumptions approximate the standards used in the financial services industry and consider them appropriate and reasonable.

	Within 1 year	Over 1-3 years	Amounts maturing or re-pricing Over 3-5 years Over 5-10 years (Dollars in thousands)		Over 10-20 years	Total
Rate-sensitive assets:

assets as a percent of
cumulative interest-bearing
liabilities

We have an Asset/Liability Committee, consisting of several members of management, which meets monthly to review market interest rates, economic conditions, the pricing of interest earning assets and interest bearing liabilities and our balance sheet structure. On a quarterly basis, this committee also reviews our interest rate risk position and our cash flow projections.

Our Board of Directors has a Risk Management Committee, which meets quarterly and reviews interest rate risks and trends, our interest sensitivity position, our liquidity position and the market risk inherent in our investment portfolio.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Table of Contents

In an effort to assess market risk, we use a simulation model to determine the effect of immediate incremental increases and decreases in interest rates on net income and the market value of our equity. Certain assumptions are made regarding loan prepayments and decay rates of passbook and NOW accounts. Because it is difficult to accurately project the market reaction of depositors and borrowers, the effect of actual changes in interest rates on these assumptions may differ from simulated results. We have established the following guidelines for assessing interest rate risk:

Net income simulation. Given a non-parallel shift of 100 basis points (bps), 200 bps and 300 bps in interest rates, the estimated net income may not decrease by more than 10%, 20% and 30%, respectively, within a one-year period.

Market value of equity simulation. The market value of our equity is the present value of our assets and liabilities. Given a non-parallel shift of 100 bps, 200 bps and 300 bps in interest rates, the market value of equity may not decrease by more than 15%, 30% and 35%, respectively, from the computed economic value at current interest rate levels.

The following table illustrates the simulated impact of a non-parallel 100 bps, 200 bps or 300 bps upward or 100 bps downward movement in interest rates on net income, return on average equity, earnings per share and market value of equity. These analyses were prepared assuming that total interest-earning asset and interest-bearing liability levels at December 31, 2013 remain constant. The impact of the rate movements was computed by simulating the effect of an immediate and sustained shift in interest rates over a twelve-month period from December 31, 2013 levels.

	Increase			Decrease		
Non-parallel shift in interest rates over the next 12 months						
Projected percentage increase/ (decrease) in net income	(1.6)%	1.7%	2.6%	(12.2)%		
Projected increase/ (decrease) in return on average equity	(1.6)%	1.6%	2.6%	(11.9)%		
Projected increase/ (decrease) in earnings per share	\$ (0.01)	\$ 0.01	\$ 0.01	\$ (0.08)		
Projected percentage decrease in market value of equity	(3.8)%	(13.4)%	(20.4)%	(3.1)%		

The figures included in the tables above represent projections that were computed based upon certain assumptions including prepayment rates and decay rates. These assumptions are inherently uncertain and, as a result, we cannot precisely predict the impact of changes in interest rates. Actual results may differ significantly due to timing, magnitude and frequency of interest rate changes and changes in market conditions.

When assessing our interest rate sensitivity, analysis of historical trends indicates that loans will prepay at various speeds (or annual rates) depending on the variance between the weighted average portfolio rates and the current market rates. In preparing the table above, the following assumptions were used: (i) adjustable-rate mortgage loans will prepay at an annual rate of 8% to 14%; (ii) fixed-rate mortgage loans will prepay at an annual rate of 8% to 14%, depending on the type of loan; (iii) commercial loans will prepay at an annual rate of 9% to 14%; (iv) consumer loans held by Northwest Savings Bank will prepay at an annual rate of 18% to 24%; and (v) consumer loans held by NCDC will prepay at an annual rate of 55% to 70%. In regards to our deposits, it has been assumed that (i) fixed maturity deposits will not be withdrawn prior to maturity; (ii) the significant majority of money market accounts will re-price immediately; (iii) savings accounts will gradually re-price over

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

three years; and (iv) checking accounts will re-price either when the rates on such accounts re-price as interest rate levels change, or when deposit holders withdraw funds from such accounts and select other types of deposit accounts, such as certificate accounts, which may have higher interest rates. For purposes of this analysis, management has estimated, based on historical trends, that \$382.1 million, or 23.3%, of our checking accounts and \$613.0 million, or 51.5%, of our savings accounts are interest sensitive and may re-price in one year or less, and that the remainder may re-price over longer time periods.

The above assumptions are annual percentages based on remaining balances and should not be regarded as indicative of the actual prepayments and withdrawals that we may experience. Moreover, certain shortcomings are inherent in the analysis presented by the foregoing table. For example, although certain assets and liabilities may have similar maturities or periods to re-pricing, they may react in different degrees to changes in market interest rates. Also, interest rates on certain types of assets and liabilities may fluctuate in advance of or lag behind changes in market interest rates. Additionally, certain assets, such as some adjustable-rate loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Moreover, in the event of a change in interest rates, prepayment and early withdrawal levels would likely deviate significantly from those assumed in calculating the table.

Table of Contents

In addition, we regularly measure and monitor the market value of our net assets and the changes therein. While fluctuations are expected because of changes in interest rates, we have established policy limits for various interest rate scenarios. Given interest rate shocks of +/-100 to +/-300 basis points the market value of net assets is not expected to decrease by more than -15% to -35%.

Off-Balance Sheet Arrangements

As a financial services provider, we routinely are a party to various financial instruments with off-balance-sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans we make. In addition, we routinely enter into commitments to purchase and sell residential mortgage loans.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Securities Exchange Act of 1934.

Management, including the principal executive officer and principal financial officer, has assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal control - Integrated Framework* (1992). Based on such assessment, management concluded that, as of December 31, 2013, the Company's internal control over financial reporting is effective based upon those criteria.

KPMG LLP, an independent registered public accounting firm, has audited the consolidated financial statements included in this Report and has issued a report with respect to the effectiveness of the Company's internal control over financial reporting.

The Board of Directors and Shareholders

Northwest Bancshares, Inc.:

We have audited Northwest Bancshares, Inc.'s (the Company) internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of Northwest Bancshares, Inc. and subsidiaries as of December 31, 2013 and 2012, and the related consolidated

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2013, and our report dated February 28, 2014 expressed an unqualified opinion on those consolidated financial statements.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders

Northwest Bancshares, Inc.:

We have audited the accompanying consolidated statements of financial condition of Northwest Bancshares, Inc. and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for each of the years in the three-year period ended December 31, 2013. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Northwest Bancshares, Inc. and subsidiaries as of December 31, 2013 and 2012, and the results of its operations and their cash flows for each of the years in the three-year period then ended in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Northwest Bancshares, Inc.'s internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control - Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 28, 2014 expressed an unqualified opinion on the effectiveness of Northwest Bancshares, Inc.'s internal control over financial reporting.

(1) Summary of Significant Accounting Policies

(a) *Nature of Operations*

Northwest Bancshares, Inc. (Company) is a Maryland corporation that was incorporated in September 2009 to be the successor to Northwest Bancorp, Inc. upon completion of the mutual-to-stock conversion of Northwest Bancorp, MHC, Northwest Bancorp, Inc.'s mutual holding company parent. Northwest Bancshares, Inc., headquartered in Warren, Pennsylvania, is a federal savings and loan holding company for its wholly owned subsidiary, Northwest Savings Bank. Northwest Savings Bank, a Pennsylvania chartered savings bank, offers personal and business deposit and loan products as well as investment management and insurance services through its 165 banking locations in Pennsylvania, New York, Ohio and Maryland. Northwest Savings Bank, through its subsidiary Northwest Consumer Discount Company, also offers personal loan products through 50 consumer finance offices in Pennsylvania.

(b) *Principles of Consolidation*

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries after elimination of all intercompany accounts and transactions.

(c) *Cash and Cash Equivalents*

For purposes of the statement of cash flows, cash and cash equivalents include cash and amounts due from depository institutions, interest-bearing deposits in other financial institutions, federal funds sold, and other short-term investments with original maturities of three months or less.

(d) *Investment Securities*

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

We classify marketable securities at the time of purchase as held-to-maturity, available-for-sale, or trading securities. Securities for which management has the intent and we have the ability to hold until their maturity are classified as held-to-maturity and are carried at cost, adjusted for amortization of premiums and accretion of discounts on a level yield basis (amortized cost). If it is management's intent at the time of purchase to hold securities for an indefinite period of time and/or to use such securities as part of its asset/liability management strategy, the securities are classified as available-for-sale and are carried at fair value, with unrealized gains and losses reported as accumulated other comprehensive income/ (loss), a separate component of shareholders' equity, net of tax. Securities classified as available-for-sale include securities that may be sold in response to changes in interest rates, resultant prepayment risk, or other market factors. Securities that are bought and held principally for the purpose of selling them in the near term are classified as trading and are reported at fair value, with changes in fair value included in earnings. The cost of securities sold is determined on a specific identification basis. We held no securities classified as trading at or for the years ended December 31, 2013 and 2012.

On at least a quarterly basis, we review our investments that are in an unrealized loss position for other-than-temporary impairment (OTTI). An investment security is deemed impaired if the fair value of the investment is less than its amortized cost. If an investment security is determined to be impaired, we evaluate whether the decline in value is other-than-temporary. We also consider whether or not we expect to receive all of the contractual cash flows from the investment security based on factors that include, but are not limited to: the credit worthiness of the issuer and the historical and projected performance of the underlying collateral. Also, we may evaluate the business and financial outlook of the issuer, as well as broader economic performance indicators. We consider our intent to sell the investment securities and the likelihood that we will not have to sell the investment securities before recovery of their cost basis during our evaluation. Declines in fair value of investment securities that are deemed credit related are recognized in earnings while declines in fair value of investment securities deemed noncredit related are recorded in accumulated other comprehensive income, if we do not intend to sell and it is not likely we will be required to sell. If we intend to sell the security or if it's more likely than not that we will be required to sell the security the entire unrealized loss is recorded in earnings.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Federal law requires a member institution of the Federal Home Loan Bank (FHLB) system to hold stock of its district FHLB according to a predetermined formula. This stock is recorded at cost. Quarterly, we evaluate our investment in the FHLB of Pittsburgh for impairment. We evaluate recent and long-term operating performance, liquidity, funding and capital positions, stock repurchase history, dividend history and impact of legislative and regulatory changes. Based on our most recent evaluation, we have determined that no impairment write-downs are currently required.

(e) Loans Receivable

Our loan portfolio segments consist of Personal Banking loans and Business Banking loans. Personal Banking loans include the following classes: residential mortgage loans, home equity loans and other consumer loans. Business Banking loans include the following classes: commercial real estate loans and commercial loans. All classes of loans are carried at their unpaid principal balance net of any deferred origination fees or costs and the allowance for estimated loan losses. Interest income on loans is credited to income as earned. Interest earned on loans for which no payments were received during the month is accrued at month end. Accrued interest on loans more than 90 days delinquent is reversed, and such loans are placed on nonaccrual.

All classes of loans are placed on nonaccrual when principal or interest is 90 days or more delinquent, or when there is reasonable doubt that interest or principal will not be collected in accordance with the contractual terms. Interest receipts on all classes of nonaccrual and impaired loans are recognized as interest revenue when it has been determined that all principal and interest will be collected or are applied to principal when collectability of principal is in doubt. Nonaccrual loans generally are restored to an accrual basis when principal and interest become current and a period of performance has been established in accordance with the contractual terms, typically six months.

