SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements contained in this annual report, and certain statements contained in our future filings with the Securities and Exchange

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Commission (the "SEC" or the "Commission"), in our press releases or in our other public or shareholder communications may not be based on historical facts and are "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements, which are based on various assumptions (some of which are beyond our control), may be identified by reference to a future period or periods or by the use of forward-looking terminology, such as "may," "will," "believe," "expect," "anticipate," "continue," or similar terms or variations on those terms or the negative of those terms. Actual results could differ materially from those set forth in forward-looking statements due to a variety of factors, including, but not limited to:

- o changes in interest rates,
- o changes in the yield curve,
- o changes in prepayment rates,
- o the availability of mortgage-backed securities and other securities for purchase,
- o the availability of financing,
- o changes in the market value of our assets,
- o changes in business conditions and the general economy,
- o risks associated with the investment advisory business of our wholly owned subsidiary, Fixed Income Discount Advisory Company (which we refer to as FIDAC), including:
 - o the removal by FIDAC's clients of assets FIDAC manages,
 - o FIDAC's regulatory requirements, and
 - o competition in the investment advisory business,
- o changes in government regulations affecting our business, and
- o our ability to maintain our qualification as a REIT for federal income tax purposes.

For a discussion of the risks and uncertainties which could cause actual results to differ from those contained in the forward-looking statements, please see the information under the caption "Risk Factors" described in this Form 10-K. We do not undertake, and specifically disclaim any obligation, to publicly release the result of any revisions which may be made to any forward-looking statements to reflect the occurrence of anticipated or unanticipated events or circumstances after the date of such statements.

(i)

PART I

ITEM 1. BUSINESS

THE COMPANY

Background

Annaly Capital Management, Inc. owns, manages, and finances a portfolio

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

of investment securities, including mortgage pass-through certificates, collateralized mortgage obligations (or CMOs), agency callable debentures, and other securities representing interests in or obligations backed by pools of mortgage loans. Our principal business objective is to generate net income for distribution to our stockholders from the spread between the interest income on our investment securities and the cost of borrowings to finance our acquisition of investment securities. We are a Maryland corporation that commenced operations on February 18, 1997. We are self-advised and self-managed. We acquired Fixed Income Discount Advisory Company (or FIDAC) on June 4, 2004. FIDAC is a registered investment advisor and is our taxable REIT subsidiary. We also own a majority interest in an investment fund.

We have financed our purchases of investment securities with the net proceeds of equity offerings and borrowings under repurchase agreements whose interest rates adjust based on changes in short-term market interest rates.

We have elected and believe that we are organized and have operated in a manner that qualifies us to be taxed as a real estate investment trust (or REIT) under the Internal Revenue Code of 1986, as amended (or the Code). If we qualify for taxation as a REIT, we generally will not be subject to federal income tax on our taxable income that is distributed to our stockholders. Therefore, substantially all of our assets, other than FIDAC, our taxable REIT subsidiary, consist of qualified REIT real estate assets (of the type described in Section 856(c)(5)(B) of the Code). We have financed our purchases of investment securities with the net proceeds of equity offerings and borrowings under repurchase agreements whose interest rates adjust based on changes in short-term market interest rates.

As used herein, "Annaly," the "Company," "we," "our" and similar terms refer to Annaly Capital Management, Inc., unless the context indicates otherwise. We changed our name to Annaly Capital Management, Inc. from Annaly Mortgage Management, Inc. on August 2, 2006.

Assets

Under our capital investment policy, at least 75% of our total assets must be comprised of high-quality mortgage-backed securities and short-term investments. High quality securities means securities that (1) are rated within one of the two highest rating categories by at least one of the nationally recognized rating agencies, (2) are unrated but are guaranteed by the United States government or an agency of the United States government, or (3) are unrated but we determine them to be of comparable quality to rated high-quality mortgage-backed securities.

The remainder of our assets, comprising not more than 25% of our total assets, may consist of other qualified REIT real estate assets which are unrated or rated less than high quality, but which are at least "investment grade" (rated "BBB" or better by Standard & Poor's Corporation ("S&P") or the equivalent by another nationally recognized rating agency) or, if not rated, we determine them to be of comparable credit quality to an investment which is rated "BBB" or better. In addition, we may directly or indirectly invest part of this remaining 25% of our assets in other types of securities, including without limitation, unrated debt, equity or derivative securities, to the extent consistent with our REIT qualification requirements. The derivative securities in which we invest may include securities representing the right to receive interest only or a disproportionately large amount of interest, as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics.

We may acquire mortgage-backed securities backed by single-family residential mortgage loans as well as securities backed by loans on multi-family, commercial or other real estate-related properties. To date, all

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

of the mortgage-backed securities that we have acquired have been backed by single-family residential mortgage loans.

To date, all of the mortgage-backed securities that we have acquired have been agency mortgage-backed securities which, although not rated, carry an implied "AAA" rating. Agency mortgage-backed securities are mortgage-backed securities for which a government agency or federally chartered corporation, such as the Federal Home Loan Mortgage Corporation ("FHLMC"), the Federal National Mortgage Association ("FNMA"), or the Government National Mortgage Association ("GNMA"), guarantees payments of principal or interest on the securities. Agency mortgage-backed securities consist of agency pass-through certificates and CMOs issued or guaranteed by an agency. Pass-through certificates provide for a pass-through of the monthly interest and principal payments made by the borrowers on the underlying mortgage loans. CMOs divide a pool of mortgage loans into multiple tranches with different principal and interest payment characteristics.

5

At December 31, 2006, approximately 20% of our investment securities were adjustable-rate pass-through certificates, approximately 72% of our investment securities were fixed-rate pass-through certificates or CMOs, and approximately 8% of our investment securities were CMO floaters. Our adjustable-rate pass-through certificates are backed by adjustable-rate mortgage loans and have coupon rates which adjust over time, subject to interest rate caps and lag periods, in conjunction with changes in short-term interest rates. Our fixed-rate pass-through certificates are backed by fixed-rate mortgage loans and have coupon rates which do not adjust over time. CMO floaters are tranches of mortgage-backed securities where the interest rate adjusts in conjunction with changes in short-term interest rates. CMO floaters may be backed by fixed-rate mortgage loans or, less often, by adjustable-rate mortgage loans. In this Form 10-K, except where the context indicates otherwise, we use the term "adjustable-rate securities" or "adjustable-rate investment securities" to refer to adjustable-rate pass-through certificates, CMO floaters, and Agency debentures. At December 31, 2006, the weighted average yield on our portfolio of earning assets was 5.63% and the weighted average term to next rate adjustment on adjustable rate securities was 19 months.

We may also invest in Federal Home Loan Bank ("FHLB"), FHLMC, and FNMA debentures. We refer to the mortgage-backed securities and agency debentures collectively as "Investment Securities." We intend to continue to invest in adjustable-rate pass-through certificates, fixed-rate mortgage-backed securities, CMO floaters, and Agency debentures. We may also invest on a limited basis in mortgage derivative securities such as interest rate swaps, and other derivative securities which include securities representing the right to receive interest only or a disproportionately large amount of interest as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics. We have not and will not invest in real estate mortgage investment conduit ("REMIC") residuals and other CMO residuals

Borrowings

We attempt to structure our borrowings to have interest rate adjustment indices and interest rate adjustment periods that, on an aggregate basis, correspond generally to the interest rate adjustment indices and periods of our adjustable-rate investment securities. However, periodic rate adjustments on our borrowings are generally more frequent than rate adjustments on our investment securities. At December 31, 2006, the weighted average cost of funds for all of our borrowings was 5.14%, the weighted average original term to maturity was 194 days, and the weighted average term to next rate adjustment of these borrowings was 125 days.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

We generally expect to maintain a ratio of debt-to-equity of between 8:1 and 12:1, although the ratio may vary from time to time depending upon market conditions and other factors that our management deems relevant. For purposes of calculating this ratio, our equity is equal to the value of our investment portfolio on a mark-to-market basis, less the book value of our obligations under repurchase agreements and other collateralized borrowings. At December 31, 2006, our ratio of debt-to-equity was 10.4:1.

Hedging

To the extent consistent with our election to qualify as a REIT, we enter into hedging transactions to attempt to protect our investment securities and related borrowings against the effects of major interest rate changes. This hedging would be used to mitigate declines in the market value of our investment securities during periods of increasing or decreasing interest rates and to limit or cap the interest rates on our borrowings. These transactions would be entered into solely for the purpose of hedging interest rate or prepayment risk and not for speculative purposes.

6

Compliance with REIT and Investment Company Requirements

We constantly monitor our investment securities and the income from these securities and, to the extent we enter into hedging transactions, we monitor income from our hedging transactions as well, so as to ensure at all times that we maintain our qualification as a REIT and our exempt status under the Investment Company Act of 1940, as amended.

Executive Officers of the Company

The following table sets forth certain information as of February 23, 2007 concerning our executive officers:

Name ----	Age ---	Position held with the Compa -----
Michael A.J. Farrell	55	Chairman of the Board, Chief Executive Officer
Wellington J. Denahan-Norris	43	Vice Chairman of the Board, Chief Investment Operating Officer
Kathryn F. Fagan	40	Chief Financial Officer and Treasurer
R. Nicholas Singh	48	Executive Vice President, General Counsel, Se Compliance Officer
James P. Fortescue	33	Executive Vice President and Head of Liabilit
Kristopher Konrad	32	Executive Vice President and Co-Head Portfol
Rose-Marie Lyght	33	Executive Vice-President and Co-Head Portfol
Jeremy Diamond	43	Managing Director

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Ronald Kazel

39

Managing Director

Mr. Farrell and Ms. Denahan-Norris have an average of 25 years experience in the investment banking and investment management industries where, in various capacities, they have each managed portfolios of mortgage-backed securities, arranged collateralized borrowings and utilized hedging techniques to mitigate interest rate and other risk within fixed-income portfolios. Ms. Fagan is a certified public accountant and, prior to becoming our Chief Financial Officer and Treasurer, served as Chief Financial Officer and Controller of a publicly owned savings and loan association. Mr. Singh joined Annaly in February 2005. Prior to that, he was a partner in the law firm of McKee Nelson LLP, and prior to that, a partner in Sidley Austin Brown & Wood LLP. Mr. Fortescue joined Annaly in 1997. Mr. Konrad joined Annaly in 1997. Ms. Lyght joined Annaly in April 1999. Mr. Diamond joined Annaly in March 2002. From 1990 to 2002 he was President of Grant's Financial Publishing. Mr. Kazel joined Annaly in December 2001. Prior to that he was a Senior Vice-President in Friedman Billings Ramsey's financial services investment banking group. We had 34 full-time employees at December 31, 2006.

Distributions

To maintain our qualification as a REIT, we must distribute substantially all of our taxable income to our stockholders for each year. We have done this in the past and intend to continue to do so in the future. We also have declared and paid regular quarterly dividends in the past and intend to do so in the future. We have adopted a dividend reinvestment plan to enable holders of common stock to reinvest dividends automatically in additional shares of common stock.

BUSINESS STRATEGY

General

Our principal business objective is to generate income for distribution to our stockholders, primarily from the net cash flows on our investment securities. Our net cash flows result primarily from the difference between the interest income on our investment securities and borrowing costs of our repurchase agreements and from dividends we receive from FIDAC. To achieve our business objective and generate dividend yields, our strategy is:

- |X| to purchase mortgage-backed securities, the majority of which we expect to have adjustable interest rates based on changes in short-term market interest rates;

7

- |X| to acquire mortgage-backed securities that we believe:
 - we have the necessary expertise to evaluate and manage;
 - we can readily finance;
 - are consistent with our balance sheet guidelines and risk management objectives; and
 - provide attractive investment returns in a range of scenarios;

- |X| to finance purchases of mortgage-backed securities with the proceeds of equity offerings and, to the extent permitted by our capital investment policy, to utilize leverage to increase potential returns to stockholders through borrowings;

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

- |X| to attempt to structure our borrowings to have interest rate adjustment indices and interest rate adjustment periods that, on an aggregate basis, generally correspond to the interest rate adjustment indices and interest rate adjustment periods of our adjustable-rate mortgage-backed securities;
- |X| to seek to minimize prepayment risk by structuring a diversified portfolio with a variety of prepayment characteristics and through other means; and
- |X| to issue new equity or debt and increase the size of our balance sheet when opportunities in the market for mortgage-backed securities are likely to allow growth in earnings per share.

We believe we are able to obtain cost efficiencies through our facilities-sharing arrangement with FIDAC and by virtue of our management's experience in managing portfolios of mortgage-backed securities and arranging collateralized borrowings. We will strive to become even more cost-efficient over time by:

- |X| seeking to raise additional capital from time to time in order to increase our ability to invest in mortgage-backed securities;
- |X| striving to lower our effective borrowing costs by seeking direct funding with collateralized lenders, rather than using financial intermediaries, and investigating the possibility of using commercial paper and medium term note programs;
- |X| improving the efficiency of our balance sheet structure by investigating the issuance of uncollateralized subordinated debt, preferred stock and other forms of capital; and
- |X| utilizing information technology in our business, including improving our ability to monitor the performance of our investment securities and to lower our operating costs.

8

Mortgage-Backed Securities

General

To date, all of the mortgage-backed securities that we have acquired have been agency mortgage-backed securities which, although not rated, carry an implied "AAA" rating. Agency mortgage-backed securities are mortgage-backed securities where a government agency or federally chartered corporation, such as FHLMC, FNMA or GNMA, guarantees payments of principal or interest on the securities. Agency mortgage-backed securities consist of agency pass-through certificates and CMOs issued or guaranteed by an agency.

Even though to date we have only acquired mortgage backed securities with an implied "AAA" rating, under our capital investment policy, we have the ability to acquire securities of lower quality. Under our policy, at least 75% of our total assets must be high quality mortgage-backed securities and short-term investments. High quality securities are securities (1) that are rated within one of the two highest rating categories by at least one of the nationally recognized rating agencies, (2) that are unrated but are guaranteed by the United States government or an agency of the United States government, or (3) that are unrated or whose ratings have not been updated but that our management determines are of comparable quality to rated high quality

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

mortgage-backed securities.

Under our capital investment policy, the remainder of our assets, comprising not more than 25% of total assets, may consist of mortgage-backed securities and other qualified REIT real estate assets which are unrated or rated less than high quality, but which are at least "investment grade" (rated "BBB" or better by S&P or the equivalent by another nationally recognized rating organization) or, if not rated, we determine them to be of comparable credit quality to an investment which is rated "BBB" or better. In addition, we may directly or indirectly invest part of this remaining 25% of our assets in other types of securities, including without limitation, unrated debt, equity or derivative securities, to the extent consistent with our REIT qualification requirements. The derivative securities in which we invest may include securities representing the right to receive interest only or a disproportionately large amount of interest, as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics. We intend to structure our portfolio to maintain a minimum weighted average rating (including our deemed comparable ratings for unrated mortgage-backed securities) of our mortgage-backed securities of at least single "A" under the S&P rating system and at the comparable level under the other rating systems.

Our allocation of investments among the permitted investment types may vary from time-to-time based on the evaluation by our board of directors of economic and market trends and our perception of the relative values available from these types of investments, except that in no event will our investments that are not high quality exceed 25% of our total assets.

We intend to acquire only those mortgage-backed securities that we believe we have the necessary expertise to evaluate and manage, that are consistent with our balance sheet guidelines and risk management objectives and that we believe we can readily finance. Since we generally hold the mortgage-backed securities we acquire until maturity, we generally do not seek to acquire assets whose investment returns are attractive in only a limited range of scenarios. We believe that future interest rates and mortgage prepayment rates are very difficult to predict. Therefore, we seek to acquire mortgage-backed securities which we believe will provide acceptable returns over a broad range of interest rate and prepayment scenarios.

At December 31, 2006, our mortgage-backed securities consist of pass-through certificates and collateralized mortgage obligations issued or guaranteed by FHLMC, FNMA or GNMA. We have not, and will not, invest in REMIC residuals and other CMO residuals.

Description of Mortgage-Backed Securities

The mortgage-backed securities that we acquire provide funds for mortgage loans made primarily to residential homeowners. Our securities generally represent interests in pools of mortgage loans made by savings and loan institutions, mortgage bankers, commercial banks and other mortgage lenders. These pools of mortgage loans are assembled for sale to investors (like us) by various government, government-related and private organizations.

Mortgage-backed securities differ from other forms of traditional debt securities, which normally provide for periodic payments of interest in fixed amounts with principal payments at maturity or on specified call dates. Instead, mortgage-backed securities provide for a monthly payment, which consists of both interest and principal. In effect, these payments are a "pass-through" of the monthly interest and principal payments made by the individual borrower on the mortgage loans, net of any fees paid to the issuer or guarantor of the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

securities. Additional payments result from prepayments of principal upon the sale, refinancing or foreclosure of the underlying residential property, net of fees or costs which may be incurred. Some mortgage-backed securities, such as securities issued by GNMA, are described as "modified pass-through." These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, regardless of whether the mortgagors actually make mortgage payments when due.

The investment characteristics of pass-through mortgage-backed securities differ from those of traditional fixed-income securities. The major differences include the payment of interest and principal on the mortgage-backed securities on a more frequent schedule, as described above, and the possibility that principal may be prepaid at any time due to prepayments on the underlying mortgage loans or other assets. These differences can result in significantly greater price and yield volatility than is the case with traditional fixed-income securities.

Various factors affect the rate at which mortgage prepayments occur, including changes in interest rates, general economic conditions, the age of the mortgage loan, the location of the property and other social and demographic conditions. Generally prepayments on mortgage-backed securities increase during periods of falling mortgage interest rates and decrease during periods of rising mortgage interest rates. We may reinvest prepayments at a yield that is higher or lower than the yield on the prepaid investment, thus affecting the weighted average yield of our investments.

To the extent mortgage-backed securities are purchased at a premium, faster than expected prepayments result in a faster than expected amortization of the premium paid. Conversely, if these securities were purchased at a discount, faster than expected prepayments accelerate our recognition of income.

CMOs may allow for shifting of prepayment risk from slower-paying tranches to faster-paying tranches. This is in contrast to mortgage pass-through certificates where all investors share equally in all payments, including all prepayments, on the underlying mortgages.

FHLMC Certificates

FHLMC is a privately-owned government-sponsored enterprise created pursuant to an Act of Congress on July 24, 1970. The principal activity of FHLMC currently consists of the purchase of mortgage loans or participation interests in mortgage loans and the resale of the loans and participations in the form of guaranteed mortgage-backed securities. FHLMC guarantees to each holder of FHLMC certificates the timely payment of interest at the applicable pass-through rate and ultimate collection of all principal on the holder's pro rata share of the unpaid principal balance of the related mortgage loans, but does not guarantee the timely payment of scheduled principal of the underlying mortgage loans. The obligations of FHLMC under its guarantees are solely those of FHLMC and are not backed by the full faith and credit of the United States. If FHLMC were unable to satisfy these obligations, distributions to holders of FHLMC certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of FHLMC certificates.

FHLMC certificates may be backed by pools of single-family mortgage loans or multi-family mortgage loans. These underlying mortgage loans may have original terms to maturity of up to 40 years. FHLMC certificates may be issued under cash programs (composed of mortgage loans purchased from a number of sellers) or guarantor programs (composed of mortgage loans acquired from one seller in exchange for certificates representing interests in the mortgage loans purchased).

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

FHLMC certificates may pay interest at a fixed rate or an adjustable rate. The interest rate paid on adjustable-rate FHLMC certificates ("FHLMC ARMs") adjusts periodically within 60 days prior to the month in which the interest rates on the underlying mortgage loans adjust. The interest rates paid on certificates issued under FHLMC's standard ARM programs adjust in relation to the Treasury index. Other specified indices used in FHLMC ARM programs include the 11th District Cost of Funds Index published by the Federal Home Loan Bank of San Francisco, LIBOR and other indices. Interest rates paid on fully-indexed FHLMC ARM certificates equal the applicable index rate plus a specified number of basis points. The majority of series of FHLMC ARM certificates issued to date have evidenced pools of mortgage loans with monthly, semi-annual or annual interest adjustments. Adjustments in the interest rates paid are generally limited to an annual increase or decrease of either 100 or 200 basis points and to a lifetime cap of 500 or 600 basis points over the initial interest rate. Certain FHLMC programs include mortgage loans which allow the borrower to convert the adjustable mortgage interest rate to a fixed rate. Adjustable-rate mortgages which are converted into fixed-rate mortgage loans are repurchased by FHLMC or by the seller of the loan to FHLMC at the unpaid principal balance of the loan plus accrued interest to the due date of the last adjustable rate interest payment.

10

FNMA Certificates

FNMA is a privately-owned, federally-chartered corporation organized and existing under the Federal National Mortgage Association Charter Act. FNMA provides funds to the mortgage market primarily by purchasing home mortgage loans from local lenders, thereby replenishing their funds for additional lending. FNMA guarantees to the registered holder of a FNMA certificate that it will distribute amounts representing scheduled principal and interest on the mortgage loans in the pool underlying the FNMA certificate, whether or not received, and the full principal amount of any such mortgage loan foreclosed or otherwise finally liquidated, whether or not the principal amount is actually received. The obligations of FNMA under its guarantees are solely those of FNMA and are not backed by the full faith and credit of the United States. If FNMA were unable to satisfy its obligations, distributions to holders of FNMA certificates would consist solely of payments and other recoveries on the underlying mortgage loans and, accordingly, defaults and delinquencies on the underlying mortgage loans would adversely affect monthly distributions to holders of FNMA.

