Name: J Nicholls

Title: Deputy Secretary

Table of Contents***Interim results for the six months ended 31 December 2005*****STRONG OPERATING PERFORMANCE ON ALL MEASURES****Operational highlights**

North America: continued share gains, especially in spirits where value share in the US is now 28%

Europe: organic operating profit up driven by growth in spirits brands and cost efficiencies

International: very strong top and bottom line growth, particularly in Latin America, driven by growth of priority brands and successful innovation. Performance improvements delivered in Korea, Taiwan and Nigeria

Results at a glance

		First half F 06	First half F 05	Reported movement	Organic movement
Volume in equivalent units	Million	72.6	68.9	5%	5%
	£				
Net sales after deducting excise duties	million	3,960	3,674	8%	5%

Basic eps	Pence	40.4	32.2 [^]	25%	

[^] First half F 05 basic eps before exceptional items restated from 24.1p to 25.0p for IAS 21 amendment adoption and other changes to finance charges. Similarly, first half F 05 basic eps has been restated from 31.3p to 32.2p.

Financial highlights

Spirits net sales after deducting excise duties up 7%, ready to drink down 3%, beer up 4%, wine up 5%

5% organic growth in marketing spend

Further operating margin expansion of 0.2 percentage points on an organic basis

Return on invested capital increased 1.2 percentage points to 16.8%

Free cash flow increased to £651 million

Share buyback doubled to £700 million

Interim dividend increased 5% to 11.95 pence

Strong first half results underpin full year guidance of 7% organic growth in operating profit before exceptional items

		First half F 06	First half F 05	Reported movement
	£			
Operating profit after operating exceptional items	million	1,261	1,169	8%

Profit attributable to parent company's equity shareholders*	£			
	million	1,166	967	21%

Diageo will prepare its annual financial statements for F 06 in accordance with IFRS adopted for use in the European Union. The first half of F 06 is presented on this basis and the first half of F 05 has been restated for IFRS as issued by the IASB, as described in note 1 to the interim financial statements on page 22.

Percentage movements are organic movements unless otherwise stated. These movements and operating margins are before exceptional items. Commentary, unless otherwise stated, refers to organic movements. Share, unless otherwise stated, refers to volume share. See page 32 for additional information for shareholders and an explanation of non-GAAP measures including the reconciliation of basic eps as reported to basic eps as restated and the organic eps movement calculation.

* First half F 05 restated for IAS 21 amendment adoption and other changes to finance charges.

Table of Contents

Paul Walsh, Chief Executive of Diageo, commenting on the interim results said:

This is a strong first half performance. We have invested in our brands and built our market positions. We have again achieved our financial objectives delivering top and bottom line organic growth, organic operating margin improvement and an increase in return on invested capital.

We continue to capitalise on our opportunities in the US where our market leadership and superior route to market have led to further volume share gains of 0.4 percentage points in spirits. In Europe, where we face a more challenging trading environment, we have created a more efficient organisation and this has enabled us to deliver 7% organic operating profit growth in the period. Sustained investment behind our brands in International markets has led to strong top line growth, up 12%. Throughout the business, mix improvement through stronger growth of brands such as Johnnie Walker together with the creation of a lower cost base have led to overall organic margin expansion of 0.2 percentage points.

Strong cash flow and the liquidation of our remaining interest in General Mills and Burger King have enabled us to double our share buy back programme, returning a further £700 million to shareholders in the period.

Material changes to these first half trends are unlikely in the balance of the year and we are therefore comfortable in reiterating our full year guidance of 7% organic operating profit growth .

Key features of the half year

North America

Volume grew 4%, net sales after deducting excise duties increased 7%, marketing spend increased 5% and operating profit improved 5%.

In spirits, excluding ready to drink, strong performance by the priority brands in the US and growth of the higher value reserve brands have been the key drivers, delivering top line mix improvement with net sales after deducting excise duties up 8%. Value share of spirits increased 0.2 percentage points to 28% and volume share was up 0.4 percentage points. Ready to drink net sales after deducting excise duties declined 2%. In beer, net sales excluding excise duties increased 18% as a result of strong growth in Guinness, Red Stripe and Smithwicks. Wine sales were up 6% with good volume growth and mix improvement driven by Sterling wines.

Higher input costs, primarily as a result of the higher oil price and increased costs behind our innovation pipeline, together with the adverse impact of the hurricane season, have constrained operating profit growth.

Europe

Volume was flat, net sales after deducting excise duties were down 1%, marketing spend was down 7% and operating profit increased 7%.

The changes implemented in our European business have resulted in a more profitable organisation focused on future opportunities for profitable top line growth. As a result, although the continued decline in the ready to drink segment has negatively impacted top line growth, operating profit is up and margins have expanded. Spirits volume, excluding ready to drink, grew 2% driven by continued strong growth from Smirnoff vodka, up 9%, and Johnnie Walker, up 2%.

Table of Contents

International

Volume was up 11%, net sales after deducting excise duties grew 12%, marketing spend increased 24% and operating profit was up 12%.

This strong top line performance was driven primarily by the global priority brands, where volume was up 9% in the period, with Johnnie Walker up 12% and Smirnoff up 13%. In addition, category brand growth of 19% was driven by successful innovations in Asia and in Africa. Performance improvements have been delivered in Korea, Taiwan and Nigeria.

Brand performance

	Organic volume* movement %	Reported net sales** movement %	Organic net sales** movement %
Smirnoff vodka	7	13	10
Smirnoff ready to drink	(4)	(3)	(6)
Johnnie Walker	8	10	12
Guinness	(2)	3	2
Baileys	2	2	1
JeB			1
Captain Morgan	10	19	14
Jose Cuervo	5	17	12
Tanqueray	3	8	5
Total global priority brands	4	7	5
Local priority brands	2	8	4
Category brands	8	11	8
Total	5	8	5

* On a reported basis, volume increased by 4% for global priority brands, 2% for local priority brands, 12% for category brands and 5% in total. Differences from the organic volume movements shown above are due to acquisitions and the exclusion of royalty volumes.

** Net sales after deducting excise duties.

Continued high investment in brands as marketing spend again grew in line with sales. Marketing spend was focused behind the priority spirits brands particularly in the fast growing International market.

The acquisition of Bushmills Irish Whiskey for approximately £200 million was completed on 25 August 2005 and the brand is now fully integrated into the Diageo business.

OPERATING AND FINANCIAL REVIEW
For the six months ended 31 December 2005

Percentage movements, unless otherwise stated, are organic movements. These movements and operating margins are before exceptional items. Commentary, unless otherwise stated, refers to organic movements. Share, unless otherwise stated, refers to volume share. See page 32 for additional information for shareholders and an explanation of non-GAAP measures.

OPERATING REVIEW**Analysis by region****North America**

Summary:

Volume was up 4%, net sales after deducting excise duties grew 7% and operating profit increased 5%

In spirits, further share gains have taken Diageo's overall value share to 28%

Top line mix improvement was driven by the global priority brands, Crown Royal and Don Julio

Operating profit growth was constrained by higher raw material costs and increased spend on innovation

Key measures:

	First half F 06 £ million	First half F 05 £ million	Reported movement %	Organic movement %
Volume			4	4
Sales	1,565	1,385	13	7
Net sales after deducting excise duties	1,329	1,168	14	7
Marketing	209	188	11	5
Operating profit before exceptional items	476	454	5	5

Reported performance:

Sales were £1,565 million in the period ended 31 December 2005 up by £180 million from £1,385 million in the comparable period. Operating profit before exceptional items increased by £22 million to £476 million in the period ended 31 December 2005.

Organic performance:

The weighted average exchange rate used to translate US dollar sales and profits moved from £1 = \$1.85 in the six months ended 31 December 2004 to £1 = \$1.76 in the six months ended 31 December 2005. The strengthening of the US dollar resulted in a £60 million increase in sales. Acquisitions added £23 million of sales and there was a further organic increase in sales of £97 million. Operating profit before exceptional items decreased by £2 million as a result of foreign exchange impacts. Acquisitions increased operating profit before exceptional items by £3 million and organic growth of £21 million was achieved.

Table of Contents*Organic brand performance:*

	Organic volume* movement	Reported net sales** movement	Organic net sales** movement
	%	%	%
Smirnoff vodka	6	13	8
Smirnoff ready to drink	(8)	(5)	(9)
Johnnie Walker	4	14	10
Jose Cuervo	5	18	12
Baileys	6	13	9
Captain Morgan	10	22	16
Tanqueray	3	8	5
Guinness	12	18	15
Total global priority brands	5	12	7
Local priority brands	1	10	6
Category brands	2	30	12
Total	4	14	7

* On a reported basis, volume increased by 5% for global priority brands, 1% for local priority brands, 5% for category brands and 4% in total. Differences from the organic volume movements shown above are due to acquisitions.

** Net sales after deducting excise duties

Smirnoff vodka performed strongly, led by the successful media campaign 'Clearly Smirnoff' which leveraged the very positive *New York Times* taste test report. Net sales after deducting excise duties grew 8% on volume increases of 6% due to a price increase on Smirnoff Twist in the first quarter. The first half of the year also saw the introduction of two new Smirnoff Twist flavours, Black Cherry and Lime. Smirnoff vodka growth outpaced the category gaining 0.4 percentage points in value share.

While Smirnoff ready to drink remains the market leader, the ready to drink category continued to decline and Smirnoff ready to drink volume was down 8%.