A loan (from any class) is considered to be a troubled debt restructured loan (TDR) when the restructuring constitutes a concession and the borrower is experiencing financial difficulties. TDRs may include certain modifications of terms of loans, receipts of assets from borrowers in partial or full satisfaction of loans, or a combination thereof. TDRs are included in impaired loans until returned to performing status through the fulfillment of contractual terms for a reasonable period of time (generally six months). A modified loan is determined to be a TDR based on the contractual terms as specified by the original loan agreement or the most recent modification. Once classified a TDR, a loan is removed from such classification under three circumstances: (1) the loan is paid off, (2) the loan is charged off, or (3) if, at the beginning of the current fiscal year, the loan has performed in accordance with the modified terms for a minimum of six consecutive months and at the time of modification the loan's interest rate represented a then current market interest rate for a loan of similar risk.

For all classes of loans, delinquency is measured based on the number of days since the payment due date. For all classes of loans, past due status is measured using the loan's contractual maturity date.

Loan fees and certain direct loan origination costs are deferred, and the net deferred fee or cost is then recognized using the level-yield method over the contractual life of the loan as an adjustment to interest income.

We have identified certain residential mortgage loans, which will be sold prior to maturity, as loans held for sale. These loans are recorded at the lower of amortized cost or fair value less estimated cost to sell and at December 31, 2013 and 2012 were \$221,000 and \$15.4 million, respectively.

(f) Allowance for Loan Losses and Provision for Loan Losses

Provisions for estimated loan losses and the amount of the allowance for loan losses are based on losses inherent in the loan portfolio that are both probable and can be reasonably estimated at the date of the financial statements.

For all classes of loans, we consider a loan to be impaired when it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. In evaluating whether a loan is

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

impaired, we consider not only the amount that we expect to collect but also the timing of collection. Generally, if a delay in payment is insignificant (e.g., less than 30 days), a loan is not deemed to be impaired.

Business Banking loans greater than or equal to \$1.0 million are reviewed to determine if they should be individually evaluated for impairment. Smaller balance, homogeneous loans (e.g., primarily residential mortgage, home equity and consumer loans) are evaluated collectively for impairment. When a loan is considered to be impaired, the amount of impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's market price, or fair value of the collateral, less estimated cost to sell, if the loan is collateral dependent. Impairment losses are included in the allowance for loan losses. Impaired loans are charged-off or charged down when we believe that the ultimate collectability of a loan is not likely or the collateral value no longer supports the carrying value of the loan.

Interest income on non-performing loans is recognized using the cash basis method. For non-performing loans interest collected is credited to income in the period of recovery or applied to reduce principal if there is sufficient doubt about the collectability of principal.

The allowance for loan losses is shown as a valuation allowance to loans. The accounting policy for the determination of the adequacy of the allowance by portfolio segment requires us to make numerous complex and subjective estimates and assumptions relating to amounts which are inherently uncertain. The allowance for loan losses is maintained to absorb losses inherent in the loan portfolio as of the balance sheet date. The methodology used to determine the allowance for loan losses is designed to provide procedural discipline in assessing the appropriateness of the allowance for loan losses. Losses are charged against and recoveries are added to the allowance for loan losses.

For Business Banking loans the allowance for loan losses consists of:

- An allowance for impaired loans;
- An allowance for homogenous loans based on historical losses; and
- An allowance for homogenous loans based on environmental factors.

The allowance for impaired loans is based on individual analysis of all nonperforming loans greater than or equal to \$1.0 million. The allowance is measured by the difference between the recorded value of impaired loans and their impaired value. The impaired value is either the present value of the expected future cash flows from the borrower, the market value of the loan, or the fair value of the collateral, less estimated cost to

sell.

The allowance for homogeneous loans based on historical factors is a rolling three-year average of actual losses incurred, adjusted for a loss realization period (the period of time from the event of loss to loss realization), applied to homogenous pools of loans categorized by similar risk characteristics, not including loans evaluated individually for impairment.

The allowance for homogeneous loans based on environmental factors augments the historical loss factors for changes in: economic conditions, lending policies and procedures, the nature and volume of the loan portfolio, management, delinquency trends, loan administration, underlying collateral values and concentrations of credit.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

For Personal Banking loans the allowance for loan losses consists of:

- An allowance for loans 90 days or more delinquent;
- An allowance for homogenous loans based on historical losses; and
- An allowance for homogenous loans based on environmental factors.

The allowance for loans 90 days or more delinquent is based on the loss history of loans that have become 90 days or more delinquent. We apply a historical loss factor to homogeneous pools of loans that are 90 days or more delinquent.

The allowance for homogeneous loans based on historical losses is a rolling three-year average of actual losses incurred, adjusted for a loss realization period (the period of time from the event of loss to loss realization), applied to homogenous pools of loans categorized by similar risk characteristics, not including loans that are 90 days or more delinquent.

The allowance for homogeneous loans based on environmental factors augments the historical loss factors for changes in: economic conditions, lending policies and procedures, the nature and volume of the loan portfolio, management, delinquency trends, loan administration, underlying collateral values and concentrations of credit.

We also have an unallocated allowance which is based on our judgment regarding economic conditions, collateral values, specific loans and industry conditions.

The allocation of the allowance for loan losses is inherently judgmental, and the entire allowance for loan losses is available to absorb loan losses regardless of the nature of the loss.

Personal Banking loans are charged-off or charged down when they become 180 days delinquent, unless the borrower has filed for bankruptcy. Business Banking loans are charged-off or charged down when, in our opinion, they are no longer collectible, or when it has been determined

that the collateral value no longer supports the carrying value of the loan, for loans that are collateral dependent.

We have not made any material changes to our methodology for the calculation of the allowance for loan losses during the current year.

(g) Real Estate Owned

Real estate owned is comprised of property either acquired through foreclosure or voluntarily conveyed by borrowers. These assets are recorded on the date acquired at the lower of the loan balance or fair value of the collateral, less estimated disposition costs, with the fair value being determined by an appraisal. Any initial write-down is charged to the allowance for loan losses. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or the current fair value, less estimated disposition costs. Any subsequent write-down or gains or losses realized from the disposition of such property are credited or charged to noninterest income.

(h) Premises and Equipment

Premises and equipment are carried at cost less accumulated depreciation and amortization. Depreciation is accumulated on a straight-line basis over the estimated useful lives of the related assets. Estimated lives range from three to 39 years. Amortization of leasehold improvements is accumulated on a straight-line basis over the terms of the related leases or the useful lives of the related assets, whichever is shorter.

(i) Goodwill

Goodwill is generated from the premium paid for an acquisition and is allocated to reporting units, which are either the Company's reportable segments or one level below. Goodwill is not subject to amortization but is tested for impairment at least annually and possibly more frequently if certain events occur

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

or changes in circumstances arise. Impairment testing requires that the fair value of each reporting unit be compared to its carrying amount, including goodwill. Reporting units are identified based upon analyzing each individual operating segment. A reporting unit is defined as a distinct, separately identifiable component of an operating segment for which complete, discrete financial information is available that management regularly reviews. Determining the fair value of a reporting unit requires a high degree of subjective management judgment, including developing cash flow projections, selecting appropriate discount rates, identifying relevant market comparables, incorporating general economic and market conditions and selecting an appropriate control premium. The selection and weighting of the various fair value techniques may result in a higher or lower fair value. Judgment is applied in determining the weightings that are most representative of fair value. We conduct our annual goodwill impairment assessment as of June 30th. Through the assistance of an external third party, we performed an impairment test on goodwill. We valued each reporting unit by using a weighted average of four valuation methodologies; comparable transaction approach, control premium approach, public market peers approach and discounted cash flow approach. Declines in fair value could result in impairment being identified. At June 30, 2013, we did not identify any individual reporting unit where the fair value was less than the carrying value and no other events or changes have occurred since that date that would warrant an updated valuation. Future changes in the economic environment or the operations of the operating units could cause changes to the variables used, which could give rise to declines in the estimated fair value of the reporting units. There were no changes in our operations that would cause us to update the goodwill impairment test performed as of June 30, 2013. Accordingly, we have determined that goodwill is not impaired as of December 31, 2013 and 2012.

(j) Core Deposit Intangibles and Other Identifiable Intangibles

Through the assistance of an independent third party, we analyze and prepare a core deposit study for all bank acquisitions or other identifiable intangible asset study, such as customer lists, for all non-bank acquisitions. The core deposit study reflects the cumulative present value benefit of acquiring deposits versus an alternative source of funding. The other identifiable intangible asset study reflects the cumulative present value benefit of acquiring the income stream from an existing customer base versus developing new business relationships. Based upon analysis, the amount of the premium related to the core deposits or other identifiable intangibles of the business purchased is calculated along with the estimated life of the intangible. The intangible, which is recorded in other intangible assets, is then amortized to expense on an accelerated basis over an approximate life of seven years.

(k) Bank-Owned Life Insurance

We own insurance on the lives of a certain group of key employees and directors. The policies were purchased to help offset the increase in the costs of various fringe benefit plans, including healthcare, as well as the directors deferred compensation plan. The cash surrender value of these policies is included as an asset on the consolidated statements of financial condition, and any increases in the cash surrender value are recorded as tax-free noninterest income on the consolidated statements of income. In the event of the death of an insured individual under these policies, after distribution to the insured's beneficiaries, if any, we receive a tax-free death benefit, which is recorded as noninterest income.

(l) Deposits

Interest on deposits is accrued and charged to expense monthly and is paid or credited in accordance with the terms of the accounts.

(m) Pension Plans

We maintain multiple noncontributory defined benefit pension plans for substantially all of our employees. The net periodic pension cost has been calculated using service cost, interest cost, expected returns on plan assets and net amortization.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

(n) Income Taxes

We join with our wholly owned subsidiaries in filing a consolidated federal income tax return. In accordance with an intercompany tax allocation agreement, the applicable federal income tax expense or benefit is allocated to each subsidiary based upon taxable income or loss calculated on a separate company basis. Each subsidiary is responsible for payment of its own federal income tax liability or receives reimbursement of federal income tax benefit. In addition, deferred taxes are calculated and maintained on a separate company basis.

We account for income taxes under the asset and liability method. The objective of the asset and liability method is to establish deferred tax assets and liabilities for temporary differences between the financial reporting and tax basis of our assets and liabilities based on the tax rates expected to be in effect when such amounts are realized or settled.

(o) Stock Related Compensation

We determine the fair value of each option award, estimated on the grant date, using the Black-Scholes-Merton option-pricing model. The Black-Scholes-Merton option-pricing model uses variables including; expected volatilities, expected term, risk-free discount rate and annual rate of quarterly dividends. Expected volatilities are based on historical volatility of the Company's stock. The expected terms are based upon actual exercise and forfeiture experience of previous option grants. The risk-free rate is based on yields on U.S. Treasury securities of a similar maturity to the expected term of the options. During the year ended December 31, 2013 we awarded 511,100 stock options to employees and 79,200 stock options to directors. Option awards are generally granted with an exercise price equal to the closing market price of the Company's stock on the day before the grant date. The options granted in 2013 vest over a ten-year period, with the first vesting occurring on the grant date. New shares are issued when options are exercised.

