NOTE 2 - BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Accounting Principles

The accompanying unaudited consolidated financial statements have been prepared by the Company, pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”) as applicable to smaller reporting companies, and generally accepted accounting principles for interim financial reporting. The information furnished herein reflects all adjustments (consisting of normal recurring accruals and adjustments) which are, in the opinion of management, necessary to fairly present the operating results for the respective periods. Certain information and footnote disclosures normally presented in annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) have been omitted pursuant to such rules and regulations. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and footnotes included in the Company’s Annual Report on Form 20-F filed on March 25, 2011 with the U.S. Securities and Exchange Commission. The results of the nine-month period ended September 30, 2011 is not necessarily indicative of the results to be expected for the full year ended December 31, 2011.

Principles of Consolidation

The condensed consolidated financial statements include the financial statements of the Company and its three subsidiaries. All significant inter-company balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of the consolidated financial statements in accordance with U.S. GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates. On an ongoing basis, management reviews its estimates and assumptions, including those related to the recoverability of the carrying amount and the estimated useful lives of long-lived assets, valuation allowances for accounts receivable and realizable values for inventories. Changes in facts and circumstances may result in revised estimates.

Foreign Currency Transactions

The Company's reporting currency is the Renminbi ("RMB").

Fuwei Films (Holdings) Co., Ltd. and Fuwei (BVI) operate in Hong Kong as investment holding companies and their financial records are maintained in Hong Kong dollars, being the functional currency of these two entities. Assets and liabilities are translated into RMB at the exchange rates at the balance sheet date, equity accounts are translated at historical exchange rates and income, expenses, and cash flow items are translated using the average rate for the period. The translation adjustments are recorded in accumulated other comprehensive income in the statements of shareholders' equity and comprehensive income.

Transactions denominated in currencies other than RMB are translated into RMB at the exchange rates quoted by the People's Bank of China (the "PBOC") prevailing at the dates of transactions. Monetary assets and liabilities denominated in foreign currencies are translated into RMB using the applicable exchange rates quoted by the PBOC at the balance sheet dates. The resulting exchange differences are recorded in the statements of income.

RMB is not fully convertible into foreign currencies. All foreign exchange transactions involving RMB must take place either through the PBOC or other institutions authorized to buy and sell foreign currency. The exchange rate adopted for the foreign exchange transactions are the rates of exchange quoted by the PBOC which are determined largely by supply and demand.

Exchange Rate Information

Foreign Currency - The Company's principal country of operations is in the People's Republic of China. The financial position and results of operations of the Company are determined using the local currency ("Renminbi") as the functional currency.

Unless otherwise noted, all translations from Renminbi to U.S. dollars in reporting of assets and liabilities, as well as the results of operations and cash flow items denominated in foreign currencies are translated at the convenience exchange rate. The registered equity capital denominated in the functional currency is translated at the historical rate of exchange at the time of capital contribution. All translation adjustments resulting from the translation of the financial statements into the reporting currency ("US Dollars") are dealt with as a separate component within shareholders' equity. We make no representation that any Renminbi or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or Renminbi, as the case may be, at any particular rate, the rates stated above, or at all.

Cash and Cash Equivalents and Restricted Cash

For statements of cash flow purposes, the Company considers all cash on hand and in banks, including accounts in book overdraft positions, certificates of deposit and other highly-liquid investments with maturities of three months or less, when purchased, to be cash and cash equivalents.

Restricted cash refers to the cash balance held by bank as deposit for Letters of Credit. The Company has restricted cash of RMB99,437 (US\$15,549) and RMB1,314 (US\$199) as of September 30, 2011 and December 31, 2010, respectively.

Trade Accounts Receivable

Trade accounts receivable are recorded at the invoiced amount after deduction of trade discounts, if any, and do not bear interest. The allowance for doubtful accounts is the Company's best estimate of the amount of probable credit losses in the Company's existing accounts receivable. The Company determines the allowance based on historical write-off experience, customer specific facts and economic conditions.

The Company reviews its allowance for doubtful accounts monthly. Past due balances over 90 days and over a specified amount are reviewed individually for collectability. All other balances are reviewed on a pooled basis by aging of such balances.

Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off-balance-sheet credit exposure related to its customers.

The Company has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. These receivables are due within 7 to 60 days from the date of billing. Normally, the Company does not obtain collateral from customers.

