1. DESCRIPTION OF BUSINESS

Diplomat Pharmacy, Inc. and its consolidated subsidiaries (the "Company") is the largest independent provider of specialty pharmacy services in the United States of America ("U.S."). The Company is focused on improving the lives of patients with complex chronic diseases while also delivering unique solutions for manufacturers, hospitals, payers and providers. The Company's patient-centric approach positions it at the center of the healthcare continuum for treatment of complex chronic disease states, including oncology, specialty infusion therapy, immunology, hepatitis, multiple sclerosis and many other serious or long-term conditions. The Company operates as two reporting segments. The Specialty segment offers a broad range of innovative solutions to address the dispensing, delivery, dosing and reimbursement of clinically intensive, high-cost specialty drugs and a wide range of applications and the Pharmacy Benefit Management ("PBM") segment provides services designed to help the Company's customers reduce the cost and manage the complexity of their prescription drug programs. The Company dispenses to patients in all U.S. states and territories through its advanced distribution centers and manages centralized clinical call centers to deliver localized services on a national scale.

2. BASIS OF PRESENTATION

Interim Unaudited Condensed Consolidated Financial Statements

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the U.S. ("U.S. GAAP") and the applicable rules and regulations of the Securities and Exchange Commission ("SEC") regarding interim financial reporting. Accordingly, they do not include all of the information and notes required by U.S. GAAP for complete financial statements. In the opinion of management, the interim financial statements include all adjustments of a normal recurring nature necessary for a fair presentation of the financial position, results of operations, cash flows and changes in shareholders' equity. The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the results that may be expected for the year ending December 31, 2018. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes for the year ended December 31, 2017 included in the Company's Annual Report on Form 10-K, which was filed with the SEC on March 1, 2018.

Reclassifications

During the second quarter of 2018, the Company changed its accounting policy to reclassify shipping and handling costs incurred at its dispensing pharmacies from Selling, general and administrative expenses ("SG&A") to Cost of sales in its condensed consolidated statements of operations. The amounts reclassified were \$15,955 and \$13,286 for the three months ended June 30, 2018 and 2017, respectively, and \$31,094

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

and \$24,386 for the six months ended June 30, 2018 and 2017, respectively, due to this accounting policy change.

The Company has historically classified the cost of its nursing support services within SG&A as these amounts were not considered significant in relation to total cost of sales. During the second quarter of 2018, the Company reclassified these nursing support service costs from SG&A to cost of sales. The amounts reclassified were \$6,443 and \$4,834 for the three months ended June 30, 2018 and 2017, respectively, and \$11,538 and \$9,021 for the six months ended June 30, 2018 and 2017, respectively.

These reclassifications had no impact on Income from operations for any of the periods presented.

Table of Contents**3. NEW ACCOUNTING STANDARDS****Adoption of New Accounting Standards***Revenue*

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09, *Revenue from Contracts with Customers (Topic 606)* (Topic 606), which supersedes the previous revenue recognition guidance under U.S. GAAP. The new standard focuses on creating a single source of revenue guidance for revenue arising from contracts with customers for all industries. The objective of the new standard is for companies to recognize revenue when it transfers the promised goods or services to its customers at an amount that represents what the company expects to be entitled to in exchange for those goods or services. In July 2015, the FASB issued ASU No. 2015-14, *Revenue from Contracts with Customers (Topic 606) Deferral of the Effective Date*, which deferred the effective date of Topic 606 by one year to annual reporting periods beginning after December 15, 2017 for public entities, though early adoption was permitted. Topic 606 permitted two methods of adoption: retrospectively to each prior reporting period presented (full retrospective method), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (modified retrospective transition method). The new standard also includes a cohesive set of disclosure requirements intended to provide users of financial statements with comprehensive information about the nature, amount, timing and uncertainty of revenue and cash flows arising from a company's contracts with customers.

On January 1, 2018, the Company adopted Topic 606 using the modified retrospective transition method. Therefore, the comparative financial information has not been restated and continues to be reported under the accounting standards in effect for those periods. The Company recognized the cumulative effect of initially applying the new revenue recognition standard on January 1, 2018 and recorded an after-tax adjustment of \$126 to reduce beginning retained earnings. This cumulative adjustment relates to a shift in the timing of revenue recognition of dispensing prescription drugs for home delivery from the date the drugs are shipped under the Company's previous accounting policy to the date the drugs are physically delivered (which better reflects when control transfers) under the new accounting policy adopted in connection with Topic 606. The effect of this change is not significant as there is a very short timeframe from the shipment date to the physical delivery date of the prescription drugs. Additionally, in the PBM segment, prior to the adoption of Topic 606, revenue related to certain contracts was previously recognized on a net basis as the Company was considered to be acting as an agent in the transactions. The Company reassessed the principal versus agent criteria under Topic 606 and determined under the new guidance that the Company is considered to be acting as principal in these transactions and, effective January 1, 2018, began to recognize revenue on a gross basis.

As a result of applying the modified retrospective transition method, the following condensed consolidated balance sheet line items were adjusted as of January 1, 2018:

Derivatives and Hedging

In August 2017, the FASB issued ASU No. 2017-12, *Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities* (ASU 2017-12). ASU 2017-12 aligns hedge accounting with risk management activities and simplifies the requirement to qualify for hedge accounting. ASU 2017-12 is effective for annual periods beginning on or after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted.

Effective January 1, 2018, the Company early adopted ASU 2017-12. There was no impact to the Company at the time of adoption.

Accounting Standards Issued But Not Yet Adopted

Leases

In February 2016, the FASB issued ASU No. 2016-02, *Leases (Topic 842)* (ASU 2016-02), requiring lessees to recognize a right-of-use asset and a lease liability for all leases (with the exception of short-term leases) at lease commencement date. ASU 2016-02 is effective for annual periods beginning on or after December 15, 2018, including interim periods within those annual periods. Early adoption is permitted. The Company is almost complete with the inventorying of its lease population and is beginning to evaluate the impact that adopting ASU 2016-02 will have on its consolidated financial statements and/or notes thereto.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The condensed consolidated financial statements include the accounts of Diplomat Pharmacy, Inc., its wholly-owned subsidiaries, and a 51 percent owned subsidiary, formed in August 2014, which the Company controlled and which was dissolved during the fourth quarter of 2017.

All intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported therein. Due to the inherent uncertainty involved in making estimates, actual results reported in future periods may be based upon amounts that differ from these estimates.