During the year ended December 31, 2013 we awarded 240,700 common shares to employees and 29,700 common shares to directors. The common share awards granted in 2013 vest over a ten-year period, with the first vesting occurring on the grant date. During the year ended December 31, 2013 we awarded 126,280 common shares to eligible employees from our employee stock ownership plan (ESOP). For additional information regarding grants of stock options and common shares and ESOP distributions see Note 14.

Stock-based employee compensation expense related to common share awards of \$2.4 million, \$2.1 million and \$2.7 million was included in income before income taxes during the years ended December 31, 2013, 2012 and 2011, respectively. The effect on net income for the years ended December 31, 2013, 2012 and 2011 was a reduction of \$1.6 million, \$1.4 million and \$1.8 million, respectively. Total compensation

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

expense for unvested stock options of \$5.2 million has yet to be recognized as of December 31, 2013. The weighted average period over which this remaining stock option expense will be recognized is approximately 4.39 years.

The fair value of each option grant is estimated on the date of grant using the Black-Scholes-Merton option-pricing model with the following weighted average assumptions: (1) dividend yields ranging from 1.6% to 5.1% based on historical dividends and market prices; (2) expected volatility of 17% to 33% based on historical volatility; (3) risk-free interest rates ranging from 1.7% to 6.5%; and (4) expected lives of seven to nine years based on previous grants.

(p) ***Segment Reporting***

We have two reportable segments, Community Banking and Consumer Finance. See note 20 for related disclosures.

(q) ***Derivative financial instruments interest rate swaps***

We recognize all derivative financial instruments as either assets or liabilities in the balance sheet and measure those instruments at fair value. The accounting for changes in the fair value of a derivative depends on

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(All dollar amounts presented in tables are in thousands, except as indicated)

the intended use of the derivative and the resulting designation. An entity that elects to use hedge accounting is required, at inception, to establish the method it will use for assessing the effectiveness of the hedging derivative and the measurement approach for determining the ineffective aspect of the hedge. Those methods must be consistent with our approach to managing risk.

We utilize interest rate swap agreements as part of the management of interest rate risk to hedge the interest rate risk on our trust preferred debentures. Amounts receivable or payable are recognized as accrued under the terms of the agreements and the differential is recorded as an adjustment to interest expense. The interest rate swaps are designated as cash flow hedges, with the effective portion of the derivative's unrealized gain or loss recorded as a component of other comprehensive income. The ineffective portion of the unrealized gain or loss, if any, would be recorded in other expense. See note 22 for related disclosures.

(r) Off-Balance-Sheet Instruments

In the normal course of business, we extend credit in the form of loan commitments, undisbursed lines of credit, and standby letters of credit. These off-balance-sheet instruments involve, to various degrees, elements of credit and interest rate risk not reported in the consolidated statement of financial condition. We utilize the same underwriting standards for these instruments as other extensions of credit.

(s) Use of Estimates

The preparation of financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amount of revenues and expenses during the reporting period. The estimates and assumptions that we deem important to our financial statements relate to the allowance for loan losses, the accounting treatment and valuation of our investment securities portfolio, the analysis of the carrying value of goodwill and income taxes. These estimates and assumptions are based on management's best estimates and judgment and we evaluate them using historical experience and other factors, including the current economic environment. We adjust our estimates and assumptions when facts and circumstances dictate. As future events cannot be determined, actual results could differ significantly from our estimates.

(t) Reclassification of Prior Years' Statements

Certain items previously reported have been reclassified to conform with the current year's reporting format.

(2) **Recent Accounting Pronouncements**

In February 2013, FASB issued Accounting Standards Update No. 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. This guidance requires entities to provide information about the amounts reclassified out of accumulated other comprehensive income by Component. Additionally, entities are required to present significant amounts reclassified out of other comprehensive income by the respective line items of net income, but only if the amount reclassified is required under U.S. GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required to be reclassified in their entirety to net income, entities are required to provide additional detail about these amounts. This guidance is effective for reporting periods beginning after December 15, 2012. The adoption of this standard did not have a material impact on our Consolidated Financial Statements. See note 19 on page 120.

In January 2014, the FASB issued ASU No. 2014-04, *Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. This guidance clarifies that an in substance repossession or foreclosure has occurred, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure. Interim and annual disclosure is required of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure. This guidance is effective using either the modified retrospective transition method or a prospective transition method for fiscal years and interim periods within those years, beginning after December 15, 2014, and early adoption is permitted. We do not expect that this standard will have a material impact on our results of operations or financial position.

In January 2014, the FASB issued ASU No. 2014-01, *Accounting for Investments in Qualified Affordable Housing Projects*. This guidance permits reporting entities to make an accounting policy election to account for investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. The proportional amortization method permits the amortization of the initial cost of the investment in proportion to the tax credits and other tax benefits received, and recognizes the net investment performance in the income statement as a component of income tax expense. This guidance is effective retrospectively for fiscal years and interim periods within those years, beginning after December 15, 2014, and early adoption is permitted. We do not expect that this standard will have a material impact on our results of operations or financial position.

Corporate debt issues	850	(39)	12,095	(2,652)	12,945	(2,691)
Equity securities	601	(21)	17	(1)	618	(22)
Residential mortgage-backed securities - non-agency			4,357	(256)	4,357	(256)
Residential mortgage-backed securities - agency	167,294	(1,055)	14,231	(30)	181,525	(1,085)
Total temporarily impaired securities	\$ 238,873	(1,401)	37,237	(2,940)	276,110	(4,341)

We review our portfolio of municipal securities quarterly for impairment. We initially evaluate investments in municipal securities for other-than-temporary impairment by comparing the fair value, provided to us by two third party pricing sources using quoted prices for similar assets that are actively traded, to the carrying value. When an investment's fair value is below 80% of the carrying value we then compare the stated interest rate to current market interest rates to determine if the decline in fair value is attributable to interest rates. If the stated interest rate approximates current interest rates for similar securities, we determine if the investment is rated and if so, if the rating has changed in the current period. If the rating has not changed during the current period, we review publicly available information to determine if there has been any negative change in the underlying municipality. As of December 31, 2013, none of the investments in our municipal securities portfolio had a book value that exceeded carrying value for more than 12 months.

Regularly, we perform an assessment to determine whether there have been any events or economic circumstances that indicate a security which has an unrealized loss is impaired other-than-temporarily. The assessment considers many factors including the severity and duration of the impairment; recent events specific to the issuer or industry; and for debt securities, external credit ratings, underlying collateral position and recent downgrades. For asset backed securities, we evaluate current characteristics of each security such as delinquency and foreclosure levels, credit enhancement and projected losses and coverage. It is possible that the underlying collateral of these securities will perform worse than current expectations, which may lead to adverse changes in cash flows on these securities and potential future losses. Events that may trigger material declines in fair values for these securities in the future would be, but are not limited to; deterioration of credit metrics, significantly higher levels of default and severity of loss on the underlying collateral, deteriorating credit enhancement and loss coverage ratios, or further illiquidity. For debt securities, credit related other-than-temporary impairment is recognized in earnings, while noncredit related other-than-temporary impairment on securities not expected to be sold, or otherwise disposed of, is recognized in other comprehensive income. We assert that we do not have the intent to sell these securities and it is more likely than not that we will not have to sell these securities before a recovery of our cost basis. For these reasons, we consider the unrealized losses to be temporary impairment losses. There are approximately 119 positions that are temporarily impaired at December 31, 2013. The aggregate carrying amount of cost-method investments, including both

held-to-maturity and available-for-sale, at December 31, 2013 was \$1.138 billion of which all were evaluated for impairment.

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The following table sets forth the categories of investment securities as of December 31, 2013 on which other-than-temporary impairment charges have been recorded in earnings:

Category	Amortized cost	Total Fair value	Unrealized gain	Accumulated impairment charges
Freddie Mac preferred shares	\$ 49	1,376	1,327	(4,951)
Trust preferred investments	17,259	17,704	445	(9,549)
Non-agency CMOs	3,105	3,212	107	(1,007)
	\$ 20,413	22,292	1,879	(15,507)

The table below shows a cumulative roll forward of credit related impairment losses recognized in earnings for debt securities held and not intended to be sold:

	2013	December 31, 2012
Beginning balance as of January 1 (1)	\$ 9,811	11,633
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized	713	
Reduction for losses realized during the year	(182)	(2,153)
Additional credit losses on debt securities for which other-than-temporary impairment was previously recognized		331
Ending balance as of December 31	\$ 10,342	9,811

(1) The beginning balance represents credit losses included in other-than-temporary impairment charges recognized on debt securities in prior periods.

(All dollar amounts presented in tables are in thousands, except as indicated)

(4) Loans Receivable and Allowance for Loan Losses

Loans receivable at December 31, 2013 and 2012 are summarized in the table below:

	2013	December 31, 2012
Personal Banking:		
Loans held for sale	\$ 221	15,441
Residential mortgage loans	2,491,917	2,416,419
Home equity loans	1,083,939	1,083,654
Other consumer loans	228,348	228,350
Total Personal Banking	3,804,425	3,743,864
Business Banking:		
Commercial real estate	1,665,274	1,615,701
Commercial loans	437,559	432,944
Total Business Banking	2,102,833	2,048,645
Total loans receivable, gross	5,907,258	5,792,509
Deferred loan costs/ (fees)	2,461	(1,624)
Allowance for loan losses	(71,348)	(73,219)
Undisbursed loan proceeds:		
Residential mortgage loans	(11,595)	(14,587)
Commercial real estate	(56,875)	(29,868)
Commercial loans	(34,958)	(43,950)
Total loans receivable, net	\$ 5,734,943	5,629,261

As of December 31, 2013, 2012 and 2011, we serviced loans for others approximating \$851.4 million, \$1.036 billion and \$1.150 billion, respectively. These loans serviced for others are not our assets and are not included in our financial statements.

As of December 31, 2013 and 2012, approximately 76% and 75%, respectively, of our loan portfolio was secured by properties located in Pennsylvania. We do not believe we have significant concentrations of credit risk to any one group of borrowers given our underwriting and collateral requirements.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Loans receivable as of December 31, 2013 and 2012 include \$1.771 billion and \$1.772 billion, respectively, of adjustable rate loans and \$4.136 billion and \$4.021 billion, respectively, of fixed rate loans.

While management uses available information to provide for losses, future additions to the allowance may be necessary based on changes in economic conditions. Current economic conditions have increased the uncertainty inherent in our estimates and assumptions. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize additions to the allowance based on their judgments about information available to them at the time of their examination. Management believes, to the best of their knowledge, that all known losses as of the balance sheet dates have been recorded.

The following table provides information related to the loan portfolio by portfolio segment and by class of financing receivable as of December 31, 2013:

	Recorded investment in loans receivable	Allowance for loan losses	Recorded investment in loans on nonaccrual (1)	Recorded investment in loans past due 90 days or more and still accruing	TDRs	Allowance related to TDRs	Additional commitments to customers with loans classified as TDRs

(1) Includes \$41.2 million of nonaccrual TDRs.

A loan is considered to be impaired, when, based on current information and events it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement including both contractual principal and interest payments. This includes non-accrual loans, loans more than 90 days delinquent and still accruing interest, loans for which we perform an impairment review and TDRs. Impairment is measured using one of three methods: (1) the present value of expected future cash flows discounted at the loan's effective interest rate; (2) the loan's observable market price; or (3) the fair value of collateral if the loan is collateral dependent. If the measure of the impaired loan is less than the recorded investment in the loan, a specific allowance is allocated for the impairment.

