PACIFIC FINANCIAL CORPORATION

Notes to Condensed Consolidated Financial Statements

As of and for the nine months ended September 30, 2014

(Unaudited)

(Dollars in thousands, except per share amounts)

NOTE 1 – ORGANIZATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization – Pacific Financial Corporation (the “Company” or “Pacific”) is a bank holding company headquartered in Aberdeen, Washington. The Company owns one banking subsidiary, Bank of the Pacific (the “Bank”), which is also located in Washington. The Company was incorporated in the State of Washington in February, 1997, pursuant to a holding company reorganization of the Bank.

The Company conducts its banking business through the Bank, which operates 17 branches located in communities in Grays Harbor, Pacific, Whatcom, Clark, Skagit and Wahkiakum counties in the state of Washington and three in Clatsop County, Oregon. In addition, the Bank operates two loan production offices in Burlington and Dupont, Washington and has a residential real estate mortgage department. During second quarter 2013, the Bank completed the acquisition of three branches from Sterling Savings Bank. Total deposits assumed were \$37.6 million and loans acquired totaled \$4.0 million. Of the three branches purchased, two were consolidated into existing Pacific branches to maximize branch efficiencies resulting in one new branch in Astoria, Oregon. Separately, the Company opened a full-service branch in Warrenton, Oregon in October 2013 that further expands operations on the northern Oregon coast.

The accompanying unaudited condensed consolidated financial statements have been prepared by the Company in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with instructions to Form 10-Q. Accordingly, these financial statements do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of Management, adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine months ended September 30, 2014, are not necessarily indicative of the results anticipated for the year ending December 31, 2014. Certain information and footnote disclosures included in the Company's consolidated financial statements for the year ended December 31, 2013, have been condensed or omitted from this report. Accordingly, these statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 (the “2013 Annual Report”).

Basis of presentation – The consolidated financial statements include the accounts of Pacific Financial Corporation and its wholly-owned subsidiary. All intercompany accounts and transactions have been eliminated in consolidation.

The interim consolidated financial statements are not audited, but include all adjustments that Management considers necessary for a fair presentation of consolidated financial condition and results of operations for the interim periods presented.

Method of accounting and use of estimates – The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America and prevailing practices within the banking industry. This requires Management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the reporting periods. Actual results could differ from those estimates. Significant estimates made by Management involve the calculation of the allowance for loan losses, impaired loans, the fair value of available-for-sale investment securities, deferred tax assets, and the value of other real estate owned and foreclosed assets.

The Company utilizes the accrual method of accounting, which recognizes income when earned and expenses when incurred.

In preparing these financial statements, the Company has evaluated events and transactions subsequent to September 30, 2014, for potential recognition or disclosure in the financial statements. In Management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation.

NOTE 2 – EARNINGS PER SHARE

The Company's basic earnings per common share is computed by dividing net income available to common shareholders (net income less dividends declared by the weighted average number of common shares outstanding during the period). The Company's diluted earnings per common share is computed similar to basic earnings per common share except that the numerator is equal to net income available to common shareholders and the denominator is increased to include the number of additional common shares that would have been outstanding if dilutive potential common shares had been issued. Included in the denominator are the dilutive effects of stock options computed under the treasury stock method and outstanding warrants as if converted to common stock.

The following table illustrates the computation of basic and diluted earnings per share.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Basic:				
Net income	\$1,374	\$909	\$3,805	\$2,942
Weighted average shares outstanding	10,281,745	10,121,853	10,218,103	10,121,853
Basic earnings per share	\$0.13	\$0.09	\$0.37	\$0.29
Diluted:				
Net income	\$1,374	\$909	\$3,805	\$2,942
Weighted average shares outstanding	10,281,745	10,121,853	10,218,103	10,121,853
Effect of dilutive stock options	97,421	72,973	91,333	58,075
Weighted average shares outstanding assuming dilution	10,379,166	10,194,826	10,309,436	10,179,928
Diluted earnings per share	\$0.13	\$0.09	\$0.37	\$0.29
	September 30,	September 30,		
	2014	2013		
Shares subject to outstanding options	367,595	433,995		
Shares subject to outstanding warrants	-	699,642		

As of September 30, 2014 and 2013, the shares subject to outstanding options and for September 30, 2013, the shares subject to outstanding warrants, had exercise prices in excess of the current market value. All of these shares are not included in the table above, as exercise of these options and warrants would not be dilutive to shareholders.

NOTE 3 – INVESTMENT SECURITIES

Investment securities consist principally of short and intermediate term debt instruments issued by the U.S. Treasury, other U.S. government agencies, state and local government units, other corporations, and mortgage backed securities (MBS).

	September 30, 2014			
At September 30, 2014	Amortized Cost	Gross unrealized gains	Gross unrealized losses	Fair value
Available-for-sale:

At September 30, 2014, there were 66 investment securities in an unrealized loss position, of which 46 were in a continuous loss position for 12 months or more. The unrealized losses on these securities were caused by changes in interest rates, widening pricing spreads and market illiquidity, leading to a decline in the fair value subsequent to their purchase. The Company has evaluated the securities shown above and anticipates full recovery of amortized cost with respect to these securities at maturity or sooner in the event of a more favorable market environment. Based on management's evaluation, and because the Company does not have the intent to sell these securities and it is not more likely than not that it will have to sell the securities before recovery of cost basis, the Company does not consider these investments to be other-than-temporarily impaired at September 30, 2014.

For non-agency mortgage-backed securities (MBS) the Company estimates expected future cash flows of the underlying collateral, together with any credit enhancements. The expected future cash flows of the underlying collateral are determined using the remaining contractual cash flows adjusted for future expected credit losses (which considers current delinquencies, future expected default rates and collateral value by vintage) and prepayments. The expected cash flows of the security are then discounted to arrive at a present value amount. For the nine months ended September 30, 2014, no non-agency MBS was determined to be other-than-temporarily-impaired. For the nine months ended September 30, 2013, one non-agency MBS was determined to be other-than-temporarily-impaired. This security was sold in second quarter 2014, incurring a loss of \$69,000. The Company recorded \$48,000 and \$38,000 in impairments related to credit losses through earnings for the nine months ended September 30, 2014 and 2013, respectively.

The following table presents the cash proceeds from the sales of securities and their associated gross realized gains and gross realized losses that are included in earnings for the nine months ended September 30, 2014 and 2013:

Investment securities gross gains and losses

(Dollars in Thousands)

	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2014	September 30, 2013	September 30, 2014	September 30, 2013
Gross realized gain on sale of securities	\$ 94	\$ 57	\$ 315	\$ 444
Gross realized loss on sale of securities	(56)	(43)	(227)	(43)
Net realized gain on sale of securities	\$ 38	\$ 14	\$ 88	\$ 401
Proceeds from sale of securities	\$ 3,928	\$ 308	\$ 17,755	\$ 7,237

The Company did not engage in originating subprime mortgage loans, and it does not believe that it has material exposure to subprime mortgage loans or subprime mortgage backed securities. Additionally, the Company does not own any sovereign debt of Eurozone nations or structured financial products, such as collateralized debt obligations or structured investment vehicles, which are known by the Company to have elevated risk characteristics.

The amortized cost and estimated fair value of investment securities at September 30, 2014, by maturity are shown below. The amortized cost and fair value of collateralized mortgage obligations and mortgage-backed securities are presented by expected average life, rather than contractual maturity. Expected maturities may differ from contractual maturities because borrowers may have the right to prepay underlying loans without prepayment penalties.

(Dollars in Thousands)

Total investment securities	\$ 1,857	\$ 1,874	\$ 89,326	\$ 89,328

At September 30, 2014, investment securities with an estimated fair value of \$49.2 million were pledged to secure public deposits, certain nonpublic deposits and borrowings.

As required of all members of the Federal Home Loan Bank (“FHLB”) system, the Company maintains an investment in the capital stock of the FHLB in an amount equal to the greater of \$500,000 or 0.5% of home mortgage loans and pass-through securities plus 5.0% of the outstanding balance of mortgage home loans sold to FHLB under the Mortgage Purchase Program. The FHLB system, the largest government sponsored entity in the United States, is made up of 12 regional banks, including the FHLB of Seattle. Participating banks record the value of FHLB stock equal to its par value at \$100 per share. At September 30, 2014, the Company held approximately \$2.9 million in FHLB stock.

The Company is required to hold FHLB’s stock in order to receive advances and views this investment as long-term. Thus, when evaluating it for impairment, the value is determined based on the recovery of the par value through redemption by the FHLB or from the sale to another member, rather than by recognizing temporary declines in value. The FHLB of Seattle disclosed that it reported net income for the three and nine month periods ended September 30, 2014, at which time it declared a cash dividend. On November 22, 2013, the FHLB of Seattle entered into an amended Stipulation and Consent to the Issuance of a Consent Order with the Federal Housing Finance Agency (“Finance Agency”), modifying the previous order issued on October 25, 2010. The Finance Agency now deems the FHLB of Seattle to be “adequately capitalized” under the Finance Agency’s Prompt Corrective Action rule. The Company has concluded that its investment in FHLB is not impaired as of September 30, 2014, and believes that it will ultimately recover the par value of its investment in this stock.

The Company owns \$1.0 million in common stock in Pacific Coast Bankers’ Bancshares (PCBB), from which the Company receives a variety of corresponding banking services through its banking subsidiary Pacific Coast Bankers Bank. An investment by the Company in such an entity is permissible under 12 CFR 362.3(a)(2)(iv). When evaluating this investment for impairment, the value is determined based on the recovery of the par value through any redemption by PCBB or from the sale to another eligible purchaser, rather than by recognizing temporary declines in value. PCBB disclosed that it reported net income for the three and nine month periods ended September 30, 2014 and maintains capital ratios that exceed “well capitalized” standards for regulatory purposes.

NOTE 4 – LOANS AND ALLOWANCE FOR LOAN LOSSES AND CREDIT QUALITY

Loans

Loans held in the portfolio at September 30, 2014 and December 31, 2013, are as follows:

(Dollars in Thousands)	September 30, 2014	December 31, 2013
Commercial and agricultural	\$ 112,873	\$ 104,111

Real estate:

Less: deferred fees	(1,179)	(1,137)
Portfolio Loans	\$ 552,140	\$ 504,666

Allowance for loan losses and credit quality

The allowance for loan losses represents the Company's estimate as to the probable credit losses inherent in its loan portfolio. The allowance for loan losses is increased through periodic charges to earnings through provision for loan losses and represents the aggregate amount, net of loans charged-off and recoveries on previously charged-off loans, that is needed to establish an appropriate reserve for credit losses. The allowance is estimated based on a variety of factors and using a methodology as described below:

The Company classifies loans into relatively homogeneous pools by loan type in accordance with regulatory guidelines for regulatory reporting purposes. The Company regularly reviews all loans within each loan category to establish risk ratings for them that include Pass, Watch, Special Mention, Substandard, Doubtful and Loss. Pursuant to ASC 310 "Accounting by Creditors for Impairment of a Loan", the impaired portion of collateral dependent loans is charged-off. Other risk-related loans not considered impaired have loss factors applied to the various loan pool balances to establish loss potential for provisioning purposes.

Analyses are performed to establish the loss factors based on historical experience, as well as expected losses based on qualitative evaluations of such factors as the economic trends and conditions, industry conditions, levels and trends in delinquencies and impaired loans, levels and trends in charge-offs and recoveries, among others. The loss factors are applied to loan category pools segregated by risk classification to estimate the loss inherent in the Company's loan portfolio pursuant to ASC 450 "Accounting for Contingencies."

Additionally, impaired loans are evaluated for loss potential on an individual basis in accordance with ASC 310 "Accounting by Creditors for Impairment of a Loan," and specific reserves are established based on thorough analysis of collateral values where loss potential exists. When an impaired loan is collateral dependent and a deficiency exists in the fair value of collateral securing the loan in comparison to the associated loan balance, the deficiency is charged-off at that time or a specific reserve is established. Impaired loans are reviewed no less frequently than quarterly.

In the event that a current appraisal to support the fair value of the real estate collateral underlying an impaired loan has not yet been received, but the Company believes that the collateral value is insufficient to support the loan amount, an impairment reserve is recorded. In these instances, the receipt of a current appraisal triggers an updated review of the collateral support for the loan and any deficiency is charged-off or reserved at that time. In those instances where a current appraisal is not available in a timely manner in relation to a financial reporting cut-off date, the Company discounts the most recent third-party appraisal depending on a number of factors including, but not limited to, property location, local price volatility, local economic conditions, and recent comparable sales. In all cases, the costs to sell the subject property are deducted in arriving at the fair value of the collateral.

Changes in the allowance for credit losses for the three and nine months ended September 30, 2014 and 2013 were as follows:

Credit Quality Indicators

Federal regulations require that the Bank periodically evaluate the risks inherent in its loan portfolios. In addition, the Washington Division of Banks and the Federal Deposit Insurance Corporation ("FDIC") have authority to identify problem loans and, if appropriate, require them to be reclassified. There are three classifications for problem loans: Substandard, Doubtful, and Loss. These terms are used as follows:

"Substandard" loans have one or more defined weaknesses and are characterized by the distinct possibility some loss will be sustained if the deficiencies are not corrected.

"Doubtful" loans have the weaknesses of loans classified as "Substandard," with additional characteristics that suggest the weaknesses make collection or recovery in full after liquidation of collateral questionable on the basis of currently existing facts, conditions, and values. There is a high possibility of loss in loans classified as "Doubtful."

“Loss” loans are considered uncollectible and of such little value that continued classification of the credit as a loan is not warranted. If a loan or a portion thereof is classified as "Loss," it must be charged-off; meaning the amount of the loss is charged against the allowance for credit losses, thereby reducing that reserve.

The Bank also classifies some loans as “Pass” or Other Loans Especially Mentioned (“OLEM”). Within the Pass classification certain loans are “Watch” rated because they have elements of risk that require more monitoring than other performing loans. Pass grade loans include a range of loans from very high credit quality to acceptable credit quality. These borrowers generally have strong to acceptable capital levels and consistent earnings and debt service capacity. Loans with higher grades within the Pass category may include borrowers who are experiencing unusual operating difficulties, but have acceptable payment performance to date. Overall, loans with a Pass grade show no immediate loss exposure. Loans classified as OLEM continue to perform but have shown deterioration in credit quality and require close monitoring.

Credit quality indicators as of September 30, 2014 and December 31, 2013 were as follows:

(Dollars in Thousands)

September 30, 2014		Other Loans Especially Mentioned	Substandard	Doubtful	Total

Modifications

A modification of a loan constitutes a troubled debt restructuring (“TDR”) when a borrower is experiencing financial difficulty and the modification constitutes a concession. There are various types of concessions when modifying a loan, however, forgiveness of principal is rarely granted by the Company. Commercial and industrial loans modified in a TDR may involve term extensions, below market interest rates and/or interest-only payments wherein the delay in the repayment of principal is determined to be significant when all elements of the loan and circumstances are considered. Additional collateral, a co-borrower, or a guarantor is often required. Commercial mortgage and construction loans modified in a TDR often involve reducing the interest rate for the remaining term of the loan, extending the maturity date at an interest rate lower than the current market rate for new debt with similar risk, or substituting or adding a new borrower or guarantor. Construction loans modified in a TDR may also involve extending the interest-only payment period. Residential mortgage loans modified in a TDR are primarily comprised of loans where monthly payments are lowered to accommodate the borrowers’ financial needs. Land loans are typically structured as interest-only monthly payments with a balloon payment due at maturity. Land loans modified in a TDR typically involve extending the balloon payment by one to three years, and providing an interest rate concession. Home equity modifications are made infrequently and are uniquely designed to meet the specific needs of each borrower.

Loans modified in a TDR are considered impaired loans and typically already on non-accrual status. Partial charge-offs have in some cases already been taken against the outstanding loan balance. Loans modified in a TDR for the Company may have the financial effect of increasing the specific allowance associated with the loan. An allowance for impaired loans that have been modified in a TDR is measured based on the present value of expected future cash flows discounted at the loan’s effective interest rate, the loan’s observable market price, or the estimated fair value of the collateral, less any selling costs, if the loan is collateral dependent. The Company’s practice is to re-appraise collateral dependent loans every six to nine months. During the nine months ended September 30, 2014, there was no impact on the allowance from TDRs during the period, as the loans classified as TDRs during the period did not have a specific reserve and were already considered impaired loans at the time of modification and no further impairment was required upon modification. The Company had no commitments to lend additional funds for loans classified as TDRs at September 30, 2014.

The Company closely monitors the performance of modified loans for delinquency, as delinquency is considered an early indicator of possible future default. The allowance may be increased, adjustments may be made in the allocation of the allowance, or partial charge-offs may be taken to further write-down the carrying value of the loan.

The following table presents TDRs for the nine months ended September 30, 2014 and 2013, all of which were modified due to financial stress of the borrower.

Restructured loans by type current and subsequently defaulted

NOTE 6 – STOCK BASED COMPENSATION

The Company's 2011 Equity Incentive Plan, as amended (the "2011 Plan"), provides for the issuance of up to 900,000 shares in connection with incentive and nonqualified stock options, restricted stock, restricted stock units and other equity-based awards. Prior to adoption of the 2011 Plan, the Company made equity-based awards under the Company's 2000 Stock Incentive Plan, which expired January 1, 2011.

Stock Options

The 2011 Plan authorizes the issuance of incentive and non-qualified stock options, as defined under current tax laws, to key personnel. Options granted under the 2011 Plan either become exercisable ratably over five years or in a single installment five years from the date of grant.

The Company uses the Black-Scholes option pricing model to calculate the fair value of stock option awards based on assumptions in the following table. Expected volatility is based on historical volatility of the Company's common stock. The expected term of stock options granted is based on the simplified method, which is the simple average between contractual term and vesting period. The risk-free rate is based on the expected term of stock options and the applicable U.S. Treasury yield in effect at the time of grant.

Grant period ended	Expected Life	Risk Free Interest Rate	Expected Volatility	Dividend Yield	Average Fair Value
September 30, 2014	6.5 years	2.11	% 23.24	% 3.27	% \$ 1.02
September 30, 2013	6.5 years	1.35	% 23.04	% 4.14	% \$ 0.57

A summary of stock option activity as of September 30, 2014 and 2013, and changes during the nine months then ended are presented below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
September 30, 2014				
Outstanding beginning of period	625,495	\$ 9.53		
Granted	22,500	6.13		
Exercised	-	-		
Forfeited	-	-		
Expired	(70,400)	15.17		
Outstanding end of period	577,595	\$ 8.71	5.2	\$ 227,900
Exercisable end of period	295,495	\$ 11.43	3.3	\$ 42,875

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
September 30, 2013				
Outstanding beginning of period	537,107	\$ 11.28		
Granted	183,500	5.03		
Exercised	-	-		
Forfeited	(33,275)	9.25		
Expired	(64,337)	11.36		
Outstanding end of period	622,995	\$ 9.54	5.4	\$ 114,450
Exercisable end of period	313,245	\$ 13.25	2.7	\$ 4,443

A summary of the status of the Company's non-vested options as of September 30, 2014 and 2013 and changes during the nine months then ended, are presented below:

	September 30, 2014		September 30, 2013	
	Shares	Weighted Average Fair Value	Shares	Weighted Average Fair Value
Non-vested beginning of period	296,650	\$ 0.47	147,280	\$ 0.31
Granted	22,500	1.02	183,500	0.57
Vested	(37,050)	0.59	(2,275)	0.65
Forfeited	-	-	(18,755)	0.40
Non-vested end of period	282,100	\$ 0.50	309,750	\$ 0.45

The Company accounts for stock based compensation in accordance with GAAP, which requires measurement of compensation cost for all stock-based awards based on grant date fair value and recognition of compensation cost over the service period of each award.

(1) related to non-vested stock options

Restricted Stock Units

The Company grants restricted stock units (“RSU”) to employees qualifying for awards under the Company’s Annual Incentive Compensation Plan. Recipients of RSUs will be issued a specified number of shares of common stock under the 2011 Plan upon the lapse of applicable restrictions. Outstanding RSUs are subject to forfeiture if the recipient’s employment terminates prior to the expiration of three years from the date of grant.

The following table summarizes RSU activity during the nine months ended September 30, 2014 and 2013:

	September 30, 2014		
	Shares	Weighted Average Grant Price	Weighted Average Remaining Contractual terms (in years)
Outstanding, January 1, 2014	50,024		
Granted	11,673	\$ 6.45

(1) related to non-vested RSU's

NOTE 7 – COMMITMENTS AND CONTINGENCIES

The Bank is party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit, and involve, to varying degrees, elements of credit risk in excess of the amount recognized on the consolidated balance sheets.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as they do for on-balance-sheet instruments. A summary of the Bank's off-balance sheet commitments at September 30, 2014 and December 31, 2013 is as follows:

(Dollars in Thousands)

	September 30, 2014	December 31, 2013
Commitments to extend credit	\$ 96,817	\$ 106,017
Standby letters of credit	\$ 1,351	\$ 1,733

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Many of the commitments expire without being drawn upon; therefore total commitment amounts do not necessarily represent future cash requirements. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the customer. Collateral held varies, but may include accounts receivable, inventory, property and equipment, residential real estate, and income-producing commercial properties.

Standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

In connection with certain loans held for sale, the Bank typically makes representations and warranties that the underlying loans conform to specified guidelines. If the underlying loans do not conform to the specifications, the Bank may have an obligation to repurchase the loans or indemnify the purchaser against loss. The Bank believes that the potential for loss under these arrangements is remote. Accordingly, no contingent liability is recorded in the condensed consolidated financial statements.

The Company is currently not party to any material pending litigation. However, because of the nature of its activities, the Company may be subject to or threatened with legal actions in the ordinary course of business. In the opinion of management, liabilities arising from these claims, if any, will not have a material effect on the results of operations or financial condition of the Company.

NOTE 8 – FAIR VALUE MEASUREMENTS

Fair Value Hierarchy

The Company uses an established hierarchy for measuring fair value that is intended to maximize the use of observable inputs and minimize the use of unobservable inputs. This hierarchy uses three levels of inputs to measure the fair value of assets and liabilities as follows:

Level 1 – Valuations based on quoted prices in active exchange markets for identical assets or liabilities; also includes certain corporate debt securities actively traded in over-the-counter markets.

Level 2 – Valuations of assets and liabilities traded in less active dealer or broker markets. Valuations include quoted prices for similar assets and liabilities traded in the same market; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable or whose significant value drivers are observable. Valuations may be obtained from, or corroborated by, third-party pricing services. This category generally includes certain U.S. Government, agency and non-agency securities, state and municipal securities, mortgage-backed securities, corporate securities, and residential mortgage loans held for sale.

Level 3 – Valuation based on unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, yield curves and similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities, but in all cases are corroborated by external data, which may include third-party pricing services.

Investment Securities Available-for-Sale

The Company uses an independent pricing service to assist management in determining fair values of investment securities available-for-sale. This service provides pricing information by utilizing evaluated pricing models supported with market based information. Standard inputs include benchmark yields, reported trades, broker/dealer quotes, credit ratings, bids and offers, relative credit information and reference data from market research publications. Investment securities that are deemed to have been trading in illiquid or inactive markets may require the use of significant unobservable inputs.

The pricing service provides quoted market prices when available. Quoted prices are not always available due to bond market inactivity. For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows. Discounted cash flows are calculated using spread to swap and LIBOR curves that are updated to incorporate loss severities, volatility, credit spread and optionality. Additionally, the pricing service may obtain a broker quote when sufficient information is not available to produce a valuation. Valuations and broker quotes are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The Company generally obtains one value from its primary external third-party pricing service. The Company's third-party pricing service has established processes for us to submit inquiries regarding quoted prices. The Company's third-party pricing service will review the inputs to the evaluation in light of any new market data presented by us. The Company's third-party pricing service may then affirm the original quoted price or may update the evaluation on a going forward basis.

On a quarterly basis, management reviews the pricing information received from the third party-pricing service through a combination of procedures that include an evaluation of methodologies used by the pricing service, analytical reviews and performance analyses of the prices against statistics and trends and maintenance of an investment watch list. Based on this review, management determines whether the current placement of the security in the fair value hierarchy is appropriate or whether transfers may be warranted. As necessary, the Company compares prices received from the pricing service to discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing service in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of September 30, 2014 or December 31, 2013.

The following table presents the balances of assets measured at fair value on a recurring basis at September 30, 2014 and December 31, 2013.

(Dollars in Thousands)		Fair Value Measurements At September 30, 2014			
Description	Fair Value 09/30/2014	Quoted Prices in Active Markets for Identical Assets (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities:					
Collateralized mortgage obligations: agency issued	\$40,039	\$	-	\$ 40,039	\$ -
Collateralized mortgage obligations: non agency	579		-	579	-
Mortgage-backed securities: agency issued	12,499		-	12,499	-
U.S. Government agency securities	8,655		-	8,655	-
State and municipal securities	27,556		-	26,198	1,358
Total assets measured at fair value	\$89,328	\$		\$ 87,970	\$ 1,358
		Fair Value Measurements At December 31, 2013			
Description	Fair Value 12/31/2013	Quoted Prices in Active Markets for Identical Assets (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Available-for-sale securities:					
Collateralized mortgage obligations: agency issued	\$38,791	\$	-	\$ 38,791	\$ -
Collateralized mortgage obligations: non agency	2,011		-	2,011	-
Mortgage-backed securities: agency issued	13,389		-	13,389	-
U.S. Government agency securities	8,811		-	8,811	-
State and municipal securities	32,160		-	30,741	1,419
Corporate bonds	982		-	982	-
Total assets measured at fair value	\$96,144	\$		\$ 94,725	\$ 1,419

As of September 30, 2014 and December 31, 2013, the Company had three investments classified as Level 3 investments which consist of local non-rated municipal bonds for which the Company is the sole owner of the entire bond issue. The valuation of these securities is supported by analysis prepared by an independent third party. Their approach to determining fair value involves using recently executed transactions and market quotations for similar securities. As these securities are not rated by the rating agencies and there is no trading volume, management determined that these securities should be classified as Level 3 within the fair value hierarchy. Additionally, these

securities are considered sensitive to changes in credit given the unobserved assumed credit ratings.

The following table presents a reconciliation of assets that are measured at fair value on a recurring basis using significant unobservable inputs (Level 3) during the three and nine months ended September 30, 2014 and 2013, respectively. There were no transfers of assets into or out of Level 1, 2 or 3 for the three and nine months ended September 30, 2014.

(Dollars in Thousands)	Three months ended September		Nine months ended September	
	30, 2014	2013	30, 2014	2013
Balance beginning of period	\$ 1,394	\$ 1,491	1,419	\$ 1,614
Principal paydowns	(61)	(61)	(92)	(90)
Change in FV (included in other comprehensive income)	25	(3)	31	(97)

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities are measured at fair value on a nonrecurring basis after initial recognition such as loans measured for impairment and other real estate owned (“OREO”). The following methods were used to estimate the fair value of each such class of financial instrument:

Impaired loans – A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due (both interest and principal) according to the contractual terms of the loan agreement. Impaired loans are classified as Level 3 in the fair value hierarchy and are measured based on the present value of expected future cash flows or by the net realizable value of the collateral if the loan is collateral dependent. In determining the net realizable value of the underlying collateral, we consider third party appraisals by qualified licensed appraisers, less estimated costs to sell. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach.

Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available and include consideration for variations in location, size, and income production capacity of the property. The income approach commonly utilizes a discount or cap rate to determine the present value of expected future cash flows. Additionally, the appraisals are periodically further adjusted by the Company in consideration of charges that may be incurred in the event of foreclosure and are based on management’s historical knowledge, changes in business factors and changes in market conditions. Such discounts are typically significant, and may range from 10% to 30%.

Impaired loans are reviewed and evaluated quarterly for additional impairment and adjusted accordingly, based on the same factors identified above. Because of the high degree of judgment required in estimating the fair value of collateral underlying impaired loans and because of the relationship between fair value and general economic conditions, we consider the fair value of impaired loans to be highly sensitive to changes in market conditions.

Other real estate owned – OREO is initially recorded at the fair value of the property less estimated costs to sell. This amount becomes the property’s new basis. Management considers third party appraisals in determining the fair value of particular properties. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach.

Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available and include consideration for variations in location, size, and income production capacity of the property. Additionally, the appraisals are periodically further adjusted by the Company based on management’s historical knowledge, changes in business factors and changes in market conditions. Such

adjustments are typically downward, and may range from 10% to 25%.

Any write-downs based on the property fair value less estimated costs to sell at the date of acquisition are charged to the allowance for credit losses. Management periodically reviews OREO to ensure the property is carried at the lower of its new basis or fair value, net of estimated costs to sell. Any additional write-downs based on re-evaluation of the property fair value are charged to non-interest expense. Because of the high degree of judgment required in estimating the fair value of OREO and because of the relationship between fair value and general economic conditions, we consider the fair value of OREO to be highly sensitive to changes in market conditions.

The following table presents the Company's assets that were held at the end of each period that were measured at fair value on a nonrecurring basis during the nine months ended September 30, 2014 and year ended December 31, 2013:

(Dollars in Thousands)	Fair Value Measurements As of September 30, 2014			
Description	Quoted Prices in Fair Value Active Markets 09/30/2014 for Identical Assets (Level 1)		Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Other real estate owned and foreclosed assets	\$ 291	\$	\$	\$ 291
Loans measured for impairment, net of specific reserves	441			441
Total impaired assets measured at fair value	\$ 732	\$	\$	\$ 732

		Fair Value Measurements As of December 31, 2013		
Description	Fair Value 12/31/2013	Quoted Prices in Active Markets for Identical Assets (Level 1)		Significant Unobservable Inputs (Level 3)
		Other Observable Inputs (Level 2)		
Other real estate owned and foreclosed assets	\$ 1,960	\$	\$	\$ 1,960
Loans measured for impairment, net of specific reserves	162			162
Total impaired assets measured at fair value	\$ 2,122	\$	\$	\$ 2,122

Other real estate owned with a pre-foreclosure loan balance of \$652,000 was acquired during the nine months ended September 30, 2014. Upon foreclosure, write downs totaling \$127,000 were applied to the allowance for credit losses during the period related to these assets.

The following table presents quantitative information about Level 3 inputs for financial instruments measured at fair value on a nonrecurring basis at September 30, 2014:

(Dollars in Thousands)				
Description	Fair Value 09/30/2014	Valuation Technique	Significant Unobservable Inputs	Range (Weighted Average)
Other real estate owned and foreclosed assets	\$ 291	Appraised value	Adjustment for market conditions	0-10% (1.6%)

Loans measured for impairment, net of specific reserves	\$ 441	Appraised value	Adjustment for market conditions	0-20% (2.8%)
---	--------	-----------------	----------------------------------	--------------

Fair Value of Financial Instruments

The following methods and assumptions were used by the Company in estimating the fair values of financial instruments disclosed in these consolidated financial statements:

Cash and due from banks, interest bearing deposits in banks, and certificates held for investment

The carrying amounts of cash, interest bearing deposits at other financial institutions approximate their fair value.

Investment securities available-for-sale and held-to-maturity

The fair value of all investment securities are based upon the assumptions market participants would use in pricing the security. Such assumptions include observable and unobservable inputs such as quoted market prices, dealer quotes and analysis of discounted cash flows.

Federal Home Loan Bank Stock

FHLB stock is carried at cost which approximates fair value and equals its par value because the shares can only be redeemed with the FHLB at par.

Pacific Coast Bankers' Bancshares Stock

PCBB stock is carried at cost which approximates fair value and equals its par value based on the price per share paid at the capital offering concluded during the current quarter.

Loans, net and loans held for sale

The fair value of loans is estimated based on comparable market statistics for loans with similar credit ratings. An additional liquidity discount is also incorporated to more closely align the fair value with observed market prices. Fair values of loans held for sale are based on a discounted cash flow calculation using interest rates currently available on similar loans. The fair value was based on an aggregate loan basis.

Deposits

The fair value of deposits with no stated maturity date is included at the amount payable on demand. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flow calculation based on interest rates currently offered on similar certificates.

Borrowings

The fair values of the Company's long-term borrowings is estimated using discounted cash flow analysis based on the Company's incremental borrowing rates for similar types of borrowing arrangements.

Junior subordinated debentures

The fair value of the junior subordinated debentures and trust preferred securities is estimated using discounted cash flow analysis based on interest rates currently available for junior subordinated debentures.

Off-Balance-Sheet Instruments

The fair value of commitments to extend credit and standby letters of credit was estimated using the rates currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the customers. Since the majority of the Company's off-balance-sheet instruments consist of non-fee producing, variable-rate commitments, the Company has determined they do not have a material fair value.

The estimated fair value of the Company's financial instruments at September 30, 2014 and December 31, 2013 is as follows:

(Dollars in Thousands)

As of September 30, 2014					
	Carrying Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Fair Value

NOTE 9 – JUNIOR SUBORDINATED DEBENTURES

At September 30, 2014, two wholly-owned subsidiary grantor trusts established by the Company had outstanding \$13.0 million of Trust Preferred Securities (“trust preferred securities”). Trust preferred securities accrue and pay distributions periodically at specified annual rates as provided in the indentures. The trusts used the net proceeds from the offering of trust preferred securities to purchase a like amount of Junior Subordinated Debentures (the “Debentures”) of the Company. The Debentures are the sole assets of the trusts. The Company’s obligations under the Debentures and the related documents, taken together, constitute a full and unconditional guarantee by the Company of the obligations of the trusts. The trust preferred securities are mandatorily redeemable upon the maturity of the Debentures, or upon earlier redemption as provided in the indentures. The Company has the right to redeem the Debentures in whole or in part, at a redemption price specified in the indentures plus any accrued but unpaid interest to the redemption date.

The Debentures issued by the Company to the grantor trusts totaling \$13.0 million are reflected in the consolidated balance sheet in the liabilities section under the caption “junior subordinated debentures.” The Company records interest expense on the corresponding junior subordinated debentures in the consolidated statements of income. The Company recorded \$403,000 in the consolidated balance sheet at September 30, 2014 for the common capital securities issued by the issuer trusts.

As of September 30, 2014, regular accrued interest on junior subordinated debentures totaled \$40,000 and is included in accrued interest payable on the balance sheet. Following are the terms of the junior subordinated debentures as of September 30, 2014.

(Dollars in Thousands)

Trust Name	Issue Date	Issued Amount	Rate	Maturity Date
Pacific Financial Corporation Statutory Trust I	December 2005	\$5,000	LIBOR + 1.45% ⁽¹⁾	March 2036
Pacific Financial Corporation Statutory Trust II	June 2006	8,000 \$13,000	LIBOR + 1.60% ⁽²⁾	July 2036

Pacific Financial Corporation Statutory Trust I securities incurred interest at the fixed rate of 6.39% until mid ⁽¹⁾March 2011, at which the rate changed to a variable rate of 3-month LIBOR (0.234% at September 11, 2014) plus 1.45% or 1.68%, adjusted quarterly, through the final maturity date in March 2036.

⁽²⁾ Pacific Financial Corporation Statutory Trust II securities incur interest at a variable rate of 3-month LIBOR (0.234% at July 11, 2014) plus 1.60% or 1.83%, adjusted quarterly, through the final maturity date in July 2036.

NOTE 10 – RECENTLY ISSUED ACCOUNTING STANDARDS

In June 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures*. ASU 2014-11 changes the accounting for repurchase-to-maturity transactions and repurchase financing arrangements. It also requires additional disclosures about repurchase agreements and other similar transactions. The new guidance aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements. Going forward, these transactions would all be accounted for as secured borrowings. The ASU also requires new and expanded disclosures. This ASU is effective for the first interim or annual period beginning after December 15, 2014. The adoption of ASU No. 2014-11 is not expected to have a material impact on the Company's consolidated financial statements.

In June 2014, the FASB issued ASU No. 2014-12, *Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*. ASU 2014-12 requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. A reporting entity should apply existing guidance in Topic 718, Compensation - Stock Compensation, as it relates to awards with performance conditions that affect vesting to account for such awards. The performance target should not be reflected in estimating the grant-date fair value of the award. Compensation cost should be recognized in the period in which it becomes probable that the performance target will be achieved and should represent the compensation cost attributable to the period(s) for which the requisite service has already been rendered. The amendments in this ASU can be applied prospectively or retrospectively and are effective for annual periods and interim periods within those annual periods beginning after December 15, 2015 with early adoption permitted. The Company is currently reviewing the requirements of ASU No. 2014-12, but does not expect the ASU to have a material impact on the Company's consolidated financial statements.

In May 2014, the FASB issued Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* (ASU 2014-09), which supersedes nearly all existing revenue recognition guidance under U.S. GAAP. The core principle of ASU 2014-09 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration to which an entity expects to be entitled for those goods or services. ASU 2014-09 defines a five step process to achieve this core principle and, in doing so, more judgment and estimates may be required within the revenue recognition process than are required under existing U.S. GAAP. The standard is effective for annual periods beginning after December 15, 2016, and interim periods therein, using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients, or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). We are currently evaluating the impact of our pending adoption of ASU 2014-09 on our consolidated financial statements and have not yet determined the method by which we will adopt the standard in 2017.

In July 2013, FASB issued ASU No. 2013-11, "*Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists.*" The provisions of ASU No. 2013-11 require an entity to present an unrecognized tax benefit, or portion thereof, in the statement of financial position as a reduction to a deferred tax asset for a net operating loss carryforward or a tax credit carryforward, with certain exceptions related to availability. ASU No. 2013-11 is effective for interim and annual reporting periods beginning after December 15, 2013. The adoption of ASU No. 2013-11 has not had a material impact on the Company's Consolidated Financial Statements.

NOTE 11 – BUSINESS COMBINATION

On January 28, 2013, the Bank and Sterling Savings Bank, a Washington state-chartered bank ("Sterling"), entered into a Purchase and Assumption Agreement (the "Agreement") pursuant to which the Bank agreed to purchase from Sterling three branches located in Aberdeen, Washington; Astoria, Oregon; and Seaside, Oregon; including certain deposit liabilities, loans and other assets and liabilities associated with such branch locations. The actual amount of loans and deposits, the value of other assets and liabilities transferred to the Bank and the actual price paid were determined at the time of the closing of the transaction on September 1, 2013, in accordance with the terms of the Agreement. The purchase price was \$976,000 and exceeded the estimated fair value of tangible net assets acquired by approximately \$1.1 million, which was recorded as goodwill and intangible assets.

Cash flow information relative to the agreement is as follows (in thousands):

Fair value of tangible net assets acquired	\$37,533
Cash paid for deposit premium	(976)
Liabilities assumed	(37,684)

Goodwill and intangible assets recorded	\$1,127
---	---------

The primary purposes of the acquisition are to expand the Company's market share in the northern Oregon coast, to provide existing customers with added convenience and service, and to provide our new customers with the opportunity to enjoy the outstanding personalized service and commitment of our community-based bank.

Fair value adjustments and related goodwill were recorded in the statement of financial condition of the Company. The following is a condensed balance sheet disclosing the estimated fair value amounts of the acquired branches of Sterling assigned to the major consolidated asset and liability captions at the acquisition date (in thousands):

Edgar Filing: PACIFIC FINANCIAL CORP - Form 10-Q

Cash and cash equivalents	\$31,941
Loans receivable	3,989
Premises and equipment	604
Goodwill and intangible assets	1,127
Other assets	23

Total assets	\$37,684
--------------	----------

Deposits and accrued interest payable	\$37,636
Deferred tax liability	47
Other liabilities	1

Total liabilities and shareholders' equity	\$37,684
--	----------

The core deposit intangible asset that was recognized as part of the business combination was \$242,000 and will be amortized over its estimated useful life of approximately ten years utilizing an accelerated method. The goodwill of \$885,000 will not be amortized for financial statement purposes; instead, it will be reviewed annually for impairment.

The fair value of savings and transaction deposit accounts acquired from Sterling was assumed to approximate the carrying value as these accounts have no stated maturity and are payable on demand. Certificates of deposit were valued by comparing the contractual cost of the portfolio to an identical portfolio bearing current market rates. The projected cash flows from maturing certificates were calculated based on contractual rates. The fair value of certificates of deposit was calculated by discounting their contractual cash flows at a market rate for a certificate of deposit with a corresponding maturity.

Direct costs related to the Sterling acquisition were expensed as incurred in the year ended December 31, 2013. These acquisition and integration expenses included salaries and benefits, technology and communications, occupancy and equipment, professional services and other noninterest expenses. For the year ended December 31, 2013, the Company incurred \$615,000 of expenses related to acquisition costs.

NOTE 12 – GOODWILL

The majority of goodwill and intangibles generally arise from business combinations accounted for under the purchase method. Goodwill and other intangibles deemed to have indefinite lives generated from purchase business combinations are not subject to amortization and are instead tested for impairment no less than annually.

During the second quarter of 2014, the Company initiated its annual goodwill impairment test to determine whether an impairment of its goodwill asset exists. The test was completed during the current quarter. The goodwill impairment test involves a two-step process. The first step is a comparison of the reporting unit's fair value to its carrying value. If the reporting unit's fair value is less than its carrying value, the Company is required to progress to the second step. In the second step the Company calculates the implied fair value of its reporting unit and, in accordance with applicable GAAP standards, compares the implied fair value of goodwill to the carrying amount of goodwill on the Company's balance sheet. If the carrying amount of the goodwill is greater than the implied fair value of that goodwill, an impairment loss must be recognized in an amount equal to that excess. The implied fair value of goodwill is determined in the same manner as goodwill recognized in a business combination. The estimated fair value of the Company is allocated to all of the Company's individual assets and liabilities, including any unrecognized identifiable intangible assets, as if the Company had been acquired in a business combination and the estimated fair value of the Company is the price paid to acquire it. The allocation process is performed only for purposes of determining whether a goodwill impairment exists and the amount of any such impairment. No assets or liabilities are written up or down, nor are any additional unrecognized identifiable intangible assets recorded as a part of this process.

The Company estimates fair value using the best information available, including market information and a discounted cash flow analysis, which is also referred to as the income approach. The income approach uses a reporting unit's projection of estimated operating results and cash flows that is discounted using a rate that reflects current market conditions. The projection uses management's best estimates of economic and market conditions over the projected period including growth rates in loans and deposits, estimates of future expected changes in net interest

margins and cash expenditures. The market approach estimates fair value by applying cash flow multiples to the reporting unit's operating performance. The multiples are derived from comparable publicly traded companies with similar operating and investment characteristics of the reporting unit. We validate our estimated fair value by comparing the fair value estimates using the income approach to the fair value estimates using the market approach.

As part of our process for performing the step one impairment test of goodwill, the Company estimated the fair value of the reporting unit utilizing the income approach and the market approach in order to derive an enterprise value of the Company. In determining the discount rate for the discounted cash flow model, the Company used a modified capital asset pricing model that develops a rate of return utilizing a risk-free rate and equity risk premium resulting in a discount rate of 12.0%. This approach also includes adjustments for the industry the Company operates in and size of the Company. In addition, assumptions used by the Company in its discounted cash flow model (income approach) included an average annual revenue growth rate that approximated 23%; an asset growth of 4.4% in years one through five; net interest margin ranging from 4.02% in the base year to 4.24% in year five; and a return on assets that ranged from 0.62% to 1.24%.

In applying the market approach method, the Company considered all banks that announced a sale between January 1, 2013 and September 30, 2014, with total assets under \$5 billion and a return on assets greater than zero. This resulted in selecting 24 institutions which fit these criteria. After selecting these institutions, the Company derived the fair value of the reporting unit by completing a comparative analysis of the relationship between their financial metrics listed above and their market values utilizing various market multiples. Focus was placed on the price to tangible book value of equity multiple as this multiple generally reflects returns on the capital employed within the industry and is generally correlated with the profitability of each individual company.

The Company concluded its reporting unit had a fair value of \$8.50 per share, or \$86.6 million, after giving similar consideration to the values derived from 1) the market approach of \$8.20 per share weighted at 80%, and 2) the income approach of \$9.67 per share million weighted at 20%. This estimate compares to a carrying value of its reporting unit of \$70.9 million. Accordingly, following step one of the Company's goodwill impairment test, the Company concluded that its reporting unit's fair value exceeded its carrying value and no goodwill impairment existed.

Even though the Company determined that there was no goodwill impairment, a future impairment charge may be necessary if our stock price declines, market values of others in the financial industry decrease, the Bank's revenue falls, or there are significant adverse changes in the operating environment for the financial industry. It is also possible that changes in circumstances existing now or in the future, or in the numerous estimates, judgments, and assumptions made by management in assessing the fair value of our goodwill, could result in a future goodwill impairment. If the Company records an impairment charge, its financial position and results of operations would be adversely affected; however, such an impairment charge would have no impact on liquidity, day-to-day operations or regulatory capital.

NOTE 13 – INCOME TAXES

The Company recorded an income tax provision for the three months ended September 30, 2014, June 30, 2014 and September 30, 2013. The amount of the provision for each period was commensurate with the estimated tax liability associated with the net income earned during the period. As of September 30, 2014, the Company maintained a deferred tax asset balance of \$4.1 million. The Company believes it will be fully utilized in the normal course of business, thus no valuation allowance is maintained against this asset.

The Company's provision for income taxes includes both federal and state income taxes and reflects the application of federal and state statutory rates to the Company's income before taxes. The principal difference between statutory tax rates and the Company's effective tax rate is the benefit derived from investing in tax-exempt securities and bank owned life insurance.

Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which will be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company's income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established to reduce the net carrying amount of deferred tax assets if it is determined to be more likely than not, that all or some portion of the potential deferred tax asset will not be realized.

The Company applies the provisions of FASB ASC 740, Income Taxes, relating to the accounting for uncertainty in income taxes. The Company periodically reviews its income tax positions based on tax laws and regulations, and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment. The Company's uncertain tax positions were nominal in amount as of September 30, 2014.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with the audited consolidated financial statements and related notes to those statements of Pacific Financial Corporation ("Company") that appear under the heading "Financial Statements and Supplementary Data" in the Company's Annual Report on Form 10-K for the year ended December 31, 2013 ("2013 10-K"), as well as the unaudited consolidated financial statements for the current quarter found under Item 1 above.

DISCLOSURE REGARDING FORWARD LOOKING STATEMENTS

This document contains forward-looking statements that are subject to risks and uncertainties. These statements are based on the present beliefs and assumptions of our management, and on information currently available to them. Forward-looking statements include the information concerning our possible future results of operations set forth under "Management's Discussion and Analysis of Financial Condition and Results of Operations" and statements preceded by, followed by or that include the words "believes," "will", "expects," "anticipates," "intends," "plans," "estimates" or similar expressions.

Any forward-looking statements in this document are subject to the risks of our business, including risk factors described in our 2013 10-K, as well as risks relating to, among other things, the following:

- changing laws, regulations, standards, and government programs that may limit our revenue sources, significantly increase our costs, including compliance and insurance costs, limit our opportunities to generate noninterest income, and place additional burdens on our limited management resources;

- economic or business conditions, nationally and in the regions in which we do business that may result in, among other things, reduced demand for credit and other banking services, lower credit quality and additional workout and other real estate owned ("OREO") expenses;

- decreases in real estate and other asset prices, whether or not due to economic conditions, that may reduce the value of the assets that serve as collateral for many of our loans;

- competitive pressures among depository and other financial institutions that may impede our ability to attract and retain depositors, borrowers and other customers, maintain and improve our net interest income and margin and non-interest income, such as fee income, and/or retain our key employees;

a lack of liquidity in the market for our common stock that may make it difficult or impossible for you to liquidate your investment in our stock or lead to distortions in the market price of our stock; and

integration of three bank branches and related assets acquired from Sterling that may cost more or be less beneficial to us than expected.

Our management believes the forward-looking statements in this report are reasonable; however, you should not place undue reliance on them. Forward-looking statements are not guarantees of performance. They involve risks, uncertainties and assumptions. Many of the factors that will determine our future results and share value are beyond our ability to control or predict. We undertake no obligation to update forward-looking statements.

Third Quarter 2014 Highlights (as of, or for the period ended September 30, 2014, except as noted):

Earnings per share (“EPS”) declined by 7% to \$0.13, compared to \$0.14 in second quarter 2014, primarily due more shares outstanding reflecting the exercise of warrants during the quarter. EPS grew 44% from \$0.09 in third quarter 2013. Year-to-date, EPS increased 28% to \$0.37, from \$0.29 for the same period in 2013.

Net interest income increased \$86,000, or 1%, to \$6.9 million, compared to \$6.8 million in second quarter 2014, and grew \$867,000, or 14%, from \$6.0 million in third quarter 2013. For the first nine months of 2014, net interest income increased \$2.7 million, or 15%, to \$20.2 million, from \$17.5 million for the like period in 2013.

Net interest margin (NIM) was 4.13%, compared to 4.28% for the preceding quarter, and 3.88% for third quarter 2013. Year-to-date, net interest margin expanded 23 basis points to 4.22%, compared to 3.99% for the first nine months of 2013.

Gross loans grew to \$552.1 million, an increase of \$4.8 million, or 1% from \$547.3 million at June 30, 2014, and up 13% from \$486.7 million at September 30, 2013.

Nonperforming assets declined to \$6.4 million, or 0.86% of total assets, down from \$7.4 million, or 1.03% of total assets, at June 30, 2014 and \$12.4 million, or 1.73% of total assets at September 30, 2013.

Classified loans increased to \$18.4 million, or 3.33% of gross loans, up from \$16.0 million, or 2.91% of gross loans, at June 30, 2014, and \$13.7 million, or 2.82% of gross loans at September 30, 2013.

Net charge-offs totaled \$160,000, compared to \$73,000 in second quarter 2014 and \$156,000 for third quarter 2013. Year-to-date, net charge-offs were \$304,000, compared to \$102,000 for the first nine months of 2013.

Capital levels exceeded regulatory requirements for a well-capitalized financial institution, with a total risk-based capital ratio of 14.06% and a leverage ratio of 10.09% at quarter end.

OPERATING RESULTS

Net Interest Income

Net interest income for the quarter and nine months ended September 30, 2014, increased from the quarter and nine months ended September 30, 2013. This increase was primarily due to the growth in earning assets, along with changes in the balance sheet mix. Loan balances increased due to the production generated predominately in Western Washington. Investment securities and federal funds sold decreased as a proportion of the balance sheet due to the strong loan demand during the past several quarters. Funding costs remained low due to the shift in mix toward non-interest bearing and lower-cost deposits, and continued historically low interest rates.

Net interest income for the current quarter increased from the second quarter of 2014, reflecting higher loan balances and lower levels of investments. While funding costs declined slightly when comparing the periods, given the lengthy period of very low interest rates over the past several years, additional reductions in funding costs are becoming more difficult to achieve as renewing certificates of deposit are receiving rates that are similar to those granted at previous renewals.

Certain reclassifications have been made to the June 31, 2014 and September 30, 2013 financial table presentations to conform to current year presentations. These reclassifications have no effect on previously reported net income per share.

*Pre-tax, pre-credit cost operating income and tax equivalent income before income taxes are non-GAAP financial measures. Non-GAAP financial measures have inherent limitations and are not required to be uniformly applied. Management believes that presentation of these non-GAAP financial measures provides useful information that is frequently used by shareholders and analysts in the evaluation of financial institutions. Non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as a substitute for information reported

in accordance with GAAP.

Noninterest Income

Noninterest income for third quarter 2014 grew compared to both the preceding and year ago quarters, reflecting increases in gains from sales of loans over the preceding quarter. Gains on sale of residential mortgage loans and related fee income rose in third quarter 2014 compared to second quarter 2014, and was similar to that earned in third quarter 2013. The recent rebound in home purchases throughout many of our markets is fueling new residential mortgage originations. In addition, fee income from annuity sales increased in the current quarter compared to the second quarter of 2013, but was down slightly from the prior quarter due to seasonal factors. Losses on sale of other real estate owned (“OREO”) were higher in the current period as compared to the prior quarter and were in contrast to a small gain in third quarter in 2013, reflecting a more aggressive approach to pricing in order to reduce the levels of OREO. In addition, gains on our securities available for sale portfolio in third quarter 2014 and third quarter 2013 were taken to improve the credit quality of securities in the portfolio and to reduce interest rate risk.

Noninterest income for the first nine months of 2014 was down from the same period in 2013, reflecting the declines in gains on sale of residential mortgage loans due to the slowdown in refinancing activity that occurred in the second half of 2013 and higher losses on sale of OREO.

Noninterest Expense

Noninterest expense for third quarter of 2014 was virtually unchanged as compared to the second quarter of 2014. Decreases in OREO write-downs were offset by increased operating costs associated with acquisitions into OREO during the current quarter.

Noninterest expense for third quarter 2014 was virtually unchanged compared to the year ago quarter. Salary and benefits expense increased with the addition of loan production personnel and branch staff for the new branch that opened in the fourth quarter of 2013. Total costs associated with OREO and related third-party loan expenses decreased due to the decline in OREO balances and stabilization of valuations. Other non-interest expenses also declined primarily due to a decrease in loan origination and appraisal expense associated with a decline in mortgage origination activity.

Noninterest expense for the first nine months of 2014 was down as compared to the same period in 2013, because of the \$471,000 savings generated from reduction in mortgage lending staff initiated in first quarter 2014 prompted by the decline in residential mortgage loan refinance activity. Also, in second quarter 2013 the Bank incurred one-time expenses of \$395,000 in data processing conversion costs relating to three branches acquired from Sterling Savings Bank in June 2013. In addition, OREO write-downs and expenses and loan origination and appraisal expense were down as compared to the prior period for reasons noted above.

Liquidity remains strong based on the current levels of cash equivalents and investment securities. The Company maintains unsecured lines of credit totaling \$16.0 million with correspondent banks, all of which are currently available. In addition, it has a secured borrowing facility with the Federal Home Loan Bank of Seattle of \$143.8 million, of which \$11.5 million is currently outstanding. In an effort to fund pending loan demand, cash equivalents were increased during the current quarter. In addition, some restructuring of the investment portfolio was conducted to reduce the impact of interest rate risk on securities valuation, resulting in a lowering of portfolio yields. The expected modified duration (adjusted for calls, consensus pre-payment speeds and rate adjustment dates) of the investment portfolio was 4.3 years at September 30, 2014, 4.5 years at June 30, 2014 and 4.4 years at September 30, 2013.

LOANS

Loan portfolio growth continues to be well diversified and generated predominately within our Washington and Oregon markets. This is despite a payoff of a \$5.7 million non-owner occupied commercial real estate relationship during the current quarter. The portfolio includes \$36.3 million in purchased government-guaranteed commercial and commercial real estate loans. In addition, the loan portfolio contains \$25.3 million in indirect consumer loans to individuals with high credit scores to finance luxury and classic cars as a part of a strategy to diversify the loan portfolio.

Our ability to continue loan growth will be dependent on many factors, including the effects of competition, economic conditions in our markets, retention of key personnel and valued customers, and our ability to close loans in the pipeline. The Company manages new loan origination volume using concentration limits that establish maximum

exposure levels by designated industry segment, real estate product types, geography, and single borrower limits.

The table provided below summarizes the Bank's level of concentrations in commercial real estate as of September 30, 2014, December 31, 2013 and September 30, 2013, respectively, as defined in the Interagency Guidelines for Real Estate Lending and the Commercial Real Estate Lending Joint Guidance policy. The results displayed support the Company's efforts to manage CRE concentrations in the loan portfolio.

Commercial real estate markets continue to be vulnerable to financial and valuation pressures that may limit refinance options and negatively impact borrowers' ability to perform under existing loan agreements. Declines in the value of commercial real estate or higher market interest rates may have a further adverse impact on the ability of borrowers with maturing loans to satisfy loan to value ratios required to renew such loans.

At September 30, 2014, the Bank had outstanding loan advances of \$3.7 million to persons serving as directors, executive officers, principal stockholders and their related interests. This compares to \$66,000 and \$254,000 at December 31, 2013 and September 30, 2013, respectively. These loans were made in the ordinary course of business on substantially the same terms, including interest rates, maturities and collateral, as comparable loans made to customers not related to the Bank. None of these loans were on nonaccrual, past due or restructured as of September 30, 2014.

DEPOSITS

Total deposits were up at September 30, 2014, compared to the second quarter of this year and the third quarter a year ago. Non-interest bearing deposits grew due to seasonal inflows associated with increased business activity in our local markets with economies focused on summer tourism. Recent success in acquiring business deposit relationships in conjunction with the growth in lending achieved over the past year has also contributed to deposit growth. The combination of our efforts to reduce higher-cost time deposits through lowering interest rates paid and offering non-insured deposit products, when appropriate, reduced the average rate paid on total deposits in third quarter 2014 from third quarter 2013.

Edgar Filing: PACIFIC FINANCIAL CORP - Form 10-Q

Total brokered deposits were \$22.6 million at September 30, 2014, which included \$2.5 million via reciprocal deposit arrangements. This compares to \$22.9 million and \$24.1 million at June 30, 2014 and September 30, 2013, respectively. In addition, the Company's funding structure contains \$11.5 million in borrowings from the Federal Home Loan Bank. The Company views the prudent use of brokered deposits and borrowings to be an appropriate funding tool to support interest rate risk mitigation strategies.

Two wholly-owned subsidiary grantor trusts established by the Company had issued and outstanding \$13.4 million of trust preferred securities and accrued interest. For additional information regarding these securities see the discussion under the subheadings “Junior Subordinated Debentures” included in Note 10 of the Company’s audited financial statements as presented in its 2013 Form10-K.

CAPITAL

Pacific Financial Corporation, and its subsidiary Bank of the Pacific, continue to meet the thresholds to be considered “well-capitalized” under regulatory requirements. Capital ratios increased slightly as compared to the prior quarter primarily due to earnings retention. Also, \$1.2 million of additional capital was supplied via the exercise at a price of \$6.50 per share of warrants to purchase 185,000 shares of common stock originally issued in conjunction with a private capital raise conducted in 2009. In general, capital ratios declined from September 30, 2013 due to the successful execution of the Company’s growth strategy and shift in the balance sheet mix to higher risk-weighted loan assets. However, the tangible common equity ratio grew due to the additional capital supplied via exercise of warrants, as previously mentioned.

The Board of Governors of the Federal Reserve System (“Federal Reserve”) and the FDIC have established minimum requirements for capital adequacy for bank holding companies and state non-member banks. For more information on these topics, see the discussions under the subheading “Capital Adequacy” in the section “Business” included in Item 1, of the Company’s 2013 Form 10-K. The following table summarizes the capital measures of the Company and the Bank, respectively, at the dates listed below.

The total risk based capital ratios of the Company include \$13.4 million of junior subordinated debentures, all of which qualified as Tier 1 capital at September 30, 2014, under guidance issued by the Federal Reserve. The Company expects to continue to rely on these junior subordinated debentures as part of its regulatory capital.

(1) Non-interest expense divided by net interest income plus non-interest income.

(2) Book value is calculated as the total common equity divided by the period ending number of common shares outstanding.

(3) Tangible book value is calculated as the total common equity less total intangible assets and liabilities divided by the period ending number of common shares outstanding.

Net Interest Margin

Net interest margin declined compared to second quarter of 2014, as reductions in investment securities and loan yields offset declines in deposit costs. Declines in yields on investment securities were primarily due to portfolio restructuring. Loan yield declines resulted from increased competition for high quality borrowing relationships in the

marketplace. Net interest margin improved when compared to third quarter of 2013, predominantly due to a shift in the mix of earning assets toward higher-yielding loans and the lower cost of interest bearing liabilities. The growth in the proportion of noninterest bearing deposits over the past several quarters has supported the improvement in net interest margin as well. In second quarter 2014, loan yields and net interest margin were enhanced by 9 and 7 basis points, respectively, due to the collection of \$115,000 in non-accrual interest during the period. There was no similar collection of non-accrual interest during the third quarter of 2014 or 2013.

The improvement in yields on investment securities also enhanced net interest margin between the nine months ending September 30, 2014 and the same period in 2013. This was primarily the result of reducing the proportion of lower yielding cash-equivalent investments to fund loan growth and increasing the proportion of relatively higher-yielding federal government guaranteed mortgage-backed securities.

Reconciliation of Non-GAAP measure:

Tax Equivalent Net Interest Income

Net interest income	\$6,882	\$6,796	\$6,015
Tax equivalent adjustment for municipal loan interest	45	46	46
Tax equivalent adjustment for municipal bond interest	94	120	121
Tax equivalent net interest income	\$7,021	\$6,962	\$6,182

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited.

Management believes that presentation of this non-GAAP measure provides useful information frequently used by shareholders in the evaluation of a company.

Non-GAAP financial measures have limitations as analytical tools and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

(1) Non-accrual loans of approximately \$4.8 million at 09/30/14, \$6.4 million at 06/30/2014, and \$7.8 million for 09/30/2013 are included in the average loan balances.

(2) Loan interest income includes loan fee income of \$152,000, \$180,000, and \$169,000 for the three months ended 09/30/2014, 06/30/2014, and 09/30/2013, respectively.

(3) Tax-exempt income has been adjusted to a tax equivalent basis at a 34% effective rate. The amount of such adjustment was an addition to recorded pre-tax income of \$139,000, \$166,000, and \$167,000 for the three months ended September 30, 2014, June 30, 2014, and September 30, 2013, respectively.

ASSET QUALITY

At September 30, 2014, total adversely classified loans increased in dollars and as a percentage of gross loans from the preceding and year ago quarters. This is the result of designating a \$4.7 million commercial and commercial real estate relationship as adversely classified during the current quarter. Total loans on accruing status 30-89 days past due continue to remain below 1.00% of gross loans, mirroring the improvement in overall credit quality noted previously. Past due loans increased in the current period primarily from a \$2.6 million commercial real estate relationship scheduled to be paid off. We monitor delinquencies, defined as loans on accruing status 30-89 days past due, as an indicator of future adversely classified loans.

