Dear Shareholders,

In the first half of 2004, driven by the sustained and rapid growth of the Chinese economy, the demand for telecommunications services continued to grow with a steady increase in the total volume of voice services, further expansion of Internet services and more opportunities for the development of value-added services. At the same time, competition within the telecommunications market further intensified. Voice services were the key focus of such competition as mobile substitution became more visible. While the increased market demands have provided us with new opportunities for development, the intensified competition among telecommunications operators has brought about new challenges to us.

Faced with this challenge, we adhered to our core value of Innovation and Solid Execution, focussed on improving our operational systems and enhancing corporate management, and consistently promoted our market-oriented, customer-centred and return-driven business model throughout the organisation. These measures improved our market responsiveness, product development, marketing capabilities and our ability to thrive in the market place, increasing our profitability and shareholders' value. In the first half of 2004, our local wireline services subscriber base increased by 17.51 million, reaching 178 million at the end of June and our broadband subscriber base increased by 3.66 million, reaching 10.89 million at the end of June. Driven by the strength in our local voice services and broadband Internet services, we recorded a steady growth in operating revenue which reached RMB80,217 million, an increase of 8.3% over the same period in 2003. Our EBITDA was RMB43,991 million and our net profit was RMB14,708 million, of which RMB4,236 million was generated from amortisation of connection fees.

In the first half of this year, we successfully completed the acquisition of telecommunications businesses in ten provinces. To fund the acquisition, we raised net proceeds of approximately US\$1.5 billion through a successful offering of new H shares. With the implementation of our management system, all levels of management of the newly acquired subsidiaries have been geared towards achieving their business and financial objectives. The growth rates of these companies increased and their operating and capital expenditures were effectively controlled, thus improving their profitability. In the first half of this year, our newly acquired telecommunications subsidiaries in the ten provinces generated revenue of RMB17,916 million from their operations, an increase of 10.0% from the same period last year, and realised net profit of RMB2,553 million, of which RMB818 million was generated from amortisation of connection fees. After the Acquisition, our basic earnings per share reached RMB0.19, representing an increase of 11.8% over the same period last year. We now enjoy better growth prospects.

In the first half of this year, we further improved the management of our distribution channels, implemented the revenue-and-service-accountability system and improved the efficiency of the distribution channels, whereby a client-focussed, full coverage distribution channel system was established which has helped to stabilise the usage from our existing customers and played an important role in driving revenue growth. At the same time, we made substantial adjustments to our marketing operation management model applied by head office, including strengthening the market strategy planning and unifying brand management, unifying customer service interface and reinforcing the sales planning function. In addition, a product development centre was set up to strengthen our business innovation capability.

Since our initial public offering, our financial management has been improving continuously. The key importance of financial management in various aspects of the business continued to be emphasised, overall budget control has been more stringently implemented and cost control has been further improved. With more centralised network maintenance and higher efficiency, our network operations and support expenses have decreased. Following our philosophy of running the enterprise in an industrious and economical way, we have focussed effort in cutting our administrative expenses. As a result, our management and administrative expenditure continued to decrease. However, in order to ensure the continuing growth of our core business in a competitive environment, our sales expenses increased. Capital expenditure is expected to be more proportionate between the first half and second half of this year. The first half of this year recorded a total capital expenditure of RMB25,018 million, an increase of 12.4% from the same period last year.

In the first half of this year, we continued to focus our effort on centralising our network resources management and network maintenance. A centralised control and maintenance system covering various

telecommunications networks was preliminarily established in all our local branch companies. We have further centralised the management of local branch companies' resources. A transmission resources management system has been established and a conduit resources management system is taking shape. These measures will help us to realise dynamic deployment and distribution of our network resources, effectively increase the efficiency of our network operations and maintenance, and improve our market responsiveness.

In the first half of this year, Business Process Re-engineering (BPR) has been extensively implemented throughout the Company. 212 out of our 228 local branch companies have adopted or are adopting BPR. With BPR as our platform to implement various new management measures, we were able to expand our process management over a wider area, implement process management reform at all levels of the business. In particular, we have made substantial progress in our process-based and integrated management of distribution channels. The implementation of BPR has accelerated the establishment of a market-oriented, process-based management system, and further enhanced our local branch companies' overall marketing abilities, market responsiveness, provisioning capabilities and network management. This has in turn improved our operating efficiency and profitability.

Further progress has been made with the development of CTG-MBOSS, an information technology platform for our businesses. The management support system (MSS), one of the three sub-systems of CTG-MBOSS, has been successfully launched on a trial basis at Guangdong Telecom and Shanghai Telecom. Such system will be further implemented in these two subsidiaries and extended to subsidiaries in other provinces in the second half of this year. The implementation of MSS will enable us, through information sharing, to improve our operating efficiency and financial management and standardise the management of our internal control, thus effectively minimising business risks.

Business Review

In the first half of this year, our major business lines continued to grow. The subscriber base for our local telephone services expanded rapidly and the volume of our local voice services also increased substantially. The wireless local access service made an important contribution to the growth of our business. Broadband services continued to develop at high growth rates and revenue generated therefrom accounted for a higher proportion of our total operating revenue. The domestic long distance services recorded positive growth both in terms of volume and revenue.

Local Telephone Services

As our core business, local telephone services recorded RMB40,527 million in revenue, an increase of 7.7% from the same period last year. Local telephone revenue accounted for 50.5% of our total operating revenue, which was similar to that of last year.

As at the end of June, our local telephone subscriber base increased by 17.51 million and by 10.9% from the end of last year, reaching 178 million. The growth in wireless local access subscribers and public telephone users was particularly strong with the total number of subscribers increasing by 10.91 million and 1.43 million, respectively, from the end of last year, reaching 36.47 million and 11.03 million, respectively. Their semi-annual growth rates were 42.7% and 14.8%, respectively.

