Cash and cash equivalents at end of period	$16,644	$19,343

See accompanying notes to the consolidated financial statements.

UNITED COMMUNITY BANCORP AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION- United Community Bancorp (the "Company"), a Federally-chartered corporation, is the mid-tier holding company for United Community Bank (the "Bank"), which is a Federally-chartered, FDIC-insured savings bank. The Company was organized in conjunction with the Bank's reorganization from a mutual savings bank to the mutual holding company structure on March 30, 2006. United Community MHC (the "MHC"), a Federally-chartered corporation, is the mutual holding company parent of the Company. At December 31, 2011, the MHC owned approximately 59% of the Company and must always own at least a majority of the voting stock of the Company. The Company, through the Bank, operates in a single business segment providing traditional banking services through its office and branches in southeastern Indiana. UCB Real Estate Management Holding, LLC is a wholly-owned subsidiary of the Bank. The entity was formed for the purpose of holding assets that are acquired by the Bank through, or in lieu of, foreclosure. UCB Financial Services, Inc, a wholly-owned subsidiary of United Community Bank, was formed for the purpose of collecting commissions on investments referred to Lincoln Financial Group.

The accompanying unaudited consolidated financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission, and therefore do not include all information or footnotes necessary for complete financial statements in conformity with accounting principles generally accepted in the United States of America. However, all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the financial statements have been included. No other adjustments have been included. The results for the three and six month periods ended December 31, 2011 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2012. These financial statements should be read in conjunction with the Company's audited consolidated financial statements and the accompanying notes thereto for the year ended June 30, 2011, which are included on the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 28, 2011.

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements.

2. PLAN OF CONVERSION AND REORGANIZATION – The Boards of Directors of the MHC and the Company adopted a Plan of Conversion and Reorganization (the "Plan") on March 10, 2011 as amended and restated on May 12, 2011. Pursuant to the Plan, the MHC will convert from the mutual holding company form of organization to the fully public form. The MHC will be merged into the Company, and the MHC will no longer exist. The Company will merge into a new Indiana corporation named United Community Bancorp. As part of the conversion, the MHC's ownership interest of the Company will be offered for sale in a public offering. The existing publicly held shares of the Company, which represents the remaining ownership interest in the Company, will be exchanged for new shares of common stock of United Community Bancorp, the new Indiana corporation. The exchange ratio will ensure that immediately after the conversion and public offering, the public shareholders of the Company will own the same

aggregate percentage of United Community Bancorp common stock that they owned immediately prior to that time (excluding shares purchased in the stock offering and cash received in lieu of fractional shares). When the conversion and public offering are completed, all of the capital stock of United Community Bank will be owned by United Community Bancorp, the Indiana corporation.

The Plan provides for the establishment, upon the completion of the conversion, of special “liquidation accounts” for the benefit of certain depositors of United Community Bank in an amount equal to the greater of the MHC’s ownership interest in the retained earnings of the Company as of the date of the latest balance sheet contained in the prospectus or the retained earnings of United Community Bank at the time it reorganized into the MHC. Following the completion of the conversion, under the rules of the Office of the Comptroller of the Currency (“OCC”), United Community Bank will not be permitted to pay dividends on its capital stock to United Community Bancorp, its sole shareholder, if United Community Bank’s shareholder’s equity would be reduced below the amount of the liquidation accounts. The liquidation accounts will be reduced annually to the extent that eligible account holders have reduced their qualifying deposits. Subsequent increases will not restore an eligible account holder’s interest in the liquidation accounts.

Direct costs of the conversion and public offering will be deferred and reduce the proceeds from the shares sold in the public offering. If the conversion and public offering are not completed, all costs will be charged to expense in the period in which the public offering is terminated. Costs of $557,000 had been incurred and capitalized related to the conversion as of June 30, 2011. Additional costs of $484,000 have been incurred and capitalized related to the conversion during the six months ended December 31, 2011.

3. EMPLOYEE STOCK OWNERSHIP PLAN (ESOP) – As of December 31, 2011 and June 30, 2011, the ESOP owned 202,061 shares of the Company's common stock, which were held in a suspense account until released for allocation to participants.

4. EARNINGS PER SHARE (EPS) –The Company's restricted share awards contain non-forfeitable dividend rights but do not contractually obligate the holders to share in the losses of the Company. Accordingly, during periods of net income, unvested restricted shares are included in the determination of both basic and diluted EPS. During periods of net loss, these shares are excluded from both basic and diluted EPS.

Basic EPS is based on the weighted average number of common shares and unvested restricted shares outstanding, adjusted for ESOP shares not yet committed to be released. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock. For each of the three and six month periods ended December 31, 2011 and 2010, outstanding options to purchase 346,304 shares were excluded from the computations of diluted earnings per share as their effect would have not been dilutive. The following is a reconciliation of the basic and diluted weighted average number of common shares outstanding:

	Three Months Ended December 31,		**Six Months Ended December 31,**	
	2011	2010	2011	2010
Basic weighted average outstanding shares	7,638,321	7,631,858	7,638,321	7,631,858
Effect of dilutive stock options	—	—	—	—
Diluted weighted average outstanding shares	7,638,321	7,631,858	7,638,321	7,631,858

5. STOCK-BASED COMPENSATION – The Company applies the provisions of ASC 718-10-35-2, *Compensation-Stock Compensation*, to stock-based compensation, which requires the Company to measure the cost of employee services received in exchange for awards of equity instruments and to recognize this cost in the financial statements over the period during which the employee is required to provide such services. The Company has elected to recognize compensation cost associated with its outstanding stock-based compensation awards with graded vesting on an accelerated basis pursuant to ASC 718-10-35-8. The expense is calculated for stock options at the date of grant using the Black-Scholes option pricing model. The expense associated with restricted stock awards is calculated based upon the value of the common stock on the date of grant. No stock-based compensation awards were granted during the three and six month periods ended December 31, 2011 and 2010.

6. DIVIDENDS – On October 27, 2011 and August 11, 2011, the Board of Directors of the Company declared cash dividends on the Company's outstanding shares of stock of $0.11 per share. The dividends, totaling $664,000 were paid on November 30, 2011 and August 31, 2011, respectively. United Community MHC, which owns 4,655,200 shares of the Company's common stock, waived receipt of the dividends.

6

7. SUPPLEMENTAL CASH FLOW INFORMATION

	Six Months Ended December 31,	
	2011	2010
	(Dollars in thousands)	
Supplemental disclosure of cash flow information is as follows:		
Cash paid during the period for:		
Income taxes	$—	$682
Interest	$2,218	$3,109
Supplemental disclosure of non-cash investing and financing activities is as follows:		
Unrealized gains on securities designated as available for sale, net of tax	$(26)	$(472)
Transfers of loans to other real estate owned	$514	$60

8. DISCLOSURES ABOUT FAIR VALUE OF ASSETS AND LIABILITIES - ASC 820, *Fair Value Measurements and Disclosures*, requires disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated balance sheet, for which it is practicable to estimate the value. For financial instruments where quoted market prices are not available, fair values are estimated using present value or other valuation methods.

