Footnotes:

- (a) Investment holdings in foreign currencies are converted to U.S. Dollars using period end spot rates. All investments are in United States enterprises unless otherwise noted.
- (b) Interest rates on floating rate term loans adjust periodically based upon a predetermined schedule. Stated interest rate in this schedule represents the all-in rate at period end.
- (c) This position or a portion of this position represents an unsettled loan purchase. The interest rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate (LIBOR or L) or the applicable LIBOR floor plus a spread which was determined at the time of purchase.
- (d) Pay-In-Kind security (PIK), which may pay interest/dividends in additional par/shares.
- (e) Reported net of unfunded commitments, reduced by any upfront payments received if purchased at a discount, see Note 2.
- (f) Variable rate coupon, rate shown as of July 31, 2014.
- (g) When-Issued or delayed delivery security based on typical market settlement convention for such security.

(h) Security valued at fair value using methods determined in good faith by or under the direction of the Board of Directors.

Notes to Schedule of Investments

July 31, 2014 (UNAUDITED)

(1) Organization

Ares Dynamic Credit Allocation Fund, Inc. (the Fund) is a corporation incorporated under the laws of the State of Maryland and registered with the U.S. Securities and Exchange Commission (the SEC) under the Investment Company Act of 1940, as amended (the Investment Company Act), as a closed-end, non-diversified, management investment company, and intend to qualify to be treated as a Regulated Investment Company under Subchapter M of the Internal Revenue Code of 1986, as amended. The Fund commenced operations on November 27, 2012. Ares Capital Management II LLC (the Adviser) serves as the investment adviser to the Fund. The Fund s common shares are listed on the New York Stock Exchange and trade under the ticker symbol ARDC .

Investment Objective

ARDC s investment objective is to provide an attractive risk-adjusted level of total return, primarily through current income and, secondarily, through capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in a broad, dynamically managed portfolio of (i) secured loans (Senior Loans) made primarily to companies whose debt is rated below investment grade, (ii) corporate bonds (Corporate Bonds) that are expected to be primarily high yield issues rated below investment grade, and (iii) debt securities (CLO Debt Securities) issued by entities commonly referred to, and referred to herein, as collateralized loan obligations (CLOs). The Adviser will dynamically allocate the Fund s portfolio among investments in the various targeted credit markets, to seek to manage interest rate and credit risk and the duration of the Fund s portfolio.

(2) Significant Accounting Policies

Investments Valuation

All investments in securities are recorded at their estimated fair value, as described in Note 3.

Revolving loan, bridge loan and delayed draw term loan agreements

For investment purposes, the Fund has entered into certain loan commitments which may include revolving loan, bridge loan, partially unfunded term loan and delayed draw term loan agreements (Unfunded loan commitments). Unfunded loan commitments purchased at a discount/premium may include cash received/paid for the amounts representing such discounts/premiums. Unfunded loan commitments are agreements to participate in the lending of up to a specified maximum amount for a specified period. As of July 31, 2014, the fair value of the loans disclosed in the Schedule of Investments does not include unfunded commitments, which total \$279,107.

(3) Investments

Fair Value Measurements

The Fund follows the provisions of *Fair Value Measurements and Disclosures* under U.S. generally accepted accounting principles (U.S. GAAP), which among other matters, requires enhanced disclosures about investments that are measured and reported at fair value. This standard defines fair value and establishes a hierarchal disclosure framework which prioritizes and ranks the level of market price observability used in measuring investments at fair value and expands disclosures about assets and liabilities measured at fair value. *Fair Value Measurements and Disclosures* defines fair value as the amount for which an investment could be sold in an orderly transaction between market participants at the measurement date in the principal or most advantageous market of the investment. The hierarchal disclosure framework establishes a three tier hierarchy to maximize the use of observable data and minimize the use of unobservable inputs. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value (such as a pricing model) and/or the risk inherent in the inputs to the valuation technique.

Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity s own assumptions about the

assumptions market participants would use in pricing the asset or liability based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

- Level 1 unadjusted quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including a single broker quote or the Fund s own assumptions in determining the fair value of investments)

The fair value of the Fund s investments are primarily estimated based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs. The Fund s custodian obtains prices from independent pricing services based on an authorized pricing matrix as approved by the Fund s Board of Directors. The Adviser has internal controls in place that support its reliance on information received from third party pricing sources. For any securities, if market or dealer quotations are not readily available, or if the Adviser determines that a quotation of a security does not represent a fair value, then the security is valued at a fair value as determined in good faith by the Adviser and will be classified as Level 3. In such instances, the Adviser will use valuation techniques consistent with the market or income approach to measure fair value and will give consideration to all factors which might reasonably affect the fair value.

Bank loans and corporate debts: The fair value of bank loans and corporate debt is estimated based on quoted market prices, forward foreign exchange rates, dealer quotations or alternative pricing sources supported by observable inputs and are generally classified within Level 2 or 3. The Adviser obtains prices from independent pricing services which generally utilize broker quotes and may use various other pricing techniques which take into account appropriate factors such as yield, quality, coupon rate, maturity, type of issue, trading characteristics and other data. If the pricing services are only able to obtain a single broker quote or utilize a pricing model the securities will be classified as Level 3. If the pricing services are unable to provide prices, the Adviser will attempt to obtain one or more broker quotes directly from a dealer and price such securities at the last bid price obtained; such securities are classified as Level 3.

Collateralized loan obligations: The fair value of collateralized loan obligations is estimated based on various valuation models of third party pricing services as well as internal models. The valuation models generally utilize discounted cash flows and take into consideration prepayment and loss assumptions, based on historical experience and projected performance, economic factors, the characteristics and condition of the underlying collateral, comparable yields for similar securities and recent trading activity. These securities are classified as Level 3.

The Adviser is responsible for all inputs and assumptions related to the pricing of securities. The Adviser has internal controls in place that support its reliance on information received from third party pricing sources. As part of its internal controls, the Adviser obtains, reviews and tests information to corroborate prices received from third party pricing sources. For any securities, if market or dealer quotations are not readily available, or if the Adviser determines that a quotation of a security does not represent a fair value, then the security is valued at a fair value as

determined in good faith by the Adviser and will be classified as Level 3. In such instances, the Adviser will use valuation techniques consistent with the market or income approach to measure fair value and will give consideration to all factors which might reasonably affect the fair value. The main inputs into the Adviser s valuation model for these Level 3 securities include earnings multiples (based on the historical earnings of the issuer) and discounted cash flows. The Adviser may also consider original transaction price, recent transactions in the same or similar instruments and completed third party transactions in comparable instruments as well as other liquidity, credit and market risk factors. Models will be adjusted as deemed necessary by the Adviser.

The following is a summary of the inputs used as of July 31, 2014, in valuing the Fund s investments carried at fair value:
