BANCOLOMBIA S.A. (NYSE: CIB; BVC: BCOLOMBIA, PFBCOLOM) REPORTS CONSOLIDATED NET INCOME OF COP 541 BILLION FOR THE THIRD QUARTER OF 2015

Net loan portfolio increased 31.1% during the last twelve months. This loan portfolio growth was driven by commercial and mortgage loans. Also, annual growth was positively affected by the depreciation of the COP versus the USD.

The balance sheet remains strong. 90-day past due loans at the end of 3Q15 were 1.8% of total gross loans (3.1% for 30 days) and the coverage ratio for these past due loans was 211% (119% for 30 days). The solvency ratio was 13.2% with a Tier 1 of 8.0%.

Net interest income grew 31.7% in 3Q15 compared to the third quarter of 2014. This growth in NII is explained by greater volumes in net loans and by a stable NIM.

Fees increased by 19.5% in 3Q15 compared to the third quarter of 2014. This notable growth was mainly driven by an increase in fees related to credit and debit cards, banking services and by the distribution of insurance products through the bank's network.

Efficiency in 3Q15 was 57.4%, which improved when compared to efficiency in the third quarter of 2014. Efficiency in Colombia continues on a positive trend, with operating income growing faster than operating expenses.

Despite a solid operational performance throughout 2015, higher loan loss provisions have impacted net income in 3Q15, thus showing a 3.6% decrease compared to the third quarter of 2014.

1. BALANCE SHEET

1.1. Assets

As of September 30, 2015, Bancolombia's assets totaled COP 174,875 billion, which represents an increase of 10.5% compared to 2Q15 and of 28.8% compared to 3Q14. Of the annual growth in the loan book, 16.2% is explained by the depreciation of the peso against the dollar.

The increase in assets in the quarter and in the year was explained by the organic growth of the loan portfolio as well as by a depreciation of the COP versus the USD of 18.7% during the quarter and 52.7% over the past 12 months.

1.2. Loan Portfolio

The following table shows the composition of Bancolombia's investments and loans by type and currency:

The most relevant aspects regarding the evolution of the loan portfolio during 3Q15 were:

The growth of commercial and mortgage loans during 3Q15 shows a growing credit demand in COP denominated loans compared to previous quarters, spurred by specific disbursements to large corporate clients. Consumer loans

grew over the quarter in line with seasonal factors.

Mortgage loans denominated in COP presented a dynamic performance, growing 4.3% quarter on quarter. The dynamism of mortgage lending in Colombia is explained by lower long-term interest rates, as well as by the Colombian government's interest rate subsidy programs. On the other hand, the mortgage balance denominated in USD from our operation in El Salvador and Panama accounted for 45% of the mortgage loans at the end of 3Q15.

Total reserves (allowances in the balance sheet) for loan losses increased by 8.2% during 3Q15 and totaled COP 5,012 billion, equivalent to 3.7% of gross loans at the end of the quarter. For further explanation regarding coverage of the loan portfolio and credit quality trends, see section "2.4. Asset Quality, Provision Charges and Balance Sheet Strength".

3Q15

1.3. Investment Portfolio

As of September 30, 2015, Bancolombia's net investment portfolio totaled COP 12,987 billion, increasing 1.7% compared to the figure reported in 2Q15 and growing 4.4% compared to 3Q14. This quarterly increase is explained by the bank's strategy that aggressively increased its time deposits in August and invested its excess cash in liquid assets. The investment portfolio consists primarily of debt securities, which represent 93.2% of Bancolombia's total investments and 5.5% of assets at the end of 3Q15.

At the end of 3Q15, the investments in debt securities had a duration of 19.2 months and a yield to maturity of 6.08%.

1.4. Goodwill and intangibles

As of 3Q15, Bancolombia's goodwill and intangibles totaled COP 5,730 billion, increasing 16.1% compared to 2Q15. This variation is explained by the depreciation of the COP against the USD during the quarter.

1.5. Funding

As of September 30, 2015, Bancolombia's liabilities totaled COP 155,024 billion, increasing 11.0% with respect to 2Q15 and 29.8% compared to 3Q14.

Deposits by customers totaled COP 108.933 billion (or 70.3% of liabilities) at the end of 3Q15, increasing 12.1% during the quarter and 28.0% over the last 12 months. The net loans to deposits ratio (including borrowings from domestic development banks) was 112% at the end of 3Q15, which marks a decrease in comparison to the 114% reported in 2Q15, but increasing in regard to the 109% reported in 3Q14.

Bancolombia's funding strategy during the quarter was geared towards increasing its stock of deposits in August while maintaining its liquidity position. This strategy allowed the bank to maintain optimal liquidity levels, despite the rising funding costs. The ultimate goal is to defend the net interest margin and to assure liquidity.

Bancolombia's capital adequacy ratio was 416 basis points above the minimum 9% required by Colombia's regulator, while the basic capital ratio (Tier 1) to risk weighted assets was 7.95%, 345 basis points above the regulatory minimum of 4.5%. 2. INCOME STATEMENT

Net income totaled COP 541 billion in 3Q15, or COP 544.9 per share - USD 0.71 per ADR (excluding discontinued operations). This net income represents a decrease of 22.1% compared to 2Q15 and of 3.6% compared to 3Q14. Bancolombia's annualized ROE for 3Q15 was 11.2%.

2.1. Net Interest Income

Net interest income totaled COP 1,750 billion in 3Q15, 1.4% less than that reported in 2Q15, and 31.4% higher than the figure for 3Q14. The positive annual performance of this line was driven by a higher demand in loan volumes and the depreciation of the COP versus the USD. However, quarterly performance can be explained by a contraction in the net interest margin due to greater funding costs.

During 3Q15, the investment, interest rate derivatives and repos portfolio generated COP 50.2 billion.

Net Interest Margin

The annualized net interest margin decreased to 4.9% in 3Q15, largely explained by the depreciated debt securities in Colombia and higher funding costs.

The annualized net interest margin for investments was -1.3%, lower than the -0.5% of 2Q15 and the annualized net interest margin of the loan portfolio was 5.5%, which is lower than the 6.0% in 2Q15.

Annualized Interest Margin	3Q14	2Q15	3Q15
Loans' Interest margin	5.5 %	6.0 %	5.5 %
Debt investments' margin	-1.2 %	-0.5 %	-1.3 %
Net interest margin	4.8 %	5.4 %	4.9 %

The funding cost increased during 3Q15 and increased slightly due to the gradual reduction of liquidity in the Colombian economy. Savings and checking accounts remained the same as a proportion of the total cost of funding presented last quarter (“2Q15”), and the annualized average weighted cost of deposits was 2.4% in 3Q15, increasing 0.04% compared to 2Q15.

2.2.

Fees and Income from Services

In the 3Q15, certain accounts were reclassified as Fees, since they were previously included in the “Other Income” and “Other Expenses” lines.

During 3Q15, net fees and income from services totaled COP 513 billion, increasing 4.4% with respect to 2Q15 and increasing 19.5% with respect to 3Q14. Fees from credit and debit cards shrunk 0.4% compared to 2Q15 due to a reduction in the volume of transactions. Fees from asset management and trust services increased 2.4% in 2Q15 and 31.8% compared to 3Q14. Fees from our bancassurance business dropped 12.7% compared to 2Q15, but grew 18.5% in respect to 3Q15.