The following table provides information related to the composition of impaired loans by portfolio segment and by class of financing receivable at and for the year ended December 31, 2013:

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

	Nonaccrual loans 90 or more days delinquent	Nonaccrual loans less than 90 days delinquent	Loans less than 90 days delinquent reviewed for impairment	TDRs less than 90 days delinquent not included elsewhere	Total impaired loans	Average recorded investment in impaired loans	Interest income recognized on impaired loans

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Our loan portfolios include certain loans that have been modified in a troubled debt restructuring (TDR), where economic concessions have been granted to borrowers who have experienced financial difficulties. These concessions typically result from our loss mitigation activities and could include: extending the note's maturity date, permitting interest only payments, reducing the interest rate to a rate lower than current market rates for new debt with similar risk, reducing the principal payment, principal forbearance or other actions. These concessions are applicable to all loan segments and classes. Certain TDRs are classified as nonperforming at the time of restructuring and typically are returned to performing status after considering the borrower's sustained repayment performance for a reasonable period of at least six months.

When we modify loans in a TDR, we evaluate any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, the loan's observable market price or use the current fair value of the collateral, less selling costs, for collateral dependent loans. If we determine that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through an allowance estimate or a charge-off to the allowance. In periods subsequent to modification, we evaluate all TDRs, including those that have payment defaults, for possible impairment, using ASC 310-10. As a result, loans modified in a TDR may have the financial effect of increasing the specific allowance associated with the loan.

Loans modified in a TDR are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a TDR subsequently default, we evaluate the loan for possible further impairment. The allowance may be increased, adjustments may be made in the allocation of the allowance, partial charge-offs may be taken to further write-down the carrying value of the loan, or the loan may be charged-off completely.

The following table provides a roll forward of troubled debt restructurings for the periods indicated:

	For the years ended December 31,			
	2013		2012

Credit quality indicators: We categorize loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. We analyze business loans individually by classifying the loans by credit risk. Credit relationships greater than or

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

equal to \$1.0 million classified as special mention or substandard are reviewed quarterly for further deterioration or improvement to determine if the loan is appropriately classified. We use the following definitions for risk ratings other than pass:

Special mention Loans designated as special mention have specific, well-defined risk issues, which create a high level of uncertainty regarding the long-term viability of the business. Loans in this class are considered to have high-risk characteristics. A special mention loan exhibits material negative financial trends due to company-specific or systemic conditions. If these potential weaknesses are not mitigated, they threaten the borrower's capacity to meet its debt obligations. Special mention loans still demonstrate sufficient financial flexibility to react to and positively address the root cause of the adverse financial trends without significant deviations from their current business strategy. Their potential weaknesses deserve our close attention and warrant enhanced monitoring.

Table of Contents**NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Substandard Loans classified as substandard are inadequately protected by the current net worth and payment capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected.

Doubtful Loans classified as doubtful have all the weaknesses inherent in those classified as substandard. In addition, those weaknesses make collection or liquidation in full highly questionable and improbable. A loan classified as doubtful exhibits discernible loss potential, but a complete loss seems very unlikely. The possibility of a loss on a doubtful loan is high, but because of certain important and reasonably specific pending factors that may strengthen the loan, its classification as an estimated loss is deferred until a more exact status can be determined.

Loss Loans classified as loss are considered uncollectible and of such value that the continuance as a loan is not warranted. A loss classification does not mean that the loan has no recovery or salvage value; instead, it means that it is not practical or desirable to defer writing off all or a portion of a basically worthless loan even though partial recovery may be affected in the future.

The following table sets forth information about credit quality indicators as of December 31, 2013:

	Pass	Special mention	Substandard	Doubtful	Loss	Total
Personal Banking:						
Residential mortgage loans	\$ 2,464,057		17,626		1,321	2,483,004

Total	\$ 5,370,444	81,207	244,951	4,829	1,049	5,702,480

Our exposure to credit loss in the event of nonperformance by the other party to off-balance-sheet financial instruments is represented by the contract amount of the financial instrument. We use the same credit policies in making commitments for off-balance-sheet financial instruments as we do for on-balance-sheet instruments. Financial instruments with off-balance-sheet risk as of December 31, 2013 and 2012 are presented in the following table:

	December 31,	
	2013	2012
Loan commitments	\$ 174,998	66,973
Undisbursed lines of credit	432,334	401,685
Standby letters of credit	27,347	57,122
	\$ 634,679	525,780

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. We evaluate each customer's creditworthiness on a case-by-case basis. The amount of collateral we obtain upon extension of credit is based on management's credit evaluation of the counterparty. Collateral held varies but generally may include cash, marketable securities, real estate and other property.

Outstanding loan commitments at December 31, 2013, for fixed rate loans, were \$55.1 million. The interest rates on these commitments approximate market rates at December 31, 2013. Outstanding loan commitments at December 31, 2013 for adjustable rate loans were \$119.9

million. The fair values of these commitments are affected by fluctuations in market rates of interest.

We issue standby letters of credit in the normal course of business. Standby letters of credit are conditional commitments issued to guarantee the performance of a customer to a third party. Standby letters of credit generally are contingent upon the failure of the customer to perform according to the terms of the underlying contract with the third party. We are required to perform under a standby letter of credit when drawn upon by the guaranteed third party in the case of nonperformance by our customer. The credit risk associated with standby letters of credit is essentially the same as that involved in extending loans to customers and is subject to normal credit policies. Collateral may be obtained based on management's credit assessment of the customer. As of December 31, 2013, the maximum potential amount of future payments we could be required to make under these standby letters of credit is \$27.3 million, of which \$26.7 million is fully collateralized. A liability (which represents deferred income) of \$897,000 and \$843,000 has been recognized for the obligations

Table of Contents**NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements

(All dollar amounts presented in tables are in thousands, except as indicated)

as of December 31, 2013 and 2012, respectively, and there are no recourse provisions that would enable us to recover any amounts from third parties.

Mortgage servicing assets are recognized as separate assets when servicing rights are created through loan originations and the underlying loan is sold. Upon sale, the mortgage servicing right (MSR) is established, which represents the then-fair value of future net cash flows expected to be realized for performing the servicing activities. The fair value of the MSRs are estimated by calculating the present value of estimated future net servicing cash flows, taking into consideration actual and expected mortgage loan prepayment rates, discount rates, servicing costs and other economic factors, which are determined based on current market conditions. In determining the fair value of the MSRs, stochastic modeling is performed using variables such as the forward yield curve, prepayment rates, annual service cost, average life expectancy and option adjusted spreads. MSRs are amortized against mortgage banking income in proportion to, and over the period of, the estimated future net servicing income of the underlying mortgage loans. MSRs are recorded in other assets on the consolidated statements of financial condition.

Capitalized MSRs are evaluated quarterly for impairment based on the estimated fair value of those rights. The MSRs are stratified by certain risk characteristics, primarily loan term and note rate. If impairment exists within a risk stratification tranche, a valuation allowance is established through a charge to income equal to the amount by which the carrying value exceeds the fair value. If it is later determined all or a portion of the temporary impairment no longer exists for a particular tranche, the valuation allowance is reduced or eliminated. We do not directly hedge against realized or potential future impairment losses on our MSRs.

The following table shows changes in MSRs as of and for the year ended December 31, 2013:

		Servicing rights	Valuation allowance	Net carrying value and fair value
Balance at December 31, 2011	\$	3,655		3,655
Additions		2,285		2,285

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The following table presents additional information about the inputs used to determine the fair value of our MSRs at the periods indicated (dollar amounts not in thousands):

	2013	December 31, (Weighted average)	2012
Forward yield curve (5 year LIBOR swap)		1.47%	0.75%
Prepayment rates		10.9%	22.7%
Annual service cost per loan	\$	68	\$ 77
Average life expectancy (months)		82	45
Option adjusted spread (basis points)		750	800

(5) Accrued Interest Receivable

Accrued interest receivable as of December 31, 2013 and 2012 is presented in the following table:

	2013	December 31,	2012
Investment securities	\$	2,205	2,354
Mortgage-backed securities		1,079	1,359
Loans receivable		18,537	19,600
	\$	21,821	23,313

(6) Federal Home Loan Bank Stock

Our banking subsidiary is a member of the Federal Home Loan Bank system. As a member, we are required to maintain an investment in the capital stock of the FHLB of Pittsburgh, at cost, in an amount not less than 4.00% of borrowings outstanding plus 0.35% of member asset value, as defined by the FHLB of Pittsburgh, and 1.60% of certain letters of credit. The FHLB of Pittsburgh repurchased excess stock of \$3.1 million and \$2.1 million during the years ended December 31, 2013 and 2012, respectively. We received dividends on capital stock during the years ended December 31, 2013 and 2012 of \$371,000 and \$87,000, respectively.

(7) Premises and Equipment

Premises and equipment at December 31, 2013 and 2012 are summarized by major classification in the following table:

	December 31,	
	2013	2012
Land and land improvements	\$ 20,041	17,308
Office buildings and improvements	152,428	139,167
Furniture, fixtures and equipment	106,139	106,433
Leasehold improvements	12,211	12,298
Total, at cost	290,819	275,206
Less accumulated depreciation and amortization	(144,680)	(136,382)
Premises and equipment, net	\$ 146,139	138,824

Depreciation and amortization expense for the years ended December 31, 2013, 2012 and 2011 was \$11.9 million, \$11.5 million and \$11.7 million, respectively.

Premises used by certain of our offices are occupied under formal operating lease arrangements. The leases expire on various dates through 2027. Minimum annual rentals by fiscal year are summarized in the following table:

2014	\$ 3,808
2015	3,068
2016	2,636
2017	2,099
2018	1,547
Thereafter	5,144
	\$ 18,302

Rental expense for the years ended December 31, 2013, 2012 and 2011 was \$4.2 million, \$4.9 million and \$4.3 million, respectively.

(8) Goodwill and Other Intangible Assets

The following table provides information for intangible assets subject to amortization for the years ended December 31, 2013 and 2012:

	2013	December 31, 2012
Amortizable intangible assets:		
Core deposit intangibles gross	\$ 30,578	30,578
Acquisitions		
Less: accumulated amortization	(30,491)	(30,181)
Core deposit intangibles net	\$ 87	397
Customer and Contract intangible assets gross	6,197	3,779
Acquisitions		2,418
Less: accumulated amortization	(3,965)	(3,065)
Customer and Contract intangible assets net	\$ 2,232	3,132

The following information shows the actual aggregate amortization expense for the years ended December 31, 2013, 2012 and 2011 as well as the estimated aggregate amortization expense, based upon current levels of intangible assets, for each of the five succeeding fiscal years:

For the year ended December 31, 2011	\$ 1,819
For the year ended December 31, 2012	1,012
For the year ended December 31, 2013	1,210
For the year ending December 31, 2014	814
For the year ending December 31, 2015	571
For the year ending December 31, 2016	415
For the year ending December 31, 2017	259
For the year ending December 31, 2018	173

The following table provides information for the changes in the carrying amount of goodwill:

Community Banks	Consumer Finance	Total
--------------------	---------------------	-------

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Balance at December 31, 2011	\$	170,269	1,613	171,882
Goodwill acquired		2,579		2,579
Impairment losses				
Balance at December 31, 2012		172,848	1,613	174,461
Goodwill acquired		2		2
Impairment losses				
Balance at December 31, 2013	\$	172,850	1,613	174,463

We have determined that goodwill is not impaired as of December 31, 2013 and 2012. There were no changes in our operations that would cause us to update the goodwill impairment test performed as of June 30, 2013.