Receivables, net

Receivables, net consisted of the following:

	June 30, 2018	December 31, 2017
Trade receivables, net of allowances of \$(22,317) and \$(22,050), respectively	\$ 330,192	\$ 317,004
Rebate receivables	17,411	12,847
Other receivables	2,242	2,240
	\$ 349,845	\$ 332,091

Trade receivables are stated at the invoiced amount. Trade receivables primarily include amounts due from clients, third-party pharmacy benefit managers and insurance providers and are based on contracted prices. Trade receivables

Table of Contents

are unsecured and require no collateral. Trade receivable terms vary by payer, but generally are due within 30 days after the sale of the product or performance of the service.

Rebate receivables are amounts due from pharmaceutical manufacturers related to drug purchases by participants of the various pharmacy benefit plans that the Company manages, a portion of which, depending on contract terms, are paid back to the Company's customers.

Inventories

Inventories consist of prescription and over-the-counter drugs and are stated at the lower of cost or net realizable value. Cost is determined using the first-in, first-out method. Prescription drugs are returnable to the Company's vendors and fully refundable before six months of expiration, and any remaining expired drugs are relieved from inventory on a quarterly basis.

The Company recognizes revenue from dispensing prescription drugs for home delivery at the time the drugs are physically delivered (when control transfers). Revenue from dispensing prescription drugs that are picked up by patients at an open-door or retail pharmacy location are recorded at prescription adjudication, which approximates the fill date. Each prescription claim is considered its own arrangement with the customer and is a performance obligation.

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

The Company accrues an estimate of fees, including direct and indirect remuneration fees (DIR fees), which are assessed or expected to be assessed by payers at some point after adjudication of a claim, as a reduction at the time revenue is recognized. Changes in the Company s estimate of such fees are recorded as an adjustment to revenue when the change becomes known.

PBM Segment

The Company provides a pharmacy benefit management service, including mail order pharmacy and specialty pharmacy services, to its clients, which include Medicare Part D Plans, regional health Plans, self-insured clients and Medicaid Plans. The Company sells prescription drugs directly through its mail service dispensing pharmacy and indirectly through its contracted network of retail pharmacies. The Company recognizes revenue from the sale of prescription drugs by its mail order pharmacy service when the drugs are physically delivered (when control transfers) and by its retail pharmacy network when the claim is adjudicated. The Company s pharmacy benefit management services are accounted for in a manner consistent with a master supply arrangement as there are no contractual minimum volumes and each prescription is considered a separate purchasing decision and distinct performance obligation transferred at a point in time. Pharmacy benefit management services performed in connection with each prescription claim are considered part of a single performance obligation which culminates in the dispensing of prescription drugs. The Company recognizes revenue using the gross method since the Company acts as principal in the arrangement, exercises pricing latitude and independently has a contractual obligation to pay its network pharmacy

providers for benefits provided to its clients' members, and assumes primary responsibility for fulfilling the promise to provide prescription drugs to its client plan members while also performing the related pharmacy benefit management services. The Company includes the total prescription price (drug ingredient cost plus dispensing fee) it has contracted with these clients as revenue, including member co-payments to pharmacies, and as cost of sales.

Net sales include (i) the portion of the price the client pays directly to the Company, net of any variable consideration including volume-related or other discounts paid back to the client, (ii) the price paid to the Company by client plan members for mail order prescriptions and the price paid to retail network pharmacies by client plan members for retail prescriptions and (iii) claims-based administrative fees. The Company records revenue net of manufacturer's rebates which are earned by its clients based on their plan members' utilization of brand-name formulary drugs. The Company estimates these rebates at period-end based on actual and estimate claims data and its estimates of manufacturers' rebates earned by its clients. The Company adjusts against revenues its rebates payable to clients to the actual amounts paid when such adjustments become known. The Company also adjusts revenues for refunds owed to the clients resulting from pricing and performance guarantees against defined metrics.

Sales taxes are presented on a net basis (excluded from revenue and cost) for both segments.

5. BUSINESS ACQUISITIONS

The Company accounts for its business acquisitions using the acquisition method as required by FASB Accounting Standards Codification (ASC) Topic 805, *Business Combinations*. The Company ascribes significant value to the synergies and other benefits that do not meet the recognition criteria of acquired identifiable intangible assets. Accordingly, the value of these components is included within goodwill. The Company's business acquisitions described below, except a portion of LDI (defined below), were treated as asset purchases for income tax purposes and the related goodwill resulting from these business acquisitions is deductible for income tax purposes. The results of operations for acquired businesses are included in the Company's consolidated financial statements from their respective acquisition dates.

The assets acquired and liabilities assumed in the business combinations described below, including identifiable intangible assets, were based on their estimated fair values as of the acquisition date. The excess of purchase price over the estimated fair value of the net tangible and identifiable intangible assets acquired was recorded as goodwill. The allocation of the purchase price required management to make significant estimates in determining the fair values of assets acquired and liabilities assumed, especially with respect to identifiable intangible assets. These estimated fair values were based on information obtained from management of the acquired companies and historical experience and, with respect to the long-lived tangible and intangible assets, were made with the assistance of an independent valuation firm. These estimates included, but were not limited to, the cash flows that an asset is expected to generate in the future, and the cost savings expected to be derived from acquiring an asset, discounted at rates commensurate with the risks and uncertainties involved. For acquisitions that involved contingent consideration, the Company recognized a liability equal to the fair value of the contingent consideration obligation as of the acquisition date. The estimate of fair value of a contingent consideration obligation required subjective assumptions regarding future business results, discount rates and probabilities assigned to various potential business result scenarios. These estimates are preliminary and subject to change up to one year following each acquired entity's respective acquisition date.

LDI Holding Company LLC

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

On December 20, 2017, the Company acquired LDI Holding Company LLC, doing business as LDI Integrated Pharmacy Services (LDI). LDI is a full-service PBM based in St. Louis, Missouri. LDI's service offerings include URAC-accredited mail-order and specialty pharmacies, a national network of retail pharmacies and comprehensive clinical programs. The following table summarizes the consideration transferred to acquire LDI:

The above share consideration at closing is based on 4,113,188 shares, in accordance with the purchase agreement, multiplied by the per share closing market price of the Company's common stock as of December 19, 2017 (\$20.24) and multiplied by 95 percent to account for the restricted nature of the shares.

Approximately \$7,500 of the purchase consideration was deposited into an escrow account to satisfy any indemnification claims that may be made by the Company. Approximately \$6,357 and \$1,143 was released from escrow to the sellers and the Company, respectively, during the second quarter of 2018.

The Company incurred acquisition-related costs of \$143 and \$635 which were charged to Selling, general and administrative expenses during the three and six months ended June 30, 2018, respectively.

The following table summarizes the preliminary fair values of identifiable assets acquired and liabilities assumed at the acquisition date:

6. FAIR VALUE MEASUREMENTS

The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible. Fair value is defined as the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As such, fair value is a market-based measurement that should be determined based upon assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, a three-tier fair value hierarchy was established, which prioritizes the inputs used in measuring fair value as follows:

Level 1: Observable inputs such as quoted prices in active markets;

Level 2: Inputs, other than quoted prices in active markets, that are observable either directly or indirectly; and

Level 3: Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

An asset's or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. Valuation techniques used need to maximize the use of observable inputs and minimize the use of unobservable inputs.

Assets and liabilities measured at fair value are based on one or more of the following three valuation techniques:

A. *Market approach:* Prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities.

B. *Cost approach:* Amount that would be required to replace the service capacity of an asset (replacement cost).

C. *Income approach:* Techniques to convert future amounts to a single present amount based upon market expectations (including present value techniques, option-pricing and excess earnings models).

The following table presents the placement in the fair value hierarchy of assets and liabilities that are measured and disclosed at fair value on a recurring basis:

	Asset / (Liability)	Level 2	Level 3	Valuation Technique
June 30, 2018:				
Contingent consideration	\$ (11,170)	\$	\$ (11,170)	C

Changes in fair values		(2,339)
Payments		3,269
Balance at June 30, 2018	\$	(11,170)

The carrying amounts of the Company's financial instruments consisting primarily of cash and cash equivalents, accounts receivable, accounts payable, and other liabilities approximate their estimated fair values due to the relative short-term nature of the amounts. The carrying amount of debt approximates fair value due to variable interest rates at customary terms and rates the Company could obtain in current financing.

7. GOODWILL AND DEFINITE-LIVED INTANGIBLE ASSETS

The following table sets forth a roll forward of goodwill for the six months ended June 30, 2018:

Balance at January 1, 2018	\$	832,624

respectively, are presented in the condensed consolidated balance sheets as direct deductions from the outstanding debt balances. The Company also had \$135,100 and \$188,250 outstanding on its line of credit as of June 30, 2018 and December 31, 2017, respectively. The Company had \$114,900 and \$61,750 available to borrow on its line of credit at June 30, 2018 and December 31, 2017, respectively.

The interest rates the Company pays under its credit facility are primarily a function of a defined margin above LIBOR. The Company's Term Loan A and Term Loan B interest rates were 4.35 percent and 6.60 percent, respectively, at June 30, 2018 and 4.04 percent and 6.04 percent, respectively, at December 31, 2017. The Company's line of credit interest rate was 4.35 percent and 4.04 percent at June 30, 2018 and December 31, 2017, respectively. The Company is charged a monthly unused commitment fee ranging from 0.3 percent to 0.4 percent on the average unused daily balance on its \$250,000 line of credit.

The Company's credit facility contains certain financial and non-financial covenants. The Company was in compliance with all such covenants as of June 30, 2018 and December 31, 2017.

9. INTEREST RATE SWAPS

The Company entered into two interest rate swap agreements during the second quarter of 2018 to fix its interest rate payments from April 30, 2019 through March 31, 2022 on \$150,000 principal balance on each of Term Loan A and Term Loan B (\$300,000 principal balance in total). These cash flow derivatives are designated as hedging instruments under FASB ASC Subtopic 815-20. The Company recognized other comprehensive loss of \$962 (\$1,287 loss, net of \$325 in taxes) during the three and six months ended June 30, 2018. There was no impact to the condensed consolidated statements of operations. The \$1,287 interest rate swap agreement liability is contained in Other noncurrent liabilities as of June 30, 2018.

The Company does not use derivatives for trading or speculative purposes and currently does not have any derivatives that are not designated as hedging instruments under the accounting requirements for derivatives and hedging.

10. SHARE-BASED COMPENSATION

Stock Options

A summary of the Company's stock option activity as of and for the six months ended June 30, 2018 is as follows:

Weighted Average	Weighted Average Remaining	Aggregate
---------------------	----------------------------------	-----------

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

	Number of Options	Exercise Price	Contractual Life (Years)	Intrinsic Value
Outstanding at January 1, 2018	6,108,292	\$ 18.62	8.5	\$ 25,777

Table of Contents

The Company granted service-based awards of 330,135 options under its 2014 Omnibus Incentive Plan (the "2014 Plan") and a make-whole inducement award of 81,351 options to purchase common stock to key employees during the six months ended June 30, 2018, of which 306,486 and 105,000 options become exercisable in installments of 33.3 percent and 25 percent, respectively, per year, beginning on the first anniversary of the grant date. These options have a maximum term of ten years.

The 411,486 options to purchase common stock that were granted during the six months ended June 30, 2018 have a weighted average grant date fair value of \$8.75 per option. The grant date fair values of these stock option awards were estimated using the Black-Scholes-Merton option pricing model using the assumptions set forth in the following table:

Exercise price	\$20.52 - \$24.29
Expected volatility	36.06% - 38.36%
Expected dividend yield	0%
Risk-free rate for expected term	2.33% - 2.73%
Expected life (in years)	6.00 - 6.25

Estimating grant date fair values for employee stock options requires management to make assumptions regarding expected volatility of value of those underlying shares, the risk-free rate over the expected life of the stock options and the date on which share-based payments will be settled. Expected volatility is based on a weighted average of the Company's historic volatility and an implied volatility for a group of industry-relevant healthcare companies as of the measurement date. Risk-free rate is determined based upon U.S. Treasury rates over the estimated expected option lives. Expected dividend yield is zero as the Company does not anticipate that any dividends will be declared during the expected term of the options. The expected term of options granted is calculated using the simplified method (the midpoint between the end of the vesting period and the end of the maximum term). Forfeitures are accounted for when they occur.

Restricted Stock Units (RSU or RSUs)

A summary of the Company's RSU activity as of and for the six months ended June 30, 2018 is as follows:

	Number of RSUs	Weighted Average Grant Date Fair Value
Outstanding at January 1, 2018	66,639	\$ 14.65
Granted	3,316,566	23.32
Vested and issued	(58,388)	21.69
Cancelled/expired	(51,975)	21.23
Outstanding at June 30, 2018	3,272,842	\$ 23.20

The Company granted service-based awards of 890,581 RSUs to key employees under its 2014 Plan during the six months ended June 30, 2018. The Company also granted a sign-on inducement award of 124,875 RSUs and a make-whole inducement award of 33,716 RSUs to a key employee during the six months ended June 30, 2018. The value of an RSU is determined by the market value of the Company's common stock at the date of grant. This value is recorded as compensation expense on a straight-line basis over the

vesting period, which ranges from immediate vesting to three years from grant date.

The Company granted 139,512 performance-based RSUs to key employees under its 2014 Plan during the six months ended June 30, 2018, which will be earned or forfeited based upon the Company's performance relative to a specified adjusted earnings before interest, taxes, depreciation and amortization (Adjusted EBITDA) goal for the year ending December 31, 2018. The earned RSUs, if any, will vest in three equal installments, with the first installment vesting upon the earlier of the date that the Company files its 2018 Annual Report on Form 10-K or Audit Committee confirmation of the satisfaction of the applicable performance goals, with the remaining installments vesting annually

thereafter. The Company is accounting for these performance-based RSUs under the current presumption that 50 percent will be earned and 50 percent will be forfeited.

The Company granted 629,372 performance-based RSUs as a make-whole inducement award to a key employee during the six months ended June 30, 2018, which will be earned or forfeited based upon the Company's performance relative to specified Adjusted EBITDA and revenue goals for the year ending December 31, 2018. The earned RSUs, if any, will vest in three equal installments, with the first installment vesting upon the earlier of the date that the Company files its 2018 Annual Report on Form 10-K or Audit Committee confirmation of the satisfaction of the applicable performance goals, with the remaining installments vesting annually thereafter. The Company is accounting for these performance-based RSUs under the current presumption that 25 percent will be earned and 75 percent will be forfeited.

The Company granted an additional 1,498,500 performance-based RSUs as a sign-on inducement award to a key employee during the six months ended June 30, 2018, which will be earned or forfeited based upon the Company's performance relative to specified cumulative Adjusted EBITDA and revenue goals for the years ending December 31, 2018 and 2019. The earned RSUs, if any, will vest in three equal installments, with the first installment vesting upon the earlier of the date that the Company files its 2019 Annual Report on Form 10-K or Audit Committee confirmation of the satisfaction of the applicable performance goals, with the remaining installments vesting annually thereafter, provided that the vesting of a portion of this award may be accelerated at the discretion of the Board of Directors of the Company or its Compensation Committee following completion of the Company's 2018 audit. The Company is accounting for these performance-based RSUs under the current presumption that 25 percent will be earned and 75 percent will be forfeited.

The Company recorded share-based compensation expense associated with RSUs of \$4,819 and \$105 for the three months ended June 30, 2018 and 2017, respectively, and \$5,693 and \$105 for the six months ended June 30, 2018 and 2017, respectively.

Restricted Stock Awards (RSA or RSAs)

A summary of the Company's RSA activity as of and for the six months ended June 30, 2018 is as follows:

	Number of Shares Subject to Restriction		Weighted Average Grant Date Fair Value
Nonvested at January 1, 2018	34,291	\$	17.45
Granted	21,924		23.26
Vested	(31,732)		17.68
Nonvested at June 30, 2018	24,483	\$	22.36

Under the 2014 Plan, the Company issued RSAs to non-employee directors. The value of a RSA is determined by the market value of the Company's common stock at the date of grant. The value of a RSA is recorded as share-based compensation expense on a straight-line basis over the vesting period, which is typically one year.

The Company recorded share-based compensation expense associated with RSAs of \$139 and \$95 for the three months ended June 30, 2018 and 2017, respectively, and \$277 and \$179 for the six months ended June 30, 2018 and 2017, respectively.

12. CONTINGENCIES

On November 10, 2016, a putative class action complaint was filed in the U.S. District Court for the Eastern District of Michigan against Diplomat Pharmacy, Inc. and certain officers of the Company. Following the appointment of lead plaintiffs and lead counsel, an amended complaint was filed on April 11, 2017. The amended complaint alleges violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 in connection with public filings made between February 29, 2016 and November 2, 2016 (the potential class period). The plaintiff seeks to represent a class of shareholders who purchased stock in the potential class period. The complaint seeks unspecified monetary damages and other relief. The Company filed a motion to dismiss the amended complaint on May 24, 2017. The court issued an order denying the Company's motion to dismiss on January 19, 2018. The Company filed a motion for reconsideration of its motion to dismiss on February 2, 2018. The Company believes the complaint and allegations to be without merit and intends to vigorously defend itself against the action. The Company is unable at this time to determine whether the outcome of the litigation would have a material impact on its results of operations, financial condition or cash flows.

On February 10, 2017, the Company's Board of Directors (the Board) received a demand letter from a purported shareholder containing allegations similar to those contained in the putative class action complaint described above. The letter demanded that the Board take action to remedy the alleged violations. In response, the Board established a Special Independent Committee of its disinterested and independent members to investigate the claims. Subsequently, on June 2, 2017, the shareholder filed a putative shareholder's derivative lawsuit in the Michigan Circuit Court for the County of Genesee regarding the same matters alleged in the demand letter. The complaint names the Company as a nominal defendant and names a number of the Company's current and former officers and directors as defendants. The complaint seeks unspecified monetary damages and other relief. In connection with the ongoing Special Independent Committee investigation, on July 20, 2017, by agreement between the Company and the shareholder, the court ordered a stay of legal proceedings for 90 days, after which time by further agreements of the Company and the shareholder, the court extended the stay until August 1, 2018. The Company is unable at this time to determine whether the outcome of the litigation would have a material impact on its results of operations, financial condition or cash flows.

The results of legal proceedings are often uncertain and difficult to predict, and the Company could from time to time incur judgments, enter into settlements, materially change its business practices or technologies or revise its expectations regarding the outcome of certain matters. In

addition, the costs incurred in litigation can be substantial, regardless of the outcome.

The Company's business of providing specialized pharmacy services and other related services may subject it to litigation and liability for damages in the ordinary course of business. Nevertheless, the Company believes there are no other legal proceedings, the outcome of which, if determined adversely to the Company, would individually or in the aggregate be reasonably expected to have a material adverse effect on its business, financial position, cash flows or results of operations.