By leveraging the strengths in our distribution channels and further promoting our packaged products in the first half of this year, we generated local telephone usage fees of RMB24,072 million, an increase of 7.1% from the same period last year. At the same time, the total usage of local voice service reached 210.7 billion pulses, an increase of 13.6% from the same period last year.

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

The steady and rapid increase in the number of wireless local access subscribers has effectively mitigated the pressure from mobile substitution. The packaging of wireless local access with residential and business wireline services has created synergies and increased the value of wireline services. We have reduced the investment cost of the wireless local access service per subscriber by approximately 10% and have increased the utilisation of the network by approximately 3%, thus maintaining a desirable level of investment return on such business.

A - 3

Internet Services

In the first half of this year, the revenue generated from Internet services reached RMB6,602 million, an increase of 51.6% from the same period last year, and accounted for 8.2% of our total operating revenue, which increased by 2.4 percentage points over the same period last year. This line of revenue has contributed substantially to our overall growth in revenue. As at the end of June, our subscriber base for the broadband access service reached 10.89 million, an increase of 3.66 million from the end of last year or a semi-annual growth rate of 50.6%, hence strengthening our leading position in the broadband market.

We have focussed our attention on capitalising the strength of our full service portfolio. We combined broadband access with other wireline services and broadband application services and launched flexible tariff packages to create and satisfy different customer demands. The marketing strength of our broadband access products has been improved as we extended our distribution channels to full coverage. At the same time, based on ChinaVnet platform, we strengthened the integration of broadband application resources to encourage third party providers to join efforts in expanding the spectrum of the broadband content and applications market. As at the end of June 2004, the number of registered subscribers for ChinaVnet reached 4.66 million and over 200 broadband content providers nationwide joined ChinaVnet .

While the number of broadband subscribers was increasing rapidly, their ARPU value was kept at a relatively high level. Benefiting from economies of scale and centralised procurement, the investment cost per subscriber for broadband ADSL was reduced by approximately 5%, thus maintaining a relatively high investment return rate.

Long Distance Services

In the first half of this year, our revenue generated from domestic long distance services was RMB13,145 million, an increase of 3.6% from the same period last year. The total transmission volume for our domestic long distance services reached 39.4 billion minutes, an increase of 21.4% from the same period last year. We continued to maintain our leading position in this area.

While benefiting from increasing demands in the domestic long distance services market which was stimulated by the rapid growth of the Chinese economy, we adopted a flexible and efficient marketing strategy in the face of market competition. We maximised revenue from the domestic long distance services by adopting appropriate pricing strategies. Sales efforts were tailored to customers based on our detailed customer segmentation. For instance, we increased the density of public telephone outlets and strengthened our control over and further motivated the agency channels. These measures enabled us to maintain our strong position in the rapidly growing long distance services market for mobile population.

Revenue from international, Hong Kong, Macau and Taiwan long distance services decreased by 2.3% from the same period last year to RMB1,906 million in the first half of this year. The volume of international long distance usage was 812 million minutes, approximately the same as that of last year.

Managed Data and Leased Line Services

In the first half of this year, revenue generated from our managed data services was RMB1,524 million, a reduction of 6.4% from the same period last year, which accounted for 1.9% of our total operating revenue. Benefiting from the accelerating progress in the use of information

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

technology by the general public, the leasing of standard ports of DDN, FR and ATM increased by 3.3%, 35.6% and 1.3%, respectively, from the end of 2003. On the other hand, under the pressure of competition within the market, the unit prices for our managed data services decreased.

We generated RMB2,112 million from our leased line services in the first half of this year, a reduction of 19.0% from the same period last year, which accounted for 2.6% of our total operating revenue. As at the end of June 2004, the total number of 2M digital lines leased was 146,200, a reduction of 10.4% from the end of 2003. This decrease was mainly due to the reduction in demand for leased lines from other domestic telecommunications operators.

A - 4

Interconnection Services

In the first half of this year, revenue from interconnection services was RMB5,013 million, an increase of 22.4% from the same period last year. The net interconnection revenue was RMB3,240 million, an increase of 25.0% from the same period last year. Driven by the continuous expansion of our subscriber base and the overall growth in the domestic telecommunications market, the volume of inbound local calls reached 46.2 billion minutes in the first half of this year, an increase of 32.4% from the same period last year. The volume of inbound long distance calls also increased compared to the same period last year.

Value-added Services

We continued our efforts to develop wireline value-added services in the first half of this year and substantially increased the revenue generated from them. As at the end of June 2004, our subscribers for the caller ID service reached 98.19 million, representing a penetration rate of 55.0%, an increase of nearly 4 percentage points from the end of 2003. The semi-annual usage volume for our telephone information service reached 1,038 million minutes, an increase of 35.0% from the same period last year. Since the launch of the SMS over wireless local access service in the first half of this year, the volume of its usage has increased substantially and the service has demonstrated great potential for further development. As an important component of wireline services, value-added services continue to be one of our key focuses and an important source of our future growth.

Outlook for the Second Half of the Year

In the second half of 2004, sustained, rapid, healthy and coordinated growth of the Chinese economy is expected. Accelerating adoption of information technology in the Chinese economy will continue to drive greater demands for telecommunications services. The increasing competition in the telecommunications market will become a significant factor in our operations in the second half of 2004.

We plan to fully explore the development potential of wireline services as our pillar business, conduct comprehensive network optimisation for the wireless local access network to improve our network quality and capability of developing new businesses. Furthermore, we will consistently develop our broadband access service, expand the market for broadband applications, strengthen the development of value-added services and continuously explore new areas for our services.

We will continue to strengthen the capacities of, and improve the management of, our distribution channels. We will also continue to harmonise the relationship between marketing, products development, distribution and customers, effectively improve marketing design and planning, and improve our brand management to enhance our brand value.