The following methods and assumptions are used in estimating the fair values of financial instruments:

Cash and cash equivalents

The carrying values presented in the consolidated statements of position approximate fair value.

Investments and mortgage-backed securities

For investment securities (debt instruments) and mortgage-backed securities, fair values are based on quoted market prices, where available. If a quoted market price is not available, fair value is estimated using quoted market prices of comparable instruments.

Loans receivable

The fair value of the loan portfolio is estimated by evaluating homogeneous categories of loans with similar financial characteristics. Loans are segregated by types, such as residential mortgage, commercial real estate, and consumer. Each loan category is further segmented into fixed and adjustable rate interest, terms, and by performing and non-performing categories. The fair value of performing loans, except residential mortgage loans, is calculated by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources. The fair value for significant non-performing loans is based on recent internal or external appraisals. Assumptions regarding credit risk, cash flow, and discount rates are judgmentally determined by using available market information.

Federal Home Loan Bank stock

The Bank is a member of the Federal Home Loan Bank system and is required to maintain an investment based upon a pre-determined formula. The carrying values presented in the consolidated statements of position approximate fair value.

Deposits

The fair values of passbook accounts, NOW accounts, and money market savings and demand deposits approximate their carrying values. The fair values of fixed maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently offered for deposits of similar maturities.

Advance from Federal Home Loan Bank

The fair value is calculated using rates available to the Company on advances with similar terms and remaining maturities.

Off-balance sheet items

Carrying value is a reasonable estimate of fair value. These instruments are generally variable rate or short-term in nature, with minimal fees charged.

The estimated fair values of the Company's financial instruments at December 31, 2011 and June 30, 2011 are as follows:

	December 31, 2011		**June 30, 2011**	
	Carrying Amounts	Fair Value	Carrying Amounts	**Fair Value**
	(In thousands)			
Financial assets:				
Cash and due from banks	$16,644	$16,644	$31,159	$31,159
Investment securities available for sale	26,058	26,058	49,230	49,230
Investment securities held to maturity	543	543	564	564
Mortgage-backed securities available for sale	99,768	99,768	74,119	74,119
Loans receivable and loans receivable held for sale	286,016	288,145	286,369	288,198
Accrued interest receivable	1,846	1,846	1,972	1,972
Investment in FHLB stock	6,588	6,588	2,507	2,507
Financial liabilities:				

Deposits	$407,443	$409,471	$413,091	$414,794
Accrued interest payable	38	38	47	47
FHLB advance	1,333	1,358	1,833	1,874
Off-balance sheet items	$—	$—	$—	$—

ASC 820-10-50-2 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Fair value methods and assumptions are set forth below for each type of financial instrument. Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 2 securities include U.S. Government and agency mortgage-backed securities, U.S. Government agency bonds, municipal securities, and other real estate owned. If quoted market prices are not available, the Bank utilizes a third party vendor to calculate the fair value of its available for sale securities. The third party vendor uses quoted prices of securities with similar characteristics when available. If such quotes are not available, the third party vendor uses pricing models or discounted cash flow models with observable inputs to determine the fair value of these securities.

Fair value measurements for certain assets and liabilities measured at fair value on a recurring basis:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
December 31, 2011:	(In thousands)			
Mortgage-backed securities	$99,768	$ —	$ 99,768	$ —
U.S. Government corporations and agencies	6,528	—	6,528	—
Municipal bonds	19,400	—	19,400	—
Other equity securities	130	130	—	—
June 30, 2011:				
Mortgage-backed securities	$74,119	$ —	$ 74,119	$ —
U.S. Government corporations and agencies	28,856	—	28,856	—
Municipal bonds	20,244	—	20,244	—
Other equity securities	130	130	—	—

Fair value measurements for certain assets and liabilities measured at fair value on a nonrecurring basis:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
December 31, 2011:	(In thousands)			
Other real estate owned	$645	$ —	$ 645	$ —
Loans held for sale	307	—	307	—
Impaired loans	8,635	—	8,635	—
June 30, 2011:				
Other real estate owned	$139	$ —	$ 139	$ —
Loans held for sale	196	—	196	—
Impaired loans	3,823	—	3,823	—

The adjustments to other real estate owned and impaired loans are based primarily on appraisals of the real estate, cash flow analysis or other observable market prices. The Bank’s policy is that fair values for these assets are based on current appraisals or cash flow analysis.

9. INVESTMENT SECURITIES

Investment securities available for sale at December 31, 2011 consist of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
	(In thousands)			
Mortgage-backed securities	$100,132	$ 272	$ 636	$99,768

Municipal bonds	$564	$ —	$ —	$ 564

10

The mortgage-backed securities, callable bonds and municipal bonds available for sale have the following maturities at December 31, 2011:

	Amortized cost	Estimated market value
	(In thousands)	
Due or callable in one year or less	$6,514	$6,528
Due or callable in 1 - 5 years	75,796	75,655
Due or callable in 5 - 10 years	29,539	29,712
Due or callable in greater than 10 years	13,059	13,801
Total debt securities	$124,908	$125,696

All other securities available for sale at December 31, 2011 are saleable within one year. The Bank held $543,000 and $564,000 in investment securities that are being held to maturity at December 31, 2011 and June 30, 2011, respectively. The investment securities held to maturity have annual returns of principal and will be fully matured between 2014 and 2019.

The expected returns of principal of investments held to maturity are as follows as of December 31, 2011 (dollars in thousands):

January 1, 2012 through June 30, 2012	$47
2013	71
2014	74
2015	77
2016	81
2017 and thereafter	193
	$543

Gross proceeds on the sale of investment and mortgage-backed securities were $26.0 million and $-0- for the three month periods ended December 31, 2011 and 2010, respectively. Gross proceeds on the sale of investment and mortgage-backed securities were $51.6 million and $4.0 million for the six month periods ended December 31, 2011 and 2010, respectively. Gross realized gains for the three month periods ended December 31, 2011 and 2010 were $327,000 and $-0-, respectively. Gross realized gains for the six month periods ended December 31, 2011 and 2010 were $563,000 and $44,000, respectively. There were no gross realized losses for the three and six month periods ended December 31, 2011 and 2010.