At September 30, 2014, total nonperforming loans were down compared to June 30, 2014 and September 30, 2013. Nonperforming assets also declined during this period as a percentage of total assets, despite the increase in OREO during the current quarter. This was primarily due to the payoff of a \$1.0 million non-accrual commercial real estate loan during the current quarter. Nonperforming loans consist primarily of commercial real estate loans.

Allowance for loan losses to total impaired loans	111.12	% 92.13	% 18.99	%	84.81	% 26.31	%

* Adversely classified loans are defined as loans having a well-defined weakness or weaknesses related to the borrower's financial capacity or to pledged collateral that may jeopardize the repayment of the debt. They are

characterized by the possibility that the Bank may sustain some loss if the deficiencies giving rise to the substandard classification are not corrected. Note that any loans internally rated worse than substandard are included in the impaired loan totals.

OREO increased during third quarter 2014, but declined significantly year-over-year. One commercial income property was taken into the OREO portfolio during the quarter. OREO valuation adjustments continued to be minimal. At September 30, 2014, the OREO portfolio consisted of 7 properties, down from both second quarter 2014 and third quarter 2013. The largest balances in the OREO portfolio at the end of the quarter were attributable to commercial properties, followed by residential properties, all of which are located within our market area.

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses continues to decline in relation to total loans in concert with the general trend of improvement in relevant credit metrics. As such, loss factors used in estimates to establish reserve levels have declined commensurately. A provision was made to the allowance for loan losses in the current and prior quarter, corresponding to recent growth in the loan portfolio. No provision was made in third quarter 2013.

For the quarter ended September 30, 2014, total net loan charge-offs were up compared to the quarter ended June 30, 2014, but virtually unchanged versus the quarter ended September 30, 2013. The charge-offs incurred in the third quarter 2014 were primarily centered in one commercial real estate loan, which was written down \$127,000 prior to transfer to OREO. The ratio of net loan charge-offs to average gross loans (annualized) for the current quarter was up compared to the prior quarter, but unchanged from the third quarter one year ago.

The overall risk profile of the loan portfolio continues to improve, as stated above, but more slowly than in recent periods. However, the trend of future provision for loan losses will depend primarily on economic conditions, growth in the loan portfolio, level of adversely-classified assets, and changes in collateral values.

An allowance for loan losses has been established based on management's best estimate, as of the balance sheet date, of probable losses inherent in the loan portfolio. For more information regarding the Company's allowance for loan losses and net loan charge-offs, see the discussion under the subheadings "Loans Receivable" and "Allowance for Credit Losses" included in Note 1 – Summary of Significant Accounting Policies and "Loans" included in Note 4 of the Company's interim financials as presented in this Form 10-Q and audited financial statements as presented in its 2013 10-K.

Overall, we believe that the allowance for loan losses is adequate to absorb probable losses in the loan portfolio at September 30, 2014. There can be no assurance that future loan losses will not exceed our current estimates. The process for determining the adequacy of the allowance for loan losses is significant to our financial results. Please refer to Item 1A “Risk Factors”, together with our discussion of our critical accounting policies in our 2013 Form 10-K for further information.

Liquidity and Sources of Funds

The Bank’s sources of funds include core deposits, loan repayments, advances from the FHLB or the Federal Reserve Bank discount window, brokered deposits, maturities of investment securities, sales of “Available-for-Sale” securities, loan and OREO sales, net income and the use of Federal Funds markets. Stated maturities of investment securities, loan repayments from maturities and core deposits are a relatively stable source of funds, while brokered deposit inflows, unscheduled loan prepayments, and loan and OREO sales are not. Deposit inflows, sales of securities, loan and OREO properties, and unscheduled loan prepayments may, amongst other factors, be influenced by general interest rate levels, interest rates available on other investments, competition, pricing considerations, and general economic conditions.

Deposits are our primary source of funds. Our loan to deposit ratio has increased as a result of loan demand due to the improvement of economic conditions in our region and customer dissatisfaction at other financial institutions from recent merger activity. The increase in loan balances has resulted in increased demands on our liquidity. As such, our current approach to managing our liquidity is directed toward increasing non-interest bearing core deposits from businesses and consumers. We continued to reduce higher cost time deposits during the most recent quarter.

The following table summarizes the primary (on-balance sheet) liquidity, short-term funds availability, net non-core funding dependency, and loan to deposit ratios of the Bank. The primary liquidity ratio represents the sum of net interest-bearing cash/federal funds sold, short-term and readily marketable assets divided by total assets. The short-term funds availability ratio consists of the sum of net interest-bearing cash/federal funds sold, short-term and readily marketable assets and available capacity under borrowing facilities divided by assets. The net non-core funding dependency ratio is non-core liabilities less short-term investments divided by long-term assets. Despite the increase in the loan to deposit ratio due to the loan growth, as previously discussed, the Bank’s primary liquidity, short-term funds availability, and net non-core funding dependency ratios remained strong at quarter end.

	September 30, 2014		December 31, 2013		September 30, 2013	
Primary liquidity	12.8	%	16.3	%	22.1	%
Short term funds availability	25.0	%	29.4	%	30.7	%
Net non-core funding dependency	3.4	%	3.2	%	6.4	%

Gross loans to deposits	85.9	%	80.7	%	78.8	%
-------------------------	------	---	------	---	------	---

An analysis of liquidity should encompass a review of the changes that appear in the consolidated statements of cash flow for the nine months ended September 30, 2014 and 2013. The statement of cash flows includes operating, investing, and financing categories.

At September 30, 2014, the Bank had \$11.5 million in outstanding borrowings against its \$143.8 million in established borrowing capacity with the FHLB. The Bank had \$10.0 million outstanding in borrowings at December 31, 2013 and September 30, 2013. The borrowing capacity at the FHLB was \$143.1 million and \$137.2 million at December 31, 2013 and September 30, 2013, respectively. The Bank's borrowing facility with the FHLB is subject to collateral and stock ownership requirements. The Bank also had an available discount window primary credit line with the Federal Reserve Bank of San Francisco of approximately \$53.6 million, subject to collateral requirements, and \$16.0 million from correspondent banks with no balance outstanding on any of these facilities.

Off-Balance Sheet Arrangements

At September 30, 2014, the Bank had commitments to extend credit and standby letters related to extensions of credit of \$97.9 million compared to \$107.7 million at December 31, 2013 and \$102.1 million at September 30, 2013. Such commitments represented 17.7%, 21.3% and 21.9% of total net loans as of September 30, 2014, December 31, 2013 and September 30, 2013, respectively. Please refer to Note 7 – "Commitments and Contingencies" in the accompanying financial statements for further information.

Critical Accounting Policies

Management has identified the calculation of our allowance for loan losses, goodwill, investment valuation and Other-Than-Temporary-Impairment (OTTI), valuation of OREO, and estimates relating to income taxes as critical accounting policies. Each of these policies are discussed in our 2013 10-K under the heading “Management’s Discussion and Analysis of Financial Condition and Results of Operation – Critical Accounting Policies.”

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk is the risk of loss from adverse changes in market prices and rates. The Company’s market risk arises principally from interest rate risk in its lending, deposit and borrowing activities. Management actively monitors and manages its interest rate risk exposure. Although the Company manages other risks, such as credit quality and liquidity risk, in the normal course of business, Management considers interest rate risk to be a significant market risk, which could have a material effect on the Company’s financial condition and results of operations. Other types of market risks, such as foreign currency exchange rate risk and commodity price risk, do not arise in the normal course of the Company’s business activities. The Company did not experience a significant change in market risk at September 30, 2014, as compared to December 31, 2013.

The Company attempts to monitor interest rate risk from the perspective of changes in the economic value of equity, also referred to as net portfolio value (NPV), and changes in net interest income. Changes to the NPV and net interest income are simulated using instant and permanent rates up and down shocks of various increments. It is the Company’s policy to manage interest rate risk to maximize long-term profitability under the range of likely interest-rate scenarios. For additional information, refer to “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Asset and Liability Management” in the Company’s 2013 10-K.

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

As of the end of the period covered by this report, Pacific Financial Corporation’s Management, with the participation of our Chief Executive Officer and Chief Financial Officer, carried out an evaluation of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, Management, including our Chief Executive Officer and Chief Financial Officer, has concluded that our disclosure controls and procedures were effective, including in timely alerting them to information relating to

us that is required to be included in our periodic SEC filings.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have not been any changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) during our most recent quarter ended September 30, 2014, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time, in the normal course of business, Pacific Financial may become party to various legal actions. Management is unaware of any existing legal actions against the Company or its subsidiaries that Management believes will have a materially adverse impact on our business, financial condition or results of operations.

ITEM 1A. RISK FACTORS

There were no material changes in the risk factors presented in the Company's 2013 10-K.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) Between August 4 and September 30, 2014, the Company sold 139,000 shares of common stock at a price of \$6.50 per share upon exercise of certain warrants originally issued in a private placement transaction completed in 2009. Total proceeds from the exercise of warrants were \$903,500, all of which will be used for general working capital purposes. The Company completed the sales pursuant to the exemption from the registration requirements of the Securities Act of 1933, as amended, provided by Section 4(a)(2) of the Securities Act.

(b) [Not applicable.]

(c) [None.]