Certificates of deposit	1,667,397	1,886,089
	\$ 5,668,879	5,764,600

The aggregate amount of certificates of deposit with a minimum denomination of \$100,000 at December 31, 2013 and 2012 was \$413.1 million and \$475.5 million, respectively. While it is not our practice to solicit brokered deposits, we are a registered participant in the CDARS program and have twelve customers currently participating with a total balance of \$985,000 at December 31, 2013.

Generally, deposits in excess of \$250,000 are not federally insured. At December 31, 2013, we had \$1.032 billion of deposits in accounts exceeding \$250,000.

The following table summarizes the contractual maturity of the certificate accounts at December 31, 2013 and 2012:

	December 31,	
	2013	2012
Due within 12 months	\$ 665,779	871,580
Due between 12 and 24 months	297,653	232,392
Due between 24 and 36 months	325,281	206,578
Due between 36 and 48 months	276,858	275,723
Due between 48 and 60 months	93,278	281,683
After 60 months	8,548	18,133
	\$ 1,667,397	1,886,089

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The following table summarizes the interest expense incurred on the respective deposits for the years ended December 31, 2013, 2012 and 2011:

	Years ended December 31,		
	2013	2012	2011
Savings accounts	\$ 3,595	4,219	5,000
Interest-bearing checking accounts	576	792	960
Money market deposit accounts	3,042	3,605	4,243
Certificate accounts	22,066	34,761	50,518
	\$ 29,279	43,377	60,721

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

(10) Borrowed Funds

Borrowed funds at December 31, 2013 and 2012 are presented in the following table:

	2013		December 31,		2012	
	Amount	Average rate	Amount	Average rate	Amount	Average rate
Term notes payable to the FHLB of Pittsburgh:						
Due within one year	\$ 2	1.78%			23	1.75%
Due between one and two years	110,000	2.53%				2.53%
Due between two and three years	145,445	3.24%			110,000	2.53%
Due between three and four years	125,000	3.68%			145,493	3.24%
Due between four and five years	125,000	4.03%			125,000	3.68%
Due between five and ten years	220,000	4.07%			315,000	4.25%
	725,447				695,516	
Revolving line of credit, FHLB of Pittsburgh						
Securities sold under agreement to repurchase, due within one year	156,198	0.31%			164,531	0.32%
Total borrowed funds	\$ 881,645				860,047	

During the first and second quarters of 2013 we took advances totaling \$30.0 million with a weighted effective interest rate of 2.03% and maturities between seven and ten years from the FHLB of Pittsburgh. Borrowings from the FHLB of Pittsburgh are secured by our residential first mortgage loans and other qualifying loans. Certain of these borrowings are subject to restrictions or penalties in the event of prepayment. During 2010, we restructured \$695.0 million of FHLB of Pittsburgh borrowings reducing the annual cost by 0.22%, while extending the average maturities of these borrowings by 3.5 years. We incurred a penalty of \$52.2 million in conjunction with this restructuring, which will be amortized over the life of the borrowings into interest expense. As of December 31, 2013, \$28.7 million remains to be amortized.

The revolving line of credit with the FHLB of Pittsburgh carries a commitment of \$150.0 million. The rate is adjusted daily by the FHLB of Pittsburgh, and any borrowings on this line may be repaid at any time without penalty.

The securities sold under agreements to repurchase are collateralized by various securities held in safekeeping by the FHLB of Pittsburgh. The market value of such securities exceeds the value of the securities sold under agreements to repurchase. The average amount of such security repurchase agreements outstanding in the years ended December 31, 2013, 2012 and 2011 was \$150.1 million, \$154.6 million and \$140.8 million, respectively. The maximum amount of security repurchase agreements outstanding during the years ended December 31, 2013, 2012

and 2011 was \$171.8 million, \$176.5 million and \$151.8 million, respectively.

(All dollar amounts presented in tables are in thousands, except as indicated)

(11) Income Taxes

Total income tax was allocated for the years ended December 31, 2013, 2012 and 2011 as follows:

		Years ended December 31,		
		2013	2012	2011
Income before income taxes	\$	26,331	26,368	26,857
Shareholders' equity for unrealized (loss)/ gain on securities available-for-sale		(12,177)	1,204	7,029
Shareholders' equity for tax benefit for excess of fair value above cost of stock benefit plans		(635)	(403)	(610)
Shareholders' equity for pension adjustment		9,904	6,056	(11,487)
Shareholders' equity for swap fair value adjustment		1,714	246	(1,506)
Goodwill attributable to acquisition			863	
	\$	25,137	34,334	20,283

Income tax expense (benefit) applicable to income before taxes consists of:

		Years ended December 31,		
		2013	2012	2011
Current	\$	24,908	23,073	19,108
Deferred		1,423	3,295	7,749
	\$	26,331	26,368	26,857

A reconciliation of the expected federal statutory income tax rate to the effective rate, expressed as a percentage of pretax income for the years ended December 31, 2013, 2012 and 2011, is as follows:

		Years ended December 31,		
		2013	2012	2011
Expected tax rate		35.0%	35.0%	35.0%
Tax-exempt interest income		(4.3)%	(5.0)%	(5.4)%
State income tax, net of federal benefit		2.1%	2.8%	2.9%
Bank-owned life insurance		(1.9)%	(1.9)%	(2.3)%

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Dividends on stock plans	(1.1)%	(1.3)%	(0.9)%
Low income housing and historic tax credits	(1.6)%	(0.6)%	(0.6)%
Other	0.1%	0.3%	0.8%
Effective tax rate	28.3%	29.3%	29.5%

Table of Contents**NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES**

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2013 and 2012 are presented below:

	2013	December 31, 2012
Deferred tax assets:		
Deferred fee income	\$ 197	280
Deferred compensation expense	3,727	3,463
Net operating loss carryforwards	208	482
Bad debts	20,700	20,639
Accrued postretirement benefit cost	716	734
Stock benefit plans	1,379	1,128
Writedown of investment securities	5,301	6,032
Reserve for uncollected interest	2,477	4,194
Accrued expenses	928	890
Pension and postretirement benefits	2,202	12,106
Unrealized loss on the fair value of derivatives	2,813	4,527
Marketable securities available for sale	2,079	
Other	758	582
	43,485	55,057
Deferred tax liabilities:		
Pension expense	4,827	5,606
Marketable securities available for sale		10,098
Purchase accounting	1,723	1,808
Intangible asset	19,438	17,958
Mortgage servicing rights	677	1,151
Fixed assets	7,409	7,814
Other	474	821
	34,548	45,256
Net deferred tax asset/ (liability)	\$ 8,937	9,801

We have determined that no valuation allowance is necessary for the deferred tax assets because it is more likely than not that these assets will be realized through carry-back to taxable income in prior years, future reversals of existing temporary differences, and through future taxable income. We will continue to review the criteria related to the recognition of deferred tax assets on a regular basis.

Under provisions of the Internal Revenue Code (IRC), Northwest has approximately \$594,000 of federal net operating losses, which expire in 2026 and 2027. These net operating losses, which were acquired as part of previous acquisitions, are subject to annual carry-forward limitations imposed by IRC section 382. We believe the limitations will not prevent the carry-forward benefits from being utilized.

We utilize a comprehensive model to recognize, measure, present and disclose in our financial statements uncertain tax positions that the company has taken or expects to take on a tax return. At December 31, 2013 there were no unrecognized tax benefits that, if recognized, would favorably affect the effective income tax rate. We recognize interest accrued and penalties (if any) related to unrecognized tax benefits in income tax expense. During the year ended December 31, 2013, we did not accrue any interest. At December 31, 2013, we had no amount accrued for interest or the payment of penalties.

We are subject to routine audits of our tax returns by the Internal Revenue Service as well as all states in which we conduct business. We are subject to audit by the Internal Revenue Service for the tax periods

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

ended December 31, 2013, 2012, 2011 and 2010 and subject to audit by any state in which we conduct business for the tax periods ended December 31, 2013, 2012, 2011 and 2010.

(12) Shareholders Equity

Retained earnings are partially restricted in connection with regulations related to the insurance of deposit accounts, which requires Northwest to maintain certain statutory reserves. Northwest may not pay dividends on or repurchase any of its common stock if the effect thereof would reduce retained earnings below the level of adequate capitalization as defined by federal and state regulators.

In tax years prior to fiscal 1997, Northwest was permitted, under the IRC, to deduct an annual addition to a reserve for bad debts in determining taxable income, subject to certain limitations. Bad debt deductions for income tax purposes are included in taxable income of later years only if the bad debt reserve is used subsequently for purposes other than to absorb bad debt losses. Because Northwest does not intend to use the reserve for purposes other than to absorb losses, no deferred income taxes have been provided prior to fiscal 1987. Retained earnings at December 31, 2013 and 2012 include approximately \$39.1 million representing such bad debt deductions for which no deferred income taxes have been provided.

(13) Earnings Per Share

Basic earnings per common share (EPS) is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding for the period, without considering any dilutive items. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in our earnings. All stock options outstanding during the year ended December 31, 2013 were included in the computation of diluted earnings per share because the stock options exercise price was less than the average market price of the common shares of \$13.25. For the years ended December 31, 2012 and 2011, there were 3,101,881 and 2,606,398 options outstanding, respectively, with a weighted average strike price of \$12.28 and \$12.32 per share, respectively, that were excluded from the calculation of earnings per share because the stock options exercise price was greater than the average market price of the common shares of \$12.11 and \$12.16, respectively. The computation of basic and diluted earnings per share for the years ended December 31, 2013, 2012 and 2011 follows:

	Years ended December 31,		
	2013	2012	2011

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Net income available to common shareholders	\$	66,739	63,560	64,151
Weighted average common shares outstanding		90,626	93,913	99,802
Dilutive potential shares due to effect of stock options		845	288	376
Total weighted average common shares and dilutive potential shares	\$	91,471	94,201	100,178
Basic earnings per share:	\$	0.74	0.68	0.64
Diluted earnings per share:	\$	0.73	0.68	0.64

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

(14) Employee Benefit Plans

(a) Pension Plans

We maintain noncontributory defined benefit pension plans covering substantially all employees and members of our board of directors. Retirement benefits are based on certain compensation levels, age, and length of service. Contributions are based on an actuarially determined amount to fund not only benefits attributed to service to date but also for those expected to be earned in the future. In addition, we have an unfunded Supplemental Executive Retirement Plan (SERP) to compensate those executive participants eligible for the defined benefit pension plan whose benefits are limited by Section 415 of the IRC.

We also sponsor a retirement savings plan in which substantially all employees participate. We provide a matching contribution of 50% of each employee's contribution to a maximum of 6% of the employee's compensation.

Total expense for all retirement plans, including defined benefit pension plans, was approximately \$4.1 million, \$9.3 million and \$7.0 million, for the years ended December 31, 2013, 2012 and 2011, respectively.