The table below indicates the length of time individual investment securities and mortgage-backed securities have been in a continuous loss position at December 31, 2011:

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(In thousands)					
Mortgage-backed securities	74,093	636	—	—	74,093	636
Municipal bonds	1,636	6	—	—	1,636	6
Other equity securities	—	—	130	80	130	80
	$75,729	642	$ 130	80	$75,859	722
Number of investments	20		1		21	

Securities available for sale are reviewed for possible other-than-temporary impairment on a quarterly basis. During this review, management considers the severity and duration of the unrealized losses as well as its intent and ability to hold the securities until recovery, taking into account balance sheet management strategies and its market view and outlook. Management also assesses the nature of the unrealized losses taking into consideration factors such as changes in risk-free interest rates, general credit spread widening, market supply and demand, creditworthiness of the issuer or any credit enhancement providers, and the quality of the underlying collateral. Management does not intend to sell these securities in the foreseeable future, and does not believe that it is more likely than not that the Bank will be required to sell a security in an unrealized loss position prior to a recovery in its value. The decline in market value is due to changes in market interest rates. The fair values are expected to recover as the securities approach maturity dates.

10. GOODWILL AND INTANGIBLE ASSET

In June 2010, the Company acquired three branches from Integra Bank National Association ("Integra"), which was accounted for under the purchase method of accounting. Under the purchase method, the Company is required to allocate the cost of an acquired company to the assets acquired, including identified intangible assets, and liabilities assumed based on their estimated fair values at the date of acquisition. The excess cost over the value of net assets acquired represents goodwill, which is not subject to amortization.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Goodwill recorded by the Company in connection with its acquisition relates to the inherent value in the business acquired and this value is dependent upon the Company's ability to provide quality, cost-effective services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

Goodwill is not amortized but is tested for impairment when indicators of impairment exist, or at least annually. Potential goodwill impairment exists when the fair value of the reporting unit (as defined by U.S. GAAP) is less than its carrying value. An impairment loss is recognized in earnings only when the carrying amount of goodwill is less than its implied fair value.

The following table indicates changes to the core deposit intangible asset and goodwill balances for the six month period ended December 31, 2011:

	Core Deposit Intangible	**Goodwill**
	(dollars in thousands)	
Balance at June 30, 2011	$1,028	$ 2,522
Amortization	(79)	—
Balance at December 31, 2011	$949	$ 2,522

The core deposit intangible is being amortized using the double declining balance method over its estimated useful life of 8.75 years. Remaining amortization of the core deposit intangible is as follows (dollars in thousands) as of

December 31, 2011:

January 1, 2012 through June 30, 2012	$80
2013	179
2014	142
2015	118
2016	118
2017 and thereafter	312
	$949

The Bank did not have any investments in subprime loans at December 31, 2011.

17

12. TROUBLED DEBT RESTRUCTURINGS - From time to time, as part of our loss mitigation process, loans may be renegotiated in a troubled debt restructuring (“TDR”) when we determine that greater economic value will ultimately be recovered under the new restructured terms than through foreclosure, liquidation, or bankruptcy. We may consider the borrower’s payment status and history, the borrower’s ability to pay upon a rate reset on an adjustable rate mortgage, size of the payment increase upon a rate reset, period of time remaining prior to the rate reset, and other relevant factors in determining whether a borrower is experiencing financial difficulty. TDRs are accounted for as set forth in ASC 310-40 *Troubled Debt Restructurings by Creditors* (“ASC 310-40”). A TDR may be on non-accrual or it may accrue interest. A TDR is typically on non-accrual until the borrower successfully performs under the new terms for six consecutive months. However, a TDR may be placed on accrual immediately following the TDR in those instances where a borrower’s payments are current prior to the modification, the loan is restructured at a market rate and management determines that principal and interest under the new terms are fully collectible. All TDRs are considered to be impaired loans.

Existing performing loan customers who request a loan (non-TDR) modification and who meet the Bank’s underwriting standards may, usually for a fee, modify their original loan terms to terms currently offered. The modified terms of these loans are similar to the terms offered to new customers with similar credit risk. The fee assessed for modifying the loan is deferred and amortized over the life of the modified loan using the level-yield method and is reflected as an adjustment to interest income. Each modification is examined on a loan-by-loan basis and if the modification of terms represents more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs associated with the mortgage loan are recognized in interest income at the time of the modification. If the modification of terms does not represent more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs continue to be deferred.

During the quarter ended March 31, 2011, we began restructuring loans into a split note or Note A/Note B format. Upon performing a global analysis of the relationship with the borrower, the terms of Note A are calculated using current financial information to determine the amount of payment at which the borrower would have a debt service coverage ratio of 1.5x or better. The resulting payment was calculated based upon a 30 year amortization period, then fixed for two years, with the loan maturing at the end of the two years. The amount for Note B is the difference of Note A and the original amount to be refinanced, plus all other expenses necessary to restructure the loans. It is given the same interest rate and balloon term as Note A, but no principal or interest payments are due until maturity. While no amount of the original indebtedness of the borrower is forgiven through this process, the full amount of Note B is charged-off. Note A is treated as any other troubled debt restructuring and, generally, may return to accrual status after a history of performance in accordance with the restructured terms of at least six consecutive months is established.

The following tables summarize TDRs by loan type and accrual status.

	At December 31, 2011						
	Loan Status						
(In thousands)	Accrual	Nonaccrual	Total unpaid principal balance	Related allowance	Recorded investment	Number of loans	Average recorded investment

Consumer	—	—
Total	$ 189	$ 384

At December 31, 2011, the Bank had 48 loans totaling $25.2 million that qualified as TDRs, and has reserved for losses on these loans of $841,000. At December 31, 2011, TDRs with no related allowance totaled $18.3 million and TDRs with a related allowance totaled $6.9 million. At December 31, 2011, the Bank had no other commitments to lend on its TDRs. At June 30, 2011, the Bank had 52 loans totaling $24.9 million that qualified as TDRs, and has reserved for losses on these loans of $877,000. At June 30, 2011, TDRs with no related allowance totaled $22.0 million and TDRs with a related allowance totaled $2.9 million. Management continues to monitor the performance of loans classified as TDRs.

Loans that were included in troubled debt restructuring at December 31, 2011 and June 30, 2011 were generally given concessions of interest rate reductions of between 25 and 300 basis points, and/or structured as interest only payment loans for periods of one to three years. Many of these loans also have balloon payments due at the end of their lowered rate period, requiring the borrower to refinance at market rates at that time. At December 31, 2011, there were 38 loans with required principal and interest payments, 10 loans with required interest only payments. At June 30, 2011, there were 43 loans with required principal and interest payments, 9 loans with required interest only payments.

