Attachment 1 to Form 12b-25

The Company's aggregate revenues for the year ended December 31, 2014 were \$43.3 million versus \$41.1 million in the prior year. The improvement in revenue was due to increased revenues from product sales, offset by a decrease in grants and collaborations revenue. Product sales increased by \$7.6 million to \$23.4 million in 2014 as compared to the prior year resulting primarily from the sales of a flavors and fragrances product of \$7.9 million. Grants and collaborations revenue decreased by \$5.5 million to \$19.8 million in 2014 compared to the prior year primarily due to the decline in government grants by \$4.9 million

The Company's cost of products sold decreased by \$5.1 million to \$33.2 million in 2014 as compared to the prior year. The decrease was mainly due to lower cost of production and a decline in inventory provisions as a result of higher production volumes and overall manufacturing cost reduction efforts.

The Company's loss on purchase commitments and write-off of property, plant and equipment decreased by \$7.6 million to \$1.8 million in 2014 as compared to the prior year. The decrease was mainly due to a charge related to the termination and settlement of our agreement with Tate & Lyle Ingredients Americas, Inc. (or Tate & Lyle), one of our contract manufacturers, in 2013.

The Company's loss on impairment of intangible assets of \$3.0 million was a result of the impairment of in-process research and development assets related to the 2011 acquisition of Draths Corporation (or Draths).

The Company's total research & development and sales, general & administrative expenses declined by \$8.0 million to \$105.1 million in 2014 compared to the prior year, primarily as a result of our overall cost reduction efforts and lower spending to manage our operating costs.

The Company's total other income increased by approximately \$221.5 million to \$105.4 million in 2014 as compared to the prior year. The increase was primarily attributable to the change in fair value of derivative instruments of \$228.9 million, attributed to the compound embedded derivative liabilities associated with our senior secured convertible promissory notes and the change in fair value of our interest rate swap derivative liability. The change was driven by fluctuation of various inputs used in the valuation models from one reporting period to another, such as stock price, credit risk rate and estimated stock volatility. The 2014 GAAP net income attributable to common stockholders was \$2.3 million (\$0.03 per share on a basic basis) compared to a loss of \$235.1 million (\$3.12 per share on a basic basis) in the prior year.

The Company's balance of cash, cash equivalents and marketable securities at the end of the fourth quarter of 2014 was \$43.4 million.
