GL ENERGY & EXPLORATION INC
Form 10QSB
November 14, 2003

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-QSB

QUARTERLY REPORT UNDER SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period ended September 30, 2003

Commission File Number 000-31032

GL ENERGY AND EXPLORATION, INC.

(Exact name of registrant as specified in charter)

Delaware

52-2190362

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

#300-1497 Marine Drive, West Vancouver, B.C.

V7T 1B8

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code (604) 926-2873

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X] No []

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date: As of October 20, 2003, the Company had outstanding 26,693,614 shares of its common stock, par value \$0.001.

GL Energy and Exploration, Inc.
NOTES TO FINANCIAL STATEMENTS
September 30, 2003
(Unaudited)

1. General

The accompanying unaudited financial statements have been prepared in conformity with the accounting principles stated in the audited financial statements for the year ended December 31, 2002, and reflect all adjustments which are, in the opinion of management, necessary for a fair statement of the financial position as of September 30, 2003, and the results of operations for the periods presented. These statements have not been audited but have been reviewed by the company's independent certified public accountants. The operating results for the interim periods are not necessarily indicative of results for the full fiscal year.

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

The notes to the consolidated financial statements appearing in the company's annual report as filed on SEC Form 10-KSB for the year ended December 31, 2002, should be read in conjunction with this quarterly report on Form 10-QSB.

2. Common Stock

The Company's Board of Directors obtained written consents from a majority of the stockholders as of April 23, 2003, approving a change in the capitalization of the Company to effect a reverse split of the common stock at the rate of one share for every 22 shares outstanding and thereafter to increase the authorized common stock, \$.001 par value ("Common Stock"), from 4,545,454 shares to 100,000,000 and adopting a performance equity plan for 10,000,000 shares (on a post-stock split basis) of Common Stock. All share and per share amounts have been restated to reflect the retroactive effect of the stock split.

During the nine months ended September 30, 2003 the Company issued a total of 25,610,000 shares of common stock on a post reverse split basis. The issuances were as follows:

As consideration for the asset acquisition agreement, the company issued 17,500,000 shares of unregistered common stock to Donald Byers, our current President and Chairman of the Board and 2,500,000 shares of unregistered common stock to Arthur Lang, our current Secretary, Treasurer and Director.

The Company issued 210,000 of the registered shares under the 2003 Performance Equity Plan to 3 individuals for past consulting services provided.

The Company issued 3,040,000 registered common shares under the 2003 Performance Equity Plan to 3 independent contractors for the purpose of future shareholder and corporate publicity consulting services.

The Company issued 2,360,000 registered common shares under the 2003 Performance Equity Plan to 2 independent public relations firms for the purpose of shareholder consulting services.

3. Investment in Joint Venture

In June 2003, GL Energy & Exploration, Inc. ("GEEX") issued 20,000,000 shares of common stock, for an investment in a mining claim in Chile. These shares were issued to two individuals, as follows: Donald Byers - 17,500,000 and Arthur Lang - 2,500,000. In addition, the Purchase Agreement provided that the current directors and officers would resign effective upon fulfilling the Securities and Exchange Commission notice requirements pursuant to the proxy rules and Schedule 14C, at which time Messrs. Byers and Lang would become directors and Mr. Byers would be appointed the president and Mr. Lang would be appointed the secretary and treasurer of GEEX.

4. Management Agreement

The Company entered into a management agreement with our President and Chairman of the Board for \$8,000 per month in lieu of wages. The agreement also includes providing office space for the Company in lieu of rent. These management fees will be accrued and will not be paid until the Company receives adequate funding.