We intend to continue transforming our business towards a value-driven growth model. We will also continue to improve overall budget control and budget implementation accountability, optimise cost structure, enhance management of capital expenditure and achieve a more even distribution of capital and operating expenditure. Moreover, we will further implement BPR to establish a process-based management system with a long standing effect. We will strengthen our internal control system to achieve the international best practice, so as to mitigate business risks. We will also speed up the establishment of CTG-MBOSS to provide effective IT support for our marketing and sales, operational management and internal control.

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

With a view to improving our human resources capital, we will continue with our human resources reforms and implement a merit-based appointment system. We will expand our talented team consisting of professional business managers, technical specialists, skilful marketing and maintenance personnel and professional administrative personnel.

We will pay close attention to new developments in the regulation of the telecommunications industry. Based on our in-depth understanding of regulatory policies, we will continue to comply with all regulatory requirements and foster a favourable business environment. Based on a win-win philosophy and through the creation of a favourable competitive environment, we will promote the healthy development of the industry.

A - 5

In summary, we will adhere to our goal of becoming a world-class telecommunications operator. Focussing on rapid development, continued business reform, effective management and human-resources-based strategy, we will strive to achieve the sustainable and sound development of the business and maximise shareholders' value.

To the Board of Directors of

China Telecom Corporation Limited

INTRODUCTION

We have been instructed by the Company to review the interim financial statements of the Company and its subsidiaries (the Group) set out on pages 9 to 30.

RESPECTIVE RESPONSIBILITIES OF DIRECTORS AND AUDITORS

The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of interim financial statements to be in compliance with the relevant provisions thereof and International Accounting Standard 34 Interim Financial Reporting promulgated by the International Accounting Standards Board. The interim financial statements are the responsibility of, and have been approved by, the directors.

It is our responsibility to form an independent conclusion, based on our review, on the interim financial statements and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

REVIEW WORK PERFORMED

We conducted our review in accordance with Statement of Auditing Standards 700 Engagement to review interim financial reports issued by the Hong Kong Society of Accountants. A review consists principally of making enquiries of Group management and applying analytical procedures to the interim financial statements and based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the interim financial statements.

REVIEW CONCLUSION

On the basis of our review which does not constitute an audit, we are not aware of any material modifications that should be made to the interim financial statements for the six-month period ended 30 June 2004.

1. PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PRESENTATION

Principal activities

China Telecom Corporation Limited (the Company) and its subsidiaries (hereinafter, collectively referred to as the Group) are engaged in the provision of wireline telecommunications and related services in Shanghai Municipality, Guangdong Province, Jiangsu Province, Zhejiang Province, Anhui Province, Fujian Province, Jiangxi Province, Guangxi Zhuang Autonomous Region, Chongqing Municipality, Sichuan Province, Hubei Province, Hunan Province, Hainan Province, Guizhou Province, Yunnan Province, Shaanxi Province, Gansu Province, Qinghai Province, Ningxia Hui Autonomous Region and Xinjiang Uygur Autonomous Region of the People's Republic of China (the PRC). The Group offers a comprehensive range of wireline telecommunications services to residential and business customers, including local, domestic long distance (DLD) and international long distance (ILD) telephone services, Internet and managed data, leased line, and other related services.

The operations of the Group are subject to the supervision and regulation by the PRC government. The Ministry of Information Industry, pursuant to the authority delegated to it by the PRC's State Council, is responsible for formulating the telecommunications industry policies and regulations, including the regulation and setting of tariff levels for basic telecommunications services, such as local and long distance telephone services, managed data services, leased line and interconnection arrangements.

Organisation

The Company was incorporated in the PRC on 10 September 2002 as part of the reorganisation (the Restructuring) of China Telecommunications Corporation (China Telecom) and together with its subsidiaries other than the Company referred to as China Telecom Group), a state-owned enterprise which is under the supervision and regulation of the Ministry of Information Industry. In November 2001, pursuant to a further industry restructuring plan approved by the State Council, China Telecom's wireline telecommunications networks and related operations in 10 northern provinces, municipalities and autonomous regions of the PRC were transferred to China Netcom Group. China Telecom retained the wireline telecommunications networks and related operations of 21 provinces, municipalities and autonomous regions of the PRC, including those of the Company's subsidiaries. In accordance with this industry restructuring plan, China Telecom and China Netcom Group own 70% and 30%, respectively, of the nationwide inter-provincial optic fibres.

1. PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PRESENTATION

Organisation

Pursuant to the resolution passed by the Company's independent shareholders at an Extraordinary General Meeting held on 15 December 2003, the Company acquired the entire equity interests in Anhui Telecom Company Limited, Fujian Telecom Company Limited, Jiangxi Telecom Company Limited, Guangxi Telecom Company Limited, Chongqing Telecom Company Limited and Sichuan Telecom Company Limited (collectively the First Acquired Group) and certain network management and research and development facilities from China Telecom for a total purchase price of RMB46,000 million on 31 December 2003 (hereinafter, referred to as the First Acquisition). The purchase price consisted of a cash payment of RMB11,000 million and a long-term payable of RMB35,000 million. In connection with the First Acquisition and effective 31 December 2002, China Telecom transferred the wireline telecommunications business and related operations in Anhui Province, Fujian Province, Jiangxi Province, Guangxi Zhuang Autonomous Region, Chongqing Municipality and Sichuan Province together with the related assets and liabilities in consideration for the entire equity interests in each of the entities of the First Acquired Group. Certain assets historically associated with these operations were retained by China Telecom, and as at 31 December 2002, these assets amounted to RMB5,189 million and consisted primarily of investments in non-telecommunications industries and properties.

