INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

This Annual Report on Form 10-KSB contains forward-looking statements regarding future events and the future results of GreenMan Technologies, Inc. that are based on current expectations, estimates, forecasts, and projections and the beliefs and assumptions of our management. Words such as "expect," "anticipate," "target," "goal," "project," "intend," "plan," "believe," "seek," "estimate," "will," "likely," "may," "designed," "would," "future," "can," "could" and other similar expressions that are predictions of or indicate future events and trends or which do not relate to historical matters are intended to identify such forward-looking statements. These statements are based on management's current expectations and beliefs and involve a number of risks, uncertainties, and assumptions that are difficult to predict; consequently actual results may differ materially from those projected, anticipated, or implied.

PART I

Item 1. Description of Business

General

GreenMan Technologies, Inc. (together with its subsidiaries, "we", "us" or "our") was originally founded in 1992 and has been operated as a Delaware corporation since 1995. We are in the business of collecting, processing and marketing scrap tires in whole, shredded or granular form. We are headquartered in Lynnfield, Massachusetts and operate tire processing operations in California, Iowa and Minnesota.

Recent Developments

In September 2005, due to the magnitude of our continued operating losses, our Board of Directors approved separate plans to divest the operations of our Georgia and Tennessee subsidiaries and dispose of their respective assets. Accordingly, we have classified their respective results of operations as discontinued operations for all periods presented in the accompanying consolidated financial statements.

In September 2005 we entered into an agreement under which all Tennessee scrap tire collection contracts and certain other contracts with suppliers of waste tires and contracts to supply whole tires to certain cement kilns in the southeastern region of the United States were assigned to a company owned by a former employee. We received no cash consideration for these assignments and recorded a \$1,334,849 non-cash loss (including \$918,450 associated with goodwill written off) on disposal of the operations at September 30, 2005. The aggregate losses associated with the discontinued operations of our Tennessee subsidiary included in the results for the fiscal year ended September 30, 2005 were approximately \$3.1 million.

During the quarter ended December 31, 2005, we substantially curtailed operations at our Georgia subsidiary. As a result, we wrote down the carrying value of all Georgia operating assets to their estimated fair value at September 30, 2005 and recorded a non-cash loss on disposal of \$4,631,102 (including \$1,253,748 of goodwill written off) net of a gain on settlement of our Georgia facility lease of \$586,451. The aggregate losses associated with the discontinued operations of our Georgia subsidiary included in the results for the fiscal year ended September 30, 2005 were approximately \$8.3 million. During the quarter ended March 31, 2006, we completed the sale of substantially all Georgia operating assets to two separate parties and received \$405,000 in aggregate cash. In addition, the party to one of these transactions agreed to terminate several material supply and equipment lease agreements as well as a December 2005 letter of intent containing an exclusive option to acquire certain operating assets of the party.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

In June 2005, our Wisconsin subsidiary sold all of its land and buildings and all remaining Wisconsin operations were consolidated into our Minnesota facility as of September 30, 2005.

Products and Services

Our tire processing operations are paid a fee to collect, transport and process scrap tires (i.e. collection/processing revenue) in whole or two inch or smaller rubber chips which are then sold (i.e. product revenue).

We collect scrap tires from three sources:

- o local, regional and national tire stores;
- o tire manufacturing plants; and
- o illegal tire piles being cleaned-up by state, county and local governmental entities;

The tires we collect are processed and sold:

- o as tire-derived fuel used in lieu of coal by pulp and paper producers, cement kilns and electric utilities;

4

- o as an effective substitute for crushed stone in civil engineering applications such as road beds, landfill construction or septic field construction; or
- o as crumb rubber (rubber granules) and used for playground and athletic surfaces, running tracks, landscaping/groundcover applications and bullet containment systems.

In some states where we previously had disposal contracts with cement kilns, our whole tire operations were paid a fee by existing tire collectors to dispose of whole tires at our location. We paid the cement kilns a fee to accept the whole tires which they then use as an alternative fuel source to coal, while also providing a source of iron oxide which is required in the cement making process. As of September 30, 2005, we no longer have disposal contracts with cement kilns.

Manufacturing/Processing

Our tire shredding operations currently have the capacity to process about 20 million passenger tire equivalents annually. We collected over 18.3 million passenger tire equivalents in the fiscal year ended September 30, 2005 (excluding approximately 13.1 associated with our discontinued Georgia and Tennessee operations), compared to approximately 17.5 million passenger tire equivalents during the year ended September 30, 2004 (excluding approximately 13.1 associated with our curtailed Georgia and Tennessee operations). We anticipate processing over 20 million passenger tire equivalents in fiscal 2006, based on current processing volumes.

The method used to process tires is a series of commercially available shredders that sequentially reduce tires from whole tires to two-inch chips or smaller. Bead-steel is removed magnetically yielding a "95% wire-free chip." This primary recycling process recovers approximately 60% of the incoming tire. The remaining balance consists of un-saleable cross-contaminated rubber and steel ("waste wire"), which we have historically disposed of at costs exceeding

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

\$1 million annually. Our Iowa and Minnesota facilities further process the waste wire residual into saleable components of rubber and steel which reduces residual disposal costs and provides additional sources of revenue. In our Iowa facility, rubber is further granulated into particles less than one-quarter inch in size for use in the rapidly expanding athletic surfaces and playground markets.

Raw Materials

We believe we will have access to a supply of tires sufficient to meet our requirements for the foreseeable future. According to the latest information available from the Rubber Manufacturers Association, in 2003 approximately 290 million passenger tire equivalents (approximately one per person per year) were discarded in the United States ("current generation scrap tires") in addition to an estimated several hundred million scrap passenger tire equivalents already stockpiled in illegal tire piles. The Rubber Manufacturers Association estimates that a total of approximately 233 million passenger tire equivalents are currently recycled, of which approximately 130 million are burned as tire-derived fuel; 55 million are used in civil engineering applications; and 48 million are used in various other applications such as crumb rubber production, retreading and export. The approximately 57 million remaining passenger tire equivalents are now added to landfills annually. Based on this and other data, there appears to be an adequate supply of tires to meet our needs.

Customers

Our customers continue to consist of major tire manufacturers, local and regional tire outlets, and state and local governments. We have many long-term, stable relationships with our customers and we do not believe that the loss of any individual customer would have a material adverse effect on our business. During 2005, no single customer accounted for more than 10% of our total net sales.

We do not have any long-term contracts which require any customer to purchase any minimum amount of products or provide any minimum amount of tires. There can be no assurance that we will continue to receive orders of the same magnitude as in the past from existing customers or that we will be able to market our current or proposed products to new customers.

Sales and Marketing

We continue to utilize in-house sales staff for securing new accounts and marketing processed materials. This strategy maximizes revenue and concentrates our sales/marketing efforts on highly focused initiatives. Sales/marketing personnel have extensive experience in the tire recycling industry and in industries where our processed materials are consumed.

Competition

We compete in a highly fragmented and decentralized market with a large number of small competitors. Although we continue to believe there is an opportunity for industry consolidation we have focused our attention on strategic value-added vertical integration. Our strategy is to continue to increase the number of passenger tire equivalents that we process through aggressive sales and marketing efforts as well as continuing to focus on identifying and generating new marketing strategies for recycled tires and their value added by-products.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Government Regulation

Our tire recycling and processing activities are subject to extensive and rigorous government regulation designed to protect the environment. We do not believe that our activities result in emission of air pollutants, disposal of combustion residues, or storage of hazardous substances except in compliance with applicable permits and standards. The establishment and operation of plants for tire recycling, however, are subject to obtaining numerous permits and compliance with environmental and other government regulations. The process of obtaining required regulatory approvals can be lengthy and expensive. The Environmental Protection Agency and comparable state and local regulatory agencies actively enforce environmental regulations and conduct periodic inspections to determine compliance with government regulations. Failure to comply with applicable regulatory requirements can result in, among other things, fines, suspensions of approvals, seizure or recall of products, operating restrictions, and criminal prosecutions. Furthermore, changes in existing regulations or adoption of new regulations could impose costly new procedures for compliance, or prevent us from obtaining, or affect the timing of, regulatory approvals. We use our best efforts to keep abreast of changed or new regulations for immediate implementation.

Protection of Intellectual Property Rights and Proprietary Rights

None of the equipment or machinery that we currently use or intend to use in our current or proposed manufacturing activities is proprietary. Any competitor can acquire equivalent equipment and machinery on the open market.

We have used the name "GreenMan" in interstate commerce since inception and assert a common law right in and to such name.

Employees

As of September 30, 2005, we had 159 full time employees. We are not a party to any collective bargaining agreements and consider the relationship with our employees to be satisfactory.

Item 2. Description of Properties

Our Minnesota location consists of production facilities and office space situated on approximately eight acres which we lease from a related party pursuant to a March 2004 sale/leaseback arrangement. The lease expires in 2016, but provides for two additional 4-year extensions. (See "Item 12. Certain Relationships and Related Transactions - Related Party Transactions.")

Our Iowa location consists of production facilities and office space situated on approximately four acres which we lease from a related party pursuant to an April 2003 lease. The lease expires in 2013 and provides us with a right of first refusal to purchase the land and buildings at fair market value during the term of the lease. In addition, in March 2005 we executed a new lease with the same related party for approximately three additional acres adjacent to our Iowa facility. The lease expires in 2013. (See "Item 12. Certain Relationships and Related Transactions - Related Party Transactions.")

Our California location consists of a disposal and production facility and office space located in approximately 45,000 square feet of a building which we lease from an unrelated third party pursuant to an April 2002 lease. The lease expires in April 2007 but can be terminated by either party with 30 days prior notice and provides for an additional 5-year extension.

We lease approximately 3,380 square feet of office space from an unrelated third party for our corporate headquarters pursuant to a five-year lease that expires in May 2008. In June 2004, we amended this lease to include an

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

additional 1,125 square feet of office space for an additional monthly rent of \$1,500.

In June 2005 we sold our Wisconsin facility for approximately \$483,000 and consolidated those operations into our Minnesota location, recording a gain of approximately \$123,608. We continued to lease the property through September 30, 2005 while we completed the consolidation with Minnesota.

In September 2005, we ceased operations at our Tennessee facility and substantially curtailed operations at our Georgia location during the quarter ended December 31, 2005. The Tennessee location consisted of production and office space which we leased from an unrelated third party pursuant to a September 2002 lease which expired in 2005. The Georgia location consists of production facilities and office space which we lease pursuant to an April 2001 sale/leaseback arrangement which originally expired in 2021. In February 2006, we renegotiated the lease to permit us to terminate the lease with 180 days notice. Despite early termination, we will be obligated to continue to pay rent until the earlier to occur of (1) the sale of the premises by the landlord; (2) the date on which the landlord begins leasing the premises to a new tenant; or (3) three years from the date on which we vacate the property. (See "Item 12. Certain Relationships and Related Transactions - Related Party Transactions.")

During the period of February 16, 2006 to March 1, 2006, we completed the sale of substantially all GreenMan of Georgia operating assets to two companies, one which is co-owned by a former employee. In addition, we entered into a sublease agreement with each party with respect to part of the premises located in Georgia with a rolling six month commitment from each party.

6

We consider our properties in good condition, well maintained and generally suitable to carry on our business activities for the foreseeable future.

Item 3. Legal Proceedings

As of March 31, 2006, approximately 16 vendors of our GreenMan Technologies of Georgia, Inc. and GreenMan Technologies of Tennessee, Inc. subsidiaries had commenced legal action, primarily in the state courts of Georgia, in attempts to collect approximately \$1.6 million of past due amounts included in liabilities related to discontinued operations on the consolidated balance sheet, plus accruing interest, attorneys' fees, and costs, all relating to various services rendered to these subsidiaries. The largest individual claim is for approximately \$650,000. As of March 31, 2006, 3 of these vendors had secured judgments in their favor for an aggregate amount of approximately \$250,000. As previously noted, all of GreenMan Technologies of Tennessee, Inc.'s assets were sold in September 2005 and substantially all of GreenMan Technologies of Georgia, Inc.'s assets were sold as of March 1, 2006. All proceeds from these sales were retained by our secured lender and these subsidiaries have substantially no assets. We are therefore currently evaluating the alternatives available to these subsidiaries.

GreenMan Technologies, Inc. was not a party to any of these vendor relationships but several of the plaintiffs have filed suit against GreenMan Technologies, Inc. While there can be no assurance that GreenMan Technologies, Inc will not be named as a defendant in future proceedings, we believe that GreenMan Technologies, Inc has valid defenses to any potential claims that may be made against us, and we intend to defend against any such claims vigorously.

In addition to the foregoing, we are subject to routine claims from time

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

to time in the ordinary course of our business. We do not believe that the resolution of any of the claims that are currently known to us will have a material adverse effect on our company or on our financial statements.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of our shareholders during the fourth quarter of the fiscal year ended September 30, 2005.

PART II

Item 5. Market for Common Equity, Related Stockholder Matters and Small Business Issuer's Purchases of Equity Securities

Our common stock is traded on the American Stock Exchange ("the Exchange") under the symbol "GRN".

7

On January 5, 2006 we were notified by the Exchange indicating we were not in compliance with the Exchange's requirements for continued listing as set forth in Sections 134 and 1101 of the Exchange's Company Guide with respect to our failure to file our Annual Report on Form 10-KSB for the year ended September 30, 2005 with the Securities and Exchange Commission.

In order to maintain our listing on the Exchange, we were required to, and did, submit a plan by January 19, 2006 advising the Exchange of action we have taken, or will take, that would bring our company into compliance with Sections 134 and 1101 of the Company Guide by no later than March 20, 2006. On February 2, 2006, we were notified that the Exchange had accepted our compliance plan and had granted us an extension of time through March 20, 2006 to regain compliance with the continued listing standards. Although we had made progress toward compliance by March 20, 2006, we did not file our Annual Report by that date. Although we remain subject to continued periodic review by the Exchange, the Exchange has not notified us of its intention to initiate delisting proceedings and, to our knowledge, the Exchange has not initiated such proceedings.

On February 14, 2006, we were notified by the Exchange that we are not in compliance with the Exchange's requirements for continued listing set forth in Section 1003(a)(i) of the Exchange's Company Guide because we did not meet the \$2,000,000 shareholders' equity requirement and because we reported losses from continuing operations and/or net losses in two out of our three most recent fiscal years.

In order to maintain our listing on the Exchange, we were required to, and did, submit a plan by March 14, 2006 advising the Exchange of action we have taken, or will take, that would bring us into compliance no later than February 14, 2007. We will be subject to delisting proceedings if the plan we submitted is unacceptable to the Exchange or if we fail to make progress toward achieving an acceptable plan.

The following table sets forth the range of the reported high and low sales prices of our common stock for the years ended September 30, 2005 and 2004.

Common Stock	
High	Low
-----	-----
-----	---

Fiscal 2004

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Quarter Ended December 31, 2003.....	\$1.80	\$1.25
Quarter Ended March 31, 2004.....	1.60	1.07
Quarter Ended June 30, 2004.....	1.40	1.01
Quarter Ended September 30, 2004.....	1.54	1.14

Fiscal 2005

Quarter Ended December 31, 2004.....	\$1.57	\$1.11
Quarter Ended March 31, 2005.....	1.55	0.79
Quarter Ended June 30, 2005.....	0.94	0.44
Quarter Ending September 30, 2005.....	0.44	0.22

On March 31, 2006, the closing price of our common stock was \$.30 per share.

As of September 30, 2005, we estimate the approximate number of stockholders of record of our common stock to be 2,500. This number excludes individual stockholders holding stock under nominee security position listings.

We have not paid any cash dividends on our common stock since inception and do not anticipate paying any cash dividends in the foreseeable future. In addition, our agreements with Laurus Master Fund, Ltd. prohibit the payment of cash dividends.

See "Item 6. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources -Additional Steps to Increase Liquidity and "Refinancing of Our Credit Facility" for a description of certain convertible promissory notes and warrants issued to Laurus. These notes and warrants were exempt from registration under the Securities Act of 1933 pursuant to Section 4(2) of the Act.

Item 6. Management's Discussion and Analysis of Financial Condition and Results of Operations

In September 2005, due to the magnitude of continued operating losses, our Board of Directors approved separate plans to divest the operations of our Georgia and Tennessee subsidiaries and dispose of their respective assets. Accordingly, we have classified their respective results of operations as discontinued operations for all periods presented in the accompanying consolidated financial statements.

8

Fiscal Year ended September 30, 2005 Compared to Fiscal Year ended September 30, 2004

Net sales from continuing operations for the fiscal year ended September 30, 2005 were \$22,075,236, a 16% increase, compared to last year's net sales from continuing operations of \$19,115,483. Our continuing operations processed approximately 18.3 million passenger tire equivalents during the fiscal year ended September 30, 2005, compared to approximately 17.5 million passenger tire equivalents during the fiscal year ended September 30, 2004. The increase in revenue was attributable to a 18% increase in overall product revenues, a 5% increase in inbound scrap tires volume and a 4% increase in overall tipping fees per passenger tire. Included in the fiscal 2005 results were approximately \$827,000 of revenue and 875,000 passenger tire equivalents associated with an Iowa scrap tire cleanup project which was completed during fiscal 2005.

Overall end product sales increased 18% or \$1,221,718 to \$7,856,960 during

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

the fiscal year ended September 30, 2005, compared to \$6,635,242 for the same period last year. The increase in end product sales is attributable to stronger crumb rubber and tire-derived fuel sales during the fiscal year ended September 30, 2005. The overall quality of revenue (revenue per passenger tire equivalent) benefited from increased tire volumes and end product sales and a 4% increase in tipping fees per passenger tire equivalent.

Gross profit for the fiscal year ended September 30, 2005 was \$3,603,629 or 16% of net sales, compared to \$3,908,768 or 20% of net sales for year ended September 30, 2004. Our cost of sales increased \$3,264,892 or 21% primarily due to increased collection costs, reduced processing capacity and equipment reliability issues at our California facility as well as unforeseen decreases in inbound tire volumes in California due to severe weather conditions during the first half of fiscal 2005.

Selling, general and administrative expenses for the fiscal year ended September 30, 2005 increased \$286,585 to \$3,459,470 or 16% of net sales, compared to \$3,172,885 or 17% of net sales for the fiscal year ended September 30, 2004. The increase was primarily attributable to increased outside professional expenses and travel.

During June 2005 our Wisconsin subsidiary reached an agreement with the lessor of certain transportation equipment to buy-out the remaining term of the lease. Management determined that the carrying value of the purchased transportation equipment was impaired. We recorded an impairment loss amounting to \$57,183 associated with writing down the assets to their estimated fair value based on replacement cost of similar equipment. In addition, due to the magnitude of the fiscal 2005 losses, management determined that the carrying value of corporate-wide goodwill to be impaired and accordingly wrote-off all remaining goodwill recording an additional non-cash impairment loss of \$1,361,696.

As a result of the foregoing, we had an operating loss of \$1,274,720 for the fiscal year ended September 30, 2005 as compared to an operating income of \$735,883 for the fiscal year ended September 30, 2004.

Interest and financing costs for the fiscal year ended September 30, 2005 increased \$1,000,353 to \$2,408,896 (including \$1,547,563 of non-cash deferred financing costs), compared to \$1,408,543 (including \$456,671 of non-cash deferred financing costs) during the fiscal year ended September 30, 2004. The increase is primarily attributable to increased non-cash deferred financing associated with the Laurus credit facility and an increase in borrowing rates.

During the fiscal year ended September 30, 2004 we also recorded other income of approximately \$90,000 relating to a settlement for damaged product.

Based on the magnitude of our fiscal 2005 losses, we determined the near-term realizability of a \$270,000 non-cash deferred tax asset to be uncertain and therefore have provided a valuation allowance on the entire amount during the fiscal year ended September 30, 2005.

As a result of the foregoing, our net loss from continuing operations for the fiscal year ended September 30, 2005 increased \$3,476,140 to \$4,053,534 or \$.21 per basic share, compared to a net loss of \$577,394 or \$.03 per basic share for the fiscal year ended September 30, 2004. The estimated loss on disposal of discontinued operations includes \$1,334,849 relating to our Tennessee operations and \$4,631,102 in connection with our Georgia facility. Losses primarily relate to the write-off of property, equipment, goodwill, an acquisition deposit and costs of exit activities.

Loss from discontinued operations increased \$3,085,977 to \$5,153,224 for fiscal year ended September 30, 2005 as compared to a net loss from discontinued

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

operations of \$2,067,247 for last year.

Our net loss for the fiscal year ended September 30, 2005 increased \$12,528,068 to \$15,172,709 as compared to a net loss of \$2,644,641 for the fiscal year ended September 30, 2004.

9

Liquidity and Capital Resources

As of September 30, 2005, we had \$256,492 in cash and cash equivalents and a working capital deficiency of \$8,667,886. Our continued existence is dependent on our ability to reduce our operating costs, negotiate more favorable terms with existing secured creditors, refinance existing long term debt, secure additional financing and achieve profitable status on a sustained basis.

The Consolidated Statements of Cash Flows reflect events in 2005 and 2004 as they affect our liquidity. During the fiscal year ended September 30, 2005, net cash used for operating activities was \$450,536. While our net loss was \$15,172,709 our overall cash flow was positively impacted by the following non-cash expenses and changes to our working capital: \$6,446,434 of depreciation and amortization, \$3,605,345 of non-cash net loss on disposal of fixed assets (including capital leases), \$3,591,077 of non-cash goodwill impairment, a decrease in accounts receivable, product inventory and other current assets of \$1,243,190 in aggregate and an increase in accounts payable and accrued expenses of \$1,938,606 in aggregate.

During the fiscal year ended September 30, 2004, net cash used by operating activities was \$1,694,645. Our overall cash flow was negatively impacted by our net loss of \$2,644,641 as well as the following changes to our working capital: a \$1,015,500 increase to accounts receivable, a \$555,420 increase in product inventory and an increase in accounts payable and accrued expenses of \$351,348 in aggregate. These uses of cash were partially offset by the inclusion of \$2,680,114 of depreciation and amortization (non-cash expenses) and the receipt of a \$634,172 insurance receivable during fiscal 2004.

Net cash used for investing activities was \$987,991 for the fiscal year ended September 30, 2005 reflecting the purchase of \$1,596,093 of machinery and equipment with a majority associated with the completion of our Georgia waste wire processing equipment and new shredding capacity. This offset by \$608,102 in proceeds received from the sale of our Wisconsin property and miscellaneous other equipment. The net cash used by investing activities for the fiscal year ended September 30, 2004 was \$212,532 reflecting the \$1,400,000 of proceeds received from the sale of our Minnesota real estate which offset the purchase of \$1,649,264 of property and equipment to increase capacity and efficiencies at several of our operating locations.

Net cash provided by financing activities was \$1,293,956 during the fiscal year ended September 30, 2005 and was positively impacted by additional availability under our Laurus and First American credit facilities. This increase was offset by repayment of notes payable and convertible notes payable of \$2,002,404 in aggregate and capital leases of \$538,848. Net cash provided by financing activities was \$1,426,219 during the fiscal year ended September 30, 2004 and was positively impacted by the new Laurus credit facility and the completion of the April 2004 private placement of investment units which collectively generated approximately \$6,833,000 of new cash flow before expenses. These increases were offset by repayment of notes payable of \$4,726,894, including approximately \$3,800,000 associated with the payoff of our Minnesota real estate loan, WAMCO Credit Facility and Cryopolymers Leasing note payable.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

The financial statements have been prepared assuming we will continue as a going concern. We have incurred substantial losses from operations, and have a working capital deficiency of \$8,667,886 at September 30, 2005. These factors raise substantial doubt about our ability to continue as a going concern.

In order to reduce our operating costs, address our liquidity needs and return to profitable status, we have implemented and/or are in the processing of implementing the following actions:

Divestiture of Unprofitable Operations

Due to the magnitude of the continuing operating losses incurred by our Georgia (\$3.4 million) and Tennessee (\$1.8 million) subsidiaries during fiscal 2005, our Board of Directors determined it to be in the best interest of our company to discontinue all Southeastern operations and dispose of their respective operating assets. A majority of the Tennessee operating losses were due to rapid market share growth within the state by an undercapitalized subsidiary, necessitating us to transport an increasing number of Tennessee scrap tires to our Georgia facility for processing at significant transportation and processing loss. A majority of the Georgia operating losses were due to (1) the negative impact of processing a significant number of Tennessee sourced tires; (2) a change in the specifications of our primary end market customers requiring a smaller product resulting in reduced processing capacity and significantly higher operating costs and (3) equipment reliability issues resulting from aging equipment processing an increasing number of scrap tires.

On September 6, 2005 we entered into an agreement under which all Tennessee scrap tire collection contracts and certain other contracts with suppliers of waste tires and contracts to supply whole tires to certain cement kilns in the southeastern region of the United States were assigned to a company owned by a former employee. We received no cash consideration for these assignments and recorded a \$1,334,849 non-cash loss (including \$918,450 associated with goodwill written off) on disposal of the operations in the year ended September 30, 2005. The aggregate net losses including the loss on disposal associated with the discontinued operations of our Tennessee subsidiary included in the results for the fiscal year ended September 30, 2005 were approximately \$3.1 million.

10

On September 27, 2005, we adopted a plan to dispose of all Georgia operations and during the quarter ended December 31, 2005, we substantially curtailed operations at our Georgia subsidiary. As a result, we wrote down all Georgia operating assets to their estimated fair market value at September 30, 2005 and recorded a non-cash loss on disposal of \$4,631,102 (including \$1,253,748 associated with goodwill written off) net of a gain on settlement of our Georgia facility lease of \$586,137. The aggregate net losses including the loss on disposal associated with the discontinued operations of our Georgia subsidiary included in the results for the fiscal year ended September 30, 2005 were approximately \$8.0 million. We completed the divestiture of all Georgia operating assets as of March 1, 2006.

On February 17, 2006, we entered into an Asset Purchase Agreement with Tires Into Recycled Energy and Supplies, Inc. ("TIRES"). Under the agreement, we sold and assigned to TIRES certain assets, including (a) certain truck tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap truck tires; and (c) certain intangible assets. TIRES agreed to assume all of our rights and obligations under these contracts. We anticipate the transition of assigning the contracts

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

to be completed within 60 to 90 days. In addition, TIRES entered into a sublease agreement with us with respect to part of the premises located in Georgia. We received \$155,000 from TIRES for these assets. As additional consideration, TIRES agreed to terminate several material supply and equipment lease agreements as well as terminating a December 2005 letter of intent between GreenMan and TIRES containing an exclusive option to acquire certain operating assets of TIRES.

On March 1, 2006, we entered into an Asset Purchase Agreement with MTR of Georgia, Inc. ("MTR") a company co-owned by a former employee. Under the agreement, we sold and assigned to MTR certain assets, including (a) certain passenger tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap passenger tires; and certain intangible assets. MTR agreed to assume all of our rights and obligations under these contracts. We anticipate the transition of assigning the contracts to be completed within 60 to 90 days. In addition, MTR entered into a sublease agreement with us with respect to part of the premises located in Georgia. We received \$250,000 from MTR for these assets. As additional consideration, MTR has agreed to assume financial responsibility for disposing of all scrap tires and scrap tire processing residual at the Georgia facility as of the close. (See "Item 12. Certain Relationships and Related Transactions - Related Party Transactions.")

We agreed with TIRES and MTR not to compete in the business of providing whole tire waste disposal services or selling crumb rubber material (except to existing GreenMan customers) within certain Southeastern states for a period of three years.

Credit Facility Refinancing

On June 30, 2004, we entered into a \$9 million credit facility with Laurus Master Fund, Ltd., ("Laurus") consisting of a \$5 million convertible, revolving working capital line of credit and a \$4 million convertible term note loan. At closing, we borrowed \$4 million under the term loan and \$2 million under the line of credit, and used approximately \$1,860,000 of the proceeds to repay the outstanding indebtedness under our prior credit facility and approximately \$1,070,000 to repay in full the indebtedness due Cryopolymers Leasing. Additional proceeds of the financing were used to increase working capital and to pay certain costs and fees associated with this transaction including a \$425,000 placement fee paid to our investment bank. On March 22, 2005, the credit facility was amended to permit us to maintain overadvances of up to \$2,000,000 under the line of credit through December 31, 2005 (subsequently extended to April 30, 2006). In addition, the price at which the minimum borrowing note and term loan are convertible into our common stock were adjusted (See Note 7 of the consolidated financial statements). As of September 30, 2005, our overadvance was \$1,980,250.

On July 20, 2005, we entered into a \$1 million convertible term note with a maturity date of June 30, 2007 and bearing interest at the prime rate published in The Wall Street Journal from time to time plus 1.75% (8.5% at September 30, 2005). Interest on the loan is payable monthly commencing August 1, 2005. Principal will be amortized over the term of the loan, commencing on February 1, 2006 extended to May 1, 2006, with minimum monthly payments of principal of \$58,823.53. Laurus has the option to convert some or all of the principal and interest payments into common stock at a price of \$.33 (the average closing price of our common stock on the American Stock Exchange for the 3-day period ending July 18, 2005) (the "Fixed Conversion Price"). In connection with the Term Note, we also issued to the Laurus Funds an option to purchase up to an aggregate of 2,413,571 shares of our common stock at an exercise price equal to \$0.01 per share.

On February 10, 2005, First American Bank renewed our Iowa subsidiary's

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

working capital line until February 10, 2006 (subsequently extended to May 1, 2006) and increased our maximum availability under the line of credit to \$800,000. In addition, First American agreed to increase our overall maximum availability by an additional \$350,000 to \$1,150,000 through June 10, 2005 to coincide with the performance of a significant scrap tire cleanup project which was completed in April 2005.

Additional Steps to Increase Liquidity

Over the last several years, we have funded portions of our operating cash flow from sales of equity securities, loans from officers and related parties, increased borrowings and extending payments to our vendors.

11

In December 2003, we issued a 10% convertible note due December 2004 in the aggregate principal amount of \$375,000 to an investor. The note was convertible at the option of the holder at any time prior to maturity into investment units at a price equal to \$1.07 per unit with each unit consisting of one share of common stock and a warrant to purchase 1.5 shares of common stock at an exercise price of \$1.07 per share, exercisable nine months after issuance for a period of five years from date of issuance. The note was converted on June 24, 2004 into 369,331 shares of common stock and we issued warrants to purchase 553,997 shares of our common stock. When originally issued, this note reflected a beneficial conversion feature amounting to \$154,226 and, upon conversion, the remaining unamortized beneficial conversion discount of approximately \$77,000 was charged to interest expense.

In April 2004, we commenced a private offering of investment units to accredited investors, each unit consisting of one share of our common stock and a warrant to purchase 0.5 shares of our common stock. As of June 30, 2004, when the offering terminated, we had sold 1,594,211 units (1,594,211 shares of our common stock and warrants to purchase 797,105 additional shares of our common stock at prices ranging from \$1.56 to \$2.06 per share) to investors, including our directors and existing shareholders, for gross proceeds of \$1,547,800. We used the net proceeds of this offering to commence re-establishing our Georgia waste wire processing capacity and for general working capital purposes.

From June 2003 through March 2004, several of our officers and members of their families loaned us an aggregate of \$1,345,000. These advances bear interest at 12% and mature at various times through March 2006. In April 2004, several of these individuals agreed to invest approximately \$550,000 of the amounts due them under the terms of their loans into the private placement described above. In April 2004, one of our officers applied approximately \$187,000 of amounts due him to pay off notes receivable due our company and in June 2004 applied approximately \$114,000 of amounts due him, plus \$21,000 of accrued interest to exercise options to purchase 185,000 shares of our common stock. At September 30, 2005, the remaining balance on these advances amounted to \$699,320.

Operating Performance Enhancements

Historically, our tire shredding operations were able to recover and sell approximately 60% of a processed tire with the balance disposed of as waste wire residual (cross-contaminated rubber and steel) at an annual cost exceeding \$1,000,000 in prior years. In the last several years we have purchased secondary equipment for our Georgia (damaged in the March 2003 fire; reestablished in November 2004), Iowa and Minnesota facilities to further process the waste wire residual into saleable components of rubber and steel that not only provide new sources of revenue but also significantly reduced our residual disposal costs.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

On March 31, 2003, a portion of our Georgia facility and several pieces of waste wire processing equipment were damaged by a fire. As of September 30, 2003, damaged equipment and parts with a net book value of approximately \$179,000 have been written off and we have incurred \$225,000 of expenses associated with the fire, including \$211,000 of excess waste wire disposal. In December 2003 we reached a \$1.03 million settlement with our insurance carrier in connection with the claims associated with the fire and have received all amounts due under this insurance claim. During the quarter ended December 31, 2003, we recognized \$207,873 of casualty income associated with the insurance settlement before related costs of approximately the quarter. We estimate that during the year ended September 30, 2004, reduced end product revenue and excess waste disposal costs of over \$1 million were associated with the impact of the March 31, 2003 fire. In November 2004, all previously damaged equipment was re-installed and became operational.

In August 2004, we executed a non-binding letter of intent and escrow agreement with Tires Into Recycled Energy and Supplies, Inc. ("TIRES"), a leading crumb rubber processor in the United States. Pursuant to the escrow agreement, we made a "good faith" payment amounting to \$350,000, which was to be applied toward the purchase price upon completion of the transaction. On December 8, 2004, we executed a new letter of intent which superseded the August letter of intent in which we (1) leased, with an option to buy, certain pieces of tire processing equipment owned by TIRES (the "Equipment Leases"), (2) entered a material supply agreement (the "MSA") and (3) were granted an exclusive purchase option to acquire additional operating assets of TIRES. The operating leases were executed in January 2005 but became effective in February and March 2005 and provide for aggregate monthly payments of \$25,300 over terms ranging from 48 to 60 months.

We also agreed to allow TIRES to retain \$101,378 of the "good faith" payment to upgrade it's existing crumb rubber production capacity and used the remaining \$248,622 to prepare and move the leased equipment for our use. Accordingly, during the quarter ended March 31, 2005, the \$101,378 was expensed when it was released from escrow and approximately \$243,597 has been capitalized and was being amortized over the lease terms which ranged from 48 to 60 months. The remaining balance of \$205,106 was written off as a cost of disposal of discontinued operations.

Pursuant to the terms of the MSA, we were to supply agreed upon minimum amounts of crumb rubber material to TIRES on a weekly basis. If we do not meet the minimum weekly requirements, we are assessed a shortfall fee equal to 150% of the purchase price for any shortfall tonnage. Due to unexpected equipment downtime and delays in installing the additional rasper which was being leased from TIRES, we were unable to meet the minimum material requirements during various periods during fiscal 2005 and as a result, we recorded a shortfall expense of approximately \$382,000 during the fiscal year ended September 30, 2005. TIRES would purchase material was increased 15% for a period of 10 weeks. In return for this short term consideration, we agreed to reduce our original pricing by 8% on the first 30,000 tons of material purchased by TIRES subsequent to the 10 week amendment period.

The exclusive purchase option to acquire additional operating assets of TIRES was exercisable if predetermined financial performance criteria are met by TIRES during the subsequent fifteen to twenty four month period after December 8, 2004. The ultimate purchase price was to be determined based on those results. In return for the exclusive purchase option, we issued 127,389 shares of our common stock (valued at \$200,000) to TIRES. Had we exercised our

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

exclusive purchase option and closed a transaction, the value of the shares would have been applied against the purchase price of the assets. If the exclusive purchase option expired or we decided not to exercise the option, TIRES would retain a sufficient number of our shares to equal \$200,000 (as of the date that the purchase option expires) and return the balance of such shares of common stock to us. If at the time the purchase option expired, the value of the shares was less than \$200,000, we would have been required to issue a sufficient number of additional shares to equal \$200,000. If at the time the purchase option expired, TIRES had not achieved the predetermined financial performance criteria, TIRES would have had to return to us a sufficient number of our shares to equal \$200,000 at the time.

In February 2006 in conjunction with the discontinuance of our Georgia operations, we agreed to sell and assign to TIRES (a) certain truck tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap truck tires; (c) certain intangible assets; and (d) allowed TIRES to retain the 127,389 shares of our common stock and in return received \$155,000 in cash proceeds; agreed to terminate the MSA, Equipment Leases and several other agreements previously executed between the parties in addition to terminating a December 2004 letter of intent and exclusive option. Accordingly, at September 30, 2005, included in loss on disposal of discontinued operations is the \$200,000 assigned to the shares of common stock retained by TIRES.

Effects of Inflation and Changing Prices

Generally, we are exposed to the effects of inflation and changing prices. Primarily because the largest component of our collection and disposal costs is transportation, we have been adversely affected by the significant increases in the cost of fuel. Additionally, because we rely on floating-rate debt for certain financing arrangements, rising interest rates have had a negative effect on our performance.

Based on our fiscal 2006 operating plan our available working capital and our revenues from operations, we believe that borrowings from affiliated and unaffiliated lenders including additional funding from Laurus will be necessary to satisfy our cash requirements for the foreseeable future. If we are unable to obtain additional financing, our ability to maintain our current level of operations could be materially and adversely affected and we may be required to adjust our operating plans accordingly or to discontinue our operations altogether.

Off-Balance Sheet Arrangements

We lease various facilities and equipment under cancelable and non-cancelable short and long term operating leases which are described in Note 10 to the Consolidated Financial Statements.

Cautionary Statement

Information contained or incorporated by reference in this document contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, which statements can be identified by the use of forward-looking terminology such as "may," "will," "would," "can," "could," "intend," "plan," "expect," "anticipate," "estimate" or "continue" or the negative thereof or other variations thereon or comparable terminology. The following matters constitute cautionary statements identifying important factors with respect to such forward-looking statements, including certain risks and uncertainties that could cause actual results to differ materially from those in such forward-looking statements.

Factors That May Affect Future Results

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Risks Related to our Business

We have lost money in the past twelve consecutive quarters and will need additional working capital, which if not received, may force us to curtail operations.

We have incurred substantial losses from operations, and as of September 30, 2005, the Company had \$256,492 in cash and cash equivalents and a working capital deficiency of \$8,667,886. These factors raise substantial doubt about our ability to continue as a going concern. We understand our continued existence is dependent on our ability to generate positive operating cash, negotiate more favorable terms with existing secured and unsecured creditors, refinance existing long term debt, secure additional financing and achieve profitable status on a sustained basis. As more fully described below we have discontinued our unprofitable Southeastern operations and have reevaluated our marketing and operating plans of our remaining operations. We are also presently evaluating several financing alternatives which would allow us to refinance a substantial amount of our short-term secured debt into long-term secured debt to better align debt maturities with our long-term business plan. There can be no assurance however, that we will be successful in refinancing at favorable terms, if at all. Additionally, we must also be successful in completing our plan to meet the minimum exchange listing requirements of the American Stock Exchange. If we are unable to re-establish those requirements, our shares will be subject to delisting which will substantially limit our stock's liquidity and impair our ability to raise capital. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.

Our liquidity has been significantly and adversely affected by continued operating losses at our Southeastern operations. The divestiture of our Tennessee operation in September 2005 will eliminate continued operating losses which aggregated approximately \$1.8 million during the fiscal year ended September 30, 2005. In addition, during the quarter ended December 31, 2005, we substantially curtailed operations at our Georgia subsidiary which during the fiscal year ended September 30, 2005 incurred an operating loss of approximately \$3.4 million. During the quarter ended March 31, 2006 under a plan approved in September 2005, we completed the sale of substantially all Georgia operating assets to two separate parties and received \$405,000 in aggregate cash. The aggregate net losses (including losses from operations and losses on disposal) associated with the discontinued operations of our Tennessee and Georgia subsidiaries included in the results for the fiscal year ended September 30, 2005 were approximately \$11.1 million or 73% of our total loss for the 2005 fiscal year.

We have invested substantial amounts of capital during the past several years in new equipment to increase processing capacity at our Iowa, Minnesota and Georgia locations, as well as consolidating our Wisconsin location into our Minnesota operations during fiscal 2005 to substantially reduce operating costs and maximize our return on assets. Our future operating plan focuses on maximizing the performance of these three operations through our continuing efforts to increase overall quality of revenue (revenue per passenger tire equivalent) while remaining diligent with our ongoing cost reduction initiatives. We will continue to evaluate each operation on its merits and contribution to the corporation and we will continue to make the necessary decisions to ensure the continued viability of GreenMan. During fiscal 2005, we completed an evaluation of our corporate-wide inbound collection infrastructure and determined that we would no longer provide certain levels of service and products at existing rates in certain markets and therefore implemented price increases where warranted and terminated service in situations where price increases were not an alternative. As a result, we experienced a 4% increase in overall tipping fees (fees we are paid to collect and dispose of scrap tires) during fiscal 2005 as compared to fiscal 2004. While these initiatives reduced

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

our overall inbound tire volume growth rate during fiscal 2005, we believe they have and will continue to improve our performance through lower labor, parts and maintenance costs. In addition, we continue to identify, and are currently selling product into several new, higher-value markets as evidenced by an 18% increase in end product revenue during fiscal 2005. We continue to experience strong demand for our end products.

13

We have substantial indebtedness to Laurus Master Fund secured by substantially all of our assets. If an event of default occurs under the secured notes issued to Laurus, Laurus may foreclose on our assets and we may be forced to curtail or cease our operations or sell some of our assets to repay the notes.

On June 30, 2004, we entered into a \$9 million credit facility with Laurus pursuant to secured promissory notes and related agreements which were amended on March 22, 2005 to provide, among other things, the ability for us to maintain overadvances of up to \$2,000,000. On July 20, 2005, we borrowed an additional \$1 million from Laurus pursuant to a convertible term note and related agreements. Subject to certain grace periods, the notes and agreements provide for the following events of default (among others):

- o failure to pay interest and principal when due;
- o an uncured breach by us of any material covenant, term or condition in any of the notes or related agreements;
- o a breach by us of any material representation or warranty made in any of the notes or in any related agreement;
- o any money judgment or similar final process is filed against us for more than \$50,000 that remains unvacated, unbonded or unstayed for a period of 30 business days;
- o any form of bankruptcy or insolvency proceeding is instituted by or against us;
- o suspension of our common stock from our principal trading market for five consecutive days or five days during any ten consecutive days; and
- o the occurrence of a change in control of our ownership.

As of September 30, 2005, we were in default of several covenants of the notes and agreements. These defaults have been waived by Laurus. In the event of a future default under our agreements with Laurus, Laurus may enforce its rights as a secured party and we may lose all or a portion of our assets, be forced to materially reduce our business activities or cease operations.

We will require additional funding to sustain and grow our business, which funding may not be available to us on favorable terms or at all. If we do not obtain funding when we need it, our business will be adversely affected. In addition, if we have to sell securities in order to obtain financing, the rights of our current holders may be adversely affected.

We will have to seek additional outside funding sources to satisfy our future financing demands if our operations do not produce the level of revenue we require to maintain and grow our business. We cannot assure you that outside funding will be available to us at the time that we need it and in the amount necessary to satisfy our needs, or, that if such funds are available, they will

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

be available on terms that are favorable to us. If we are unable to secure financing when we need it, our business will be adversely affected and we may need to discontinue some or all of our operations. If we have to issue additional shares of common stock or securities convertible into common stock in order to secure additional funding, our current stockholders will experience dilution of their ownership of our shares. In the event that we issue securities or instruments other than common stock, we may be required to issue such instruments with greater rights than those currently possessed by holders of our common stock.

Improvement in our business depends on our ability to increase demand for our products and services.

Adverse events or economic or other conditions affecting markets for our products and services, potential delays in product development, product and service flaws, changes in technology, changes in the regulatory environment and the availability of competitive products and services are among a number of factors that could limit demand for our products and services.

Our business is subject to extensive and rigorous government regulation; failure to comply with applicable regulatory requirements could substantially harm our business.

14

Our tire recycling activities are subject to extensive and rigorous government regulation designed to protect the environment. The establishment and operation of plants for tire recycling are subject to obtaining numerous permits and compliance with environmental and other government regulations. The process of obtaining required regulatory approvals can be lengthy and expensive. The Environmental Protection Agency and comparable state and local regulatory agencies actively enforce environmental regulations and conduct periodic inspections to determine compliance with government regulations. Failure to comply with applicable regulatory requirements can result in, among other things, fines, suspensions of approvals, seizure or recall of products, operating restrictions, and criminal prosecutions. Furthermore, changes in existing regulations or adoption of new regulations could impose costly new procedures for compliance, or prevent us from obtaining, or affect the timing of, regulatory approvals.

The market in which we operate is highly competitive, fragmented and decentralized and our competitors may have greater technical and financial resources.

The market for our services is highly competitive, fragmented and decentralized. Many of our competitors are small regional or local businesses. Some of our larger competitors may have greater financial and technical resources than we do. As a result, they may be able to adapt more quickly to new or emerging technologies and changes in customer requirements, or to devote greater resources to the promotion and sale of their services. Competition could increase if new companies enter the markets in which we operate or our existing competitors expand their service lines. These factors may limit or prevent any further development of our business.

Our success depends on the retention of our senior management and other key personnel.

Our success depends largely on the skills, experience and performance of our senior management. The loss of any key member of senior management could have a material adverse effect on our business, financial condition and results

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

of operations.

Seasonal factors may affect our quarterly operating results.

Seasonality may cause our total revenues to fluctuate. We typically process fewer tires during the winter and experience a more pronounced volume reduction in severe weather conditions. In addition, a majority of our crumb rubber is used for playground and athletic surfaces, running tracks and landscaping/groundcover applications which are typically installed during the warmer portions of the year. Similar seasonal or other patterns may develop in our business.

Inflation and Changing Prices may hurt our business.

Generally, we are exposed to the effects of inflation and changing prices. Primarily because the largest component of our collection and disposal costs is transportation, we are adversely affected by significant increases in the cost of fuel. Additionally, because we rely on floating-rate debt for certain financing arrangements, rising interest rates would have a negative effect on our financial performance.

If we acquire other companies or businesses, we will be subject to risks that could hurt our business.

A significant part of our business strategy entails future acquisitions, or significant investments in, businesses that offer complementary products and services. Promising acquisitions are difficult to identify and complete for a number of reasons. Any acquisitions completed by our company may be made at substantial premiums over the fair value of the net assets of the acquired companies, and competition may cause us to pay more for an acquired business than its long-term fair market value. There can be no assurance that we will be able to complete future acquisitions on terms favorable to us or at all. In addition, we may not be able to integrate future acquired businesses, at all or without significant distraction of management from our ongoing business. In order to finance acquisitions, it may be necessary for us to issue shares of our capital stock to the sellers of the acquired businesses and/or to seek additional funds through public or private financings. Any equity or debt financing, if available at all, may be on terms which are not favorable to us and, in the case of an equity financing or the use of our stock to pay for an acquisition, may result in dilution to our existing stockholders.

15

As we grow, we are subject to growth related risks.

We are subject to growth-related risks, including capacity constraints and pressure on our internal systems and personnel. In order to manage current operations and any future growth effectively, we will need to continue to implement and improve our operational, financial and management information systems and to hire, train, motivate, manage and retain employees. We may be unable to manage such growth effectively. Our management, personnel or systems may be inadequate to support our operations, and we may be unable to achieve the increased levels of revenue commensurate with the increased levels of operating expenses associated with this growth. Any such failure could have a material adverse impact on our business, operations and prospects. In addition, the cost of opening new facilities and the hiring of new personnel for those facilities could significantly decrease our profitability, if the new facilities do not generate sufficient additional revenue.

Risks Related to the Securities Market

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Our stock price may be volatile, which could result in substantial losses for our shareholders.

Our common stock is thinly traded and an active public market for our stock may not develop. Consequently, the market price of our common stock may be highly volatile. Additionally, the market price of our common stock could fluctuate significantly in response to the following factors, some of which are beyond our control:

- o changes in market valuations of similar companies;
- o announcements by us or by our competitors of new or enhanced products, technologies or services or significant contracts, acquisitions, strategic relationships, joint ventures or capital commitments;
- o regulatory developments;
- o additions or departures of senior management and other key personnel;
- o deviations in our results of operations from the estimates of securities analysts; and
- o future issuances of our common stock or other securities.

Notice of Non-Compliance with Certain American Stock Exchange Continued Listing Standards

We have been notified by the American Stock Exchange (the "Exchange") of non-compliance with several continued listing standards and maybe subject delisting if we do not regain compliance within a timeframe agreed to by the Exchange. We have submitted our plans to attain future compliance to the Exchange and remain subject to continued periodic review and have not been notified us of the Exchange's intention to initiate delisting proceedings and, to our knowledge, the Exchange has not initiated such proceedings. If we are unable to re-establish those requirements, our shares will be subject to delisting which will substantially limit our stock's liquidity and impair our ability to raise capital.

We have options, warrants and convertible promissory notes currently outstanding. Exercise of these options and warrants, and conversions of these promissory notes will cause dilution to existing and new shareholders. Future sales of common stock by Laurus and our existing stockholders could result in a decline in the market price of our stock.

As of September 30, 2005, we have options and warrants to purchase approximately 8,703,930 shares of common stock outstanding in addition to \$8,767,990 of convertible promissory notes. The principal amounts of these notes are convertible into approximately 11,800,000 shares of common stock. The exercise of our options and warrants, and the conversion of these promissory notes, will cause additional shares of common stock to be issued, resulting in dilution to investors and our existing stockholders. As of September 30, 2005, approximately 13 million shares of our common stock were eligible for sale in the public market. This represents approximately 68 percent of our outstanding shares of common stock. After the effective date of the additional registration statement we are required to file with respect to the Laurus credit facility approximately 24,800,000 shares of our common stock will be eligible for resale in the public market. Sales of a significant number of shares of our common stock in the public market could result in a decline in the market price of our common stock, particularly in light of the illiquidity and low trading volume in

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

our common stock.

Our directors, executive officers and principal stockholders own a significant percentage of our shares, which will limit your ability to influence corporate matters.

Our directors, executive officers and other principal stockholders owned approximately 31 percent of our outstanding common stock as of September 30, 2005. Accordingly, these stockholders could have a significant influence over the outcome of any corporate transaction or other matter submitted to our stockholders for approval, including mergers, consolidations and the sale of all or substantially all of our assets and also could prevent or cause a change in control. The interests of these stockholders may differ from the interests of our other stockholders. In addition, limited number of shares held in public float effect the liquidity of our common stock. Third parties may be discouraged from making a tender offer or bid to acquire us because of this concentration of ownership.

16

We have never paid dividends on our capital stock, and we do not anticipate paying any cash dividends in the foreseeable future.

We have paid no cash dividends on our capital stock to date and we currently intend to retain our future earnings, if any, to fund the development and growth of our businesses. In addition, our agreements with Laurus prohibit the payment of cash dividends. As a result, capital appreciation, if any, of our common stock will be shareholders' sole source of gain for the foreseeable future.

Anti-takeover provisions in our charter documents and Delaware law could discourage potential acquisition proposals and could prevent, deter or delay a change in control of our company.

Certain provisions of our Restated Certificate of Incorporation and By-Laws could have the effect, either alone or in combination with each other, of preventing, deterring or delaying a change in control of our company, even if a change in control would be beneficial to our stockholders. Delaware law may also discourage, delay or prevent someone from acquiring or merging with us.

Environmental Liability

There are no known material environmental violations or assessments.

Recent Accounting Pronouncements

SFAS No. 123R, Share Based Payment - An Amendment to SFAS Nos. 123 and 95 - This standard includes the following changes to current accounting for share based payments:

- o All companies would be required to recognize compensation expense for share-based payment arrangements including stock options.
- o All companies must recognize the expense in operations and cannot bury the effects in the financial statement footnotes as currently allowed. The cost would be recognized over the requisite service period (generally the vesting period).
- o All companies would be required to estimate how many options will actually vest. The ability under the current rules to assume 100%

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

vesting and record forfeitures as they occur will not be permitted.

- o The ED still requires public companies (including Small Business filers) to value employee stock awards at fair value on the date of grant. However, the ED prefers a "lattice model" in lieu of what most companies use today, the Black-Scholes model, a "closed-form model."
- o Private companies would be required to follow either (a) the fair value method at grant date consistent with public company accounting, or (b) the intrinsic value method (the excess, if any, of the fair value of the stock over the exercise price) at each reporting date until the option is settled or exercised. The so-called "minimum value" method (essentially a simplified version of the Black-Scholes model) currently permitted would no longer be an acceptable valuation model.
- o Stock option awards with graded vesting would be treated as separate awards for each vesting date. The ability to treat such awards as a single award, as currently permitted, would longer be allowed. This would lead to more expense up-front and less in later years.

In April 2005, the Securities and Exchange Commission released Staff Accounting Bulletin ("SAB") No. 107, "Share-Based Payment " the adoption of a new rule that amended the compliance date for Statement of Financial Accounting Standard ("SFAS") No. 123 (R), " Share-Based Payment", which establishes standards for transactions in which an entity exchanges its equity instruments for goods or services. SFAS No. 123 (R) was to be effective for the interim or annual reporting periods beginning on or after June 15, 2005, but SAB No. 107 amended the effective date for implementing SFAS No. 123 (R) to the beginning of the next fiscal year that begins after December 15, 2006, for small business issuers. We will continue to provide the pro forma disclosure provisions of SFAS No. 123, " Accounting for Stock-Based Compensation , " as amended by SFAS No. 148 " Accounting for Stock-Based Compensation-Transition and Disclosure-an amendment to FASB Statement No. 123" in the Notes to the Consolidated Financial Statements. Management has not yet determined what effect adoption of this standard will have on our financial condition and results of operations.

17

In May 2005, the Financial Accounting Standards Board issued SFAS No. 154, "Accounting Changes and Error Corrections" (SFAS 154). SFAS 154 is a replacement of Accounting Principles Board No. 20, "Accounting Changes" and FASB Statement No. 3 "Reporting Accounting Changes in Interim Financial Statements." SFAS 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application as the required method for reporting a change in accounting principle. SFAS 154 provides guidance for determining whether retrospective application of a change in accounting principle is impracticable and for reporting a change when retrospective application is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by SFAS 154. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 31, 2005. This pronouncement is not expected to have a material effect on our financial statements.

Item 7. Financial Statements

For information required with respect to this Item 7, see "Consolidated Financial Statements" on pages F-1 through F-58 of this report.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Item 8. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure

None

Item 8A. Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of September 30, 2005. In designing and evaluating our disclosure controls and procedures, we recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applied its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on this evaluation, our chief executive officer and chief financial officer concluded that as of September 30, 2005, our disclosure controls and procedures were (1) designed to ensure that material information relating to the company, including our consolidated subsidiaries, is made known to our chief executive officer and chief financial officer by others within those entities, particularly during the period in which this report was being prepared and (2) effective, in that they provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the fiscal quarter ended September 30, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART III

Item 9. Directors, Executive Officers and Key Employees

Our directors and executive officers are as follows:

Name	Age	Position
----	---	-----
Maurice E. Needham	65	Chairman of the Board of Directors
Robert H. Davis	63	Chief Executive Officer; President; Director
Charles E. Coppa	42	Chief Financial Officer; Treasurer; Secretary
Dr. Allen Kahn.....	84	Director
Lew F. Boyd	59	Director
Lyle Jensen.....	54	Director
Nicholas DeBenedictis.....	46	Director

18

Each director is elected for a period of one year at the annual meeting of stockholders and serves until his or her successor is duly elected by the stockholders. The officers are appointed by and serve at the discretion of the Board of Directors. Each outside director receives a fee of \$2,500 per board meeting. Each outside director also participates in the Non-Employee Director Stock Option Plan.

We have established an Audit Committee consisting of Messrs. Jensen (Chair) and Boyd and Dr. Kahn, and a Compensation Committee consisting of

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Messrs. Boyd (Chair) and Jensen. Our Board of Directors has determined that Mr. Jensen is an "audit committee financial expert" within the meaning given that term by Item 401(e) of Regulation S-B and that Mr. Jensen is "independent" within the meaning given to that term by Item 7(d)(3)(iv) of Schedule 14A under the Exchange Act. On April 12, 2006, Mr. Jensen resigned as Chairman of the Audit Committee and as a member of the Compensation Committee and Mr. DeBenedictis became the interim Chairman of the Audit Committee and joined the Compensation Committee.

MAURICE E. NEEDHAM has been Chairman since June 1993. From June 1993 to July 21, 1997, Mr. Needham also served as Chief Executive Officer. He also serves as a Director of Comtel Holdings, an electronics contract manufacturer since April 1999. He previously served as Chairman of Dynaco Corporation, a manufacturer of electronic components which he founded in 1987. Prior to 1987, Mr. Needham spent 17 years at Hadco Corporation, a manufacturer of electronic components, where he served as President, Chief Operating Officer and Director.

ROBERT H. DAVIS has been Chief Executive Officer and a Director since July 1997. On April 12, 2006, Mr. Davis resigned as Chief Executive Officer and Director of GreenMan. Prior to joining us, Mr. Davis served as Vice President of Recycling for Browning-Ferris Industries, Inc. of Houston, Texas ("BFI") since 1990. As an early leader of BFI's recycling division, Mr. Davis grew that operation from startup to \$650 million per year in profitable revenues. A 25-year veteran of the recycling industry, Mr. Davis has also held executive positions with Fibres International, Garden State Paper Company, and SCS Engineers, Inc. Mr. Davis currently serves as a Director and Audit Committee member of Waste Connections, Inc., the fourth largest solid waste management company in the United States.

CHARLES E. COPPA has served as Chief Financial Officer, Treasurer and Secretary since March 1998. From October 1995 to March 1998, he served as Corporate Controller. Mr. Coppa was Chief Financial Officer and Treasurer of Food Integrated Technologies, a publicly-traded development stage company from July 1994 to October 1995. Prior to joining Food Integrated Technologies, Inc., Mr. Coppa served as Corporate Controller for Boston Pacific Medical, Inc., a manufacturer and distributor of disposable medical products, and Corporate Controller for Avatar Technologies, Inc., a computer networking company.

ALLEN KAHN, M.D., has been a Director since March 2000. Dr. Kahn operated a private medical practice in Chicago, Illinois, which he founded in 1953 until his retirement in October 2002. Dr. Kahn has been actively involved as an investor in "concept companies" since 1960. From 1965 through 1995 Dr. Kahn served as a member of the Board of Directors of Nease Chemical Company (currently German Chemical Company), Hollymatic Corporation and Pay Fone Systems (currently Pay Chex, Inc.).

LEW F. BOYD has been a Director since August 1994. Mr. Boyd is the founder and since 1985 has been the Chief Executive Officer of Coastal International, Inc., an international business development and executive search firm, specializing in the energy and environmental sectors. Previously, Mr. Boyd had been Vice President/General Manager of the Renewable Energy Division of Butler Manufacturing Corporation and had served in academic administration at Harvard and Massachusetts Institute of Technology.

LYLE JENSEN has been a Director since May 2002. On April 12, 2006, Mr. Jensen became GreenMan's Chief Executive Officer. Mr. Jensen was previously Executive Vice President/Chief Operations Officer of Auto Life Acquisition Corporation, an automotive aftermarket leader of fluid maintenance equipment. Prior to that he was a Business Development and Operations consultant after holding executive roles as Chief Executive Officer and minority owner of Comtel and Corlund Electronics, Inc. He served as President of Dynaco Corporation from 1988 to 1997; General Manager of Interconics from 1984 to 1988 and various

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

financial and general management roles within Rockwell International from 1973 to 1984.

NICHOLAS DEBENEDICTIS has been a Director since September 2005. Mr. DeBenedictis has been an Independent Investment Advisor for the past nine years and has over 16 years of experience in the financial markets and securities business including positions with E.W. Smith Securities, Smith Barney, and Janney Montgomery Scott

Compliance with Section 16(a) of the Securities Exchange Act of 1934

Section 16(a) of the Exchange Act requires our directors and executive officers, and persons who own more than 10% of our common stock, to file with the Securities and Exchange Commission initial reports of ownership of our common stock and other equity securities on Form 3 and reports of changes in such ownership on Form 4 and Form 5. Officers, directors and 10% stockholders are required by the Securities and Exchange Commission regulations to furnish us with copies of all Section 16(a) forms they file.

19

To the best of management's knowledge, based solely on review of the copies of such reports furnished to us during and with respect to, our most recent fiscal year, and written representation that no other reports were required, all Section 16(a) filing requirements applicable to our officers and directors have been complied with.

Code of Ethics

On May 28, 2005, we adopted a code of ethics which applies to our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. We have posted our code of ethics on our corporate website, www.greenman.biz.

Item 10. Executive Compensation

The following table summarizes the compensation paid or accrued for services rendered during the fiscal years ended September 30, 2005, 2004 and 2003, to our Chief Executive Officer and our Chief Financial Officer. We did not grant any restricted stock awards or stock appreciation rights or make any long-term plan payouts during the periods indicated.

SUMMARY COMPENSATION TABLE

Name and Principal Position -----	Fiscal Year ----	Annual Compensation -----			Other Annual Compensation (1) -----	Long-Term Compensation Underlying Options -----
		Salary -----	Bonus -----			
Robert H. Davis	2005	\$ 230,000	\$ --	\$ 23,802	--	
	2004	230,000	--	21,468	--	
	2003	230,000	--	19,900	--	
Charles E. Coppa	2005	\$ 130,000	\$ --	\$ 8,396	--	
	2004	130,000	--	22,906	60,000	
	2003	130,000	--	9,343	--	

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

- (1) Represents payments made to or on behalf of Messrs. Davis and Coppa for health, life and disability insurance and auto allowances.
- (2) The fiscal 2005 grant represents options granted to Mr. Coppa in August 2004 and were subsequently cancelled in March 2005.

Options/SAR Grants Table

There were no stock options granted during the year ended September 30, 2005 to the executives named in the Summary Compensation Table above.

Aggregated Option Exercises in Last Fiscal Year and Fiscal Year-End Option Values

The following table sets forth information concerning the value of unexercised options as of September 30, 2005 held by the executives named in the Summary Compensation Table above.

Name -----	Shares Acquired on Exercise (1)	Value Realized (2)	Number of Securities Underlying Unexercised Options at September 30, 2005 (3)	
	-----	-----	Exercisable -----	Unexercisable -----
Robert H. Davis	--	\$ --	696,500	63,000
Charles E. Coppa	--	--	354,500	13,000

- (1) There were no options exercised during the fiscal year ended September 30, 2005.
- (2) Assumes that the value of shares of common stock is equal to \$.23 per share, which was the closing bid price on the American Stock Exchange on September 30, 2005.

20

- (3) The options granted to the executive officers became exercisable commencing July 17, 1998 in the case of Mr. Davis, December 30, 1997 and in the case of Mr. Coppa at an annual rate of 20% of the underlying shares of our common stock. The options granted to Mr. Davis pursuant to his April 1999 employment agreement vest over a seven-year period.

Employment Agreements

In April 1999, we entered into a three-year employment agreement with Mr. Davis pursuant to which Mr. Davis receives a salary of \$230,000 per annum. The agreement automatically renews for three additional years upon each anniversary, unless notice of non-renewal is given by either party, and provides for payment of twelve months salary as a severance payment for termination without cause. Any increases will be made at the discretion of our Board of Directors upon the recommendation of the Compensation Committee. The agreement also provides for Mr. Davis to receive incentive compensation based on the following formula:

Consolidated Net Income Before Income Taxes -----	Incentive Compensation Rate -----	Cumulative Maximum -----
\$0 - \$1,000,000	5%	\$ 50,000

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

\$1,000,001 - \$2,000,000	7.5%	125,000
\$2,000,001+	2.5%	125,000+

No bonus was payable for fiscal 2005, 2004 or 2003.

In June 1999, we entered into a two-year employment agreement with Mr. Coppa pursuant to which Mr. Coppa currently receives a salary of \$130,000 per annum. The agreement automatically renews for two additional years upon each anniversary, unless notice of non-renewal is given by either party. Any increases or bonuses will be made at the discretion of our Board of Directors upon the recommendation of the Compensation Committee. The agreement provides for payment of twelve months salary as a severance payment for termination without cause.

In June 2003, we entered into a three-year employment agreement with Mr. Needham pursuant to which Mr. Needham receives a salary of \$90,000 per annum. The agreement automatically renews for three additional years upon each anniversary, unless notice of non-renewal is given by either party. Any increases or bonuses will be made at the discretion of our Board of Directors upon the recommendation of the Compensation Committee. The agreement provides for payment of twelve months salary as a severance payment for termination without cause.

Stock Option Plan

Our 1993 Stock Option Plan (the "2003 Plan") was established to provide options to purchase shares of common stock to our employees, officers, directors and consultants. In March 2001, our stockholders approved an increase to the number of shares authorized under the 1993 Plan to 3,000,000 shares. The 1993 Plan expired on June 10, 2004.

On March 18, 2005, our Board of Directors adopted the 2005 Stock Option Plan (the "2005 Plan"), which was subsequently approved by our stockholders on June 16, 2005. The 2005 Plan replaced the 1993 Plan. In April 2004, our Board adopted a replacement stock option plan (the "2004 Plan") but did not submit it for ratification by our stockholders. The 2004 Plan was terminated by our Board on March 18, 2005, and all options granted under that plan have been terminated. Options granted under the 2005 Plan may be either options intended to qualify as "incentive stock options" under Section 422 of the Internal Revenue Code of 1986, as amended; or non-qualified stock options.

Incentive stock options may be granted under the 2005 Plan to employees, including officers and directors who are employees. Non-qualified options may be granted to our employees, directors and consultants. The 2005 Plan is administered by our Board of Directors, which has the authority to determine:

- o the persons to whom options will be granted;
- o the number of shares to be covered by each option;
- o whether the options granted are intended to be incentive stock options;
- o the manner of exercise; and
- o the time, manner and form of payment upon exercise of an option.

Incentive stock options granted under the 2005 Plan may not be granted at

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

a price less than the fair market value of our common stock on the date of grant (or less than 110% of fair market value in the case of persons holding 10% or more of our voting stock). Non-qualified stock options may be granted at an exercise price established by our Board which may not be less than 85% of fair market value of our shares on the date of grant. Because current tax laws adversely impact recipients of non-qualified stock options granted at less than fair market value, however, we do not expect to make such grants. Incentive stock options granted under the 2005 Plan must expire no more than ten years from the date of grant, and no more than five years from the date of grant in the case of incentive stock options granted to an employee holding 10% or more of our voting stock.

As of September 30, 2005, there were 1,660,356 options granted and outstanding under the 1993 Plan of which 1,578,156 options were exercisable at prices ranging from \$0.38 to \$1.80. No options have been granted under the 2005 Plan as of September 30, 2005.

Non-Employee Director Stock Option Plan

Our 1996 Non-Employee Director Stock Option Plan is intended to promote our interests by providing an inducement to obtain and retain the services of qualified persons who are not officers or employees to serve as members of our Board of Directors. The Board of Directors has reserved 60,000 shares of common stock for issuance under Non-Employee Director Stock Option Plan.

Each person who was a member of the Board of Directors on January 24, 1996, and who was not an officer or employee, was automatically granted an option to purchase 2,000 shares of common stock. In addition, after an individual's initial election to the Board of Directors, any director who is not an officer or employee and who continues to serve as a director will automatically be granted on the date of the Annual Meeting of Stockholders an additional option to purchase 2,000 shares of common stock. The exercise price per share of options granted under the Non-Employee Director Stock Option Plan is 100% of the fair-market value of the common stock on the business day immediately prior to the date of the grant and each option is immediately exercisable for a period of ten years from the date of the grant.

As of September 30, 2005, options to purchase 38,000 shares of our common stock have been granted under the 1996 Non-Employee Director Stock Option Plan, of which 28,000 are outstanding and exercisable at prices ranging from \$0.38 to \$1.95.

Employee Benefit Plan

In August 1999, we implemented a Section 401(k) plan for all eligible employees. Employees are permitted to make elective deferrals of up to 15% of employee compensation and employee contributions to the 401(k) plan are fully vested at all times. We may make discretionary contributions to the 401(k) plan which become vested over a period of five years. We did not make any discretionary contributions to the 401(k) plan during the fiscal years ended September 30, 2005 and 2004.

Item 11. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following tables set forth certain information regarding beneficial ownership of our common stock as of September 30, 2005:

- o by each of our directors and executive officers;
- o by all of our directors and executive officers as a group; and
- o by each person (including any "group" as used in Section 13(d) of the Securities Exchange Act of 1934) who is known by us to own

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

beneficially 5% or more of the outstanding shares of common stock.

Unless otherwise indicated below, to the best of our knowledge, all persons listed below have sole voting and investment power with respect to their shares of common stock, except to the extent authority is shared by spouses under applicable law. As of September 30, 2005, 19,225,352 shares of our common stock were issued and outstanding.

Laurus Master Fund, Ltd. (10).....	1,001,727	4

-
- (1) Except as noted, each person's address is care of GreenMan Technologies, Inc., 7 Kimball Lane, Building A, Lynnfield, Massachusetts 01940.
 - (2) Pursuant to the rules of the Securities and Exchange Commission, shares of common stock that an individual or group has a right to acquire within 60 days pursuant to the exercise of options or warrants are deemed to be outstanding for the purpose of computing the percentage ownership of such individual or group, but are not deemed to be outstanding for the purpose of computing the percentage ownership of any other person shown in the table.
 - (3) Includes 180,533 shares of common stock issuable pursuant to immediately exercisable stock options and warrants.
 - (4) Includes 1,066,365 shares of common stock issuable pursuant to immediately exercisable stock options. Also includes 59,556 shares of common stock owned by Mr. Needham's wife.
 - (5) Includes 696,500 shares of common stock issuable pursuant to immediately exercisable stock options.
 - (6) Includes 354,500 shares of common stock issuable pursuant to immediately

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

- exercisable stock options.
- (7) Includes 124,394 shares of common stock issuable pursuant to immediately exercisable stock options.
 - (8) Includes 70,000 shares of common stock owned by Mr. DeBenedictis's wife
 - (9) Includes 22,500 shares of common stock issuable pursuant to immediately exercisable stock options.
 - (10) Laurus holds (i) warrants to purchase up to 1,380,000 shares of common stock that are exercisable at exercise prices ranging from \$1.56 to \$2.29 per share and options to purchase up to 2,413,571 shares of common stock that are exercisable within 60 days (subject to the following sentence) at \$.01 per share, (ii) a \$4 million convertible term note that is convertible into 3,954,000 shares of common stock at conversion prices ranging from \$.79 to \$.93 per share, (iii) a \$4,268,000 convertible working capital note that is convertible into 4,776,000 shares of common stock at conversion prices ranging from \$.79 to \$.93 per share, and (iv) \$1 million minimum borrowing note that is convertible into 3,030,000 shares of common stock at a conversion price of \$.33 per share. These warrants are not exercisable, and these notes are not convertible, to the extent that (a) the number of shares of our common stock held by Laurus and (b) the number of shares of our common stock issuable upon exercise of the warrants and conversion of the notes would result in beneficial ownership by Laurus of more than 4.99% of our outstanding shares of common stock. Laurus may waive these provisions, or increase or decrease that percentage, with respect to the warrants and/or the notes on 90 days' prior notice to us, or without notice if we are in default under the notes. Laurus beneficially owns 1,001,727 shares of our common stock issuable pursuant to underlying warrants, options and the notes that are exercisable or convertible. Laurus' address is 825 Third Avenue, 14th Floor, New York, New York 10022.

Common Stock Authorized for Issuance Under Equity Compensation Plans

For descriptions of equity compensation plans under which our common stock is authorized for issuance as of September 30, 2005, see Note 12 ("Stockholders' Equity") of the Consolidated Financial Statements contained herein. For additional information concerning certain compensation arrangements, not approved by stockholders, under which options to purchase common stock may be issued, see "Executive Compensation - Employment Agreements", above, and "Certain Relationships and Transactions - Stock Issuances: Stock Options; Warrants", below.

Item 12. Certain Relationships and Related Transactions

Stock Issuances; Stock Options; Warrants

On May 18, 2004, Mr. Jensen was granted options to purchase 75,000 shares of our common stock under the 2004 Plan at an exercise price of \$1.05 per share. This plan and the related options were subsequently terminated in March 2005.

On June 24, 2004, Messrs. Needham and Kahn collectively purchased 669,871 units (669,871 shares of our common stock and warrants to purchase 334,936 additional shares of our common stock at prices ranging from \$1.56 to \$1.86 per share) pursuant to the terms of our April 9, 2004 private placement of investment units. The warrants are exercisable at any time between the ninth month and the third year after the date of issuance at an exercise price equal to 150% of the closing bid price of our common stock on the day preceding such date. In addition, in accordance with American Stock Exchange rules, units purchased by officers, directors or affiliates were made at 100% of the closing

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

bid price of our common stock on the day preceding the date such investor's subscription for units became a binding commitment

On August 4, 2004, Messrs. Needham, Coppa and Kahn were collectively granted options to purchase 180,000 shares of our common stock under the 2004 Plan at an exercise price of \$1.24 per share. This plan and the related options were subsequently terminated in March 2005.

During fiscal 2004, Messrs. Needham, Davis and Coppa, collectively exercised options and warrants to purchase 223,538 shares of unregistered common stock at exercise prices ranging from \$0.38 to \$0.94 per share for gross proceeds of \$150,435.

Loans; Personal Guarantees

In January 1998, we advanced Mr. Davis \$104,000 under an 8.5% secured loan agreement with both principal and interest due January 2001. This note was amended on September 30, 2000 to extend the maturity of the note until April 15, 2002 (subsequently extended to April 15, 2004) and increase the interest rate to 9.5%. On April 30, 2004 the remaining balance of \$163,000, including interest, was applied to offset obligations under our \$400,000 September 30, 2003 note payable due to Mr. Davis.

In January 1999, we advanced Messrs. Davis and Coppa \$55,000, in aggregate, under 8.5% secured promissory notes with both principal and interest due January 2002 (subsequently extended to January 2004). The proceeds were used to participate in a private placement of our common stock and the loans were secured by 191,637 shares of common stock owned by Messrs. Davis and Coppa. In June 2002, they repaid \$5,000 each toward their respective then outstanding balances. On March 31, 2004, Mr. Davis's remaining balance of \$24,000 including interest, was applied to offset obligations under our \$400,000 September 30, 2003 note payable to him. On May 11, 2004, Mr. Coppa sold 36,717 shares of common stock valued at \$44,248 back to us in full settlement of all amounts due under his note. We subsequently cancelled these shares, which reduced our total shares issued and outstanding.

Dr. Kahn was owed \$300,000 under the terms of an October 1999 private offering of 10% convertible notes and warrants and \$75,000 under the terms of a February 2000 offering of 11% convertible notes and warrants. The warrants were exercisable for a period of five years to purchase 125,000 shares of our common stock at exercise prices ranging from \$.31 to \$.50 per share. The convertible notes originally matured twelve months after issuance and were payable in cash or unregistered shares of our common stock at a conversion price of \$1.00 per share. In September 2000 and June 2001, Dr. Kahn agreed to extend the maturity date of each note for an additional twelve months from their original maturity. In return for the June 2001 extension, we agreed to reduce the conversion price to \$.75 per share. In September 2002, Dr. Kahn again agreed to extend the maturity of each note for an additional twenty-four months from their extended maturity dates which range from October 2005 to February 2005. On February 16, 2004, Dr. Kahn converted these two notes, including \$375,000 of principal and \$168,210 of accrued interest into 724,281 shares of our unregistered common stock pursuant to the amended terms noted above. The warrants were exercised by Dr. Kahn during fiscal 2003.

Dr. Kahn has also loaned us \$200,000 under the terms of a November 2000 unsecured promissory note which bears interest at 12% per annum with interest due monthly and the principal due in November 2001. In June 2001, Dr. Kahn agreed to extend the maturity date of the note for an additional twelve months from its original maturity. In September 2002, Dr. Kahn again agreed to extend the maturity of the note until November 2004. In June 2004, Dr. Kahn agreed to extend the maturity of this note until the earlier of when all amounts due under the Laurus credit facility have been repaid or June 30, 2007.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

During the period of June to August 2003, two immediate family members of Mr. Needham loaned us a total of \$400,000 under the terms of two-year, unsecured promissory notes which bear interest at 12% per annum with interest due quarterly and the principal due upon maturity. In March 2004, these same individuals loaned us an additional \$200,000 in aggregate, under similar terms with the principal due upon maturity March 2006. These individuals each agreed to invest the entire \$100,000 principal balance of their June 2003 notes (\$200,000 in aggregate) into the April 2004 private placement of investment units and each received 113,636 units (113,636 shares of our common stock and warrants to purchase 56,818 additional shares of our common stock at \$1.80 per share) in these transactions. At September 30, 2005, the remaining balance due on these advances amounted to \$400,000. In addition, the two individuals agreed to extend the maturity of the remaining balance of these notes until the earlier of when all amounts due under the Laurus credit facility have been repaid or June 30, 2007.

In September 2003, Mr. Davis loaned us \$400,000 under the terms of a September 30, 2003 unsecured promissory note which bears interest at 12% per annum with interest due quarterly and the principal due March 31, 2005 (subsequently extended to September 30, 2004). In 2004, Mr. Davis applied approximately \$114,000 of the balance due him plus \$21,000 of accrued interest to exercise options to purchase 185,000 shares of common stock as noted above. In addition, he agreed to extend the maturity of the remaining balance of this note until the earlier of when all amounts due under the Laurus credit facility have been repaid or June 30, 2007. At September 30, 2005, the remaining balance due on this note amounted to \$99,320.

24

In October 2003, Mr. Needham loaned us \$75,000 under the terms of an October 22, 2003 unsecured promissory note payable which bears interest at 12% per annum with interest due quarterly and the principal due June 30, 2004. During January and February 2004, Mr. Needham advanced us an additional \$250,000 under substantially similar notes that were due in June 2004. Mr. Needham agreed to invest all unpaid principal and interest under these advances amounting to approximately \$350,000 into the April 2004 private placement of units and received 339,806 units in this transaction (see above).

Related Party Transactions

We rent several pieces of equipment on a monthly basis from Valley View Farms, Inc. ("Valley View Farms") and Maust Asset Management, LLC, ("Maust Asset Management"), two companies co-owned by one of our employees. In January 2005, we entered into three equipment lease agreements with Maust Asset Management. Under the terms of the three new leases, we are required to pay between \$1,500 and \$2,683 per month rental and have the ability to purchase the equipment at the end of the lease for between \$12,000 and \$16,000. Rent expense associated with payments made to the two companies for the fiscal years ended September 30, 2005 and 2004 was \$170,940 and \$248,560, respectively.

In July 2002, our Minnesota subsidiary entered into a four-year equipment lease with Valley View Farms. Under the terms of the lease, the subsidiary is required to pay rent of \$4,394 per month and has the ability to purchase the equipment at the end of the lease at approximately 40% of its original value. The lease is classified as a capital lease at September 30, 2005 with an equipment value of \$146,670.

In April 2003, our Iowa subsidiary entered into a ten-year lease agreement with Maust Asset Management for our Iowa facility. Under the terms of the lease,

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

monthly rent payments of \$8,250 are required for the first five years, increasing to \$9,000 per month for the remaining five years. The lease also provides us a right of first refusal to purchase the land and buildings at fair market value during the term of the lease. Maust Asset Management acquired the property from the former lessor. In April 2005, our Iowa subsidiary entered into an eight-year lease agreement with Maust Asset Management for approximately 3 acres adjacent to our existing Iowa facility. Under the terms of the lease, monthly rent payments of \$3,500 are required. For the fiscal years ended September 30, 2005 and 2004, payments made in connection with these leases amounted to \$123,000 and \$111,483, respectively.

During March 2004, our Minnesota subsidiary sold all of its land and buildings to an entity co-owned by one of our employees for \$1,400,000, realizing a gain of \$437,337 which has been recorded as unearned income and classified as a non current liability in the accompanying financial statements. Simultaneous with the sale, we entered into an agreement to lease the property back for a term of 12 years at an annual rent of \$195,000, increasing to \$227,460 over the term of the lease. The gain is being recognized as income ratably over the term of the lease. The lease provides for two additional 4-year extensions. The lease is classified as a capital lease at September 30, 2005 with an equipment value of \$1,400,000. For the fiscal years ended September 30, 2005 and 2004, payments made in connection with this lease amounted to \$236,298 and \$145,379.

On September 30, 2003, Mart Management, Inc., our Georgia subsidiary's landlord, loaned us \$100,000 under the terms of a September 30, 2003 unsecured promissory note which bears interest at 12% per annum with interest due quarterly and the principal due September 30, 2005. In June 2004, Mart Management agreed to invest the entire \$100,000 principal balance of the unsecured promissory note plus accrued interest of \$7,300 into the April 2004 private placement of investment units and received 121,932 Units in this transaction.

All transactions, including loans, between us and our officers, directors, principal stockholders, and their affiliates are approved by a majority of the independent and disinterested outside directors on the Board of Directors. Management believes these transactions were consummated on terms no less favorable to us than could be obtained from unaffiliated third parties.

Item 14. Principal Accountant Fees and Services

In addition to audit services, Wolf & Company, P.C. also provided certain non-audit services to us during the fiscal year ended September 30, 2005. The Audit Committee has considered whether the provision of these additional services is compatible with maintaining the independence of Wolf & Company, P.C. Audit Fees. The aggregate fees billed for professional services rendered by Wolf & Company, P.C. for (1) the audit of our financial statements as of and for the fiscal year ended September 30, 2005 and (2) the review of the financial statements included our company's Form 10-QSB filings for fiscal 2005 were \$220,000. The aggregate fees billed for professional services rendered by Wolf & Company, P.C. for (1) the audit of our financial statements as of and for the fiscal year ended September 30, 2004 and (2) the review of the financial statements included in our Form 10-QSB filings for fiscal 2004 were \$190,300.

Audit-Related Fees. The aggregate fees billed in fiscal 2005 and 2004 for assurance and related services rendered by Wolf & Company, P.C. that are reasonably related to the performance of the audit or review of our financial statements, were \$6,600 and \$6,000, respectively. Services rendered in this category consisted of (i) financial accounting and reporting consultations, and (ii) participation in board and audit committee meetings and (iii) assurance

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

services on specific transactions. Tax Fees. The aggregate fees billed in fiscal 2005 and 2004 for professional services rendered by Wolf & Company, P.C. for tax compliance, tax advice and tax planning were \$27,750 and \$20,500, respectively.

All Other Fees. There were no fees billed in fiscal 2005 and 2004 for products and services provided by Wolf & Company, P.C., other than services reported above.

Pre-Approval Policies and Procedures. The Audit Committee has adopted policies which provide that our independent auditors may only provide those audit and non-audit services that have been pre-approved by the Audit Committee, subject, with respect to non-audit services, to a de minimis exception (discussed below) and to the following additional requirements: (1) such services must not be prohibited under applicable federal securities rules and regulations, and (2) the Audit Committee must make a determination that such services would be consistent with the principles that the independent auditor should not audit its own work, function as part of management, act as an advocate of our company, or be a promoter of our company's stock or other financial interests. The chairman of the Audit Committee has the authority to grant pre-approvals of permitted non-audit services between meetings, provided that any such pre-approval must be presented to the full Audit Committee at its next scheduled meeting.

During fiscal 2005, all of the non-audit services provided by Wolf & Company, P.C. were pre-approved by the Audit Committee. Accordingly, the Audit Committee did not rely on the de minimis exception noted above. This exception waives the pre-approval requirements for non-audit services if certain conditions are satisfied, including, among others, that such services are promptly brought to the attention of and approved by the Audit Committee prior to the completion of the audit.

Report of Independent Registered Public Accounting Firm
The Board of Directors and Stockholders

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

GreenMan Technologies, Inc.
Lynnfield, Massachusetts

We have audited the accompanying consolidated balance sheets of GreenMan Technologies, Inc. and subsidiaries as of September 30, 2005 and 2004 and the related consolidated statements of operations, changes in stockholders' equity (deficit) and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of GreenMan Technologies, Inc. and subsidiaries as of September 30, 2005 and 2004 and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, the Company has continued to incur substantial losses from operations and has a working capital deficiency of \$8,667,886 at September 30, 2005. This raises substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The accompanying financial statements do not include any adjustments that might result from the outcome of this uncertainty.

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of GreenMan Technologies, Inc. and our wholly-owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Nature of Operations, Risks, and Uncertainties

GreenMan Technologies, Inc. (together with its subsidiaries "we", "us" or "our") was originally founded in 1992 and has been operated as a Delaware corporation since 1995. Today, we comprise three operating locations that collect, process and market scrap tires in whole, shredded or granular form. We are headquartered in Lynnfield, Massachusetts and currently operate tire processing operations in California, Iowa and Minnesota.

The financial statements have been prepared assuming we will continue as a going concern. We have incurred substantial losses from operations, and as of September 30, 2005, the Company had \$256,492 in cash and cash equivalents and a working capital deficiency of \$8,667,886. These factors raise substantial doubt about our ability to continue as a going concern. We understand our continued existence is dependent on our ability to generate positive operating cash, negotiate more favorable terms with existing secured and unsecured creditors, refinance existing long term debt, secure additional financing and achieve profitable status on a sustained basis. As more fully described below we have

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

discontinued our unprofitable Southeastern operations and have reevaluated our marketing and operating plans of our remaining operations. We are also presently evaluating several financing alternatives which would allow us to refinance a substantial amount of our short-term secured debt into long-term secured debt to better align debt maturities with our long-term business plan. There can be no assurance however, that we will be successful in refinancing at favorable terms, if at all. Additionally, we must also be successful in completing our plan to meet the minimum exchange listing requirements of the American Stock Exchange. If we are unable to re-establish those requirements, our shares will be subject to delisting which will substantially limit our stock's liquidity and impair our ability to raise capital. The financial statements do not include any adjustments that might result from the outcome of these uncertainties.

Our liquidity has been significantly and adversely affected by continued operating losses at our Southeastern operations. The divestiture of our Tennessee operation in September 2005 will eliminate continued operating losses which aggregated approximately \$1.8 million during the fiscal year ended September 30, 2005. In addition, during the quarter ended December 31, 2005, we substantially curtailed operations at our Georgia subsidiary which during the fiscal year ended September 30, 2005 incurred an operating loss of approximately \$3.4 million. During the quarter ended March 31, 2006 under a plan approved in September 2005, we completed the sale of substantially all Georgia operating assets to two separate parties and received \$405,000 in aggregate cash. The aggregate net losses (including losses from operations and losses on disposal) associated with the discontinued operations of our Tennessee and Georgia subsidiaries included in the results for the fiscal year ended September 30, 2005 were approximately \$11.1 million or 73% of our total loss for the 2005 fiscal year.

We have invested substantial amounts of capital during the past several years in new equipment to increase processing capacity at our Iowa, Minnesota and Georgia locations, as well as consolidating our Wisconsin location into our Minnesota operations during fiscal 2005 to substantially reduce operating costs and maximize our return on assets. Our future operating plan focuses on maximizing the performance of these three operations through our continuing efforts to increase overall quality of revenue (revenue per passenger tire equivalent) while remaining diligent with our ongoing cost reduction initiatives. We will continue to evaluate each operation on its merits and contribution to the corporation and we will continue to make the necessary decisions to ensure the continued viability of GreenMan. During fiscal 2005, we completed an evaluation of our corporate-wide inbound collection infrastructure and determined that we would no longer provide certain levels of service and products at existing rates in certain markets and therefore implemented price increases where warranted and terminated service in situations where price increases were not an alternative. As a result, we experienced a 4% increase in overall tipping fees (fees we are paid to collect and dispose of scrap tires) during fiscal 2005 as compared to fiscal 2004. While these initiatives reduced our overall inbound tire volume growth rate during fiscal 2005, we believe they have and will continue to improve our performance through lower labor, parts and maintenance costs. In addition, we continue to identify, and are currently selling product into several new, higher-value markets as evidenced by an 18% increase in end product revenue during fiscal 2005. We continue to experience strong demand for our end products.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

1. Summary of Significant Accounting Policies - (Continued)

Management Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the amounts of revenues and expenses recorded during the reporting period. Actual results could differ from those estimates. Such estimates relate primarily to the estimated lives of property and equipment, the value of goodwill and other intangible assets, the valuation reserve on deferred taxes and the value of equity instruments issued. The amount that may be ultimately realized from assets and liabilities could differ materially from the values recorded in the accompanying financial statements as of September 30, 2005.

In particular, discontinued operations include management's best estimate of the amounts to be realized and liabilities to be incurred in connection with the discontinuing of our Georgia and Tennessee operations. The amounts the Company will ultimately realize could differ materially from the amounts estimated in arriving at the loss on disposal of the discontinued operations.

Cash Equivalents

Cash equivalents include short-term investments with original maturities of three months or less.

Accounts Receivable

Accounts receivable are carried at original invoice amount less an estimate made for doubtful accounts. Management determines the allowance for doubtful accounts by regularly evaluating past due individual customer receivables and considering a customer's financial condition, credit history, and the current economic conditions. Individual accounts receivable are written off when deemed uncollectible, with any future recoveries recorded as income when received.

Product Inventory

Inventory consists primarily of crumb rubber and is valued at the lower of cost or market on the first-in first-out (FIFO) method.

Property, Plant and Equipment

Property, plant and equipment are stated at cost. Depreciation and amortization expense is provided on the straight-line method. Expenditures for maintenance, repairs and minor renewals are charged to expense as incurred. Significant improvements and major renewals that extend the useful life of equipment are capitalized.

Deferred Loan Costs

Deferred loan costs are amortized into interest expense over the life of the related financing arrangement and represent costs incurred in connection with financing at the corporate level and our wholly-owned subsidiary in Iowa.

Revenue Recognition

We have two sources of revenue: processing revenue which is earned from the collection, transportation and processing of scrap tires and product revenue which is earned from the sale of tire chips, crumb rubber and steel. Revenues

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

from product sales are recognized when the products are shipped and collectability is reasonably assured. Revenues derived from the collection, transporting and processing of tires are recognized when processing of the tires has been completed.

Income Taxes

Deferred tax assets and liabilities are recorded for temporary differences between the financial statement and tax bases of assets and liabilities using the currently enacted income tax rates expected to be in effect when the taxes are actually paid or recovered. A deferred tax asset is also recorded for net operating loss and tax credit carry forwards to the extent their realization is more likely than not. The deferred tax expense for the period represents the change in the deferred tax asset or liability from the beginning to the end of the period.

39

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

1. Summary of Significant Accounting Policies - (Continued)

Stock-Based Compensation

Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation", encourages all entities to adopt a fair value based method of accounting for employee stock compensation plans, whereby compensation cost is measured at the grant date based on the value of the award and is recognized over the service period, which is usually the vesting period. However, it also allows an entity to continue to measure compensation cost of those plans using the intrinsic value based method of accounting prescribed by Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees", whereby compensation cost is the excess, if any, of the quoted market price of the stock at the grant date (or other measurement date) over the amount an employee must pay to acquire the stock. Stock options issued under our stock option plans generally have no intrinsic value at the grant date, and under Accounting Principles Board Opinion No. 25 no compensation cost is recognized for them. We apply Accounting Principles Board Opinion No. 25 and related interpretations in accounting for stock options issued to our employees and directors. Had the compensation cost for the stock options issued to our employees and directors been determined based on the fair value at the grant dates consistent with Statement of Financial Accounting Standards No. 123, the net loss and net loss per share would have been adjusted to the pro forma amounts indicated below:

	Year Ended September 30, 2005	Year Ended September 30, 2004
	-----	-----
Net loss as reported	\$ (15,172,709)	\$ (2,644,641)
Add: Compensation recognized under APB No.25 ..	--	--
Less: Compensation recognized under FAS 123 ...	(52,306)	(81,306)
	-----	-----
Pro forma net loss	\$ (15,225,015)	\$ (2,725,947)
	=====	=====

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Net loss per share:

Basic and diluted- as reported	\$ (0.79)	\$ (0.15)
	=====	=====
Basic and diluted - pro forma	\$ (0.79)	\$ (0.16)
	=====	=====

The fair value of each option grant during the year ended September 30, 2005 under the 1996 Non-Employee Director Stock Option Plan was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions; dividend yield of 0%; risk-free interest rates of 4.5%; expected volatility of 57% and expected life of 5 years.

The fair value of each option grant during the year ended September 30, 2004 under the 2004 Stock Option Plan and the 1996 Non-Employee Director Stock Option Plan is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions; dividend yields of 0%; risk-free interest rates of 4.5%; expected volatility ranging from 44% to 61% and expected lives of 5 years.

Intangible Assets

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets", and SFAS No. 144, "Accounting for The Impairment or Disposal of Long-Lived Assets" we review intangibles for impairment annually, or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of our intangible assets below their carrying value. The impairment test for goodwill requires us to estimate the fair value of our overall business enterprise.

In addition to goodwill, intangible assets include customer relationships acquired in current or past business acquisitions which are being amortized on a straight-line basis over a period of ten to twenty years, commencing on the date of the acquisition. The impairment test for customer relationships requires us to review original relations for continued retention. Amortization expense associated with customer relationships amounted to \$47,266 including \$22,653 of impairment charges and \$13,150 for the fiscal years ended September 30, 2005 and 2004 respectively. Accumulated amortization was \$77,544 and \$30,275 at September 30, 2005 and 2004 respectively. Amortization of customer relationships is expected to be \$24,613 per year during the next five years.

We have elected to perform the required annual impairment test of our goodwill on the last day of our fiscal third quarter at which time no impairment was determined to exist. Due to our decision to dispose of our Georgia and Tennessee operations at September 30, 2005, goodwill associated with these operations totaling \$2,172,198 were written off as part of the loss on disposal of such discontinued operations during the fourth quarter. In addition, due to the magnitude of the resultant fiscal 2005 losses, management determined in the fourth quarter that the carrying value of corporate-wide goodwill was impaired at September 30, 2005 and accordingly wrote-off all remaining goodwill recording a non-cash impairment loss of \$1,361,696.

1. Summary of Significant Accounting Policies - (Continued)

Long-Lived Assets

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

In accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, long-lived assets to be held and used are analyzed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. SFAS No. 144 relates to assets that can be amortized and the life can be determinable. We evaluate at each balance sheet date whether events and circumstances have occurred that indicate possible impairment. If there are indications of impairment, we use future undiscounted cash flows of the related asset or asset grouping over the remaining life in measuring whether the assets are fully recoverable. In the event such cash flows are not expected to be sufficient to recover the recorded asset values, the assets are written down to their estimated fair value. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value of asset less the cost to sell.

Net Income Loss Per Share

Basic earnings per share represents income available to common stockholders divided by the weighted average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if potentially dilutive common shares had been issued, as well as any adjustment to income that would result from the assumed conversion. Potential common shares that may be issued by us relate to outstanding stock options and warrants (determined using the treasury stock method) and convertible debt. Basic and diluted net loss per share are the same for the years ended September 30, 2005 and 2004, since the effect of the inclusion of all outstanding options, warrants and convertible debt would be anti-dilutive.

New Accounting Pronouncements

SFAS No. 123R, Share Based Payment - An Amendment to SFAS Nos. 123 and 95 - This standard includes the following changes to current accounting for share based payments:

- o All companies would be required to recognize compensation expense for share-based payment arrangements including stock options.
- o All companies must recognize the expense in operations and cannot bury the effects in the financial statement footnotes as currently allowed. The cost would be recognized over the requisite service period (generally the vesting period).
- o All companies would be required to estimate how many options will actually vest. The ability under the current rules to assume 100% vesting and record forfeitures as they occur will not be permitted.
- o The ED still requires public companies (including Small Business filers) to value employee stock awards at fair value on the date of grant. However, the ED prefers a "lattice model" in lieu of what most companies use today, the Black-Scholes model, a "closed-form model."
- o Private companies would be required to follow either (a) the fair value method at grant date consistent with public company accounting, or (b) the intrinsic value method (the excess, if any, of the fair value of the stock over the exercise price) at each reporting date until the option is settled or exercised. The so-called "minimum value" method (essentially a simplified version of the Black-Scholes model) currently permitted would no longer be an acceptable valuation model.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

- o Stock option awards with graded vesting would be treated as separate awards for each vesting date. The ability to treat such awards as a single award, as currently permitted, would longer be allowed. This would lead to more expense up-front and less in later years.

In April 2005, the Securities and Exchange Commission released Staff Accounting Bulletin ("SAB") No. 107, "Share-Based Payment" the adoption of a new rule that amended the compliance date for Statement of Financial Accounting Standard ("SFAS") No. 123 (R), "Share-Based Payment", which establishes standards for transactions in which an entity exchanges its equity instruments for goods or services. SFAS No. 123 (R) was to be effective for the interim or annual reporting periods beginning on or after June 15, 2005, but SAB No. 107 amended the effective date for implementing SFAS No. 123 (R) to the beginning of the next fiscal year that begins after December 15, 2005, for small business issuers. We will continue to provide the pro forma disclosure provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148 "Accounting for Stock-Based Compensation-Transition and Disclosure-an amendment to FASB Statement No. 123" in the notes to the consolidated financial statements. Management has not yet determined what effect adoption of this standard will have on our financial condition and results of operations.

41

In May 2005, the Financial Accounting Standards Board issued SFAS No. 154, "Accounting Changes and Error Corrections" (SFAS 154). SFAS 154 is a replacement of Accounting Principles Board No. 20, "Accounting Changes" and FASB Statement No. 3 "Reporting Accounting Changes in Interim Financial Statements." SFAS 154 provides guidance on the accounting for and reporting of accounting changes and error corrections. It establishes retrospective application as the required method for reporting a change in accounting principle. SFAS 154 provides guidance for determining whether retrospective application of a change in accounting principle is impracticable and for reporting a change when retrospective application is impracticable. The reporting of a correction of an error by restating previously issued financial statements is also addressed by SFAS 154. SFAS 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 31, 2005. This pronouncement is not expected to have a material effect on our financial statements.

2. Acquisition of Businesses

On July 1, 2004, we acquired certain assets of American Tire Disposal, Inc. ("ATD") a southern California based company in the business of collecting and marketing scrap tires for approximately \$172,000 in assumed liabilities, forgiveness of trade payables due to us and cash. We have consolidated ATD's business into our existing California operations. The acquisition was accounted for as a purchase in accordance with SFAS No. 141 "Business Combinations" and accordingly the results of their operations since the date of acquisition are included in the consolidated financial statements. The total consideration paid exceeded the fair value of the net assets acquired by \$152,000 resulting in the recognition of \$120,000 of goodwill and \$32,000 assigned to customer relationships. Customer relationships are being amortized over an estimated useful life of 10 years on a straight-line basis and will be evaluated annually.

3. Notes Receivable, Officers

In January 1998 we advanced \$104,000 to an officer under an 8.5% secured promissory note with both principal and interest due January 2001. This note was amended on September 30, 2000 to extend the maturity until April 15, 2002 (subsequently extended to April 15, 2004) and increase the interest rate to 9.5%. On April 30, 2004 the remaining balance of \$163,000, including interest,

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

was applied to offset obligations under our \$400,000 September 30, 2003 note payable due to the officer. (See Note 8).

In January 1999, we advanced two officers \$55,000, in aggregate, under 8.5% secured promissory notes with both principal and interest due January 2002 (subsequently extended to January 2004). The proceeds were used to participate in a private placement of our common stock and the loans were secured by 191,637 shares of common stock owned by the two officers. In June 2002, the two officers repaid \$5,000 each toward their respective then outstanding balances. On March 31, 2004, one officer agreed to apply his then outstanding balance of \$24,000 against obligations under our \$400,000 September 30, 2003 note payable due to the officer. (See Note 8). On May 11, 2004 the other officer sold 36,717 shares of common stock valued at \$44,000 back to us in full settlement of all amounts due under his note. We subsequently cancelled these shares, which reduced our total shares issued and outstanding.

42

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

4. Discontinued Operations

Due to the magnitude of the continuing operating losses incurred by our Georgia (\$3.4 million) and Tennessee (\$1.8 million) subsidiaries during fiscal 2005, management determined it to be in the best interest of GreenMan to discontinue all Southeastern operations and dispose of their respective operating assets. A majority of the Tennessee operating losses were due to rapid market share growth within the state by an undercapitalized subsidiary, necessitating us to transport an increasing number of Tennessee scrap tires to our Georgia facility for processing at significant transportation and processing loss. A majority of the Georgia operating losses were due to (1) the negative impact of processing a significant number of Tennessee sourced tires; (2) a change in the specifications of our primary end market customers requiring a smaller product resulting in reduced processing capacity and significantly higher operating costs and (3) equipment reliability issues resulting from aging equipment processing an increasing number of scrap tires.

On September 6, 2005 we entered into an agreement under which all Tennessee scrap tire collection contracts and certain other contracts with suppliers of waste tires and contracts to supply whole tires to certain cement kilns in the southeastern region of the United States were assigned to a Company owned by a former employee. We received no cash consideration for these assignments and recorded a \$1,334,849 non-cash loss (including \$918,450 associated with goodwill written off) on disposal of the operations at September 30, 2005. The aggregate net losses including the loss on disposal associated with the discontinued operations of our Tennessee subsidiary included in the results for the fiscal year ended September 30, 2005 were approximately \$3.1 million.

On September 27, 2005, we adopted a plan to dispose of all Georgia operations and during the quarter ended December 31, 2005, we substantially curtailed operations at our Georgia subsidiary. As a result, we wrote down all Georgia operating assets to their estimated fair market value at September 30, 2005 and recorded a non-cash loss on disposal of \$4,631,102 (including \$1,253,748 associated with goodwill written off) net of a gain on settlement of our Georgia facility lease of \$586,137 (see Note 9). The aggregate net losses including the loss on disposal associated with the discontinued operations of our Georgia subsidiary included in the results for the fiscal year ended

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

September 30, 2005 were approximately \$8.0 million. We completed the divestiture of all Georgia operating assets as of March 1, 2006.

On February 17, 2006, we entered into an Asset Purchase Agreement with Tires Into Recycled Energy and Supplies, Inc. ("TIRES"). Under the agreement, we sold and assigned to TIRES certain assets, including (a) certain truck tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap truck tires; and (c) certain intangible assets. TIRES agreed to assume all of our rights and obligations under these contracts. We anticipate the transition of assigning the contracts to be completed within 60 to 90 days. In addition, TIRES entered into a sublease agreement with us with respect to part of the premises located in Georgia. We received \$155,000 from TIRES for these assets. As additional consideration, TIRES agreed to terminate several material supply and equipment lease agreements as well as terminating a December 2005 letter of intent between GreenMan and TIRES containing an exclusive option to acquire certain operating assets of TIRES (see Note 6).

On March 1, 2006, we entered into an Asset Purchase Agreement with MTR of Georgia, Inc. ("MTR") a company co-owned by a former employee. Under the agreement, we sold and assigned to MTR certain assets, including (a) certain passenger tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap passenger tires; and certain intangible assets. MTR agreed to assume all of our rights and obligations under these contracts. We anticipate the transition of assigning the contracts to be completed within 60 to 90 days. In addition, MTR entered into a sublease agreement with us with respect to part of the premises located in Georgia. We received \$250,000 from MTR for these assets. As additional consideration, MTR has agreed to assume financial responsibility for disposing of all scrap tires and scrap tire processing residual at the Georgia facility as of the close.

We agreed with TIRES and MTR not to compete in the business of providing whole tire waste disposal services or selling crumb rubber material (except to existing GreenMan customers) within certain Southeastern states for a period of three years.

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

5. Property, Plant and Equipment - (Continued)

During March 2004, our Minnesota subsidiary sold all of its land and buildings to an entity co-owned by an officer for \$1,400,000, realizing a gain of \$437,337 which has been recorded as unearned income and classified as a non current liability in the accompanying financial statements. Simultaneous with the sale, we entered into an agreement to lease the property back for a term of 12 years at an annual rent of \$195,000, increasing to \$227,460 over the term of the lease. The gain will be recognized as income ratably over the term of the lease. The lease has been classified as a capital lease, and provides for two additional 4-year extensions. We used \$875,000 of the proceeds to repay an existing mortgage on the property.

On April 1, 2003, our Wisconsin subsidiary acquired the land and buildings in which it operates for \$362,900 under a sixty-seven month promissory note with aggregate payments of \$76,500 over the first eight months. Thereafter, commencing December 1, 2003, the note requires monthly payments of \$2,886, including interest at 8% per annum with the remaining principal balance due on November 1, 2008. In April 2004, our Wisconsin subsidiary reached an agreement with the lessor of certain processing equipment to buy-out the remaining term of the lease. The lessor agreed to accept several pieces of idle equipment, 50,000 unregistered shares of our common stock (valued at \$44,000), and cash, valued in the aggregate at approximately \$180,000, in full settlement of our capital lease obligation with a carrying value of approximately \$192,000 at March 31, 2004. We recognized a gain of approximately \$12,000 in connection with this transaction during the fiscal year ended September 30, 2004.

In June 2005, we sold all our Wisconsin land and buildings for approximately \$483,000, realizing a gain of \$123,608. We used approximately \$284,000 of the proceeds to repay an existing obligation on the property and simultaneous with the sale, entered into an agreement to lease the property back for a period of 90 days. We consolidated all remaining Wisconsin operations into our Minnesota facility during the quarter ending September 30, 2005. In addition during the quarter ended June 30, 2005, our Wisconsin subsidiary reached an agreement with the lessor of certain transportation equipment to buy-out the remaining term of the lease. The lessor agreed to accept approximately \$190,000 in full settlement of our capital lease obligation with a carrying value of approximately \$156,000, resulting in a loss of approximately \$34,000 in connection with this transaction. In addition, management determined that the carrying value of the purchased transportation equipment was impaired. Accordingly, we recorded an impairment loss amounting to \$57,183 during the quarter ended June 30, 2005 based on the estimated fair value based on replacement cost of similar equipment and reduced the remaining estimated useful life to 24 months.

Depreciation and amortization expense for the fiscal years ended September 30, 2005 and 2004 was \$2,425,801 and \$2,210,293 respectively including depreciation and amortization from discontinued operations of \$853,739 and \$742,415, respectively.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

6. Acquisition Deposit

In August 2004, we executed a non-binding letter of intent and escrow agreement with Tires Into Recycled Energy and Supplies, Inc. ("TIRES"), a leading crumb rubber processor in the United States. Pursuant to the escrow agreement, we made a "good faith" payment amounting to \$350,000, which was to be applied toward the purchase price upon completion of the transaction. On December 8, 2004, we executed a new letter of intent which superseded the August letter of intent in which we (1) leased, with an option to buy, certain pieces of tire processing equipment owned by TIRES (the "Equipment Leases"), (2) entered a material supply agreement (the "MSA") and (3) were granted an exclusive purchase option to acquire additional operating assets of TIRES. The operating leases were executed in January 2005 but became effective in February and March 2005 and provide for aggregate monthly payments of \$25,300 over terms ranging from 48 to 60 months.

We have also agreed to allow TIRES to retain \$101,378 of the "good faith" payment to upgrade it's existing crumb rubber production capacity and have used the remaining \$248,622 to prepare and move the leased equipment for our use. Accordingly, during the quarter ended March 31, 2005, the \$101,378 was expensed when it was released from escrow and approximately \$243,597 has been capitalized and was being amortized over the lease terms which ranged from 48 to 60 months. The remaining balance of \$205,306 was written off as a cost of disposal of discontinued operations.

Pursuant to the terms of the MSA, we were to supply agreed upon minimum amounts of crumb rubber material to TIRES on a weekly basis. If we do not meet the minimum weekly requirements, we are assessed a shortfall fee equal to 150% of the purchase price for any shortfall tonnage. Due to unexpected equipment downtime and delays in installing the additional rasper which was being leased from TIRES, we were unable to meet the minimum material requirements during various periods during fiscal 2005 and as a result, we recorded a shortfall expense of approximately \$382,000 during the fiscal year ended September 30, 2005.

45

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

6. Acquisition Deposit - (Continued)

TIRES would purchase material was increased 15 percent for a period of 10 weeks. In return for this short term consideration, we agreed to reduce our original pricing by 8% on the first 30,000 tons of material purchased by TIRES subsequent to the 10 week amendment period.

The exclusive purchase option to acquire additional operating assets of TIRES was exercisable if predetermined financial performance criteria are met by TIRES during the subsequent fifteen to twenty four month period after December 8, 2004. The ultimate purchase price was to be determined based on those results. In return for the exclusive purchase option, we issued 127,389 shares of our common stock (valued at \$200,000) to TIRES. Had we exercised our exclusive purchase option and closed a transaction, the value of the shares would have been applied against the purchase price of the assets. If the exclusive purchase option expired or we decided not to exercise the option, TIRES would retain a sufficient number of our shares to equal \$200,000 (as of the date that the purchase option expires) and return the balance of such shares of common stock to us. If at the time the purchase option expired, the value of

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

the shares were less than \$200,000, we would have been required to issue a sufficient number of additional shares to equal \$200,000. If at the time the purchase option expired, TIRES had not achieved the predetermined financial performance criteria, TIRES would have had to return to us a sufficient number of our shares to equal \$200,000 at the time.

In February 2006 in conjunction with the discontinuance of our Georgia operations (See Note 4), we agreed to sell and assign to TIRES (a) certain truck tire processing equipment located at our Georgia facility; (b) certain rights and interests in our contracts with suppliers of scrap truck tires; (c) certain intangible assets; and (d) allowed TIRES to retain the 127,389 shares of our common stock and in return received \$155,000 in cash proceeds; agreed to terminate the MSA, Equipment Leases and several other agreements previously executed between the parties in addition to terminating a December 2004 letter of intent and exclusive option. Accordingly, at September 30, 2005, included in loss on disposal of discontinued operations is the \$200,000 assigned to the shares of common stock retained by TIRES.

7. Credit Facility/Notes Payable

Republic Services of Georgia

On May 6, 2002, Republic Services of Georgia, Limited Partnership ("RSLP") converted \$750,000 of the principal amount of a February 14, 2002 promissory note into 300,000 unregistered shares of our common stock (valued at \$750,000) and we issued a promissory note for the remaining principal balance of \$743,750 bearing interest at 10% and due in March 2007.

As of June 30, 2005, 9 payments totaling \$76,042 were past due and on July 31, 2005, RSLP agreed to waive any and all existing defaults and defer all interest and principal payments due through June 2006 at which time all interest and principal payments under the promissory note that are otherwise due and payable on or before that date will be incorporated into a new promissory note, payable in 48 monthly installments commencing July 2006 and bearing interest at 10% per annum.

First American Credit Facility

On April 4, 2002, our Iowa subsidiary executed a five-year, \$1,185,000 secured term note and a one year \$300,000 working capital line of credit (secured with all Iowa assets) with First American Bank ("First American"). The proceeds of this term note were used in connection with the acquisition of UT Tire Recyclers, Inc in April 2002.

On February 13, 2003, our Iowa subsidiary amended its existing term debt with First American under the terms of a five-year, \$1,760,857 secured term note. The note is payable in sixty monthly installments of \$33,425 and is secured with all Iowa assets. They also renewed their working capital line of credit which was increased to \$500,000. The line of credit has been subsequently extended to January 20, 2005 and First American temporarily increased the maximum availability under the line of credit to \$650,000 through September 30, 2004. The term note bears interest at 7.5% and the line of credit bears interest at the prime rate plus 1%.

On February 10, 2005, First American renewed our working capital line until February 10, 2006 (subsequently extended to May 1, 2006) and increased our maximum availability under the line of credit to \$800,000. In addition, First American agreed to increase our overall maximum availability by an additional \$350,000 to \$1,150,000 through June 10, 2005 to coincide with the performance of a significant scrap tire cleanup project which was completed in April 2005.

WAMCO Credit Facility

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

On May 16, 2003, we were notified by the Federal Deposit Insurance Company (the "FDIC") that Waco Asset Management Co.31, Ltd., ("WAMCO"), an affiliate of First City Financial Company, had purchased a pool of loans from the FDIC including several we had outstanding with the Coast Business Credit, which, along with it's parent were closed by the Commissioner of Financial Institutions of the State of California in February 2003. We were notified that WAMCO would continue to honor the original terms of the Credit Facility. On June 30, 2004, all amounts due WAMCO were paid in full with proceeds from the Laurus Credit Facility and the unamortized deferred financing charges of \$122,927 were charged to interest expense.

46

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

7. Credit Facility/Notes Payable - (Continued)

Convertible Notes Payable

In December 2003, we entered into a note purchase agreement (the "Note Agreement") with an accredited investor (the "Holder") and, pursuant thereto, we issued a convertible note payable (the "Note") in the aggregate principal amount of \$375,000 and bearing interest at 10%, due December 22, 2004. The Note was convertible at the option of the Holder at any time prior to maturity into investment units at a price equal to \$1.07 per unit with each unit consisting of one share of unregistered common stock and a warrant to purchase 1.5 shares of common stock at an exercise price of \$1.07 per share, exercisable six months after issuance for a period of five years from date of issuance.

The terms of the Note Agreement reflected a beneficial conversion feature amounting to \$154,226 calculated at the date of issue of the Note as the difference between the fair value of the common stock to be received upon conversion and the proceeds of the Note to be allocated to the common stock conversion option. The beneficial conversion feature was recorded as a debt issuance discount and a corresponding credit to paid-in capital, and was being amortized to interest expense over the term of the Note, or upon conversion. The note and accrued interest of \$18,854 was converted on June 24, 2004 into 369,331 shares of common stock and we issued warrants to purchase 553,997 shares of our common stock. The remaining unamortized beneficial conversion discount of approximately \$77,000 was charged to interest expense.

Amortization expense for the year ended September 30, 2004 was \$154,226.

Laurus Credit Facility

On June 30, 2004, we entered into a \$9 million credit facility with Laurus Master Fund, Ltd., ("Laurus") consisting of a \$5 million convertible, revolving working capital line of credit and a \$4 million convertible term note loan. At closing, we borrowed \$4 million under the term loan and \$2 million under the line of credit, and used approximately \$1,860,000 of the proceeds to repay the outstanding indebtedness under our prior credit facility and approximately \$1,070,000 to repay in full the indebtedness due Cryopolymers Leasing. Additional proceeds of the financing were used to increase working capital and to pay certain costs and fees associated with this transaction including a \$425,000 placement fee paid to our investment bank. On March 22, 2005, the credit facility was amended to permit us to maintain overadvances of up to \$2,000,000 under the line of credit through December 31, 2005. In addition, the

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

price at which the minimum borrowing note and term loan are convertible into our common stock were adjusted as noted below.

The line of credit has a three-year term. Borrowings generally bear interest at the prime rate published in The Wall Street Journal from time to time plus 1.0% (7.75% at September 30, 2005), and are convertible into shares of our common stock at the option of Laurus. Except for downward adjustments provided in the credit facility terms described below, the interest rate shall not be below 5%. The amount we may borrow at any time under the line of credit is generally limited to 90% of eligible accounts receivable (90 days or less) and 50% of eligible finished goods inventory, subject to certain limitations. Until December 31, 2005, (subsequently extended to April 30, 2006) however, we will be permitted to maintain overadvances of up to \$2,000,000 under the line of credit. All overadvances outstanding from time to time will bear interest, in addition to the interest otherwise required, at a rate equal to 2% per annum on the amount of the overadvance. In the event that at any time we have outstanding overadvances of more than \$2,000,000, or if any overadvance remains outstanding on or after April 30, 2006, the excess or overdue overadvance will bear interest, in addition to that otherwise required, at a rate equal to 2% per month for all times such amounts are outstanding. The line of credit requires us to maintain a minimum borrowing of \$1,000,000. As of September 30, 2005, our overadvance was \$1,980,250.

Subject to certain limitations, Laurus will have the right, but not the obligation, to convert the first \$1,000,000 of borrowings under the line of credit into our common stock at a revised price of \$.79 (85% of the average closing price of our common stock for the five days immediately prior to the March 22, 2005 amendment to the credit facility which was \$.93) The original conversion price of the revolving note determined at June 30, 2004 was \$1.31. The conversion price for each subsequent \$1,000,000 of borrowings will be adjusted to the higher of \$.93 or a 10% premium over the 22-day trailing average closing price computed on each \$1,000,000 increments. We will determine at that time if any new beneficial conversion factor exists. During the year ended September 30, 2005, Laurus converted \$19,750 under the line of credit and was issued 25,000 shares of common stock.

In connection with the line of credit, we issued Laurus a warrant to purchase up to 990,000 shares of our common stock at prices ranging from \$1.63 to \$2.29. The warrant, valued at \$82,731, is immediately exercisable, has a term of ten years and allows for cashless exercise at the option of Laurus, and does not contain any "put" provisions.

47

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

7. Credit Facility/Notes Payable - (Continued)

Net proceeds received from advances made under the line at closing were allocated to the line of credit and the warrant based on their relative fair values resulting in a discount on the line of credit amounting to \$186,700 which will be amortized to interest expense over the three-year term of the borrowing or immediately upon conversion. As a result of the change in conversion price pursuant to the terms of the March 22, 2005 amendment, we have determined the minimum borrowing note contains a beneficial conversion feature of \$598,717. The beneficial conversion amount was recorded as paid-in-capital and will be amortized to interest expense at \$59,872 per month through December 31, 2005 or ratably upon any partial conversion.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

The term note also has a three-year term and bears interest at the prime rate published in The Wall Street Journal from time to time plus 1.0% (7.75% at September 30, 2005), with interest payable monthly. Except for downward adjustments provided in the credit facility terms described below, the interest rate shall not be below 5%. Principal is being amortized over the term of the loan, commencing on November 1, 2004, with minimum monthly principal payments of \$125,000. Pursuant to the terms of the March 22, 2005 amendment, however principal payments otherwise due from December 1, 2004 through June 30, 2005 have been deferred and are payable in full on the maturity date of the term note, together with all other amounts due and payable on that date. In addition, Laurus has agreed to defer principal payments otherwise due from November 1, 2005 through May 1, 2006, which are also payable in full at maturity.

Laurus has the option to convert some or all of the principal and interest payments into common stock at a revised fixed conversion price of \$.93 (the average closing price of our common stock for the five days immediately prior the March 22, 2005 amendment), provided, that the first \$1,000,000 of borrowings under the term note is convertible into common stock at a price of \$.79 (85% of the average closing price of our common stock for the five days immediately prior to the amendment). The original conversion price of the term note determined at June 30, 2004 was \$1.25. Subject to certain limitations, regular payments of principal and interest will be automatically payable in common stock if the 5-day average closing price of the common stock immediately preceding a payment date is greater than or equal to 110% of such fixed conversion price.

In connection with the term note, we issued Laurus a warrant to purchase up to 390,000 shares of our common stock at prices ranging from \$1.56 to \$2.18. The warrant, valued at \$37,161, is immediately exercisable, has a term of ten years and allows for cashless exercise at the option of Laurus, and does not contain any "put" provisions.

Net proceeds received from issuance of the term note amounted to \$3,788,950 and were allocated to the term note and the warrant based on their relative fair values. The note contained a beneficial conversion feature of \$64,000 at issuance based on the intrinsic value of the shares into which the note is convertible, and a debt issue discount amounting to \$248,200. The original beneficial conversion amount was recorded as paid in capital and will be amortized to interest expense along with the debt discount over the three year term of the note or ratably upon any partial conversion. As a result of the change in conversion price pursuant to the terms of the March 22, 2005 amendment, we have determined the term note's beneficial conversion feature increased \$1,485,594 to \$1,549,594. The additional beneficial conversion amount was recorded as paid-in-capital with \$567,429 (the portion associated with the first \$1,000,000 of borrowings) being amortized to interest expense at \$56,743 per month through December 31, 2005 or ratably upon any partial conversion with the remaining balance of \$918,165 amortized at \$32,792 per month over the remaining term of the note or ratably upon any partial conversion.

We will be required to pay a premium of 2% of the amount of each principal payment made in cash under the line of credit and/or the term note. In addition, we will be required to pay a penalty of 20% of the then-outstanding balance of the term note if we prepay that note.

The interest rate under each of the notes is subject to downward adjustment on a monthly basis (but not to less than 0%). The downward adjustment will be in the amount of 200 basis points (2.0%) for each incremental 25% increase in the average closing price of our common stock over the then applicable conversion price of the note for the five-day period preceding such monthly determination date if we have at that time registered for resale all of the shares of our common stock underlying the notes and warrants we are issuing to Laurus in this transaction, or 100 basis points (1.0%) for each incremental

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

25% increase in the average closing price of our common stock over the then applicable conversion price of the note for the five-day period preceding such monthly determination date if we have not at that time registered for resale all of such shares.

The credit facility is secured by a first-priority security interest in substantially all of our assets, including the capital stock of our active subsidiaries. Our active subsidiaries have guaranteed our obligations to Laurus and have granted Laurus a security interest in their assets to secure these guarantees.

We incurred investment banking costs amounting to \$559,000, including \$455,000 in cash and \$103,840 in the form of 57,252 shares of our unregistered common stock valued at \$75,000 and warrants to purchase up to 270,000 shares of our common stock valued at \$28,840. The warrants are immediately exercisable, have a term of five years and have exercise prices ranging from \$1.64 to \$2.29.

48

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

7. Credit Facility/Notes Payable - (Continued)

Total debt issuance costs incurred in connection with securing the credit facility amounted to approximately \$674,000 of deferred financing costs which will be amortized to interest expense over the three year term. Additionally, a management fee amounting to \$315,000 was paid to Laurus from the closing proceeds, and was recorded as a debt discount to be amortized to interest expense over the three year term.

On July 20, 2005, we entered into a \$1 million convertible term note (the "Term Note") and related agreements with Laurus. The Term Note has a maturity date of June 30, 2007 and bears interest at the prime rate published in The Wall Street Journal from time to time plus 1.75% (8.5% at September 30, 2005). Interest on the loan is payable monthly commencing August 1, 2005. Principal will be amortized over the term of the loan, commencing on February 1, 2006, with minimum monthly payments of principal of \$58,823.53. Laurus has the option to convert some or all of the principal and interest payments into common stock at a price of \$.33 (the average closing price of our common stock on the American Stock Exchange for the 3-day period ending July 18, 2005) (the "Fixed Conversion Price"). In connection with the Term Note, we also issued Laurus an option to purchase up to an aggregate of 2,413,571 shares of our common stock at an exercise price equal to \$0.01 per share. This option, valued at \$401,738, is immediately exercisable, has a term of ten years, allows for cashless exercise at the option of Laurus, and does not contain any "put" provisions. Net proceeds received from issuance of the Term Note amounted to \$955,000 and were allocated to the term note and the warrant based on their relative fair values. The note contained a beneficial conversion feature of \$393,939 at issuance based on the intrinsic value of the shares into which the note is convertible, resulting in a total debt issue discount, including the value of the options, of \$795,677. The beneficial conversion amount will be recorded as paid in capital and will be amortized to interest expense along with the debt conversion discount over the two year term of the note or ratably upon any partial conversion. We have agreed to register for resale under the Securities Act of 1933 the shares of common stock issuable to Laurus upon conversion of borrowings under the Term Note and upon exercise of the option. The Term Note contains repayment penalties and interest adjustments similar to the notes issued to Laurus under the June 2004 credit facility. The Term Note borrowings are also secured by a first security

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

interest in substantially all of our assets and those of our subsidiaries.

We have agreed to register for resale under the Securities Act of 1933 the shares of common stock issuable to Laurus upon conversion of borrowings under the credit facility and upon exercise of the warrants. To date, we have registered 3,801,237 shares of common stock for resale by Laurus. That number represents the largest number of shares we were permitted to list on the American Stock Exchange without first obtaining the approval of our stockholders.

We are required to file an additional registration statement with respect to the resale of the balance of shares that we currently expect to be required to issue to Laurus in connection with the credit facility. That registration statement cannot be declared effective unless and until our stockholders approve the issuance of such shares. On June 16, 2005, our stockholders approved the issuance of up to 7,380,000 shares of our common stock to Laurus. The amount of our common stock Laurus may hold at any given time is limited to no more than 4.99% of our outstanding capital stock and no more than 25% of our aggregate daily trading volume determined over the five-day period prior to the date of determination. These limitations may be waived by Laurus on 90 days' prior notice, or without notice if we are in default.

The conversion price applicable to each of the notes and the exercise price of each of the warrants was previously subject to downward adjustment on a "full ratchet" basis if we issued shares of our common stock (or common stock equivalents) at a price per share less than the applicable conversion or exercise price. On April 8, 2006, Laurus agreed to retroactively eliminate their rights to enforce these provisions. There were exceptions for issuances of stock and options to our employees and for certain other ordinary course stock issuances.

Subject to applicable cure periods, amounts borrowed from Laurus are subject to acceleration upon certain events of default, including: (i) any failure to pay when due any amount we owe to Laurus; (ii) any material breach by us of any other covenant made to Laurus; (iii) any misrepresentation made by us to Laurus in the documents governing the credit facility; (iv) the institution of certain bankruptcy and insolvency proceedings by or against us; (v) the entry of any monetary judgment or similar final process against us for more than \$50,000 that remain unvacated, unbonded or unstayed for a period of 30 business days; (vi) suspensions of trading of our common stock from our principal trading market for five consecutive days or five days during any ten consecutive days; (vii) any failure to deliver shares of common stock upon conversions under the credit facility; (viii) certain defaults under agreements related to any of our other indebtedness; (ix) changes of control of our company. Substantial fees and penalties are payable to Laurus in the event of default.

8. Notes Payable - Related Party

Notes Payable, Related Party consists of the following:

Convertible Notes Payable-Related Party

One of our directors was owed \$300,000 under the terms of an October 1999 private offering of 10% convertible notes and warrants and \$75,000 under the terms of a February 2000 offering of 11% convertible notes and warrants. The convertible notes originally matured twelve months after issuance and were payable in cash or unregistered shares of our common stock at a conversion price of \$1.00 per share. Subsequently, the director agreed to extend the maturity date of each note several times and in June 2001 we agreed to reduce the conversion price to \$.75 per share. On February 16, 2004, the director converted both notes, including \$375,000 of principal and \$168,210 of accrued interest into 724,281 shares of our unregistered common stock pursuant to the amended terms noted above.

Note Payable-Related Party

In November 2000, we borrowed \$200,000 from the same director who held the convertible notes referred to above. This unsecured note payable bears interest at 12% per annum with interest due monthly and the principal due originally in November 2001. Subsequently, the director agreed to extend the maturity date of each note several times and in June 2005, agreed to extend the maturity of this

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

note until the earlier of when all amounts due under the Laurus credit facility (See Note 7) have been repaid or June 30, 2007.

During the period of June to August 2003, two immediate family members of an officer loaned us a total of \$400,000 under the terms of two-year, unsecured promissory notes which bear interest at 12% per annum with interest due quarterly and the principal due upon maturity. In March 2004, these same individuals loaned us an additional \$200,000 in aggregate, under similar terms with the principal due upon maturity March 2006. These individuals each agreed to invest the entire \$100,000 principal balance of their June 2003 notes (\$200,000 in aggregate) into the April 2004 private placement of investment units and each received 113,636 units in these transactions. At September 30, 2005, the remaining balance due on these advances amounted to \$400,000. In addition, the two individuals agreed to extend the maturity of the remaining balance of these notes until the earlier of when all amounts due under the Laurus credit facility have been repaid or June 30, 2007.

In September 2003, an officer loaned us \$400,000 under the terms of a September 30, 2003 unsecured promissory note which bears interest at 12% per annum with interest due quarterly and the principal due March 31, 2004 (subsequently extended to September 30, 2004). In 2004, the officer applied approximately \$114,000 of the balance due him and accrued interest of approximately \$21,000 to exercise options to purchase 185,000 shares of common stock. In addition, he agreed to extend the maturity of the remaining balance of this note until the earlier of when all amount due under the Laurus credit facility have been repaid or June 30, 2007. At September 30, 2005, the remaining balance due on this note amounted to \$99,320 (See Note 3).

51

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

8. Notes Payable - Related Party

On September 30, 2003, our Georgia subsidiary's landlord, loaned us \$100,000 under the terms of a September 30, 2003 unsecured promissory note which bears interest at 12% per annum with interest due quarterly and the principal due September 30, 2004. In June 2004, the landlord agreed to invest the entire \$100,000 principal balance of the unsecured promissory note plus accrued interest of \$7,300 into the April 2004 private placement of investment units and received 121,932 units in this transaction.

In October 2003, one of our officers loaned us \$75,000 under the terms of an October 22, 2003 unsecured promissory note payable which bears interest at 12% per annum with interest due quarterly and the principal due June 30, 2004. During January and February 2004, the same officer advanced us an additional \$250,000 under substantially similar notes that are also due in June 2004. This officer agreed to invest all unpaid principal and interest under these notes amounting to approximately \$350,000 into the April 2004 private placement of units and received 339,806 units in these transactions.

The following is a summary of maturities of all related party notes payable at September 30, 2005:

Years Ending September 30,	

2006	\$ --
2007.....	699,320

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

 \$ 699,320
 =====

Total interest expense for related party notes amounted to \$83,918 and \$143,727, for the fiscal years ended September 30, 2005 and 2004, respectively. Total accrued interest due related parties amounted to \$98,739 and \$49,820 at September 30, 2005 and 2004, respectively.

9. Capital Leases

We lease various facilities and equipment under capital lease agreements with terms ranging from 36 months to 240 months and requiring monthly payments ranging from \$348 to \$17,642. Assets acquired under capital leases with an original cost of \$2,529,832 and \$4,411,461 and related accumulated amortization of \$1,016,987 and \$1,319,717 are included in property, plant and equipment at September 30, 2005 and 2004, respectively. Amortization expense for the years ended September 30, 2005 and 2004 amounted to \$237,054 and \$350,857 respectively.

In July 2002, our Minnesota subsidiary entered into a four-year equipment lease with a company co-owned by an employee for equipment valued at \$146,670. Under the terms of the lease, we are required to pay \$4,394 per month rental and have the ability to purchase the equipment at the end of the lease at approximately 40% of original value. The lease is classified as a capital lease.

In March 2004, our Minnesota subsidiary leased back their property from a company co-owned by an employee under a twelve-year lease requiring an annual rental of \$195,000, increasing to \$227,460 over the term of the lease. The lease can be renewed for two additional four-year periods. The lease has been classified as a capital lease with a value of \$1,400,000 (See Note 5).

On February 28, 2006, we amended our Georgia lease agreement whereby we obtained the right to terminate the original lease, which had a remaining term of approximately fifteen years, by providing the landlord with six months notice. In the event of such termination, we will be obligated to continue to pay rent until the earlier to occur of (1) the sale by the landlord of the premises; (2) the date on which a new tenant takes over; or (3) three years from the date on which we vacate the property. As a result of the amendment and our decision to dispose of our Georgia operations, we wrote off the unamortized balance of \$1,427,053 associated with the leased land and buildings and improvements as a cost of disposal of discontinued operations at September 30, 2005. This loss was partially offset by a \$586,137 gain on settlement of the remaining capital lease obligations due and is included in the loss on disposal of discontinued operations at September 30, 2005 (See Note 4).

The following is a schedule of the future minimum lease payments under the capital leases together with the present value of net minimum lease payments at September 30, 2005:

Years Ending September 30, -----	
2006	\$ 316,983
2007.....	251,864
2008	217,762
2009.....	216,738
2010.....	223,796
2011 and thereafter.....	1,249,113

Total minimum lease payments	2,476,256
Less amount representing interest	(937,697)

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

Present value of minimum lease payments	----- \$ 1,538,559 =====
--	--------------------------------

For the years ended September 30, 2005 and 2004, interest expense on capital leases amounted to \$199,182 and \$376,650, respectively.

52

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

10. Commitments and Contingencies

Employment Agreements

We have employment agreements with three of our officers, which provide for base salaries, participation in employee benefit programs and severance payments for termination without cause (See Note 18).

Rental Agreements

Our Iowa subsidiary leases a facility located on approximately 4 acres of land under a 10-year lease commencing in April 2003 from Maust Asset Management Company, LLC ("Maust Asset Management"), a company co-owned by one of our employees. Under the terms of the lease, monthly rental payments of \$8,250 are required for the first five years increasing to \$9,000 per month for the remaining five years. The lease also provides a right of first refusal to purchase the land and buildings at fair market value during the term of the lease. Maust Asset Management acquired the property from the former lessor. In April 2005, our Iowa subsidiary entered into an eight-year lease agreement with Maust Asset Management for approximately 3 acres adjacent to our existing Iowa facility. Under the terms of the lease, monthly rent payments of \$3,500 are required.

Our California subsidiary leases approximately 45,000 square feet of a building situated on approximately 1.5 acres of land for \$1,250 per month. The lease expires in April 2007 but can be terminated by either party with 30 days prior notice and provides for an additional 5 year extension.

Our Tennessee subsidiary leased a facility of approximately 26,000 square feet located on approximately 2 acres of land under a three-year agreement for \$10,222 per month which expired on September 30, 2005, subsequent to our September divestiture of all Tennessee operating assets.

We lease approximately 3,380 square feet of office space in Lynnfield, Massachusetts at a monthly rental of \$5,070 under a five-year lease that expires in May 2008. In June 2004, we amended this lease to include an additional 1,125 square feet of office space for additional monthly rent of \$1,500.

For the years ended September 30, 2005 and 2004, total rental expense in connection with all non-cancellable real estate leases amounted to \$340,004 and \$302,004 respectively, including \$123,000 per year associated with related-party leases.

We also rent various vehicles and equipment from third parties under non-cancellable operating leases with monthly rental payments ranging from \$263 to \$1,620 and with terms ranging from 48 to 84 months. In addition, we rent several pieces of equipment on a monthly basis from a company co-owned by an

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

employee at monthly rentals ranging from \$263 to \$1,295. In January 2005, we entered into three new equipment lease agreements with Maust Asset Management in which we are required to pay between \$1,500 and \$2,683 per month rental and have the ability to purchase the equipment at the end of the lease for between \$12,000 and \$16,000.

For the fiscal years ended September 30, 2005 and 2004, total rent expense in connection with non-cancellable vehicle and equipment leases amounted to \$93,062 and \$78,177, respectively, of which, \$51,149 and \$15,786 were to related parties during the fiscal years ended September 30, 2005 and 2004, respectively.

The total future minimum rental commitment at September 30, 2005 under the above operating leases are as follows:

Year ending September 30:	Real Estate	Equipment	Total
	-----	-----	-----
2006	\$ 234,840	\$ 84,806	\$ 319,646
2007	227,340	68,199	295,539
2008	204,630	19,416	224,046
2009	150,000	--	150,000
2010	150,000	--	150,000
2011 and thereafter	378,500	--	378,500
	-----	-----	-----
	\$1,345,310	\$ 172,421	\$1,517,731
	=====	=====	=====

Litigation

As of March 31, 2006, approximately 16 vendors of our GreenMan Technologies of Georgia, Inc. and GreenMan Technologies of Tennessee, Inc. subsidiaries had commenced legal action, primarily in the state courts of Georgia, in attempts to collect approximately \$1.6 million of past due amounts, plus accruing interest, attorneys' fees, and costs, all relating to various services rendered to these subsidiaries. The largest individual claim is for approximately \$650,000. As of March 31, 2006, 3 of these vendors had secured judgments in their favor for an aggregate of approximately \$250,000. As previously noted, all of GreenMan Technologies of Tennessee, Inc.'s assets were sold in September 2005 and substantially all of GreenMan Technologies of Georgia, Inc.'s assets were sold as of March 1, 2006. All proceeds from these sales were retained by our secured lender and these subsidiaries have no substantial assets. We are therefore currently evaluating the alternatives available to these subsidiaries.

GreenMan Technologies, Inc. was not a party to any of these vendor relationships and none of the plaintiffs have filed suit against GreenMan Technologies, Inc. While there can be no assurance that GreenMan Technologies, Inc will not be named as a defendant in future proceedings, we believe that GreenMan Technologies, Inc has valid defenses to any potential claims that may be made against us, and we intend to defend against any such claims vigorously.

In addition to the foregoing, we are subject to routine claims from time to time in the ordinary course of our business. We do not believe that the resolution of any of the claims that are currently known to us will have a material adverse effect on our company or on our financial statements.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

11. Stockholders' Equity

Increase in Authorized Shares of Common Stock

On June 16, 2005, our stockholders approved an amendment to our Restated Certificate of Incorporation to increase the number of authorized shares of our common stock from 30,000,000 to 40,000,000.

Elimination of the Description of Class A Convertible Preferred Stock

On June 16, 2005, our stockholders approved an amendment to our Restated Certificate of Incorporation to eliminate the description of Class A Convertible Preferred Stock due to the fact no such shares were authorized for issuance under the Restated Certificate of Incorporation.

Private Offering of Common Stock

On April 9, 2004, we commenced a private offering of investment units to accredited investors. Each unit consists of one share of our common stock and a warrant to purchase 0.5 shares of our common stock. The purchase price of the units equaled 80% of the average closing bid price of our common stock during the ten days preceding the date each investor's subscription for units became a binding commitment. The warrants are exercisable at any time between the ninth month and the third year after the date of issuance at an exercise price equal to 150% of the closing bid price of our common stock on the day preceding such date. In addition, in accordance with American Stock Exchange rules, units purchased by officers, directors or affiliates were made at 100% of the closing bid price of our common stock on the day preceding the date such investor's subscription for units became a binding commitment.

As of June 30, 2004, when the offering was concluded, we had sold 1,594,211 units (1,594,211 shares of our common stock and warrants to purchase 797,105 additional shares of our common stock at prices ranging from \$1.56 to \$2.06 per share) to investors, including our directors and existing shareholders, for gross proceeds of \$1,547,800. We used the net proceeds of this offering to re-establish our Georgia waste wire processing capacity and for general working capital purposes.

Other Common Stock Transactions

On February 16, 2004, a director converted two convertible notes, including \$375,000 of principal and \$168,210 of accrued interest into 724,281 shares of our unregistered common stock (See Note 8).

In April 2004, we issued 50,000 shares of unregistered stock (valued at \$44,000) to the lessor of certain processing equipment leased by our Wisconsin subsidiary as partial consideration in a lease buy-out transaction.

On June 24, 2004, we issued 369,331 shares of common stock upon the conversion of a December 23, 2003 note payable in the principal amount of \$375,000 and accrued interest of \$18,854 (See Note 7).

On June 30, 2004, we issued 57,252 shares of our unregistered common stock valued at \$75,000 for investment banking services in conjunction with the Laurus financing (See Note 7).

1993 Stock Option Plan

The 1993 Stock Option Plan was established to provide stock options to our employees, officers, directors and consultants. On March 29, 2001, our stockholders approved an increase to the number of shares authorized under the Plan to 3,000,000. This plan expired in June 2004.

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

During the period of February 2004 to June 2004, two directors and an officer, collectively exercised options and warrants to purchase 223,538 shares of unregistered common stock at exercise prices ranging from \$0.38 to \$0.94 per share for gross proceeds of \$150,435.

54

GreenMan Technologies, Inc.
Notes To Consolidated Financial Statements

11. Stockholders' Equity - (Continued)

Stock options and activity is summarized as follows:

	Year Ended September 30, 2005		Year Ended September 30, 2004

2004 and 2005 Stock Option Plans

On April 21, 2004, our Board of Directors adopted the 2004 Stock Option Plan (the "2004 Plan") subject to ratification by our stockholders. During May and August 2004, the Board granted options to purchase 538,000 shares of our common stock under the 2004 Plan at prices ranging from \$1.05 to \$1.24 and having a weighted average fair value of \$.32 per share. Subsequently, the Board chose not to submit the 2004 Plan for ratification by our stockholders and the plan and all granted options were terminated by our Board on March 18, 2005, and all options granted under that plan have been terminated.

In addition, on March 18, 2005, our Board of Directors adopted the 2005 Stock Option Plan (the "2005 Plan"), which was subsequently approved by our stockholders on June 16, 2005. The options granted under the 2005 Stock Option Plan may be either options intended to qualify as "incentive stock options" under Section 422 of the Internal Revenue Code of 1986, as amended; or non-qualified stock options. No options have been granted under the 2005 Plan.

Non-Employee Director Stock Option Plan

Under the terms of our 1996 Non-Employee Director Stock Option Plan on a non-employee director's initial election to the Board of Directors, they are automatically granted an option to purchase 2,000 shares of our common stock. Each person who was a member of the Board of Directors on January 24, 1996, and was not an officer or employee, was automatically granted an option to purchase 2,000 shares of our common stock. In addition, after an individual's initial election to the Board of Directors, any director who is not an officer or employee and who continues to serve as a director will automatically be granted, on the date of the annual meeting of stockholders, an option to purchase an additional 2,000 shares of our common stock. The exercise price per share

55

GreenMan Technologies, Inc. Notes To Consolidated Financial Statements

11. Stockholders' Equity - (Continued)

of options granted under the Non-Employee Director Stock Option Plan is 100% of the fair-market value of our common stock on the business day immediately prior to the date of the grant and is immediately exercisable for a period of ten years from the date of the grant.

The Board of Directors has reserved 60,000 shares of our common stock for issuance under this plan and as of September 30, 2005, options to purchase 38,000 shares of our common stock have been granted of which 28,000 are outstanding and exercisable at prices ranging from \$0.38 to \$1.95.

During the fiscal years ended September 30, 2005 and 2004, options were granted to purchase 6,000 shares of common stock at \$.51 per share and \$1.10 per share, respectively. The options are exercisable for a period of ten years. The weighted average fair value of the options granted during the years ended September 30, 2005 and 2004 were \$.16 and \$.37 per share, respectively.

Other Stock Options and Warrants

In January 2004, warrants to purchase 117,852 shares of our common stock

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

were exercised at pricing ranging from \$1.00 to \$1.50 using a net exercise feature, and as a result, we issued 29,128 shares of our common stock.

On June 30, 2004, we issued Laurus a warrant to purchase up to 990,000 shares of our common stock at prices ranging from \$1.63 to \$2.29 and a warrant to purchase up to 390,000 shares of our common stock at prices ranging from \$1.56 to \$2.18. The warrants vest immediately and have a five-year term. In addition, we issued a warrant to purchase up to 270,000 shares of our common stock at prices ranging from \$1.64 to \$2.29 for investment banking services. The warrants vest immediately and have a five-year term.

On July 20, 2005, we issued Laurus a warrant to purchase up to an aggregate of 2,413,571 shares of our common stock at an exercise price equal to \$0.01 per share. This option, valued at \$401,738, is immediately exercisable, has a term of ten years, allows for cashless exercise at the option of Laurus, and does not contain any "put" provisions.

Information pertaining to all other options and warrants granted and outstanding is as follows:

Common Stock Reserved

We have reserved common stock at September 30, 2005 as follows:

Stock option plans	1,710,356
Other stock options	1,147,500
Other warrants	5,868,074
Shares issuable upon conversion of notes payable and interest	11,800,000

	20,525,930
	=====

12. Employee Benefit Plan

Effective August 1999, we implemented a Section 401(k) plan for all eligible employees. Employees are permitted to make elective deferrals of up to 15% of employee compensation and employee contributions to the 401(k) plan are fully vested at all times. We may make discretionary contributions to the 401(k) plan which become vested over a period of five years. There were no corporate contributions to the 401(k) plan during the years ended September 30, 2005 and 2004, respectively.

13. Segment Information

We operate in one business segment, the collecting, processing and marketing of scrap tires to be used as feedstock for tire derived fuel, civil engineering projects and/or for further processing into crumb rubber.

14. Major Customers

During the fiscal years ended September 30, 2005 and 2004, no one customer accounted for more than 10% of our consolidated net sales.

15. Income Taxes

The provision for income taxes was comprised of the following amounts for the years ended:

	September 30, 2005	September 30, 2004
	-----	-----
Current:		
Federal	\$ 270,000	\$ --
State	4,745	550
	-----	-----
	274,745	550
	-----	-----
Deferred federal and state taxes	--	--
	-----	-----
Total provision for income taxes	\$ 274,745	\$ 550

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

=====

The current state taxes result from income in states where we have no net operating loss carry forwards. The provision for deferred income taxes reflect the impact of "temporary differences" between amounts of assets and liabilities recorded for financial reporting purposes and the amounts recorded for income tax reporting purposes.

The difference between the statutory federal income tax rate of 34% and the effective rate is primarily due to net operating losses incurred by us and the provision of a valuation reserve against the related deferred tax assets.

The following differences give rise to deferred income taxes:

	September 30, 2005	September 30, 2004
	-----	-----
Net operating loss carry forwards	\$11,835,000	\$ 9,735,000
Differences in fixed asset bases	522,000	(1,084,000)
Capital loss carryover	--	--
Other, net	1,296,000	(17,000)
	-----	-----
	13,653,000	8,634,000
Valuation reserve	(13,653,000)	(8,364,000)
	-----	-----
Net deferred tax asset	\$ 0	\$ 270,000
	=====	=====

57

GreenMan Technologies, Inc.
Notes To Consolidated Financial Statements

15. Income Taxes - (Continued)

Previously, we had recorded a full valuation allowance on the net operating loss carry forwards and other components of the deferred tax assets based on our expected ability to realize the benefit of those assets. In the year ending September 30, 2002, we reduced the valuation allowance by \$270,000 based on our net income before taxes in the year then ending as well as expected net income before income taxes for the next fiscal year.

Based on the unforeseen magnitude of our quarterly and year to date losses, we determined the near-term realizability of the \$270,000 non-cash deferred tax asset to be questionable and therefore provided a valuation allowance on the entire amount during the first quarter of our fiscal year ended September 30, 2005.

The change in the valuation reserve is as follows:

	Year Ended September 30, 2005	Year Ended September 30, 2003
	-----	-----
Balance at beginning of period	\$ 8,364,000	\$ 7,783,000
Increase due to rate differentials and current period operating results	5,289,000	581,000

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

	-----	-----
Balance at end of period	\$13,653,000	\$ 8,364,000
	=====	=====

As of September 30, 2005, we had net operating loss carry forwards of approximately \$32,000,000. The Federal and state net operating loss carry forwards expire in varying amounts beginning in 2013 and 2006, respectively. In addition, we have Federal tax credit carry forwards of approximately \$17,000 available to reduce future tax liabilities. The Federal tax credit carry forwards expire beginning in 2013. Use of net operating loss and tax credit carry forwards maybe subject to annual limitations based on ownership changes in our common stock as defined by the Internal Revenue Code.

17. Fair Value of Financial Instruments

At September 30, 2005 and 2004, our financial instruments consist of notes payable to banks and others, and convertible notes payable. Notes payable to banks and others approximate their fair values as these instruments were negotiated currently and bear interest at market rates. The fair value of the \$6,693,538 convertible notes payable is \$8,767,991 at September 30, 2005 based upon the intrinsic value of the conversion feature on that date (see Note 7).

18. Subsequent Events

American Stock Exchange Notices

On January 5, 2006 we were notified by the Exchange indicating we were not in compliance with the Exchange's requirements for continued listing as set forth in Sections 134 and 1101 of the Exchange's Company Guide with respect to our failure to file our Annual Report on Form 10-KSB for the year ended September 30, 2005 with the Securities and Exchange Commission.

In order to maintain our listing on the Exchange, we were required to, and did, submit a plan by January 19, 2006 advising the Exchange of action we have taken, or will take, that would bring our company into compliance with Sections 134 and 1101 of the Company Guide by no later than March 20, 2006. On February 2, 2006, we were notified that the Exchange had accepted our compliance plan and had granted us an extension of time through March 20, 2006 to regain compliance with the continued listing standards. Although we had made progress toward compliance by March 20, 2006, we did not file our Annual Report by that date. Although we remain subject to continued periodic review by the Exchange, the Exchange has not notified us of its intention to initiate delisting proceedings and, to our knowledge, the Exchange has not initiated such proceedings.

On February 14, 2006, we were notified by the Exchange that we are not in compliance with the Exchange's requirements for continued listing set forth in Section 1003(a)(i) of the Exchange's Company Guide because we did not meet the \$2,000,000 shareholders' equity requirement and because we reported losses from continuing operations and/or net losses in two out of our three most recent fiscal years.

In order to maintain our listing on the Exchange, we were required to, and did, submit a plan by March 14, 2006 advising the Exchange of action we have taken, or will take, that would bring us into compliance no later than February 14, 2007. We will be subject to delisting proceedings if the plan we submitted is unacceptable to the Exchange or if we fail to make progress toward achieving an acceptable plan.

Management Changes

On April 12, 2006, our Board of Directors named Lyle E. Jensen as President and Chief Executive Officer succeeding Robert H. Davis, who resigned

Edgar Filing: GREENMAN TECHNOLOGIES INC - Form 10KSB

those positions, and resigned as a member of our Board of Directors, on the same day. Mr. Jensen has been a member of our Board of Directors since May 2002, and served as the Chair of the Board's Audit Committee and as member of the Board's Compensation Committee. Mr. Jensen will remain a member of the Board of Directors, but will no longer serve on these committees. Nicholas DeBenedictis, an outside Director has joined the Compensation Committee and will serve as our interim Audit Committee Chair.

We entered into a five-year employment agreement with Mr. Jensen pursuant to which Mr. Jensen will receive a base salary of \$195,000 per year. The agreement automatically renews for one additional year upon each anniversary, unless notice of non-renewal is given by either party. The agreement maybe terminated without cause on thirty days' notice but provides for payment of twelve months' salary and certain benefits as a severance payment for termination without cause. The agreement also provides for incentive compensation based certain the attainment of certain financial and non-financial goals. Mr. Jensen will receive a relocation allowance of up to \$25,000 and a car allowance of \$600 per month. Mr. Jensen has been granted a qualified option under the 2005 Stock Option Plan to purchase 500,000 shares of the our common stock, par value \$.01 per share, with an exercise price of \$.28 per share. In addition, upon signing of his employment agreement, Mr. Jensen agreed to purchase 500,000 unregistered shares of our common stock at a price equal to the closing bid price of the common stock on the date the agreement was executed. In conjunction with Mr. Davis's resignation, we agreed to the payment of salary and certain benefits for a subsequent twelve month period pursuant to certain contractual obligations.
