#### **Item 5** Full Description of Material Change

Cameco announced on February 1, 2006 that it had completed the acquisition of 100% interest in Zircatec Precision Industries, Inc. for \$108 million. On December 2, 2005, Cameco announced that it had reached an agreement to acquire Zircatec. Zircatec s primary business is manufacturing nuclear fuel bundles for sale to companies that generate electricity from Candu reactors.

Cameco used cash to fund this acquisition that it is expected to be moderately accretive to cash flow and earnings in 2006, assuming there is no significant change to existing revenue and costs.

In Port Hope, Ontario, Zircatec operates a facility that is licensed to handle uranium materials. The plant presses uranium dioxide powder into pellets that are loaded into tubes and then assembled into fuel bundles. These bundles are ready to insert into the reactor core as fuel to generate clean electricity. Zircatec is a supplier of fuel fabrication services to Candu style reactors, with sales to Bruce Power L.P. currently representing a substantial portion of Zircatec s business. The plant s capacity is 1,200 tonnes of uranium fuel annually.

In Cobourg, Ontario, Zircatec also operates a facility where the primary product is zirconium tubing that is an integral part of fuel bundles used by nuclear reactors. The plant also produces titanium alloy tubing and manufactures various Candu reactor components and monitoring equipment.

All dollar amounts are expressed in Canadian dollars.