The following table is a roll forward of activity in our TDRs:

	Three Months Ended December 31, 2011		Six Months Ended December 31, 2011	
	Recorded Investment	Number of Loans	Recorded Investment	Number of Loans
(Dollar amounts in thousands)				
Beginning balance	$22,689	44	$24,048	52
Additions to TDR	2,174	4	2,893	5
Charge-offs	—	—	—	—
Removal of TDRs(1)	—	—	(1,698)	(9)
Payments	(501)	—	(881)	—
Ending balance	$24,362	48	$24,362	48

(1) TDRs that are performing, at a market interest rate and not impaired under restructured terms are removed under ASC 310-40-50-2

The following table provides a summary of the loans that were restructured as TDRs during the three months ended December 31, 2011:

	Number of Modifications	Recorded investment prior to	Recorded investment after	Allocation of allowance for loan loss Prior to restructuring	After restructuring

		restructuring	restructuring		
(Dollar amount in thousands)					
Mortgage One- to Four- Family - Owner-Occupied	2	$ 443	$ 431	$ —	$ —
Non-Residential Real Estate	1	722	615	93	—
Multifamily Residential Real Estate Mortgage	1	1,543	1,128	—	—
Totals	4	$ 2,708	$ 2,174	$ 93	$ —

The following table provides a summary of the loans that were restructured as TDRs during the six months ended December 31, 2011:

				Allocation of allowance for loan loss	
	Number of Modifications	Recorded investment prior to restructuring	Recorded investment after restructuring	Prior to restructuring	After restructuring
(Dollar amount in thousands)					
Mortgage One- to Four- Family - Owner-Occupied	3	$ 1,280	$ 1,150	$ —	$ —
Non-Residential Real Estate	1	722	615	93	—
Multifamily Residential Real Estate Mortgage	1	1,543	1,128	—	—
Totals	5	$ 3,545	$ 2,893	$ 93	$ —

The Mortgage One-to Four-Family-Owner-Occupied loan restructurings consisted of an interest rate reduction to a below market interest rate. The Non-Residential Real Estate loan restructuring consisted of a rate reduction to a below market interest rate. The Multifamily Residential Real Estate Mortgage loan was restructured into a Note A/B with a market rate of interest on Note A and a below market rate of interest on Note B.

The Company considers TDRs that become 90 days or more past due under the modified terms as subsequently defaulted. During the period ended December 31, 2011 the Company had one one-to-four family loan subsequently default after modification. The recorded investment in the loan at the time of default was approximately $81,000. The Company does not anticipate any further loss on the property and default of this loan had no impact on the allowance for loan loss for the period.

13. EFFECT OF RECENT ACCOUNTING PRONOUNCEMENTS

In September 2011, the FASB issued Accounting Standards Update (ASU) 2011-08, *Testing Goodwill for Impairment*, to simplify how entities test goodwill for impairment. This guidance permits an entity to assess qualitative factors to determine whether it is more likely than not (defined as more than fifty percent) that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the current two-step goodwill impairment test. The two-step goodwill impairment test is only required if the entity determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. The adoption of this guidance is not expected to have a material effect on the Company's financial statements.

In June 2011, the FASB issued ASU 2011-05, *Presentation of Comprehensive Income*, which requires an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. This ASU eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amendments in this ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. The ASU is effective for annual and interim periods beginning after December 15, 2011. The adoption of this ASU will not impact the way the Company currently reports comprehensive income, and will not have a material impact on the Company's financial statements.

In May 2011, the FASB issued ASU 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*, which generally represents clarifications of Topic 820, *Fair Value Measurements*, but also includes certain instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This ASU is intended to result in common principles and requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. GAAP and International Financial Reporting Standards (IFRS). ASU 2011-04 is effective prospectively for interim and annual periods beginning after December 15, 2011 with earlier application not permitted. This ASU is not expected to have a material impact on the Company's financial statements.

In April 2011, the FASB issued ASU 2011-02, *Receivables (Topic 310) – A Creditor's Determination of Whether a Restructuring is a Troubled Debt Restructuring*, which clarifies which loan modifications constitute troubled debt restructurings. In evaluating whether a restructuring constitutes a troubled debt restructuring, a creditor must separately conclude under the guidance in ASU 2011-02 that the restructuring constitutes a concession and that the debtor is experiencing financial difficulties. The amendments also clarify that a creditor is precluded from using the effective interest rate test in the debtor's guidance on restructuring of payables when evaluating whether a restructuring constitutes a troubled debt restructuring. ASU 2011-02 is effective for the first interim or annual period beginning on or after June 15, 2011. The adoption of this ASU did not have a material impact on the Company's financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosure about Fair Value Measurements, under Topic 820, Fair value Measurements and Disclosures*, to improve and provide new disclosures for recurring and nonrecurring fair value measurements under the three-level hierarchy of inputs for transfers in and out of Levels 1 and 2, and activity in Level 3. This update also clarifies existing disclosures of the level of disaggregation for the classes of assets and liabilities and the disclosure about inputs and valuation techniques. ASU No. 2010-06 became effective during the year ended June 30, 2010, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements, which became effective for the interim period ending September 30, 2011. The adoption of this remaining guidance did not have an impact on the Company’s financial statements.

In December 2011, the FASB issued ASU 2011-12, *Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. In order to defer only those changes in Update 2011-05 that relate to the presentation of reclassification adjustments, the paragraphs in this Update supersede certain pending paragraphs in Update 2011-05. Entities should continue to report reclassifications out of accumulated other comprehensive income consistent with the presentation requirements in effect before Update 2011-05. All other requirements in Update 2011-05 are not affected by this Update, including the requirement to report comprehensive income either in a single continuous financial statement or in two separate but consecutive financial statements. Public entities should apply these requirements for fiscal years, and interim periods within those years, beginning after December 15, 2011. This ASU is not expected to have a significant impact on the Company's financial statements.

Item 2.

Management Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words “believe,” “expect,” “intend,” “anticipate,” “estimate,” “project” or similar expressions. The Company’s ability to predic results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, general economic conditions, changes in the interest rate environment, legislative or regulatory changes that may adversely affect our business, changes in accounting policies and practices, changes in competition and demand for financial services, adverse changes in the securities markets, changes in deposit flows, and changes in the quality or composition of the Company’s loan or investment portfolios. Additionally, other risks and uncertainties may be described in the Company’s Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 28, 2011, which is available through the SEC’s website at www.sec.gov. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake the responsibility, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the following to be our critical accounting policies: the allowance for loan losses and the valuation of deferred income taxes.

