About Acambis

Acambis is a leading developer of vaccines to prevent and treat infectious diseases. Recognised internationally as the leading producer of smallpox vaccines, Acambis is developing a second-generation smallpox vaccine which is currently undergoing clinical trials and, under a unique arrangement given the threat of smallpox being used as a bioterrorist weapon, is manufacturing emergency-use stockpiles of this investigational vaccine for the US Government and other governments around the world. Acambis is establishing a travel vaccines franchise through its US-based subsidiary Berna Products Corporation, which markets Vivotif[®], the world's only oral typhoid vaccine, in North America. Acambis has a number of other potential travel vaccines in development. A licence application has been submitted to the US Food and Drug Administration for a vaccine against yellow fever and clinical trials are being conducted for vaccines against Japanese encephalitis, travellers diarrhoea and dengue fever. Acambis recently became the first company to start human clinical trials of a vaccine targeting the West Nile virus, which has spread to 45 US States in the last four years.

Acambis is based in Cambridge, UK and Cambridge, Massachusetts, US. Its primary listing is on the London Stock Exchange (ACM) and its shares are listed in the form of American Depositary Receipts on Nasdaq (ACAM). More information is available at www.acambis.com.

Acambis to split NASDAQ-listed ADR

Cambridge, UK and Cambridge, Massachusetts 13 February 2004 Acambis plc (Acambis or the Company) (LSE: ACM, NASDAQ: ACAM), a leading vaccine company, today announces a change in the ratio of its American Depositary Receipts (ADRs), which are traded on NASDAQ.

Since listing on NASDAQ in February 2001, Acambis ADR price has risen from approximately \$18 to around \$60. In order to bring the price in line with other ADRs, the Company will change the ratio from one ADR for 10 ordinary shares to one ADR for two ordinary shares. Acambis ADR holders on record on 20 February 2004 will be issued with four additional ADRs for every ADR held. There is no change to Acambis ordinary shares, whose primary listing continues to be on the London Stock Exchange.

Gordon Cameron, Acting Chief Executive Officer of Acambis, commented:

This is an important step in continuing to ensure accessibility for both institutional and private investors in the US, which reflects our original intention in listing the ADRs on NASDAQ. Acambis itself has a strong US presence, both through its operations in Massachusetts and Florida, and through its products, a number of which are intended for the US market. The ADR provides a mechanism for Acambis to capitalise on that ever-increasing profile.

ARILVAX™ BLA update

Cambridge, UK and Cambridge, Massachusetts 19 February 2004 Acambis plc (Acambis) (LSE: ACM, NASDAQ: ACAM) announces that, following discussions with the US Food and Drug Administration (FDA), it has decided temporarily to withdraw its ARILVAX™ yellow fever vaccine Biologics License Application (BLA) from review by the FDA.

Under FDA regulations, a BLA can only be considered for review by the FDA if the facility at which the product is manufactured is scheduled for a Pre-Approval Inspection (PAI) during the 10-month period following BLA submission. The owner and manufacturer of ARILVAX™, Chiron Vaccines, is bringing forward its plans to upgrade the areas within its Speke plant where the vaccine is manufactured. As a consequence, it is no longer expected that Chiron's facility will be ready for the PAI during the statutory 10-month BLA review period.

Acambis will be working with both the FDA and Chiron Vaccines to minimise the time to re-submission of the BLA. It is currently envisaged that Chiron Vaccines' manufacturing facility will be PAI ready in the first half of 2005, at which time Acambis will re-submit the ARILVAX BLA.

Gordon Cameron appointed CEO of Acambis

Cambridge, UK and Cambridge, Massachusetts 23 February 2004 Acambis plc (Acambis) (LSE: ACM, NASDAQ: ACAM) announces the appointment of Gordon Cameron OBE as Chief Executive Officer of the Company with immediate effect. The appointment follows an extensive international search.

Mr Cameron, 37, joined Acambis in 1996 as Chief Financial Officer after a career in investment banking during which he advised Acambis on its listing on the London Stock Exchange. In March 2001, he was appointed to the additional role of President of the Company's US division, Acambis Inc., and relocated from Cambridge, UK to Cambridge, Massachusetts, US to manage the rapidly expanding US operations.

During his time there, he has overseen a period of significant growth for the Company and was instrumental in Acambis winning a major contract with the US Government to manufacture more than 200 million doses of Acambis' investigational smallpox vaccine. He also oversaw a successful programme to reactivate Acambis' vaccine manufacturing facility in Canton, Massachusetts, and the acquisition of a North American sales and distribution business. He was awarded an OBE in the 2004 Queen's New Year's Honours List for services to the British biotechnology industry in the US.

The recruitment process began in September 2003 when the previous CEO, Dr John Brown, announced he was stepping down from the Board at the end of 2003. In January 2004, Mr Cameron assumed the role of Acting Chief Executive Officer while the process continued to recruit Dr Brown's successor. A search for a suitable individual to fill Mr Cameron's position as Chief Financial Officer will begin immediately.

Commenting on the appointment, Alan Smith, Chairman of Acambis, said:

The Board appointed international recruitment consultants to undertake a thorough search for candidates to become the new CEO of Acambis. I and my colleagues on the Board are delighted that Gordon proved to be the best individual for the job.

As part of the management team that developed Acambis from a small research operation into one of Europe's leading biotechnology companies, Gordon is ideally placed to build on previous successes by adding his own vision for the continued growth and development of Acambis. In this, he is well equipped with considerable financial experience and the extensive industry knowledge he has developed during more than seven years with Acambis. We are confident Gordon will be an outstanding leader and will take Acambis from strength to strength.

Gordon Cameron said:

Acambis has emerged over the past few years as a significant player in the vaccine industry and I am privileged to become its new Chief Executive Officer. I am delighted to be able to lead Acambis into the next stage of its development and look forward to working with the Board and my excellent management team in building Acambis into one of the world's leading vaccine companies.