FNMA certificates may be backed by pools of single-family or multi-family mortgage loans. The original term to maturity of any such mortgage loan generally does not exceed 40 years. FNMA certificates may pay interest at a fixed rate or an adjustable rate. Each series of FNMA ARM certificates bears an initial interest rate and margin tied to an index based on all loans in the related pool, less a fixed percentage representing servicing compensation and FNMA's guarantee fee. The specified index used in different series has included the Treasury Index, the 11th District Cost of Funds Index published by the Federal Home Loan Bank of San Francisco, LIBOR and other indices. Interest rates paid on fully-indexed FNMA ARM certificates equal the applicable index rate plus a specified number of basis points. The majority of series of FNMA ARM certificates issued to date have evidenced pools of mortgage loans with monthly, semi-annual or annual interest rate adjustments. Adjustments in the interest rates paid are generally limited to an annual increase or decrease of either 100 or 200 basis points and to a lifetime cap of 500 or 600 basis points over the initial interest rate. Certain FNMA programs include mortgage loans which allow the borrower to convert the adjustable mortgage interest rate of the ARM to a fixed rate. Adjustable-rate mortgages which are converted into fixed-rate

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

mortgage loans are repurchased by FNMA or by the seller of the loans to FNMA at the unpaid principal of the loan plus accrued interest to the due date of the last adjustable rate interest payment. Adjustments to the interest rates on FNMA ARM certificates are typically subject to lifetime caps and periodic rate or payment caps.

GNMA Certificates

GNMA is a wholly owned corporate instrumentality of the United States within the Department of Housing and Urban Development ("HUD"). The National Housing Act of 1934 authorizes GNMA to guarantee the timely payment of the principal of and interest on certificates which represent an interest in a pool of mortgages insured by the Federal Housing Administration ("FHA") or partially guaranteed by the Department of Veterans Affairs and other loans eligible for inclusion in mortgage pools underlying GNMA certificates. Section 306(g) of the Housing Act provides that the full faith and credit of the United States is pledged to the payment of all amounts which may be required to be paid under any guaranty by GNMA.

At present, most GNMA certificates are backed by single-family mortgage loans. The interest rate paid on GNMA certificates may be a fixed rate or an adjustable rate. The interest rate on GNMA certificates issued under GNMA's standard ARM program adjusts annually in relation to the Treasury index. Adjustments in the interest rate are generally limited to an annual increase or decrease of 100 basis points and to a lifetime cap of 500 basis points over the initial coupon rate.

11

Single-Family and Multi-Family Privately-Issued Certificates

Single-family and multi-family privately-issued certificates are pass-through certificates that are not issued by one of the agencies and that are backed by a pool of conventional single-family or multi-family mortgage loans. These certificates are issued by originators of, investors in, and other owners of mortgage loans, including savings and loan associations, savings banks, commercial banks, mortgage banks, investment banks and special purpose "conduit" subsidiaries of these institutions.

While agency pass-through certificates are backed by the express obligation or guarantee of one of the agencies, as described above, privately-issued certificates are generally covered by one or more forms of private (i.e., non-governmental) credit enhancements. These credit enhancements provide an extra layer of loss coverage in the event that losses are incurred upon foreclosure sales or other liquidations of underlying mortgaged properties in amounts that exceed the equity holder's equity interest in the property. Forms of credit enhancements include limited issuer guarantees, reserve funds, private mortgage guaranty pool insurance, over-collateralization and subordination.

Subordination is a form of credit enhancement frequently used and involves the issuance of classes of senior and subordinated mortgage-backed securities. These classes are structured into a hierarchy to allocate losses on the underlying mortgage loans and also for defining priority of rights to payment of principal and interest. Typically, one or more classes of senior securities are created which are rated in one of the two highest rating levels by one or more nationally recognized rating agencies and which are supported by one or more classes of mezzanine securities and subordinated securities that bear losses on the underlying loans prior to the classes of senior securities. Mezzanine securities, as used in this Form 10-K, refers to classes that are rated below the two highest levels, but no lower than a single "B" rating under

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

the S&P rating system (or comparable level under other rating systems) and are supported by one or more classes of subordinated securities which bear realized losses prior to the classes of mezzanine securities. Subordinated securities, as used in this Form 10-K, refers to any class that bears the "first loss" from losses from underlying mortgage loans or that is rated below a single "B" level (or, if unrated, we deem it to be below that level). In some cases, only classes of senior securities and subordinated securities are issued. By adjusting the priority of interest and principal payments on each class of a given series of senior-subordinated mortgage-backed securities, issuers are able to create classes of mortgage-backed securities with varying degrees of credit exposure, prepayment exposure and potential total return, tailored to meet the needs of sophisticated institutional investors.

Collateralized Mortgage Obligations and Multi-Class Pass-Through Securities

We may also invest in CMOs and multi-class pass-through securities. CMOs are debt obligations issued by special purpose entities that are secured by mortgage loans or mortgage-backed certificates, including, in many cases, certificates issued by government and government-related guarantors, including, GNMA, FNMA and FHLMC, together with certain funds and other collateral. Multi-class pass-through securities are equity interests in a trust composed of mortgage loans or other mortgage-backed securities. Payments of principal and interest on underlying collateral provide the funds to pay debt service on the CMO or make scheduled distributions on the multi-class pass-through securities. CMOs and multi-class pass-through securities may be issued by agencies or instrumentalities of the U.S. Government or by private organizations. The discussion of CMOs in the following paragraphs is similarly applicable to multi-class pass-through securities.

In a CMO, a series of bonds or certificates is issued in multiple classes. Each class of CMOs, often referred to as a "tranche," is issued at a specific coupon rate (which, as discussed below, may be an adjustable rate subject to a cap) and has a stated maturity or final distribution date. Principal prepayments on collateral underlying a CMO may cause it to be retired substantially earlier than the stated maturity or final distribution date. Interest is paid or accrues on all classes of a CMO on a monthly, quarterly or semi-annual basis. The principal and interest on underlying mortgages may be allocated among the several classes of a series of a CMO in many ways. In a common structure, payments of principal, including any principal prepayments, on the underlying mortgages are applied to the classes of the series of a CMO in the order of their respective stated maturities or final distribution dates, so that no payment of principal will be made on any class of a CMO until all other classes having an earlier stated maturity or final distribution date have been paid in full.

12

Other types of CMO issues include classes such as parallel pay CMOs, some of which, such as planned amortization class CMOs ("PAC bonds"), provide protection against prepayment uncertainty. Parallel pay CMOs are structured to provide payments of principal on certain payment dates to more than one class. These simultaneous payments are taken into account in calculating the stated maturity date or final distribution date of each class which, as with other CMO structures, must be retired by its stated maturity date or final distribution date but may be retired earlier. PAC bonds generally require payment of a specified amount of principal on each payment date so long as prepayment speeds on the underlying collateral fall within a specified range.

Other types of CMO issues include targeted amortization class CMOs (or TAC bonds), which are similar to PAC bonds. While PAC bonds maintain their

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

amortization schedule within a specified range of prepayment speeds, TAC bonds are generally targeted to a narrow range of prepayment speeds or a specified prepayment speed. TAC bonds can provide protection against prepayment uncertainty since cash flows generated from higher prepayments of the underlying mortgage-related assets are applied to the various other pass-through tranches so as to allow the TAC bonds to maintain their amortization schedule.

A CMO may be subject to the issuer's right to redeem the CMO prior to its stated maturity date, which may diminish the anticipated return on our investment. Privately-issued CMOs are supported by private credit enhancements similar to those used for privately-issued certificates and are often issued as senior-subordinated mortgage-backed securities. We will only acquire CMOs or multi-class pass-through certificates that constitute debt obligations or beneficial ownership in grantor trusts holding mortgage loans, or regular interests in REMICs, or that otherwise constitute qualified REIT real estate assets under the Internal Revenue Code (provided that we have obtained a favorable opinion of our tax advisor or a ruling from the IRS to that effect).

Adjustable-Rate Mortgage Pass-Through Certificates and Floating Rate Mortgage-Backed Securities

Most of the mortgage pass-through certificates we acquire are adjustable-rate mortgage pass-through certificates. This means that their interest rates may vary over time based upon changes in an objective index, such as:

- o LIBOR or the London Interbank Offered Rate. The interest rate that banks in London offer for deposits in London of U.S. dollars.
- o Treasury Index. A monthly or weekly average yield of benchmark U.S. Treasury securities, as published by the Federal Reserve Board.
- o CD Rate. The weekly average of secondary market interest rates on six-month negotiable certificates of deposit, as published by the Federal Reserve Board.

These indices generally reflect short-term interest rates. The underlying mortgages for adjustable-rate mortgage pass-through certificates are adjustable-rate mortgage loans ("ARMs").

We also acquire CMO floaters. One or more tranches of a CMO may have coupon rates that reset periodically at a specified increment over an index such as LIBOR. These adjustable-rate tranches are sometime known as CMO floaters and may be backed by fixed or adjustable-rate mortgages.

There are two main categories of indices for adjustable-rate mortgage pass-through certificates and floaters: (1) those based on U.S. Treasury securities, and (2) those derived from calculated measures such as a cost of funds index or a moving average of mortgage rates. Commonly utilized indices include the one-year Treasury note rate, the three-month Treasury bill rate, the six-month Treasury bill rate, rates on long-term Treasury securities, the 11th District Federal Home Loan Bank Costs of Funds Index, the National Median Cost of Funds Index, one-month or three-month LIBOR, the prime rate of a specific bank, or commercial paper rates. Some indices, such as the one-year Treasury rate, closely mirror changes in market interest rate levels. Others, such as the 11th District Home Loan Bank Cost of Funds Index, tend to lag changes in market interest rate levels. We seek to diversify our investments in adjustable-rate mortgage pass-through certificates and floaters among a variety of indices and reset periods so that we are not at any one time unduly exposed to the risk of interest rate fluctuations. In selecting adjustable-rate mortgage pass-through certificates and floaters for investment, we will also consider the liquidity of the market for the different mortgage-backed securities.

We believe that adjustable-rate mortgage pass-through certificates and floaters are particularly well-suited to our investment objective of high current income, consistent with modest volatility of net asset value, because the value of adjustable-rate mortgage pass-through certificates and floaters generally remains relatively stable as compared to traditional fixed-rate debt securities paying comparable rates of interest. While the value of adjustable-rate mortgage pass-through certificates and floaters, like other debt securities, generally varies inversely with changes in market interest rates (increasing in value during periods of declining interest rates and decreasing in value during periods of increasing interest rates), the value of adjustable-rate mortgage pass-through certificates and floaters should generally be more resistant to price swings than other debt securities because the interest rates on these securities move with market interest rates.

Accordingly, as interest rates change, the value of our shares should be more stable than the value of funds which invest primarily in securities backed by fixed-rate mortgages or in other non-mortgage-backed debt securities, which do not provide for adjustment in the interest rates in response to changes in market interest rates.

Adjustable-rate mortgage pass-through certificates and floaters typically have caps, which limit the maximum amount by which the interest rate may be increased or decreased at periodic intervals or over the life of the security. To the extent that interest rates rise faster than the allowable caps on the adjustable-rate mortgage pass-through certificates and floaters, these securities will behave more like fixed-rate securities. Consequently, interest rate increases in excess of caps can be expected to cause these securities to behave more like traditional debt securities than adjustable-rate securities and, accordingly, to decline in value to a greater extent than would be the case in the absence of these caps.

Adjustable-rate mortgage pass-through certificates and floaters, like other mortgage-backed securities, differ from conventional bonds in that principal is to be paid back over the life of the security rather than at maturity. As a result, we receive monthly scheduled payments of principal and interest on these securities and may receive unscheduled principal payments representing prepayments on the underlying mortgages. When we reinvest the payments and any unscheduled prepayments we receive, we may receive a rate of interest on the reinvestment which is lower than the rate on the existing security. For this reason, adjustable-rate mortgage pass-through certificates and floaters are less effective than longer-term debt securities as a means of "locking in" longer-term interest rates. Accordingly, adjustable-rate mortgage pass-through certificates and floaters, while generally having less risk of price decline during periods of rapidly rising interest rates than fixed-rate mortgage-backed securities of comparable maturities, have less potential for capital appreciation than fixed-rate securities during periods of declining interest rates.

As in the case of fixed-rate mortgage-backed securities, to the extent these securities are purchased at a premium, faster than expected prepayments would accelerate our amortization of the premium. Conversely, if these securities were purchased at a discount, faster than expected prepayments would accelerate our recognition of income.

As in the case of fixed-rate CMOs, floating-rate CMOs may allow for shifting of prepayment risk from slower-paying tranches to faster-paying tranches. This is in contrast to mortgage pass-through certificates where all investors share equally in all payments, including all prepayments, on the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

underlying mortgages.

Other Floating Rate Instruments

We may also invest in structured floating-rate notes issued or guaranteed by government agencies, such as FNMA and FHLMC. These instruments are typically structured to reflect an interest rate arbitrage (i.e., the difference between the agency's cost of funds and the income stream from specified assets of the agency) and their reset formulas may provide more attractive returns than other floating rate instruments. The indices used to determine resets are the same as those described above.

Mortgage Loans

As of December 31, 2006, we have not invested directly in mortgage loans, but we may from time-to-time invest a small percentage of our assets directly in single-family, multi-family or commercial mortgage loans. We expect that the majority of these mortgage loans would be ARM pass-through certificates. The interest rate on an ARM pass-through certificate is typically tied to an index (such as LIBOR or the interest rate on Treasury bills), and is adjustable periodically at specified intervals. These mortgage loans are typically subject to lifetime interest rate caps and periodic interest rate or payment caps. The acquisition of mortgage loans generally involves credit risk. We may obtain credit enhancement to mitigate this risk; however, there can be no assurances that we will be able to obtain credit enhancement or that credit enhancement would mitigate the credit risk of the underlying mortgage loans.

14

Capital Investment Policy

Asset Acquisitions

Our capital investment policy provides that at least 75% of our total assets will be comprised of high quality mortgage-backed securities and short-term investments. The remainder of our assets (comprising not more than 25% of total assets), may consist of mortgage-backed securities and other qualified REIT real estate assets which are unrated or rated less than high quality but which are at least "investment grade" (rated "BBB" or better) or, if not rated, are determined by us to be of comparable credit quality to an investment which is rated "BBB" or better. In addition, we may directly or indirectly invest part of this remaining 25% of our assets in other types of securities, including without limitation, unrated debt, equity or derivative securities, to the extent consistent with our REIT qualification requirements. The derivative securities in which we invest may include securities representing the right to receive interest only or a disproportionately large amount of interest, as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics.

Our capital investment policy requires that we structure our portfolio to maintain a minimum weighted average rating (including our deemed comparable ratings for unrated mortgage-backed securities) of our mortgage-backed securities of at least single "A" under the S&P rating system and at the comparable level under the other rating systems. To date, all of the mortgage-backed securities we have acquired have been pass-through certificates or CMOs issued or guaranteed by FHLMC, FNMA or GNMA which, although not rated, have an implied "AAA" rating.

We intend to acquire only those mortgage-backed securities that we believe we have the necessary expertise to evaluate and manage, that we can readily finance and that are consistent with our balance sheet guidelines and

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

risk management objectives. Since we expect to hold our mortgage-backed securities until maturity, we generally do not seek to acquire assets whose investment returns are only attractive in a limited range of scenarios. We believe that future interest rates and mortgage prepayment rates are very difficult to predict and, as a result, we seek to acquire mortgage-backed securities which we believe provide acceptable returns over a broad range of interest rate and prepayment scenarios.

Among the asset choices available to us, our policy is to acquire those mortgage-backed securities which we believe generate the highest returns on capital invested, after consideration of the following:

- |X| the amount and nature of anticipated cash flows from the asset;
- |X| our ability to pledge the asset to secure collateralized borrowings;
- |X| the increase in our capital requirement determined by our capital investment policy resulting from the purchase and financing of the asset; and
- |X| the costs of financing, hedging and managing the asset.

Prior to acquisition, we assess potential returns on capital employed over the life of the asset and in a variety of interest rate, yield spread, financing cost, credit loss and prepayment scenarios.

We also give consideration to balance sheet management and risk diversification issues. We deem a specific asset which we are evaluating for potential acquisition as more or less valuable to the extent it serves to increase or decrease certain interest rate or prepayment risks which may exist in the balance sheet, to diversify or concentrate credit risk, and to meet the cash flow and liquidity objectives our management may establish for our balance sheet from time-to-time. Accordingly, an important part of the asset evaluation process is a simulation, using risk management models, of the addition of a potential asset and our associated borrowings and hedges to the balance sheet and an assessment of the impact this potential asset acquisition would have on the risks in and returns generated by our balance sheet as a whole over a variety of scenarios.

15

We focus primarily on the acquisition of adjustable-rate mortgage-backed securities, including floaters. We have, however, purchased a significant amount of fixed-rate mortgage-backed securities and may continue to do so in the future if, in our view, the potential returns on capital invested, after hedging and all other costs, would exceed the returns available from other assets or if the purchase of these assets would serve to reduce or diversify the risks of our balance sheet.

Although we have not yet done so, we may purchase the stock of mortgage REITs or similar companies when we believe that these purchases would yield attractive returns on capital employed. When the stock market valuations of these companies are low in relation to the market value of their assets, these stock purchases can be a way for us to acquire an interest in a pool of mortgage-backed securities at an attractive price. We do not, however, presently intend to invest in the securities of other issuers for the purpose of exercising control or to underwrite securities of other issuers.

We may acquire newly issued mortgage-backed securities, and also may seek to expand our capital base in order to further increase our ability to acquire new assets, when the potential returns from new investments appears

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

attractive relative to the return expectations of stockholders. We may in the future acquire mortgage-backed securities by offering our debt or equity securities in exchange for the mortgage-backed securities.

We generally intend to hold mortgage-backed securities for extended periods. In addition, the REIT provisions of the Internal Revenue Code limit in certain respects our ability to sell mortgage-backed securities. We may decide however to sell assets from time to time, for a number of reasons, including our desire to dispose of an asset as to which credit risk concerns have arisen, to reduce interest rate risk, to substitute one type of mortgage-backed security for another, to improve yield or to maintain compliance with the 55% requirement under the Investment Company Act, or generally to re-structure the balance sheet when we deem advisable. Our board of directors has not adopted any policy that would restrict management's authority to determine the timing of sales or the selection of mortgage-backed securities to be sold.

We do not invest in REMIC residuals or other CMO residuals.

As a requirement for maintaining REIT status, we will distribute to stockholders aggregate dividends equaling at least 90% of our REIT taxable income (determined without regard to the deduction for dividends paid and by excluding any net capital gain) for each taxable year. We will make additional distributions of capital when the return expectations of the stockholders appear to exceed returns potentially available to us through making new investments in mortgage-backed securities. Subject to the limitations of applicable securities and state corporation laws, we can distribute capital by making purchases of our own capital stock or through paying down or repurchasing any outstanding uncollateralized debt obligations.

Our asset acquisition strategy may change over time as market conditions change and as we evolve.

Credit Risk Management

We have not taken on credit risk to date, but may do so in the future. In that event, we will review credit risk and other risk of loss associated with each investment and determine the appropriate allocation of capital to apply to the investment under our capital investment policy. Our board of directors will monitor the overall portfolio risk and determine appropriate levels of provision for loss.

Capital and Leverage

We expect generally to maintain a debt-to-equity ratio of between 8:1 and 12:1, although the ratio may vary from time-to-time depending upon market conditions and other factors our management deems relevant, including the composition of our balance sheet, haircut levels required by lenders, the market value of the mortgage-backed securities in our portfolio and "excess capital cushion" percentages (as described below) set by our board of directors from time to time. For purposes of calculating this ratio, our equity (or capital base) is equal to the value of our investment portfolio on a mark-to-market basis less the book value of our obligations under repurchase agreements and other collateralized borrowings. For the calculation of this ratio, equity includes the Series B Cumulative Convertible Preferred Stock, which is not included in equity under Generally Accepted Accounting Principles.

Our goal is to strike a balance between the under-utilization of leverage, which reduces potential returns to stockholders, and the over-utilization of leverage, which could reduce our ability to meet our

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

obligations during adverse market conditions. Our capital investment policy limits our ability to acquire additional assets during times when our debt-to-equity ratio exceeds 12:1. At December 31, 2006, our ratio of debt-to-equity was 10.4:1. Our capital base represents the approximate liquidation value of our investments and approximates the market value of assets that we can pledge or sell to meet over-collateralization requirements for our borrowings. The unpledged portion of our capital base is available for us to pledge or sell as necessary to maintain over-collateralization levels for our borrowings.

We are prohibited from acquiring additional assets during periods when our capital base is less than the minimum amount required under our capital investment policy, except as may be necessary to maintain REIT status or our exemption from the Investment Company Act of 1940, as amended (the "Investment Company Act"). In addition, when our capital base falls below our risk-managed capital requirement, our management is required to submit to our board of directors a plan for bringing our capital base into compliance with our capital investment policy guidelines. We anticipate that in most circumstances we can achieve this goal without overt management action through the natural process of mortgage principal repayments. We anticipate that our capital base is likely to exceed our risk-managed capital requirement during periods following new equity offerings and during periods of falling interest rates and that our capital base could fall below the risk-managed capital requirement during periods of rising interest rates.

The first component of our capital requirements is the current aggregate over-collateralization amount or "haircut" the lenders require us to hold as capital. The haircut for each mortgage-backed security is determined by our lenders based on the risk characteristics and liquidity of the asset. Haircut levels on individual borrowings generally range from 3% or less for certain FHLMC, FNMA or GNMA mortgage-backed securities to 20% for certain privately-issued mortgage-backed securities. At December 31, 2006, the weighted average haircut level on our securities was 3.0%. Should the market value of our pledged assets decline, we will be required to deliver additional collateral to our lenders to maintain a constant over-collateralization level on our borrowings.