Components of net periodic pension cost and other amounts recognized in other comprehensive income:

The following table set forth the net periodic pension cost for the defined benefit pension plans for the years ended December 31, 2013, 2012 and 2011:

		Years ended December 31,		
		2013	2012	2011
Service cost	\$	4,551	7,431	5,713
Interest cost		5,203	5,729	5,452
Expected return on plan assets		(8,551)	(7,793)	(6,009)
Net amortization and deferral		1,356	2,600	516
Net periodic pension cost	\$	2,559	7,967	5,672

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The following table sets forth other changes in the defined benefit pension plans' plan assets and benefit obligations recognized in other comprehensive income:

	Years ended December 31,		
	2013	2012	2011
Net loss/ (gain)	\$ (27,568)	11,167	29,319
Prior service cost (credit)	(14)	(26,919)	
Amortization of prior service cost	2,321	160	160
Total recognized in other comprehensive income	\$ (25,261)	(15,592)	29,479
Total recognized in net periodic pension cost and other comprehensive income/ (loss)	\$ (22,702)	(7,625)	35,151

The estimated net loss and prior service credit for the defined benefit pension plan that will be amortized from accumulated other comprehensive income into net periodic cost over the next year is \$1.4 million and \$(2.3) million, respectively.

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The following table sets forth information for the defined benefit pension plans funded status at December 31, 2013 and 2012:

	December 31,	
	2013	2012
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 129,802	\$ 131,927
Service cost	4,551	7,431
Interest cost	5,203	5,729
Amendments (1)	(14)	(26,919)
Actuarial (gain)/ loss	(14,422)	14,527
Benefits paid	(3,353)	(2,893)
Benefit obligation at end of year	\$ 121,767	129,802
Change in plan assets:		
Fair value of plan assets at beginning of year	115,489	105,159
Actual return on plan assets	18,020	8,393
Employer contributions	335	4,830
Benefits paid	(3,353)	(2,893)
Fair value of plan assets at end of period	\$ 130,491	115,489
Funded status at end of year	\$ 8,724	(14,313)

(1) The Retirement Plan was amended to freeze all benefits earned through March 31, 2013 based on the plan formula using years of service and average monthly compensation as of March 31, 2013. The amendments also provide that, for service commencing January 1, 2013, benefits will be earned equal to 1% of career average pay for each year that a participant completes at least 1,000 hours of service. Also, effective April 1, 2013, participants who are eligible to receive required minimum distributions due to attaining age 70 ½ will be required to begin receiving benefits even though they remain employed by us.

The following table sets forth the assumptions used to develop the net periodic pension cost:

	Years ended December 31,		
	2013	2012	2011
Discount rate	4.06%	4.39%	5.57%
Expected long-term rate of return on assets	7.50%	7.50%	7.50%
Rate of increase in compensation levels	3.00%	3.00%	3.00%

The following table sets forth the assumptions used to determine benefit obligations at the end of each period:

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

	Years ended December 31,		
	2013	2012	2011
Discount rate	4.86%	4.06%	4.39%
Expected long-term rate of return on assets	7.50%	7.50%	7.50%
Rate of increase in compensation levels	3.00%	3.00%	3.00%

The expected long-term rate of return on assets is based on the expected return of each of the asset categories, weighted based on the median of the target allocation for each category. We use the Citigroup Pension Liability Index rates matching the duration of our benefit payments as of the measurement date to determine the discount rate.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The accumulated benefit obligation for the funded defined benefit pension plan was \$116.8 million, \$124.5 million and \$102.4 million at December 31, 2013, 2012 and 2011, respectively. The accumulated benefit obligation for all unfunded defined benefit plans was \$5.0 million, \$5.1 million and \$4.9 million at December 31, 2013, 2012 and 2011, respectively.

The following table sets forth certain information related to our pension plans:

		December 31,	
		2013	2012
Projected benefit obligation	\$	121,767	129,802
Accumulated benefit obligation		121,767	129,599
Fair value of plan assets		130,491	115,489

We do not anticipate making a contribution to our defined benefit pension plan during the year ending December 31, 2014.

The investment policy as established by the Plan Administrative Committee, to be followed by the Trustee, is to invest assets based on the target allocations shown in the table below. To meet target allocation ranges set forth by the Plan Administrative Committee, periodically, the assets are reallocated by the Trustee. The investment policy is reviewed periodically to determine if the policy should be changed. Pension assets are conservatively invested with the goal of providing market or better returns with below market risks. Assets are invested in a balanced portfolio composed primarily of equities, fixed income, and cash or cash equivalent investments. The Trustee tries to maintain an approximate asset mix position of 30% to 60% equities and 20% to 50% bonds.

A maximum of 10% may be invested in any one stock, including the stock of Northwest Bancshares, Inc. The objective of holding equity securities is to provide capital appreciation consistent with the ownership of the common stocks of medium to large companies. Acceptable bond investments are direct or agency obligations of the U.S. Government or investment grade corporate bonds. The average maturity of the bond portfolio shall not exceed 10 years.

The following table sets forth the weighted average asset allocation of defined benefit plans:

Target Allocation	2013	December 31,	2012
------------------------------	-------------	---------------------	-------------

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

Debt securities	20	50%	20%	25%
Equity securities	30	60%	66%	57%
Other	5	50%	14%	18%
Total			100%	100%

All of the assets held by the defined benefit pension plan are measured and recorded at estimated fair value on our balance sheet on a recurring basis as Level 1 assets, as defined by the fair value hierarchy defined in note 15.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The following table sets forth the pension plan assets as of December 31, 2013 and 2012:

		December 31,	
		2013	2012
Mutual funds	debt	\$ 25,708	29,057
Mutual funds	equity	86,300	65,346
Cash		18,483	21,086

The benefits expected to be paid in each year from 2014 to 2018 are \$3.7 million, \$3.9 million, \$4.4 million, \$4.7 million and \$5.1 million, respectively. The aggregate benefits expected to be paid in the five years from 2019 to 2023 are \$30.8 million. The expected benefits to be paid are based on the same assumptions used to measure our benefit obligations at December 31, 2013 and include estimated future employee service.

(b) Postretirement Healthcare Plan

In addition to pension benefits, we provide postretirement healthcare benefits for certain employees who were employed as of October 1, 1993 and were at least 55 years of age on that date. We use the accrual method of accounting for postretirement benefits other than pensions.

Components of net periodic benefit cost and other amounts recognized in other comprehensive income:

The following table sets forth the net periodic benefit cost for the postretirement healthcare benefits plan for the years ended December 31, 2013, 2012 and 2011:

		Years ended December 31,		
		2013	2012	2011
Service cost	\$			
Interest cost		63	66	86
Amortization of net loss		53	50	52
Net period benefit cost	\$	116	116	138

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The following table sets forth other changes in the postretirement healthcare plan's plan assets and benefit obligations recognized in other comprehensive income:

		Years ended December 31,		
		2013	2012	2011
Net loss/ (gain)	\$	(136)	64	(26)
Total recognized in other comprehensive income	\$	(136)	64	(26)
Total recognized in net periodic benefit cost and other comprehensive income	\$	(20)	180	112

The estimated net loss for the postretirement healthcare benefit plan that will be amortized from accumulated other comprehensive income into net periodic benefit cost over the next year is \$48,000.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

The following table sets forth the funded status of the postretirement healthcare benefit plan at December 31, 2013 and 2012:

	2013	December 31, 2012	2012
Change in benefit obligation:			
Benefit obligation at beginning of year	\$	1,620	1,588
Service cost			
Interest cost		63	66
Actuarial (gain)/ loss		(83)	114
Benefits paid		(175)	(148)
Benefit obligation at end of year	\$	1,425	1,620
Change in plan assets:			
Fair value of plan assets at beginning of year			
Employer contributions		176	148
Benefits paid		(176)	(148)
Fair value of plan assets at end of year	\$		
Funded status at year end	\$	(1,425)	(1,620)

The assumptions used to develop the preceding information for postretirement healthcare benefits are as follows:

	2013	Years ended December 31,		2011
		2012		
Discount rate		4.06%	4.39%	5.57%
Monthly cost of healthcare insurance per beneficiary (1)	\$	351	327	320
Annual rate of increase in healthcare costs		4.00%	4.00%	4.00%

(1) Not in thousands

If the assumed rate of increase in healthcare costs was increased by one percentage point to 5% from the level of 4% presented above, the interest cost component of net periodic postretirement healthcare benefit cost would increase by \$8,000 and the accumulated postretirement benefit obligation for healthcare benefits would increase by \$57,000.

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The following table sets forth information for plans with an accumulated benefit obligation in excess of plan assets:

		December 31,	
		2013	2012
Projected benefit obligation	\$	1,425	1,620
Accumulated benefit obligation		1,425	1,620
Fair value of plan assets

(All dollar amounts presented in tables are in thousands, except as indicated)

(c) ***Employee Stock Ownership Plan***

We have a leveraged employee stock ownership plan (ESOP) for employees who have attained age 21 and who have completed a 12-month period of employment during which they worked at least 1,000 hours. Northwest is expected to make annual cash contributions to the ESOP until 2029 when the loan matures. At December 31, 2013, the loan balance was \$24.4 million.

ESOP compensation expense was \$1.7 million for the year ended December 31, 2013, and \$1.5 million for the years ended December 31, 2012 and 2011.

Shares of common stock are held by the ESOP and will be allocated to eligible participants annually based upon a percentage of each participant's eligible compensation. Shares are scheduled for release as the loan is repaid based on the interest method. The amortization schedule calls for 126,280 shares to be released each December 31. At December 31, 2013, 2,020,490 shares of common stock remained unallocated. The fair value of unallocated common stock held by the ESOP at December 31, 2013 was \$29.9 million.

Compensation expense related to the ESOP will be recognized at an amount equal to the number of common shares committed to be released by the ESOP to participants' accounts multiplied by the average fair value of the common stock during the reporting period. The difference between the fair value of the shares of the common stock committed to be allocated by the ESOP to participants' accounts for the period and the average cost of those common shares is recorded as an adjustment to either additional paid-in capital or retained earnings.

(d) ***Common Stock Awards***

On April 20, 2011, we established the Northwest Bancshares, Inc. 2011 Equity Incentive Plan with 2,806,233 common shares authorized. On May 18, 2011, we awarded employees 1,165,949 common shares and outside directors 108,000 common shares with a grant date fair value of \$12.34 per share (total market value of \$15.7 million at issuance). On May 23, 2012, we awarded employees 239,077 common shares and outside directors 24,300 common shares with a grant date fair value of \$11.64 per share (total market value of \$3.1 million at issuance). On May 15, 2013, we awarded employees 240,700 common shares and outside directors 29,700 common shares with a grant date fair value of \$12.55 per share (total market value of \$3.4 million at issuance). Total common shares forfeited from the 2011 plan were 68,079, of which, 20,945 shares were forfeited during the year ended December 31, 2013. Forfeited shares may be awarded to other eligible recipients in future grants until the plan termination date in 2021. Common shares vest over a ten-year period with the first vesting occurring on the grant date. As of December 31, 2013, 30% of the 2011 issuances have vested, 20% of the 2012 issuances have vested and 10% of the 2013 issuances have

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

vested. Once shares have vested, they are no longer restricted. Compensation expense, in the amount of the fair market value of the common stock at the date of the grant, will be recognized pro rata over the periods in which the shares vest. While restricted, the recipients are entitled to all shareholder rights, except that the shares may not be sold, pledged, or otherwise disposed of and are required to be held in a trust.

