FPSO Brasil restarts production in the Roncador Field

(Rio de Janeiro, May 27, 2004). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA], a Brazilian international energy company, announces that the problem that occurred yesterday, with the flare of the FPSO BRASIL, which is operating in the Roncador Field, has already been solved, and the platform should restart production tomorrow, May 28, 2004.

The stoppage in production of the FPSO Brasil happened yesterday at 23:30 hrs, to begin the process of inspecting the flare and subsequent repairs have already been completed.

The bolts that fix the upper end of the flare to the pipe carrying the gas to the top of the tower came loose. As a result, part of the flame began to exit through the joint between the two components, around 1 meter below the top of the flare. Continuing to burn gas under these conditions could have caused damage, jeopardizing the platform's operational safety, for which reason it was decided to suspend production. It should be stressed that at no time was the platform's integrity threatened.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