Inventories

Inventories are stated at the lower of cost or market value. Cost is determined using the average-weighted cost method. Cost of work in progress and finished goods comprises of direct material, direct production cost and an allocated portion of production overheads based on normal operating capacity. Any inventory markdown is classified in the income statement as a component of cost of goods sold.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Depreciation on property, plant and equipment is calculated on the straight-line method (after taking into account their respective estimated residual values) over the estimated useful lives of the assets. They are as follows:

FUWEI FILMS (HOLDINGS) CO., LTD. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(amounts in thousands except share and per share value)
(Unaudited)

	Years
Buildings and improvements	25 - 30
Plant and equipment	10 - 15
Computer equipment	5
Furniture and fixtures	5
Motor vehicles	5

Depreciation of property, plant and equipment attributable to manufacturing activities is capitalized as part of the inventory, and expensed to cost of goods sold when inventory is sold. Depreciation related to abnormal amounts from idle capacity is charged to cost of goods sold for the period incurred.

Construction in progress represents capital expenditures in respect to the new BOPET production line. No depreciation is provided in respect to construction in progress.

Lease Prepayments

Lease prepayments represent the costs of land use rights in the PRC. Land use rights are carried at cost and charged to expense on a straight-line basis over the respective periods of rights of 30 years. The current portion of lease prepayments has been included in prepayments and other receivables in the balance sheet.

Goodwill

Goodwill represents the excess of purchase price and related costs over the value assigned to the net tangible and identifiable intangible assets of businesses acquired. Goodwill is not amortized but is tested for impairment annually, or more frequently when circumstances indicate a possible impairment may exist. Impairment testing is performed at a reporting unit level. An impairment loss generally would be recognized when the carrying amount of the reporting unit exceeds the fair value of the reporting unit, with the fair value of the reporting unit determined using a discounted cash flow ("DCF") analysis. A number of significant assumptions and estimates are involved in the application of the DCF analysis to forecast operating cash flows, including the discount rate, the internal rate of return, and projections of realizations and costs to produce. Management considers historical experience and all available information at the time the fair values of its reporting units are estimated.

Impairment of Long-lived Assets

Long-lived assets, other than goodwill, including property, plant, and equipment and intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized by the amount in which the carrying amount of the asset exceeds the fair value of the asset.

Revenue Recognition

Sales of plastic films are reported, net of value added taxes (“VAT”), sales returns, and trade discounts. The standard terms and conditions under which the Company generally delivers allow a customer the right to return product for refund only if the product does not conform to product specifications; the non-conforming product is identified by the customer; and the customer rejects the non-conforming product and notifies the Company within 30 days of receipt for both PRC and overseas customers. The Company recognizes revenue when products are delivered and the customer takes ownership and assumes risk of loss, collection of the relevant receivable is probable, persuasive evidence of an arrangement exists and the sales price is fixed or determinable.

In the PRC, VAT of 17% on the invoice amount is collected in respect to the sales of goods on behalf of tax authorities. The VAT collected is not revenue of the Company; instead, the amount is recorded as a liability on the consolidated balance sheet until such VAT is paid to the authorities.

Government Grants

Government grants are recognized in the consolidated balance sheet initially as deferred income when they have been received. Grants that compensate the Company for expenses incurred are recognized as a reduction of expenses in the consolidated statement of income in the same period in which the related expenses are incurred.

Retirement and Other Post-retirement Benefits

Contributions to retirement schemes (which are defined as contribution plans) are charged to expense as and when the related employee service is provided.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Earnings Per Share

Basic earnings per share is computed by dividing net earnings by the weighted average number of ordinary shares outstanding during the year. Diluted earnings per share is calculated by dividing net earnings by the weighted average number of ordinary and dilutive potential ordinary shares outstanding during the year. Diluted potential ordinary shares consist of shares issuable pursuant to the Company’s stock option plan.

Share-Based Payments

The Company accounts for share based payments under the modified-prospective transition method, which requires companies to measure and recognize the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value.

Contingencies

In the normal course of business, the Company is subject to contingencies, including legal proceedings and claims arising out of the business that relate to a wide range of matters, including among others, product liability. The Company recognizes a liability for such contingency if it determines it is probable that a loss has occurred and a reasonable estimate of the loss can be made. The Company may consider many factors in making these assessments including past history and the specifics of each matter. As the Company has not become aware of any product liability claim since operations commenced, the Company has not recognized a liability for any product liability claims.

Recently Issued Accounting Standards

Intangibles-Goodwill: In September 2011, the FASB issued amendments to the goodwill impairment guidance which provides an option for companies to use a qualitative approach to test goodwill for impairment if certain conditions are met. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011 (early adoption is permitted). The implementation of amended accounting guidance is not expected to have a material impact on our consolidated financial position and results of operations.