Pursuant to the resolution passed by the Company's independent shareholders at an Extraordinary General Meeting held on 9 June 2004, the Company acquired the entire equity interests in Hubei Telecom Company Limited, Hunan Telecom Company Limited, Hainan Telecom Company Limited, Guizhou Telecom Company Limited, Yunnan Telecom Company Limited, Shaanxi Telecom Company Limited, Gansu Telecom Company Limited, Qinghai Telecom Company Limited, Ningxia Telecom Company Limited and Xinjiang Telecom Company Limited (collectively the Second Acquired Group) from China Telecom for a total purchase price of RMB27,800 million on 30 June 2004 (hereinafter, referred to as the Second Acquisition). The purchase price consisted of a cash payment of RMB8,340 million and a long-term payable of RMB19,460 million. On 30 June 2004, the Company repaid RMB4,310 million of this payable amount using the net proceeds from issue of new H shares in May 2004 (see Note 10). In connection with the Second Acquisition and effective 31 December 2003, China Telecom transferred the wireline telecommunications business and related operations in Hubei Province, Hunan Province, Hainan Province, Guizhou Province, Yunnan Province, Shaanxi Province, Gansu Province, Qinghai Province, Ningxia Hui Autonomous Region and Xinjiang Uygur Autonomous Region together with the related assets and liabilities in consideration for the entire equity interests in each of the entities of the Second Acquired Group. Certain assets historically associated with these operations were retained by China Telecom, and as at 31 December 2003, these assets amounted to RMB10,762 million and consisted primarily of investments in non-telecommunications industries and properties.

1. PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PRESENTATION**Basis of presentation**

As the First Acquired Group and the Second Acquired Group (the Acquired Groups) were under the common control of China Telecom, the acquisitions have been reflected in the accompanying consolidated interim financial statements as a combination of entities under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities of the Acquired Groups have been accounted for at historical amounts and the consolidated financial statements of the Company prior to the acquisitions have been restated to include the results of operations and assets and liabilities of the Acquired Groups on a combined basis. The assets retained by China Telecom in respect of the First Acquisition and the Second Acquisition have been reflected as distributions to China Telecom in the consolidated statement of shareholders equity as at 31 December 2002 and 31 December 2003 respectively. The considerations paid by the Company for the Acquired Groups have been accounted for as equity transactions in the consolidated statement of shareholders equity.

The results of operations previously reported by the Group for the six-month period ended 30 June 2003 have been restated to include the results of the First Acquired Group and the Second Acquired Group as set out below:

	The Group (as previously reported)	The First Acquired Group	The Second Acquired Group	The Group (combined)

Shareholders' equity as at 1 January 2003	152,848	34,177	187,025

For the periods presented, all significant balances and transactions between the Group and the Acquired Groups have been eliminated.

2. BASIS OF PREPARATION

These interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting promulgated by the International Accounting Standards Board and the disclosure requirements of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. These interim financial statements reflect the unaudited financial position of the Group as at 30 June 2004 and the unaudited results of operations and cash flows of the Group for the six-month period then ended, which are not necessarily indicative of the results of operations and cash flows expected for the year ending 31 December 2004.

The interim financial statements set out on pages 9 to 30 have been authorised for issue by the Board of Directors on 1 September 2004. These interim financial statements are unaudited, but have been reviewed by the Audit Committee of the Company. These interim financial statements have also been reviewed by the Company's international auditors, KPMG, in accordance with Statement of Auditing Standards 700 Engagements to review interim financial reports issued by the Hong Kong Society of Accountants.

2. BASIS OF PREPARATION

The accounting policies adopted in the 2003 annual financial statements have been consistently applied by the Group in preparing these interim financial statements. The consolidated interim financial statements presented herein should be read in conjunction with the consolidated financial statements and notes thereto included in the 2003 annual report of the Company.

3. SEGMENTAL REPORTING

A business segment is a distinguishable component of the Group that is engaged in providing products or services and is subject to risks and rewards that are different from those of other segments. For the periods presented, the Group has one operating segment which is the provision of wireline telecommunications services. All the Group's operating activities are carried out in the PRC.

			(Note 14)		

Note:

- (i) In connection with the Restructuring, the First Acquisition and the Second Acquisition, the land use rights of the Group were revalued as required by the relevant PRC rules and regulations. The tax bases of the land use rights have been adjusted to conform to such revalued amounts. The land use rights were not revalued for financial reporting purposes and accordingly, deferred tax assets were created with corresponding increases in shareholders' equity.

In the second quarter of 2004, certain subsidiaries with operations in the western region of the PRC obtained approval from tax authority to reduce the income tax rate from 33% to 15% for the period from 1 January 2004 to 31 December 2010. Accordingly, the effect of the change in tax rate on the amount of the deferred tax asset expected to be realised during 2004 to 2010 amounting to RMB166 million was charged to shareholders' equity.

- (vii) Represent net amount charged by China Telecom to the Group for costs associated with common corporate services and international telecommunications facilities.
- (viii) Represent amounts charged from/to China Telecom for interconnection of domestic long distance telephone calls.
- (ix) Represent interest paid and payable to China Telecom with respect to the deferred consideration payable to China Telecom in connection with the First Acquisition and interest with respect to loans from China Telecom (Note 7).

In connection with the Second Acquisition, the Group and China Telecom Group entered into a number of agreements on 13 April 2004. The principal terms of these agreements are similar to those disclosed in Note 32 to the Group's 2003 consolidated financial statements, other than an increase in the maximum commission rate for domestic equipment procurement from 1.8% to 3% to reflect the latest market price.

In addition, the Company entered into a comprehensive services framework agreement with China Telecom on 13 April 2004 to govern the terms and conditions of transactions between the Group and entities within China Telecom Group which were not within the scope of the agreements entered into previously. Such transactions include procurement of telecommunications equipment, network design, software upgrade, system integration, manufacture of calling cards and other services. Pursuant to this agreement, China Telecom Group charges the Group for these services in accordance with the following terms:

government prescribed price;

where there is no government prescribed price but where there is a government guided price, the government guided price will apply;

18. RELATED PARTY TRANSACTIONS

where there is neither a government prescribed price nor a government guided price, the market price will apply;

where none of the above is available, the price is to be agreed between the relevant parties, which shall be based on the cost incurred in providing the services plus a reasonable profit margin.