ALLOWANCE FOR LOAN LOSSES - The allowance for loan losses is the amount estimated by management as necessary to cover probable credit losses in the loan portfolio at the statement of financial condition date. The allowance is established through the provision for loan losses, which is charged to income. Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Among the material estimates required to establish the allowance are: loss exposure at default; the amount and timing of future cash flows on impacted loans; and value of collateral. Inherent loss factors are then applied to the remaining loan portfolio. All of these estimates are susceptible to significant change. Management reviews the level of the allowance on a quarterly basis and establishes the provision for loan losses based upon an evaluation of the portfolio, past loss experience, current economic conditions and other factors related to the collectibility of the loan portfolio. Although we believe that we use the best information available to establish the allowance for loan losses, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluation. In addition, the Office of the Comptroller of the Currency (“OCC”), as an integral part of its examination process, periodically reviews our allowance for loan losses. Such agency may require us to recognize adjustments to the allowance based on its judgments about information available to it at the time of its examination. A large loss could deplete the allowance and require increased provisions to replenish the allowance, which would negatively affect earnings. For additional discussion, see notes 1 and 5 of the Notes to the Consolidated Financial Statements included in Item 8 of the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 28, 2011.

DEFERRED INCOME TAXES - We use the asset and liability method of accounting for income taxes as prescribed in Accounting Standards Codification (ASC) 740-10-50. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on a continual basis as regulatory and business factors change. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. A valuation allowance would result in additional income tax expense in the period, which would negatively affect earnings. The Company adopted the provisions of ASC 275-10-50-8 to account for uncertainty in income taxes effective July 1, 2007. Implementation resulted in no cumulative effect adjustment to retained earnings as of the date of adoption. The Company had no unrecognized tax benefits as of December 31, 2011 and June 30, 2011. The Company recognized no interest and penalties on the underpayment of income taxes during the three and six month periods ended December 31, 2011 and 2010, and had no accrued interest and penalties on the balance sheet as of December 31, 2011 and June 30, 2011. The Company has no tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase with the next twelve months. The Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for tax years before the fiscal year ended June 30, 2006.

Comparison of Financial Condition at December 31, 2011 and June 30, 2011

Total assets were $466.8 million at December 31, 2011, compared to $472.7 million at June 30, 2011. Total assets decreased $5.9 million, or 1.2%, as a result of a $14.5 decrease in cash partially offset by increases in investment securities of $2.5 million, Federal Home Loan Bank (“FHLB”) stock of $4.1 million and bank owned life insurance (“BOLI”) of $2.3 million. The increase in investment securities was primarily due to purchases of mortgage-backed securities offset by sales of other available for sale securities. The increase in FHLB stock was attributable to the Bank’s desire to increase its borrowing capacity with the FHLB, which in turn required the increased investment. BOLI was increased to offset and recover existing benefit expenses. The decrease in cash is the result of funding the increases in these other assets in addition to a $5.6 million decrease in deposits.

Total liabilities were $412.0 million at December 31, 2011, compared to $418.4 million at June 30, 2011. The decrease was primarily the result of a $9.4 million decrease in municipal deposits partially offset by a $3.8 million increase in deposits other than municipal deposits. The decrease in municipal deposits results from the Bank’s decision to reduce its reliance on municipal deposits and other higher cost deposits, as well as the normal cyclical cash flow needs of the municipalities.

Total stockholders’ equity was $54.8 million at December 31, 2011, compared to $54.3 million at June 30, 2011. The increase was primarily the result of net income of $1.0 million, partially offset by dividends paid of $664,000. At December 31, 2011, the Bank was considered “well-capitalized” under applicable regulatory requirements.

Comparison of Operating Results for the Three and Six Months Ended December 31, 2011 and 2010

General. Net income decreased $48,000 in the quarter ended December 31, 2011, compared to the prior year quarter. Net income for the six months ended December 31, 2011 was $1.0 million compared to $850,000 for the six months ended December 31, 2010.

Net Interest Income. The following table summarizes changes in interest income and interest expense for the three and six months ended December 31, 2011 and 2010.

	Three Months Ended December 31,		**Six Months Ended December 31,**	
	2011	2010	2011	2010

			% Change			% Change
	(Dollars in thousands)					
Interest income:						
Loans	$3,999	$4,354	(8.2)%	$7,897	$8, 681	(9.0)%
Investment and mortgage backed securities	698	672	3.9	1,484	1, 370	8.3
Other interest-earning assets	3	7	(57.1)	6	12	(50.0)
Total interest income	4,700	5,033	(6.6)	9,387	10,063	(6.7)
Interest expense:						
NOW and money market deposit accounts	130	199	(34.7)	305	483	(36.9)
Passbook accounts	61	71	(14.1)	129	135	(4.4)
Certificates of deposit	854	1,143	(25.3)	1,749	2,408	(27.4)
Total interest-bearing deposits	1,045	1,413	(26.0)	2,183	3,026	(27.9)
FHLB advances	12	20	(40.0)	26	42	(38.1)
Total interest expense	1,057	1,433	(26.2)	2,209	3,068	(28.0)
Net interest income	$3,643	$3,600	1.2	$7,178	$6,995	2.6

Net interest income remained flat at $3.6 million for the quarter ended December 31, 2011 as compared to the quarter ended December 31, 2010. A decrease of $333,000 in interest income was offset by a $376,000 decrease in interest expense. The decrease in interest income was primarily the result of a $17.6 million decrease in average outstanding loans combined with a decrease in the average rate earned on loans from 5.74% to 5.60%. The decrease in interest expense was primarily the result of a $27.2 million decrease in average deposits combined with a decrease in the average interest rate paid on deposits from 1.28% to 1.01%. Changes in interest rates are reflective of decreases in overall market rates. Average deposits decreased primarily due to decreases in municipal deposits.

Net interest income increased $183,000, or 2.62%, to $7.2 million for the six months ended December 31, 2011 as compared to $7.0 million for the six months ended December 31, 2010. A decrease of $859,000 in interest expense was partially offset by a $676,000 decrease in interest income. The decrease in interest expense was primarily the result of a $23.0 million decrease in average deposits combined with a decrease in the average interest rate paid on deposits from 1.39% to 1.06%. The decrease in interest income was primarily the result of a $20.0 million decrease in average outstanding loans combined with a decrease in the average rate earned on loans from 5.69% to 5.53%. Changes in interest rates are reflective of decreases in overall market rates.

The following table summarizes average balances and average yields and costs of interest-earning assets and interest-bearing liabilities for the three and six months ended December 31, 2011 and 2010. For the purposes of this table, average balances have been calculated using month-end balances, and nonaccrual loans are included in average balances only. Yields are not presented on a tax equivalent basis.

26

Provision for Loan Losses. The provision for loan losses was $977,000 for the quarter ended December 31, 2011, compared to $737,000 for the same quarter in the prior year. The provision for loan losses was $1.9 million for the six months ended December 31, 2011, compared to $1.5 million for the same period in the prior year. Management evaluates the Bank's allowance for loan loss for adequacy on at least a quarterly basis. As part of this evaluation, management considers the amounts and types of loans, concentrations, the value of underlying collateral, current economic conditions, historical charge-offs, and other relevant information, such as the size of the overall portfolio and the financial condition of the borrowers. The increase in the provision for loan losses primarily relates to impairment charges in the multi-family real estate loans.

For more information on how the Company reviews its allowance for loan losses and determines any necessary provision see, *"Critical Accounting Policies – Allowance for Loan Losses."*

The following table provides information with respect to our nonperforming assets at the dates indicated. We did not have any accruing loans past due 90 days or more at the dates presented.

	At December 31, 2011	At June 30, 2011	% Change
	(Dollars in thousands)		
Nonaccrual loans:			
One- to-four-family residential real estate	$1,619	$1,652	(2.0)%
Multi-family	1,735	1,742	(0.4)
Nonresidential real estate and land	996	566	76.0
Construction	—	—	—
Commercial	359	240	50.0
Consumer	363	240	51.3
Total nonaccrual loans	5,072	4,440	14.2
Nonaccrual restructured loans:			
One- to-four-family residential real estate	$2,624	$1,653	58.7 %
Multi-family	7,192	10,358	(30.6)
Nonresidential real estate and land	615	4,146	(85.2)
Construction	—	—	—
Commercial	—	—	—
Consumer	—	—	—
Total nonaccrual restructured loans	10,431	16,157	(35.4)
Total nonperforming loans	15,503	20,597	(24.7)
Real estate owned	645	139	364.0
Total nonperforming assets	$16,148	$20,736	(22.1)
Accruing restructured loans	14,772	8,768	68.5
Accruing restructured loans and nonperforming assets	$30,920	$29,504	4.8
Total nonperforming loans to total loans	5.33 %	7.08 %	(24.7)
Total nonperforming loans to total assets	3.32 %	4.36 %	(23.9)
Total nonperforming assets to total assets	3.46 %	4.39 %	(21.2)

Nonperforming loans increased $0.3 million, from $15.2 million at September 30, 2011 to $15.5 million at December 31, 2011, compared to an increase in nonperforming loans from $18.7 million at September 30, 2010 to $23.5 million at December 31, 2010. Nonperforming loans decreased $5.1 million, from $20.6 million at June 30, 2011 to $15.5 million at December 31, 2011, compared to an increase in nonperforming loans from $10.6 million at June 30, 2010 to $23.5 million at December 31, 2010. The decrease in nonperforming loans in the current year six month period was primarily the result of troubled debt restructurings that were placed on accrual (performing) status after performing in accordance with their restructured terms for at least six consecutive months, partially offset by additional nonperforming loans in the current year six month period.

As previously disclosed, the Company restructured $13.7 million of loans during the third quarter of the fiscal year ended June 30, 2011. The loans restructured during the third quarter of the fiscal year ended June 30, 2011 included five of our largest loans. All of these loans were restructured using a split note strategy whereby the Bank's remaining recorded investment in the borrowing reflected the "as is" value of the collateral, based on current cash flow. At December 31, 2011, all of the restructured loans have been performing in accordance with their restructured terms.

Under the split note or Note A/Note B strategy, the Note A was underwritten based on the Company's normal underwriting standards with the exception that a debt service coverage ratio of 1.5x or higher was required. This is more stringent than the Company's normal underwriting guidelines which generally require a debt service coverage of 1.2x or better. The Note A payment was based on a thirty year amortization schedule and matures at the end of two years. The amount of Note B under the split note strategy is the difference between the amount of Note A and the principal amount to be refinanced. The interest rate and two year maturity of the Note B loan are identical to the Note A loan, but the Note B loan requires no payments of interest or principal until maturity. While no amount of the original indebtedness was forgiven through this process, the full amount of the borrowers' Note B indebtedness was charged-off in March, 2011.

A discussion of the most significant troubled debt restructurings, all of which were on nonaccrual status at the beginning of the quarter ended September 30, 2011, follows. The status of each of these troubled debt restructurings at December 31, 2011 is noted below. Management monitors the performance of these loans and reviews all options available to keep the loans current, including further restructuring of the loans. If restructuring efforts ultimately are not successful, management will initiate foreclosure proceedings. A more detailed discussion of these loan relationships is included in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations under the section entitled "*Analysis of Nonperforming and Classified Assets"* in the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 28, 2011.

- Loan Relationship A. This relationship consists of three loans with a total carrying value of $6.4 million prior to its restructuring. One loan is secured by a first mortgage on an apartment complex near a college campus, another is secured by a first mortgage on two mobile home parks, and the last is secured by the first mortgage on another apartment complex. All three loans are included in the above table as "Accruing restructured loans" at December 31, 2011 and "Nonaccrual restructured loans" at June 30, 2011. In the "Credit Risk Profile by Internally Assigned Grade" table, these loans were classified as "Multi-family residential real estate", "Substandard" at December 31, 2011 and June 30, 2011. The total loan balance at December 31, 2011 for this relationship was $5.2 million. This relationship was performing in accordance with its restructured terms at December 31, 2011 and, because it performed in accordance with its restructured terms for at least six consecutive months, was reported as accrual status.

- Loan Relationship B. The loans comprising Loan Relationship B, totaling $2.6 million, are secured by a first mortgage on two separate retail strip shopping centers and a single purpose commercial use property. All the loans are included in the above table as "Accruing restructured loans" at December 31, 2011 and "Nonaccrual restructured loans," "Nonresidential real estate" at June 30, 2011. In the "Credit Risk Profile by Internally Assigned Grade" table, these loans were classified as "Nonresidential real estate, Substandard" at December 31, 2011 and June 30, 2011. This relationship was performing in accordance with its restructured terms at December 31, 2011 and because the loan has performed in accordance with its restructured terms for at least six consecutive months, the loan has been reported as accrual status.

- Loan Relationship C. This loan relationship is secured by a first mortgage on a single-family home, a 24-unit apartment complex, one- to four-family residential properties and several residential building lots. The relationship is included in the above table as "Accrual restructured loans, multi-family real estate" at December 31, 2011 and "Nonaccrual restructured loans, multi-family real estate" at June 30, 2011. In the "Credit Risk Profile by Internally

Assigned Grade" table, these loans were classified as "Multi-family real estate, Substandard" at December 31, 2011 and June 30, 2011. The loan balance at December 31, 2011 for this relationship was $1.5 million. This relationship was performing in accordance with its restructured terms at December 31, 2011 and, because the loan has performed in accordance with its restructured terms for at least six consecutive months the loan has been reported as accrual status.