5. Forgiveness of Debt

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

The Company had an agreement with Platoro West Incorporated, a mineral exploration company, under which that company would locate, stake out and record mining claims that the mineral exploration company believed to contain high concentrations of tungsten. The mineral exploration company staked 30 unpatented claims for GL Energy pursuant to this contract. If the Company defaulted under the contract, the remedy specified in the agreement called for the Company to convey to Platoro West all of its right title and interest in the mining claims and to all the mineral resources located therein. On August 7, 2003 the Company notified Platoro West that it was terminating this agreement and forfeited all its rights and interest in the applicable mining claims. The Company recognized other income of \$34,464 for the forgiveness of debt due to Platoro West upon cancellation of the agreement and the transfer of all rights to the claims.

7

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Forward Looking Statements

When used in this Form 10QSB and in future filings by GL Energy and Exploration, Inc. with the Securities and Exchange Commission, the words or phrases "will likely result," "management expects," or "we expect," "will continue," "is anticipated," "estimated," or similar expression or use of the future tense, are intended to identify forward looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Readers are cautioned not to place undue reliance on any such forward-looking statements, each of which speak only as of the date made. These statements are subject to risks and uncertainties, some of which are described below and others are described in other parts of this Form 10QSB. Actual results may differ materially from historical earnings and those presently anticipated or projected. We have no obligation to publicly release the result of any revisions that may be made to any forward-looking statements to reflect anticipated events or circumstances occurring after the date of such statements.

Business

GL Energy and Exploration, Inc. was incorporated in the state of Delaware on October 7, 1998 under the name LRS Group Incorporated. On October 15, 1998, the name of the corporation was changed to LRS Capital, Inc. On October 10, 2001 the name of the corporation was changed to GL Energy and Exploration, Inc. GL Energy is a development stage company.

Prior to May 29, 2003 our plan of operation was to be engaged in the exploration of mining prospects with tungsten mineralization located in the Western United States. We had an agreement with Platoro West Incorporated, a mineral exploration company, under which that company would locate, stake out and record mining claims that the mineral exploration company believed to contain high concentrations of tungsten. The mineral exploration company staked 30 unpatented claims for GL Energy pursuant to this contract. If we defaulted under the contract, the remedy specified in the agreement called for us to convey to Platoro West all of our right title and interest in the mining claims and to all the mineral resources located therein. On October 10, 2001, GL Energy formed GL Tungsten, Inc. as a subsidiary incorporated in the state of Nevada, for the purpose of conducting the mining exploration activities of the company. GL Energy and Platoro West each assigned its respective obligations under the mineral exploration agreement to GL Tungsten. GL Energy owns 99.3% and Platoro West owns .7% of GL Tungsten. On August 7, 2003 we notified Platoro West that we were terminating this agreement and forfeited all our rights and interest in the

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

applicable mining claims.

In February 2003 we formed a new wholly owned subsidiary, GL Gold, Inc. GL Gold agreed to an asset purchase agreement, dated as of February 25, 2003, to acquire a permitted gold mine as well as two un-permitted groups of mining claims, which may have gold mineralization. At its election, the company may also acquire certain mining equipment. The mining claims and assets are located in Oregon. The agreement required the company to pay a \$10,000 deposit, as well as \$590,000 for the mining claims and \$150,000 for the equipment. The purchase was subject to a number of conditions, which originally required completion on or before April 30, 2003, including the company raising the purchase amounts, and completing its due diligence. In April 2003, the company and the seller agreed to extend the closing deadline to July 31, 2003. In lieu of funding this project we disposed of this subsidiary as noted below.