Strong consumer demand for premium brands drove Johnnie Walker performance, with volume up 4% and net sales after deducting excise duties up 10%. This reflected price increases in some states and stronger growth in Johnnie Walker Black Label and super deluxe variants. The Johnnie Walker brands grew value share by 1.4 percentage points. Although the tequila market has experienced strong pricing pressures, Diageo's strategy has been to hold price and enhance Jose Cuervo's premium positioning. As a result, the brand lost both volume share and value share. Volume grew 5% and net sales after deducting excise duties increased 12% driven by the launch of Cuervo Golden Margaritas, a ready to drink variant.

Baileys volume grew 6% and net sales after deducting excise duties were up 9%. Performance was driven by the test launch of Baileys flavours and good growth in Canada, as the comparable period reflected the strike of the Quebec Liquor Board. For the second consecutive year price increases have been achieved on Baileys.

Captain Morgan continued its strong performance with volume up 10% on the consistent growth in Original Spiced Rum and the introduction of Tattoo and Parrot Bay Passion Fruit. Increased marketing spend behind all Captain Morgan variants helped drive performance. Captain Morgan net sales after deducting excise duties grew 16% and the brand increased its value share by 1.5 percentage points as price increases were implemented in the first half.

Table of Contents

The success of the Tony Sinclair Ready to Tanqueray advertising campaign has returned Tanqueray to growth. Volume grew 3% and net sales after deducting excise duties were up 5% as a result of price increases in selected markets and growth of the super premium variant, Tanqueray 10. The Tanqueray brand outperformed the gin category gaining value share by 1.2 percentage points.

Guinness volume was up 12% as a result of successful advertising and promotions behind several formats. Net sales after deducting excise duties grew 15% as targeted price increases were taken in those markets that did not have price increases the previous year.

The local priority brands performed well despite the impact of the hurricane season on some of the biggest markets. Crown Royal volume grew 5%, net sales after deducting excise duties were up 9% and the brand gained value share by 0.4 percentage points. Crown Royal was able to increase prices in 70% of the states as it built on its sponsorship of NASCAR among key consumer groups. Crown Royal volume growth was partially offset by weakness in Seagram's VO and 7 Crown, with volumes down 7% and 1% respectively, as a result of a portfolio strategy to increase focus on premium brands and de-prioritise lower value brands.

Performance of the California winery local priority brands continued to improve. Sterling volume was up 6% and net sales after deducting excise duties grew 11% driven by a positive mix shift toward more premium Sterling products. Beaulieu Vineyards also grew volume by 8% due to strong growth of its mid-priced Century Cellars brand, resulting in 3% growth in net sales after deducting excise duties. A fire at a third-party warehouse destroyed most of the Sterling Vineyard's 2003 vintage and single-vineyard wines. This will impact performance in the second half and in future years when the wines were expected to be released.

Category brands grew volume by 2% and net sales after deducting excise duties increased 12% due to strong growth of Red Stripe, volume up 27%, Smithwicks, volume up 72% and Don Julio, up 69%.

The development of the newly acquired Chalone brands is progressing well and the brand equity has been leveraged across a number of new variants. Bushmills, which was acquired in August 2005, is now fully integrated. As anticipated, the brand's performance in the first half of the year has been impacted by the stock build which took place prior to acquisition.

Performance was strong in Canada as the comparable period reflected the strike of the Quebec Liquor Board. Volume grew 6% and net sales after deducting excise duties were up 14%. Growth was particularly strong in the global priority brands, with volume up 8% and net sales after deducting excise duties up 18%, driven by a strong performance of Smirnoff ready to drink.

Europe

Summary:

Volume was flat, net sales after deducting excise duties declined 1%, marketing declined 7%, which, together with a more cost efficient organisation, led operating profit to increase 7%

Spirits and wine drove performance with volume up 2% and 5% respectively, offsetting a 24% decline in ready to drink and a 5% decline in beer

Europe remains a difficult trading environment due to increased duties and regulations, and a continued shift from the on-trade to the off-trade in key markets

Table of Contents*Key measures:*

	First half F 06 £ million	First half F 05 £ million	Reported movement %	Organic movement %
Volume			1	0
Sales	2,221	2,244	(1)	0
Net sales after deducting excise duties	1,408	1,450	(3)	(1)
Marketing	225	241	(7)	(7)
Operating profit before exceptional items	494	463	7	7

Reported performance:

Reported sales in Europe in the period ended 31 December 2005 were down £23 million from £2,244 in the comparable period, to £2,221 million. Operating profit before exceptional items increased by 7% from £463 million to £494 million.

Organic performance:

Sales decreased by £14 million as a result of the impact of foreign exchange rates. Acquisitions net of the impact of disposals added sales of £3 million and there was an organic decline in sales of £4 million. The exchange impact results primarily from a weakening of the euro compared to the comparable period in 2004. Operating profit before exceptional items increased by £31 million as a result of £30 million of organic growth and the profit generated by acquisitions of £8 million and an adverse exchange rate movement effect of £3 million. In the calculation of organic growth transfers between business segments reduced prior period sales and operating profit before exceptional items by £8 million and £4 million respectively.

Organic brand performance:

	Organic volume* movement %	Reported net sales** movement %	Organic net sales** movement %
Smirnoff vodka	9	11	10
Smirnoff ready to drink	(22)	(21)	(23)
Johnnie Walker	2	5	6
Guinness	(5)	(3)	(2)
Baileys	(1)	(3)	(3)
JeB	(3)	(4)	(3)
Total global priority brands	0	(2)	(1)
Local priority brands	1	0	1
Category brands	(1)	(6)	(2)
Total	0	(3)	(1)

* On a reported basis, volume was flat for global priority brands, increased by 1% for local priority brands, 4% for category brands and 1% in total. Differences from the organic volume movements shown above are due to acquisitions.

*** Net sales after deducting excise duties*

Smirnoff vodka grew volume 9%, and net sales after deducting excise duties were up 10% due to continued strong performance in Great Britain, Spain and Greece. Further decline of the ready to drink segment in Europe impacted Smirnoff ready to drink and, as a result, volume was down 22% and net sales after deducting excise duties declined 23%.

Table of Contents

Johnnie Walker volume grew 2% and product mix improved due to strong growth of the higher margin Johnnie Walker Black Label and the super deluxe variants, which represent about 15% of total volume. Volume of Johnnie Walker Black Label and super deluxe variants was up 13% and 19% respectively, due to continued growth in Russia, Greece, Spain and Germany. Johnnie Walker Red Label also performed well in Russia and Germany, however its overall volume was flat as a result of more difficult market conditions in Portugal and the Canaries.

Over 90% of Guinness volume in Europe is sold in Great Britain and Ireland. Consequently the declining beer market in both countries heavily impacted performance. Guinness volume was down 5% and net sales after deducting excise duties declined 2%, as pricing offset some of the volume weakness. Guinness was launched in Russia following the new distribution agreement with Heineken, which began in July 2005.

Baileys volume was down 1% as growth in Russia, Italy and France was offset by weakness in Iberia and Benelux. Net sales after deducting excise duties declined 3% due to the decision to reduce focus on Baileys Glide in Great Britain.

The contraction of the standard whisky segment in Portugal and the Canaries offset strong growth in France and Benelux. As a result, JeB volume and net sales after deducting excise duties declined 3%.

Local priority brand volume and net sales after deducting excise duties increased 1%. Growth in spirits brands around the region offset continued weakness of the lager brands in Ireland.

Category brand volume declined 1% and net sales after deducting excise duties were down 2%. Blossom Hill continued to grow in Great Britain while in Spain, Gordon's and standard scotches declined due to aggressive pricing by competitor brands.

Great Britain

In a weak market, Diageo delivered volume growth of 2%. Volume growth of 5% in spirits and 4% in wine offset a 22% decline in ready to drink and a 5% decline in beer. Net sales after deducting excise duties declined 3% mainly as a result of the negative impact of the further decline in the ready to drink segment.

In a growing category, Smirnoff vodka continued to outperform the market. Volume grew 11% and net sales after deducting excise duties were up 13%. Share increased 2.4 percentage points due to a strong marketing programme and consistent promotional activities. Marketing spend increased 4% and improved our share of voice. The ready to drink segment declined 15% and while Smirnoff ready to drink remains the segment leader with a 28% share, volume was down 20%.

Baileys volume declined 1% and net sales after deducting excise duties were down 5% reflecting the reduced focus on Baileys Glide. Excluding ready to drink, Baileys volumes were flat and net sales after deducting excise duties declined 2% as retailers' promotions focused on less profitable SKUs during Christmas.

Local priority brand performance was mixed. Bell's volume grew 10% and the brand increased share by 3.5 percentage points to 19%. New variants and consistent advertising enabled Gordon's to grow volume by 2%, to increase net sales after deducting excise duties by 4% and increase share by 3.2 percentage points. Archers volume was down 20% due to a 37% volume decline of the ready to drink variants.

In a weak beer market, Guinness volume declined 5% but the brand held share. A price increase in February 2005 partially offset volume weakness with net sales after deducting excise duties down 3%.

Category brand volume was up 4% driven by wine performance. There was a shift in the wine market in Great Britain away from French towards New World wines. This dynamic influenced the growth of 12% in Blossom Hill volume and the 19% decline in Piat D'Or volume.

Table of Contents

Ireland

The results for Ireland reflect the continued shift from the on-trade to the off-trade as well as growth in wines and spirits and in the value segment. These market dynamics have a significant impact on performance in Ireland as the majority of Diageo's business is focused on premium brands and the on-trade. Volume and net sales after deducting excise duties declined by 4% and 1% respectively. This was driven by a 6% decline in beer volume, which was only partially offset by a 4% increase in spirits volume and 15% increase in wine volume.

Guinness volume was down 9% but net sales after deducting excise duties declined only 2% due to pricing. The brand lost share, as performance was affected by a particularly hot summer.