The directors of the Company are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and on normal commercial terms or in accordance with the agreements governing such transactions, and this has been confirmed by the independent non-executive directors.

19. PRINCIPAL SUBSIDIARIES

Following the completion of the Second Acquisition on 30 June 2004, the Company has the following wholly-owned subsidiaries which principally affect the results of operations and the financial position of the Group:

All of the above subsidiaries are incorporated in the PRC.

The Group's accounting policies conform with IFRS which differ in certain significant respects from accounting principles generally accepted in the United States of America (US GAAP). The nature of differences which have a significant effect on the Group's net profit and shareholders' equity are set out below. The US GAAP reconciliation presented below is included as supplemental information and is not required as part of the basic interim financial statements and has not been subject to independent audit or review.

(A) REVALUATION OF PROPERTY, PLANT AND EQUIPMENT

In connection with the Restructuring, the property, plant and equipment of the Company's predecessor operations were revalued as at 31 December 2001. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2001. Such revaluation resulted in an increase directly to shareholders' equity of RMB4,154 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB11,930 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

In connection with the First Acquisition, the property, plant and equipment of the First Acquired Group were revalued as at 31 December 2002. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2002. Such revaluation resulted in an increase directly to shareholders' equity of RMB760 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB14,690 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

In connection with the Second Acquisition, the property, plant and equipment of the Second Acquired Group were revalued as at 31 December 2003. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2003. Such revaluation resulted in an increase directly to shareholders' equity of RMB1,537 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB14,832 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

Under US GAAP, property, plant and equipment are stated at their historical cost less accumulated depreciation unless an impairment loss has been recorded. An impairment loss on property, plant and equipment is recorded under US GAAP if the carrying amount of such asset exceeds its future undiscounted cash flows resulting from the use of the asset and its eventual disposition. The future undiscounted cash flows of the Group's property, plant and equipment, whose carrying amount was reduced in connection with the Restructuring, the First Acquisition and the Second Acquisition, exceed the historical cost carrying amount of such property, plant and equipment and, therefore, impairment of such assets is not appropriate under US GAAP. Accordingly, the revaluation reserve recorded directly to shareholders' equity and the charge to income recorded under IFRS as a result of the Restructuring, the First Acquisition and the Second Acquisition, are reversed for US GAAP purposes.

However, as a result of the tax deductibility of the net revaluation deficit, a deferred tax liability related to the net revaluation deficit is created under US GAAP with a corresponding decrease in shareholders' equity.

(B) DISPOSAL OF REVALUED PROPERTY, PLANT AND EQUIPMENT

Under IFRS, on disposal of a revalued asset, the gain and loss on disposal of the asset is determined with reference to the asset's revalued amount less subsequent depreciation, and any related revaluation surplus is transferred from the revaluation reserve to retained earnings. Under US GAAP, the gain and loss on disposal of an asset is determined with reference to the asset's historical cost carrying amount and included in current earnings.

(C) EFFECT OF CHANGE IN TAX RATE

Under IFRS, the effect of a change in tax rate that results in a change in the carrying amounts of deferred tax assets and liabilities is charged or credited directly to equity, to the extent that such deferred tax assets and liabilities are previously charged or credited to equity. Under US GAAP, the effect of a change in tax rate for all items of deferred tax assets and liabilities is recorded in the income statement.

Reconciliation of net profit and shareholders' equity under IFRS to US GAAP

The effect on net profit of significant differences between IFRS and US GAAP for the six-month period ended 30 June 2004 and 2003 is as follows:

Chairman's Statement

Dear Shareholders,

In the first half of 2004, driven by the sustained and rapid growth of the Chinese economy, the demand for telecommunications services continued to grow with a steady increase in the total volume of voice services, further expansion of Internet services and more opportunities for the development of value-added services. At the same time, competition within the telecommunications market further intensified. Voice services were the key focus of such competition as mobile substitution became more visible. While the increased market demands have provided us with new opportunities for development, the intensified competition among telecommunications operators has brought about new challenges to us.

Faced with this challenge, we adhered to our core value of "Innovation and Solid Execution", focussed on improving our operational systems and enhancing corporate management, and consistently promoted our market-oriented, customer-centred and return-driven business model throughout the organisation. These measures improved our market responsiveness, product development, marketing capabilities and our ability to thrive in the market place, increasing our profitability and shareholders' value. In the first half of 2004, our local wireline services subscriber base increased by 17.51 million, reaching 178 million at the end of June and our broadband subscriber base increased by 3.66 million, reaching 10.89 million at the end of June. Driven by the strength in our local voice services and broadband Internet services, we recorded a steady growth in operating revenue which reached RMB80,217 million, an increase of 8.3% over the same period in 2003. Our EBITDA was RMB43,991 million and our net profit was RMB14,708 million, of which RMB4,236 million was generated from amortisation of connection fees.

In the first half of this year, we successfully completed the acquisition of telecommunications businesses in ten provinces. To fund the acquisition, we raised net proceeds of approximately US\$1.5 billion through a successful offering of new H shares. With the implementation of our management system, all levels of management of the newly acquired subsidiaries have been geared towards achieving their business and financial objectives. The growth rates of these companies increased and their operating and capital expenditures were effectively controlled, thus improving their profitability. In the first half of this year, our newly acquired telecommunications subsidiaries in the ten provinces generated revenue of RMB17,916 million from their operations, an increase of 10.0% from the same period last year, and realised net profit of RMB2,553 million, of which RMB818 million was generated from amortisation of connection fees. After the Acquisition, our basic earnings per share reached RMB0.19, representing an increase of 11.8% over the same period last year. We now enjoy better growth prospects.

