(Summary Translation)

Interim Business Report

(from April 1, 2003 to September 30, 2003)

Hitachi, Ltd.  
Tokyo, Japan

(Note) Certain information including product introduction is omitted from this English translation.

To Our Shareholders:

In providing this report on our business results for the first half of fiscal 2003, we wish to express our deep gratitude to all our shareholders for the understanding and support you have extended to the Hitachi Group.

During the half-year period under review, in Japan private-sector plant and equipment investment showed some improvement, but with public works investment and consumer spending continuing to be restrained, the economy failed to find any path to a real recovery.

In this business environment, since the preceding fiscal year Hitachi has been proceeding with strategic alliances, M&As and reorganizations. These have included the acquisition of IBM Corporation's hard disk drive (HDD) operations and the transfer of system LSI and other semiconductor business operations to Renesas Technology Corp., a company jointly established with Mitsubishi Electric Corporation. During the period under review, in which these moves were completed, forming a new business structure, consolidated net sales rose 3% from the same period of the preceding fiscal year, to JPY 4,041.4 billion.

Our main segment, Information & Telecommunication Systems, moved forward with the integration of the acquired HDD business into Hitachi's operations. With the profitability of such business still in the process of being strengthened, segment operating income, while still within the projected range, showed a major decrease. Financial Services and Digital Media & Consumer Products also showed a sharp drop in operating income. Thus, consolidated operating income decreased 67% from the same period of the preceding fiscal

## Edgar Filing: HITACHI LTD - Form 6-K

year, to JPY 20.2 billion. Other income, including net gain on securities, was JPY 111.9 billion, and other deductions amounted to JPY 41.6 billion. As a result, Hitachi recorded income before income taxes and minority interests of JPY 90.5 billion, and net income of JPY 5.3 billion.

On an unconsolidated basis, Hitachi recorded net sales of JPY 1,128.2 billion and posted an operating loss of JPY 6.9 billion. Ordinary income amounted to JPY 10.0 billion. Hitachi recorded an extraordinary gain of JPY 8.4 billion from the sale of subsidiaries' common stock and investments in securities, and an extraordinary loss of JPY 4.9 billion from impairment loss on investments in subsidiaries and securities. As a result, net income amounted to JPY 19.2 billion.

At a meeting of the Board of Directors, it was decided to pay an interim dividend of JPY 3 per share.

Fiscal 2003 marked the start of "i.e. HITACHI Plan II," a medium-term management plan running to fiscal 2005 that emphasizes management goals. The storage solutions business, which supports the recording and utilization of the vast quantities of information possessed by customers, and the urban renewal business, which provides urban functions with higher safety and more comfort and convenience, are among the areas of operations that the "i.e. HITACHI Plan II" will give priority to strengthening. A wide range of HDD applications will be developed, starting with digital consumer electronics and in-vehicle terminals, as Hitachi, together with the companies of the Hitachi Group, move to create new businesses that will form the core of future operations, with the goal of establishing a high-profit structure.

With respect to the implementation of the new plan, the ordinary general meeting of shareholders held in June 2003 approved the adoption of a Committee System corporate structure. Under the new system, the Board of Directors focuses on decisions involving basic management policies and supervision of execution by Executive Officers, while Executive Officers elected by the Board are responsible for executing the business operations. The aim of the new system is to speed up business operations and to achieve greater transparency in management, thereby responding to the trust placed in us by our shareholders. The major companies of the Hitachi Group are also moving to a Committee System structure to speed up management and to raise efficiency by strengthening the group's integrated management.

1

With regard to the business outlook, expectations for an expansion of the Japanese economy are running up against concerns about a reversal. As such, the state of the economy will continue to preclude optimism. For its part, Hitachi intends to focus the total capabilities of the Hitachi Group towards achieving the goals of the "i.e. HITACHI Plan II" and thereby establishing a solid foundation for generating profits.

We hope we can look forward to receiving your continuing support and understanding of our efforts.

December 2003

Tsutomu Kanai  
Chairman of the Board

Etsuhiko Shoyama  
President and Chief Executive Officer

Outline of Business Results

Information & Telecommunication Systems

Sales rose sharply from the acquisition of IBM Corporation's HDD operations, and in the software and services businesses, solid results were turned in by outsourcing services for financial institutions, helping push up segment sales 20%, to JPY 1,053.2 billion. Operating income decreased 87%, to JPY 5.3 billion.

Electronic Devices

The segment saw sales decrease 21%, to JPY 607.5 billion, due to the effect of the transfer of system LSI and other semiconductor operations to equity-method affiliate Renesas Technology Corp. The segment recorded operating income of JPY 3.6 billion, rebounding from an operating loss of JPY 7.9 billion in the same period of the preceding year.

Power & Industrial Systems

Sales of power generation equipment and other plant operations were sluggish. However, Hitachi Construction Machinery Co., Ltd. posted higher sales in China and other overseas markets, and sales of automotive products were boosted by the inclusion of the sales of UNISIA JECS Corporation, which became a wholly-owned subsidiary on October 1, 2002. Thus, at JPY 1,073.4 billion, segment sales stayed more or less unchanged. Operating income decreased 29%, to JPY 7.9 billion.

Digital Media & Consumer Products

Sales of plasma TVs, projection TVs and other display equipment increased. However, segment sales declined 2%, to JPY 585.4 billion, due primarily to a decrease in sales of room air conditioners and washing machines. Operating income decreased 87%, to JPY 0.7 billion.

High Functional Materials & Components

At Hitachi Cable, Ltd., Hitachi Chemical Co., Ltd. and Hitachi Metals, Ltd., construction materials and plant construction operations were sluggish. However, good growth was registered by information systems and electronic related materials primarily for semiconductors, and by high-grade metal products for automobiles. Segment sales increased 1%, to JPY 622.2 billion. Operating income rose 2%, to JPY 9.2 billion.

Logistics, Services & Others

Hitachi Transport System, Ltd. showed a solid performance. However, the changes that took place in the semiconductor and HDD operations meant the exclusion of sales of such products in this segment. Thus, segment sales decreased 13%, to JPY 612.9 billion. The segment recorded an operating loss of JPY 0.3 billion, compared to an operating income of JPY 1.4 billion in the same period of the preceding year.

Financial Services

Low interest rates and the slow pace of automobile loans to individuals had an adverse effect on the performance of Hitachi Capital Corporation, which provides companies and individuals with leases, loans and other financial services. Segment sales decreased 9%, to JPY 267.9 billion. Operating income decreased 56%, to JPY 8.1 billion.