In spirits, Smirnoff vodka continues to be the number one vodka brand in Ireland and volume grew 5% while Baileys volume declined 4% due to increased competition from lower value brands.

Local priority brand volume was down 5% driven by the continued decline of the beer brands. Of the agency brands, Carlsberg's performance was stronger due to the launch of successful new advertising, which enabled it to capitalise on the hot summer and slow its volume decline to 1%.

Iberia

Overall, volume in Iberia declined 4% and net sales after deducting excise duties declined 3% driven by the contraction of the scotch category in Portugal and the Canaries. Spain, which accounts for over 80% of Iberia's volume, grew volume by 1% and net sales after deducting excise duties were up 3% due to a price increase on a number of brands in January 2005. The 10% increase in duty implemented by Spanish regulatory authorities in September 2005 has been fully passed on to customers.

JeB volume in Iberia declined 6% driven by a 33% and 41% decline in volumes in Portugal and the Canaries. In Spain, JeB volume and net sales after deducting excise duties were flat. The brand is the leading standard whisky in the Spanish market and gained share by 0.5 percentage points in a category that was down 3%.

In Spain, Johnnie Walker volume grew 12% and net sales after deducting excise duties were up by 15%. Johnnie Walker Black Label volume grew 23% due to strong performance in the high end on-trade. Johnnie Walker Red Label gained share by 0.4 percentage points, while Johnnie Walker Black Label grew share by 0.7 percentage points. Performance was weak in the rest of Iberia due to the rapid decline of the scotch category.

Baileys volume declined 9%. In Spain, although the brand gained share by 0.6 percentage points due to good performance in the off-trade, volume declined 6%.

The local priority brands, Cacique and Cardhu in Spain, delivered a 7% increase in volume and grew net sales after deducting excise duties by 10% due to stronger pricing. Continued growth of the dark rum category and a successful advertising campaign resulted in a 7% increase in Cacique volume. Although share was flat, the brand remains the leader of the dark rum segment with 23% share.

Category brand volume was down 15% driven by the continued decline of standard scotch brands and a significant decrease in Gordon's in Spain due to adverse pricing versus the competition.

Table of Contents**Rest of Europe**

The rest of Europe accounts for a third of Diageo's European business. Total volume was up 3% and net sales after deducting excise duties increased 2%. A 27% decline in ready to drink volume had a negative impact on mix. Performance excluding ready to drink was stronger, with volume up 4% and net sales after deducting excise duties up 5%, driven by strong growth in Greece, Russia and Germany.

Volume in Greece increased 6%. Johnnie Walker volume was up 3% driven by a 17% increase in Johnnie Walker Black Label, which is benefiting from a new advertising campaign. Haig volume was up 30% due to the continued growth of standard scotch in the off-trade. Volume in France declined by 2% as a result of a 36% decline in ready to drink volume. However, in a tough market, JeB grew volume 9% and Baileys volume grew 8%. In Germany, volume was flat, due to a 54% reduction in ready to drink volume. Excluding ready to drink, performance in Germany, as in France, was stronger with volume growth of 2% and a 5% increase in net sales after deducting excise duties. Growth was driven by Johnnie Walker volume, up 14%, led by faster growth of Johnnie Walker Black Label and the super deluxe variants, as well as a 5% increase in Smirnoff vodka volume.

Russia continued its strong growth trajectory with volume up 41%, and net sales after deducting excise duties up 51%. Johnnie Walker and Baileys were the main growth drivers with volume up 41% and 25% respectively. Johnnie Walker Black Label, Johnnie Walker Red Label and Baileys all gained share and are the clear leaders in their segments. Guinness was launched in Russia in July of 2005 as a result of the new distribution agreement with Heineken.

International

Summary:

Volume grew 11%, net sales after deducting excise duties were up 12% and operating profit increased 12%

International's strong performance was across the vast majority of brands and markets

Marketing spend was up 24% with a significant up weight in investment in China, India and Brazil

Key measures:

	First half F 06 £ million	First half F 05 £ million	Reported movement %	Organic movement %
Volume			12	11
Sales	1,533	1,289	19	15
Net sales after deducting excise duties	1,183	1,028	15	12
Marketing	184	143	29	24
Operating profit before exceptional items	371	346	7	12

Reported performance:

Reported sales in the period ended 31 December 2005 were £1,533 million, up £244 million from £1,289 million in the comparable prior period. Operating profit before exceptional items was up 7% at £371 million for the period ended 31 December 2005.

Organic performance:

Sales increased by £36 million as a result of exchange rate impacts. Acquisitions added sales of £10 million and there was an organic increase in sales of £198 million. These factors combined to generate the reported increase of £244 million in the period.

Table of Contents

There was a £25 million increase in reported operating profit before exceptional items. Organic growth added £40 million to operating profit before exceptional items, and acquisitions added a further £1 million; however, these increases were offset by unfavourable exchange rate movements of £14 million. In the calculation of organic growth, transfers between business segments reduced prior period operating profit before exceptional items by £2 million.

Organic brand performance:

	Organic volume* movement %	Reported net sales** movement %	Organic net sales** movement %
Johnnie Walker	12	12	14
Smirnoff vodka	8	18	15
Smirnoff ready to drink	35	47	42
Guinness	(2)	5	2
Baileys	5	4	3
Total global priority brands	9	13	12
Local priority brands	4	13	5
Category brands	19	20	17
Total	11	15	12

* *On a reported basis, volume increased by 9% for global priority brands, 4% for local priority brands, 22% for category brands and 12% in total. Differences from the organic volume movements shown above are due to acquisitions and the exclusion of royalty volumes.*

** *Net sales after deducting excise duties*

Johnnie Walker volume grew 12% driven by growth in Asia and Latin America. Product mix improved due to stronger growth of the super deluxe variants.

Smirnoff ready to drink grew volume 35% and net sales after deducting excise duties increased by 42% due to growth in Brazil, Venezuela, and successful innovations in Australia and South Africa. Smirnoff vodka performance was particularly strong in Brazil, India and Asia Pacific with volume up 15%, 39% and 15% respectively.

Guinness volume declined 2% as difficult trading conditions in Cameroon offset good performances in East Africa, Ghana and Asia. Stronger sales in South Asia and Japan improved mix and as a result, net sales after deducting excise duties were up 2%.

Baileys volume grew 5% due to volume growth in Asia and the test launch of Baileys flavours in Global Duty Free. Net sales after deducting excise duties were only up 3% due to adverse product mix, as the comparable period's volume benefited from the launch of Baileys Glide and Minis in Australia.

Local priority brand volume and net sales after deducting excise duties were up 4% and 5% respectively, due to strong growth of Windsor in Korea, Buchanan's in Venezuela and Malta Guinness and Bell's in Africa.

Category brand volume and net sales after deducting excise duties were up 19% and 17%, respectively. Key drivers of performance were the successful re-launch of Harp in Nigeria and the launch of Benmore and Golden Knight in Thailand.

Table of Contents**Asia Pacific**

In Australia, volume was up 2% and net sales after deducting excise duties were flat as global priority brand growth was offset by a planned reduction in stock levels of ready to drink category brands. Smirnoff volume grew 20% driven by strong growth of Smirnoff ready to drink which increased share by 4.0 percentage points. Johnnie Walker grew volume 9% as a result of strong brand equity building activity. Bundaberg held share even though volume declined 1%, while volume of the ready to drink variant was flat.

In Korea, performance was driven by the renovation of the Windsor brand and the launch of new premium line extensions. A recovering economy also helped stabilise the trading environment for beverage alcohol. Volume was up 6% and net sales after deducting excise duties increased 7%. The launch of a super deluxe variant combined with a 22% increase in marketing spend, led Windsor volume to increase 8%. Both Johnnie Walker and Windsor increased share by 0.6 percentage points.

In Taiwan, volume was up 12%. Johnnie Walker volume increased by 10% and net sales after deducting excise duties were up 13%, driven by 36% growth in volume of the super deluxe variants. The launch of Real Mackenzie, a new whisky brand, in April 2005 increased volume growth but had a dilutive effect on mix.

In Japan, volume grew 3% due to 82% growth in Baileys volume, albeit off a small base, following the national roll out of an up weighted marketing programme. Guinness volume grew 29% as distribution gains continued.

In Thailand, volume was up 73% and net sales after deducting excise duties grew 26%. Benmore and Golden Knight, two new whiskey brands launched in the first half of 2005, drove volume growth but had an adverse impact on mix. Johnnie Walker volume was up 19%, as Johnnie Walker Red Label regained momentum and increased share by 4.3 percentage points in the premium scotch segment due to new promotional activities. Spey Royal grew volume 18% and increased share by 1.0 percentage point as a result of a new, lower-priced strategy aimed at attracting standard scotch consumers. In total, Diageo gained 9.9 percentage points of share in the imported whisky segment in the period.

In India, volume increased 26%, albeit off a small base, due to continued strong growth in global priority brands. Smirnoff vodka delivered the most significant growth with volume up 39% and share up 9.7 percentage points as a result of increased distribution and a successful advertising campaign. Johnnie Walker volume grew 33% driven by continued advertising and increased distribution.

China also experienced rapid growth in volume and net sales after deducting excise duties, driven primarily by an increase in Johnnie Walker volume of 54%. Advertising on Johnnie Walker was upweighted significantly during the period benefiting Johnnie Walker Black Label volume, which was up 75%. A new route to market model also supported growth in Guinness, Baileys and Smirnoff vodka.

Africa

Africa grew volume by 8% and net sales after deducting excise duties by 9%.