Table of Contents**13. (LOSS) INCOME PER COMMON SHARE**

The following table sets forth the computation of basic and diluted (loss) income per common share:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
Numerator:				
Net (loss) income attributable to Diplomat Pharmacy, Inc.	\$ (3,964)	\$ 3,591	\$ (4,414)	\$ 7,958
Denominator:				
Weighted average common shares outstanding, basic	74,158,622	67,528,151	74,077,916	67,209,280
Weighted average dilutive effect of stock options, RSAs and RSUs		683,731		788,649
Weighted average common shares outstanding, diluted	74,158,622	68,211,882	74,077,916	67,997,929
Net (loss) income per common share:				
Basic	\$ (0.05)	\$ 0.05	\$ (0.06)	\$ 0.12
Diluted	\$ (0.05)	\$ 0.05	\$ (0.06)	\$ 0.12

The Company recognized a net loss for the three and six months ended June 30, 2018. As a result, the diluted loss per share is the same as the basic loss per share as any potentially dilutive securities would reduce the loss per share. In the absence of a net loss, the weighted average dilutive effect of stock options, RSAs and RSUs would have been 374,080 and 398,051 for the three and six months ended June 30, 2018, respectively. Service-based and earned performance-based stock options to purchase a weighted average of 4,032,813 and 4,022,012 common shares would have been excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2018, respectively, as inclusion of such options would be anti-dilutive. Performance-based stock options to purchase up to a weighted average of 574,138 common shares would have been excluded from the computation of diluted weighted average common shares outstanding for both the three and six months ended June 30, 2018 as all performance conditions were not satisfied as of June 30, 2018. Weighted average service-based RSUs of 766,971 and 409,262 common shares would have been excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2018, respectively, as inclusion of such RSUs would be anti-dilutive. Weighted average performance-based RSUs of 770,859 and 389,305 common shares would have been excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2018, respectively, as all performance conditions were not satisfied as of June 30, 2018. Weighted average RSAs of 7,228 and 3,614 common shares were excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2018, respectively, as inclusion of such shares would be anti-dilutive.

Service-based and earned performance-based stock options to purchase a weighted average of 3,174,060 and 2,803,785 common shares for the three and six months ended June 30, 2017, respectively, were excluded from the computation of diluted weighted average common shares outstanding as inclusion of such options would be anti-dilutive. Performance-based stock options to purchase up to a weighted average of 995,517 and 497,759 common shares for the three and six months ended June 30, 2017, respectively, were excluded from the computation of diluted weighted average common shares outstanding as all performance conditions were not satisfied as of June 30, 2017. Weighted average service-based RSUs of 86,488 and 43,244 common shares were excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2017, respectively, as inclusion of such shares would be anti-dilutive. Weighted average RSAs of 9,340 and 5,950 common shares were excluded from the computation of diluted weighted average common shares outstanding for the three and six months ended June 30, 2017, respectively, as inclusion of such shares would be

anti-dilutive.

[Table of Contents](#)**14. OPERATIONS BY REPORTING SEGMENT**

Effective January 1, 2018, the Company reports in two operating segments: Specialty and PBM. The Specialty segment offers a broad range of innovative solutions to address the dispensing, delivery, dosing and reimbursement of clinically intensive, high-cost specialty drugs and a wide range of applications and the PBM segment provides services designed to help the Company's customers reduce the cost and manage the complexity of their prescription drug programs. The Company evaluates segment performance principally upon net sales and gross profit. Net sales, cost of sales and gross profit information by segment are as follows:

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

(Dollars in thousands, except per share, per patient and per prescription data)

The following Management's Discussion and Analysis of financial condition and results of operations (MD&A) should be read in conjunction with the condensed consolidated financial statements (unaudited), related notes, and other financial information appearing elsewhere in this Quarterly Report on Form 10-Q and the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed on March 1, 2018 with the Securities and Exchange Commission (SEC).

Forward-Looking Statements

Certain statements contained or incorporated in this Quarterly Report on Form 10-Q which are not statements of historical fact constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements give current expectations or forecasts of future events or our future financial or operating performance. Words such as anticipate, assume, believe, continue, could, estimate, expect, future, intend, may, plan, potential, predict, project, seek, should, will, and similar negative thereof, utilized in discussions of future operating or financial performance signify forward-looking statements.

The forward-looking statements contained in this report are based on management's good-faith belief and reasonable judgment based on current information. The forward-looking statements are qualified by important factors, risks, and uncertainties, many of which are beyond our control, that could cause our actual results to differ materially from those in the forward-looking statements, including those described elsewhere in this report, as well as in our Annual Report on Form 10-K for the year ended December 31, 2017 and subsequent reports filed with or furnished to the SEC. Any forward-looking statement made by us in this report speaks only as of the date hereof or as of the date specified herein. We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future developments, or otherwise, except as may be required by any applicable laws or regulations.

Overview

Diplomat Pharmacy, Inc. (the Company, Diplomat, our, us, or we) is the largest independent provider of specialty pharmacy services in the United States of America (U.S.). We are focused on improving the lives of patients with complex chronic diseases while also delivering unique solutions for manufacturers, hospitals, payers and providers. Our patient-centric approach positions us at the center of the healthcare continuum for treatment of complex chronic diseases. We offer a broad range of innovative solutions to address the dispensing, delivery, dosing and reimbursement of clinically intensive, high-cost specialty drugs (many of which can cost more than \$100,000 per patient, per year) and a wide range of applications and pharmacy benefit management (PBM) services designed to help our customers reduce the cost and manage the complexity of their prescription drug programs. We have expertise across a broad range of high-growth specialty therapeutic categories, including oncology, immunology, specialty infusion therapy, hepatitis, multiple sclerosis and many other serious or long-term conditions. We dispense to patients in all U.S. states and territories

through our advanced distribution centers and manage centralized clinical call centers to deliver localized services on a national scale. Diplomat opened its doors in 1975 as a neighborhood pharmacy with one essential tenet: Take good care of patients and the rest falls into place. Today, that tradition continues always focused on improving patient care and clinical adherence.

Table of Contents

Our revenue is derived from: (i) customized care management programs we deliver to our patients, including the dispensing of their specialty medications and (ii) PBM services that we provide to our customers. Because the therapeutic disease states primarily addressed by our specialty pharmacy services generally require multiyear or lifelong therapy, our focus on complex chronic diseases helps drive recurring revenue and sustainable growth. Our specialty pharmacy services revenue growth is primarily driven by manufacturer price inflation, new drugs coming to market, new indications for existing drugs, volume growth with current clients, and the addition of new clients. Going forward, we expect an aging population and attendant increase in prescription spending to drive demand for our PBM services.

Our recent and historical revenue growth in our Specialty segment has largely been driven by our position as a leader in the oncology, specialty infusion and immunology therapeutic categories. We generated approximately 84 percent and 83 percent of our Specialty segment revenue in these categories during the three months ended June 30, 2018 and 2017, respectively, and approximately 85 percent and 82 percent during the six months ended June 30, 2018 and 2017, respectively.