On May 29, 2003, GL Energy and Exploration Inc. ("GEEX") and Wellstar International Inc., a Nevada corporation ("Wellstar"), entered into an asset purchase agreement ("Purchase Agreement") to acquire all of Wellstar's 60% interest in two mineral claims located in Chile, known as LaBarca Deposit and Duna Choapa Norte Deposit (together referred to as the "Claims") and certain Joint Venture Agreements between SEM Mining Corporation S.A. and Wellstar ("JVA's"). The rights include the interest to market and benefit from certain specified heavy metal minerals that may be obtained from the Claims, including gold, rutile, zircon, magnetite, ilmenite, nickel and rare earth oxides. There is no assurance that these Claims have any of these mineralizations or that they will occur in commercial levels or be economically recoverable. The obligations under the JVA's include having to raise capital to fund the Pilot Plant. This funding obligation, which may be subject to schedule adjustments, includes US\$2,000,000 which was originally due on or before June 22, 2003 and US\$8,000,000 on or before January 22, 2004. On July 1, 2003, GL Energy and SEM Mining Corporation S.A. ("SEM") have amended their Joint Venture Agreement relative to GEEX advancing \$2,000,000 US to SEM by June 22, 2003 in order to finance the Pilot Plant Phase into commercial production. GEEX, under the revised terms, will advance the sum of US\$2,000,000 for the Pilot Plant on or before January 22, 2004 relative to the 60% interest. The terms and conditions for the funding of the JVA for the Production Plant Phase remained unchanged at US\$8,000,000 by January 22, 2004.

8

On July 1, 2003 we signed a Letter of Intent with a venture capital firm from the U.S. The loan amount was \$3,000,000 in US currency for the purchase and construction of a Pilot Plant for the Duna Choapa Norte and La Barca ore-body. The Company has terminated the finalization of this Letter of Intent.

On July 28, 2003 we signed a Term Sheet with Cornell Capital Partners LP whereby Cornell would commit to fund up to \$11,000,000 in US currency to GL Energy and Exploration Inc. from time to time over the course of 24 months. The timing and amounts would be at the discretion of GL Energy and the aggregate dollar amount in any thirty-day calendar period would be up to a maximum of \$1,000,000. The Company is now in the due diligence phase of the Term Sheet. We can give no assurance that this financing arrangement will be completed.

History of the Claims

The personnel of SEM Mining originally started preliminary evaluation work on the La Barca-Choapa Norte heavy mineral sands project in late 1995 as part of a larger series of heavy mineral sands deposits. In 1996 and 1997 the La Barca-Choapa Norte project in conjunction with the adjoining Choapa Sur project

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

were extensively explored and tested which involved huge drill sampling, mapping and bench testing with environmentally friendly and modern gravity and electro-magnetic systems to recover the heavy mineral components Rutile (Titanium), ilmenite, magnetite, olivine, rare earth oxides, and fine free gold. In 1997 the company conducted tests to develop marketable products utilizing the light mineral components of the deposits.

Consideration for JVA's

The consideration for the Claims and JVA's was 20,000,000 shares of the GEEEX's common stock, \$.001 par value. These shares were issued to two individuals, at the direction of Wellstar, as follows: Donald Byers - 17,500,000 and Arthur Lang - 2,500,000. In addition, the Purchase Agreement provided that the current directors and officers would resign effective upon fulfilling the Securities and Exchange Commission notice requirements pursuant to the proxy rules and Schedule 14C, at which time Messrs. Byers and Lang would become directors and Mr. Byers would be appointed the president and Mr. Lang would be appointed the secretary and treasurer of GEEEX.

As a result of the issuance of the 20,000,000 shares of Common Stock and the change of the Board of Directors and officers, there has been a change of control of GEEEX.

In connection with the acquisition, we transferred our wholly owned subsidiary, GL Gold, Inc., to a debt holder in partial repayment of an outstanding loan. All obligations of GL Gold as noted were transferred with the subsidiary. The transfer will also permit GEEEX to focus its efforts on the Claims and fulfilling its obligations under the JVA's.

Financial Condition and Changes in Financial Condition

Overall Operating Results:

We had no revenues for the quarter ended September 30, 2003, or since our inception.

9

We incurred \$13,688 in operating expenses for the quarter ended September 30, 2003. The expenses included legal and accounting fees of \$6,313 incurred in connection with our compliance filings with the Securities and Exchange Commission and fees associated with the preparation of documents relating to the funding agreement. Investor relation expenses were a negative \$10,964 due to the cancellation during the current quarter of a previous investor relation agreement totaling \$17,250. These expenses had been accrued at June 30, 2003. We had new investor related expenses of \$6,286 of which \$2,360 were non-cash expenses. We issued 1,180,000 shares of our common stock each to two shareholder relations firms out of our S-8 stock plan at a value of \$2,360. We entered into a management agreement with our president for \$8,000 per month in lieu of wages. These management fees will be accrued and will not be paid until the Company receives adequate funding. We incurred \$24,000 in accrued management fees during the quarter.

During the current quarter we recognized other income of \$34,464 for the forgiveness of debt due to Platoro West. As previously noted we cancelled that agreement in August and transferred all our rights to Platoro in lieu of the amounts owed them.

We incurred \$40,839 in operating expenses for the prior year quarter ended September 30, 2002. The expenses included legal and accounting fees

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

incurred in connection with our compliance filings with the Securities and Exchange Commission and expenses incurred for mineral rights. In addition, the expenses for the quarter included the expenses of conducting a study of the existing mineralization reports relating to the company's Pilot Mountain project.

For the nine months ended September 30, 2003 our operating expenses totaled \$99,904. Legal and accounting fees were \$32,760 and were incurred in connection with the asset purchase agreement, accounting services as well as SEC compliance filings. Management fees totaled \$32,000. Investor relations and other consulting fees were \$16,593. Consulting fees for past services paid in shares of common stock totaled \$5,130. The remaining expenses were incurred for normal business operations.

In addition, we recognized a gain on our disposal of GL Gold in the amount of \$18,261.

Expenses for the prior year nine months ended September 30, 2002 totaled \$64,657 and were incurred primarily for mineral rights and legal and accounting fees for SEC compliance filings.

Liquidity and Capital Resources:

Since our inception we have had minimum working capital to fund our operations. In order to fund our operations we have relied on the sale of our common stock and loans from shareholders.

To fund our mining exploration operations to date, we sold shares of our common stock. These sales were comprised of 2,364,624 shares of our common stock registered in 2001 and our Regulation S offering of 1,000,000 shares in 2002, which also had attached warrants to purchase 2,000,000 shares of common stock. These warrants expired on July 31, 2003. All shares and warrants are on a pre-stock split basis.

We have also relied on loans from shareholders to fund operations. In conjunction with the asset acquisition agreement we transferred GL Gold to shareholders as repayment on loans that they had made to the Company. In addition, Donald Byers, our President, Chairman of the Board and majority shareholder and two other shareholders have loaned the Company \$45,800 to date to settle the remaining balance of debt due these shareholders as well as to fund our business operations. These loans do not bear interest and will be repaid upon the Company receiving funding.

We currently have a working capital deficit and only a minimum of operating cash with which we can fund our future operations. We must obtain adequate funding in order to fulfill our obligations under the asset acquisition agreement for the completion of the pilot and production plants. If we do not receive adequate funding, we will have to discontinue or substantially scale back our operations.

On July 28, 2003 we signed a Term Sheet with Cornell Capital Partners LP whereby Cornell would commit to fund up to \$11,000,000 in US currency to GL Energy and Exploration Inc. from time to time over the course of 24 months. The timing and amounts would be at the discretion of GL Energy and the aggregate dollar amount in any thirty-day calendar period would be up to a maximum of \$1,000,000. The Company is now in the due diligence phase of the Term Sheet. We can give no assurance that this financing arrangement will be completed. If we are successful in receiving this funding we have a contingent liability totaling

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

\$521,000 that will be due to 2 individuals for consulting services rendered in connection with the asset acquisition agreement and assistance in locating the funding.

We intend to seek either debt or equity capital or both. We have no commitments for funding from any unrelated parties or any other agreements that will provide us with adequate working capital. We cannot give any assurance that we will locate any funding or enter into any agreements that will provide the required operating capital to fund our operations. In addition, we may also consider strategic alliances and mergers and acquisitions as a means to pursue our business plan or otherwise fund the company.

Change in Officers and Directors

As part of the asset acquisition agreement previously discussed, Mitchell Geisler and Cindy Roach resigned as officers and directors of the Company. Donald Byers and Arthur Lang were appointed as new officers and directors.

Donald Byers is the president and sole owner of Byers & Associates, a firm that is a financial and business consulting firm located in Vancouver, British Columbia, with clients among privately and publicly traded corporations. He has held these positions since 1985. Mr. Byers is the sole director of Wellstar International Inc.

Arthur Lang is the sole owner of a private real estate development company operating in Penticton, B.C. since 1990.

On July 23, 2003, Mr. P.J. Santos, P. Eng. was appointed to the Board of Directors of the Company. Mr. Santos is President and CEO of SEM Mining Corporation S.A. ("SEM"). SEM retains 40% interest (the Operator) together with GEEEX's 60% interest in 2 Joint Venture Agreements.

Description of Properties

Our executive office has relocated to #300-1497 Marine Drive, West Vancouver, B.C., Canada. At this location, we share an undesignated amount of space with another entity. Currently, our rent is included in the management agreement with our president.

New Accounting Pronouncements

In November 2002, the FASB issued Financial Interpretation No. 45, "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others." FIN 45 sets forth the disclosures required to be made by a guarantor in its financial statements about its obligations under certain guarantees that it has issued. It also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken in issuing the guarantee. The adoption of FIN 45 is not expected to have a material effect on the Company's financial position or results of its operations.

In December 2002, the FASB issued Statements of Financial Accounting Standards No. 148 "Accounting for Stock-Based Compensation--Transition and Disclosure--an amendment of FASB Statement No. 123, This Statement amends FASB Statement No. 123, Accounting for Stock-Based Compensation, to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, this Statement amends the disclosure requirements of Statement 123 to require prominent disclosures in both annual and interim financial statements about the method of accounting for stock-based employee compensation and the effect of the method used on reported results. The adoption of SFAS 148 is not expected to

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

have a material effect on the Company's financial position or results of its operations.

11

In May 2003 the FASB issued SFAS No. 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity", which requires that certain financial instruments be presented as liabilities that were previously presented as equity or as temporary equity. Such instruments include mandatory redeemable preferred and common stock, and certain options and warrants. SFAS 150 is effective for financial instruments entered into or modified after May 31, 2003 and is generally effective at the beginning of the first interim period beginning after June 15, 2003. The adoption of SFAS 150 is not expected to have a material effect on the Company's financial position or results of its operations.

ITEM 3. CONTROLS AND PROCEDURES

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in company reports filed or submitted under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer (the "Certifying Officers"), as appropriate to allow timely decisions regarding required disclosure.

As required by Rules 13a-15 and 15d-15 under the Exchange Act, the Certifying Officers carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of September 30, 2003. Their evaluation was carried out with the participation of other members of the Company's management. Based upon their evaluation, the Certifying Officers concluded that the Company's disclosure controls and procedures were effective.

The Company's internal control over financial reporting is a process designed by, or under the supervision of, the Certifying Officers and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of the Company's financial reporting and the preparation of the Company's financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the Company's assets; provide reasonable assurance that transactions are recorded as necessary to permit preparation of the Company's financial statements in accordance with generally accepted accounting principles, and that the Company's receipts and expenditures are being made only in accordance with the authorization of the Company's Board of Directors and management; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on its financial statements. There has been no change in the Company's internal control over financial reporting that occurred in the quarter ended September 30, 2003, that has materially affected, or is reasonably likely to affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None

ITEM 2. CHANGES IN SECURITIES

Changes in Common Equity

On April 17, 2003, the Board authorized a reverse split of the common stock at the rate of one share for every 22 shares then outstanding and thereafter an amendment to Article FOURTH of the Company's Certificate of Incorporation to increase the number of authorized shares of common stock, \$.001 par value, from 4,545,454 to 100,000,000, as a result of which the total capitalization will be returned to 105,000,000 shares of capital stock, of which 5,000,000 shares will be designated preferred stock and 100,000,000 will be designated common stock. On April 23, 2003, stockholders holding an aggregate of 14,286,792 shares of common stock, representing approximately 59.93% of the outstanding voting securities of the Company, executed and delivered to the Company written consents authorizing and approving the Capital Change. In the judgment of the Board, the change of the Company's capitalization is desirable to consolidate the outstanding float to enhance its desirability as an investment and to make available sufficient shares of common stock to be able to raise additional funds in the future, provide for stock awards outside the 2002 Performance Equity Plan and 2003 Plan, if at all, and to conduct other capital transactions. The common stock does not have any pre-emptive rights. None of the rights of the common stock are being changed as a result of the Capital Change and therefore the rights of the stockholders will remain unchanged. Stockholders will not be required to exchange outstanding stock certificates for new certificates in connection with the Capital Change. If any fractional shares result from the reverse split, on the basis of the aggregate number of shares held by a stockholder, the fractional share will be rounded up to the next whole share.

On April 23, 2003, a majority of the stockholders of the company approved a performance equity plan for 10,000,000 shares (on a post-stock split basis) of Common Stock ("2003 Performance Equity Plan"). The rights of the common stock were not changed.

During the quarter ended June 30, 2003 we issued 210,000 of the registered shares under the 2003 Performance Equity Plan to 3 individuals for past consulting services provided. These services were valued at \$5,130.

The Board of Directors approved a Resolution on June 12th, 2003 authorizing the issuance of 3,040,000 registered common shares under the 2003 Performance Equity Plan to 3 independent contractors for the purpose of future shareholder and corporate publicity consulting services. These services were valued at \$3,040.

In August 2003 we issued 2,360,000 registered common shares under the 2003 Performance Equity Plan to 2 independent public relations firms for the purpose of shareholder consulting services. These services were valued at \$2,360.

Edgar Filing: GL ENERGY & EXPLORATION INC - Form 10QSB

The common stock is quoted on the over-the-counter market (OTC BB) under the symbol "GEEX" and quoted in the pink sheets published by the National Quotations Bureau. Effective September 30, 2003 the Company has met all of the listing requirements and has been accepted on the Berlin Stock Exchange and will trade under the ticker symbol GE6.BE and German Securities CUSIP number WKN 914350. The trading volume in the Common Stock has been and is extremely limited.

13

Recent Sales of Unregistered Securities

On May 29, 2003, as consideration for the asset acquisition agreement, the company issued 17,500,000 shares of unregistered common stock to Donald Byers, our current President and Chairman of the Board and 2,500,000 shares of unregistered common stock to Arthur Lang, our current Secretary, Treasurer and Director. These shares were issued on a post split basis.

The company issued 170,000 shares of its common stock in lieu of cash to the Geologist that wrote the August 2002 report on our tungsten property. These shares were issued on a pre-split basis.

In July 25, 2002, the company completed an offering under Regulation S to two accredited investors. Each investor subscribed for 500,000 shares on a pre-stock split basis of common stock for \$25,000 cash. Under the subscription agreements the investors were also granted common stock warrants authorizing each investor the right to purchase up to 1,000,000 shares of common stock on a pre-stock split basis at \$0.25 per share, on a pre-stock dividend basis. The warrants expired on July 31, 2003 and were not exercised.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

GL Energy and Exploration Inc. obtained written consents from a majority of the stockholders as of April 23, 2003, approving a change in the capitalization of the Company to effect a reverse split of the common stock at the rate of one share for every 22 shares outstanding and thereafter to increase the authorized common stock, \$.001 par value ("Common Stock"), from 4,545,454 shares to 100,000,000 and adopting a performance equity plan for 10,000,000 shares (on a post-stock split basis) of Common Stock ("2003 Performance Equity Plan").