In Nigeria, volume and net sales after deducting excise duties were up 17% as turnaround plans started to take hold and a focus on innovation led to improved performance. Harp's successful re-launch in April 2005 is a key driver of Nigeria's recovery. Harp volume more than doubled and share grew by 4.2 percentage points. Guinness volume declined 1%, however, as a result of the launch of Guinness Extra Smooth in June 2005 net sales after deducting excise duties increased by 6%. Malta Guinness returned to growth with volume up 13%.

In East Africa, volume grew 17% and net sales after deducting excise duties were up 8% due to faster growth in low value beers and spirits. Premium beer performance was mixed. Tusker volume was up 2% due to an improved promotional programme, while Pilsner volume declined 1% due to increased competition from lower value beers.

Table of Contents

In South Africa, volume grew 2% while net sales after deducting excise duties were up 11%. Strong growth in Johnnie Walker drove product mix improvement. Smirnoff volume declined 2% as a 23% increase in ready to drink was offset by a significant decline in Smirnoff vodka. Bell's, the leading scotch brand in South Africa, grew volume by 12%. In Ghana, volume grew 15% and net sales after deducting excise duties were up 24%. Guinness grew volume 5% and net sales after deducting excise duties increased by 18%. Malta Guinness benefited from a favourable relative price point compared to soft drinks and as a result volume grew 21%.

Latin America

There was strong growth across Latin America with volume for the region as a whole up 14% and net sales after deducting excise duties up 22%.

In Venezuela, a significant improvement in the environment led to 23% volume growth and a 36% increase in net sales after deducting excise duties. The product mix improvement was driven by the successful launch of Smirnoff ready to drink and strong growth in the super deluxe variants of Johnnie Walker and Buchanan's. Category brands also performed well with volume up 18% and net sales after deducting excise duties increasing by 29% driven by strong growth of Chequers and Ye Monks.

Performance in Brazil, Paraguay and Uruguay benefited from strong economic conditions. Volume was up 27% and net sales after deducting excise duties grew by 45% driven by the strong growth of ready to drink. Johnnie Walker volume increased 33% and net sales after deducting excise duties were 44% higher due to strong growth of the super deluxe variants as the Reserve Brand Group gained traction. Johnnie Walker Red Label and Johnnie Walker Black Label gained share by 7.1 percentage points and 4.2 percentage points respectively. Smirnoff grew volume 19% and net sales after deducting excise duties increased 55% due to strong performance in ready to drink. Smirnoff vodka gained 2.9 percentage points of share and Smirnoff ready to drink increased share by 4.6 percentage points.

Performance in Mexico was strong with overall volume up 28% and net sales after deducting excise duties up 33% primarily driven by growth across the scotch category. Buchanan's increased share by 1.9 percentage points, Johnnie Walker Red Label increased share by 2.6 percentage points and JeB increased share by 1.8 percentage points.

Global Duty Free

Volume grew 13% and net sales after deducting excise duties were up 14% due to strong growth in Europe, Australia and parts of Asia. Smirnoff and the Johnnie Walker super deluxe variants had particularly good performances due to intensive marketing initiatives in airports. Baileys returned to growth due in part to the test launch of Baileys flavours in Europe.

Corporate revenue and costs

Reported sales increased by £12 million to £40 million from £28 million for the comparable prior period. Net corporate operating costs before exceptional items increased by £2 million to £80 million from £78 million in the comparable prior period. Transfers between business regions increased corporate sales by £8 million and decreased operating costs before exceptional items by £6 million.

Adoption of IFRS

The interim results for the period ended 31 December 2005 have been prepared in accordance with International Accounting Standards and International Financial Reporting Standards (IFRS). The results for the comparative period to 31 December 2004 have been restated and are also presented in accordance with IFRS. For further information related to the conversion to IFRS please see the notes to the interim results, specifically note 1 Basis of preparation and note 12 Explanation of transition to IFRS .

Sales and net sales after deducting excise duties

On a reported basis, sales increased by £413 million (8%) from £4,946 million in the period ended 31 December 2004 to £5,359 million in the period ended 31 December 2005. On a reported basis net sales after deducting excise duties increased by £286 million (8%) from £3,674 million in the period ended 31 December 2004 to £3,960 million in the period ended 31 December 2005. Acquisitions and disposals contributed a net increase to reported sales and net sales after deducting excise duties of £36 million and £26 million respectively in the period and foreign exchange rate movements also increased reported sales by £82 million and reported net sales after deducting excise duties by £56 million, principally arising from strengthening of the US dollar.

Operating costs

On a reported basis operating costs before exceptional items increased by £210 million principally due to an increase in cost of goods sold of £146 million and an increase in marketing costs of 8% from £572 million to

Table of Contents

£618 million. There were no exceptional operating costs in the period (2004 £16 million). On a reported basis, operating costs increased by £194 million (8%) from £2,505 million in the period ended 31 December 2004 to £2,699 million in the period ended 31 December 2005. Overall, the impact of exchange rate movements increased total operating costs before exceptional items by £75 million.

Post employment plans

Post employment costs for the period ended 31 December 2005 of £44 million (2004 £43 million) included amounts charged to operating profit of £54 million (2004 £47 million) and finance income of £10 million (2004 £4 million). At 31 December 2005, Diageo's deficit before taxation for all post employment plans was £1,099 million (30 June 2005 £1,294 million).

Operating profit

Operating profit before exceptional items for the period increased by £76 million to £1,261 million from £1,185 million in the comparable prior period. There were no exceptional operating charges in the period ended 31 December 2005, compared to costs in respect of the period ended 31 December 2004 of £16 million. Exchange rate movements reduced operating profit before exceptional items for the six months ended 31 December 2005 by £19 million.

Non-operating exceptional items

Non-operating exceptional items before taxation were a gain of £151 million in the six months ended 31 December 2005 compared with a gain of £218 million in the six months ended 31 December 2004. The gain in the period to 31 December 2005 represents the gain on sale of all of the group's remaining 25 million shares of common stock of General Mills. In the period to 31 December 2004 non-operating exceptional items included a gain of £219 million on the disposal of 54 million shares of common stock of General Mills and a net charge of £1 million in respect of the disposal of businesses.

Finance charges

Finance charges increased by £19 million from £74 million in the period ended 31 December 2004 to £93 million in the six months ended 31 December 2005.

The net interest charge increased by £14 million from £78 million in the comparable prior period to £92 million in the six months ended 31 December 2005. This increase principally resulted from increasing US dollar interest rates, the loss of interest income on the Burger King subordinated debt, the increase in net borrowings in the period and the termination of certain financing arrangements. *IAS 39 Financial instruments: recognition and measurement* had no net impact on the interest charge for the six months ended 31 December 2005.

Other finance charges of £1 million (2004 income of £4 million) included income of £10 million (2004 income of £4 million) in respect of the group's post employment plans. This beneficial movement principally reflects the increase in the value of the assets held by the post employment plans between 1 July 2004 and 30 June 2005. Other finance charges also include a £5 million charge (2004 gain of £3 million) in respect of foreign exchange translation differences on inter-company funding arrangements that do not meet the accounting criteria for recognition in equity.

Table of Contents

Associates

The group's share of profits of associates after interest and tax was £77 million for the period compared to £71 million in the comparable period last year. Diageo's 34% equity interest in Moët Hennessy contributed £71 million to share of profits of associates after interest and tax (2004 - £66 million).

Profit before taxation

After exceptional items, profit before taxation increased by £9 million from £1,392 million to £1,401 million in the six months ended 31 December 2005.

Taxation

The tax charge is based upon the estimate of the average annual effective tax rate expected for the full financial year with the exception of tax in respect of transactions that are presented by the group as exceptional items or tax presented by the group as an exceptional item in its own right which are accounted for in the period in which the items arise.

The effective tax rate before exceptional items for the six months ended 31 December 2005 is 25% compared with 34% for the six months ended 31 December 2004. The higher effective tax rate in the period ended 31 December 2004 mainly resulted from the reduction in the carrying value of deferred tax assets following a change in tax rate.

The effective tax rate for the six months ended 31 December 2005 after exceptional items is 14% compared with 28% for the six months ended 31 December 2004. The effective tax rate in the current period has been reduced following the agreement of certain brand carrying values with fiscal authorities which resulted in recognising an increase in the group's deferred tax assets of £110 million. The profit on disposal arising on the sale of General Mills shares in the period and the comparative period is not subject to tax.

Exchange rates

Based on current exchange rates, it is estimated that in the year ending 30 June 2006 there will be an adverse impact from exchange rate movements on profit before exceptional items and taxation of £30 million (translation exchange only on reported share of profits of associates). Based on current exchange rates it is estimated that the impact from exchange rate movements on profit before exceptional items and taxation for the year ending 30 June 2007 will not be material.

Dividend

An interim dividend of 11.95 pence per share will be paid to holders of ordinary shares and ADR's on the register on 10 March 2006. This represents an increase of 5% on last year's interim dividend. The interim dividend will be paid to shareholders on 6 April 2006. Payment to US ADR holders will be made on 12 April 2006. A dividend reinvestment plan is available in respect of the interim dividend and the plan notice date is 16 March 2006.

In the AGM statement in October 2004 Diageo announced that while final decisions on annual dividends will continue to be taken in the light of earnings performance, inflation and other external factors, the Diageo Board would expect, from February 2006, to hold the company's dividend increase to shareholders to around 5% annually to gradually rebuild dividend cover.

Table of Contents**Cash flow**

Extract from the consolidated cash flow statement

	Six months ended 31 December 2005 £ million	Six months ended 31 December 2004 £ million
Cash generated from operations	957	1,029
Interest paid (net)	(61)	(93)
Dividends paid to equity minority interests	(20)	(25)
Taxation	(118)	(153)
Net purchase of investments	(1)	(2)
Net capital expenditure	(106)	(114)
Free cash flow	651	642

Cash generated from operations decreased from £1,029 million to £957 million in the period to 31 December 2005 principally as a result of a £141 million investment in working capital driven mainly by growth in the underlying business. The decrease in cash generated from operations was principally offset by reduced interest payments (down £32 million to £61 million) and reduced tax payments (down £35 million to £118 million) and as a result free cash flow increased £9 million to £651 million from £642 million in the prior period.

In the six months ended 31 December 2005, Diageo issued new share capital generating proceeds of £2 million (2004 £3 million) and purchased 84.4 million shares as part of the share buy-back programme (2004 48.2 million shares) at a cost of £704 million (2004 £353 million). Diageo's stance on capital structure is unchanged: it continues to target a range of ratios which are currently broadly consistent with an A band credit rating. Diageo expects to continue the share repurchase programme at broadly the current level.

Balance sheet

At 31 December 2005, total equity was £4,789 million compared with £4,626 million at 30 June 2005. This increase was mainly due to the profit for the period of £1,205 million offset by the dividend paid out of shareholders' equity of £529 million and the shares repurchased of £704 million.

Net borrowings were £3,911 million at 31 December 2005, an increase of £208 million from 1 July 2005 net borrowings of £3,703 million. The principal components of this increase were the free cash inflow of £651 million, proceeds from disposal of shares of General Mills of £651 million offset by payments of £704 million (including costs of £4 million) to repurchase shares to be held as treasury shares, the payment of £207 million to acquire Bushmills Irish Whiskey and a £529 million equity dividend paid.

Economic profit

Economic profit increased by £68 million from £400 million in the six months ended 31 December 2004 to £468 million in the six months ended 31 December 2005. See page 39 for calculation and definition of economic profit.

Table of Contents**NOTES****1. Basis of preparation**

For all periods up to and including the year ended 30 June 2005, Diageo prepared its primary financial statements under UK generally accepted accounting principles (UK GAAP). From 1 July 2005, the group is required to prepare its consolidated financial statements in accordance with International Accounting Standards, International Financial Reporting Standards and interpretations of the International Financial Reporting Interpretations Committee (IFRSs) as adopted for use in the European Union (EU). These interim results have been prepared in accordance with IFRSs as expected to be applied in the group's annual financial results for the year ended 30 June 2006. The group accounting policies applied in these interim results are those available on Diageo's website, www.diageo.com with exception of the adoption of the amendment to *IAS 21 – The effects of changes in foreign exchange rates*, the impact of which is outlined below. Further details of the impact of the transition to IFRSs are presented in note 12.

IFRSs are subject to ongoing review and endorsement by the EU or possible amendment by interpretative guidance from the International Accounting Standards Board (IASB) and are therefore still subject to change. Accordingly, the information presented here and the format of presentation may be subject to change as standards are endorsed by the EU, new guidance is issued or practice develops.

IFRS 1 – First-time adoption of International Financial Reporting Standards permits certain optional exemptions from full retrospective application of IFRS accounting policies and the following options have been adopted:

Business combinations: Business combinations prior to the date of transition have not been restated onto an IFRS basis.

Cumulative translation differences: The cumulative translation difference arising on consolidation has been deemed to be zero at the date of transition.

Share-based payments: Full retrospective application has been adopted.

Financial instruments: The group has adopted the provisions of *IAS 39 – Financial instruments: recognition and measurement* and *IAS 32 – Financial instruments: presentation and disclosure* from 1 July 2005. Financial instruments in the year ended 30 June 2005 remain recorded in accordance with previous UK GAAP accounting policies, and the adjustment to IAS 39 is reflected in the balance sheet at 1 July 2005.

The group expects to be able to adopt the amendment to *IAS 21 – The effects of changes in foreign exchange rates* approved by the IASB in November 2005 in its annual financial statements for the year ending 30 June 2006 and therefore has adopted this amendment in the interim financial statements. Whilst passed by the IASB, this amendment has yet to be endorsed by the European Parliament. This amendment clarifies the accounting treatment for net investments in foreign subsidiaries and for the treatment of foreign exchange differences on monetary items which form part of a reporting entity's net investment in a foreign operation.

The effect of implementing this amendment is that a number of intra-group financing arrangements are now regarded as part of the group's net investment in foreign operations and the foreign exchange arising on translation of these balances is recorded in equity. Prior to adoption of the amendment, IAS 21 required the foreign exchange arising on translation of these balances to be taken to income. The effect on implementation of the amendment is to increase the interest charge by £2 million (2004 – decrease of £1 million). Basic and diluted earnings per share for the period ended 31 December 2005 have been decreased by 0.1p (2004 – increased by 0.1p). There is no impact on net assets.

In the process of implementing the amendment to IAS 21, the group reconsidered its interpretation of the wording of the original IAS 21 standard and has identified that other foreign exchange losses of £26 million in the preliminary IFRS information previously published for the period ended 31 December 2004 in respect of intra-group financing arrangements forming part of the group's net investment in foreign operations were originally charged to income and should have been recognised directly in equity. The group has reclassified

Table of Contents

these exchange losses resulting in an increase in other finance income of £26 million in the six months ended 31 December 2004. Basic and diluted earnings per share for the period ended 31 December 2004 have been increased by 0.8p. There is no impact on net assets.

This interim financial information is unaudited but has been reviewed by the auditors, KPMG Audit Plc, and their report is reproduced after these notes. The information does not comprise the statutory accounts of the group. The statutory accounts of Diageo plc for the year ended 30 June 2005, which were prepared under UK GAAP, have been filed with the registrar of companies. KPMG Audit Plc have reported on these accounts; their report was unqualified and did not contain any statement under section 237 of the Companies Act 1985.

2. Business and geographical analyses

Business analysis is presented under the categories of Diageo North America, Diageo Europe, Diageo International and Corporate, reflecting the group's management and internal reporting structure.

Business analysis:

	Six months ended 31 December 2005		Six months ended 31 December 2004	
	Sales	Operating profit/(loss)	Sales	Operating profit/(loss)*
	£ million	£ million	£ million	£ million
North America	1,565	476	1,385	454
Europe	2,221	494	2,244	463
International	1,533	371	1,289	346
	5,319	1,341	4,918	1,263
Corporate	40	(80)	28	(78)
	5,359	1,261	4,946	1,185

Geographical analysis of sales and operating profit by destination:

	Six months ended 31 December 2005		Six months ended 31 December 2004	
	Sales	Operating profit	Sales	Operating profit*
	£ million	£ million	£ million	£ million
Europe	2,292	426	2,296	394
North America	1,581	485	1,405	465
Asia Pacific	561	122	482	120
Latin America	402	106	310	97
Rest of World	523	122	453	109
	5,359	1,261	4,946	1,185

* Operating profit for the period ended 31 December 2004 is before exceptional operating charges of £16 million. Sales and operating profit by geographical destination have been stated according to the location of the third party customers.

Table of Contents

Certain businesses within Diageo International for internal management purposes have been reported within the appropriate market in the geographical analysis above. Corporate sales and operating loss (principally central costs) are incurred in Europe.

Net corporate operating costs and trading losses increased 3% to £80 million. Corporate revenues and costs are in respect of central costs including finance, human resources and legal as well as certain information system, service centre, facilities and employee costs that are not directly allocated to the geographical operating units. They also include the revenues and costs related to rents receivable in respect of properties not used by Diageo in the manufacture, sale or distribution of premium drinks and the results of Gleneagles Hotel.

	31 December 2005 £ million	31 December 2004 £ million
Total assets:		
North America	994	660
Europe	1,563	1,474
International	1,278	1,159
Moët Hennessy	1,304	1,263
Corporate and other	9,553	10,172
	14,692	14,728

Weighted average exchange rates used in the translation of profit and loss accounts were US dollar - £1 = \$1.76 (2004 £1 = \$1.85) and euro £1 = 1.47 (2004 £1 = 1.46). Exchange rates used to translate assets and liabilities at the balance sheet date were US dollar £1 = \$1.72 (2004 £1 = \$1.92) and euro £1 = 1.46 (2004 £1 = 1.42). The group uses foreign exchange transaction hedges to mitigate the effect of exchange rate movements.

The Christmas holiday season provides the peak period for sales. Approximately 30% of annual sales volume occurs in the last three months of each calendar year.

3. Interest and other finance charges

	Six months ended 31 December 2005 £ million	Six months ended 31 December 2004 (restated) £ million
Interest payable	(107)	(135)
Interest receivable	15	57
Net interest	(92)	(78)
Net finance income in respect of post employment plans	10	4
Unwinding of discounts on provisions and debtors	(6)	(3)

Table of Contents**4. Exceptional items**

Following the implementation of IFRS, the group has decided to continue with its separate presentation of certain items as exceptional. These are items which, in management's judgement, need to be disclosed by virtue of their size or incidence in order for the user to obtain a proper understanding of the financial information.

	Six months ended 31 December 2005 £ million	Six months ended 31 December 2004 £ million
Operating costs		
Park Royal brewery accelerated depreciation		(14)
Seagram integration costs		(6)
Disposal of fixed assets		4
		(16)
Disposals		
Shares in General Mills	151	219
Other		(1)
	151	202

5. Income taxes

The £196 million total taxation charge for the six months ended 31 December 2005 comprises a UK tax charge of £50 million and a foreign tax charge of £146 million. Exceptional tax credits amounted to £117 million in the period (2004 - £14 million) reflecting a £110 million increase in the group's deferred tax assets following agreement of certain brand carrying values with fiscal authorities.

6. Dividends

	Six months ended 31 December 2005 £ million	Six months ended 31 December 2004 £ million
Amounts recognised as distributions to equity holders in the period		
Final dividend paid for the year ended 30 June 2005 of 18.2p (2004 - 17.0p) per share	529	512

An interim dividend of 11.95 pence per share for the six months ended 31 December 2005 (2004 - 11.35 pence per share) was approved by the Board on 15 February 2006 and as the approval was after the balance sheet date it has not been included as a liability.

Table of Contents**7. Movements in total equity**

	Six months ended 31 December 2005	Six months ended 31 December 2004
	£ million	(restated) £ million
Total equity at beginning of the period	4,626	
Adoption of IAS 39 on 1 July 2005	164	
Restated total equity at beginning of the period	4,790	5,229
Profit for the period	1,205	1,002
Dividends paid to equity shareholders	(529)	(512)
Dividends paid to minority interests	(20)	(25)
Exchange adjustments	51	8
Tax on exchange adjustments in reserves	7	
New share capital issued	2	3

Other liquid resources	14	506
Foreign currency swaps	(9)	(42)
Net borrowings	(3,911)	(3,484)

In the period ended 31 December 2005 the group issued a US\$ 750 million global bond repayable in 2015 with a coupon of 5.30% and a US\$ 250 million medium term note repayable in 2008 with floating rate coupons. A US\$ 500 million bond matured and was repaid in the period.

11. Contingent liabilities and legal proceedings

(i) Guarantees In connection with the disposal of Pillsbury, Diageo has guaranteed the debt of a third party to the amount of \$200 million (£116 million) until November 2009. Including this guarantee, but net of the amount provided in the consolidated financial statements, the group has given performance guarantees and indemnities to the third parties of £176 million. There has been no material change since 31 December 2005 in the group's performance

guarantees and indemnities.

(ii) Colombian litigation An action was filed on 8 October 2004 in the United States District Court for the Eastern District of New York by the Republic of Colombia and a number of its local government entities against Diageo and other spirits companies. The complaint alleges several causes of action. Included among the causes of action is a claim that the defendants allegedly violated the Federal RICO Act by facilitating money laundering in Colombia through their supposed involvement in the contraband trade to the detriment of government owned spirits production and distribution businesses. The complaint was amended on 29 December 2004 to add eight additional local Colombian government entities as plaintiffs. Diageo intends to defend itself vigorously against this lawsuit.

Table of Contents

(iii) Alcohol advertising litigation At least nine nearly identical putative class actions were filed in state and federal courts in the United States against Diageo plc, Diageo North America Inc and other Diageo entities, along with a large group of other beverage alcohol manufacturers, brewers and importers. All have been brought by the same national counsel. In each action, the plaintiffs seek to pursue their claims on behalf of parents and guardians of people under the legal drinking age who illegally bought alcohol beverages during the period from 1982 to the present.

Plaintiffs allege several causes of action, principally for negligence, unjust enrichment and violation of state consumer fraud statutes. Some complaints include additional claims based on conspiracy, nuisance and on other legal theories. The litigation is ongoing and Diageo intends to defend itself vigorously against these claims.

(iv) Other The group has extensive international operations and is defendant in a number of legal proceedings incidental to these operations. There are a number of legal claims against the group, the outcome of which cannot at present be foreseen.

Save as disclosed above, neither Diageo, nor any member of the Diageo group, is or has been engaged in, nor (so far as Diageo is aware) is there pending or threatened by or against it, any legal or arbitration proceedings which may have a significant effect on the financial position of the Diageo group.

12. Explanation of transition to IFRS

These are the group's first consolidated interim results for part of the period covered by the first annual consolidated financial statements prepared in accordance with IFRS.

The group has adopted the amendment to IAS 21 and accordingly the results for the comparative period have been restated (see note 1 for further information).

In preparing its IFRS balance sheet at the transition date (1 July 2004), comparative information for the six months ended 31 December 2004 and financial statements for the year ended 30 June 2005, the group has adjusted amounts reported previously in financial statements prepared in accordance with UK GAAP. Set out in the following tables is the UK GAAP to IFRS reconciliation of profit for the period for the six months ended 31 December 2004 and year ended 30 June 2005 and a reconciliation of total equity at 1 July 2004, 31 December 2004 and 30 June 2005.

Table of Contents**Reconciliation of profit for the period**

	Year ended 30 June 2005 (restated) £ million	Six months ended 31 December 2004 (restated) £ million
Profit after taxation under UK GAAP	1,439	908
Reversal of goodwill recycled to income statement on disposal (IAS 38)	247	247

Elimination of revaluation reserve (IAS 16)	(111)	(111)	(113)
Other	2	(2)	(6)
Total equity under IFRS	4,626	4,997	5,229
Net impact of implementation of IAS 39	164		
Total equity under IFRS at 1 July 2005	4,790		

In accordance with the exemption available in IFRS 1, the group has adopted IAS 39 *Financial instruments recognition and measurement* and IAS 32 *Financial instruments presentation and disclosure* with effect from 1 July 2005, the principal impact of these standards being to change the carrying value of financial instruments in the group's financial statements. The impact of adoption of these standards on the balance sheet at 1 July 2005 (date of adoption) is set out in the following table:

Table of Contents

	30 June 2005 £ million	Impact of IAS 39 £ million	1 July 2005 £ million	31 December 2005 £ million

INDEPENDENT REVIEW REPORT TO DIAGEO PLC

Introduction

We have been engaged by the company to review the financial information set out on pages 18 to 30 and we have read the other information contained in the interim report and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

This report is made solely to the company in accordance with the terms of our engagement to assist the company in meeting the requirements of the Listing Rules of the Financial Services Authority. Our review has been undertaken so that we might state to the company those matters we are required to state to it in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company for our review work, for this report, or for the conclusions we have reached.

Directors responsibilities

The interim report, including the financial information contained therein, is the responsibility of and has been approved by the directors. The directors are responsible for preparing the interim report in accordance with the Listing Rules which require that the accounting policies and presentation applied to the interim figures should be consistent with those applied in preparing the preceding annual financial statements except where any changes, and the reasons for them, are disclosed.

As disclosed in note 1 to the financial information, the next annual financial statements of the group will be prepared in accordance with IFRSs adopted for use in the European Union.

The accounting policies that have been adopted in preparing the financial information are consistent with those that the directors currently intend to use in the next annual financial statements. There is, however, a possibility that the directors may determine that some changes to these policies are necessary when preparing the full annual financial statements for the first time in accordance with those IFRSs adopted for use by the European Union. This is because, as disclosed in note 1, the directors have anticipated that the amendment to *IAS 21 The effects of changes in foreign exchange rates*, which has yet to be formally adopted for use in the EU, will be so adopted in time to be applicable to the next annual financial statements.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 Review of interim financial information issued by the Auditing Practices Board for use in the United Kingdom. A review consists principally of making enquiries of group management and applying analytical procedures to the financial information and underlying financial data and, based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review is substantially less in scope than an audit performed in accordance with Auditing Standards and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the financial information.

Review conclusion

On the basis of our review we are not aware of any material modifications that should be made to the financial information as presented for the six months ended 31 December 2005.

**ADDITIONAL INFORMATION FOR SHAREHOLDERS
EXPLANATORY NOTES**

Definitions

Unless otherwise stated, percentage movements given throughout this announcement for volume, sales, net sales after deducting excise duties, marketing and operating profit are organic movements (at level exchange rates and after adjusting for acquisitions and disposals) for continuing operations. They are before exceptional items. Comparisons are with the equivalent period in the last financial year. For an explanation of organic movements please refer to Diageo's annual report for the year ended 30 June 2005 and Reconciliation to GAAP measures in this announcement.

Volume has been measured on an equivalent units basis to nine litre cases of spirits. An equivalent unit represents one nine litre case of spirits, which is approximately 272 servings. A serving comprises 33ml of spirits, 165ml of wine, or 330ml of ready to drink or beer. Therefore, to convert volume of products, other than spirits, to equivalent units, the following guide has been used: beer in hectolitres divide by 0.9, wine in nine litre cases divide by five and ready to drink in nine litre cases divide by 10.

Net sales are sales less excise duties.

Exceptional items are those that in management's judgement need to be disclosed by virtue of their size or incidence in order for the user to obtain a proper understanding of the financial information. Such items are included within the income statement caption to which they relate.

References to ready to drink include flavoured malt beverages in the United States. References to Smirnoff ready to drink include Smirnoff Ice, Smirnoff Black Ice, Smirnoff Twisted V, Smirnoff Mule, Smirnoff Spin, Smirnoff Caesar and Smirnoff Signatures. References to Smirnoff Black Ice include Smirnoff Ice Triple Black in the United States.

Volume share is a brand's volume when compared to the volume of all brands in its segment. Value share is a brand's retail sales when compared to the retail sales of all brands in its segment. The share data contained in this announcement is taken from independent industry sources in the markets in which Diageo operates. Unless otherwise stated, share refers to volume share.

Share of voice is the media spend of a particular brand when compared to all brands in its segment. The share of voice data in this announcement is taken from independent industry sources in the markets in which Diageo operates. This announcement contains forward-looking statements that involve risk and uncertainty. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors beyond Diageo's control. Please refer to page 40 - Cautionary statement concerning forward-looking statements for more details.

This announcement includes names of Diageo's products which constitute trademarks or trade names which Diageo owns or which others own and license to Diageo for its use.

Table of Contents

Reconciliation to GAAP measures

(i) Organic movement

Organic movement in volume, sales, net sales after deducting excise duties, operating profit before exceptional items and basic earnings per share are measures not specifically used in the consolidated financial statements themselves (non-GAAP measures). The performance of the group is discussed using these measures.

In the discussion of the performance of the business, certain information is presented using sterling amounts on a constant currency basis. This strips out the effect of foreign exchange rate movements and enables an understanding of the underlying performance of the market that is most closely influenced by the actions of that market's management. The risk from foreign exchange is managed centrally and is not a factor over which local managers have any control.

Acquisitions and disposals also impact the reported performance and therefore the reported movement in any period in which they arise. Management adjusts for the impact of such transactions in assessing the performance of the underlying business.

The underlying performance on a constant currency basis and excluding the impact of acquisitions and disposals is referred to as organic performance. Organic movement calculations enable the reader to focus on the performance of the business which is common to both periods.

Organic movement in volume, sales, net sales after deducting excise duties, and operating profit before exceptional items

Diageo's strategic planning and budgeting process is based on organic movement in volume, sales, net sales after deducting excise duties and operating profit before exceptional items, and these measures closely reflect the way in which operating targets are defined and performance is monitored by the group's management. Therefore organic movement measures most closely reflect the way in which the business is managed.

These measures are chosen for planning, budgeting, reporting and incentive purposes since they represent those measures which local managers are most directly able to influence and they enable consideration of the underlying business performance without the distortion caused by fluctuating exchange rates, acquisitions and disposals.

The group's management believes these measures provide valuable additional information for users of the financial statements in understanding the group's performance since they provide information on those elements of performance which local managers are most directly able to influence and focus on that element of the core brand portfolio which is common to both periods. They should be viewed as complementary to, and not a replacement for, the comparable GAAP measures: sales, net sales after deducting excise duties and reported movements in individual income statement captions. These GAAP measures reflect all of the factors which impact on the business.

The organic movement calculations for volume, sales, net sales after deducting excise duties and operating profit before exceptional items for the six months ended 31 December 2005 were as follows:

Table of Contents**1. Volume**

Table of Contents**Notes Information relating to the current period**

- (1) Results for 2004 have been restated for the impacts of implementing IFRS.
- (2) Transfers represents the reallocation of the Guinness Storehouse visitor centre in Dublin from Europe into the corporate business segment and the transfer of the costs relating to a global information technology project from Corporate into Europe and International.
- (3) The exchange adjustments for sales, net sales after deducting excise duties and operating profit before exceptional items are principally in respect of the US dollar.
- (4) Acquisitions in the period ended 31 December 2005 are only in respect of the acquisition of The Old Bushmills Distillery Company Limited. Acquisitions impacting the calculation of organic growth in the period were in respect of the acquisition of The Chalone Wine Group (North America), Ursus Vodka Holdings B.V. (Europe) and Ghana Breweries Limited (International). Disposals affecting the period are only the disposal of United Beverages Limited (Europe) which contributed sales, net sales after deducting excise duties and operating profit before exceptional items of £16 million, £16 million and £nil respectively in the six months ended 31 December 2004.

Notes Information relating to the organic movement calculations

- a) The organic movement percentage is the amount in the column headed *Organic movement* in the table above expressed as a percentage of the aggregate of the columns headed *2004 Reported*, *Transfers*, *Exchange* and the values for disposals (see note 4 above) from the column headed *Acquisitions and disposals*. The inclusion of the column headed *Exchange* in the organic movement calculation reflects the adjustment to exclude the effect of exchange rate movements by recalculating the prior period results as if they had been generated at the current period's exchange rates. Organic movement percentages are calculated as the organic movement amount in £ million, expressed as the percentage of the prior period results at current year exchange rates and after adjusting for disposals. The basis of calculation means that the results used to measure organic movement for a given period will be adjusted when used to measure organic movement in the subsequent period.
- b) Where a business, brand, brand distribution right or agency agreement was disposed of, or terminated, in the current period, the group, in organic movement calculations, adjusts the results for the comparable prior period to exclude the amount the group earned in that period that it could not have earned in the current period (i.e. the period between the date in the prior period, equivalent to the date of the disposal in the current period, and the end of the prior period). As a result, the organic movement numbers reflect only comparable performance. Similarly, if a business was disposed of part way through the equivalent prior period then its contribution would be completely excluded from that prior period's performance in the organic movement calculation, since the group recognised no contribution from that business in the current period. In the calculation of operating profit before exceptional items the overheads included in disposals were only those directly attributable to the businesses disposed, and do not result from subjective judgements of management. For acquisitions, a similar adjustment is made in the organic movement calculations. For acquisitions subsequent to the end of the equivalent prior period, the post acquisition results in the current period are excluded from the organic movement calculations. For acquisitions in the prior period, post acquisition results are included in full in the prior period but are only included from the anniversary of the acquisition date in the current period.
- c) A further adjustment in organic movement is made to exclude the effect of exchange rate movements by recalculating the prior period's results as if they had been generated at the current period's exchange rates.

Table of Contents**Organic movement in earnings per share**

The group's management believes basic earnings per share on a reported and organic movement basis, provides valuable additional information for users of the financial statements in understanding the group's overall performance. The group's management believe that the comparison of movements on both a reported and organic basis provides information as to the individual components of the movement in basic earnings per share being: the impact of exceptional items, fluctuating exchange rates, acquisitions and disposals arising in the period and changes in the effective rate of tax. These measures should be viewed as complementary to, and not a replacement for, the comparable GAAP measures such as basic and diluted earnings per share and reported movements thereon. These GAAP measures reflect all of the factors which impact on the business.

The organic movement calculation in earnings per share for the six months ended 31 December 2005 was as follows:

	p per share
	(5)
Reported basic eps for period ended 31 December 2004	32.2
Exceptional items (1)	(7.2)
Basic eps before exceptional items for period ended 31 December 2004	25.0
Disposals (2) (a)	0.3
Exchange (3) (d)	(1.1)
Tax equalisation to 25% (4)	3.9
Restated basic eps for period ended 31 December 2004	28.1
Reported basic eps for period ended 31 December 2005	40.4
Exceptional items (1)	(9.3)
Acquisitions (2) (b)	(0.1)
Exchange (3) (d)	0.1
Basic eps before exceptional items for the period ended 31 December 2005	31.1
Reported basic eps movement amount	8.2p
Basic eps before exceptional items movement amount	6.1p
Organic movement amount (c)	3.0p
Reported basic eps growth	25%
Basic eps before exceptional items growth	24%
Organic growth (c)	11%

Notes Information relating to the current period

- 1) The exceptional items (after tax and attributable to equity shareholders) reported by the group for the period ended 31 December 2005 were a gain of £268 million (2004 a gain of £216 million) equating to 9.3 pence per share for the period ended 31 December 2005 and 7.2 pence per share for the period ended 31 December 2004.
- 2) Acquisitions in the period ended 31 December 2005 are in respect of the acquisition of The Old Bushmills Distillery Company Limited. Acquisitions impacting the calculation of organic growth in the period were in respect of the acquisition of The Chalone Wine Group (North America), Ursus Vodka Holdings B.V. (Europe) and Ghana Breweries Limited (International). Disposals affecting the period are the disposal of United Beverages Limited (Europe) and the impact of the disposal of 25 million shares of the common stock of General Mills. Acquisitions contributed 0.1 pence per share for the period ended 31 December 2005.

Table of Contents

- 3) *Exchange* The exchange adjustments for operating profit before exceptional items, net finance charges and taxation before exceptional items are principally in respect of the US dollar. Transaction exchange adjustments are taxed at the effective tax rate for the period. Exchange had an adverse impact of 0.1 pence per share for the period ended 31 December 2005.
- 4) *Tax equalisation* the impact of equalising the effective rate of tax on profit before exceptional items and tax from the reported rate to 25%. The group's underlying effective rate of tax before exceptional items is expected to be 25%.

This adjustment is expected to be applied in the financial year ending 30 June 2006 only. The group adopted IFRS in the period ended 31 December 2005 and the group's results for the period ended 31 December 2004 have been restated from UK GAAP to IFRS. Under IFRS the effective rate of tax on profit before exceptional items for the period ended 31 December 2004 was 34%, the equivalent rate under UK GAAP was 24%. The increase in the effective tax rate under IFRS arose primarily as a result of the implementation of IAS 12 Income taxes in respect of the recognition of movements in deferred tax.