The second component of our capital requirement is the "excess capital cushion." This is an amount of capital in excess of the haircuts required by our lenders. We maintain the excess capital cushion to meet the demands of our lenders for additional collateral should the market value of our mortgage-backed securities decline. The aggregate excess capital cushion equals the sum of liquidity cushion amounts assigned under our capital investment policy to each of our mortgage-backed securities. We assign excess capital cushions to each mortgage-backed security based on our assessment of the mortgage-backed security's market price volatility, credit risk, liquidity and attractiveness for use as collateral by lenders. The process of assigning excess capital cushions relies on our management's ability to identify and weigh the relative importance of these and other factors. In assigning excess capital cushions, we also give consideration to hedges associated with the mortgage-backed security and any effect such hedges may have on reducing net market price volatility, concentration or diversification of credit and other risks in the balance sheet as a whole and the net cash flows that we can expect from the interaction of the various components of our balance sheet.

Our capital investment policy stipulates that at least 25% of the capital base maintained to satisfy the excess capital cushion must be invested in AAA-rated adjustable-rate mortgage-backed securities or assets with similar or better liquidity characteristics.

A substantial portion of our borrowings are short-term or variable-rate borrowings. Our borrowings are implemented primarily through repurchase

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

agreements, but in the future may also be obtained through loan agreements, lines of credit, dollar-roll agreements (an agreement to sell a security for delivery on a specified future date and a simultaneous agreement to repurchase the same or a substantially similar security on a specified future date) and other credit facilities with institutional lenders and issuance of debt securities such as commercial paper, medium-term notes, CMOs and senior or subordinated notes. We enter into financing transactions only with institutions that we believe are sound credit risks and follow other internal policies designed to limit our credit and other exposure to financing institutions.

We expect to continue to use repurchase agreements as our principal financing device to leverage our mortgage-backed securities portfolio. We anticipate that, upon repayment of each borrowing under a repurchase agreement, we will use the collateral immediately for borrowing under a new repurchase agreement. At present, we have entered into uncommitted facilities with 30 lenders for borrowings in the form of repurchase agreements. We have not at the present time entered into any commitment agreements under which the lender would be required to enter into new repurchase agreements during a specified period of time, nor do we presently plan to have liquidity facilities with commercial banks. We may, however, enter into such commitment agreements in the future. We enter into repurchase agreements primarily with national broker-dealers, commercial banks and other lenders which typically offer this type of financing. We enter into collateralized borrowings only with financial institutions meeting credit standards approved by our board of directors, and we monitor the financial condition of these institutions on a regular basis.

17

A repurchase agreement, although structured as a sale and repurchase obligation, acts as a financing under which we effectively pledge our mortgage-backed securities as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the market value of the pledged collateral. At the maturity of the repurchase agreement, we are required to repay the loan and correspondingly receive back our collateral. While used as collateral, the mortgage-backed securities continue to pay principal and interest which are for our benefit. In the event of our insolvency or bankruptcy, certain repurchase agreements may qualify for special treatment under the Bankruptcy Code, the effect of which, among other things, would be to allow the creditor under the agreement to avoid the automatic stay provisions of the Bankruptcy Code and to foreclose on the collateral agreement without delay. In the event of the insolvency or bankruptcy of a lender during the term of a repurchase agreement, the lender may be permitted, under applicable insolvency laws, to repudiate the contract, and our claim against the lender for damages may be treated simply as an unsecured creditor. In addition, if the lender is a broker or dealer subject to the Securities Investor Protection Act of 1970, or an insured depository institution subject to the Federal Deposit Insurance Act, our ability to exercise our rights to recover our securities under a repurchase agreement or to be compensated for any damages resulting from the lender's insolvency may be further limited by those statutes. These claims would be subject to significant delay and, if and when received, may be substantially less than the damages we actually incur.

Substantially all of our borrowing agreements require us to deposit additional collateral in the event the market value of existing collateral declines, which may require us to sell assets to reduce our borrowings. We have designed our liquidity management policy to maintain a cushion of equity sufficient to provide required liquidity to respond to the effects under our borrowing arrangements of interest rate movements and changes in market value of our mortgage-backed securities, as described above. However, a major disruption of the repurchase or other market that we rely on for short-term borrowings would have a material adverse effect on us unless we were able to arrange

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

alternative sources of financing on comparable terms.

Our articles of incorporation and bylaws do not limit our ability to incur borrowings, whether secured or unsecured.

Interest Rate Risk Management

To the extent consistent with our election to qualify as a REIT, we follow an interest rate risk management program intended to protect our portfolio of mortgage-backed securities and related debt against the effects of major interest rate changes. Specifically, our interest rate risk management program is formulated with the intent to offset the potential adverse effects resulting from rate adjustment limitations on our mortgage-backed securities and the differences between interest rate adjustment indices and interest rate adjustment periods of our adjustable-rate mortgage-backed securities and related borrowings.

Our interest rate risk management program encompasses a number of procedures, including the following:

- |X| we attempt to structure our borrowings to have interest rate adjustment indices and interest rate adjustment periods that, on an aggregate basis, generally correspond to the interest rate adjustment indices and interest rate adjustment periods of our adjustable-rate mortgage-backed securities; and
- |X| we attempt to structure our borrowing agreements relating to adjustable-rate mortgage-backed securities to have a range of different maturities and interest rate adjustment periods (although substantially all will be less than one year).

We adjust the average maturity adjustment periods of our borrowings on an ongoing basis by changing the mix of maturities and interest rate adjustment periods as borrowings come due and are renewed. Through use of these procedures, we attempt to minimize the differences between the interest rate adjustment periods of our mortgage-backed securities and related borrowings that may occur.

18

We purchase from time-to-time interest rate swaps. We may enter into interest rate collars, interest rate caps or floors, and purchase interest-only mortgage-backed securities and similar instruments to attempt to mitigate the risk of the cost of our variable rate liabilities increasing at a faster rate than the earnings on our assets during a period of rising interest rates or to mitigate prepayment risk. We may hedge as much of the interest rate risk as our management determines is in our best interests, given the cost of the hedging transactions and the need to maintain our status as a REIT. This determination may result in our electing to bear a level of interest rate or prepayment risk that could otherwise be hedged when management believes, based on all relevant facts, that bearing the risk is advisable.

We seek to build a balance sheet and undertake an interest rate risk management program which is likely to generate positive earnings and maintain an equity liquidation value sufficient to maintain operations given a variety of potentially adverse circumstances. Accordingly, our interest rate risk management program addresses both income preservation, as discussed above, and capital preservation concerns. For capital preservation, we monitor our "duration." This is the expected percentage change in market value of our assets that would be caused by a 1% change in short and long-term interest rates. To monitor weighted average duration and the related risks of fluctuations in the liquidation value of our equity, we model the impact of various economic

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

scenarios on the market value of our mortgage-backed securities and liabilities. At December 31, 2006, we estimate that the duration of our assets was 3.26, and giving effect to the swap transactions, our weighted average duration was 1.93. We believe that our interest rate risk management program will allow us to maintain operations throughout a wide variety of potentially adverse circumstances. Nevertheless, in order to further preserve our capital base (and lower our duration) during periods when we believe a trend of rapidly rising interest rates has been established, we may decide to increase hedging activities or to sell assets. Each of these actions may lower our earnings and dividends in the short term to further our objective of maintaining attractive levels of earnings and dividends over the long term.

We may elect to conduct a portion of our hedging operations through one or more subsidiary corporations, each of which we would elect to treat as a "taxable REIT subsidiary." To comply with the asset tests applicable to us as a REIT, we could own 100% of the voting stock of such subsidiary, provided that the value of the stock that we own in all such taxable REIT subsidiaries does not exceed 20% of the value of our total assets at the close of any calendar quarter. A taxable subsidiary, such as FIDAC, would not elect REIT status and would distribute any net profit after taxes to us and its other stockholders. Any dividend income we receive from the taxable subsidiary (combined with all other income generated from our assets, other than qualified REIT real estate assets) must not exceed 25% of our gross income.

We believe that we have developed a cost-effective asset/liability management program to provide a level of protection against interest rate and prepayment risks. However, no strategy can completely insulate us from interest rate changes and prepayment risks. Further, as noted above, the federal income tax requirements that we must satisfy to qualify as a REIT limit our ability to hedge our interest rate and prepayment risks. We monitor carefully, and may have to limit, our asset/liability management program to assure that we do not realize excessive hedging income, or hold hedging assets having excess value in relation to total assets, which could result in our disqualification as a REIT, the payment of a penalty tax for failure to satisfy certain REIT tests under the Internal Revenue Code, provided the failure was for reasonable cause. In addition, asset/liability management involves transaction costs which increase dramatically as the period covered by the hedging protection increases. Therefore, we may be unable to hedge effectively our interest rate and prepayment risks.

Prepayment Risk Management

We seek to minimize the effects of faster or slower than anticipated prepayment rates through structuring a diversified portfolio with a variety of prepayment characteristics, investing in mortgage-backed securities with prepayment prohibitions and penalties, investing in certain mortgage-backed security structures which have prepayment protections, and balancing assets purchased at a premium with assets purchased at a discount. We monitor prepayment risk through periodic review of the impact of a variety of prepayment scenarios on our revenues, net earnings, dividends, cash flow and net balance sheet market value.

19

Future Revisions in Policies and Strategies

Our board of directors has established the investment policies and operating policies and strategies set forth in this Form 10-K. The board of directors has the power to modify or waive these policies and strategies without the consent of the stockholders to the extent that the board of directors determines that the modification or waiver is in the best interests of our

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

stockholders. Among other factors, developments in the market which affect our policies and strategies or which change our assessment of the market may cause our board of directors to revise our policies and strategies.

Potential Acquisitions, Strategic Alliances and Other Investments

From time-to-time we have had discussions with other parties regarding possible transactions including acquisitions of other businesses or assets, investments in other entities, joint venture arrangements, or strategic alliances. To date, except for the acquisition of FIDAC, none of these discussions have gone beyond the preliminary stage. We have also considered from time-to-time entering into related businesses, although to date we have not entered into such businesses. In addition, during 2006 FIDAC expanded its line of business to include the management of equity securities, initially for us and an affiliated person, and the management of collateralized debt obligations.

We may, from time-to-time, continue to explore possible acquisitions, investments, joint venture arrangements and strategic alliances.

Dividend Reinvestment and Share Purchase Plan

We have adopted a dividend reinvestment and share purchase plan. Under the dividend reinvestment feature of the plan, existing shareholders can reinvest their dividends in additional shares of our common stock. Under the share purchase feature of the plan, new and existing shareholders can purchase shares of our common stock. We have an effective shelf registration statement on Form S-3 which initially registered 2,000,000 shares that could be issued under the plan. We still sell shares covered by this registration statement under the plan.

At the Market Sales Programs

We have entered into an ATM Equity Offering(sm) Sales Agreement with Merrill Lynch & Co. and Merrill Lynch, Pierce, Fenner & Smith Incorporated (or Merrill Lynch), relating to the sale of shares of our common stock from time to time through Merrill Lynch. We have also entered into a ATM Equity Sales Agreement with UBS Securities LLC (or UBS Securities), relating to the sale of shares of our common stock from time to time through UBS Securities. Under these agreements, sales of the shares, if any, will be made by means of ordinary brokers' transaction of the New York Stock Exchange at market prices.

Legal Proceedings

From time-to-time, we are involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial statements.

Employees

As of December 31, 2006, we had 34 full time employees. None of our employees are subject to any collective bargaining agreements. We believe we have good relations with our employees.

Available Information

Our investor relations website is www.annaly.com. We make available on this website under "Financial Reports and SEC filings," free of charge, our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports as soon as reasonably practicable after we electronically file or furnish such materials to the SEC.

COMPETITION

We believe that our principal competition in the acquisition and holding of the types of mortgage-backed securities we purchase are financial institutions such as banks, savings and loans, life insurance companies, institutional investors such as mutual funds and pension funds, and certain other mortgage REITs. Some of our competitors have greater financial resources and access to capital than we do. Our competitors, as well as additional competitors which may emerge in the future, may increase the competition for the acquisition of mortgage-backed securities, which in turn may result in higher prices and lower yields on assets.

ITEM 1A. RISK FACTORS

An investment in our stock involves a number of risks. Before making an investment decision, you should carefully consider all of the risks described in this Form 10-K. If any of the risks discussed in this Form 10-K actually occur, our business, financial condition and results of operations could be materially adversely affected. If this were to occur, the trading price of our stock could decline significantly and you may lose all or part of your investment.

Risks Related to Our Business

An increase in the interest payments on our borrowings relative to the interest we earn on our investment securities may adversely affect our profitability

We earn money based upon the spread between the interest payments we earn on our investment securities and the interest payments we must make on our borrowings. If the interest payments on our borrowings increase relative to the interest we earn on our investment securities, our profitability may be adversely affected.

The interest payments on our borrowings may increase relative to the interest we earn on our adjustable-rate investment securities for various reasons discussed in this section.

- o Differences in timing of interest rate adjustments on our investment securities and our borrowings may adversely affect our profitability

We rely primarily on short-term borrowings to acquire investment securities with long-term maturities. Accordingly, if short-term interest rates increase, this may adversely affect our profitability.

Most of the investment securities we acquire are adjustable-rate securities. This means that their interest rates may vary over time based upon changes in an objective index, such as:

- LIBOR. The interest rate that banks in London offer for deposits in London of U.S. dollars.
- Treasury Rate. A monthly or weekly average yield of benchmark U.S. Treasury securities, as published by the Federal Reserve Board.
- CD Rate. The weekly average of secondary market interest rates on six-month negotiable certificates of deposit, as published by the Federal Reserve Board.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

These indices generally reflect short-term interest rates. On December 31, 2006, approximately 28% of our investment securities were adjustable-rate securities.

The interest rates on our borrowings similarly vary with changes in an objective index. Nevertheless, the interest rates on our borrowings generally adjust more frequently than the interest rates on our adjustable-rate investment securities. For example, on December 31, 2006, our adjustable-rate investment securities had a weighted average term to next rate adjustment of 19 months, while our borrowings had a weighted average term to next rate adjustment of 125 days. Accordingly, in a period of rising interest rates, we could experience a decrease in net income or a net loss because the interest rates on our borrowings adjust faster than the interest rates on our adjustable-rate investment securities.

21

- o Interest rate caps on our investment securities may adversely affect our profitability

Our adjustable-rate investment securities are typically subject to periodic and lifetime interest rate caps. Periodic interest rate caps limit the amount an interest rate can increase during any given period. Lifetime interest rate caps limit the amount an interest rate can increase through maturity of an investment security. Our borrowings are not subject to similar restrictions. Accordingly, in a period of rapidly increasing interest rates, we could experience a decrease in net income or experience a net loss because the interest rates on our borrowings could increase without limitation while the interest rates on our adjustable-rate investment securities would be limited by caps.

- o Because we acquire fixed-rate securities, an increase in interest rates may adversely affect our profitability

While the majority of our investments consist of adjustable-rate investment securities, we also invest in fixed-rate mortgage-backed securities. In a period of rising interest rates, our interest payments could increase while the interest we earn on our fixed-rate mortgage-backed securities would not change. This would adversely affect our profitability. On December 31, 2006, approximately 72% of our investment securities were fixed-rate securities.

An increase in prepayment rates may adversely affect our profitability

The mortgage-backed securities we acquire are backed by pools of mortgage loans. We receive payments, generally, from the payments that are made on these underlying mortgage loans. When borrowers prepay their mortgage loans at rates that are faster than expected, this results in prepayments that are faster than expected on the mortgage-backed securities. These faster than expected prepayments may adversely affect our profitability.

We often purchase mortgage-backed securities that have a higher interest rate than the market interest rate at the time. In exchange for this higher interest rate, we must pay a premium over the market value to acquire the security. In accordance with accounting rules, we amortize this premium over the term of the mortgage-backed security. If the mortgage-backed security is prepaid in whole or in part prior to its maturity date, however, we must expense all or a part of the remaining unamortized portion of the premium that was prepaid at the time of the prepayment. This adversely affects our profitability.

Prepayment rates generally increase when interest rates fall and decrease when interest rates rise, but changes in prepayment rates are difficult

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

to predict. Prepayment rates also may be affected by conditions in the housing and financial markets, general economic conditions and the relative interest rates on fixed-rate and adjustable-rate mortgage loans.

We may seek to reduce prepayment risk by acquiring mortgage-backed securities at a discount. If a discounted security is prepaid in whole or in part prior to its maturity date, we will earn income equal to the amount of the remaining discount. This will improve our profitability if the discounted securities are prepaid faster than expected.

We also can acquire mortgage-backed securities that are less affected by prepayments. For example, we can acquire CMOs, a type of mortgage-backed security. CMOs divide a pool of mortgage loans into multiple tranches that allow for shifting of prepayment risks from slower-paying tranches to faster-paying tranches. This is in contrast to pass-through or pay-through mortgage-backed securities, where all investors share equally in all payments, including all prepayments. As discussed below, the Investment Company Act imposes restrictions on our purchase of CMOs. On December 31, 2006, approximately 37% of our mortgage-backed securities were CMOs and approximately 63% of our mortgage-backed securities were pass-through or pay-through securities.

While we seek to minimize prepayment risk to the extent practical, in selecting investments we must balance prepayment risk against other risks and the potential returns of each investment. No strategy can completely insulate us from prepayment risk.

22

An increase in interest rates may adversely affect our book value

Increases in interest rates may negatively affect the market value of our investment securities. Our fixed-rate securities, generally, are more negatively affected by these increases. In accordance with accounting rules, we reduce our book value by the amount of any decrease in the market value of our investment securities.

Our strategy involves significant leverage

We seek to maintain a ratio of debt-to-equity of between 8:1 and 12:1, although our ratio may at times be above or below this amount. We incur this leverage by borrowing against a substantial portion of the market value of our investment securities. By incurring this leverage, we can enhance our returns. Nevertheless, this leverage, which is fundamental to our investment strategy, also creates significant risks.

- o Our leverage may cause substantial losses

Because of our significant leverage, we may incur substantial losses if our borrowing costs increase. Our borrowing costs may increase for any of the following reasons:

- short-term interest rates increase;
- the market value of our investment securities decreases;
- interest rate volatility increases; or
- the availability of financing in the market decreases.

- o Our leverage may cause margin calls and defaults and force us to sell

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

assets under adverse market conditions

Because of our leverage, a decline in the value of our investment securities may result in our lenders initiating margin calls. A margin call means that the lender requires us to pledge additional collateral to re-establish the ratio of the value of the collateral to the amount of the borrowing. Our fixed-rate mortgage-backed securities generally are more susceptible to margin calls as increases in interest rates tend to more negatively affect the market value of fixed-rate securities.

If we are unable to satisfy margin calls, our lenders may foreclose on our collateral. This could force us to sell our investment securities under adverse market conditions. Additionally, in the event of our bankruptcy, our borrowings, which are generally made under repurchase agreements, may qualify for special treatment under the Bankruptcy Code. This special treatment would allow the lenders under these agreements to avoid the automatic stay provisions of the Bankruptcy Code and to liquidate the collateral under these agreements without delay.

- o Liquidation of collateral may jeopardize our REIT status

To continue to qualify as a REIT, we must comply with requirements regarding our assets and our sources of income. If we are compelled to liquidate our investment securities, we may be unable to comply with these requirements, ultimately jeopardizing our status as a REIT and our failure to qualify as a REIT will have adverse tax consequences.

- o We may exceed our target leverage ratios

We seek to maintain a ratio of debt-to-equity of between 8:1 and 12:1. However, we are not required to stay within this leverage ratio. If we exceed this ratio, the adverse impact on our financial condition and results of operations from the types of risks described in this section would likely be more severe.

23

- o We may not be able to achieve our optimal leverage

We use leverage as a strategy to increase the return to our investors. However, we may not be able to achieve our desired leverage for any of the following reasons:

- we determine that the leverage would expose us to excessive risk;
- our lenders do not make funding available to us at acceptable rates; or
- our lenders require that we provide additional collateral to cover our borrowings.

- o We may incur increased borrowing costs which would adversely affect our profitability

Currently, all of our borrowings are collateralized borrowings in the form of repurchase agreements. If the interest rates on these repurchase agreements increase, it would adversely affect our profitability.

Our borrowing costs under repurchase agreements generally correspond to short-term interest rates such as LIBOR or a short-term Treasury index, plus or minus a margin. The margins on these borrowings over or under short-term

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

interest rates may vary depending upon:

- the movement of interest rates;
- the availability of financing in the market; or
- the value and liquidity of our investment securities.

If we are unable to renew our borrowings at favorable rates, our profitability may be adversely affected

Since we rely primarily on short-term borrowings, our ability to achieve our investment objectives depends not only on our ability to borrow money in sufficient amounts and on favorable terms, but also on our ability to renew or replace on a continuous basis our maturing short-term borrowings. If we are not able to renew or replace maturing borrowings, we would have to sell our assets under possibly adverse market conditions.

Our hedging strategies expose us to risks

Our policies permit us to enter into interest rate swaps, caps and floors and other derivative transactions to help us mitigate our interest rate and prepayment risks described above. We have used interest rate swaps and interest rate caps to provide a level of protection against interest rate risks, but no hedging strategy can protect us completely.

- o Out hedging strategies may not be successful in mitigating the risks associated with interest rates

We cannot assure you that our use of derivatives will offset the risks related to changes in interest rates. It is likely that there will be periods in the future during which we will incur losses on our derivative financial instruments that will not be fully offset by gains on our portfolio. The derivative financial instruments we select may not have the effect of reducing our interest rate risk. In addition, the nature and timing of hedging transactions may influence the effectiveness of these strategies. Poorly designed strategies or improperly executed transactions could significantly increase our risk and lead to material losses. In addition, hedging strategies involve transaction and other costs. Our hedging strategy and the derivatives that we use may not adequately offset the risk of interest rate volatility or that our hedging transactions may not result in losses.

- o Our use of derivatives may expose us to counterparty risks

We enter into interest rate swap and cap agreements to hedge risks associated with movements in interest rates. If a swap counterparty cannot perform under the terms of an interest rate swap, we would not receive payments due under that agreement, we may lose any unrealized gain associated with the interest rate swap, and the hedged liability would cease to be hedged by the interest rate swap. We may also be at risk for any collateral we have pledged to secure our obligations under the interest rate swap if the counterparty become insolvent or file for bankruptcy. Similarly, if a cap counterparty fails to perform under the terms of the cap agreement, in addition to not receiving payments due under that agreement that would off-sets our interest expense, we would also incur a loss for all remaining unamortized premium paid for that agreement.

We may face risks of investing in inverse floating rate securities

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

We may invest in inverse floaters. The returns on inverse floaters are inversely related to changes in an interest rate. Generally, income on inverse floaters will decrease when interest rates increase and increase when interest rates decrease. Investments in inverse floaters may subject us to the risks of reduced or eliminated interest payments and losses of principal. In addition, certain indexed securities and inverse floaters may increase or decrease in value at a greater rate than the underlying interest rate, which effectively leverages our investment in such securities. As a result, the market value of such securities will generally be more volatile than that of fixed rate securities.

Our investment strategy may involve credit risk

We may incur losses if there are payment defaults under our investment securities.

To date, all of our mortgage-backed securities have been agency certificates and agency debentures which, although not rated, carry an implied "AAA" rating. Agency certificates are mortgage pass-through certificates where Freddie Mac, Fannie Mae or Ginnie Mae guarantees payments of principal or interest on the certificates. Agency debentures are debt instruments issued by Freddie Mac, Fannie Mae, or the FHLB.

Even though we have only acquired "AAA" securities so far, pursuant to our capital investment policy, we have the ability to acquire securities of lower credit quality. Under our policy:

- 75% of our investments must have a "AA" or higher rating by S&P, an equivalent rating by a similar nationally recognized rating organization or our management must determine that the investments are of comparable credit quality to investments with these ratings;
- the remaining 25% of our total assets, may consist of other qualified REIT real estate assets which are unrated or rated less than high quality, but which are at least "investment grade" (rated "BBB" or better by Standard & Poor's Corporation ("S&P") or the equivalent by another nationally recognized rating agency) or, if not rated, we determine them to be of comparable credit quality to an investment which is rated "BBB" or better. In addition, we may directly or indirectly invest part of this remaining 25% of our assets in other types of securities, including without limitation, unrated debt, equity or derivative securities, to the extent consistent with our REIT qualification requirements. The derivative securities in which we invest may include securities representing the right to receive interest only or a disproportionately large amount of interest, as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics; and
- we seek to have a minimum weighted average rating for our portfolio of at least "A" by S&P.

If we acquire securities of lower credit quality, we may incur losses if there are defaults under those securities or if the rating agencies downgrade the credit quality of those securities.

We have not established a minimum dividend payment level

We intend to pay quarterly dividends and to make distributions to our stockholders in amounts such that all or substantially all of our taxable income in each year (subject to certain adjustments) is distributed. This enables us to

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

qualify for the tax benefits accorded to a REIT under the Code. We have not established a minimum dividend payment level and our ability to pay dividends may be adversely affected for the reasons described in this section. All distributions will be made at the discretion of our Board of Directors and will depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our Board of Directors may deem relevant from time to time.

25

Because of competition, we may not be able to acquire mortgage-backed securities at favorable yields

Our net income depends, in large part, on our ability to acquire mortgage-backed securities at favorable spreads over our borrowing costs. In acquiring mortgage-backed securities, we compete with other REITs, investment banking firms, savings and loan associations, banks, insurance companies, mutual funds, other lenders and other entities that purchase mortgage-backed securities, many of which have greater financial resources than us. As a result, in the future, we may not be able to acquire sufficient mortgage-backed securities at favorable spreads over our borrowing costs.

We are dependent on our key personnel

We are dependent on the efforts of our key officers and employees, including Michael A. J. Farrell, our Chairman of the board of directors, Chief Executive Officer and President, Wellington J. Denahan-Norris, our Vice Chairman, Chief Operating Officer and Chief Investment Officer, and Kathryn F. Fagan, our Chief Financial Officer and Treasurer. The loss of any of their services could have an adverse effect on our operations. Although we have employment agreements with each of them, we cannot assure you they will remain employed with us.

We and our shareholders are subject to certain tax risks

- o Our failure to qualify as a REIT would have adverse tax consequences

We believe that since 1997 we have qualified for taxation as a REIT for federal income tax purposes. We plan to continue to meet the requirements for taxation as a REIT. The determination that we are a REIT requires an analysis of various factual matters and circumstances that may not be totally within our control. For example, to qualify as a REIT, at least 75% of our gross income must come from real estate sources and 95% of our gross income must come from real estate sources and certain other sources that are itemized in the REIT tax laws. We are also required to distribute to stockholders at least 90% of our REIT taxable income (determined without regard to the deduction for dividends paid and by excluding any net capital gain). Even a technical or inadvertent mistake could jeopardize our REIT status. Furthermore, Congress and the Internal Revenue Service (or IRS) might make changes to the tax laws and regulations, and the courts might issue new rulings that make it more difficult or impossible for us to remain qualified as a REIT.

If we fail to qualify as a REIT, we would be subject to federal income tax at regular corporate rates. Also, unless the IRS granted us relief under certain statutory provisions, we would remain disqualified as a REIT for four years following the year we first fail to qualify. If we fail to qualify as a REIT, we would have to pay significant income taxes and would therefore have less money available for investments or for distributions to our stockholders. This would likely have a significant adverse effect on the value of our securities. In addition, the tax law would no longer require us to make distributions to our stockholders.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

A REIT that fails the quarterly asset tests for one or more quarters will not lose its REIT status as a result of such failure if either (i) the failure is regarded as a de minimis failure under standards set out in the Internal Revenue Code, or (ii) the failure is greater than a de minimis failure but is attributable to reasonable cause and not willful neglect. In the case of a greater than de minimis failure, however, the REIT must pay a tax and must remedy the failure within 6 months of the close of the quarter in which the failure was identified. In addition, the Internal Revenue Code provides relief for failures of other tests imposed as a condition of REIT qualification, as long as the failures are attributable to reasonable cause and not willful neglect. A REIT would be required to pay a penalty of \$50,000, however, in the case of each failure.

- o We have certain distribution requirements

As a REIT, we must distribute at least 90% of our REIT taxable income (determined without regard to the deduction for dividends paid and by excluding any net capital gain). The required distribution limits the amount we have available for other business purposes, including amounts to fund our growth. Also, it is possible that because of the differences between the time we actually receive revenue or pay expenses and the period we report those items for distribution purposes, we may have to borrow funds on a short-term basis to meet the 90% distribution requirement.

26

- o We are also subject to other tax liabilities

Even if we qualify as a REIT, we may be subject to certain federal, state and local taxes on our income and property. Any of these taxes would reduce our operating cash flow.

- o Limits on ownership of our common stock could have adverse consequences to you and could limit your opportunity to receive a premium on our stock

To maintain our qualification as a REIT for federal income tax purposes, not more than 50% in value of the outstanding shares of our capital stock may be owned, directly or indirectly, by five or fewer individuals (as defined in the federal tax laws to include certain entities). Primarily to facilitate maintenance of our qualification as a REIT for federal income tax purposes, our charter will prohibit ownership, directly or by the attribution provisions of the federal tax laws, by any person of more than 9.8% of the lesser of the number or value of the issued and outstanding shares of our common stock and will prohibit ownership, directly or by the attribution provisions of the federal tax laws, by any person of more than 9.8% of the lesser of the number or value of the issued and outstanding shares of any class or series of our preferred stock. Our board of directors, in its sole and absolute discretion, may waive or modify the ownership limit with respect to one or more persons who would not be treated as "individuals" for purposes of the federal tax laws if it is satisfied, based upon information required to be provided by the party seeking the waiver and upon an opinion of counsel satisfactory to the board of directors, that ownership in excess of this limit will not otherwise jeopardize our status as a REIT for federal income tax purposes.

The ownership limit may have the effect of delaying, deferring or preventing a change in control and, therefore, could adversely affect our shareholders' ability to realize a premium over the then-prevailing market price for our common stock in connection with a change in control.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

- o A REIT cannot invest more than 20% of its total assets in the stock or securities of one or more taxable REIT subsidiaries; therefore, FIDAC cannot constitute more than 20% of our total assets

A taxable REIT subsidiary is a corporation, other than a REIT or a qualified REIT subsidiary, in which a REIT owns stock and which elects taxable REIT subsidiary status. The term also includes a corporate subsidiary in which the taxable REIT subsidiary owns more than a 35% interest. A REIT may own up to 100% of the stock of one or more taxable REIT subsidiaries. A taxable REIT subsidiary may earn income that would not be qualifying income if earned directly by the parent REIT. Overall, at the close of any calendar quarter, no more than 20% of the value of a REIT's assets may consist of stock or securities of one or more taxable REIT subsidiaries.

The stock and securities of FIDAC, our only taxable REIT subsidiary, are expected to represent less than 20% of the value of our total assets. Furthermore, we intend to monitor the value of our investments in the stock and securities of FIDAC (and any other taxable REIT subsidiary in which we may invest) to ensure compliance with the above-described 20% limitation. We cannot assure you, however, that we will always be able to comply with the 20% limitation so as to maintain REIT status.

- o Taxable REIT subsidiaries are subject to tax at the regular corporate rates, are not required to distribute dividends, and the amount of dividends a taxable REIT subsidiary can pay to its parent REIT may be limited by REIT gross income tests

A taxable REIT subsidiary must pay income tax at regular corporate rates on any income that it earns. FIDAC will pay corporate income tax on its taxable income, and its after-tax net income will be available for distribution to us. Such income, however, is not required to be distributed.

Moreover, the annual gross income tests that must be satisfied to ensure REIT qualification may limit the amount of dividends that we can receive from FIDAC and still maintain our REIT status. Generally, not more than 25% of our gross income can be derived from non-real estate related sources, such as dividends from a taxable REIT subsidiary. If, for any taxable year, the dividends we received from FIDAC, when added to our other items of non-real estate related income, represented more than 25% of our total gross income for the year, we could be denied REIT status, unless we were able to demonstrate, among other things, that our failure of the gross income test was due to reasonable cause and not willful neglect.

27

The limitations imposed by the REIT gross income tests may impede our ability to distribute assets from FIDAC to us in the form of dividends. Certain asset transfers may, therefore, have to be structured as purchase and sale transactions upon which FIDAC recognizes taxable gain.

- o If interest accrues on indebtedness owed by a taxable REIT subsidiary to its parent REIT at a rate in excess of a commercially reasonable rate, or if transactions between a REIT and a taxable REIT subsidiary are entered into on other than arm's-length terms, the REIT may be subject to a penalty tax

If interest accrues on an indebtedness owed by a taxable REIT subsidiary to its parent REIT at a rate in excess of a commercially reasonable rate, the REIT is subject to tax at a rate of 100% on the excess of (i) interest payments made by a taxable REIT subsidiary to its parent REIT over (ii) the amount of interest that would have been payable had interest accrued on the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

indebtedness at a commercially reasonable rate. A tax at a rate of 100% is also imposed on any transaction between a taxable REIT subsidiary and its parent REIT to the extent the transaction gives rise to deductions to the taxable REIT subsidiary that are in excess of the deductions that would have been allowable had the transaction been entered into on arm's-length terms. We will scrutinize all of our transactions with FIDAC in an effort to ensure that we do not become subject to these taxes. We may not be able to avoid application of these taxes.

Risks of Ownership of Our Common Stock

- o Issuances of large amounts of our stock could cause the market price of our common stock to decline

As of February 26, 2007, 205,350,591 shares of our common stock were outstanding. If we issue a significant number of shares of common stock or securities convertible into common stock in a short period of time, there could be a dilution of the existing common stock and a decrease in the market price of the common stock.

- o We may change our policies without stockholder approval

Our board of directors and management determine all of our policies, including our investment, financing and distribution policies. They may amend or revise these policies at any time without a vote of our stockholders. Policy changes could adversely affect our financial condition, results of operations, the market price of our common stock or our ability to pay dividends or distributions.

- o Our governing documents and Maryland law impose limitations on the acquisition of our common stock and changes in control that could make it more difficult for a third party to acquire us

Maryland Business Combination Act

The Maryland General Corporation Law establishes special requirements for "business combinations" between a Maryland corporation and "interested stockholders" unless exemptions are applicable. An interested stockholder is any person who beneficially owns 10% or more of the voting power of our then-outstanding voting stock. Among other things, the law prohibits for a period of five years a merger and other similar transactions between us and an interested stockholder unless the board of directors approved the transaction prior to the party's becoming an interested stockholder. The five-year period runs from the most recent date on which the interested stockholder became an interested stockholder. The law also requires a super majority stockholder vote for such transactions after the end of the five-year period. This means that the transaction must be approved by at least:

- o 80% of the votes entitled to be cast by holders of outstanding voting shares; and

28

- o two-thirds of the votes entitled to be cast by holders of outstanding voting shares other than shares held by the interested stockholder or an affiliate of the interested stockholder with whom the business combination is to be effected.

As permitted by the Maryland General Corporation Law, we have elected not to be governed by the Maryland business combination statute. We made this election by opting out of this statute in our articles of incorporation. If,

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

however, we amend our articles of incorporation to opt back in to the statute, the business combination statute could have the effect of discouraging offers to acquire us and of increasing the difficulty of consummating any such offers, even if our acquisition would be in our stockholders' best interests.

Maryland Control Share Acquisition Act

Maryland law provides that "control shares" of a Maryland corporation acquired in a "control share acquisition" have no voting rights except to the extent approved by a vote of the stockholders. Two-thirds of the shares eligible to vote must vote in favor of granting the "control shares" voting rights. "Control shares" are shares of stock that, taken together with all other shares of stock the acquirer previously acquired, would entitle the acquirer to exercise voting power in electing directors within one of the following ranges of voting power:

- o One-tenth or more but less than one third of all voting power;
- o One-third or more but less than a majority of all voting power; or
- o A majority or more of all voting power.

Control shares do not include shares of stock the acquiring person is entitled to vote as a result of having previously obtained stockholder approval. A "control share acquisition" means the acquisition of control shares, subject to certain exceptions.

If a person who has made (or proposes to make) a control share acquisition satisfies certain conditions (including agreeing to pay expenses), he may compel our board of directors to call a special meeting of stockholders to consider the voting rights of the shares. If such a person makes no request for a meeting, we have the option to present the question at any stockholders' meeting.

If voting rights are not approved at a meeting of stockholders then, subject to certain conditions and limitations, we may redeem any or all of the control shares (except those for which voting rights have previously been approved) for fair value. We will determine the fair value of the shares, without regard to voting rights, as of the date of either:

- o the last control share acquisition; or
- o the meeting where stockholders considered and did not approve voting rights of the control shares.

If voting rights for control shares are approved at a stockholders' meeting and the acquirer becomes entitled to vote a majority of the shares of stock entitled to vote, all other stockholders may obtain rights as objecting stockholders and, there under, exercise appraisal rights. This means that you would be able to force us to redeem your stock for fair value. Under Maryland law, the fair value may not be less than the highest price per share paid in the control share acquisition. Furthermore, certain limitations otherwise applicable to the exercise of dissenters' rights would not apply in the context of a control share acquisition. The control share acquisition statute would not apply to shares acquired in a merger, consolidation or share exchange if we were a party to the transaction. The control share acquisition statute could have the effect of discouraging offers to acquire us and of increasing the difficulty of consummating any such offers, even if our acquisition would be in our stockholders' best interests.

Regulatory Risks

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

- o Loss of Investment Company Act exemption would adversely affect us

29

We intend to conduct our business so as not to become regulated as an investment company under the Investment Company Act. If we fail to qualify for this exemption, our ability to use leverage would be substantially reduced, and we would be unable to conduct our business as described in this Form 10-K.

We rely on the exclusion provided by Section 3(c)(5)(C) of the Investment Company Act. Section 3(c)(5)(C) as interpreted by the staff of the SEC, requires us to invest at least 55% of our assets in "mortgages and other liens on and interest in real estate" (or Qualifying Real Estate Assets) and a least 80% of our assets in Qualifying Real Estate Assets plus real estate related assets. The assets that we acquire, therefore, are limited by the provisions of the Investment Company Act and the rules and regulations promulgated under the Investment Company Act. If the SEC determines that any of these securities are not qualifying interests in real estate or real estate related assets, adopts a contrary interpretation with respect to these securities or otherwise believes we do not satisfy the above exceptions, we could be required to restructure our activities or sell certain of our assets. We may be required at times to adopt less efficient methods of financing certain of our mortgage assets and we may be precluded from acquiring certain types of higher yielding mortgage assets. The net effect of these factors will be to lower our net interest income. If we fail to qualify for exemption from registration as an investment company, our ability to use leverage would be substantially reduced, and we would not be able to conduct our business as described. Our business will be materially and adversely affected if we fail to qualify for this exemption.

- o Compliance with proposed and recently enacted changes in securities laws and regulations increase our costs

The Sarbanes-Oxley Act of 2002 and rules and regulations promulgated by the SEC and the New York Stock Exchange have increased the scope, complexity and cost of corporate governance, reporting and disclosure practices. We believe that these rules and regulations will make it more costly for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These rules and regulations could also make it more difficult for us to attract and retain qualified members of management and our board of directors, particularly to serve on our audit committee.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

Our executive and administrative office is located at 1211 Avenue of the Americas, Suite 2902 New York, New York 10036, telephone 212-696-0100. This office is leased under a non-cancelable lease expiring December 31, 2009.

ITEM 3. LEGAL PROCEEDINGS

From time to time, we are involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

ultimate disposition of these matters will not have a material effect on our consolidated financial statements.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

We did not submit any matters to a vote of our stockholders during the fourth quarter of 2006.

30

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock began trading publicly on October 8, 1997 and is traded on the New York Stock Exchange under the trading symbol "NLY". As of February 26, 2007, we had 205,350,591 shares of common stock issued and outstanding which were held by approximately 114,000 holders of record.

The following table sets forth, for the periods indicated, the high, low, and closing sales prices per share of our common stock as reported on the New York Stock Exchange composite tape and the cash dividends declared per share of our common stock.

	Stock Prices		
	High	Low	Clos
First Quarter ended March 31, 2006	\$12.82	\$11.34	\$12.
Second Quarter ended June 30, 2006	\$14.04	\$11.57	\$12.
Third Quarter ended September 30, 2006	\$13.25	\$12.17	\$13.
Fourth Quarter ended December 31, 2006	\$14.42	\$13.01	\$13.
	High	Low	Clos
First Quarter ended March 31, 2005	\$20.01	\$17.34	\$18.
Second Quarter ended June 30, 2005	\$20.01	\$17.68	\$17.
Third Quarter ended September 30, 2005	\$18.05	\$12.49	\$12.
Fourth Quarter ended December 31, 2005	\$12.90	\$10.90	\$10.
	Common Dividends Declared Per Share		
First Quarter ended March 31, 2006		\$0.11	
Second Quarter ended June 30, 2006		\$0.13	
Third Quarter ended September 30, 2006		\$0.14	
Fourth Quarter ended December 31, 2006		\$0.19	
First Quarter ended March 31, 2005		\$0.45	

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Second Quarter ended June 30, 2005	\$0.36
Third Quarter ended September 30, 2005	\$0.13
Fourth Quarter ended December 31, 2005	\$0.10

We intend to pay quarterly dividends and to distribute to our stockholders all or substantially all of our taxable income in each year (subject to certain adjustments). This will enable us to qualify for the tax benefits accorded to a REIT under the Code. We have not established a minimum dividend payment level and our ability to pay dividends may be adversely affected for the reasons described under the caption "Risk Factors." All distributions will be made at the discretion of our board of directors and will depend on our earnings, our financial condition, maintenance of our REIT status and such other factors as our board of directors may deem relevant from time to time. No dividends can be paid on our common stock unless we have paid full cumulative dividends on our preferred stock. From the date of issuance of our preferred stock through December 31, 2006, we have paid full cumulative dividends on our preferred stock.

31

EQUITY COMPENSATION PLAN INFORMATION

We have adopted a long term stock incentive plan for executive officers, key employees and nonemployee directors (the "Incentive Plan"). The Incentive Plan authorizes the Compensation Committee of the board of directors to grant awards, including incentive stock options as defined under Section 422 of the Code ("ISOs") and options not so qualified ("NQSOs"). The Incentive Plan authorizes the granting of options or other awards for an aggregate of the greater of 500,000 shares or 9.5% of the outstanding shares of our common stock up to a ceiling of 8,932,921 shares. For a description of our Incentive Plan, see Note 9 to the Financial Statements.

The following table provides information as of December 31, 2006 concerning shares of our common stock authorized for issuance under our existing Incentive Plan.

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Nu rema fut Incen p
Equity compensation plans approved by security holders	2,984,995	\$15.10	
Equity compensation plans not approved by security holders	-	-	
Total	2,984,995	\$15.10	

(1) The Incentive Plan authorizes the granting of options or other awards for an aggregate of the greater of 500,000 or 9.5% of the outstanding shares on a fully diluted basis of our common stock up to a ceiling of 8,932,921 shares.

ITEM 6. SELECTED FINANCIAL DATA

The following selected financial data are derived from our audited financial statements for the years ended December 31, 2006, 2005, 2004, 2003, and 2002. The selected financial data should be read in conjunction with the more detailed information contained in the Financial Statements and Notes thereto and "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this Form 10-K.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND

RESULTS OF OPERATIONS

Overview

We are a self-managed real estate investment trust ("REIT") that owns and manages a portfolio of mortgage-backed securities and agency debentures. Our principal business objective is to generate net income for distribution to our stockholders from the spread between the interest income on our investment securities and the costs of borrowing to finance our acquisition of investment securities.

We are primarily engaged in the business of investing, on a leveraged basis, in mortgage pass-through certificates, collateralized mortgage obligations and other mortgage-backed securities representing interests in or obligations backed by pools of mortgage loans (collectively, "Mortgage-Backed Securities"). We also invest in Federal Home Loan Bank ("FHLB"), Federal Home Loan Mortgage Corporation ("FHLMC"), and Federal National Mortgage Association ("FNMA") debentures. The Mortgage-Backed Securities and agency debentures are collectively referred to herein as "Investment Securities."

Under our capital investment policy, at least 75% of our total assets must be comprised of high-quality mortgage-backed securities and short-term investments. High quality securities means securities that (1) are rated within one of the two highest rating categories by at least one of the nationally recognized rating agencies, (2) are unrated but are guaranteed by the United States government or an agency of the United States government, or (3) are unrated but we determine them to be of comparable quality to rated high-quality mortgage-backed securities.

The remainder of our assets, comprising not more than 25% of our total assets, may consist of other qualified REIT real estate assets which are unrated or rated less than high quality, but which are at least "investment grade" (rated "BBB" or better by Standard & Poor's Corporation ("S&P") or the equivalent by another nationally recognized rating agency) or, if not rated, we determine them to be of comparable credit quality to an investment which is rated "BBB" or better. In addition, we may directly or indirectly invest part of this remaining 25% of our assets in other types of securities, including without limitation, unrated debt, equity or derivative securities, to the extent consistent with our REIT qualification requirements. The derivative securities in which we invest may include securities representing the right to receive interest only or a disproportionately large amount of interest, as well as inverse floaters, which may have imbedded leverage as part of their structural characteristics.

We may acquire mortgage-backed securities backed by single-family residential mortgage loans as well as securities backed by loans on multi-family, commercial or other real estate-related properties. To date, all of the mortgage-backed securities that we have acquired have been backed by

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

single-family residential mortgage loans.

We have elected to be taxed as a REIT for federal income tax purposes. Pursuant to the current federal tax regulations, one of the requirements of maintaining our status as a REIT is that we must distribute at least 90% of our REIT taxable income (determined without regard to the deduction for dividends paid and by excluding any net capital gain) to our stockholders, subject to certain adjustments.

The results of our operations are affected by various factors, many of which are beyond our control. Our results of operations primarily depend on, among other things, the level of our net interest income, the market value of our assets and the supply of and demand for such assets. Our net interest income, which reflects the amortization of purchase premiums and accretion of discounts, varies primarily as a result of changes in interest rates, borrowing costs and prepayment speeds, the behavior of which involves various risks and uncertainties. Prepayment speeds, as reflected by the Constant Prepayment Rate, or CPR, and interest rates vary according to the type of investment, conditions in financial markets, competition and other factors, none of which can be predicted with any certainty. In general, as prepayment speeds on our Mortgage-Backed Securities portfolio increase, related purchase premium amortization increases, thereby reducing the net yield on such assets. The CPR on our Mortgage Backed Securities portfolio averaged 17% and 27% for the years ended December 31, 2006 and 2005, respectively. Since changes in interest rates may significantly affect our activities, our operating results depend, in large part, upon our ability to effectively manage interest rate risks and prepayment risks while maintaining our status as a REIT.

35

The table below provides quarterly information regarding our average balances, interest income, interest expense, yield on assets, cost of funds and net interest income for the quarterly periods presented.

	Average Investment Securities Held (1)	Total Interest Income	Yield on Average Interest Earning Assets	Average Balance of Repurchase Agreements	Interest Expense	Average Cost of Funds	Average Net Int Inc
----- (ratios for the quarters have been annualized, dollars in thousand)							
Quarter Ended							
December 31, 2006	\$28,888,956	\$407,092	5.64%	\$27,118,402	\$349,302	5.15%	\$5
Quarter Ended							
September 30, 2006	\$24,976,876	\$339,737	5.44%	\$23,120,247	\$295,726	5.12%	\$4
Quarter Ended							
June 30, 2006	\$21,660,089	\$280,171	5.17%	\$20,060,978	\$242,473	4.83%	\$3
Quarter Ended							
March 31, 2006	\$16,590,859	\$194,882	4.70%	\$15,296,893	\$167,512	4.38%	\$2

(1) Does not reflect unrealized gains/(losses).

The following table presents the CPR experienced on our Mortgage-Backed

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Securities portfolio, on an annualized basis, for the quarterly periods presented.

Quarter Ended	CPR
-----	---
December 31, 2006	15%
September 30, 2006	16%
June 30, 2006	19%
March 31, 2006	18%
December 31, 2005	28%
September 30, 2005	28%
June 30, 2005	27%
March 31, 2005	25%

We believe that the CPR in future periods will depend, in part, on changes in and the level of market interest rates across the yield curve, with higher CPRs expected during periods of declining interest rates and lower CPRs expected during periods of rising interest rates.

We continue to explore alternative business strategies, alternative investments and other strategic initiatives to complement our core business strategy of investing, on a leveraged basis, in high quality Investment Securities. No assurance, however, can be provided that any such strategic initiative will or will not be implemented in the future.

For the purposes of computing ratios relating to equity measures, throughout this report, equity includes Series B Cumulative Convertible Preferred Stock, which has been treated under GAAP as temporary equity.

Critical Accounting Policies

Management's discussion and analysis of financial condition and results of operations is based on the amounts reported in our financial statements. These financial statements are prepared in conformity with accounting principles generally accepted in the United States of America. In preparing the financial statements, management is required to make various judgments, estimates and assumptions that affect the reported amounts. Changes in these estimates and assumptions could have a material effect on our financial statements. The following is a summary of our policies most affected by management's judgments, estimates and assumptions.

Market Valuation of Investment Securities: All assets classified as available-for-sale are reported at fair value, based on market prices. Although we generally intend to hold most of our Investment Securities until maturity, we may, from time to time, sell any of our Investment Securities as part our overall management of our portfolio. Accordingly, we are required to classify

all of our Investment Securities as available-for-sale. Our policy is to obtain market values from independent sources. Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. The determination of whether a security is other-than-temporarily impaired involves judgements and assumptions based on subjective and objective factors. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Investments with unrealized losses are not

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

considered other-than-temporarily impaired if the Company has the ability and intent to hold the investments for a period of time, to maturity if necessary, sufficient for a forecasted market price recovery up to or beyond the cost of the investments. Unrealized losses on Investment Securities that are considered other than temporary, as measured by the amount of decline in fair value attributable to factors other than temporary, are recognized in income and the cost basis of the Investment Securities is adjusted. Other-than-temporary impaired losses on securities totaled \$52.3 million for the year ended December 31, 2006 and \$83.1 million for the year ended December 31, 2005. There were no such adjustments for the year ended December 31, 2004 .

Interest income: Interest income is accrued based on the outstanding principal amount of the Investment Securities and their contractual terms. Premiums and discounts associated with the purchase of the Investment Securities are amortized or accreted into interest income over the projected lives of the securities using the interest method. Our policy for estimating prepayment speeds for calculating the effective yield is to evaluate historical performance, street consensus prepayment speeds, and current market conditions. If our estimate of prepayments is incorrect, we may be required to make an adjustment to the amortization or accretion of premiums and discounts that would have an impact on future income.

Repurchase Agreements: We finance the acquisition of our Investment Securities through the use of repurchase agreements. Repurchase agreements are treated as collateralized financing transactions and are carried at their contractual amounts, including accrued interest, as specified in the respective agreements.

Income Taxes: We have elected to be taxed as a Real Estate Investment Trust (or REIT) and intend to comply with the provisions of the Internal Revenue Code of 1986, as amended (or the Code), with respect thereto. Accordingly, the Company will not be subjected to federal income tax to the extent of its distributions to shareholders and as long as certain asset, income and stock ownership tests are met. The Company and FIDAC have made a joint election to treat FIDAC as a taxable REIT subsidiary. As such, FIDAC is taxable as a domestic C corporation and subject to federal and state and local income taxes based upon its taxable income.

Impairment of Intangibles: The Company's acquisition of FIDAC was accounted for using the purchase method. The cost of FIDAC was allocated to the assets acquired, including identifiable intangible assets, and the liabilities assumed based on their estimated fair values at the date of acquisition. The excess of cost over the fair value of the net assets acquired was recognized as goodwill. Intangible assets are periodically reviewed for potential impairment. This evaluation requires significant judgment. During 2006, we recognized impairment charges totaling \$2.5 million on intangible assets relating to customer relationships.

Results of Operations

Net Income Summary

For the year ended December 31, 2006, our net income was \$93.8 million or \$0.44 basic income per average share related to common shareholders, as compared to \$9.2 million net loss or \$0.19 basic loss per average share for the year ended December 31, 2005. For the year ended December 31, 2004, our net income was \$248.6 million or \$2.04 basic income per average share related to common shareholders. Net income per average share increased by \$0.63 per average share available to common shareholders and total net income increased \$103.0 million for the year ended December 31, 2006, when compared to the year ended December 31, 2005. We attribute the increase in total net income for the year ended December 31, 2006 compared to the year ended December 31, 2005 to the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

increase in net interest income, reduction in losses on sales of securities and losses on other-than-temporarily impaired securities, and gains on termination of interest rate swaps. Net interest income increased by \$30.4 million for the year ended December 31, 2006, as compared to the year ended December 31, 2005, due to the increase in interest earning assets from the deployment of additional

37

capital we raised in 2006. For the year ended December 31, 2006, net loss on sale of Mortgage-Backed Securities was \$3.9 million, as compared to a net loss of \$53.2 million in 2005. The loss on other-than-temporarily impaired securities totaled \$52.3 million for the year ended December 31, 2006, as compared to \$83.1 million for the year ended December 31, 2005. During the year ended December 31, 2006, the Company realized a gain on the termination of interest rate swaps of \$10.7 million. There was no gain on termination of swaps for the year ended December 31, 2005. We attribute the decrease in total net income for the year ended December 31, 2005 compared to the year ended December 31, 2004 to the decline in interest rate spread, losses on sales of securities, and losses on other-than-temporarily impaired securities. The interest rate spread decreased from 1.51% for the year ended December 31, 2004 to 0.53% for the year ended December 31, 2005. The total amortization for the year ended December 31, 2005 was \$154.3 million and for the year ended December 31, 2004 was \$179.6 million. For the year ended December 31, 2005, net loss on sale of Mortgage-Backed Securities was \$53.2 million, as compared to a net gain of \$5.2 million in 2004. The table below presents the net income (loss) summary for the years ended December 31, 2006, 2005, and 2004.

Net Income (Loss) Summary
(dollars in thousands, except for per share data)

	Year Ended December 31, 2006	Year Ended December 31, 2005

38

Interest Income and Average Earning Asset Yield

We had average earning assets of \$23.0 billion for the year ended December 31, 2006. We had average earning assets of \$18.5 billion for the year ended December 31, 2005. We had average earning assets of \$16.4 billion for the year ended December 31, 2004. Our primary source of income is interest income. Our interest income was \$1.2 billion for the year ended December 31, 2006, \$705.0 million for the year ended December 31, 2005, and \$532.3 million for the year ended December 31, 2004. The yield on average investment securities was 5.31%, 3.80%, and 3.25% for the respective periods.

Interest Expense and the Cost of Funds

Our largest expense is the cost of borrowed funds. We had average borrowed funds of \$21.4 billion and total interest expense of \$1.1 billion for the year ended December 31, 2006. We had average borrowed funds of \$17.4 billion

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

and total interest expense of \$568.6 million for the year ended December 31, 2005. We had average borrowed funds of \$15.5 billion and total interest expense of \$270.1 million for the year ended December 31, 2004. Our average cost of funds was 4.93% for the year ended December 31, 2006 and 3.27 % for the year ended December 31, 2005 and 1.74% for the year December 31, 2004. The cost of funds rate increased by 166 basis points and the average borrowed funds increased by \$4.0 billion for the year ended December 31, 2006 when compared to the year ended December 31, 2005. Interest expense for the year 2006 increased by \$486.5 million over the prior year due to the substantial increase in the average repurchase balance and the increase in the cost of funds rate. The cost of funds rate increased by 153 basis points and the average borrowed funds increased by \$1.9 billion for the year ended December 31, 2005, when compared to the year ended December 31, 2004. Interest expense for the year ended December 31, 2005 increased by \$298.5 million over the previous year due to the increase in the average repurchase balance and substantial increase in the cost of funds rate. Since a substantial portion of our repurchase agreements are short term, changes in market rates are directly reflected in our interest expense. Our average cost of funds was 0.10% below average one-month LIBOR and 0.28% below average six-month LIBOR for the year ended December 31, 2006. Our average cost of funds was 0.06% below average one-month LIBOR and 0.45% below average six-month LIBOR for the year ended December 31, 2005. Our average cost of funds was 0.24% above average one-month LIBOR and 0.06% below average six-month LIBOR for the year ended December 31, 2004. Since the Federal Reserve continued to raise the federal funds rate after December 31, 2005, we experienced an increase in our funding costs.

The table below shows our average borrowed funds and average cost of funds as compared to average one-month and average six-month LIBOR for the years ended December 31, 2006, 2005, 2004, 2003, and 2002 and the four quarters in 2006.

Net Interest Income

Our net interest income which equals interest income less interest expense, totaled \$166.9 million for the year ended December 31, 2006, \$136.5 million for the year ended December 31, 2005 and \$262.2 million for the year ended December 31, 2004. Our net interest income increased for the year ended December 31, 2006, as compared to the year ended December 31, 2005, because of the increased average asset base in 2006. In 2006 average assets increased because of the deployment of additional capital. Our net interest spread, which equals the yield on our average assets for the period less the average cost of funds for the period, was 0.38% for the year ended December 31, 2006 as compared to 0.53% for the year ended December 31, 2005 and 1.51% for the year ended December 31, 2004. This 15 basis point decrease was the result in the increased funding cost of 166 basis points, offset by the increase in yield of 151 basis points. Our net interest income increased for the year ended December 31, 2006 as compared to the year ended December 31, 2005 by \$30.4 million because of the increased average asset base for 2006. The net interest income for the year ended December 31, 2005 decreased by \$125.7 million, when compared to the year ended December 31, 2004. This reduction was the result of the interest rate spread decreasing by 98 basis points.

40

The table below shows our interest income by earning asset type, average earning assets by type, total interest income, interest expense, average repurchase agreements, average cost of funds, and net interest income for the years ended December 31, 2006, 2005, 2004, 2003 and 2002 and the four quarters in 2006.

Investment Advisory and Service Fees

FIDAC is a registered investment advisor which specializes in managing fixed income securities. FIDAC expanded its line of business in 2006 to include the management of equity securities, initially for us and an affiliated person and collateralized debt obligations. FIDAC generally receives annual net investment advisory fees of approximately 10 to 20 basis points of the gross assets it manages, assists in managing or supervises. At December 31, 2006, FIDAC had under management approximately \$2.6 billion in net assets and \$15.1 billion in gross assets, compared to \$2.3 billion in net assets and \$18.7 billion in gross assets at December 31, 2005. Net investment advisory and service fees for the years ended December 31, 2006, 2005, and 2004 totaled \$18.9 million, \$27.6 million, and \$9.7 million, respectively, net of fees paid to third parties pursuant to distribution service agreements for facilitating and promoting distribution of shares or units to FIDAC's clients. Gross assets under management will vary from time to time because of changes in the amount of net assets FIDAC manages as well as changes in the amount of leverage used by the various funds and accounts FIDAC manages. Although net assets under management increased by approximately \$300 million from December 31, 2005 to December 31, 2006, gross assets under management declined during the same time period, as leverage declined on the assets under management.

Gains and Losses on Sales of Investment Securities and Interest Rate Swaps

For the year ended December 31, 2006, we sold investment securities with an aggregate historical amortized cost of \$3.2 billion for an aggregate loss of \$3.9 million. In addition, the Company had a \$10.7 million gain on the termination of interest rate swaps with a notional value of \$1.2 billion. For the year ended December 31, 2005, we sold investment securities with an aggregate historical amortized cost of \$3.4 billion for an aggregate loss of \$53.2 million. For the year ended December 31, 2004, we sold mortgage-backed securities with an aggregate historical amortized cost of \$591.7 million for an aggregate gain of \$5.2 million. The loss on sale of assets for the year ended December 31, 2005 was due to portfolio rebalancing that was initiated in the fourth quarter of 2005. We determined that certain assets purchased in a much lower interest rate environment of 2003 and 2004 were unlikely to receive their amortized cost basis, and commenced selling these assets. The rebalancing was done with the objective of improving future financial performance. A positive difference between the sale price and the historical amortized cost of our

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Mortgage-Backed Securities is a realized gain and increases income accordingly. We do not expect to sell assets on a frequent basis, but may from time to time sell existing assets to move into new assets, which our management believes might have higher risk-adjusted returns, or to manage our balance sheet as part of our asset/liability management strategy.

Income from Trading Securities

Income from trading securities totaled \$4.0 million for the year ended December 31, 2006. FIDAC expanded its line of business in 2006 to include the management of equity securities, initially for us and an affiliated person. During the year ended December 31, 2005 and 2004, we did not earn income from trading securities.

Impairment of intangible for Customer Relationships

During the year ended December 31, 2006, intangibles were evaluated for possible impairment. It was determined that an impairment charge of \$1.4 million was necessary based on the decline in expected future cash flows on one customer relationship. We also terminated an investment advisory agreement during the year ended December 31, 2006. The expected cash flows from the contract were valued as a component of the intangible for customer relationships on June 4, 2004, the date of the acquisition of FIDAC. The value of \$1.1 million was deemed to be impaired. The total impairment of intangible assets relating to customer relationships is \$2.5 million for the year ended December 31, 2006. There were no impairment charges during the years ended December 31, 2005 and 2004.

Loss on other-than-temporarily impaired securities

At each quarter end, the Company reviewed each of its securities to determine if an other-than-temporary impairment charge would be necessary. It was determined that certain securities that were in an unrealized loss position, the Company did not intend to hold them for a period of time, to maturity if necessary, sufficient for a forecasted market price recovery up to or beyond the cost of the investments. For the years ended December 31, 2006 and 2005, the loss on other-than temporarily impaired securities totaled \$52.3 million and \$83.1 million, respectively

General and Administrative Expenses

General and administrative (or G&A) expenses were \$40.1 million for the year ended December 31, 2006, \$26.3 million for the year ended December 31, 2005, \$24.0 million for the year ended December 31, 2004. G&A expenses as a percentage of average total assets was 0.17%, 0.14%, and 0.14% for the years ended December 31, 2006, 2005, and 2004, respectively. The increase in G&A expenses of \$13.8 million for the year December 31, 2006, was primarily the result of increased salaries, directors and officers insurance and additional costs related to FIDAC. Staff increased from 30 at the end of 2004 to 31 at the end of 2005 and 34 at the end of 2006. Salaries and bonuses for the years ended December 31, 2006, 2005, and 2004 were \$28.7 million, \$18.8 million and \$17.2 million, respectively. The table below shows our total G&A expenses as compared to average total assets and average equity for the years ended December 31, 2006, 2005, 2004, 2003 and 2002 and the four quarters in 2006.

G&A Expenses and Operating Expense Ratios

(Ratios for the four quarters in 2006 have been annualized,
dollars in thousands)

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

	Total G&A Expenses	Total G&A Expenses/Average Assets	Total G&A Expenses/Average Equity
For the Year Ended December 31, 2006	\$40,063	0.17%	2.00%
For the Year Ended December 31, 2005	\$26,278	0.14%	1.63%
For the Year Ended December 31, 2004	\$24,029	0.14%	1.55%
For the Year Ended December 31, 2003	\$16,233	0.13%	1.45%

42

Net Income and Return on Average Equity

Our net income was \$93.8 million for the year ended December 31, 2006, our net loss was \$9.2 million for the year ended December 31, 2005, and our net income was \$248.6 million for the year ended December 31, 2004. Our return on average equity was 4.68% for the year ended December 31, 2006, (0.57%) for the year ended December 31, 2005, and 16.04% for the year ended December 31, 2004. Even with the increase in G&A expenses and the reduction of net investment advisory and service fees, net income for the year increase by \$103.0 million. We attribute the increase in total net income for the year ended December 31, 2006 over the year ended December 31, 2005 to the increase in net interest income, the reduction in losses realized on sale of assets and the loss on other-than-temporarily impaired securities, and the gains realized on the termination of interest rate swaps. We attribute the decrease in total net income for the year ended December 31, 2005 over the year ended December 31, 2004 to the decrease in interest rate spread, the loss realized on sale of assets during the repositioning and the loss on other-than-temporarily impaired securities

The table below shows our net interest income, net investment advisory and service fees, gain on sale of investment securities and termination of interest rate swaps, G&A expenses, loss on other-than-temporarily impaired securities income from equity investment and income taxes each as a percentage of average equity, and the return on average equity for the years ended December 31, 2006, 2005, 2004, 2003, and 2002 and for the four quarters in 2006.

Financial Condition

Investment Securities, Available for Sale

All of our Mortgage-Backed Securities at December 31, 2006, 2005, and 2004 were adjustable-rate or fixed-rate mortgage-backed securities backed by single-family mortgage loans. All of the mortgage assets underlying these mortgage-backed securities were secured with a first lien position on the underlying single-family properties. All of our mortgage-backed securities were FHLMC, FNMA or GNMA mortgage pass-through certificates or CMOs, which carry an implied "AAA" rating. We mark-to-market all of our earning assets to fair value.

All of our agency debentures are callable and carry an implied "AAA" rating. We mark-to-market all of our agency debentures to fair value.

We accrete discount balances as an increase in interest income over the life of discount investment securities and we amortize premium balances as a decrease in interest income over the life of premium investment securities. At December 31, 2006, 2005, and 2004 we had on our balance sheet a total of \$78.4 million, \$21.5 million and \$1.1 million, respectively, of unamortized discount (which is the difference between the remaining principal value and current historical amortized cost of our investment securities acquired at a price below principal value) and a total of \$219.1 million, \$242.1 million and \$427.0 million, respectively, of unamortized premium (which is the difference between the remaining principal value and the current historical amortized cost of our investment securities acquired at a price above principal value).

We received mortgage principal repayments of \$5.1 billion for the year ended December 31, 2006, \$7.1 billion for the year ended December 31, 2005, and \$6.5 billion for the year ended December 31, 2004. The overall prepayment speed for the year ended December 31, 2006, 2005 and 2004 was 17%, 27%, and 29% respectively. During the year ended December 31, 2006, the CPR declined to 17%,

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

from 27%, due to a decline in refinancing activity. During the year ended December 31, 2004, the annual prepayment speed was the highest in our history at 29%. Given our current portfolio composition, if mortgage principal prepayment rates were to increase over the life of our mortgage-backed securities, all other factors being equal, our net interest income would decrease during the life of these mortgage-backed securities as we would be required to amortize our net premium balance into income over a shorter time period. Similarly, if mortgage principal prepayment rates were to decrease over the life of our mortgage-backed securities, all other factors being equal, our net interest income would increase during the life of these mortgage-backed securities as we would amortize our net premium balance over a longer time period.

The table below summarizes our Investment Securities at December 31, 2006, 2005, 2004, 2003, and 2002 and September 30, 2006, June 30, 2006, and March 31, 2006.

Trading Securities and Trading Securities Sold, Not Yet Purchased

Trading securities and trading securities sold, not yet purchased are included in the balance sheet as a result of consolidating the financial statements, of an affiliated investment fund. Trading securities owned and trading account securities sold, but not yet purchased consisted of securities at fair values as of December 31, 2006. The resulting realized and unrealized gains and losses are reflected in the statements of operations. The fair value of the trading securities was \$18.4 million and the trading securities sold, not yet purchased was \$41.9 million at December 31, 2006.

Borrowings

To date, our debt has consisted entirely of borrowings collateralized by a pledge of our investment securities. These borrowings appear on our balance sheet as repurchase agreements. At December 31, 2006, we had established uncommitted borrowing facilities in this market with 30 lenders in amounts which

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

we believe are in excess of our needs. All of our investment securities are currently accepted as collateral for these borrowings. However, we limit our borrowings, and thus our potential asset growth, in order to maintain unused borrowing capacity and thus increase the liquidity and strength of our balance sheet.

For the year ended December 31, 2006, the term to maturity of our borrowings ranged from one day to three years, with a weighted average original term to maturity of 194 days at December 31, 2006. For the year ended December 31, 2005, the term to maturity of our borrowings ranged from one day to three years, with a weighted average original term to maturity of 163 days at December 31, 2005. For the year ended December 31, 2004, the term to maturity of our borrowings ranged from one day to three years, with a weighted average original term to maturity of 211 days at December 31, 2004.

At December 31, 2006, the weighted average cost of funds for all of our borrowings 5.14% and the weighted average term to next rate adjustment was 125 days. At December 31, 2005, the weighted average cost of funds for all of our borrowings was 4.16% and the weighted average term to next rate adjustment was 79 days. At December 31, 2004, the weighted average cost of funds for all of our borrowings was 2.46% and the weighted average term to next rate adjustment was 111 days.

Liquidity

Liquidity, which is our ability to turn non-cash assets into cash, allows us to purchase additional investment securities and to pledge additional assets to secure existing borrowings should the value of our pledged assets decline. Potential immediate sources of liquidity for us include cash balances and unused borrowing capacity. Unused borrowing capacity will vary over time as the market value of our investment securities varies. Our balance sheet also generates liquidity on an on-going basis through mortgage principal repayments and net earnings held prior to payment as dividends. Should our needs ever exceed these on-going sources of liquidity plus the immediate sources of liquidity discussed above, we believe that in most circumstances our investment securities could be sold to raise cash. The maintenance of liquidity is one of the goals of our capital investment policy. Under this policy, we limit asset growth in order to preserve unused borrowing capacity for liquidity management purposes.

Borrowings under our repurchase agreements increased by \$13.9 billion to \$27.5 billion at December 31, 2006, from \$13.6 billion at December 31, 2005. The increase in borrowings was the result of our deployment of additional capital raised during 2006, which permitted us to increase our borrowings.

We anticipate that, upon repayment of each borrowing under a repurchase agreement, we will use the collateral immediately for borrowing under a new repurchase agreement. We have not at the present time entered into any commitment agreements under which the lender would be required to enter into new repurchase agreements during a specified period of time, nor do we presently plan to have liquidity facilities with commercial banks.

Under our repurchase agreements, we may be required to pledge additional assets to our repurchase agreement counterparties (i.e., lenders) in the event the estimated fair value of the existing pledged collateral under such agreements declines and such lenders demand additional collateral (a "margin call"), which may take the form of additional securities or cash. Similarly, if the estimated fair value of investment securities increase due to changes in

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

market interest rates of market factors, lenders may release collateral back to us. Specifically, margin calls result from a decline in the value of the our Mortgage-Backed Securities securing our repurchase agreements, prepayments on the mortgages securing such Mortgage-Backed Securities and to changes in the estimated fair value of such Mortgage-Backed Securities generally due to principal reduction of such Mortgage-Backed Securities from scheduled amortization and resulting from changes in market interest rates and other market factors. Through December 31, 2006, we did not have any margin calls on our repurchase agreements that we were not able to satisfy with either cash or additional pledged collateral. However, should prepayment speeds on the mortgages underlying our Mortgage-Backed Securities and/or market interest rates suddenly increase, margin calls on our repurchase agreements could result, causing an adverse change in our liquidity position.

The following table summarizes the effect on our liquidity and cash flows from contractual obligations for repurchase agreements, the non-cancelable office lease and employment agreements at December 31, 2006.

	(dollars in thousands)			
Contractual Obligations	Within One Year	One to Three Years	Three to Five Years	More than Five Years
Repurchase agreements	\$26,114,020	-	\$1,200,000	\$200,000
Interest expense on repurchase agreements	148,416	122,532	113,272	38,299
Long-term operating lease obligations	532	1,064	-	-
Employment contracts	13,432	-	-	-
Total	\$26,276,400	\$123,596	\$1,313,272	\$238,299

Stockholders' Equity

During the year ended December 31, 2006, we declared dividends to common shareholders totaling \$102.6 million or \$0.57 per share, of which \$39.0 million was paid on January 26, 2007. During the year ended December 31, 2006, we declared and paid dividends to Series A Preferred shareholders totaling \$14.6 million or \$1.97 per share, and Series B Preferred shareholders totaling \$5.0 million or \$1.08. During the year ended December 31, 2005, we declared and paid dividends to common shareholders totaling \$127.1 million or \$1.04 per share, of which \$12.4 million was paid on January 27, 2006. During the year ended December 31, 2005 we declared and paid dividends to Series A Preferred shareholders totaling \$14.6 million or \$1.97 per share.

On August 16, 2006, the Company entered into an underwriting agreement pursuant to which it sold 40,825,000 shares of its common stock for net proceeds before expenses of approximately \$476.7 million. This transaction settled on August 22, 2006.

On April 6, 2006, the Company entered into an underwriting agreement pursuant to which it sold 39,215,000 shares of its common stock for net proceeds before expenses of approximately \$437.7 million. On April 6, 2006, the Company entered into a second underwriting agreement pursuant to which it sold 4,600,000 shares of its 6% Series B Cumulative Convertible Preferred Stock for net proceeds before expenses of approximately \$111.5 million. Each of these

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

transactions settled on April 12, 2006. The 6% Series B Cumulative Preferred Stock has been treated under GAAP as temporary equity. For the purpose of computing ratios relating to equity measures, the Series B Preferred Stock has been included in equity.

On August 3, 2006 we entered into an ATM Equity Offering(sm) Sales Agreement with Merrill Lynch & Co. and Merrill Lynch, Pierce, Fenner & Smith Incorporated (or Merrill Lynch), relating to the sale of shares of our common stock from time to time through Merrill Lynch. Sales of the shares, if any, will be made by means of ordinary brokers' transaction on the New York Stock Exchange. During the quarter ended December 31, 2006 we sold 500,000 shares of our common stock under this program. On August 3, 2006, we also entered into an ATM Equity Sales Agreement with UBS Securities LLC (or UBS Securities), relating to the sale of shares of our common stock from time to time through UBS Securities. Sales of the shares, if any, will be made by means of ordinary brokers' transaction on the New York Stock Exchange. During the quarter ended December 31, 2006, we did not sell any shares of our common stock under this program. We refer to share issuance programs under these two agreements as the ATM Programs.

47

During the year ended December 31, 2006, 1,598,500 shares of the Company's common stock were issued through the ATM Programs and Equity Shelf Program, totaling net proceeds of \$20.9 million. During the year ended December 31, 2006, 22,160 options were exercised under the long-term compensation plan for an aggregate exercise price of \$183,000.

During the year ended December 31, 2005, 2,381,550 shares of the Company's common stock were issued through the ESP, totaling net proceeds of \$40.1 million. During the year ended December 31, 2005, 16,128 options were exercised under the long-term compensation plan for an aggregate exercise price of \$253,000. In addition, 24,253 common shares were sold through the dividend reinvestment and direct purchase program for \$440,000 during the year ended December 31, 2005.

During the year ended December 31, 2004, 2,103,525 shares were issued through the Equity Shelf Program totaling net proceeds of \$37.5 million. During the year ended December 31, 2004, 57,000 options were exercised under the long-term compensation plan for an aggregate exercise price of \$856,000. In addition, 127,020 shares were purchased in the dividend reinvestment and direct purchase program at \$2.3 million.

On January 21, 2004, the Company entered into an underwriting agreement pursuant to which the Company raised net proceeds of approximately \$363.6 million in an offering of 20,700,000 shares of common stock. On March 31, 2004, the Company entered into an underwriting agreement pursuant to which the Company raised net proceeds of approximately \$102.9 million through an offering of 4,250,000 shares of 7.875% Series A Cumulative Redeemable Preferred Stock, which settled on April 5, 2004. On October 14, 2004, the Company entered into an underwriting agreement pursuant to which the Company raised net proceeds of approximately \$74.5 million through an offering of 3,162,500 shares of 7.875% Series A Cumulative Redeemable Preferred Stock, which settled on October 19, 2004.

The FIDAC acquisition was completed on June 4, 2004. We issued 2,201,080 common shares to the shareholders of FIDAC, based on the December 31, 2003 closing price of \$18.40. We continue to operate as a self-managed and self-advised real estate investment trust, with FIDAC operating as our wholly-owned taxable REIT subsidiary. We will not pay any consideration under

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

the cash out provisions contained in the merger agreement pursuant to which we acquired FIDAC.

With our "available-for-sale" accounting treatment, unrealized fluctuations in market values of assets do not impact our GAAP or taxable income but rather are reflected on our balance sheet by changing the carrying value of the asset and stockholders' equity under "Accumulated Other Comprehensive Income (Loss)." By accounting for our assets in this manner, we hope to provide useful information to stockholders and creditors and to preserve flexibility to sell assets in the future without having to change accounting methods.

As a result of this mark-to-market accounting treatment, our book value and book value per share are likely to fluctuate far more than if we used historical amortized cost accounting. As a result, comparisons with companies that use historical cost accounting for some or all of their balance sheet may not be meaningful.

The table below shows unrealized gains and losses on the Investment Securities and interest rate swaps in our portfolio.

Unrealized Gains and Losses				

(dollars in thousands)				
At December 31,				
	2006	2005	2004	2003

Unrealized gain	\$112,596	\$ 5,027	\$ 23,021	\$ 23,021
Unrealized loss	(188,708)	(211,601)	(143,821)	(7,000)
Net Unrealized (loss) gain	(\$76,112)	(\$206,574)	(\$120,800)	(\$16,979)
	=====			
Net unrealized losses as % of investment securities principal amount	(0.25%)	(1.30%)	(0.63%)	(0.74%)
Net unrealized losses as % of investment securities amortized cost	(0.25%)	(1.28%)	(0.62%)	(0.74%)

Unrealized changes in the estimated net market value of investment securities have one direct effect on our potential earnings and dividends: positive mark-to-market changes increase our equity base and allow us to increase our borrowing capacity while negative changes tend to limit borrowing capacity under our capital investment policy. A very large negative change in the net market value of our investment securities might impair our liquidity position, requiring us to sell assets with the likely result of realized losses upon sale. The net unrealized loss on available for sale securities and interest rate swaps was \$76.1 million, or 0.25% of the amortized cost of our investment securities as of December 31, 2006, \$206.6 million, or 1.28% of the amortized cost of our investment securities as of December 31, 2005 and \$120.8 million, or 0.62% of the amortized cost of our investment securities as of December 31, 2004.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Mortgage-Backed Securities with a carrying value of \$7.0 billion were in a continuous unrealized loss position over 12 months at December 31, 2006 in the amount of \$138.2 million. Mortgage-Backed Securities with a carrying value of \$6.4 billion were in a continuous unrealized loss position for less than 12 months at December 31, 2006 in the amount of \$30.2 million. Mortgage-Backed Securities with a carrying value of \$4.6 billion were in a continuous unrealized loss position over 12 months at December 31, 2005 in the amount of \$111.1 million. Mortgage-Backed Securities with a carrying value of \$8.4 billion were in a continuous unrealized loss position for less than 12 months at December 31, 2005 in the amount of \$100.5 million. The decline in value of these securities is solely due to increases in interest rates. All of the Mortgage-Backed Securities are "AAA" rated or carry an implied "AAA" rating. During the years ended December 31, 2006 and 2005, the Company recorded an impairment loss of \$52.3 million and \$83.1 million. The remaining investments are not considered other-than-temporarily impaired since the Company currently has the ability and intent to hold the investments for a period of time or to maturity, if necessary, sufficient for a forecasted market price recovery up to or beyond the cost of the investments. Also, the Company is guaranteed payment on the par value of the securities.

Leverage

Our debt-to-equity ratio at December 31, 2006, 2005, and 2004 was 10.4:1, 9.0:1, and 9.8:1, respectively. We generally expect to maintain a ratio of debt-to-equity of between 8:1 and 12:1, although the ratio may vary from this range from time to time based upon various factors, including our management's opinion of the level of risk of our assets and liabilities, our liquidity position, our level of unused borrowing capacity and over-collateralization levels required by lenders when we pledge assets to secure borrowings.

Our target debt-to-equity ratio is determined under our capital investment policy. Should our actual debt-to-equity ratio increase above the target level due to asset acquisition or market value fluctuations in assets, we will cease to acquire new assets. Our management will, at that time, present a plan to our board of directors to bring us back to our target debt-to-equity ratio; in many circumstances, this would be accomplished over time by the monthly reduction of the balance of our Mortgage-Backed Securities through principal repayments.

Asset/Liability Management and Effect of Changes in Interest Rates

We continually review our asset/liability management strategy with respect to interest rate risk, mortgage prepayment risk, credit risk and the related issues of capital adequacy and liquidity. Our goal is to provide attractive risk-adjusted stockholder returns while maintaining what we believe is a strong balance sheet.

We seek to manage the extent to which our net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. In addition, we have attempted to mitigate the potential impact on net income of periodic and lifetime coupon adjustment restrictions in our portfolio of investment securities by entering into interest rate swaps. At December 31, 2006, we entered into swap agreements with a total notional amount of \$9.3 billion. We agreed to pay a weighted average pay rate of 5.17% and receive a floating rate based on one month LIBOR. At December 31, 2005, we entered into swap agreements with a total notional amount of \$479.0 million. We agreed to pay a weighted average pay rate of 4.88% and receive a floating rate based on one month LIBOR. The interest rate swap had not settled as of December 31, 2005. We may enter into similar derivative transactions in the future by entering into interest rate collars, caps or floors or purchasing interest only securities.

Changes in interest rates may also affect the rate of mortgage principal prepayments and, as a result, prepayments on mortgage-backed securities. We will seek to mitigate the effect of changes in the mortgage principal repayment rate by balancing assets we purchase at a premium with assets we purchase at a discount. To date, the aggregate premium exceeds the aggregate discount on our mortgage-backed securities. As a result, prepayments, which result in the expensing of unamortized premium, will reduce our net income compared to what net income would be absent such prepayments.

Off-Balance Sheet Arrangements

We do not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. Further, we have not guaranteed any obligations of unconsolidated entities nor do we have any commitment or intent to provide funding to any such entities. As such, we are not materially exposed to any market, credit, liquidity or financing risk that could arise if we had engaged in such relationships.

Capital Resources

At December 31, 2006, we had no material commitments for capital expenditures.

Inflation

Virtually all of our assets and liabilities are financial in nature. As a result, interest rates and other factors drive our performance far more than does inflation. Changes in interest rates do not necessarily correlate with inflation rates or changes in inflation rates. Our financial statements are prepared in accordance with GAAP and our dividends based upon our net income as calculated for tax purposes; in each case, our activities and balance sheet are measured with reference to historical cost or fair market value without considering inflation.

Other Matters

We calculate that our qualified REIT assets, as defined in the Internal Revenue Code, are 100% of our total assets at December 31, 2006 and 2005 as compared to the Internal Revenue Code requirement that at least 75% of our total assets be qualified REIT assets. We also calculate that 99.3% and 93.3%, respectively, of our revenue qualifies for the 75% source of income test, and 100% of our revenue qualifies for the 95% source of income test, under the REIT rules for the years ended December 31, 2006 and 2005. We also met all REIT requirements regarding the ownership of our common stock and the distribution of our net income. Therefore, as of December 31, 2006, 2005 and 2004, we believe that we qualified as a REIT under the Internal Revenue Code.

We at all times intend to conduct our business so as not to become regulated as an investment company under the Investment Company Act of 1940, as amended (the "Investment Company Act"). We rely on the exclusion provided by Section 3(c)(5)(C) of the Investment Company Act. Section 3(c)(5)(C), as interpreted by the staff of the SEC, requires us to invest at least 55% of our assets in "mortgages and other liens on and interests in real estate" (or Qualifying Real Estate Assets) and a least 80% of our assets in Qualifying Real

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Estate Assets plus real estate related assets. The assets that we acquire, therefore, are limited by the provisions of the Investment Company Act and the rules and regulations promulgated under the Investment Company Act. We calculate that as of December 31, 2006, 2005 and 2004, we were in compliance with this requirement.

50

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

MARKET RISK

Market risk is the exposure to loss resulting from changes in interest rates, foreign currency exchange rates, commodity prices and equity prices. The primary market risk to which we are exposed is interest rate risk, which is highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond our control. Changes in the general level of interest rates can affect our net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with our interest-bearing liabilities, by affecting the spread between our interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of our Mortgage-Backed Securities and our ability to realize gains from the sale of these assets. We may utilize a variety of financial instruments, including interest rate swaps, caps, floors, inverse floaters and other interest rate exchange contracts, in order to limit the effects of interest rates on our operations. When we use these types of derivatives to hedge the risk of interest-earning assets or interest-bearing liabilities, we may be subject to certain risks, including the risk that losses on a hedge position will reduce the funds available for payments to holders of securities and that the losses may exceed the amount we invested in the instruments.

Our profitability and the value of our portfolio (including interest rate swaps) may be adversely affected during any period as a result of changing interest rates. The following table quantifies the potential changes in net interest income and portfolio value should interest rates go up or down 25, 50, and 75 basis points, assuming the yield curves of the rate shocks will be parallel to each other and the current yield curve. All changes in income and value are measured as percentage changes from the projected net interest income and portfolio value at the base interest rate scenario. The base interest rate scenario assumes interest rates at December 31, 2006 and various estimates regarding prepayment and all activities are made at each level of rate shock. Actual results could differ significantly from these estimates.

Change in Interest Rate	Projected Percentage Change in Net Interest Income	Projected Percentage Change in Portfolio Value
-75 Basis Points	30.92%	1.81%
-50 Basis Points	20.92%	1.41%
-25 Basis Points	10.57%	0.90%
Base Interest Rate	-	-
+25 Basis Points	(10.71%)	(0.39%)
+50 Basis Points	(21.53%)	(1.18%)
+75 Basis Points	(32.44%)	(2.07%)

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

ASSET AND LIABILITY MANAGEMENT

Asset and liability management is concerned with the timing and magnitude of the repricing of assets and liabilities. We attempt to control risks associated with interest rate movements. Methods for evaluating interest rate risk include an analysis of our interest rate sensitivity "gap", which is the difference between interest-earning assets and interest-bearing liabilities maturing or repricing within a given time period. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities. A gap is considered negative when the amount of interest-rate sensitive liabilities exceeds interest-rate sensitive assets. During a period of rising interest rates, a negative gap would tend to adversely affect net interest income, while a positive gap would tend to result in an increase in net interest income. During a period of falling interest rates, a negative gap would tend to result in an increase in net interest income, while a positive gap would tend to affect net interest income adversely. Because different types of assets and liabilities with the same or similar maturities may react differently to changes in overall market rates or conditions, changes in interest rates may affect net interest income positively or negatively even if an institution were perfectly matched in each maturity category.