Fair Value Measurements: In May 2011, the FASB issued ASU 2011-04, "Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." ASU 2011-04 attempts to improve the comparability of fair value measurements disclosed in financial statements prepared in accordance with U.S. GAAP and IFRS. Amendments in ASU 2011-04 clarify the intent of the application of existing fair value measurement and disclosure requirements, as well as change certain measurement requirements and disclosures. The amended guidance is effective for interim and annual periods beginning after December 15, 2011. As the impact of the guidance is primarily limited to enhanced disclosures, the Company does not believe that this will have a material impact on its consolidated financial statements.

Comprehensive income: In June 2011, the FASB issued amended guidance on the presentation of comprehensive income. The amendments provide an entity with an option to present the total of comprehensive income, the components of net income and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The guidance is effective for fiscal years, and interim periods within those years beginning after December 15, 2011 and should be applied on a retrospective basis. As the amendments are limited to presentation only, the Company does not believe that this will have a material impact on its consolidated financial statements.

NOTE 8 – LONG-TERM DEPOSIT

On January 20, 2008, Shandong Fuwei signed a “Letter of Intent of Joyinn Capital Increase and Share Expansion” (“LOI”) with Joyinn Hotel Investment & Management Co., Ltd. (“Joyinn”) and the Shareholder of Joyinn. Joyinn is a legal company of limited liability that registered on May 19, 2006 in Beijing, with registered capital of RMB50,000.

Pursuant to the LOI, Shandong Fuwei deposited RMB26,000 (half of the would-be added register capital of RMB52,000), to Joyinn as a prepayment as of June 30, 2008. The prepayment to Joyinn would be regarded as investment payment after all parties entered into the final capital increase and shares expansion agreement during the effective term of this LOI. A share pledging agreement was entered into subsequently on April 9, 2008 between Shandong Fuwei and Shandong Xinneng Investment Co., Ltd. (“Pledger”), which holds 97.6% shares of Joyinn. The Pledger agreed to pledge its 52% interest in Joyinn, as a guarantee to the prepayment on the newly increased register capital made by Shandong Fuwei to Joyinn. Based on the mutual supplementary agreement signed in June 2008, the prepayment was decreased by RMB5,000 and returned to the Company on June 18, 2008.

On June 30, 2009, Shandong Fuwei and the Pledger, the major shareholder of Joyinn, agreed that the Pledger would pledge another 19% of its interest in Joyinn in addition to the previous pledge of 52% interest in Joyinn as a guarantee to the prepayment on the newly increased register capital made by Shandong Fuwei to Joyinn. As a result, the Pledger’s percentage of pledged interest in Joyinn increased from 52% to 71%.

On July 14, 2009, Shandong Fuwei and Joyinn entered into a Supplementary Agreement of Letter of Intent of Joyinn Capital Increase and Share Expansion (“Supplementary Agreement”) which extended the duration of former agreement to two (2) years, consequently granting Shandong Fuwei the option to determine whether to continue or withdraw the investment prior to January 14, 2010, the expiration date of the Supplementary Agreement.

Upon the expiration of the Supplementary Agreement on January 14, 2010, Shandong Fuwei and the Pledger entered into an agreement pursuant to which the Pledger agreed to transfer a 71% interest in Joyinn to Shandong Fuwei. The transaction shall be subject to the approval from the board of directors and shareholder meeting of Joyinn. In the year ended December 31, 2010, the Company impaired the deposit amount by RMB4,240 (US\$641). The impairment was determined based on an independent appraisal study. As of September 30, 2011, the total amount of the deposit was RMB16,760 (US\$2,621).

Our effective tax rates were approximately 18% and 4% for the nine months ended September 30, 2011 and 2010, respectively. Our effective tax rate was lower than the U.S. federal statutory rate due to the fact that our operations are carried out in foreign jurisdictions, which are subject to lower income tax rates.

NOTE 11 - EARNINGS PER SHARE

The Company uses the treasury stock method to compute dilution related to outstanding stock options. Because the option price exceeded the market price for common stock as of September 30, 2011, the options were anti-dilutive and were not included when computing diluted earnings per share.

NOTE 12 - STOCK OPTION PLAN

On December 22, 2006, the Company granted 187,500 stock options to Maxim Group LLC as part of the compensation for the provision of services relating to the initial public offering, or IPO, of the Company. The stock options are exercisable at an exercise price equal to US\$10.35 per ordinary share and expire on December 22, 2011.