- 5) *All amounts are derived from amounts in £ million divided by the weighted average number of shares in issue for the period to 31 December 2005 of 2,886 million (2004 2,999 million).*

Notes Information relating to the organic movement calculations

- a) *Where a business, brand, brand distribution right or agency agreement or investment was disposed of, or terminated, in the current period, the group, in organic movement calculations, adjusts the profit for the period attributable to equity shareholders for the comparable prior period to exclude the following: i) the amount the group earned in that period that it could not have earned in the current period (i.e. the period between the date in the prior period, equivalent to the date of the disposal in the current period, and the end of the prior period), ii) a capital return in respect of the reduction in interest charge had the disposal proceeds been used entirely to reduce borrowings, and iii) taxation at the rate applying in the jurisdiction in which the asset or business disposed was domiciled. As a result, the organic movement numbers reflect only comparable performance. Similarly, if a business or investment asset was disposed of part-way through the equivalent prior period then its impact on the profit for the year attributable to equity shareholders (i.e. after adjustment for a capital return from use of the proceeds of the disposal to reduce borrowings and tax at the rate applying in the jurisdiction in which the asset or business disposed was taxed) would be completely excluded from that prior period's performance in the organic movement calculation, since the group recognised no contribution from that business in the current period.*
- b) *Where a business, brand, brand distribution right or agency agreement or investment is acquired subsequent to the end of the equivalent prior period, the group, in organic movement calculations adjusts the profit for the current period attributable to equity shareholders to exclude the following: i) the amount the group earned in the current period that it could not have earned in the prior period, ii) a capital charge in respect of the increase in interest charge had the acquisition been funded entirely by an increase in borrowings, and iii) taxation at the rate applying in the jurisdiction in which the business acquired is domiciled. As a result, the organic movement numbers reflect only comparable performance. Similarly, if a business or investment asset was acquired part way through the equivalent prior period then its impact on the profit for the year attributable to equity shareholders (i.e. after adjustment for a capital charge for the funding of the acquisition and tax at the rate applying in the jurisdiction in which the acquired business is taxed) would be adjusted in that prior period's performance in the organic movement calculation, since the group recognised a full period's contribution from that business in the current period.*
- c) *Organic movement percentages for basic earnings per share are calculated as the organic movement amount in pence (p), expressed as the percentage of the prior period results at current year exchange rates, and after adjusting for exceptional items, tax equalisation and acquisitions and disposals. The*

Table of Contents

basis of calculation means that the results used to measure organic movement for a given period will be adjusted when used to measure organic movement in the subsequent period.

d) The exchange effects of IAS 21 in respect of short term intercompany funding balances as recognised in other finance charges / income are removed from both the current and prior period as part of the organic movement calculation.

(ii) Free cash flow

Free cash flow is a non-GAAP measure that comprises net cash from operating activities as well as the net purchase and disposal of investments and property, plant and equipment that form part of net cash from investing activities. The group's management believe the measure assists users of the financial statements in understanding the group's cash generating performance as it comprises items that arise from the running of the ongoing business.

The remaining components of net cash from investing activities that do not form part of free cash flow, as defined by the group's management, relate to the purchase and disposal of subsidiaries, associates and businesses. The group's management regards the purchase and disposal of property, plant and equipment as ultimately non-discretionary since ongoing investment in plant and machinery is required to support the day-to-day operations, whereas purchases and disposals of businesses are discretionary. However, free cash flow does not necessarily reflect all amounts that the group either has a constructive or legal obligation to incur. Where appropriate, separate discussion is given for the impacts of acquisitions and disposals of businesses, equity dividends and purchase of own shares each of which arises from decisions that are independent from the running of the ongoing underlying business.

The free cash flow measure is also used by management for their own planning, budgeting, reporting and incentive purposes since it provides information on those elements of performance which local managers are most directly able to influence.

(iii) Return on average total invested capital

Return on average total invested capital is a non-GAAP measure that is used by management to assess the return obtained from the group's asset base. This measure is not specifically used in the consolidated financial statements, but is calculated to aid comparison of the performance of the business.

The profit used in assessing the return on total invested capital reflects the operating performance of the business after the effective tax rate for the period stated before exceptional items and interest. Average total invested capital is calculated using the average derived from the consolidated balance sheets at the beginning and the end of the period. Capital employed comprises net assets for the period, excluding post employment benefit liabilities (net of deferred tax) and net borrowings. This average total invested capital is aggregated with restructuring and integration costs net of tax, which have been charged to exceptional items, and goodwill written off to reserves at 1 July 2004 being the date of transition to IFRS.

Calculations for the return on average total invested capital for the six months ended 31 December 2005 and 31 December 2004 were as follows:

Table of Contents

	2005 £ million	2004 £ million
<i>Operating profit before exceptional items</i>	1,261	1,185
<i>Associates after interest and taxation</i>	77	71
<i>Dividends receivable from investments</i>	5	8
<i>Effective tax rate 25% (2004 25%)*</i>	(336)	(316)
	1,007	948
<i>Average net assets</i>	5,671	5,880
<i>Average net borrowings</i>	3,807	3,820
<i>Average integration costs (net of tax)</i>	931	916
<i>Average goodwill</i>	1,562	1,562
<i>Average total invested capital</i>	11,971	12,178
<i>Return on average total invested capital</i>	16.8%	15.6%

* The effective tax rate for 2004 has been adjusted to 25% to achieve a comparable measure in the year of IFRS adoption (2004 effective tax rate under IFRS was 34%)

(iv) Economic profit

Economic profit is a non-GAAP measure that is used by management to assess the group's return from its asset base compared to a standard cost of capital charge. The measure is not specifically used in the consolidated financial statements, but is calculated to aid comparison of the performance of the business.

The profit used in assessing the return from the group's asset base and the asset base itself are the same as those used in the calculation for the return on average total invested capital (see (iii) above). The standard capital charge applied to the average total invested capital is currently 9%, being management's assessment of a constant minimum level of return that the group expects to generate from its asset base. Economic profit is calculated as the difference between the standard capital charge on the average invested assets and the actual return achieved by the group on those assets.

Calculations for economic profit for the six months ended 31 December 2005 and 31 December 2004 were as follows:

	2005 £ million	2004 £ million
<i>Average total invested capital (see (iii) above)</i>	11,971	12,178
<i>Operating profit before exceptional items</i>	1,261	1,185
<i>Associates after interest and taxation</i>	77	71
<i>Dividends receivable from investments</i>	5	8
<i>Effective tax rate 25% (2004 25%)*</i>	(336)	(316)
	1,007	948
<i>Capital charge at 9% of average total invested capital (50% half year)</i>	(539)	(548)

Economic profit

468

400

* *The effective tax rate for 2004 has been adjusted to 25% to achieve a comparable measure in the year of IFRS adoption (2004 effective tax rate under IFRS was 34%)*

Cautionary statement concerning forward-looking statements

This document contains statements with respect to the financial condition, results of operations and business of Diageo and certain of the plans and objectives of Diageo with respect to these items. These forward-looking statements are made pursuant to the Safe Harbor provisions of the United States Private Securities Litigation Reform Act of 1995. In particular, all statements that express forecasts, expectations and projections with respect to future matters, including trends in results of operations, margins, growth rates, overall market trends, the impact of interest or exchange rates, the availability of financing to Diageo, anticipated cost savings or synergies and the completion of Diageo's strategic transactions, are forward-looking statements. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements, including factors that are outside Diageo's control. These factors include, but are not limited to:

increased competitive product and pricing pressures and unanticipated actions by competitors that could impact Diageo's market share, increase expenses and hinder growth potential;

the effects of future business combinations, partnerships, acquisitions or disposals, existing or future, and the ability to realise expected synergies and/or costs savings;

Diageo's ability to complete existing or future acquisitions and disposals;

legal and regulatory developments, including changes in regulations regarding consumption of, or advertising for, beverage alcohol, changes in accounting standards, taxation requirements, such as the impact of excise tax increases with respect to the business, environmental laws and the laws governing pensions;

developments in the alcohol advertising class actions and any similar proceedings or other litigation directed at the drinks and spirits industry;

developments in the Colombian litigation and any similar proceedings;

changes in consumer preferences and tastes, demographic trends or perception about health related issues;

changes in the cost of raw materials and labour costs;

changes in economic conditions in countries in which Diageo operates, including changes in levels of consumer spending;

levels of marketing, promotional and innovation expenditure by Diageo and its competitors;

renewal of distribution rights on favourable terms when they expire;

termination of existing distribution rights on agency brands;

technological developments that may affect the distribution of products or impede Diageo's ability to protect its intellectual property rights; and

Table of Contents

changes in financial and equity markets, including significant interest rate and foreign currency exchange rate fluctuations, which may affect Diageo's access to or increase the cost of financing or which may affect Diageo's financial results.

All oral and written forward-looking statements made on or after the date of this announcement and attributable to Diageo are expressly qualified in their entirety by the above factors and the risk factors contained in the annual report on Form 20-F for the year ended 30 June 2005 filed with the US Securities and Exchange Commission. Any forward-looking statements made by or on behalf of Diageo speak only as of the date they are made. Diageo does not undertake to update forward-looking statements to reflect any changes in Diageo's expectations with regard thereto or any changes in events, conditions or circumstances on which any such statement is based. The reader should, however, consult any additional disclosures that Diageo may make in documents it files with the US Securities and Exchange Commission.

The information in this announcement does not constitute an offer to sell or an invitation to buy shares in Diageo plc or any other invitation or inducement to engage in investment activities.

This document includes disclosure about Diageo's debt rating. A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating organisation. Each rating should be evaluated independently of any other rating.

Past performance cannot be relied upon as a guide to future performance.

Table of Contents**For further information**

Diageo's interim results presentation to analysts and investors will be broadcast at 09.30 (UK time) on Thursday 16 February 2006. The presentation will be available on the Diageo website www.diageo.com and also at www.cantos.com. Prior to the event the presentation slides will also be available to download from Diageo's home page.

You will be able to listen to a live broadcast of the presentation and to the question and answer session. The number to call is:

France	+33 1 70 75 00 02
Germany	+49 69 2222 52100
Ireland	+353 1 246 0034
Netherlands	+31 20 710 0075
Spain	+34 91 414 15 45
UK	+44 20 7019 0810
USA (toll free)	1 877 951 7311
	Passcode: Diageo results

After the presentation the slides and accompanying text will be available to download from Diageo's homepage. You will be able to view a recording of the presentation and question and answer session on the Diageo website from 14.00 (UK time) on the day. This facility will be available until 16 March 2006.

A press conference will take place beginning at 12.30 (UK time) on Thursday 16 February and will be broadcast live from a link on www.diageo.com.

Diageo management will host a conference call for analysts and investors at 15.00 (UK time) on Thursday 16 February 2005. Call this number to participate:

France	+33 1 70 75 00 02
Germany	+49 69 2222 52100