51

The following table sets forth the estimated maturity or repricing of our interest-earning assets and interest-bearing liabilities at December 31, 2006. The amounts of assets and liabilities shown within a particular period were determined in accordance with the contractual terms of the assets and liabilities, except adjustable-rate loans, and securities are included in the period in which their interest rates are first scheduled to adjust and not in the period in which they mature and does include the effect of the interest rate swaps. The interest rate sensitivity of our assets and liabilities in the table could vary substantially if based on actual prepayment experience.

	Within 3 Months	4-12 Months	More than 1 Year to 3 Years	3 Years and Over	Total
	(dollars in thousands)				

Rate Sensitive Assets:					
Investment Securities (Principal)	\$3,039,168	\$1,690,693	\$7,443,539	\$17,961,391	\$30,134,791
Rate Sensitive Liabilities:					
Repurchase Agreements, with the effect of swaps	16,207,620	2,119,100	3,980,300	5,207,000	27,514,020

Cumulative interest rate sensitivity gap as a percentage of total rate-sensitive assets	(44%)	(45%)	(34%)	9%
=====				

Our analysis of risks is based on management's experience, estimates, models and assumptions. These analyses rely on models which utilize estimates of fair value and interest rate sensitivity. Actual economic conditions or implementation of investment decisions by our management may produce results that differ significantly from the estimates and assumptions used in our models and the projected results shown in the above tables and in this report. These analyses contain certain forward-looking statements and are subject to the safe harbor statement set forth under the heading, "Special Note Regarding Forward-Looking Statements."

52

ITEM 8 FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Our financial statements and the related notes, together with the Report of Independent Registered Public Accounting Firm thereon, are set forth on pages F-1 through [F-19] of this Form 10-K.

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A CONTROLS AND PROCEDURES

Our management, including our Chief Executive Officer (the "CEO") and Chief Financial Officer (the "CFO"), reviewed and evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) of the Securities Exchange Act) as of the end of the period covered by this annual report. Based on that review and evaluation, the CEO and CFO have concluded that our current disclosure controls and procedures, as designed and implemented, (1) were effective in ensuring that information regarding the Company and its subsidiaries is made known to our management, including our CEO and CFO, by our employees, as appropriate to allow timely decisions regarding required disclosure and (2) were effective in providing reasonable assurance that information the Company must disclose in its periodic reports under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods prescribed by the SEC's rules and forms.

Management Report On Internal Control Over Financial Reporting

Dated: February 26, 2007

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

over financial reporting is defined in Rule 13a-15(f) under the Securities Exchange Act as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board of Directors, management and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

- o pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Company;
- o provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and
- o provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. As a result, even systems determined to be effective can provide only reasonable assurance regarding the preparation and presentation of financial statements. Moreover, projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2006. In making this assessment, the Company's management used criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework.

53

Based on management's assessment, the Company's management believes that, as of December 31, 2006, the Company's internal control over financial reporting was effective based on those criteria. There have been no changes in the Company's internal controls over financial reporting that occurred during the quarter ended December 31, 2006 that have materially affected, or are reasonably likely to affect its internal control over financial reporting.

The Company's independent registered public accounting firm, Deloitte & Touche LLP, have issued an audit report on management's assessment of the Company's internal control over financial reporting. This report appears on page F-1 of this annual report on Form 10-K.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10 DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

The information required by Item 10 as to our directors is incorporated herein by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006. The information regarding our executive officers required by Item 10 appears in Part I of this Form 10-K. The information required by Item 10 as to our compliance with Section 16(a) of the Securities Exchange Act of 1934 is incorporated by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006.

We have adopted a Code of Business Conduct and Ethics within the meaning of Item 406(b) of Regulation S-K. This Code of Business Conduct and Ethics applies to our principal executive officer, principal financial officer and principal accounting officer. This Code of Business Conduct and Ethics is publicly available on our website at www.annaly.com. If we make substantive amendments to this Code of Business Conduct and Ethics or grant any waiver, including any implicit waiver, we intend to disclose these events on our website.

ITEM 11 EXECUTIVE COMPENSATION

The information required by Item 11 is incorporated herein by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006.

ITEM 12 SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by Item 12 is incorporated herein by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006.

ITEM 13 CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by Item 13 is incorporated herein by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006.

ITEM 14 PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by Item 14 is incorporated herein by reference to the proxy statement to be filed with the SEC within 120 days after December 31, 2006.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Annaly Capital Management, Inc.
New York, New York

We have audited the accompanying consolidated statements of financial condition of Annaly Capital Management, Inc. and subsidiaries (the "Company") as of December 31, 2006 and 2005, and the related consolidated statements of operations and comprehensive income (loss), stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2006. We also have audited management's assessment, included in the accompanying Management Report On Internal Control Over Financial Reporting included at Item 9A, that the Company maintained effective internal control over financial reporting as of December 31, 2006, based on criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting,

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on these financial statements, an opinion on management's assessment, and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Annaly Capital Management, Inc. and subsidiaries, as of December 31, 2006 and 2005, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2006, in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, management's assessment that the Company maintained effective internal control

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

F-1

over financial reporting as of December 31, 2006, is fairly stated, in all material respects, based on the criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2006, based on the criteria established in Internal Control--Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

ANNALY CAPITAL MANAGEMENT, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2006, 2005 AND 2004

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Annaly Capital Management, Inc. (the "Company") was incorporated in Maryland on November 25, 1996. The Company changed its name from Annaly Mortgage Management, Inc. to Annaly Capital Management, Inc. effective August 2, 2006. The Company commenced its operations of purchasing and managing an investment portfolio of mortgage-backed securities on February 18, 1997, upon receipt of the net proceeds from the private placement of equity capital. An initial public offering was completed on October 14, 1997. The Company is a real estate investment trust (REIT) under the Internal Revenue Code of 1986, as amended. The Company acquired Fixed Income Discount Advisory Company ("FIDAC") on June 4, 2004. FIDAC is a registered investment advisor and is a taxable REIT subsidiary of the Company. On June 27, 2006, the Company made a majority equity investment of 90% in an affiliated investment fund (the "Fund"). At December 31, 2006, the Fund was invested 100% in equity investments.

A summary of the Company's significant accounting policies follows:

The consolidated financial statements include the accounts of the Company, FIDAC and the Fund. All intercompany balances and transactions have been eliminated. The minority shareholder in the Fund is reflected as minority interest in the consolidated financial statements.

Cash and Cash Equivalents - Cash and cash equivalents include cash on hand and money market funds.

Mortgage-Backed Securities and Agency Debentures - The Company invests primarily in mortgage pass-through certificates, collateralized mortgage obligations and other mortgage-backed securities representing interests in or obligations backed by pools of mortgage loans (collectively, "Mortgage-Backed Securities"). The Company also invests in agency debentures issued by Federal Home Loan Bank ("FHLB"), Federal Home Loan Mortgage Corporation ("FHLMC"), and Federal National Mortgage Association ("FNMA"). The Mortgage-Backed Securities and agency debentures are collectively referred to herein as "Investment Securities."

Statement of Financial Accounting Standards ("SFAS") No. 115, Accounting for Certain Investments in Debt and Equity Securities, requires the Company to

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

classify its Investment Securities as either trading investments, available-for-sale investments or held-to-maturity investments. Although the Company generally intends to hold most of its Investment Securities until maturity, it may, from time to time, sell any of its Investment Securities as part of its overall management of its portfolio. Accordingly, SFAS No. 115 requires the Company to classify all of its Investment Securities as available-for-sale. All assets classified as available-for-sale are reported at estimated fair value, based on market prices from independent sources, with unrealized gains and losses excluded from earnings and reported as a separate component of stockholders' equity.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been lower than carrying value, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Unrealized losses on Investment Securities that are considered other than temporary, as measured by the amount of decline in fair value attributable to other-than-temporary factors, are recognized in income and the cost basis of the Investment Securities is adjusted. The loss on other-than-temporarily impaired securities was \$52.3 million during the year ended December 31, 2006 and \$83.1 million during the year ended December 31, 2005. There were no impairment losses recognized in 2004.

SFAS No. 107, Disclosure About Fair Value of Financial Instruments, requires disclosure of the fair value of financial instruments for which it is practicable to estimate that value. The fair value of Mortgage-Backed Securities and agency debentures available-for-sale and interest rate swaps is equal to their carrying value presented in the consolidated statements of financial condition. The fair value of trading securities and trading securities sold, not yet purchased is equal to their estimated fair value presented in the consolidated statements of financial condition. The fair value of cash and cash equivalents, accrued interest receivable, receivable for securities sold, receivable for advisory and service fees, repurchase agreements, with less than a one year maturity date, and payable for mortgage-backed securities purchased, dividends payable, accounts payable, and accrued interest payable, generally approximates cost as of December 31, 2006 due to the short term nature of these financial instruments.

F-7

Interest income is accrued based on the outstanding principal amount of the Investment Securities and their contractual terms. Premiums and discounts associated with the purchase of the Investment Securities are amortized into interest income over the projected lives of the securities using the interest method. The Company's policy for estimating prepayment speeds for calculating the effective yield is to evaluate historical performance, consensus prepayment speeds, and current market conditions.

Investment Securities transactions are recorded on the trade date. Purchases of newly-issued securities are recorded when all significant uncertainties regarding the characteristics of the securities are removed, generally shortly before settlement date. Realized gain and losses on sale of Investment Securities are determined on the specific identification basis.

Derivative Financial Instruments/Hedging Activity-- The Company hedges interest rate risk through the use of derivative financial instruments,

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

comprised of interest rate caps and interest rate swaps (collectively, "Hedging Instruments"). The Company accounts for Hedging Instruments in accordance with SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, ("SFAS 133") as amended and interpreted. The Company carries all Hedging Instruments at their fair value, as assets, if their fair value is positive, or as liabilities, if their fair value is negative. As the Company's interest rate swaps are designated as cash flow hedges under SFAS No. 133, the change in the fair value of any such derivative is recorded in other comprehensive income or loss for hedges that qualify as effective. At December 31, 2006 the Company did not have any interest rate caps. The ineffective amount of all Hedging Instruments, if any, is recognized in earnings each year. To date, the Company has not recognized any change in the value of its interest rate swaps in earnings as a result of the hedge or a portion thereof being ineffective.

Upon entering into hedging transactions, the Company documents the relationship between the Hedging Instruments and the hedged liability. The Company also documents its risk-management policies, including objectives and strategies, as they relate to its hedging activities. The Company assesses, both at inception of a hedge and on an on-going basis, whether or not the hedge is "highly effective," as defined by SFAS 133. The Company discontinues hedge accounting on a prospective basis with changes in the estimated fair value reflected in earnings when (i) it is determined that the derivative is no longer effective in offsetting cash flows of a hedged item (including hedged items such as forecasted transactions); (ii) it is no longer probable that the forecasted transaction will occur; or (iii) it is determined that designating the derivative as a Hedging Instrument is no longer appropriate.

When the Company enters into an interest rate swap, it agrees to pay a fixed rate of interest and to receive a variable interest rate, generally based on the London Interbank Offered Rate ("LIBOR"). The Company's interest rate swaps are designated as cash flow hedges against the benchmark interest rate risk associated with the Company's borrowings.

All changes in the unrealized gains/losses on any interest rate swap are recorded in accumulated other comprehensive income or loss and are reclassified to earnings as interest expense is recognized on the Company's hedged borrowings. If it becomes probable that the forecasted transaction, which in this case refers to interest payments to be made under the Company's short-term borrowing agreements, will not occur by the end of the originally specified time period, as documented at the inception of the hedging relationship, then the related gain or loss in accumulated other comprehensive income or loss would be reclassified to income or loss.

Realized gains and losses resulting from the termination of an interest rate swap are initially recorded in accumulated other comprehensive income or loss as a separate component of stockholders' equity. The gain or loss from a terminated interest rate swap remains in accumulated other comprehensive income or loss until the forecasted interest payments affect earnings. If it becomes probable that the forecasted interest payments will not occur, then the entire gain or loss would be recognized in earnings.

Credit Risk - The Company has limited its exposure to credit losses on its portfolio of Mortgage-Backed Securities by only purchasing securities issued by FHLMC, FNMA, or GNMA. The payment of principal and interest on the FHLMC and FNMA Mortgage-Backed Securities are guaranteed by those respective agencies, and the payment of principal and interest on the GNMA Mortgage-Backed Securities are backed by the full faith and credit of the U.S. government. All of the Company's Investment Securities have an actual or implied "AAA" rating.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Trading Securities and Trading Securities sold, not yet purchased - Trading securities and trading securities sold, not yet purchased, are included in the balance sheet as a result of consolidating the financial statements of the Fund, and are carried at fair value at December 31, 2006. The realized and unrealized gains and losses from trading securities are recorded in the income from trading securities balance in the accompanying consolidated statements of operations.

Trading account securities sold, not yet purchased represent obligations of the Fund to deliver the specified security at the contracted price, and thereby create a liability to purchase the security in the market at prevailing prices.

Repurchase Agreements - The Company finances the acquisition of its Investment Securities through the use of repurchase agreements. Repurchase agreements are treated as collateralized financing transactions and are carried at their contractual amounts, including accrued interest, as specified in the respective agreements.

Cumulative Convertible Preferred Stock- The Company classifies its Series B Cumulative Convertible Preferred Stock on the consolidated statements of financial condition using the guidance in SEC Accounting Series Release No. 268, Presentation in Financial Statements of "Redeemable Preferred Stocks," and Emerging Issues Task Force ("EITF") Topic D-98, Classification and Measurement of Redeemable Securities. The Series B Cumulative Convertible Preferred Stock contains fundamental change provisions that allow the holder to redeem the preferred stock for cash if certain events occur. As redemption under these provisions is not solely within the Company's control, the Company has classified the Series B Cumulative Convertible Preferred Stock as temporary equity in the accompanying consolidated statement of financial condition.

The Company has analyzed whether the embedded conversion option should be bifurcated under the guidance in SFAS No. 133 and EITF Issue No. 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, and has determined that bifurcation is not necessary.

Income Taxes - The Company has elected to be taxed as a REIT and intends to comply with the provisions of the Internal Revenue Code of 1986, as amended (the "Code"), with respect thereto. Accordingly, the Company will not be subjected to federal income tax to the extent of its distributions to shareholders and as long as certain asset, income and stock ownership tests are met. The Company and FIDAC have made a joint election to treat FIDAC as a taxable REIT subsidiary. As such, FIDAC is taxable as a domestic C corporation and subject to federal and state and local income taxes based upon its taxable income.

Use of Estimates - The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States, or GAAP, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Intangible assets - The Company's acquisition of FIDAC was accounted for using the purchase method. Under the purchase method, net assets and results of operations of acquired companies are included in the consolidated financial statements from the date of acquisition. In addition, the cost of FIDAC was allocated to the assets acquired, including identifiable intangible assets, and the liabilities assumed based on their estimated fair values at the date of

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

acquisition. The excess of purchase price over the fair value of the net assets acquired was recognized as goodwill. Intangible assets are periodically (but not less frequently than annually) reviewed for potential impairment. Intangible assets with an estimated useful life are expected to amortize over a 8.7 year weighted average time period. During the year ended December 31, 2006, the Company recognized \$2.5 million in impairment losses on intangible assets relating to customer relationships. During the years ended December 31, 2005 and 2004, the Company did not have impairment losses.

Stock-Based Compensation - On December 16, 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (Revised 2004) - Share-Based Payment ("SFAS No. 123R"). SFAS No. 123R, which replaces SFAS No. 123, requires the Company to measure and recognize in the financial statements the compensation cost relating to share-based payment transactions. The compensation cost should be reassessed based on the fair value of the equity instruments issued. We adopted SFAS No. 123R effective January 1, 2006 under the modified prospective transition method. Accordingly, prior period amounts have not been restated. Under this application, the Company is required to record compensation expense for all awards granted or modified on or after January 1, 2006 and for the unvested portion of all outstanding awards that remain outstanding at the date of adoption. The adoption of SFAS No. 123R resulted in total stock-based compensation expense of approximately \$1.3 million for the year ended December 31, 2006.

F-9

The Company elected to recognize compensation expense on a straight-line basis over the requisite service period for the entire award (that is, over the requisite service period of the last separately vesting portion of the award). We estimate fair value using the Black-Scholes valuation model. The assumptions used to value the options granted during the year ended December 31, 2006 are as follows: Expected volatility of 26.50%, expected dividends of 5.57%, expected term in years of 6.8 and risk-free rate of 4.6%. Assumptions used to estimate the compensation expense are determined as follows:

- o Expected term (estimated time of outstanding) is estimated using the historical exercise behavior of employees
- o Expected volatility is measured using the weighted average of historical daily changes in the market price of our common stock over the expected term of the award
- o Expected dividend yield is based on projected dividend yield over the expected term of the award
- o Risk-free interest rate is equivalent to the implied yield on zero-coupon U.S. Treasury bonds with a remaining maturity equal to the expected term of the awards; and,
- o Forfeitures are based substantially on the history of cancellations of similar awards granted by the Company in prior years.

Prior to the adoption of SFAS No. 123R, we used the intrinsic value method prescribed in APB 25 and also followed the disclosure requirements of SFAS No. 123, as amended by SFAS No. 148, Accounting for Stock-Based Compensation - Transition and Disclosure ("SFAS No. 148") which required certain disclosures on a pro forma basis as if the fair value method had been followed for accounting for such compensation.

Recent Accounting Pronouncements - SEC Staff Accounting Bulletin No. 108 -- In September 2006 the SEC issued Staff Accounting Bulletin (SAB) No. 108 "Considering the effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements" (SAB 108), which expresses the Staff's views regarding the process of quantifying financial statement misstatements. SAB 108 is effective for annual financial statements covering the fiscal year ending after November 15, 2006. Registrants are required to quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. The techniques most commonly used in practice to accumulate and quantify misstatements are generally referred to as the "rollover" (current year income statement perspective) and "iron curtain" (year-end balance perspective) approaches. The financial statements would require adjustment when either approach results in quantifying a misstatement that is material, after considering all relevant quantitative and qualitative factors. The adoption of SAB 108 on December 31, 2006 has no effect on the Company's consolidated financial statements.

In April 2006, the FASB issued FSP FIN 46(R)-6, Determining the Variability to be Considered When Applying FASB Interpretation No. 46(R) ("FIN 46(R)-6"). FIN 46(R)-6 addresses the approach to determine the variability to consider when applying FIN 46(R). The variability that is considered in applying Interpretation 46(R) may affect (i) the determination as to whether an entity is a variable interest entity ("VIE"), (ii) the determination of which interests

F-10

are variable in the entity, (iii) if necessary, the calculation of expected losses and residual returns on the entity, and (iv) the determination of which party is the primary beneficiary of the VIE. Thus, determining the variability to be considered is necessary to apply the provisions of Interpretation 46(R). FIN 46(R)-6 is required to be prospectively applied to entities in which the Company first become involved after July 1, 2006 and would be applied to all existing entities with which the Company is involved if and when a "reconsideration event" (as described in FIN 46) occurs. The adoption did not

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

have a material impact on the consolidated financial statements of the Company.

In February 2006, the FASB issued FAS No. 155, Accounting for Certain Hybrid Instruments ("FAS 155"), an amendment of FASB Statements No. 133 and 140. Among other things, FAS 155: (i) permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; (ii) clarifies which interest-only strips and principal-only strips are not subject to the requirements of FAS 133; (iii) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; (iv) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and (v) amends FAS 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. FAS 155 is effective for all financial instruments acquired or issued by the Company after December 31, 2006.

On September 25, 2006, the FASB met and proposed a scope exception under FAS 155 for securitized interests that only contain an embedded derivative that is tied to the prepayment risk of the underlying pre-payable financial assets, and for which the investor does not control the right to accelerate the settlement. If a securitized interest contains any other embedded derivative (for example, an inverse floater), then it would be subject to the bifurcation tests in FAS 133, as would securities purchased at a significant premium. The FASB plans to issue their final position in early 2007.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109 ("FIN 48"), and related implementation issues. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in the Company's financial statements in accordance with FASB Statement No. 109, Accounting for Income Taxes. FIN 48 prescribes a threshold and measurement attribute for recognition in the financial statements of an asset or liability resulting from a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective as of the beginning of fiscal years that begin after December 15, 2006. The implement of FIN 48 is not expected to have a material impact on the Company's consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and requires enhanced disclosures about fair value measurements. SFAS No. 157 requires companies to disclose the fair value of its financial instruments according to a fair value hierarchy (i.e., levels 1, 2, and 3, as defined). Additionally, companies are required to provide enhanced disclosure regarding instruments in the level 3 category (which require significant management judgment), including a reconciliation of the beginning and ending balances separately for each major category of assets and liabilities. SFAS No. 157 is effective for the Company on January 1, 2008. The Company is currently evaluating the impact adoption of SFAS No. 157 may have on its consolidated financial statements.

Proposed Accounting Pronouncements- The FASB has added an item to its current proposed amendment relating to the accounting treatment under SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities of transactions where assets purchased from a particular counterparty are financed via a repurchase agreement with the same counterparty. Currently, the Company records such assets and the related financing in the consolidated statement of financial condition, and the corresponding interest income and interest expense in the Company's consolidated

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

statement of operations and comprehensive (loss) income. For assets representing available-for-sale investment securities, as in the Company's case, any change in fair value is reported through other comprehensive income under SFAS No. 115, with the exception of impairment losses, which are recorded in the consolidated statement of operations and comprehensive (loss) income as realized losses.