- Loan Relationship D. The loan comprising Loan Relationship D is secured by a first mortgage on a 62-unit apartment complex near a college campus. The loan was made in 2008 to an experienced property manager who made major improvements to the property. The loan required interest only payments through December 2011. The borrower has completed renovations to the property and the cash flow of the property has improved, supporting the carrying value of the loan. At December 31, 2011, the carrying value of this loan was $1.3 million. In December 2011, this loan was restructured into a split Note A/Note B. The $1.3 million carrying value was restructured at a market rate of interest on a 30 year amortizing note with a two year balloon. Note B in the amount of $.4 million was restructured at a below market rate of interest with no payments for two years and a balloon payment due after 2 years. Note B was fully reserved prior to the restructuring and was charged off in December 2011. This charge off had no impact to the allowance for loan loss at December 31, 2011. The loan was on nonaccrual status at both December 31, 2011 and June 30, 2011.

- Loan Relationship E. This relationship has an aggregate carrying value of $550,000 at December 31, 2011, and was secured by nonresidential real estate. These loans are included in the above table as “Accruing restructured loans” at December 31, 2011 and “Nonaccrual restructured loans, nonresidential real estate” at June 30, 2011. In the “Credit Risk Profile by Internally Assigned Grade” table, these loans were classified as “Nonresidential real estate, Substandard” at December 31, 2011 and June 30, 2011. This relationship was performing in accordance with its restructured terms at December 31, 2011 and because the loan has performed in accordance with its restructured terms for at least six consecutive months, the loans are reported as accrual status.

- Loan Relationship F. This loan relationship had an aggregate carrying value of $465,000 at December 31, 2011. These loans are secured by single-family and multifamily residential real estate. These loans are included in the above table as “Accruing restructured loans” at December 31, 2011 and “Nonaccrual restructured loans, multi-family real estate” at June 30, 2011. In the “Credit Risk Profile by Internally Assigned Grade” table, these loans were classified as “Multi-family real estate, Substandard” at December 31, 2011 and June 30, 2011. This loan relationship was performing in accordance with its restructured terms for at least six consecutive months at December 31, 2011 and, as a result, the loans are reported as accrual status.

Other Income. The following table summarizes other income for the three and six months ended December 31, 2011 and 2010.

	Three Months Ended December 31,			**Six Months Ended December 31,**		
	2011	2010	% Change	2011	2010	**% Change**
	(Dollars in thousands)					
Service charges	$621	$606	2.5 %	$1,260	$1,207	4.4 %
Gain on sale of loans	130	215	(39.5)	213	442	(51.8)
Gain on sale of investments	327	—	100.0	563	44	1179.5
Loss on sale of other real estate owned	2	(27)	(107.4)	2	(25)	(108.0)
Income from Bank Owned Life Insurance	64	70	(8.6)	131	139	(5.8)
Other	61	109	(44.0)	162	161	0.6
Total	$1,205	$973	23.8	$2,331	$1, 968	18.4

Other income increased $232,000, or 23.8%, from $973,000 in the prior year quarter to $1.2 million in the current year quarter. The increase was primarily due to a $327,000 increase in gain on sale of investments offset by a $85,000 decrease in gain on the sale of loans. The increase in gain on sale of investments was the result of the sale of 19 securities totaling $26.0 million in the current year quarter, with no sales in the prior year quarter. The Company has implemented a strategy where it will sell a portion of its securities to recognize gains and reinvest the proceeds in securities with similar interest rates and terms without significantly affecting the interest rate risk to the Company. The decrease in the gain on sale of loans was the result of fewer loan sales to Freddie Mac in the current year quarter compared to the same quarter in the prior year. The decrease in loan sales was the result of interest rates remaining relatively unchanged over the last year, leading to a decrease in refinancing activity.

Other income increased $363,000, or 18.4%, from $2.0 million in the six month prior year period to $2.3 million in the six month current year period. The increase was primarily due to a $519,000 increase in gain on sale of investments offset by a $229,000 decrease in gain on the sale of loans. The increase in gain on sale of investments was the result of the sale of 30 securities totaling $51.6 million in the current year period, compared to the sale of only two securities totaling $4.0 million in the prior year period. The decrease in the gain on sale of loans was the result of fewer loan sales to Freddie Mac in the current year period when compared to the same period in the prior year.

Other Expense. The following table summarizes other expense for the three and six months ended December 31, 2011 and 2010.

	Three Months Ended December 31,				**Six Months Ended December 31,**			
	2011	2010	% Change		2011	2010	% Change	
	(Dollars in thousands)							
Compensation and employee benefits	$1,695	$1,687	0.5	%	$3,431	$3,358	2.2	%
Premises and occupancy expense	310	336	(7.7	)	638	645	(1.1	)
Deposit insurance premium	77	180	(57.2	)	214	408	(47.5	)
Advertising expense	114	117	(2.6	)	207	218	(5.0	)
Data processing expense	311	281	10.7		616	563	9.4	
Acquisition expense	—	—	—		—	38	(100.0	)
Other	634	603	5.1		1,184	1, 225	(3.3	)
Total	$3,141	$3,204	(2.0	)	$6,290	$6,455	(2.6	)

Other expense decreased $63,000, or 2.0%, to $3.1 million for the quarter ended December 31, 2011, from $3.2 million in the prior year quarter. The decrease was primarily the result of a $103,000 decrease in deposit insurance premiums as a result of the aforementioned decrease in average deposits in the current year quarter from the prior year quarter.

Other expense decreased $165,000, or 2.6%, to $6.3 million for the six months ended December 31, 2011, from $6.5 million in the prior year period. The decrease was primarily the result of a $194,000 decrease in deposit insurance premiums as a result of the aforementioned decrease in average deposits.

Income Taxes. The provision for income taxes was $199,000 for the quarter ended December 31, 2011 compared to $53,000 for the same period in 2010. The provision for income taxes was $337,000 for the six months ended December 31, 2011 compared to $202,000 for the same period in 2010. The increase in expense for the three and six month periods is primarily due to an increase in income before income taxes as well as a receipt of a prior period state tax refund during the 2010 period.

Liquidity Management. Liquidity is the ability to meet current and future financial obligations of a short-term nature. Our primary sources of funds consist of deposit inflows, loan repayments, maturities and sales of securities and borrowings from the Federal Home Loan Bank of Indianapolis. While maturities and scheduled amortization of loans and securities are predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition.

We regularly adjust our investments in liquid assets based upon our assessment of: (1) expected loan demands; (2) expected deposit flows, in particular municipal deposit flows; (3) yields available on interest-earning deposits and securities; and (4) the objectives of our asset/liability management policy.

Our most liquid assets are cash and cash equivalents. The levels of these assets depend on our operating, financing, lending and investing activities during any given period. Cash and cash equivalents totaled $16.6 million at December 31, 2011 and $31.2 million at June 30, 2011. Securities classified as available-for-sale whose market value exceeds our cost, which provide additional sources of liquidity, totaled $50.0 million at December 31, 2011. Total securities classified as available-for-sale were $125.8 million at December 31, 2011. In addition, at December 31, 2011, we had the ability to borrow a total of approximately $93.2 million from the Federal Home Loan Bank of Indianapolis.