We expect our revenue growth to continue to be driven by a highly visible and recurring base of prescription volume and revenues, favorable demographic trends, advanced clinical developments, expanding drug pipelines, earlier detection of chronic diseases, improved access to medical care, mix shift toward higher-cost specialty drugs and manufacturer price increases. In addition, we believe our expanding breadth of services, our growing penetration with new customers and our access to limited-distribution drugs will help us achieve sustainable revenue growth in the future. Further, we believe that limited distribution is becoming the delivery system of choice for many specialty drug manufacturers because it is conducive to smaller patient populations, facilitates high patient engagement, clinical expertise and elevated focus on service, and because it allows for real-time patient-specific (albeit de-identified) data. Accordingly, we believe our current portfolio of more than 100 limited-distribution drugs, all of which are commercially available, is important to our revenue growth. For our PBM services, we expect our revenue to be propelled by rising drug prices and a growth in specialty drug spend, as well as a shift in the marketplace of drug coverage from a medical benefit to a pharmacy benefit, and the increasing complexity and required support for Medicare Part D programs.

We also provide specialty pharmacy support services to hospitals and health systems. Through many of these partners, we earn revenue by providing clinical and administrative support services on a fee-for-service basis to help them dispense specialty medications.

Reclassifications

During the second quarter of 2018, we changed our accounting policy to reclassify shipping and handling costs incurred at our dispensing pharmacies from Selling, general and administrative expenses (SG&A) to Cost of sales in our condensed consolidated statements of operations. The amounts reclassified were \$16,347 and \$13,286 for the three months ended June 30, 2018 and 2017, respectively, and \$31,777 and \$24,386 for the six months ended June 30, 2018 and 2017, respectively, due to this accounting policy change.

We have historically classified the cost of our nursing support services within SG&A as these amounts were not considered significant in relation to total cost of sales. During the second quarter of 2018, we reclassified these nursing support service costs from SG&A to cost of sales. The amounts reclassified were \$6,443 and \$4,834 for the three months ended June 30, 2018 and 2017, respectively, and \$11,538 and \$9,021 for the six months ended June 30, 2018 and 2017, respectively.

These reclassifications had no impact on Income from operations for any of the periods presented.

Table of Contents**Key Performance Metrics**

We regularly review a number of metrics, including the following key metrics, to evaluate our business, measure our performance, identify trends affecting our business, formulate financial projections and make strategic decisions:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2018	2017	2018	2017
<u>Specialty</u>				
Prescriptions dispensed	236,000	220,000	459,000	440,000
Net sales per prescription dispensed	\$ 5,218	\$ 5,107	\$ 5,181	\$ 5,008
Gross profit per prescription dispensed	\$ 301	\$ 299	\$ 309	\$ 308
<u>PBM</u>				
Prescriptions filled (adjusted to a 30-day equivalent)(1)	2,123,000		4,304,000	
Gross profit per prescription filled	\$ 12	\$	\$ 10	\$

(1) A 90-day prescription is counted as three 30-day prescriptions filled

Prescription Data (rounded to the nearest thousand)

Specialty prescriptions dispensed represent prescriptions filled and dispensed by Diplomat to patients, or in rare cases, to physicians. Our volume for the three and six months ended June 30, 2018 increased by 7.3 percent and 4.3 percent, respectively, from prior year periods. These volume increases were due to access to drugs that were new in the past year and growth through physician and payer relationships. Prescriptions dispensed adjusted to a 30-day equivalent by our recently acquired PBM were approximately 2,123,000 and 4,304,000 for the three and six months ended June 30, 2018, respectively.

Other Metrics

Other key metrics used in analyzing our business are net sales per prescription dispensed and gross profit per prescription dispensed. Net sales per prescription dispensed represent total prescription revenue from prescriptions dispensed by Diplomat divided by the number of prescriptions dispensed by Diplomat. Gross profit per prescription dispensed represents gross profit from prescriptions dispensed by Diplomat divided by the number of prescriptions dispensed by Diplomat. Total prescription revenue from prescriptions dispensed includes all revenue collected from patients, third-party payers and various patient assistance programs, as well as revenue collected from pharmaceutical manufacturers for data and other services directly tied to the actual dispensing of their drug(s). Gross profit represents total prescription revenue from prescriptions dispensed less the cost of the drugs purchased, including performance-related rebates paid by manufacturers to us, which are recorded as a reduction to cost of sales.

Components of Results of Operations

Net Sales

Our Specialty segment recognizes revenue for a dispensed prescription drug at time of delivery (when control transfers) and at prescription adjudication (which approximates the fill date) for patient pick up at open door or retail pharmacy locations. We can earn revenue from multiple sources for any one claim, including the primary insurance plan, the secondary insurance plan, the tertiary insurance plan, the patient co-pay and patient assistance programs. Specialty's net sales also include revenue from pharmaceutical manufacturers and other outside companies for data reporting or additional services rendered for dispensed prescriptions. Service revenue is primarily derived from fees earned by us from hospital pharmacies for patient support that is provided by us to those non-Diplomat pharmacies to dispense specialty drugs to patients. The hospital pharmacies dispense the drug and pay us a service fee for clinically and administratively servicing their patients.

Table of Contents

Our PBM segment recognizes revenue from the sale of prescription drugs by its mail order pharmacy service when the drugs are physically delivered (when control transfers) and by its retail pharmacy network when the claim is adjudicated. Our PBM segment recognizes revenue using the gross method since they act as principal in the arrangement, exercise pricing latitude and independently have a contractual obligation to pay their network pharmacy providers for benefits provided to their clients' members, and assume primary responsibility for fulfilling the promise to provide prescription drugs to their client plan members while also performing the related pharmacy benefit management services. Our PBM segment includes the total prescription price (drug ingredient cost plus dispensing fee) they have contracted with their clients as revenue, including member co-payments to pharmacies, and as cost of sales.

Cost of Sales

Cost of sales primarily represents the purchase price of the drugs that we ultimately dispense. These drugs are purchased directly from the manufacturer or from an authorized wholesaler and the purchase price is negotiated with the selling entity. In general, period-over-period percentage changes in cost of sales will move directionally with period-over-period percentage changes in net sales for prescription dispensing transactions. This is due to the mathematical relationship between average wholesale price (AWP) and wholesale acquisition cost (WAC), where most commonly AWP equals WAC multiplied by 1.20, and our contractual relationships to purchase at a discount off WAC and receive reimbursement at a discount off AWP. The discounts off AWP and WAC that we receive vary significantly by drug and by contract. Rebates we receive from manufacturers are reflected as reductions to cost of sales when they are earned. Other expenses contained in cost of sales consist of shipping and handling costs incurred at our dispensing pharmacies and nursing support services.