However, a transaction where assets are acquired from and financed under a repurchase agreement with the same counterparty may not qualify for a sale treatment by a seller under an interpretation of SFAS No. 140, which would require the seller to continue to carry such sold assets on their books based on their "continuing involvement" with such assets. Depending on the ultimate outcome of the FASB deliberations, the result may be that the Company would be precluded from recording the assets purchased in the transaction described above as well as the related financing in the Company's consolidated statement of financial condition and would instead be treating the Company's net investment in such assets as a derivative.

F-11

This potential change in accounting treatment would not affect the economic substance of the transactions but would affect how the transactions would be reported in the Company's financial statements. The Company's cash flows, liquidity and ability to pay a dividend would be unchanged, and the Company does not believe the Company's taxable income or net equity would be affected.

F-12

2. MORTGAGE-BACKED SECURITIES

The following tables present the Company's available-for-sale Mortgage-Backed Securities portfolio as of December 31, 2006 and 2005:

December 31, 2006	Federal Home Loan Mortgage Corporation	Federal National Mortgage Association	Government National Mortgage Association	Total Mortgage- Backed Securities

F-13

Actual maturities of Mortgage-Backed Securities are generally shorter than stated contractual maturities. Actual maturities of the Company's Mortgage-Backed Securities are affected by the contractual lives of the underlying mortgages, periodic payments of principal, and prepayments of principal. The following table summarizes the Company's mortgage-backed securities on December 31, 2006 and 2005 according to their estimated weighted-average life classifications:

Weighted-Average Life	December 31, 2006		December 31, 2005	
	Fair Value	Amortized Cost	Fair Value	Amortized Cost
	(dollars in thousands)			

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Less than one year	\$379,967	\$382,268	\$508,851	\$514,560
Greater than one year and less than five years	21,788,975	21,851,659	12,648,106	12,824,736
Greater than or equal to five years	7,998,567	7,991,953	2,772,907	2,797,142
Total	\$30,167,509	\$30,225,880	\$15,929,864	\$16,136,438

The weighted-average lives of the mortgage-backed securities at December 31, 2006 and 2005 in the table above are based upon data provided through subscription-based financial information services, assuming constant principal prepayment rates to the reset date of each security. The prepayment model considers current yield, forward yield, steepness of the yield curve, current mortgage rates, mortgage rate of the outstanding loans, loan age, margin and volatility.

Mortgage-Backed Securities with a carrying value of \$7.0 billion were in a continuous unrealized loss position over 12 months at December 31, 2006 in the amount of \$138.2 million. Mortgage-Backed Securities with a carrying value of \$6.4 billion were in a continuous unrealized loss position for less than 12 months at December 31, 2006 in the amount of \$30.2 million. Mortgage-Backed Securities with a carrying value of \$4.6 billion were in a continuous unrealized loss position over 12 months at December 31, 2005 in the amount of \$111.1 million. Mortgage-Backed Securities with a carrying value of \$8.4 billion were in a continuous unrealized loss position for less than 12 months at December 31, 2005 in the amount of \$100.5 million. The decline in value of these securities is solely due to increases in interest rates. All of the Mortgage-Backed Securities are "AAA" rated or carry an implied "AAA" rating. During the years ended December 31, 2006 and 2005, the Company recorded impairment losses of \$52.3 million and \$83.1 million, respectively. The remaining investments are not considered other-than-temporarily impaired since the Company currently has the ability and intent to hold the investments for a period of time or to maturity, if necessary, sufficient for a forecasted market price recovery up to or beyond the cost of the investments. Also, the Company is guaranteed payment on the par value of the securities.

The adjustable rate Mortgage-Backed Securities are limited by periodic caps (generally interest rate adjustments are limited to no more than 1% every nine months) and lifetime caps. The weighted average lifetime cap was 9.8% at December 31, 2006 and 10.3% at December 31, 2005.

During the year ended December 31, 2006, the Company realized \$3.9 million in net losses from sales of Investment Securities. During year ended December 31, 2005, the Company realized \$53.2 million in net gains from sales of Mortgage-Backed Securities.

3. AGENCY DEBENTURES

At December 31, 2006, the Company owned agency debentures with a carrying value of \$49.6 million, including the unrealized loss of \$120,000. At December 31, 2005, the Company did not own agency debentures.

4. REPURCHASE AGREEMENTS

The Company had outstanding \$27.5 billion and \$13.6 billion of repurchase agreements with weighted average borrowing rates of 5.14% and 4.16%,

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

and weighted average remaining maturities of 125 days and 79 days as of December 31, 2006 and December 31, 2005, respectively. Investment Securities pledged as collateral under these repurchase agreements had an estimated fair value of \$28.6 billion at December 31, 2006 and \$14.3 billion at December 31, 2005.

F-14

At December 31, 2006 and December 31, 2005, the repurchase agreements had the following remaining maturities:

	December 31, 2006 (dollars in thousands)	December 31, 2005
Within 30 days	\$22,778,703	\$10,575,945
30 to 59 days	2,285,317	1,250,356
60 to 89 days	200,000	-
90 to 119 days	-	-
Over 120 days	2,250,000	1,750,000
Total	\$27,514,020	\$13,576,301

The Company did not have an amount at risk greater than 10% of the equity of the Company with any counterparties as of December 31, 2006.

The Company had an amount at risk greater than 10% of the equity of the Company with the following counterparty at December 31, 2005.

	Amount at risk(1) (dollars in thousands)	Weighted average days to maturity
UBS Securities LLC	\$179,959	121

(1) Equal to the sum of fair value of securities sold plus accrued interest income minus the sum of repurchase agreements plus accrued interest expense.

The Company has entered into repurchase agreements which provide the counterparty with the right to call the balance prior to maturity date. The repurchase agreements totaled \$1.4 billion and the market value of the option to call is \$1.4 million. Management has determined that the call option is not required to be bifurcated under the provisions of FASB No. 133 as it is deemed clearly and closely related to the debt instrument, therefore the option value is not recorded in the consolidated financial statements.

5. INTEREST RATE SWAPS

In connection with the Company's interest rate risk management strategy, the Company hedges a portion of its interest rate risk by entering into derivative financial instrument contracts. As of December 31, 2006, such instruments are comprised of interest rate swaps, which in effect modify the cash flows on repurchase agreements. The use of interest rate swaps creates exposure to credit risk relating to potential losses that could be recognized if the counterparties to these instruments fail to perform their obligations under the contracts. In the event of a default by the counterparty, the Company could have difficulty obtaining its Mortgage-Backed Securities pledged as collateral for swaps. The Company does not anticipate any defaults by its counterparties.

The Company's swaps are used to lock-in the fixed rate related to a portion of its current and anticipated future 30-day term repurchase agreements.

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

The table below presents information about the Company's swaps outstanding at December 31, 2006.

Notional Amount (dollars in thousands)	Weighted Average Pay Rate	Weighted Average Receive Rate	Net Estimated Fair Value/Carrying Value (dollars in thousands)
\$9,328,000	5.17%	5.35%	(\$17,621)

In 2006, the Company had a \$10.7 million realized gain on the termination of interest rate swaps with a notional value of \$1.2 billion. At December 31, 2005, there were no swap contracts that had settled.

6. PREFERRED STOCK AND COMMON STOCK

(A) Stock Issuances

On August 16, 2006, the Company entered into an underwriting agreement pursuant to which it sold 40,825,000 shares of its common stock for net proceeds before expenses of approximately \$476.7 million. This transaction settled on August 22, 2006.

F-15

On April 6, 2006, the Company entered into an underwriting agreement pursuant to which it sold 39,215,000 shares of its common stock for net proceeds before expenses of approximately \$437.7 million. On April 6, 2006, the Company entered into a second underwriting agreement pursuant to which it sold 4,600,000 shares of its 6% Series B Cumulative Convertible Preferred Stock for net proceeds before expenses of approximately \$111.5 million. Both of these transactions settled on April 12, 2006.

On August 3, 2006, the Company entered into an ATM Equity Offering (sm) Sales Agreement with Merrill Lynch & Co. and Merrill Lynch, Pierce, Fenner & Smith Incorporated ("Merrill Lynch"), relating to the sale of shares of its common stock from time to time through Merrill Lynch. Sales of the shares, if any, are made by means of ordinary brokers' transaction on the New York Stock Exchange. During the year ended December 31, 2006, 500,000 shares of the Company's common stock were issued pursuant to this program, totaling \$6.7 million in net proceeds.

On August 3, 2006, the Company entered into an ATM Equity Sales Agreement with UBS Securities LLC ("UBS Securities"), relating to the sale of shares of its common stock from time to time through UBS Securities. Sales of the shares, if any, are made by means of ordinary brokers' transaction on the New York Stock Exchange. During the year ended December 31, 2006, no shares of the Company's common stock were issued pursuant to this program.

During the year ended December 31, 2006, the Company declared dividends to common shareholders totaling \$102.6 million or \$.57 per share, of which \$39.0 million were paid on January 26, 2007. During the year ended December 31, 2006, the Company declared and paid dividends to Series A preferred shareholders totaling \$14.6 million or \$1.97 per share and Series B Preferred shareholders totaling \$5.0 million or \$1.08 per share. During the year ended December 31, 2006, 1,098,500 shares of the Company's common stock were issued through the

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

Equity Shelf Program, totaling net proceeds of \$14.2 million. During the year ended December 31, 2006, 22,160 options were exercised under the long-term compensation plan for an aggregate exercise price of \$183,000.

During the year ended December 31, 2005, the Company declared dividends to common shareholders totaling \$127.1 million, the Company declared and paid dividends to preferred shareholders totaling \$14.6 million or \$1.97 per share. During the twelve months ended December 31, 2005, 2,381,550 shares of the Company's common stock were issued through the Equity Shelf Program, totaling net proceeds of \$40.1 million. During the year ended December 31, 2005, 16,128 options were exercised under the long-term compensation plan for an aggregate exercise price of \$253,000. In addition, 24,253 common shares were sold through the dividend reinvestment and direct purchase program for \$440,000 during the year ended December 31, 2005.

During the year ended December 31, 2004, 2,103,525 shares were issued through the Equity Shelf Program, totaling net proceeds of \$37.5 million. During the year ended December 31, 2004, 57,000 options were exercised under the long-term compensation plan for an aggregate exercise price of \$856,000. In addition, 127,020 shares were purchased in the dividend reinvestment and direct purchase program at \$2.3 million.

(B) Preferred Stock

At December 31, 2006, the Company had issued and outstanding 7,412,500 shares of Series A Cumulative Redeemable Preferred Stock, with a par value \$0.01 per share and a liquidation preference of \$25.00 per share plus accrued and unpaid dividends (whether or not declared). The Series A preferred stock must be paid a dividend at a rate of 7.875% per year on the \$25.00 liquidation preference before the common stock is entitled to receive any dividends. The Series A preferred stock is redeemable at \$25.00 per share plus accrued and unpaid dividends (whether or not declared) exclusively at the Company's option commencing on April 5, 2009 (subject to the Company's right under limited circumstances to redeem the Series A preferred stock earlier in order to preserve its qualification as a REIT). The Series A preferred stock is senior to the Company's common stock and is on parity with the Series B preferred stock with respect to dividends and distributions, including distributions upon liquidation, dissolution or winding up. The Series A preferred stock generally does not have any voting rights, except if the Company fails to pay dividends on the Series A preferred stock for six or more quarterly periods (whether or not consecutive). Under such circumstances, the Series A preferred stock, together with the Series B preferred stock, will be entitled to vote to elect two additional directors to the Board, until all unpaid dividends have been paid or declared and set apart for payment. In addition, certain material and adverse changes to the terms of the Series A preferred stock cannot be made without the affirmative vote of holders of at least two-thirds of the outstanding shares of Series A preferred stock and Series B preferred stock. Through December 31, 2006, the Company had declared and paid all required quarterly dividends on the Series A preferred stock.

F-16

At December 31, 2006, the Company had issued and outstanding 4,600,000 shares of Series B Cumulative Convertible Preferred Stock, with a par value \$0.01 per share and a liquidation preference of \$25.00 per share plus accrued and unpaid dividends (whether or not declared). The Series B preferred stock must be paid a dividend at a rate of 6% per year on the \$25.00 liquidation preference before the common stock is entitled to receive any dividends.

The Series B preferred stock is not redeemable. The Series B preferred

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

stock is convertible into shares of common stock at a conversion rate that adjusts from time to time upon the occurrence of certain events, including if the Company distributes to its common shareholders in any calendar quarter cash dividends in excess of \$0.11 per share. Initially, the conversion rate was 1.7730 shares of common shares per \$25 liquidation preference. Commencing April 5, 2011, the Company has a right in certain circumstances to convert each Series B preferred stock into a number of common shares based upon the then prevailing conversion rate. The Series B preferred stock is also convertible into common shares at the option of the Series B preferred shareholder at any time at the then prevailing conversion rate. The Series B preferred stock is senior to the Company's common stock and is on parity with the Series A preferred stock with respect to dividends and distributions, including distributions upon liquidation, dissolution or winding up. The Series B preferred stock generally does not have any voting rights, except if the Company fails to pay dividends on the Series B preferred stock for six or more quarterly periods (whether or not consecutive). Under such circumstances, the Series B preferred stock, together with the Series A preferred stock, will be entitled to vote to elect two additional directors to the Board, until all unpaid dividends have been paid or declared and set apart for payment. In addition, certain material and adverse changes to the terms of the Series B preferred stock cannot be made without the affirmative vote of holders of at least two-thirds of the outstanding shares of Series B preferred stock and Series A preferred stock. Through December 31, 2006, the Company had declared and paid all required quarterly dividends on the Series B preferred stock.

7. NET INCOME (LOSS) PER COMMON SHARE

The following table presents a reconciliation of the net income (loss) and shares used in calculating basic and diluted earnings per share for the years ended December 31, 2006, 2005 and 2004.

	For the year ended		
	December 31, 2006	December 31, 2005	December 31, 2004

Net income (loss)	\$93,816	(\$9,247)	\$248,592
Less: Preferred stock dividends	19,557	14,593	7,745

Net income available (loss related) to common shareholders	\$74,259	(\$23,840)	\$240,847
	=====		
Weighted average shares of common stock outstanding-basic	167,667	122,475	118,223
Add: Effect of dilutive stock options	79	-	236

Weighted average shares of common stock outstanding-diluted	167,746	122,475	118,459
	=====		

The Series B Cumulative Convertible Preferred Stock was anti-dilutive for the year ended December 31, 2006. Because the Company had a net loss related to common shareholders for the year ended December 31, 2005, options to purchase 2,333,593 shares of common stock were considered anti-dilutive for the year ended December 31, 2005. Options to purchase 12,500 of common stock were outstanding and considered anti-dilutive as their exercise price exceeded the average stock price for the year ended December 31, 2004.

8. LONG-TERM STOCK INCENTIVE PLAN

The Company has adopted a long term stock incentive plan for executive

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

officers, key employees and non-employee directors (the "Incentive Plan"). The Incentive Plan authorizes the Compensation Committee of the board of directors to grant awards, including non-qualified options as well as incentive stock options as defined under Section 422 of the Code. The Incentive Plan authorizes the granting of options or other awards for an aggregate of the greater of 500,000 shares or 9.5% of the diluted outstanding shares of the Company's common stock, up to ceiling of 8,932,921 shares. Stock options are issued at the current market price on the date of grant, subject to an immediate or four year vesting in four equal installments with a contractual term of 5 or 10 years. The grant date fair value is calculated using the Black-Scholes option valuation model.

F-17

	December 31, 2006		For the years ended December 31, 2005		December 31, 2004	
	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price	Number of Shares	Weighted Average Exercise Price
Options outstanding at the beginning of year	2,333,593	\$16.10	1,645,721	\$15.66	1,063,259	\$14.28
Granted	737,250	11.72	737,750	17.08	639,750	17.39
Exercised	(22,160)	8.25	(16,128)	12.21	(57,288)	9.40
Forfeited	(60,000)	15.39	-	-	-	-
Expired	(3,688)	13.69	(33,750)	17.87	-	-
Options outstanding at the end of year	2,984,995	\$15.10	2,333,593	\$16.10	1,645,721	\$15.66
Options exercisable at the end of the year	1,298,496	\$15.28	831,906	\$13.84	540,721	\$11.62

The weighted average remaining contractual term was approximately 7.3 years for stock options outstanding and approximately 5.9 years for stock options exercisable as of December 31, 2006. As of December 31, 2006, there was approximately \$2.8 million of total unrecognized compensation cost related to nonvested share-based compensation awards. That cost is expected to be recognized over a weighted average period of 2.6 years.

The following table summarizes information about stock options outstanding at December 31, 2006:

Range of Exercise Prices	Total Options Outstanding	Weighted Average Exercise Price on Total Outstanding	Weighted Average Remaining Contractual Life (Years) on Total Outstanding	Total Options Exercisable	Weighted Average Exercise Price Exercisable
\$7.94-\$19.99	2,974,995	\$15.08	7.34	1,288,496	\$15.2

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

\$20.00-\$29.99	10,000	20.53	0.99	10,000	20.5
	2,984,995	\$15.10	7.32	1,298,496	\$15.2

9. INCOME TAXES

As a REIT, the Company is not subject to Federal income tax on earnings distributed to its shareholders. Most states recognize REIT status as well. The Company has decided to distribute the majority of its income and retain a portion of the permanent difference between book and taxable income arising from Section 162(m) of the Code pertaining to employee remuneration.

During the year ended December 31, 2006, the Company recorded \$3.1 million of income tax expense for income attributable to FIDAC, its taxable REIT subsidiary, and the portion of earnings retained based on Code Section 162(m) limitations. During the year ended December 31, 2006, the Company recorded \$4.5 million of income tax expense for a portion of earnings retained based on Section 162(m) limitations. The statutory combined federal, state, and city corporate tax rate is 45%. This amount is applied to the amount of estimated REIT taxable income retained (if any, and only up to 10% of ordinary income as all capital gain income is distributed) and to taxable income earned at the taxable subsidiaries. Thus, as a REIT, our effective tax rate is significantly less as we are allowed to deduct dividend distributions.

During the year ended December 31, 2005, the Company recorded \$8.7 million of income tax expense for income attributable to FIDAC, its taxable REIT subsidiary, and the portion of earnings retained based on Code Section 162(m) limitations. During the year ended December 31, 2005, the Company recorded \$2.0 million of income tax expense for a portion of earnings retained based on Section 162(m) limitations.

During the year ended December 31, 2004, the Company recorded \$4.5 million of income tax expense for income attributable to FIDAC and the portion of earnings retained based on Code Section 162(m) limitations.

F-18

10. LEASE COMMITMENTS

The Company has a noncancelable lease for office space, which commenced in May 2002 and expires in December 2009. Office rent expense was \$618,000, \$573,000, and \$591,000 for the years ended December 31, 2006, 2005 and 2004, respectively. The expense was net of sub-lease payments received of \$91,000, \$84,000, and \$7,000 for the years ended December 31, 2006, 2005 and 2004, respectively.

The Company's aggregate future minimum lease payments are as follows:

	Total per Year (dollars in thousands)
2007	\$532
2008	532
2009	532
Total remaining lease payments	\$1,596

Edgar Filing: ANNALY CAPITAL MANAGEMENT INC - Form 10-K

11. INTEREST RATE RISK

The primary market risk to the Company is interest rate risk. Interest rates are highly sensitive to many factors, including governmental monetary and tax policies, domestic and international economic and political considerations and other factors beyond the Company's control. Changes in the general level of interest rates can affect net interest income, which is the difference between the interest income earned on interest-earning assets and the interest expense incurred in connection with the interest-bearing liabilities, by affecting the spread between the interest-earning assets and interest-bearing liabilities. Changes in the level of interest rates also can affect the value of the Investment Securities and the Company's ability to realize gains from the sale of these assets. A decline in the value of the Investment Securities pledged as collateral for borrowings under repurchase agreements could result in the counterparties demanding additional collateral pledges or liquidation of some of the existing collateral to reduce borrowing levels. Liquidation of collateral at losses could have an adverse accounting impact, as discussed in Note 3.

The Company seeks to manage the extent to which net income changes as a function of changes in interest rates by matching adjustable-rate assets with variable-rate borrowings. The Company may seek to mitigate the potential impact on net income of periodic and lifetime coupon adjustment restrictions in the portfolio of Investment Securities by entering into interest rate agreements such as interest rate caps and interest rate swaps. As of December 31, 2006, the Company entered into interest rate swaps to pay a fixed rate and receive a floating rate of interest, with total notional amount of \$9.3 billion.

Changes in interest rates may also have an effect on the rate of mortgage principal prepayments and, as a result, prepayments on Mortgage-Backed Securities. The Company will seek to mitigate the effect of changes in the mortgage principal repayment rate by balancing assets purchased at a premium with assets purchased at a discount. To date, the aggregate premium exceeds the aggregate discount on the Mortgage-Backed Securities. As a result, prepayments, which result in the expensing of unamortized premium, will reduce net income compared to what net income would be absent such prepayments.

12. CONTINGENCIES

From time to time, the Company is involved in various claims and legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material effect on the Company's consolidated financial statements.

F-19

13. SUMMARIZED QUARTERLY RESULTS (UNAUDITED)

The following is a presentation of the quarterly results of operations for the year ended December 31, 2006.

	March 31, 2006	June 30, 2006	September 30, 2006	December 31, 2006
Interest income	\$194,882	\$280,171	\$339,737	\$407,092