At December 31, 2011, we had $27.7 million in loan commitments outstanding, consisting of $1.7 million in mortgage loan commitments, $21,000 in commercial loan commitments, $21.0 million in unused home equity lines of credit, $4.6 million in commercial lines of credit, and $369,000 in letters of credit outstanding. Certificates of deposit due within one year of December 31, 2011 totaled $109.2 million. This represented 55.7% of certificates of deposit at

December 31, 2011. We believe that the large percentage of certificates of deposit that mature within one year reflects customers' hesitancy to invest their funds for longer periods in the current low interest rate environment. If these maturing deposits do not remain with us, we will be required to seek other sources of funding, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2011. However, based on past experience, we believe that a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are the origination and purchase of loans and the purchase of securities. Our primary financing activities consist of activity in deposit accounts and Federal Home Loan Bank advances. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors and other factors. We generally manage the pricing of our deposits to be competitive and to increase core deposit relationships. Occasionally, we offer promotional rates on certain deposit products to attract deposits.

Capital Management. United Community Bank is subject to various regulatory capital requirements administered by the OCC, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At December 30, 2011, we exceeded all of our regulatory capital requirements. We are considered "well capitalized" under regulatory guidelines. See *"Regulation and Supervision—Regulation of Federal Savings Associations—Capital Requirements,"* and Note 17 to the Consolidated Financial Statements included in Item 8 to the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 28, 2011.

32

The following table summarizes the Bank's capital amounts and the ratios required at December 31, 2011:

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2011 (unaudited)	(in thousands)					
Tier 1 capital to risk-weighted assets	$47,037	16.95%	$11,102	4.0 %	$16,653	6.0 %
Total capital to risk-weighted assets	50,506	18.20%	22,204	8.0 %	27,755	10.0%
Tier 1 capital to adjusted total assets	47,037	10.12%	18,750	4.0 %	23,438	5.0 %
Tangible capital to adjusted total assets	47,037	10.12%	7,031	1.5 %		

Off-Balance Sheet Arrangements. In the normal course of operations, we engage in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments, letters of credit and lines of credit. We currently have no plans to engage in hedging activities in the future.

For the three and six months ended December 31, 2011, we engaged in no off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows.

Item 3.

Quantitative and Qualitative Disclosures about Market Risk.

For a discussion of the Company's asset and liability management policies as well as the potential impact of interest rate changes upon the market value of the Company's portfolio equity, see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on September 28, 2011. The main components of market risk for the Company are interest rate risk and liquidity risk. The Company manages interest rate risk and liquidity risk by establishing and monitoring the volume, maturities, pricing and mix of assets and funding sources with the objective of managing assets and funding sources to provide results that are consistent with liquidity, growth, risk limits and profitability goals. Model simulation is used to measure earnings volatility under both rising and falling rate scenarios.

We use a net portfolio value analysis prepared by the OCC to review our level of interest rate risk. This analysis measures interest rate risk by computing changes in net portfolio value of our cash flows from assets, liabilities and off-balance sheet items in the event of a range of assumed changes in market interest rates. Net portfolio value represents the market value of portfolio equity and is equal to the market value of assets minus the market value of liabilities, with adjustments made for off-balance sheet items. This analysis assesses the risk of loss in market risk-sensitive instruments in the event of a sudden and sustained 50 to 300 basis point increase or 50 and 100 basis point decrease in market interest rates with no effect given to any steps that we might take to counter the effect of that interest rate movement. Because of the low level of market interest rates, this analysis is not performed for decreases of more than 200 basis points.

The following table presents the change in our net portfolio value at September 30, 2011 that would occur in the event of an immediate change in interest rates based on OCC assumptions, with no effect given to any steps that we might take to counteract that change.

	Net Portfolio Value (Dollars in thousands)			Net Portfolio Value as % of Portfolio Value of Assets	
Basic Point ("bp") Change in Rates	Amount	Change	% Change	NPV Ratio	Change (bp)
300	$57,800	$(2,177)	(4)%	12.00%	(24) bps
200	59,870	(108)	0	12.33	9
100	60,689	712	1	12.42	18
50	60,345	367	1	12.33	9
0	59,978	—	—	12.24	—

(50)	59,179	(799)	(1)	12.08	(16)
(100)	58,671	(1,306)	(2)	11.98	(26)

The OCC uses various assumptions in assessing interest rate risk. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates and the market values of certain assets under differing interest rate scenarios, among others. As with any method of measuring interest rate risk, certain shortcomings are inherent in the methods of analyses presented in the foregoing tables. For example, although certain assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable-rate mortgage loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, expected rates of prepayments on loans and early withdrawals from certificates could deviate significantly from those assumed in calculating the table. Prepayment rates can have a significant impact on interest income. Because of the large percentage of loans and mortgage-backed securities we hold, rising or falling interest rates have a significant impact on the prepayment speeds of our earning assets that in turn affect the rate sensitivity position. When interest rates rise, prepayments tend to slow. When interest rates fall, prepayments tend to rise. Our asset sensitivity would be reduced if prepayments slow and vice versa. While we believe these assumptions to be reasonable, there can be no assurance that assumed prepayment rates will approximate actual future mortgage-backed security and loan repayment activity.

Item 4.

Controls and Procedures.

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the "SEC") (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. During the quarterly period ended December 31, 2011, there were no changes in the Company's internal control over financial reporting which materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Periodically, there have been various claims and lawsuits against us, such as claims to enforce liens and contracts, condemnation proceedings on properties in which we hold security interests, claims involving the making and servicing of real property loans and other issues incident to our business. We are not party to any pending legal proceedings that we believe would have a material adverse effect on our financial condition, results of operations or cash flows.

Item 1A. RISK FACTORS

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended June 30, 2011, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially affect our business, financial condition and/or operating results.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

There were no repurchases of the Company’s common stock during the three and six month periods ended December 31, 2011.

Item 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable

Item 4. MINE SAFETY DISCLOSURES

Not applicable

Item 5. OTHER INFORMATION

Not applicable

Item 6. EXHIBITS

Exhibit 31.1	Certification of Chief Executive Officer
Exhibit 31.2	Certification of Chief Financial Officer
Exhibit 32	Section 1305 Certifications
Exhibit 101.0*	The following materials from the Company's Quarterly Report on Form 10-Q for the quarter ended December 31, 2011, formatted in XBRL (Extensible Business Reporting Language): (i) the Consolidated Statements of Financial Condition, (ii) the Consolidated Statements of Income, (iii) the Consolidated Statements of Comprehensive Income, (iv) the Consolidated Statements of Cash Flows and (v) the Notes to Unaudited Consolidated Financial Statements, tagged as blocks of text.
