Samsung and Sony Agreed on Establishing
Additional 8th Generation Line at S-LCD

Seoul, Korea/Tokyo, Japan, April 25, 2008 - Samsung Electronics Co., Ltd. ("Samsung") and Sony Corporation ("Sony") today announced that they have signed a contract to establish an additional 8th generation amorphous TFT-LCD manufacturing line ("8-2 line") at their joint venture, S-LCD Corporation ("S-LCD").

S-LCD, established in April 2004, started its 7th generation line operation in April 2005 and its first 8th generation line operation in August 2007 to manufacture and supply TFT-LCD panels to Samsung and Sony. To meet the increase of the world demand for LCD televisions, Samsung and Sony agreed to expand the capacity of the 8th generation line. Total investment for the 8-2 line will be approximately 1.8 trillion KRW (approximately \$1.9 billion/200 billion JPY) and will be invested by S-LCD.

The 8-2 line is to be built in the Tangjeong Complex, and production is targeted to start in the second quarter of 2009. The production capacity of the new line is expected to be initially 60,000 sheets per month (substrate glass input basis). The size of substrate glass from this line will be 2,200 x 2,500mm.

By adding the 8-2 line, together with the current 8th and 7th generation lines in Tangjeong, S-LCD is expected to be a stable and efficient supplier to Samsung and Sony of large screen LCD panels.

(S-LCD Production Line Status) (as of April 25, 2008)

7th Generation Line

Startup: April 2005
Current capacity: 100,000 sheets / month(*)
Motherglass size: 1,870 x 2,200 mm

Edgar Filing: SONY CORP - Form 6-K

First 8th Generation Line

Startup: August 2007
Current capacity: 50,000 sheets / month(*)
Motherglass size: 2,200 x 2,500 mm

<Additional 8th Generation Line >

Startup: 2nd Quarter 2009
Initial capacity: 60,000 sheets / month(*)
Motherglass size: 2,200 x 2,500 mm

(*) substrate glass input basis
