Item 1.02 Termination of a Material Definitive Agreement.

By letter dated April 26, 2007 and received on April 27, 2007, Key Pharmaceuticals, Inc. notified the registrant that it had terminated the License Agreement between the parties dated March 13, 2000 as a result of its failure to make royalty payments due under the agreement. The License Agreement granted Hercon Laboratories Corporation, 98.5% of the outstanding stock of which is owned by Transderm Laboratories Corporation, the right to use certain intellectual property developed by Key, including technology covered by a US patent, in the transdermal nitroglycerin patch products the company sells. The letter demands that Hercon immediately cease manufacturing, using, importing and selling drug-in-adhesive transdermal nitroglycerin patch products that incorporate Key's technology.

Transderm's board of directors continues to negotiate with Key in the hope that it can enter into a settlement with Key as to the payment of the past due royalties.