SG&A

Our operating expenses primarily consist of employee and employee-related costs inclusive of share-based compensation, amortization expense from definite-lived intangible assets associated with our acquired entities and amortization expense from capitalized software for internal use. Other operating expenses consist of occupancy and other indirect costs, insurance costs, professional fees and other general overhead expenses.

Other Expense

Other expense primarily consists of interest expense associated with our debt.

Net Sales

Net sales for the three months ended June 30, 2018 were \$1,416,078, a \$289,614 or 26 percent increase, compared to \$1,126,464 for the three months ended June 30, 2017. This increase was primarily the result of approximately \$218,000 of net sales from our recent acquisitions and approximately \$90,000 from the impact of manufacturer price increases. These increases were partially offset by a decrease in hepatitis C business versus the prior year period, reimbursement compression and drug mix.

Cost of Sales

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

Cost of sales for the three months ended June 30, 2018 was \$1,317,662, a \$257,912 or 24 percent increase, compared to \$1,059,750 for the three months ended June 30, 2017. This increase was primarily the result of the same factors that drove the increase in our net sales over the same time period. Cost of sales was 93.1 percent and 94.1 percent of net sales for the three months ended June 30, 2018 and 2017, respectively. The increase in gross margin from 5.9 percent to 6.9 percent for the three months ended June 30, 2017 and 2018, respectively, was primarily due to the impact of our acquisitions.

SG&A

SG&A for the three months ended June 30, 2018 were \$90,642, a \$28,771 increase, compared to \$61,871 for the three months ended June 30, 2017. Employee cost increased by \$12,672, inclusive of a \$4,135 increase in share-based compensation expense. Amortization expense from definite-lived intangible assets associated with our acquired entities increased \$7,347. Changes in fair values of contingent consideration increased \$2,339. The remaining increase was in all other SG&A to support our business including rent, recruiting primarily related to our CEO search, travel and other miscellaneous expenses. As a percent of net sales, SG&A accounted for 6.4 percent for the three months ended June 30, 2018 compared to 5.5 percent for the three months ended June 30, 2017.

Table of Contents*Other Expense*

Our other expense was \$9,998 and \$1,897 for the three months ended June 30, 2018 and 2017, respectively, and is primarily comprised of interest expense. The \$8,461 increase in interest expense was due to significantly higher average borrowings in the second quarter of 2018 resulting from recent acquisitions.

Income Tax (Expense) Benefit

Income tax (expense) benefit for the three months ended June 30, 2018 and 2017 was \$(1,740) and \$544, respectively. The income tax expense recognized during the second quarter of 2018 was primarily due to the expected recognition of employee compensation in excess of \$1,000 during 2018, which will not be deductible for income taxes, as well as state taxes. The income tax benefit recognized during the second quarter of 2017 was primarily due to the recognition of excess tax benefits as a result of stock option exercises that occurred during the quarter.

This increase was primarily the result of approximately \$175,000 from the impact of manufacturer price increases and approximately \$60,000 from our recent acquisitions. These increases were partially offset by a decrease in hepatitis C business versus the prior year period, reimbursement compression and drug mix.

Cost of Sales Specialty

Cost of sales for the six months ended June 30, 2018 was \$2,241,365, a \$172,637 or 8 percent increase, compared to \$2,068,728 for the six months ended June 30, 2017. This increase was primarily the result of the same factors that drove the increase in Specialty's net sales over the same time period. Cost of sales was 93.9 percent and 93.8 percent of net sales for the six months ended June 30, 2018 and 2017, respectively.

Net Sales & Cost of Sales PBM

Net sales and cost of sales for the six months ended June 30, 2018 were \$380,215 and \$336,781, respectively, resulting in a gross profit of \$43,434 and a gross margin of 11.4 percent.

Liquidity and Capital Resources

Our primary uses of cash include funding our ongoing working capital needs, business acquisitions, acquiring and maintaining internal use software and property and equipment, and debt service. Our primary source of liquidity for our working capital is cash flows generated from operations. At various times during the course of the year, we may be in an operating cash usage position, which may require us to use our short-term borrowings. We continuously monitor our working capital position and associated cash requirements and explore opportunities to more effectively

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

Table of Contents

manage our inventory and capital spending. As of June 30, 2018 and December 31, 2017, we had \$7,360 and \$84,251, respectively, of cash and cash equivalents. Our cash balances fluctuate based on working capital needs and the timing of sweeping available cash each day to pay down any outstanding balance on our line of credit, which was \$135,100 and \$188,250 at June 30, 2018 and December 31, 2017, respectively. Our available liquidity under our line of credit was \$114,900 and \$61,750 at June 30, 2018 and December 31, 2017, respectively.

We believe that funds generated from operations, cash and cash equivalents on hand and available borrowing capacity under our line of credit will be sufficient to meet our working capital and capital expenditure requirements for at least the next 12 months. We may enhance our competitive position through additional complementary acquisitions in both existing and new markets. Therefore, from time to time, we may access the equity or debt markets to raise additional funds to finance acquisitions or otherwise on a strategic basis.

The following table provides cash flow data for each of the periods presented:

	Six Months Ended June 30,	
	2018	2017
Net cash provided by operating activities	\$ 66,652	\$ 67,253
Net cash used in investing activities	(12,608)	(58,362)
Net cash used in financing activities	(130,935)	(9,040)
Net decrease in cash and cash equivalents	\$ (76,891)	\$ (149)

Cash Flows from Operating Activities

Cash flows from operating activities consists of net income, adjusted for non-cash items, and changes in various working capital items, including accounts receivable, inventories, accounts payable and other assets/liabilities.

The slight decrease in cash provided by operating activities for the six months ended June 30, 2018 compared to the six months ended June 30, 2017 was due to a \$21,242 increase in non-cash adjustments to net income, partially offset by a \$12,128 decrease in net income and a \$9,715 change in net working capital flows.

Cash Flows from Investing Activities

Our primary investing activities have consisted of business acquisitions, labor and other costs associated with capitalized software for internal use, capital expenditures to purchase computer equipment, software, furniture and fixtures, as well as building improvements to support the expansion of our infrastructure and workforce. As our business grows, our capital expenditures and our investment activity may continue to increase.

Edgar Filing: Diplomat Pharmacy, Inc. - Form 10-Q

The \$45,754 decrease in cash used in investing activities during the six months ended June 30, 2018 compared to the six months ended June 30, 2017 was primarily related to a \$52,282 decrease in cash used to acquire businesses, partially offset by a \$6,617 increase in spending on capitalized software and property and equipment.

Cash Flows from Financing Activities

Our primary financing activities have consisted of debt borrowings and repayments, payment of debt issuance costs and proceeds from stock option exercises.