(e) *Stock Option Plans*

On May 21, 2008, we established the 2008 Stock Option Plan. This Plan authorized the grant of stock options and limited stock rights for 3,937,500 shares of our common stock. On January 19, 2011, we granted employees 515,293 stock options and outside directors 60,000 stock options with an exercise price of \$12.12 per share. On April 20, 2011, we granted an outside director 30,000 stock options with an exercise price of \$12.17 per share. These options are exercisable for a period of ten years from the grant date with each recipient vesting over a seven year period, with the first vesting date being one year from the grant date. On April 20, 2011, we established the Northwest Bancshares, Inc. 2011 Equity Incentive Plan, which authorizes the granting of 7,015,583 stock options. On May 18, 2011, we granted employees 2,331,898 stock options and outside

directors 270,000 stock options with an exercise price of \$12.32 per share. On May 23, 2012, we granted employees 508,573 stock options and outside directors 64,800 stock options with an exercise price of \$11.70 per share. On May 15, 2013, we granted employees 511,100 stock options and outside directors 79,200 stock options with an exercise price of \$12.44 per share. Awarded stock options vest over a ten-year period with the first vesting occurring on the grant date with a ten year exercise period from the grant date.

The following table summarizes the activity in our option plans during the years ended December 31, 2013, 2012 and 2011 (Amounts in this table are not in thousands):

	2013		Years ended December 31, 2012		2011	
	Number	Weighted average exercise price	Number	Weighted average exercise price	Number	Weighted average exercise price
Balance at beginning of year	7,044,753	\$ 11.21	6,902,247	\$ 11.00	4,184,873	\$ 9.56
Granted (1)	590,300	12.44	573,373	11.70	3,207,191	12.28

(15) Disclosures About Fair Value of Financial Instruments

We are required to disclose fair value information about financial instruments whether or not recognized in the consolidated statement of financial condition. Fair value information of certain financial instruments and all nonfinancial instruments is not required to be disclosed. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

Financial assets and liabilities recognized or disclosed at fair value on a recurring basis and certain financial assets and liabilities on a non-recurring basis are accounted for using a three-level hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. This hierarchy gives the highest priority to quoted prices with readily available independent data in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable market inputs (Level 3). When various inputs for measurement fall within different levels of the fair value hierarchy, the lowest level input that has a significant impact on fair value measurement is used.

Financial assets and liabilities are categorized based upon the following characteristics or inputs to the valuation techniques:

- Level 1 Financial assets and liabilities for which inputs are observable and are obtained from reliable quoted prices for identical assets or liabilities in actively traded markets. This is the most reliable fair value measurement and includes, for example, active exchange-traded equity securities.

- Level 2 Financial assets and liabilities for which values are based on quoted prices in markets that are not active or for which values are based on similar assets or liabilities that are actively traded. Level 2 also includes pricing models in which the inputs are corroborated by market data, for example, matrix pricing.

- Level 3 Financial assets and liabilities for which values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. Level 3 inputs include the following:
 - Quotes from brokers or other external sources that are not considered binding;

- Quotes from brokers or other external sources where it cannot be determined that market participants would in fact transact for the asset or liability at the quoted price;
- Quotes and other information from brokers or other external sources where the inputs are not deemed observable.

We are responsible for the valuation process and as part of this process may use data from outside sources in establishing fair value. We perform due diligence to understand the inputs used or how the data was calculated or derived. We also corroborate the reasonableness of external inputs in the valuation process.

The carrying amounts reported in the consolidated statement of financial condition approximate fair value for the following financial instruments: cash on hand, interest-earning deposits in other institutions, federal funds sold and other short-term investments, accrued interest receivable, accrued interest payable, and marketable securities available-for-sale.

Marketable Securities

Where available, market values are based on quoted market prices, dealer quotes, and prices obtained from independent pricing services.

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Debt securities available for sale - Generally, debt securities are valued using pricing for similar securities, recently executed transactions and other pricing models utilizing observable inputs. The valuation for most debt securities is classified as Level 2. Securities within Level 2 include corporate bonds, municipal bonds, mortgage-backed securities and US government obligations. Certain debt securities which were AAA rated at purchase do not have an active market and as such we have used an alternative method to determine the fair value of these securities. The fair value has been determined using a discounted cash flow model using market assumptions, which generally include cash flow, collateral and other market assumptions. As such, securities which otherwise would have been classified as level 2 securities if an active market for those assets or similar assets existed are included herein as level 3 assets. Other debt securities, pooled trust preferred securities rated below AA at purchase, have a fair value based on a discounted cash flow model using similar assumptions to those noted above and accordingly are classified as level 3 assets.

Equity securities available for sale - Level 1 securities include publicly traded securities valued using quoted market prices. We consider the financial condition of the issuer to determine if the securities have indicators of impairment.

Debt securities held to maturity - The fair value of debt securities held to maturity is determined in the same manner as debt securities available for sale.

Loans Receivable

Loans with comparable characteristics including collateral and re-pricing structures are segregated for valuation purposes. Each loan pool is separately valued utilizing a discounted cash flow analysis. Projected monthly cash flows are discounted to present value using a market rate for comparable loans, which is not considered an exit price. Characteristics of comparable loans include remaining term, coupon interest, and estimated prepayment speeds. Delinquent loans are separately evaluated given the impact delinquency has on the projected future cash flow of the loan including the approximate discount or market rate, which is not considered an exit price.

FHLB Stock

Due to the restrictions placed on the transferability of FHLB stock it is not practical to determine the fair value.

Deposit Liabilities

The estimated fair value of deposits with no stated maturity, which includes demand deposits, money market, and other savings accounts, is the amount payable on demand. Although market premiums paid for depository institutions reflect an additional value for these low-cost deposits, adjusting fair value for any value expected to be derived from retaining those deposits for a future period of time or from the benefit that results from the ability to fund interest-earning assets with these deposit liabilities is prohibited. The fair value estimates of deposit liabilities do not include the benefit that results from the low-cost funding provided by these deposits compared to the cost of borrowing funds in the market. Fair values for time deposits are estimated using a discounted cash flow calculation that applies contractual cost currently being offered in the existing portfolio to current market rates being offered locally for deposits of similar remaining maturities. The valuation adjustment for the portfolio consists of the present value of the difference of these two cash flows, discounted at the assumed market rate of the corresponding maturity.

Borrowed Funds

Fixed rate advances are valued by comparing their contractual cost to the prevailing market cost. The carrying amount of repurchase agreements approximates fair value.

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Junior Subordinated Debentures

The fair value of junior subordinated debentures is calculated using the discounted cash flows at the prevailing rate of interest.

Cash flow hedges Interest rate swap agreements (swaps)

The fair value of the swaps is the amount we would have expected to pay to terminate the agreements and is based upon the present value of the expected future cash flows using the LIBOR swap curve, the basis for the underlying interest rate.

Off-Balance Sheet Financial Instruments

These financial instruments generally are not sold or traded, and estimated fair values are not readily available. However, the fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements. Commitments to extend credit are generally short-term in nature and, if drawn upon, are issued under current market terms. At December 31, 2013 and 2012, there was no significant unrealized appreciation or depreciation on these financial instruments.

The following table sets forth the carrying amount and estimated fair value of our financial instruments included in the consolidated statement of financial condition at December 31, 2013 and 2012:

	Carrying amount	Estimated fair value	December 31, 2013

(All dollar amounts presented in tables are in thousands, except as indicated)

The table below presents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the year ended December 31, 2013 and 2012:

	December 31,		2012	
	Equity securities	Debt securities	Equity securities	Debt securities
Beginning balance January 1,	\$	11,119		9,657
Total net realized investment gains/ (losses) and net change in unrealized appreciation/ (depreciation):				
Included in net income as OTTI		(713)		
Included in other comprehensive income		1,845		1,462
Purchases				
Sales				
Transfers into Level 3				
Transfers out of Level 3				
Ending balance December 31,	\$	12,251		11,119

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as loans held for sale, loans measured for impairment, real estate owned, and mortgage servicing rights.

The following table represents the fair market measurement for only those nonrecurring assets that had a fair market value below the carrying amount as of December 31, 2013:

	Level 1	Level 2	Level 3	Total assets at fair value
Loans evaluated for impairment	\$		62,730	62,730
Real estate owned			18,203	18,203
Total assets	\$		80,933	80,933

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

The following table represents the fair market measurement for only those nonrecurring assets that had a fair market value below the carrying amount as of December 31, 2012:

	Level 1	Level 2	Level 3	Total assets at fair value
Loans evaluated for impairment	\$		87,087	87,087
Real estate owned			26,165	26,165
Total assets	\$		113,252	113,252

Table of Contents

NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

December 31, 2013, 2012 and 2011

(All dollar amounts presented in tables are in thousands, except as indicated)

Loans measured for impairment A loan is considered to be impaired as described in Footnote 1 (f). We classify impaired loans as nonrecurring Level 3.

Real estate owned Real estate owned is comprised of property acquired through foreclosure or voluntarily conveyed by borrowers. These assets are recorded on the date acquired at the lower of the related loan balance or fair value, less estimated disposition costs, with the fair value being determined by appraisal. Subsequently, foreclosed assets are valued at the lower of the amount recorded at acquisition date or fair value, less estimated disposition costs. We classify real estate owned as nonrecurring Level 3.

The following table presents additional quantitative information about assets measured at fair value on a recurring and nonrecurring basis and for which we have utilized Level 3 inputs to determine fair value at December 31, 2013:

Debt securities	\$ 12,251	Discounted cash flow	Discount margin Default rates Prepayment speeds	0.35% to 2.10% (0.69)% 1.00% 1.00% annually
Loans measured for impairment	62,730	Appraisal value (1)	Estimated costs to sell	10%
Real estate owned	18,203	Appraisal value (1)	Estimated costs to sell	10%

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which may include level 3 inputs that are not identifiable, or by using the discounted cash flow method if the loan is not collateral dependent.

The significant unobservable inputs used in the fair value measurement of our debt securities are discount margins, default rates and prepayment speeds. Significant increases in any of those rates would result in a significantly lower fair value measurement.

(16) Regulatory Capital Requirements

Our banking subsidiary is subject to various regulatory capital requirements administered by the federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by the regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices must be met. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require our banking subsidiary to maintain minimum amounts and ratios (set forth in the table below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier I capital to average assets (as defined). As of December 31, 2013 and 2012, our banking subsidiary exceeded all capital adequacy requirements to which they were subject.

As of December 13, 2013, the most recent notification from the FDIC categorized Northwest Savings Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the bank must maintain total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the bank's categories. At December 31, 2013, the maximum amount available for dividend payments by Northwest Savings Bank to us, while maintaining its well capitalized status, was approximately \$47.5 million.

Northwest Savings Bank	810,727	10.41%	311,473	4.00%	389,340	5.00%

(1) The Federal Reserve does not yet have formal capital requirements established for Savings and Loan holding companies.

(17) Contingent Liabilities

We and our subsidiaries are subject to a number of asserted and unasserted claims encountered in the normal course of business. Management believes that the aggregate liability, if any, that may result from such potential litigation will not have a material adverse effect on our financial statements. However, we cannot presently determine whether or not any claims against us will have a material adverse effect on our results of operations in any future reporting period.