B-1

In the first half of this year, we further improved the management of our distribution channels, implemented the revenue-and-service-accountability system and improved the efficiency of the distribution channels, whereby a client-focussed, full coverage distribution channel system was established which has helped to stabilise the usage from our existing customers and played an important role in driving revenue growth. At the same time, we made substantial adjustments to our marketing operation management model applied by head office, including strengthening the market strategy planning and unifying brand management, unifying customer service interface and reinforcing the sales planning function. In addition, a product development centre was set up to strengthen our business innovation capability.

Since our initial public offering, our financial management has been improving continuously. The key importance of financial management in various aspects of the business continued to be emphasised, overall budget control has been more stringently implemented and cost control has been further improved. With more centralised network maintenance and higher efficiency, our network operations and support expenses have decreased. Following our philosophy of running the enterprise in an industrious and economical way, we have focussed effort in cutting our administrative expenses. As a result, our management and administrative expenditure continued to decrease. However, in order to ensure the continuing growth of our core business in a competitive environment, our sales expenses increased. Capital expenditure is expected to be more proportionate between the first half and second half of this year. The first half of this year recorded a total capital expenditure of RMB25,018 million, an increase of 12.4% from the same period last year.

In the first half of this year, we continued to focus our effort on centralising our network resources management and network maintenance. A centralised control and maintenance system covering various telecommunications networks was preliminarily established in all our local branch companies. We have further centralised the management of local branch companies' resources. A transmission resources management system has been established and a conduit resources management system is taking shape. These measures will help us to realise dynamic deployment and distribution of our network resources, effectively increase the efficiency of our network operations and maintenance, and improve our market responsiveness.

In the first half of this year, Business Process Re-engineering (BPR) has been extensively implemented throughout the Company. 212 out of our 228 local branch companies have adopted or are adopting BPR. With BPR as our platform to implement various new management measures, we were able to expand our process management over a wider area, implement process management reform at all levels of the business. In particular, we have made substantial progress in our process-based and integrated management of distribution channels. The implementation of BPR has accelerated the establishment of a market-oriented, process-based management system, and further enhanced our local branch companies' overall marketing abilities, market responsiveness, provisioning capabilities and network management. This has in turn improved our operating efficiency and profitability.

Further progress has been made with the development of CTG-MBOSS, an information technology platform for our businesses. The management support system (MSS), one of the three sub-systems of CTG-MBOSS, has been successfully launched on a trial basis at Guangdong Telecom and Shanghai Telecom. Such system will be further implemented in these two subsidiaries and extended to subsidiaries in other provinces in the second half of this year. The implementation of MSS will enable us, through information sharing, to improve our operating efficiency and financial management and standardise the management of our internal control, thus effectively minimising business risks.

Business Review

In the first half of this year, our major business lines continued to grow. The subscriber base for our local telephone services expanded rapidly and the volume of our local voice services also increased substantially. The wireless local access service made an important contribution to the growth of our business. Broadband services continued to develop at high growth rates and revenue generated therefrom accounted for a higher proportion of our total operating revenue. The domestic long distance services recorded positive growth both in terms of volume and revenue.

Local Telephone Services

As our core business, local telephone services recorded RMB40,527 million in revenue, an increase of 7.7% from the same period last year. Local telephone revenue accounted for 50.5% of our total operating revenue, which was similar to that of last year.

As at the end of June, the local telephone subscriber base increased by 17.51 million and by 10.9% from the end of last year, reaching 178 million. The growth in wireless local access subscribers and public telephone users was particularly strong with the total number of subscribers increasing by 10.91 million and 1.43 million, respectively, from the end of last year, reaching 36.47 million and 11.03 million, respectively. Their semi-annual growth rates were 42.7% and 14.8%, respectively.

By leveraging the strengths in our distribution channels and further promoting our packaged products in the first half of this year, we generated local telephone usage fees of RMB24,072 million, an increase of 7.1% from the same period last year. At the same time, the total usage of local voice service reached 210.7 billion pulses, an increase of 13.6% from the same period last year.

The steady and rapid increase in the number of wireless local access subscribers has effectively mitigated the pressure from mobile substitution. The packaging of wireless local access with residential and business wireline services has created synergies and increased the value of wireline services. We have reduced the investment cost of the wireless local access service per subscriber by approximately 10% and have increased the utilisation of the network by approximately 3%, thus maintaining a desirable level of investment return on such business.

Internet Services

In the first half of this year, the revenue generated from Internet services reached RMB6,602 million, an increase of 51.6% from the same period last year, and accounted for 8.2% of our total operating revenue, which increased by 2.4 percentage points over the same period last year. This line of revenue has contributed substantially to our overall growth in revenue. As at the end of June, the subscriber base for the broadband access service reached 10.89 million, an increase of 3.66 million from the end of last year or a semi-annual growth rate of 50.6%, hence strengthening our leading position in the broadband market.

We have focussed our attention on capitalising the strength of our full service portfolio. We combined broadband access with other wireline services and broadband application services and launched flexible tariff packages to create and satisfy different customer demands. The marketing strength of our broadband access products has been improved as we extended our distribution channels to full coverage. At the same time, based on ChinaVnet platform, we strengthened the integration of broadband application resources to encourage third party providers to join efforts in expanding the spectrum of the broadband content and applications market. As at the end of June 2004, the number of registered subscribers for ChinaVnet reached 4.66 million and over 200 broadband content providers nationwide joined ChinaVnet .

While the number of broadband subscribers was increasing rapidly, their ARPU value was kept at a relatively high level. Benefiting from economies of scale and centralised procurement, the investment cost per subscriber for broadband ADSL was reduced by approximately 5%, thus maintaining a relatively high investment return rate.

Long Distance Services

In the first half of this year, our revenue generated from domestic long distance services was RMB13,145 million, an increase of 3.6% from the same period last year. The total transmission volume for our domestic long distance services reached 39.4 billion minutes, an increase of 21.4% from the same period last year. We continued to maintain our leading position in this area.

While benefiting from increasing demands in the domestic long distance services market which was stimulated by the rapid growth of the Chinese economy, we adopted a flexible and efficient marketing strategy in the face of market competition. We maximised revenue from the domestic long distance services by adopting appropriate pricing strategies. Sales efforts were tailored to customers based on

B-3

our detailed customer segmentation. For instance, we increased the density of public telephone outlets and strengthened our control over and further motivated the agency channels. These measures enabled us to maintain our strong position in the rapidly growing long distance services market for mobile population.

Revenue from international, Hong Kong, Macau and Taiwan long distance services decreased by 2.3% from the same period last year to RMB1,906 million in the first half of this year. The volume of international long distance usage was 812 million minutes, approximately the same as that of last year.

Managed Data and Leased Line Services

In the first half of this year, revenue generated from our managed data services was RMB1,524 million, a reduction of 6.4% from the same period last year, which accounted for 1.9% of our total operating revenue. Benefiting from the accelerating progress in the use of information technology by the general public, the leasing of standard ports of DDN, FR and ATM increased by 3.3%, 35.6% and 1.3%, respectively, from the end of 2003. On the other hand, under the pressure of competition within the market, the unit prices for our managed data services decreased.

We generated RMB2,112 million from our leased line services in the first half of this year, a reduction of 19.0% from the same period last year, which accounted for 2.6% of our total operating revenue. As at the end of June 2004, the total number of 2M digital lines leased was 146,200, a reduction of 10.4% from the end of 2003. This decrease was mainly due to the reduction in demand for leased lines from other domestic telecommunications operators.

Interconnection Services

In the first half of this year, revenue from interconnection services was RMB5,013 million, an increase of 22.4% from the same period last year. The net interconnection revenue was RMB3,240 million, an increase of 25.0% from the same period last year. Driven by the continuous expansion of our subscriber base and the overall growth in the domestic telecommunications market, the volume of inbound local calls reached 46.2 billion minutes in the first half of this year, an increase of 32.4% from the same period last year. The volume of inbound long distance calls also increased compared to the same period last year.

Value-added Services

We continued our efforts to develop wireline value-added services in the first half of this year and substantially increased the revenue generated from them. As at the end of June 2004, our subscribers for the caller ID service reached 98.19 million, representing a penetration rate of 55.0%, an increase of nearly 4 percentage points from the end of 2003. The semi-annual usage volume for our telephone information service reached 1,038 million minutes, an increase of 35.0% from the same period last year. Since the launch of the SMS over wireless local access service in the first half of this year, the volume of its usage has increased substantially and the service has demonstrated great potential for further development. As an important component of wireline services, value-added services continue to be one of our key focuses and an important source of our future growth.

Outlook for the Second Half of the Year

In the second half of 2004, sustained, rapid, healthy and coordinated growth of the Chinese economy is expected. Accelerating adoption of information technology in the Chinese economy will continue to drive greater demands for telecommunications services. The increasing competition in the telecommunications market will become a significant factor in our operations in the second half of 2004. We plan to fully explore the development potential of wireline services as our pillar business, conduct comprehensive network optimisation for the wireless local access network to improve our network quality and capability of developing new businesses. Furthermore, we will consistently develop our broadband access service, expand the market for broadband applications, strengthen the development of value-added services and continuously explore new areas for our services.

We will continue to strengthen the capacities of, and improve the management of, our distribution channels. We will also continue to harmonise the relationship between marketing, products development, distribution and customers, effectively improve marketing design and planning, and improve our brand management to enhance our brand value.

B-4

We intend to continue transforming our business towards a value-driven growth model. We will also continue to improve overall budget control and budget implementation accountability, optimise cost structure, enhance management of capital expenditure and achieve a more even distribution of capital and operating expenditure. Moreover, we will further implement BPR to establish a process-based management system with a long standing effect. We will strengthen our internal control system to achieve the international best practice, so as to mitigate business risks. We will also speed up the establishment of CTG-MBOSS to provide effective IT support for our marketing and sales, operational management and internal control.

With a view to improving our human resources capital, we will continue with our human resources reforms and implement a merit-based appointment system. We will expand our talented team consisting of professional business managers, technical specialists, skilful marketing and maintenance personnel and professional administrative personnel.

We will pay close attention to new developments in the regulation of the telecommunications industry. Based on our in-depth understanding of regulatory policies, we will continue to comply with all regulatory requirements and foster a favourable business environment. Based on a win-win philosophy and through the creation of a favourable competitive environment, we will promote the healthy development of the industry.

In summary, we will adhere to our goal of becoming a world-class telecommunications operator. Focussing on rapid development, continued business reform, effective management and human-resources-based strategy, we will strive to achieve the sustainable and sound development of the business and maximise shareholders' value.

Notes to the Unaudited Interim Financial Statements

for the six-month period ended 30 June 2004

1. PRINCIPAL ACTIVITIES, ORGANISATION AND BASIS OF PRESENTATION

Principal activities

China Telecom Corporation Limited (the Company) and its subsidiaries (hereinafter, collectively referred to as the Group) are engaged in the provision of wireline telecommunications and related services in Shanghai Municipality, Guangdong Province, Jiangsu Province, Zhejiang Province, Anhui Province, Fujian Province, Jiangxi Province, Guangxi Zhuang Autonomous Region, Chongqing Municipality, Sichuan Province, Hubei Province, Hunan Province, Hainan Province, Guizhou Province, Yunnan Province, Shaanxi Province, Gansu Province, Qinghai Province, Ningxia Hui Autonomous Region and Xinjiang Uygur Autonomous Region of the People's Republic of China (the PRC). The Group offers a comprehensive range of wireline telecommunications services to residential and business customers, including local, domestic long distance (DLD) and international long distance (ILD) telephone services, Internet and managed data, leased line, and other related services.

The operations of the Group are subject to the supervision and regulation by the PRC government. The Ministry of Information Industry, pursuant to the authority delegated to it by the PRC's State Council, is responsible for formulating the telecommunications industry policies and regulations, including the regulation and setting of tariff levels for basic telecommunications services, such as local and long distance telephone services, managed data services, leased line and interconnection arrangements.

