Form 10-Q
May 08, 2008

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended March 31, 2008

or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-16471

First Citizens BancShares, Inc
(Exact name of Registrant as specified in its charter)

Delaware 56-1528994
(State or other jurisdiction of (I.R.S. Employer Identification Number)
incorporation or organization)

4300 Six Forks Road, Raleigh, North Carolina 27609
(Address of principle executive offices) (Zip code)

(919) 716-7000
(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding twelve months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past ninety days.

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of 'accelerated filer and large accelerated filer' in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Class A Common Stock—\$1 Par Value—8,756,778 shares
Class B Common Stock—\$1 Par Value—1,677,675 shares
(Number of shares outstanding, by class, as of May 8, 2008)

Notes to Consolidated Financial Statements
(Dollars in thousands, except per share amounts)

Note A

Accounting Policies and Other Matters

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements.

In the opinion of management, the consolidated financial statements contain all material adjustments necessary to present fairly the financial position of First Citizens BancShares, Inc. as of and for each of the periods presented, and all such adjustments are of a normal recurring nature. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the 2007 First Citizens BancShares, Inc. Form 10-K. Certain amounts for prior periods have been reclassified to conform with statement presentations for 2008. However, the reclassifications have no effect on shareholders' equity or net income as previously reported.

At March 31, 2008, loans totaling \$1,315,382 were pledged to secure debt obligations, compared to \$265,548 at March 31, 2007. ISB's home equity loans and residential mortgage loans were pledged to the Federal Home Loan Bank of Atlanta (FHLB) during both periods. For March 31, 2008, ISB had also pledged its commercial real estate loans to the FHLB.

Note B

Operating Segments

BancShares conducts its banking operations through its two wholly-owned subsidiaries, First-Citizens Bank & Trust Company (FCB) and IronStone Bank (ISB). Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and each entity operates under a separate charter. The financial results and trends of ISB reflect the impact of the de novo nature of its growth.

FCB is a mature banking institution that operates under a state bank charter from its branch network in North Carolina, Virginia, West Virginia, Maryland and Tennessee. ISB began operations in 1997 and currently operates in Georgia, Florida, Texas, Arizona, California, New Mexico, Colorado, Oregon and Washington under a federal thrift charter.

In the aggregate, FCB and its consolidated subsidiaries, which are integral to its branch operation, and ISB account for more than 90 percent of consolidated assets, revenues and net income. Other includes activities of the parent company and Neuse, Incorporated, a subsidiary that owns real property used in the banking operation.

The adjustments in the accompanying tables represent the elimination of the impact of certain inter-company transactions. The adjustments to interest income and interest expense neutralize the earnings and cost of inter-company borrowings. The adjustments to noninterest income and noninterest expense reflect the elimination of management fees and other service fees paid by one company to another within BancShares' consolidated group.

Note C
Employee Benefits

BancShares recognized pension expense totaling \$1,666 and \$2,625, respectively, in the three-month periods ended March 31, 2008 and 2007. Pension expense is included as a component of employee benefit expense.

Components of Net Periodic Benefit Cost	Three month periods ended March 31,	
	2008	2007
Service cost	\$ 5,457	\$ 4,235
Interest cost	9,087	5,250
Expected return on assets	(12,975)	(7,442)
Amortization of prior service cost	97	59
Amortization of net actuarial loss	-	523
Total net periodic benefit cost	\$ 1,666	\$ 2,625

The expected long-term rate of return on plan assets for 2008 is 8.50 percent, and the assumed discount rate is 6.25 percent.

Note D
Fair Value Disclosures

BancShares adopted the provisions of SFAS No. 157 Fair Value Measurements (Statement 157) and SFAS No. 159 The Fair Value Option for Financial Assets and Liabilities (Statement 159) on January 1, 2008.

Statement 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Statement 157 does not require any new fair value measurements, but clarifies and standardizes some divergent practices that have emerged since prior guidance was issued. Statement 157 creates a three-level hierarchy under which individual fair value estimates are to be ranked based on the relative reliability of the inputs used in the valuation.

Statement 157 defines fair value as the price that would be received to sell an asset or transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, BancShares considers the principal or most advantageous market in which those assets or liabilities are sold and considers assumptions that market participants would use when pricing those assets or liabilities. Fair values determined using level 1 inputs rely on active and observable markets to price identical assets or liabilities. In situations where identical assets and liabilities are not traded in active markets, fair values may be determined based on level 2 inputs, which exist when observable data exists for similar assets and liabilities. Fair values for assets and liabilities that are not actively traded in observable markets are based on level 3 inputs, which are considered to be unobservable.

Among BancShares' assets and liabilities, investment securities available for sale and an interest rate swap accounted for as a cash flow hedge are reported at their fair values on a recurring basis. Certain other assets are adjusted to their fair value on a nonrecurring basis, including loans held for sale, which are carried at the lower of cost or market, and goodwill and other intangible assets, which are periodically tested for impairment. Loans held for investment,

deposits, short-term borrowings and long-term obligations are not reported at fair value.

For assets and liabilities carried at fair value, the following table provides fair value information as of March 31, 2008:
9

Fair value measurements at March 31, 2008 using:

Description	Fair value at March 31, 2008	Quoted prices in active markets for identical assets and liabilities (Level 1 inputs)		Quoted prices for similar assets and liabilities (Level 2 inputs)		Significant unobservable inputs (Level 3 inputs)	
		(thousands)					
Assets measured at fair value							
Investment securities available for sale	\$ 3,198,948	\$ 3,071,031	\$ 79,521	\$ 48,396			
Liabilities measured at fair value							
Cash flow hedge	8,974	-	8,974				

Prices for US Treasury and government agency securities are readily available in the active markets in which those securities are traded, and the resulting fair values are shown in the 'Level 1 input' column. Prices for mortgage-backed securities and for state, county and municipal securities are obtained for similar securities, and the resulting fair values are shown in the 'Level 2 input' column. Prices for all other securities, which include a residual interest that was retained from a securitization transaction and other non-marketable investments, are determined based on various assumptions that are not observable. The fair values for these investment securities are shown in the 'Level 3 input' column. With respect to the residual interest in the asset securitization, the assumed prepayment speed, discount rate and credit spread are not observable in the market due to illiquidity and the uniqueness of the underlying assets. Non-marketable investment securities, which are carried at their purchase price, include those that may only be redeemed by the issuer.

Under the terms of the existing cash flow hedge, BancShares pays a fixed payment to the counterparty in exchange for receipt of a variable payment that is determined based on the 3-month LIBOR rate. The fair value of the cash flow hedge is therefore based on projected LIBOR rates for the duration of the hedge, values that, while observable in the market, are subject to adjustment due to pricing considerations for the specific instrument.

For those investment securities available for sale with fair values that are determined by reliance on significant unobservable inputs, the following table identifies the factors causing the change in fair value from January 1, 2008 to March 31, 2008:

Description	Investment securities available for sale with fair values based on significant unobservable inputs (thousands)	
Beginning balance, January 1, 2008	\$	40,016
Total gains (losses), realized or unrealized:		
Included in earnings		
Included in other comprehensive income		411
Purchases, sales, issuances and settlements, net		7,969
Transfers in/out of Level 3		-
Ending balance, March 31, 2008	\$	48,396

No gains or losses were reported for the three-month period ended March 31, 2008 that relate to fair values estimated based on significant unobservable inputs.

Statement 159 allows an entity to elect to measure certain financial assets and liabilities at fair value with changes in fair value recognized in the income statement each period. The statement also requires additional disclosures to identify the effects of an entity's fair value election on its earnings. Upon the adoption of Statement 159, BancShares did not elect to report any assets and liabilities at fair value.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

Management's discussion and analysis of earnings and related financial data are presented to assist in understanding the financial condition and results of operations of First Citizens BancShares, Inc. and Subsidiaries (BancShares). This discussion and analysis should be read in conjunction with the unaudited Consolidated Financial Statements and related notes presented within this report. Intercompany accounts and transactions have been eliminated. Although certain amounts for prior years have been reclassified to conform to statement presentations for 2008, the reclassifications have no effect on shareholders' equity or net income as previously reported.

OVERVIEW

BancShares is a financial holding company with two wholly owned banking subsidiaries: First-Citizens Bank & Trust Company (FCB), a North Carolina-chartered bank, and IronStone Bank (ISB), a federally-chartered thrift institution. FCB operates branches in North Carolina, Virginia, West Virginia, Maryland and Tennessee. ISB operates in Georgia, Florida, Texas, New Mexico, Arizona, California, Oregon, Washington, Colorado, Oklahoma, Missouri and Kansas. Unless otherwise noted, the terms we, us and BancShares refer to the consolidated financial position and consolidated results of operations for BancShares.

BancShares' earnings and cash flows are derived primarily from the commercial banking activities conducted by its banking subsidiaries. These activities include commercial and consumer lending, deposit and cash management products, cardholder, merchant, wealth management services as well as various other products and services typically offered by commercial banks. FCB and ISB gather interest-bearing and noninterest-bearing deposits from retail and commercial customers. BancShares and its subsidiaries also secure funding through various non-deposit sources. We invest the liquidity generated from these funding sources in various types of interest-earning assets such as loans and leases, investment securities and overnight investments. We also invest in bank premises, furniture and equipment used to conduct the subsidiaries' commercial banking business.

Various external factors influence customer demand for our loan, lease and deposit products. In an effort to stimulate and control the rate of growth of economic activity and inflation, monetary actions by the Federal Reserve are significant to the interest rate environment in which we operate. Interest rate decisions by the Federal Reserve have a significant impact on the pricing of and demand for loan, deposit and cash management products.

In addition to the interest rate environment, the general strength of the economy influences demand as well as the quality and collectibility of our loan and lease portfolio. External economic indicators such as consumer bankruptcy rates and business debt service capacity closely follow trends in the economic cycle.

Although we are unable to control the external factors that influence our business, through the utilization of various liquidity, interest rate and credit risk management tools, we seek to minimize the potentially adverse risks of unforeseen and unfavorable economic trends and take advantage of favorable economic conditions when appropriate. Financial institutions frequently focus their strategic and operating emphasis on maximizing profitability and therefore measure their relative success by reference to profitability measures such as return on average assets or return on average shareholders' equity. BancShares' profitability measures have historically compared unfavorably to the returns of similar-sized financial holding companies. Instead, we place primary emphasis upon asset quality, balance sheet liquidity and capital conservation, even when those priorities may be detrimental to short-term profitability.

Based on our organization's competitive position and strategic focus within the financial services industry, we believe opportunities for significant growth and expansion exist. We operate in diverse and growing geographic markets and believe that by offering competitive products and superior customer service, we can increase our business volumes and profitability. In recent years, we have focused our efforts on customers who own their own businesses, medical and other professionals and financially active individuals.

We seek to increase fee income in areas such as cardholder and merchant services, insurance, cash management and wealth management services. Leveraging our investments in technology, we also focus on opportunities to generate income by providing processing services to other banks.

Financial Summary

We attempt to mitigate certain of the risks that can endanger our profitability and growth prospects. While we are attentive to all areas of risk, economic risk is especially problematic due to the lack of control and the potential material impact upon our financial results. Specific economic risks include recession, rapid movements in interest rates, changes in the yield curve and significant shifts in inflation expectations.

PERFORMANCE SUMMARY

BancShares realized an increase in earnings during the first quarter of 2008 compared to the first quarter of 2007. Consolidated net income during the first quarter of 2008 equaled \$32.4 million compared to \$29.0 million earned during the corresponding period of 2007. The annualized return on average assets was 0.80 percent during the first quarter of 2008, compared to 0.75 percent during the same period of 2007. The annualized return on average equity was 8.88 percent during 2008, unchanged from 2007. Net income per share during the first quarter of 2008 totaled \$3.10, compared to \$2.78 during the first quarter of 2007, an 11.5 percent increase.

The \$3.4 million or 11.7 percent earnings increase resulted primarily from a gain arising from the redemption of Visa, Inc. stock in conjunction with its initial public offering and the reversal of an accrued liability for Visa member bank liabilities established in 2007. Significantly higher provision for credit losses reduced current period earnings.

INTEREST-EARNING ASSETS

Interest-earning assets include loans and leases, investment securities and overnight investments, all of which reflect varying interest rates based on the risk level and repricing characteristics of the underlying asset. Riskier investments typically carry a higher interest rate, but expose the investor to potentially higher levels of default. We have historically focused on maintaining high asset quality, which results in a loan and lease portfolio subjected to strenuous underwriting and monitoring procedures. Our investment securities portfolio includes high-quality assets, primarily United States Treasury and government agency securities. Generally, the investment securities portfolio grows and shrinks based on trends among loans and leases, deposits and borrowings. When growth among deposits and borrowings exceeds loan and lease demand, we invest excess funds in the securities portfolio. Conversely, when loan and lease demand exceeds growth in deposit and borrowings, we use proceeds from maturing securities to fund loan and lease demand. Overnight investments are selectively made with other financial institutions that are within our risk tolerance.

During the first quarter of 2008, interest-earning assets averaged \$14.69 billion, an increase of \$782.5 million or 5.6 percent from the first quarter of 2007. This increase primarily reflects growth in the loan and lease portfolio.

Loans and leases. At March 31, 2008 and 2007, loans and leases totaled \$11.03 billion and \$10.26 billion, respectively. The \$767.6 million or 7.5 percent growth from March 31, 2007 to March 31, 2008 resulted from growth within the commercial mortgage, revolving mortgage and commercial and industrial loan portfolios.

Commercial real estate loans totaled \$4.05 billion at March 31, 2008, representing 36.8 percent of total loans and leases. This balance represents an increase of \$313.8 million or 8.4 percent since March 31, 2007. Demand for loans secured by owner-occupied medical and professional facilities remained reasonably strong, particularly in expansion markets. These loans are underwritten based primarily upon the cash flow from the operation of the business rather than the value of the real estate collateral.

Commercial and industrial loans equaled \$1.72 billion or 15.6 percent of total loans and leases outstanding. These loans have increased \$170.4 million or 11.0 percent since March 31, 2007. Customer demand and expansion markets have supported the growth of these loans.

At March 31, 2008, revolving mortgage loans totaled \$1.52 billion, representing 13.8 percent of total loans outstanding, an increase of \$219.9 million or 16.9 percent compared to March 31, 2007. Retail customers have increased utilization of home equity loans due to lower market rates compared to other consumer debt alternatives. Construction and land development loans totaled \$817.8 million or 7.4 percent of total loans at March 31, 2008, an increase of \$38.1 million or 4.9 percent since March 31, 2007. Given the continuing softening of real estate markets, we have lessened our focus on growth of this area of lending, particularly in the Atlanta, Georgia and Southwest Florida markets.

Loans and Leases

Table 2

Revolving mortgage	1,521,191	1,494,431	1,454,659	1,374,212	1,301,311
Other mortgage	147,082	145,552	153,487	159,421	157,576
Total real estate loans	7,567,347	7,462,327	7,361,223	7,172,308	6,999,498
Commercial and industrial	1,721,927	1,707,394	1,615,550	1,589,519	1,551,532
Consumer	1,308,269	1,368,228	1,375,001	1,362,356	1,345,631
Lease financing	340,620	340,601	329,535	315,965	302,581
Other	91,774	85,354	81,849	72,893	63,114
Total loans and leases	11,029,937	10,963,904	10,763,158	10,513,041	10,262,356
Less allowance for loan and lease losses	141,591	136,974	133,576	129,276	132,640
Net loans and leases	\$ 10,888,346 \$	\$ 10,826,930 \$	\$ 10,629,582 \$	\$ 10,383,765 \$	\$ 10,129,716

We anticipate moderate growth in commercial mortgage and commercial and industrial loans in 2008, as our expansion into new markets continues to generate higher levels of loan and lease demand among our business customers. All growth projections are subject to change as a result of economic deterioration or improvement, competitive forces and other external factors.

Investment securities. Investment securities available for sale equaled \$3.20 billion at March 31, 2008, compared to \$2.93 billion at March 31, 2007. The \$264.0 million or 9.0 percent increase resulted from growth in deposits and borrowings that was not absorbed by loan and lease growth. Available-for-sale securities are reported at their aggregate fair value. Investment securities held to maturity totaled \$7.2 million at March 31, 2008, compared to \$96.8 million at March 31, 2007. In order to augment liquidity, we continued to reinvest proceeds from maturities of held-to-maturity securities into securities designated as available-for sale. Securities that are classified as held to maturity reflect BancShares' ability and positive intent to hold those investments until maturity.

Income on interest-earning assets. Interest income amounted to \$217.4 million during the first quarter of 2008, a \$234,000 decrease from the first quarter of 2007. During the first quarter of 2008, the impact of lower asset yields more than offset the impact of balance sheet growth when compared to the same period of 2007. The taxable-equivalent yield on interest-earning assets equaled 6.00 percent for the first quarter of 2008, compared to 6.38 percent for the corresponding period of 2007.

Loan and lease interest income for the first quarter of 2008 equaled \$177.2 million, an increase of \$564,000 from the first quarter of 2007, the combined result of lower yields offset by favorable growth in average loan and lease balances. The taxable-equivalent yield was 6.51 percent during the first quarter of 2008, a 50 basis point reduction from the same period of 2007. The reduced yields resulted from new loans and leases originated at current market rates and repricing of outstanding variable-rate loans. Average loans and leases increased \$730.8 million or 7.1 percent from 2007 to 2008.

Average maturity assumes callable securities mature on their earliest call date; yields are based on amortized cost; yields related to securities that are exempt from federal and/or state income taxes are stated on a taxable-equivalent basis assuming statutory rates of 35% for federal income tax purposes and 6.9% for state income taxes for all periods.

Interest income earned on the investment securities portfolio amounted to \$36.2 million during the first quarter of 2008 and \$33.6 million during the same period of 2007, an increase of \$2.6 million or 7.7 percent. This increase in income is the result of slightly improved yields and higher average volume. The taxable-equivalent yield increased 18 basis points from 4.54 percent in the first quarter of 2007 to 4.72 percent in the first quarter of 2008 due to higher market rates. Average investment securities increased \$91.4 million from \$3.09 billion during the first quarter of 2007 to \$3.18 billion during the first quarter of 2008. We anticipate significant reduction in the yield on the investment securities portfolio during the remaining quarters of 2008 due to sharply lower market rates on purchases of new securities.

Interest income from overnight investments amounted to \$4.1 million during the first quarter of 2008, a decrease of \$3.4 million from the \$7.5 million earned during the first quarter of 2007, the combined result of a yield decline of 216 basis points and a \$39.7 million reduction in average balances.

INTEREST-BEARING LIABILITIES

Interest-bearing liabilities include our interest-bearing deposits as well as short-term borrowings and long-term obligations. Deposits represent our primary funding source, although we also utilize non-deposit borrowings to stabilize our liquidity base and to fulfill commercial customer demand for cash management services. Certain of our long-term borrowings also provide capital strength under existing guidelines established by the Federal Reserve Bank and other banking regulators.

Deposits. At March 31, 2008, total deposits equaled \$13.23 billion, an increase of \$504.5 million or 4.0 percent over March 31, 2007. Average interest-bearing deposits were \$10.51 billion during the first quarter of 2008, an increase of \$564.6 million or 5.7 percent from the first quarter of 2007. Average time deposits increased \$383.9 million or 7.5 percent to \$5.50 billion from the first quarter of 2007 to the same period of 2008. During the first quarter of 2008, money market accounts averaged \$3.06 billion, compared to \$2.77 billion in the first quarter of 2007. Partially offsetting these increases, average balances of Checking With Interest dropped \$56.1 million while average savings accounts declined \$52.7 million.

We attribute the growth of time deposits since the first quarter of 2007 to the volatility in the stock market and overall instability of the economy. However, due to significantly lower rates, we expect the composition of interest-bearing deposits will shift throughout 2008 with reductions in time deposits and increases in balances held in money market accounts. Competition for deposit business in our market areas is extremely intense. While we have access to non-deposit borrowing sources, we prefer to fund loan and lease demand with traditional core bank deposits. Therefore, generating acceptable levels of deposit growth is a critical challenge for us, particularly during periods of strong loan demand.

Short-term borrowings. At March 31, 2008, short-term borrowings totaled \$1.27 billion compared to \$1.25 billion at March 31, 2007. For the quarters ended March 31, 2008 and 2007, short-term borrowings averaged \$1.32 billion and \$1.20 billion, respectively. The \$119.1 million or 9.9 percent growth in average short-term borrowings was the result of significantly higher customer demand for our commercial master note and overnight repurchase obligation products, key offerings within our cash management suite of products.

Long-term obligations. Long-term obligations equaled \$609.3 million at March 31, 2008, up \$204.0 million from March 31, 2007. During the first quarter 2008, we sought to take advantage of lower funding costs on long-term borrowings from the Federal Home Loan Bank of Atlanta.

Expense on interest-bearing liabilities. Interest expense amounted to \$94.8 million during the first quarter of 2008, a \$4.6 million or 4.6 percent decrease from the first quarter of 2007. The lower interest expense was the net result of lower rates and higher average volume. The rate on average interest-bearing liabilities equaled 3.10 percent during the first quarter of 2008, a 39 basis point decrease in the aggregate blended rate on interest-bearing liabilities as compared to the first quarter of 2007. Average interest-bearing liabilities increased \$751.2 million or 6.5 percent from first quarter of 2007 to the first quarter of 2008.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35% and state income tax rate of 6.90% for each period. The taxable-equivalent adjustment was \$1,853 for 2008 and \$1,775 for 2007.

NET INTEREST INCOME

Net interest income totaled \$122.6 million during the first quarter of 2008, an increase of \$4.4 million or 3.7 percent from the first quarter of 2007. The taxable-equivalent net yield on interest-earning assets equaled 3.41 percent for the first quarter of 2008, down 9 basis points from the 3.50 percent recorded for the first quarter of 2007. However, the net yield for the first quarter of 2008 increased six basis points above the fourth quarter of 2007. The continued compression of the taxable-equivalent net yield results from competitive interest rate pressures and the extremely low absolute level of current interest rates on many of our deposit and borrowing products.

Our asset/liability management strategy continues to focus on maintaining high levels of balance sheet liquidity. We maintain portfolios of interest-earning assets and interest-bearing liabilities with maturities or repricing characteristics that will protect against wide interest rate fluctuations, thereby limiting, to the extent possible, the ultimate interest rate exposure.

NONINTEREST INCOME

The growth of noninterest income is essential to our ability to sustain adequate levels of profitability. The primary sources of noninterest income are cardholder and merchant services income, service charges on deposit accounts, revenues derived from wealth management services and fees from processing services. During 2008, we also recorded a significant securities gain.

During the first three months of 2008, noninterest income amounted to \$83.7 million, compared to \$69.0 million during the same period of 2007. Of the \$14.6 million or 21.2 percent increase in noninterest income, \$8.1 million resulted from a securities gain recognized in conjunction with our investment in Visa, Inc. During the first quarter of 2008, Visa completed its initial public offering resulting in a conversion of our former member-bank equity investment to a new class of restricted stock. Immediately thereafter, a portion of our new Visa stock was redeemed for cash thereby triggering the gain. Other noninterest income increases were recorded in fees from wealth management services, service charges on deposit accounts and cardholder and merchant services income.

Service charges on deposit accounts generated \$20.0 million and \$17.2 million for the first quarter of 2008 and 2007, respectively. The \$2.8 million or 16.5 percent increase was primarily due to improved commercial service charge income and higher bad check and overdraft charges. Commercial service charges increased as a result of lower interest rates, which translate into higher service charge income on commercial analysis accounts. In the second half of 2007, we implemented new tiered levels of pricing for NSF and overdraft items that has resulted in higher fee income.

Fees from wealth management services amounted to \$13.2 million during the first quarter of 2008, compared to \$11.7 million during the first quarter of 2007. The \$1.5 million or 12.7 percent increase was due to strong broker/dealer and asset management results.

Cardholder and merchant services generated \$23.1 million during the first quarter of 2008, an increase of \$673,000 or 3.0 percent compared to the first quarter of 2007. This increase resulted from higher business credit card and debit card interchange volume. The growth rate of revenue derived from merchant processing services slowed during the current quarter due primarily to weakness in consumer spending.

Fees from processing services, which relate to check processing and other industry-specific services provided to other financial institutions, totaled \$8.8 million in the first quarter of 2008 and \$8.2 million in the first quarter of 2007. The \$617,000 or 7.5 percent increase was the combined result of continued growth in business volumes generated by client banks.

NONINTEREST EXPENSE

The primary components of noninterest expense are salaries and related employee benefit costs, occupancy expenses related to branch offices and support facilities, and equipment costs related to branch offices and technology.

Noninterest expense equaled \$145.6 million for the first three months of 2008, a \$7.0 million or 5.1 percent increase over the \$138.6 million recorded during the same period of 2007. Noninterest expense for 2008 includes a \$3.3

million credit to other expense resulting from the reversal of a litigation reserve that was accrued during the fourth quarter of 2007 as an estimate of exposure resulting from our Visa member bank status. Once Visa completed its initial public offering during 2008, a portion of the proceeds were retained, and the member bank liabilities that were the basis for the 2007 accruals were settled. ISB's continued growth and expansion continue to contribute to the increase in operating costs. ISB's noninterest expense increased from \$19.1 million for the first quarter of 2007 to \$20.7 million in 2008, a \$1.6 million or 8.1 percent increase.

Salaries and wages increased \$4.2 million or 7.2 percent during the first quarter of 2008 when compared to the same period of 2007. The increase resulted from 2007 merit increases and workforce expansions both as a result of new branch offices and headcount additions in several support functions. Employee benefits expense totaled \$18.2 million for the first three months of 2008, an increase of \$5.0 million. The 38.0 percent increase results from \$3.1 million of benefits arising from the retirement of an executive officer, \$831,000 accrued as a result of enhancements to agreements with two other executive officers and higher employer health costs.

Occupancy expense amounted to \$15.3 million during the first quarter of 2008 and \$13.9 million during the first quarter of 2007. The \$1.5 million or 10.8 percent increase resulted from higher building depreciation, rent expense and other costs arising from branch expansion and costs related to the corporate headquarters building. ISB reported an 11.3 percent increase during the first quarter of 2008 due to new branch locations.

Other expenses decreased \$3.8 million or 9.8 percent from the first quarter of 2007 to the first quarter of 2008. This reduction includes the \$3.3 million reversal of Visa member bank accrued liabilities that were settled as a result of Visa's initial public offering. Advertising costs declined \$1.8 million during the first quarter of 2008, while postage, cardholder and merchant services and other third party processing costs experienced increases in 2008.

INCOME TAXES

BancShares continually monitors and evaluates the potential impact of current events on the estimates used to establish income tax expenses and income tax liabilities. On a periodic basis, we evaluate our income tax positions based on current tax law, positions taken by various tax auditors within the jurisdictions that BancShares is required to file income tax returns as well as potential or pending audits or assessments by such tax auditors.

Income tax expense amounted to \$18.1 million during the three months ended March 31, 2008, compared to \$16.1 million during the same period of 2007. The 12.4 percent increase in income tax expense was primarily the result of higher pre-tax earnings. The effective tax rates for these periods equaled 35.9 percent and 35.7 percent, respectively. On January 1, 2007, we adopted the provisions of FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies uncertainty in income taxes recognized by establishing a recognition threshold and a measurement attribute for the financial statement treatment of a tax position taken or expected to be taken in a tax return. The adoption of FIN 48 resulted in a reduction in the liability for unrecognized tax benefits, which was offset by a \$962,000 increase in retained earnings.

SHAREHOLDERS' EQUITY AND CAPITAL ADEQUACY

BancShares continues to exceed minimum regulatory capital standards, and the banking subsidiaries remain well-capitalized. At March 31, 2008 and 2007, the leverage capital ratios of BancShares were 9.80 percent and 9.60 percent, respectively, surpassing the minimum level of 3 percent. As a percentage of risk-adjusted assets, BancShares' Tier 1 capital ratios were 13.12 percent at March 31, 2008 and 13.09 percent at March 31, 2007. The minimum ratio allowed is 4 percent of risk-adjusted assets. The total risk-adjusted capital ratios were 15.47 percent at March 31, 2008 and 15.52 percent as of March 31, 2007. The minimum total capital ratio is 8 percent.

The continued de novo growth and operating losses of ISB has required BancShares to infuse significant amounts of capital into ISB to support its expanding balance sheet. BancShares infused \$7.0 million into ISB during the first quarter of 2008. Since ISB was formed in 1997, BancShares has provided \$311.0 million in capital. BancShares' prospective capacity to provide capital to support the growth and expansion of ISB is highly dependent upon FCB's ability to return capital through dividends to BancShares.

Summary of Loan and Lease Loss
Experience and Risk Elements

RISK MANAGEMENT

In the normal course of business, BancShares is exposed to various risks. To manage the major risks that are inherent in the operation of a financial holding company and to provide reasonable assurance that our long-term business objectives will be attained, various policies and risk management processes identify, monitor and manage risk within acceptable tolerances. Management continually refines and enhances its risk management policies and procedures to maintain effective risk management.

The most prominent risk exposures are credit, interest rate and liquidity risk. Credit risk is the risk of not collecting the amount of a loan or investment when it is contractually due. Interest rate risk is the potential reduction of net interest income as a result of changes in market interest rates. Liquidity risk is the possible inability to fund obligations to depositors, creditors, investors or borrowers.

Credit risk. BancShares manages and monitors extensions of credit and the quality of the loan and lease portfolio through rigorous initial underwriting processes and periodic ongoing reviews. Underwriting standards reflect credit policies and procedures, and much of the credit decision process is centralized. We maintain a credit review function that conducts independent risk reviews and analyses for the purpose of ensuring compliance with credit policies and to monitor asset quality trends. The independent risk reviews include portfolio analysis by geographic location and horizontal reviews across industry sectors within the banking subsidiaries. BancShares strives to identify potential credit problems as early as possible, to take charge-offs or write-downs as appropriate and to maintain adequate allowances for credit losses that are inherent in the loan and lease portfolio. The maintenance of excellent asset quality is one of our key performance measures.

We maintain a well-diversified loan and lease portfolio and seek to avoid the risk associated with large concentrations within specific geographic areas or industries. Our continuing expansion has allowed us to mitigate our historic exposure to geographic risk concentration in North Carolina and Virginia. However, as we have entered new markets, we have endeavored to ensure that rigorous centralized underwriting and monitoring controls are functioning effectively. We will continue to place emphasis upon maintaining strong lending standards in new markets.

In recent years, we have sought opportunities to provide financial services to businesses associated with and professionals within the medical community. Due to strong loan growth within this industry, our loans and leases to borrowers in medical, dental or related fields totaled \$2.35 billion as of March 31, 2008, which represents 21.3 percent of loans and leases outstanding, compared to \$1.97 billion or 19.2 percent of loans and leases at March 31, 2007. No other industry represented more than 10 percent of total loans and leases outstanding at March 31, 2008.

Nonperforming assets include nonaccrual loans and leases and other real estate. Other real estate includes foreclosed property as well as branch facilities that we have closed but not sold. At March 31, 2008, BancShares' nonperforming assets amounted to \$43.2 million or 0.39 percent of loans and leases plus foreclosed properties, compared to \$21.2 million at March 31, 2007. During the first quarter of 2008, we moved \$27.9 million of residential construction loans to nonaccrual status. These loans are secured by properties located in the Atlanta, Georgia and Southwest Florida markets, areas that have suffered from significant excess capacity and falling property values. Our borrowers, who are dependent on proceeds from sales to fund their obligations to us, face significant liquidity challenges. Further, due to concerns about other borrowers' ability to comply with existing loan repayment terms, additional residential construction loans totaling \$42.2 million were identified as potential problem loans as of March 31, 2008. As real estate markets remain soft, we will continue to closely monitor nonperforming assets, taking necessary actions to minimize potential exposure.

At March 31, 2008, the allowance for credit losses totaled \$149.1 million or 1.35 percent of total loans and leases, compared to 1.36 percent at March 31, 2007. The allowance for credit losses includes the allowance for loan and lease losses and the reserve for unfunded credit commitments. We continuously analyze the growth and risk characteristics of the loan and lease portfolio under current economic conditions in order to evaluate the adequacy of the allowance. Such factors as the financial condition of borrowers, fair market value of collateral and other considerations are recognized in estimating probable credit losses.

Management considers the established allowance adequate to absorb estimated probable losses that relate to loans and leases outstanding at March 31, 2008, although future additions may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for credit losses. Such agencies may require adjustments to the allowance based on information available to them at the time of their examination.

The provision for credit losses charged to operations during the first quarter of 2008 was \$10.1 million, compared to \$3.5 million during the first quarter of 2007. The \$6.6 million increase in the provision for credit losses during 2008 resulted primarily from allowances related to the residential construction loan portfolio and higher net charge-offs. Net charge-offs during the first quarter of 2008 equaled \$5.3 million compared to \$2.7 million during the first quarter of 2007 with increases noted among both commercial and consumer loans. On an annualized basis, net charge-offs represent 0.19 percent of average loans and leases during the first quarter of 2008 compared to 0.11 percent in the first quarter of 2007.

Interest rate risk. Interest rate risk results principally from assets and liabilities maturing or repricing at different points in time, from assets and liabilities repricing at the same point in time but in different amounts and from short-term and long-term interest rates changing in different magnitudes, an event frequently described by the resulting impact on the shape of the yield curve. Market interest rates may also have a direct or indirect impact on the interest rate and repricing characteristics of loans and leases that are originated as well as the rate characteristics of our interest-bearing liabilities.

We do not typically utilize interest rate swaps, floors, collars or other derivative financial instruments to attempt to hedge our rate sensitivity and interest rate risk. However, during the second quarter of 2007, in conjunction with the issuance of \$115.0 million in trust preferred securities, we entered into an interest rate swap to synthetically convert the variable rate coupon on the securities to a fixed rate of 7.125 percent for a period of five years.

We assess our interest rate risk by simulating future amounts of net interest income under various interest rate scenarios and comparing those results to forecasted net interest income assuming stable rates. These simulations indicate that net interest income will vary by less than 4 percent when interest rates rise or decline by 200 basis points. We also utilize the market value of equity as a tool in measuring and managing interest rate risk. The market value of equity is estimated to vary by less than 10 percent when interest rates move 200 basis points in either direction.

Liquidity risk. Liquidity risk results from the mismatching of asset and liability cash flows. BancShares manages this risk by structuring its balance sheet prudently and by maintaining various borrowing resources to fund potential cash needs. BancShares has historically maintained a strong focus on liquidity, and our deposit base represents our primary liquidity source. Through our deposit pricing strategies, we have the ability to stimulate or curtail deposit growth. BancShares also maintains additional sources for borrowed funds through federal funds lines of credit and other borrowing facilities. At March 31, 2008, BancShares had access to \$525.0 million in unfunded borrowings through its correspondent bank network. Through membership in the Federal Home Loan Bank of Atlanta, our subsidiary banks have access to overnight, short-term and long-term funding, subject to underwriting and collateral requirements. We also utilize deposit brokers to provide funding.

Once we have generated the needed liquidity and satisfied our loan and lease demand, residual liquidity is invested in overnight and longer-term investment products. Investment securities available for sale provide immediate liquidity as needed.

SEGMENT REPORTING

BancShares conducts its banking operations through its two banking subsidiaries, FCB and ISB. Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and has separate management groups. We monitor growth and financial results in these institutions separately and, within each institution, by geographic segregation.

Although FCB has grown through acquisition in certain of its markets, throughout its history the majority of its expansion has been accomplished on a de novo basis. Since it first opened in 1997, ISB has followed a similar business model for growth and expansion. Because of its size, the costs associated with FCB's current rate of expansion are not material to its financial performance. However, due to the rapid pace of its growth and the number of branch offices that have not attained sufficient size to achieve profitability, the financial results and trends of ISB are significantly affected by its current and continuing growth. Each new market ISB enters creates additional operating costs that are typically not fully offset by operating revenues until the third year after initial opening. Losses incurred since ISB's inception total \$39.3 million.

IronStone Bank. At March 31, 2008, ISB operated 55 facilities in twelve states, with a focus on markets with favorable growth prospects. Our business model for new markets has two primary requirements. First, we hire experienced bankers who are established in the markets we are entering and who are focused on strong asset quality and delivering high-quality customer service while maintaining strong asset quality. Second, we occupy branch facilities located in areas conducive to attracting medical and professional customers. While these are costly goals, we believe that they are critical to establishing a solid foundation for future success in new markets. As its newest branches continue to mature, we expect ISB will operate at a loss throughout 2008.

ISB's total assets equaled \$2.66 billion at March 31, 2008 compared to \$2.23 billion at March 31, 2007, an increase of \$436.8 million or 19.6 percent. ISB recorded a net loss of \$4.6 million during the first quarter of 2008, compared to net loss of \$266,000 during the same period of 2007. This represents an unfavorable variance of \$4.3 million. Net interest income increased \$24,000 during the first quarter of 2008, the result of loan growth offset by a reduction in the net yield on interest-earning assets. The provision for credit losses increased \$5.4 million during the first quarter of 2008 primarily due to the \$27.9 million of residential construction loans moved to nonaccrual status during the quarter. The provision for credit losses also increased due to higher net charge-offs, which increased from \$219,000 in the first quarter of 2007 to \$1.8 million in the first quarter of 2008. On an annualized basis, the ratio of current quarter net charge-offs to average loans and leases outstanding equaled 0.34 percent, compared to 0.04 percent in the prior year.

ISB's noninterest income decreased \$68,000 or 2.1 percent during the first quarter of 2008, the net result of lower working capital finance fees and improved service charge income and cardholder income. Noninterest expense increased \$1.6 million or 8.1 percent during the first quarter of 2008, versus the same period of 2007. Salary expense increased \$510,000 or 6.9 percent due to merit increases and new positions. Occupancy expense was up \$415,000 or 11.3 percent due to the new facilities. Other expense equaled \$5.8 million during the first quarter of 2008 compared to \$5.3 million during the first quarter of 2007 caused by higher general operating expenses, such as credit card processing and third party processing fees.

First-Citizens Bank & Trust Company. At March 31, 2008, FCB operated 342 branches in five states. FCB's total assets increased from \$13.36 billion at March 31, 2007 to \$13.93 billion at March 31, 2008, an increase of \$571.0 million or 4.3 percent. FCB recorded net income of \$39.1 million during the first quarter of 2008 compared to \$31.7 million during the same period of 2007. This represents a \$7.5 million or 23.6 percent increase in net income due to the nonrecurring gain in noninterest income. FCB's net interest income increased \$3.6 million or 3.4 percent during 2008, due to higher balances of interest-earning assets.

The provision for credit losses increased \$1.2 million due to higher net charge offs, which increased by 42.2 percent. FCB's ratio of net charge-offs to average loans and leases was 0.16 percent for the first quarter of 2008 compared to 0.10 percent for the same period of 2007. FCB's noninterest income increased \$14.2 million or 20.5 percent during the first quarter of 2008, primarily the result of the nonrecurring gain from the sale of Visa, Inc. stock. Other improvements were noted in service charges on deposit accounts, wealth management services and fees from processing services. Noninterest expense increased \$4.6 million or 3.7 percent during 2008, caused principally by higher personnel, occupancy and credit card processing costs.

CURRENT ACCOUNTING AND REGULATORY ISSUES

In September 2007, the FASB issued Statement of Financial Accounting Standards No. 157 “Fair Value Measurements” (Statement 157). Statement 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Statement 157 does not require any new fair value measurements, but clarifies and standardizes some divergent practices that have emerged since prior guidance was issued. We adopted Statement 157 on January 1, 2008, and the adoption did not have a material impact on our consolidated financial statements.

In September 2007, the FASB issued Summary of Statement No. 158 “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans” (Statement 158). In addition to other provisions that have already been applied for all periods presented, Statement 158 requires sponsors of defined benefit and other post-retirement plans to measure the funded status of a plan as of the date of its year-end statement of financial position. For BancShares, that provision will become effective December 31, 2008.

In February 2007, the FASB issued SFAS No. 159, “The Fair Value Option for Financial Assets and Liabilities” (Statement 159). Statement 159 allows an entity to elect to measure certain financial assets and liabilities at fair value with changes in fair value recognized in the income statement each period. The statement also requires additional disclosures to identify the effects of an entity’s fair value election on its earnings. We adopted Statement 159 on January 1, 2008, and the adoption did not have a material impact on financial condition, results of operations, or liquidity.

Management is not aware of any current recommendations by regulatory authorities that, if implemented, would have or would be reasonably likely to have a material effect on liquidity, capital ratios or results of operations.

FORWARD-LOOKING STATEMENTS

Statements in this Report and exhibits relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, expectations or beliefs about future events or results, and other statements that are not descriptions of historical facts, may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in our Annual Report on Form 10-K and in other documents filed by us from time to time with the Securities and Exchange Commission.

Forward-looking statements may be identified by terms such as “may,” “will,” “should,” “could,” “expects,” “plans,” “intends,” “anticipates,” “believes,” “estimates,” “predicts,” “forecasts,” “projects,” “potential” or “continue,” or similar terms or the negation of these terms, or other statements concerning opinions or judgments of BancShares’ management about future events. Factors that could influence the accuracy of those forward-looking statements include, but are not limited to, the financial success or changing strategies of our customers, customer acceptance of our services, products and fee structure, the competitive nature of the financial services industry, our ability to compete effectively against other financial institutions in our banking markets, actions of government regulators, the level of market interest rates and our ability to manage our interest rate risk, changes in general economic conditions that affect our loan and lease portfolio, the abilities of our borrowers to repay their loans and leases, the values of real estate and other collateral, and other developments or changes in our business that we do not expect.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We have no obligation to update these forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the potential economic loss resulting from changes in market prices and interest rates. This risk can either result in diminished current fair values of financial instruments or reduced net interest income in future periods. As of March 31, 2008, BancShares' market risk profile has not changed significantly from December 31, 2007. Changes in fair value that result from movement in market rates cannot be predicted with any degree of certainty. Therefore, the impact that future changes in market rates will have on the fair values of financial instruments is uncertain.

Item 4. Controls and Procedures

BancShares' management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of BancShares' disclosure controls and procedures in accordance with Rule 13a-15 of the Securities Exchange Act of 1934 (Exchange Act). Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, BancShares' disclosure controls and procedures were effective in enabling it to record, process, summarize and report in a timely manner the information required to be disclosed in reports it files under the Exchange Act.

No change in BancShares' internal control over financial reporting occurred during the first quarter of 2008 that had materially affected, or is reasonably likely to materially affect, BancShares' internal control over financial reporting.

PART II

Item 6. Exhibits

- 10 Retirement Agreement and Release between Registrant's subsidiary, First-Citizens Bank & Trust Company, the Registrant and James B. Hyler, Jr.
- 31.1 Certification of Chief Executive Officer
- 31.2 Certification of Chief Financial Officer