(18) Legal Proceedings

We establish accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated. As of December 31, 2013 we have accrued \$2.3 million, this amount is based on our analysis of currently available information and is subject to significant judgment and a variety of assumptions and uncertainties. Any such accruals are adjusted thereafter as appropriate to reflect changes in circumstances. Due

to the inherent subjectivity of assessments and unpredictability of outcomes of legal proceedings, any amounts accrued may not represent the ultimate loss to us from legal proceedings.

Toth v. Northwest Savings Bank

On May 7, 2012, Ashley Toth (Plaintiff) filed a putative class action complaint in the Court of Common Pleas of Allegheny County, Pennsylvania against Northwest Savings Bank (Northwest). Plaintiff s complaint alleged state law claims related to Northwest s order of posting ATM and debit card transactions and the assessment of overdraft fees on deposit customer accounts. Northwest filed preliminary objections to the putative class action complaint on June 29, 2012. On September 6, 2012, Plaintiff filed an amended putative class action complaint containing substantially the same allegations as the initial putative class action complaint. On November 5, 2012, Northwest filed preliminary objections to the amended putative class action complaint. Plaintiff filed her opposition to Northwest s preliminary objections on December 6, 2012, and Northwest filed its reply in support of the preliminary objections on January 3, 2013. On June 25, 2013, the court entered an order, granting in part and overruling in part, Northwest s preliminary objections.

On November 18, 2013, the parties participated in a mediation and reached an agreement in principle, subject to the preparation and execution of a mutually acceptable settlement agreement and release, to fully, finally and completely settle, resolve, discharge and release all claims that have been or could have been asserted in the action on a class-wide basis. The proposed settlement contemplates that, in return for a full and complete release of claims by Plaintiff and the settlement class members, Northwest will create a settlement fund for distribution to the settlement class members after certain court-approved reductions, including for attorney s fees and expenses. The proposed settlement is subject to preliminary and final court approval.

USDA v. Kathleen M. Schwab and Brian G. Schwab v. Northwest Savings Bank

On December 19, 2012, the Schwabs filed a Complaint against us in the Court of Common Pleas of Clarion County, Pennsylvania, No. 409-2012 to join us as an additional defendant alleging that if it is determined that the United States Department of Agriculture (USDA) is entitled to relief (the mortgages are reformed and corrected by the Court so as to add Brian G. Schwab s name to the mortgages), then we are solely liable to the USDA or we are jointly liable with the Schwabs, or liable over the Schwabs, with regard to the mortgages held by the USDA. On February 1, 2013, we filed Preliminary Objections to the Complaint joining us on the grounds that the USDA s lawsuit does not involve any claim for money. We await a decision on our Preliminary Objections. At this stage of the lawsuit, it is not yet possible to estimate potential losses, if any. Although it is not possible to predict the ultimate resolution or financial liability with respect to this litigation, management, after consultation with legal counsel, currently does not anticipate that the aggregate liability, if any, arising out of this proceeding will have a material adverse effect on our financial position, or cash flows; although, at the present time, we are not in a position to determine whether such proceeding will have a material adverse effect on our results of operations in any future quarterly reporting period.

(19) Components of Accumulated Other Comprehensive Income

The following table sets forth the components of accumulated other comprehensive income as of December 31, 2013 and 2012:

		December 31,	
		2013	2012
Unrealized gain on marketable securities available-for-sale	\$	(3,233)	15,853
Fair value of interest rate swaps		(5,224)	(8,405)
Defined benefit pension plans		(3,443)	(18,936)
Accumulated other comprehensive income	\$	(11,900)	(11,488)

The following table shows the changes in accumulated other comprehensive income by component for the year ended December 31, 2013:

		Unrealized gains and losses on securities available-for- sale	Change in fair value of interest rate swaps	Change in defined benefit pension plans	Total
Balance as of January 1,	\$	15,853	(8,405)	(18,936)	(11,488)
Other comprehensive income before reclassification adjustments		(16,544)	3,181	14,577	1,214
Amounts reclassified from accumulated other comprehensive income (1), (2)		(2,542)		916	(1,626)
Net other comprehensive income		(19,086)	3,181	15,493	(412)
Balance as of December 31,	\$	(3,233)	(5,224)	(3,443)	(11,900)

(1) Consists of realized gains on securities (gain on sales of investments, net) of \$4,881 and other-than-temporary-impairment losses (net impairment losses) of \$(713), net of tax (income tax expense) of \$1,626.

(2) Consists of amortization of prior service cost (compensation and employee benefits) of \$2,321 and amortization of net loss (compensation and employee benefits) of \$(3,730), net of tax (income tax expense) of \$493. See note 14.

(21) Business Segments

We have identified two reportable business segments based upon the operating approach currently used by management. The Community Banking segment includes our savings bank subsidiary, Northwest Savings Bank, as well as the subsidiaries of the savings bank that provide similar products and services. The savings bank is a community-oriented institution that offers a full array of personal and business deposit and loan products, including mortgage, consumer, and commercial loans as well as trust, investment management, actuarial and benefit plan administration, and brokerage services typically offered by a full service financial institution. The Consumer Finance segment is comprised of Northwest Consumer Discount Company, a subsidiary of Northwest Savings Bank. This subsidiary complements the services of the bank by offering personal installment loans for a variety of consumer and real estate products. This activity is funded primarily through its intercompany borrowing relationship with Allegheny Services, Inc. Net income is primarily used by management to measure segment performance. The following tables provide financial information for these segments. The All Other column represents the parent company, other nonbank subsidiaries, and elimination entries necessary to reconcile to the consolidated amounts presented in the financial statements.

(All dollar amounts presented in tables are in thousands, except as indicated)

(22) Guaranteed Preferred Beneficial Interests in Company's Junior Subordinated Deferrable Interest Debentures (Trust-Preferred Securities) and Interest Rate Swap Agreements

We have two statutory business trusts: Northwest Bancorp Capital Trust III, a Delaware statutory business trust, and Northwest Bancorp Statutory Trust IV, a Connecticut statutory business trust (the Trusts). These trusts exist solely to issue preferred securities to third parties for cash, issue common securities to the Company in exchange for capitalization of the Trusts, invest the proceeds from the sale of trust securities in an equivalent amount of debentures of the Company, and engage in other activities that are incidental to those previously listed. The aforementioned trusts are not consolidated. Northwest Bancorp Capital Trust III issued 50,000 cumulative trust preferred securities in a private transaction to a pooled investment vehicle on December 5, 2005 (liquidation value of \$1,000 per preferred security or \$50,000,000) with a stated maturity of December 30, 2035 and a floating rate of interest, which is reset quarterly, equal to three-month LIBOR plus 1.38%. Northwest Bancorp Statutory Trust IV issued 50,000 cumulative trust preferred securities in a private transaction to a pooled investment vehicle on December 15, 2005 (liquidation value of \$1,000 per preferred security or \$50,000,000) with a stated maturity of December 15, 2035 and a floating rate of interest, which is reset quarterly, equal to three-month LIBOR plus 1.38%. As the shareholders of the trust preferred securities are the primary beneficiaries of these trusts, the Trusts are not consolidated in our financial statements.

The Trusts have invested the proceeds of the offerings in junior subordinated deferrable interest debentures issued by the Company. The structure of these debentures mirrors the structure of the trust-preferred securities. Northwest Bancorp Capital Trust III holds \$51,547,000 of the Company's junior subordinated debentures due December 30, 2035 with a floating rate of interest, reset quarterly, of three-month LIBOR plus 1.38%. The rate in effect at December 31, 2013 was 1.63%. Northwest Bancorp Statutory Trust IV holds \$51,547,000 of the Company's junior subordinated debentures due December 15, 2035 with a floating rate of interest, reset quarterly, of three-month LIBOR plus 1.38%. The rate in effect at December 31, 2013 was 1.62%.

Cash distributions on the trust securities are made on a quarterly basis to the extent interest on the debentures is received by the Trusts. We have the right to defer payment of interest on the subordinated debentures at any time, or from time-to-time, for periods not exceeding five years. If interest payments on the subordinated debentures are deferred, the distributions on the trust securities also are deferred. To date there have been no interest deferrals. Interest on the subordinated debentures and distributions on the trust securities is cumulative. Our obligation constitutes a full, irrevocable, and unconditional guarantee on a subordinated basis of the obligations of the trust under the preferred securities.

The Trusts must redeem the preferred securities when the debentures are paid at maturity or upon an earlier redemption of the debentures to the extent the debentures are redeemed. All or part of the debentures may be redeemed at any time on or after December 31, 2010. Also, the debentures may be redeemed at any time if existing laws or regulations, or the interpretation or application of these laws or regulations, change causing:

Edgar Filing: Northwest Bancshares, Inc. - Form 10-K

- the interest on the debentures to no longer be deductible by the Company for federal income tax purposes;
- the trust to become subject to federal income tax or to certain other taxes or governmental charges;
- the trust to register as an investment company; and
- the preferred securities do not qualify as Tier I capital.

We may, at any time, dissolve any of the Trusts and distribute the debentures to the trust security holders, subject to receipt of any required regulatory approval(s).

During the quarter ended September 30, 2008, we entered into four interest rate swap agreements (swaps). We designated each swap as a cash flow hedge and they are intended to protect against the variability of cash flows associated with Trust III and Trust IV. The first two swaps hedge the interest rate risk of Trust III, the first of these two swaps expired September 30, 2013. On the second of these two swaps we receive interest

Table of Contents**NORTHWEST BANCSHARES, INC. AND SUBSIDIARIES**

(All dollar amounts presented in tables are in thousands, except as indicated)

of LIBOR from a counterparty and pay a fixed rate of 4.61% to the same counterparty calculated on a notional amount of \$25.0 million. This swap expires in September 2018. The second two swaps hedge the interest rate risk of Trust IV, wherein we receive interest of LIBOR from a counterparty and pay a fixed rate of 3.85% to the same counterparty calculated on a notional amount of \$25.0 million and we receive interest of LIBOR from a counterparty and pay a fixed rate of 4.09% to the same counterparty calculated on a notional amount of \$25.0 million. The terms of these two swaps are seven years and ten years, respectively, which expire September 2015 and September 2018, respectively. The swap agreements were entered into with a counterparty that met our credit standards and the agreements contain collateral provisions protecting the at-risk party. We believe that the credit risk inherent in the contracts is not significant.

At December 31, 2013, the fair value of the swap agreements was \$(8.0) million and was the amount we would have expected to pay if the contracts were terminated. At December 31, 2013, there was no material hedge ineffectiveness for any of the swaps discussed above.

Liability Derivatives (Included in Other Liabilities)	2013	December 31,	2012
Cash flow hedges swaps:			
Fair value	\$	8,037	12,932
Notional amount		75,000	100,000
Collateral posted		8,405	13,505

The following table sets forth a summary of guaranteed capital debt securities and junior subordinated deferrable interest debentures held by the trusts as of December 31, 2013 and 2012:

	Capital Debt	2013	December 31,	2012
	Securities			
Northwest Bancorp Capital Trust III	\$	50,000	51,547	51,547
Northwest Bancorp Statutory Trust IV		50,000	51,547	51,547
Total	\$	100,000	103,094	103,094

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not Applicable

ITEM 9A. CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this report. Based upon that evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective.

There were no changes made in our internal controls during the quarter ended December 31, 2013 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

See Management's Report On Internal Control Over Financial Reporting - filed herewith under Part II, Item 8, Financial Statements and Supplementary Data.

ITEM 9B. OTHER INFORMATION

Not Applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE
