IGEN NETWORKS CORP.

Notes to Interim Consolidated Financial Statements (Unaudited)

For the Six Month period ended June 30, 2014

(Expressed in U.S. dollars)

1. Nature and continuance of operations

IGEN Networks Corp, together with its wholly owned subsidiary IGEN Business Solutions Inc., (collectively “IGEN”, or the “Company”) was incorporated in the State of Nevada on November 14, 2006. The Company has been primarily in a development state since inception pursuing a variety of different technologies and markets. Commencing January 1, 2012, the Company is no longer a Development Stage Company, as defined by Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 915, Development Stage Entities, after the Company took on new investment, new management, and a new business model in September of 2011. IGEN’s primary business is investing in and managing for growth private high-tech companies that offer products and services in the domains of wireless broadband, Software as a Service, and Machine to Machine solutions. A secondary part of IGEN’s business is negotiating distribution agreements with relevant organizations and selling their products and services through the distribution channels of our portfolio companies, or newly developed IGEN sales channels. Commencing May 5, 2014, the Company was also in the business of providing vehicle tracking and recovery solutions to the automotive and power sport industries after the acquisition of Nimbo, LLC (Note 2).

These consolidated interim financial statements have been prepared on a going concern basis, which imply the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The Company generated revenue for the first time in the fourth quarter of 2011 and continued to grow revenue into 2014. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, on the ability of the company to grow its revenue base, on its ability to successfully grow the companies in which it is invested, and on the ability of the Company to obtain necessary equity financing to both support the latter objectives and to invest in and grow new companies. The Company has recurring losses since inception and had accumulated losses of \$5,493,393 as at June 30, 2014. These factors raise substantial doubt regarding the Company’s ability to continue as a going concern. Although there are no assurances that management’s plans will be realized, management believes that the Company will be able to continue operations into the future. These consolidated financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

2. Business Acquisition

Effective May 5, 2014 (the “Acquisition Date”), the Company controlled Nimbo, LLC (“Nimbo”), a corporation incorporated in Texas U.S.A., by acquiring 100% of the voting equity interest (the “Acquisition”) of Nimbo. Nimbo is in the business of providing vehicle tracking and recovery solutions to the automotive and power sport industries. The Company intends on applying human resources and capital to help Nimbo grow. The Company issued 2,500,000 common shares as consideration of the Acquisition. The fair value of these common shares was \$475,000, which was determined on the basis of the closing price of Igen’s common share on the Acquisition Date.

In accordance with the FASB ASC 805, the Acquisition has been accounted for as a purchase of a business and the Company is identified as the acquirer. The fair value of the purchase consideration of \$475,000 was allocated to the assets acquired and liabilities assumed based on the estimated fair values on the date of acquisition as described below:

Assets acquired	
Cash	\$ 42,672

Edgar Filing: IGEN NETWORKS CORP - Form 10-Q

Accounts receivable (net of \$9,258 provision for uncollectable)	117,727
Inventory	21,312
Prepaid	4,170
Equipment	45,035
Goodwill	505,508
Total	736,424
Less liabilities assumed:	
Accounts payable, accrued liabilities, and deferred revenue	261,424
Fair value of assets acquired, net of liabilities assumed	\$ 475,000

2. Business Acquisition (continued)

The above purchase price allocation is preliminary and the Company is continuing to evaluate the assets acquired and liabilities assumed, and these may be adjustments to the preliminary estimate of purchase date fair value as the Company completes the valuation process. The Company will finalize the purchase price allocation in the year ending December 31, 2014.

The following table provides information of the revenue and net income (loss) of Nimbo

3. Summary of Significant Accounting Policies

a) Basic of presentation and consolidation

These consolidated financial statements and related notes include the records of IGEN Networks Corp., its wholly owned subsidiary, IGEN Business Solutions Inc. and Nimbo. LLC.

As discussed in Note 2, as of the completion of the Acquisition on May 5, 2014, the Company has started to consolidate the results of operation and cash flow of Nimbo to the Company's consolidated financial statement. As a result, the consolidated interim statements of operations and consolidated interim statements of cash flow for the three and six months interim period (collectively the "2011 Comparative Figures") include only the accounts of Igen.

All intercompany transactions and balances have been eliminated. These consolidated interim financial statements are presented in accordance with accounting principles generally accepted in the United States, expressed in US dollars, and, in management's opinion, have been properly prepared within reasonable limits of materiality and within the framework of the significant accounting policies summarized as in the following:

b) Use of estimates

The preparation of these financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. The Company regularly evaluates estimates and assumptions related to donated expenses, and deferred income tax asset valuations. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the

circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected.

For the Six Month period ended June 30, 2014

3. Summary of Significant Accounting Policies (continued)

c) Loss per share

Basic earnings (loss) per share are computed by dividing net income (loss) available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted earnings per share give effect to all dilutive potential common shares outstanding during the period including stock options, using the treasury stock method, and convertible preferred stock, using the if-converted method. In computing diluted earnings (loss) per share, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock IGEN options or warrants. Diluted earnings (loss) per share exclude all dilutive potential shares if their effect is anti-dilutive.

Because the effect of conversion of the Company's dilutive securities is anti-dilutive, diluted loss per share is the same as basic loss per share for the periods presented.

d) Financial instruments

The Company adopted FASB ASC 820-10-50, "Fair Value Measurements". This guidance defines fair value, establishes a three-level valuation hierarchy for disclosures of fair value measurement and enhances disclosure requirements for fair value measures. The three levels are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the assets or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 inputs to valuation methodology are unobservable and significant to the fair measurement.

The fair values of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying values due to the immediate or short-term maturity of these financial instruments. Foreign currency transactions are primarily undertaken in Canadian dollars. The fair value of cash is determined based on "Level 1" inputs and the fair value of derivative liability with convertible debt is determined based on "Level 2" inputs. The financial risk is the risk to the Company's operations that arise from fluctuations in foreign exchange rates and the degree of volatility to these rates. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk. Financial instrument that potentially subject the Company to concentrations of credit risk consists of cash. The Company places its cash in what it believes to be credit-worthy financial institutions.

e) Equipment

Office equipment and computer are recorded at cost. Amortization is provided annually at rates and methods over their estimated useful lives as follows, except in the year of acquisition when one half of the rate is used. Management reviews the estimates of useful lives of the assets every year and adjust them on prospective basis, if needed.

Office equipment	20% declining balance
Computer	55% declining balance

Software

3 years straight line

Property, plant and equipment are reviewed for impairment whenever events or changes in the circumstances indicate that the carrying value may not be recoverable. If the total of the estimated undiscounted future cash flows is less than the carrying value of the asset, an impairment loss is recognized for the excess of the carrying value over the fair value of the asset during the year the impairment occurs. Subsequent expenditure relating to an item of office equipment is capitalized when it is probable that future economic benefits from the use of the assets will be increased.

3. Summary of Significant Accounting Policies (continued)

f) Revenue recognition

The Company recognizes revenue when earned, specifically when all the following conditions are met:

- Services are provided or products are delivered to customers.
- There is clear evidence that an arrangement exists.
- Amounts are fixed or can be determined.
- The ability to collect is reasonably assured.
- There is no significant obligation for future performance.
- The amount of future returns can be reasonably estimated.

g) Foreign currency transaction balances

The Company's reporting currency is the U.S. dollar. The consolidated financial statements of the Company are translated to U.S. dollars in accordance with ASC 830, Foreign Currency Translation Matters, using the exchange rate prevailing at the balance sheet date. Gains and losses arising on translation or settlement of foreign currency denominated transactions or balances are included in the determination of income.

Assets and liabilities of the Company's Canadian subsidiary are translated into U.S. dollars at the year-end exchange rates, and revenue and expenses are translated at the average exchange rates during the period. Exchange differences arising on translation are disclosed as a separate component of stockholders' equity.

h) Income taxes

The Financial Accounting Standards Board (FASB) has issued FASB ASC 740-10. FASB ASC 740-10 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with prior literature FASB Statement No. 109, Accounting for Income Taxes. This standard requires a company to determine whether it is more likely than not that a tax position will be sustained upon examination based upon the technical merits of the position. If the more likely than not threshold is met, a company must measure the tax position to determine the amount to recognize in the financial statements. As a result of the implementation of this standard, the Company performed a review of its material tax positions in accordance with recognition and measurement standards established by FASB ASC 740-10.

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry-forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax basis. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

i) Stock-based compensation

The Company records stock-based compensation in accordance with ASC 718, “Compensation – Stock Compensation”, using the fair value method. All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable.

The Company uses the Black-Scholes option pricing model to calculate the fair value of stock-based awards. This model is affected by the Company’s stock price as well as assumptions regarding a number of subjective variables. These subjective variables include, but are not limited to the Company’s expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. The value of the portion of the award that is ultimately expected to vest is recognized as an expense in the consolidated statement of operations over the requisite service period.

3. Summary of Significant Accounting Policies (continued)

j) Inventories

Inventories are stated at the lower of cost or market with cost being determined on a first-in, first-Out (FIFO) basis. Inventories as at December 31, 2013 and June 30, 2014 were solely finished goods that can be resold. There was no provision for inventory recorded during the year ended December 31, 2013 and six months ended June 30, 2014

k) Deferred revenue

As at June 30, 2014, and December 31, 2013, the Company had deferred revenues of \$46,500 and \$Nil respectively. Annual service renewal fees are recorded as a component of deferred revenue in the balance sheets at the inception of the contract and are recognized as revenue evenly over the contract period, which is generally one year.

l) Changes in accounting policies and recent accounting pronouncements

The Company has not adopted new accounting policies since its most recent year ended December 31, 2013. The Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

4. Investment in an associate and Investment

Investment

The Company's investment consists of 43 common shares of Machlink Inc. ("Machlink") which is a private company conducting information technology business. The Company is not considered having significant influence in Machlink's operations. The shares of Machlink do not have quoted market prices in an active market. On December 31, 2013 and March 31, 2014, the Company's investment in Machlink had a carrying value of \$150,000 which is the Company's cost in this investment's less impairment.

Investment in an associate

Pursuant to an option agreement, the Company incurred \$50,000 and \$50,000 (totaling \$100,000) to acquire 200,000 and 200,000 (totaling 400,000) common shares of Gogiro Internet Group ("Gogiro"), a private Canadian Company, on November 23, 2011 and October 17, 2012 respectively.

On March 12, 2013, the Company signed an agreement to acquire 2,078,080 shares of Gogiro through the issuance of 1,744,747 restricted common shares of the Company (the "Gogiro Acquisition"). Neil Chan, CEO and Director of both companies, would exchange 2,000,000 Gogiro shares for 1,666,667 restricted common shares of the Company. The proceeds of Gogiro Acquisition was \$174,475 which was the fair value of the 1,744,747 restricted shares of the Company.

Upon the completion of the Gogiro Acquisition in March 2013, the Company's interest on Gogiro increased to 31.12%. As a result, the Company has changed its method to account for its investment in Gogiro from "cost less impairment value" method to equity method as the Company's interest on Gogiro has surpassed 20% whereby the Company is

considered having significant influence on Gogiro. The Company's weighted average ownership on Gogiro was 31.12 % and 30.37% during the March 12 to December 31, 2013 and six months ended June 30, 2014 ("2014 Six Months") respectively. Consequently the Company has included Gogiro's losses in the Company's consolidated financial statements in accordance to the percentage ownership (31.12 % for fiscal 2013; 30.37% for 2014 Six Months). In addition, gains and losses resulting from 'upstream' and 'downstream' transactions between IGEN and Gogiro are recognised in IGEN's consolidated financial statements only to the extent of unrelated investors' interests in Gogiro. Changes in carrying value of the Company's investment in Gogiro are as follows:

8. Convertible debt and derivative liabilities

On May 4, 2013 and May 31, 2013, the Company issued two convertible debentures (“CDs”) in the principal of CAD\$100,000 (\$94,000) and CAD\$50,000 (\$ 47,000) respectively (totalling CAD\$150,000 or \$141,000). The CD with the principal of CAD\$100,000 (“CD#1”) and the CD with the principal of CAD 50,000 (“CD#2”) were agreed to mature on January 1, 2015 upon issuance. These CDs are non-secured, carry interest of 14% per annum payable monthly or at term. Subject to the approval of the holder of the CDs, IGEN may convert any of all of the principal and/or interest at any time following the 6 month anniversary of the issuance date of the CDs into common shares of IGEN at a price per share equal to a 20% discount to the fair market value of IGEN’s common share.

On March 31, 2014, the maturity of CD#1 was extended to July 1, 2015. As a result, the Company has recorded a gain of \$31,003 to account for the change of the fair value of CD#1 during six months ended June 30, 2014.

As the CDs are denominated in Canadian dollars (a currency different from the functional currency of the Company) and the exercise prices are not fixed (a 20% discount to the fair market value of IGEN’s common share), a derivative is recognized as a liability. The derivative liability is recorded at fair value and re-measured each period with the movement being recorded as a gain or loss in consolidated income (loss). The CDs are classified as a liability, less the portion relating to the derivative feature. As a result, the Company recorded derivative liabilities of \$101,823 and convertible notes of \$39,177 at dates of issuance of the CDs. As at June 30, 2014, the convertible debenture and derivative liability arising from CD#2 are presented as current liabilities as this obligation will come due less than 12 months.

The Company records accretion expense over the term of the convertible notes up to their face values of CAD\$150,000 when these CDs come due. During 2014 Six Months, accretion expenses of \$24,411 (Six months ended June 30, 2013 - \$Nil) was recorded. Interest expense on the CDs is composed of the interest calculated on the face value of the CDs at 14% per annum which amounted to \$9,576 during 2014 Six Months (Six months ended June 30, 2013 - \$Nil).

During 2014 Six Months, the Company recorded a gain on the change in fair value of the derivative liability of \$3,643 (2013 Six Months - \$Nil). The Continuity of these convertible debentures is as follows:

	Debt	CD#1 Derivative	Debt	CD#2 Derivative
	\$	\$	\$	\$
At issuance	26,751	67,249	12,426	34,574
Accretion	26,732	-	12,673	-

accrued interest	-	-	3,322	-
June 30, 2014	36,018	64,182	43,068	31,167

The Company uses the Binomial option pricing model to calculate the fair value of the derivative liability. The following table shows the assumptions used in the calculations:

	Expected Volatility	Risk-free Interest Rate	Expected Dividend Yield	Expected Life (in years)
As at May 4 and May 31, 2013 (date of issuance)	203%-209 %	0.17%-0.22 %	0 %	1.59-1.66

9. Financial instruments

Credit Risk

Financial instruments that potentially subject the Company to credit risk consist of cash and cash equivalents. The Company deposits cash and cash equivalents with high credit quality financial institutions as determined by rating agencies. As a result, credit risk is considered insignificant.

Currency Risk

The Company's major expenses and payables are in United States dollars and are expected to continue to incur in United States dollars. Fluctuations in the exchange rate between the United States dollar and other currency may have a material effect on the Company's business, financial condition and results of operations. The Company is subject to foreign exchange risk for transactions in its Canadian subsidiary and its investment in Gogiro, a Canadian company, as at June 30, 2014. The Company does not actively hedge against foreign currency fluctuations.

Interest Rate Risk

The Company has cash balances and no interest bearing debt. The Company's current policy is to invest excess cash in high yield term deposits and bankers' acceptance. The Company regularly monitors its cash management policy. As a result, interest rate risk is considered not significant.

Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with its financial liabilities.

The Company manages liquidity risk by continuously monitoring actual and projected cash flows and matching the maturity profile of financial assets and liabilities. As at June 30, 2014, the Company had a working capital of \$1,038 (December 31, 2013 – \$25,615). The Company intends to have more equity financing and/or long term debt financing in order to ensure the liquidity of the Company is sufficient. .

10. Subsequent events

The Company has evaluated subsequent events through the date of these financial statements were issued in accordance with FASB ASC 855 and reports the following subsequent events:

During July 2014 the Company sold 277,778 restricted common shares of the Company at \$0.18/share for \$50,000 as part of a non-brokered private placement.

- Record gross profits: 84% growth over similar 6-month periods, and 371% growth quarter on previous quarter
 - 31% reduction in expenses
 - 54% reduction in net losses

Financial Condition and Results of Operations

Capital Resources and Liquidity

Current Assets and Liabilities, Working Capital

As of June 30, 2014 the Company's current assets were \$457,488, a significant increase from \$189,377 reported at 2103 year end. The increase was due primarily to inclusion of Nimbo's current assets, the majority of which was accounts receivables (\$167,052), hardware inventories (\$25,318), and cash (\$35,675). 73% of the company's consolidated current assets are accounts receivable, approximately half of which were iGen Business Service receivables for services and commissions owed by Gogiro Internet Group, and approximately half of which were Nimbo receivables consisting of monies owed to Nimbo by a total of 49 different customers for products and services sold.

Current liabilities saw a commensurate increase over \$144,491 reported at 2013 year end, primarily as result of the Nimbo acquisition, increasing by \$292,648 to \$456,410. Of this net increase, \$271,965 was contributed by Nimbo payables (\$225,465) and deferred revenues (\$46,500). Nimbo payables are primarily monies owed for hardware (62% of payables) and monies owed for the provision of wireless services (37% of payables). The Company's current liabilities also include \$43,068 in convertible debentures and \$31,167 from derivative liabilities (in connection with the convertible debenture) moving from non-current to current liabilities, as reported in Q1.

The Company finished the second quarter with a positive working capital surplus of \$1,038, down from \$25,915 reported at 2013 year end.

Total Assets and Liabilities, Net Assets

The second quarter saw a significant change in total assets due to the Nimbo acquisition, increasing to \$1,382,964 from \$584,347 reported at 2013 year end. This was accounted for primarily as \$505,508 in goodwill (refer to Note 2 to the financial statements for a specific breakdown of the purchase price allocation). The Company continues to evaluate the assets and liabilities assumed in the acquisition, and may record adjustments to the purchase price allocation in its annual report for the year ending December 31, 2014.

Total liabilities increased by \$211,500. The \$292,648 increase in current liabilities reported above was offset by a total reduction of \$81,148 in the Company's non-current convertible debenture and derivative liabilities (which became current liabilities).

The above resulted in net assets increasing over the six month period by \$587,117 to \$826,354.

The company is continuing in its efforts to increase its asset base and raise funds to improve its working capital position.

Table of Contents

The Company believes it currently has adequate working capital and projected net revenues to maintain existing operations for approximately two months without requiring additional funding. The Company's business plan is predicated on raising further capital for the purpose of further investment and acquisition of targeted technologies and companies, to fund growth in these technologies and companies, and to expand sales and distribution channels for existing products. It is anticipated the Company will continue to raise additional capital through private placements.

Revenues and Net Income (Loss)

Revenues

The Company had Q2 revenues of \$196,697, its largest quarterly revenue to date. Q2 revenues reflected an 843% increase over Q1 revenues of \$20,860, and a 355% increase over Q2 2013 revenues of \$43,194. Revenue for the six months ended June 30, 2014 ("H2") was \$217,557, an increase of \$152,790 or 236% over revenues of \$64,767 for the similar period in 2013. The majority of both Q2 and H2 revenue was contributed by Nimbo hardware sales of \$166,301 and Nimbo service revenues of \$21,195. For the six months ended June 30, 2014, Nimbo actually generated revenues of \$576,342, but as the acquisition of Nimbo was completed on May 5, 2014, only Nimbo revenues of \$187,496 from the period May 6, 2014 to June 30, 2014 have been consolidated into the Company's interim financial statements.

The Company is reporting costs of goods sold for the first time, in both Q2 and H2 (\$98,387 for both periods). These costs are primarily hardware costs associated with Nimbo's product revenue.

Gross profits are also the highest ever reported by the company. Q2 2014 gross profits were \$98,310, an increase of 371% over Q1 2014, and an increase of 128% over the similar period in 2013. Gross profits for the 6 month period ending June 30, 2014 were of \$119,170, an increase of 84% over the similar period in 2013. Gross margins for Q2 were 50%.

Expenses

Expenses for Q2 2014 totaled \$199,793, an increase of \$110,485 over the previous quarter. \$39,615 of this was due to the addition of Nimbo salaries. The company also incurred an additional \$66,570 in expenses via issuance of shares for consulting and business development service fees, including business case and market development services, accounting services, software development, and operational support services. However, in spite of the Nimbo acquisition, Q2 expenses remained lower than those for the similar period in 2013, and expenses of \$289,101 for the six month period ending June 30, 2014 reflected a 31% reduction over expenses for the similar period in 2013. The Company was able to reduce some general administration costs and professional fees, however the bulk of the expense reduction was a significant reduction of \$119,380 in stock-based compensation during the period.

Net Income (Loss)

The Company had a Q2 2014 net loss of \$95,486 (\$0.00 per basic and diluted share), which includes shared losses from Gogiro Internet Group of \$13,462, a \$11,544 combined loss arising from accretion expenses and changes in derivative liabilities in connection with the Company's convertible debentures, and a gain of \$31,003 associated with the extension of the maturity date of one convertible debenture.

Though the net loss for Q2 2014 is a 14% increase from the \$11,778 of net loss reported in the previous quarter, it is a significant 51% reduction from the net loss of \$182,092 reported in Q2 2013. Similarly, a net loss of \$172,099 for the

6 month period ending June 30, 2014 represents a 54% reduction from a \$370,482 net loss reported for the similar period of 2013.

Cash Flows

The company saw a net increase of \$56,008 in its cash position over the six months ended June 30, 2014. The company used net cash of \$203,930 in its operating activities over the period, which was offset by \$42,672 in cash acquired through the acquisition of Nimbo LLC, combined with \$217,500 raised over the period via private placements.