The \$121,895 increase in cash used in financing activities during the six months ended June 30, 2018 compared to the six months ended June 30, 2017 was primarily related to a \$76,437 increase in payments on long-term debt, a \$16,416 increase in net payments on the line of credit and the nonrecurrence of a full draw down of our \$25,000 deferred draw term loan during the first quarter of 2017.

Table of Contents

Debt

We had \$470,250 and \$550,000 in outstanding term loans as of June 30, 2018 and December 31, 2017, respectively. We also had \$135,100 and \$188,250 outstanding on our line of credit as of June 30, 2018 and December 31, 2017, respectively. We had \$114,900 and \$61,750 available to borrow on our line of credit at June 30, 2018 and December 31, 2017, respectively.

The interest rates we pay under our credit facility are primarily a function of a defined margin above LIBOR. Our Term Loan A and Term Loan B interest rates were 4.35 percent and 6.60 percent, respectively, at June 30, 2018 and 4.04 percent and 6.04 percent, respectively, at December 31, 2017. Our line of credit interest rate was 4.35 percent and 4.04 percent at June 30, 2018 and December 31, 2017, respectively. We are charged a monthly unused commitment fee ranging from 0.3 percent to 0.4 percent on the average unused daily balance on our \$250,000 line of credit.

Our credit facility contains certain financial and non-financial covenants. We were in compliance with all such covenants as of June 30, 2018 and December 31, 2017.

Off-Balance Sheet Arrangements

During the periods presented, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Critical Accounting Policies and Estimates

The MD&A is based on the condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses. In accordance with U.S. GAAP, we base our estimates on historical experience, internal tracking processes, contract terms, and, in some cases, estimation of applicable volume and future performance adjustments, and various other assumptions that management believes are reasonable under the circumstances. Actual results might differ from these estimates under different assumptions or conditions and, to the extent that there are differences between our estimates and actual results, our future financial statement presentation, financial condition, results of operations, and cash flows will be affected. During the six months ended June 30, 2018, there were no material changes to our critical accounting policies and use of estimates, which are disclosed in our audited consolidated financial statements for the year ended December 31, 2017 included in our Annual Report on Form 10-K, with the exception of our adoption of ASC Topic 606. See Note 3 for further details.

New Accounting Pronouncements

See Note 3 for a description of new accounting pronouncements.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

Our operations are solely in the United States of America (U.S.) and U.S. Territories and are exposed to market risks in the ordinary course of our business. These risks primarily include interest rate and certain exposure, as well as risks relating to changes in the general economic conditions in the U.S. We are exposed to interest rate fluctuations with regard to future issuances of fixed-rate debt, and existing and future issuances of floating-rate debt. Primary exposures include LIBOR, the Federal Funds Effective Rate, the Overnight Bank Funding Rate and our administrative agent's prime rate in effect at its principal office in New York City related to debt outstanding under our credit facility.

Table of Contents

A 100 basis point increase in 2018 interest rates would have increased our pre-tax loss for the three and six months ended June 30, 2018 by approximately \$1.6 million and \$3.3 million, respectively.

In an effort to manage our exposure to interest rate fluctuations, we entered into two interest rate swap agreements during the second quarter of 2018 to fix our interest rate payments from April 30, 2019 through March 31, 2022 on \$150,000 principal balance on each of Term Loan A and Term Loan B (\$300,000 principal balance in total). See Note 9 of Item 1 for further details.

ITEM 4. CONTROLS AND PROCEDURES

Limitations on Controls

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in our reports that we file or submit under the Securities Exchange Act of 1934, as amended (the Exchange Act), is recorded, processed, summarized and reported within the specified time periods in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of the chief executive officer and the chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) promulgated under the Exchange Act) as of June 30, 2018. Based on these evaluations, our chief executive officer and our chief financial officer concluded that our disclosure controls and procedures required by paragraph (b) of Rule 13a-15 or 15d-15 were effective as of June 30, 2018.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) of the Exchange Act) that occurred during the second quarter of 2018 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On November 10, 2016, a putative class action complaint was filed in the U.S. District Court for the Eastern District of Michigan against Diplomat Pharmacy, Inc. and certain officers of the Company. Following the appointment of lead plaintiffs and lead counsel, an amended complaint was filed on April 11, 2017. The amended complaint alleges violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 in connection with public filings made between February 29, 2016 and November 2, 2016 (the potential class period). The plaintiff seeks to represent a class of shareholders who purchased stock in the potential class period. The complaint seeks unspecified monetary damages and other relief. The Company filed a motion to dismiss the amended complaint on May 24, 2017. The court issued an order denying the Company's motion to dismiss on January 19, 2018. The Company filed a motion for reconsideration of its motion to dismiss on February 2, 2018. The Company believes the complaint and allegations to be without merit and intends to vigorously defend itself against the action. The Company is unable at this time to determine whether the outcome of the litigation would have a material impact on its results of operations, financial condition or cash flows.

On February 10, 2017, the Company's Board of Directors (the Board) received a demand letter from a purported shareholder containing allegations similar to those contained in the putative class action complaint described above. The letter demanded that the Board take action to remedy the alleged violations. In response, the Board established a Special Independent Committee of its disinterested and independent members to investigate the claims. Subsequently, on June 2, 2017, the shareholder filed a putative shareholder's derivative lawsuit in the Michigan Circuit Court for the County of Genesee regarding the same matters alleged in the demand letter. The complaint names the Company as a nominal defendant and names a number of the Company's current and former officers and directors as defendants. The complaint seeks unspecified monetary damages and other relief. In connection with the ongoing Special Independent Committee investigation, on July 20, 2017, by agreement between the Company and the shareholder, the court ordered a stay of legal proceedings for 90 days, after which time by further agreements of the Company and the shareholder, the court extended the stay until August 1, 2018. The Company is unable at this time to determine whether the outcome of the litigation would have a material impact on its results of operations, financial condition or cash flows.

The results of legal proceedings are often uncertain and difficult to predict, and the Company could from time to time incur judgments, enter into settlements, materially change its business practices or technologies or revise its expectations regarding the outcome of certain matters. In addition, the costs incurred in litigation can be substantial, regardless of the outcome.

The Company's business of providing specialized pharmacy services and other related services may subject it to litigation and liability for damages in the ordinary course of business. Nevertheless, the Company believes there are no other legal proceedings, the outcome of which, if determined adversely to the Company, would individually or in the aggregate be reasonably expected to have a material adverse effect on its business, financial position, cash flows, or results of operations.

ITEM 1A. RISK FACTORS

There have been no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2017, which was filed with the Securities and Exchange Commission on March 1, 2018.