The fair value of each option award is estimated on the date of grant using the Black-Scholes pricing model based on the following assumptions:

Fair value of shares on measurement date	US\$ 8.28 per share
Expected volatility	57.26
Expected dividends	0.00
Expected term (in years)	5
Risk-free rate	4.56

The fair value of the Company's shares was estimated based on the IPO price of US\$8.28 per share. The expected volatility is estimated by reference to the historical volatility of comparable companies listed on the Nasdaq Global Market. The risk-free rate for periods within the contractual life of the options is based on the U.S. government bond in effect at the time of grant. Expected dividend yields are based on historical dividends. Changes in these subjective input assumptions could materially affect the fair value estimates.

The Company recognized share-based compensation expenses of RMB5,643 for the year ended December 31, 2006, as listing expense deducted from IPO proceeds and recorded in additional paid-in capital. As of September 30, 2011, there was no unrecognized compensation costs related to unvested stock options.

The following is a summary of the stock option activity:

NOTE 13 – CONTINGENCIES

Class Action

On October 19, 2007, the Company became aware that a class action lawsuit had been filed in the United States District Court for the Southern District of New York, on behalf of all persons who purchased the Company's stock from the date of the Company's IPO on December 19, 2006 through October 16, 2007. The complaint alleged that the Company and certain of its present and former officers, directors, and shareholders violated the Securities Act of 1933, as amended (the "Securities Act").

On November 21, 2007, the Company was given notice that a second class action lawsuit had been filed in the United States District Court for the Southern District of New York, commenced on behalf of all persons who purchased the Company's stock pursuant or traceable to the Registration Statement and Prospectus issued in connection with the Company's IPO, during the period from December 19, 2006 through November 12, 2007. The complaint alleged that the Company, its underwriters, and certain of its executives violated Sections 11, 12(a)(2), and 15 of the Securities Act. The complaint also alleged that the defendants misrepresented and omitted material information regarding the Company and its business operations.

On January 24, 2008, the court consolidated into a single action the putative securities class actions pending against the Company and certain of its officers, directors, and shareholders. The court appointed Ninyat Tonyaz as lead plaintiff, appointed the Rosen Law Firm, P.A. as lead counsel, and granted plaintiffs leave to file a consolidated amended class action complaint. The consolidated action is titled, In re Fuwei Films Securities Litigation, Case No. 07-CV-9416 (RJS).

On March 14, 2008, plaintiffs filed a consolidated amended class action complaint (the "Amended Complaint") naming as defendants the Company, Xiaohan He, Mark Stulga, Jun Yin, Tongju Zhou, Duo Wang, and the Company's IPO underwriters (the "Underwriter Defendants") Maxim Group LLC, WR Hambrecht + Co., and Chardan Capital Markets, LLC. The Amended Complaint asserts claims for the violation of Sections 11, 12(a)(2), and 15 of the Securities Act. The Company, Messrs. He and Stulga, and the Underwriter Defendants were served with the Amended Complaint and, as described below, moved to dismiss the claims asserted against them.

On November 3, 2008, the plaintiffs filed proofs of service with the Court, indicating that Messrs. Yin, Wang, and Zhou had been served with the Amended Complaint on or about August 14, 2008, and that they had 90 days after such date to serve an answer to the Amended Complaint or a motion pursuant to Rule 12 of the Federal Rules of Civil Procedure.

By letter dated March 17, 2009, plaintiffs apprised the Court of Fuwei Films' March 10, 2009 Press Release disclosing the initial verdict against Messrs. Yin, Wang, and Zhou, and requested that the court take judicial notice of this press release in adjudicating the pending motions to dismiss.

By the court's Memorandum and Order dated July 10, 2009, the motions to dismiss of the Company, Messrs. He and Stulga, and the Underwriter Defendants were granted in part and denied in part. In ruling on the motion to dismiss, the court was required to assume that the facts alleged by the plaintiffs are true and to draw all reasonable inferences in the plaintiffs' favor. Applying that standard, the motions to dismiss of the defendants were granted in part and denied

in part by the court. The court dismissed plaintiffs' claims to the extent they were based upon Fuwei Films' alleged failure to disclose the DMT arbitration proceeding. The court also dismissed certain of plaintiffs' claims to the extent they were brought on behalf of shareholders who did not purchase their shares directly in the IPO.

The court sustained plaintiffs' remaining claims. However, the court noted that defendants may be able to assert affirmative defenses provided by the federal securities laws in a motion for summary judgment, which could resolve the case before trial.

On September 9, 2009, the Company and Messrs. He and Stulga filed their answer to the Amended Complaint. On October 2, 2009, the court entered a case management plan and scheduling order, which set deadlines relating to pre-trial discovery, mediation, and dispositive motions. Discovery thereafter proceeded.

On March 26, 2010, Fuwei Films, Messrs. He and Stulga, the Underwriter Defendants, and Plaintiffs, through their respective attorneys, engaged in a mediation aimed at resolving the litigation. On June 24, 2010, the parties reached a settlement in principle.

On September 16, 2010, subject to the court's approval, plaintiffs agreed to accept US\$2.15 million in full and final settlement of all claims they have or may have against the Company, certain of its present and former officers, directors, and shareholders, and the underwriters. Fuwei Films agreed to contribute US\$1.0 million towards the settlement. The signed settlement agreement was submitted to the court for its preliminary approval.

As of December 31, 2010, the Company accrued US\$1.0 million liability in connection with this litigation excluding the defense expenses.

On January 4, 2011, the court preliminarily approved the settlement, directed that notice be given to the class, and set a fairness hearing for April 27, 2011.

In accordance with the settlement agreement, the Company deposited US\$0.8 million into the Securities Litigation Settlement Fund Account in January 2011.

On April 27, 2011, the court approved the settlement of the class action at the fairness hearing and dismissed the action with prejudice. Pursuant to the terms of the settlement agreement, the Company paid the remaining US\$0.2 million into the Securities Litigation Settlement Fund Account on May 10, 2011.

NOTE 14 - MAJOR CUSTOMERS AND VENDORS

There were no major customers who accounted over 10% of the total net revenue for the nine-month periods ended September 30, 2011 and 2010.

One vendor provided approximately 44.0% of the Company's raw materials for the first nine months ended September 30, 2011. The Company had RMB2,276 (US\$356) advance to the vendor as of September 30, 2011. Two vendors provided approximately 60.3% of the Company's raw materials for the first nine months ended September 30, 2010 with each vendor accounting for about 50.0% and 10.3%, respectively.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

References to "dollars" and "US\$" are to United States Dollars. References to "we", "us", the "Company" or "Fuwei Films" include Fuwei Films (Holdings) Co., Ltd. and its subsidiaries, except where the context requires otherwise.

In the first nine months of 2011, there was more supply than demand in the market resulting from significant increased capacity in the international community including India and China. Prices dropped in the international market and the demand for products made in China decreased significantly. In the second and third quarters of 2011, our sales prices continued to decline. Compared to the previous two quarters, the export volume in the third quarter decreased significantly. In addition, since the beginning of 2011 raw material prices have risen. However, with the reduced demand from downstream clients and fall in crude oil price, the percentage increase, although slightly down since the second quarter, is still far less than the percentage reduction in sales price.

All these factors have affected our earnings in the third quarter. However, since earnings for the first six months of 2011 were strong and since the sales of specialty films increased in the nine months ended September 30, 2011, our net sales for the nine months ended September 30, 2011 increased compared to the same period in 2010.

With growing capacity of BOPET in China and continued decrease in demand in international market, we are challenged with intenser competition in 2011 at home and abroad. Additionally, as noted above, the price of raw materials has continued to be high which has adversely affected our sales and profitability. In the event that we are unable to compete successfully or retain effective control over the pricing of our products, our profit margins will continue to drop in the fourth quarter of 2011.

Additionally, some countries such as the United States of America and Republic of Korea are currently employing trade protection against Chinese manufacturers, using anti-dumping investigations and imposing anti-dumping duties, which also adversely affect our exports to those countries.

Results of operations for the nine months ended September 30, 2011 and September 30, 2010

The table below sets forth certain line items from our Statement of Income as a percentage of revenue:

	Nine-Month Period Ended September 30, 2011	Nine-Month Period Ended September 30, 2010

Operating expenses	(9.8)	(15.4)
Operating income	8.4	6.9
Other income (expense)	(1.3)	(2.1)
Income tax benefit (expense)	(1.3)	(0.2)
Net income (loss)	5.8	4.6

Revenue

The Company's revenue is primarily derived from the manufacture and sale of plastic films.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Net sales during the nine-month period ended September 30, 2011 were RMB428.4 million (US\$67.0 million), compared to RMB327.9 million (US\$49.0 million) during the same period in 2010, representing a 30.6% increase, mainly due to the rise of sales prices.

Sales of specialty films during the nine-month period ended September 30, 2011 were RMB108.4 million (US\$17.0 million), representing 25.3% of total net sales as compared to 16.2 % in the same period of 2010, an increase of 9.1% compared to the same period last year. The increase was largely attributable to the increase in demand for films in electronics as well as high-end and environmentally friendly packaging.

The following is a breakdown of commodity and specialty film sales (amounts in thousands):

	Nine-Month Period Ended		% of Total		Nine-Month Period Ended		% of Total