Organisation

The Company was incorporated in the PRC on 10 September 2002 as part of the reorganisation (the Restructuring) of China Telecommunications Corporation (China Telecom) and together with its subsidiaries other than the Company referred to as China Telecom Group), a state-owned enterprise which is under the supervision and regulation of the Ministry of Information Industry. In November 2001, pursuant to a further industry restructuring plan approved by the State Council, China Telecom's wireline telecommunications networks and related operations in 10 northern provinces, municipalities and autonomous regions of the PRC were transferred to China Netcom Group. China Telecom retained the wireline telecommunications networks and related operations of 21 provinces, municipalities and autonomous regions of the PRC, including those of the Company's subsidiaries. In accordance with this industry restructuring plan, China Telecom and China Netcom Group own 70% and 30%, respectively, of the nationwide inter-provincial optic fibres.

Pursuant to the resolution passed by the Company's independent shareholders at an Extraordinary General Meeting held on 15 December 2003, the Company acquired the entire equity interests in Anhui Telecom Company Limited, Fujian Telecom Company Limited, Jiangxi Telecom Company Limited, Guangxi Telecom Company Limited, Chongqing Telecom Company Limited and Sichuan Telecom Company Limited (collectively the First Acquired Group) and certain network management and research and development facilities from China Telecom for a total purchase price of RMB46,000 million on 31 December 2003 (hereinafter, referred to as the First Acquisition). The purchase price consisted of a cash payment of RMB11,000 million and a long-term payable of RMB35,000 million. In connection with the First Acquisition and effective 31 December 2002, China Telecom transferred the wireline telecommunications business and related operations in Anhui Province, Fujian Province, Jiangxi Province, Guangxi Zhuang Autonomous Region, Chongqing Municipality and Sichuan Province together with the related assets and liabilities in consideration for the entire equity interests in each of the entities of the First Acquired Group. Certain assets historically associated with these operations were retained by China Telecom, and as at 31 December 2002, these assets amounted to RMB5,189 million and consisted primarily of investments in non-telecommunications industries and properties.

Telecom Company Limited, Hunan Telecom Company Limited, Hainan Telecom Company Limited, Guizhou Telecom Company Limited, Yunnan Telecom Company Limited, Shaanxi Telecom Company Limited, Gansu Telecom Company Limited, Qinghai Telecom Company Limited, Ningxia Telecom Company Limited and Xinjiang Telecom Company Limited (collectively the Second Acquired Group) from China Telecom for a total purchase price of RMB27,800 million on 30 June 2004 (hereinafter, referred to as the Second Acquisition). The purchase price consisted of a cash payment of RMB8,340 million and a long-term payable of RMB19,460 million. On 30 June 2004, the Company repaid RMB4,310 million of this payable amount using the net proceeds from issue of new H shares in May 2004 (see Note 10). In connection with the Second Acquisition and effective 31 December 2003, China Telecom transferred the wireline telecommunications business and related operations in Hubei Province, Hunan Province, Hainan Province, Guizhou Province, Yunnan Province, Shaanxi Province, Gansu Province, Qinghai Province, Ningxia Hui Autonomous Region and Xinjiang Uygur Autonomous Region together with the related assets and liabilities in consideration for the entire equity interests in each of the entities of the Second Acquired Group. Certain assets historically associated with these operations were retained by China Telecom, and as at 31 December 2003, these assets amounted to RMB10,762 million and consisted primarily of investments in non-telecommunications industries and properties.

Basis of presentation

As the First Acquired Group and the Second Acquired Group (the Acquired Groups) were under the common control of China Telecom, the acquisitions have been reflected in the accompanying consolidated interim financial statements as a combination of entities under common control in a manner similar to a pooling-of-interests. Accordingly, the assets and liabilities of the Acquired Groups have been accounted for at historical amounts and the consolidated financial statements of the Company prior to the acquisitions have been restated to include the results of operations and assets and liabilities of the Acquired Groups on a combined basis. The assets retained by China Telecom in respect of the First Acquisition and the Second Acquisition have been reflected as distributions to China Telecom in the consolidated statement of shareholders equity as at 31 December 2002 and 31 December 2003 respectively. The considerations paid by the Company for the Acquired Groups have been accounted for as equity transactions in the consolidated statement of shareholders equity.

The results of operations previously reported by the Group for the six-month period ended 30 June 2003 have been restated to include the results of the First Acquired Group and the Second Acquired Group as set out below:

	The Group (as previously reported)	The First Acquired Group	The Second Acquired Group	The Group (combined)

Shareholders' equity as at 1 January 2003	152,848	34,177	187,025

For the periods presented, all significant balances and transactions between the Group and the Acquired Groups have been eliminated.

2. BASIS OF PREPARATION

These interim financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting promulgated by the International Accounting Standards Board and the disclosure requirements of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. These interim financial statements reflect the unaudited financial position of the Group as at 30 June 2004 and the unaudited results of operations and cash flows of the Group for the six-month period then ended, which are not necessarily indicative of the results of operations and cash flows expected for the year ending 31 December 2004.

These interim financial statements have been authorised for issue by the Board of Directors on 1 September 2004. These interim financial statements are unaudited, but have been reviewed by the Audit Committee of the Company. These interim financial statements have also been reviewed by the Company's international auditors, KPMG, in accordance with Statement of Auditing Standards 700 Engagements to review interim financial reports issued by the Hong Kong Society of Accountants.

The accounting policies adopted in the 2003 annual financial statements have been consistently applied by the Group in preparing these interim financial statements. The consolidated interim financial statements presented herein should be read in conjunction with the consolidated financial statements and notes thereto included in the 2003 annual report of the Company.

3. SEGMENTAL REPORTING

A business segment is a distinguishable component of the Group that is engaged in providing products or services and is subject to risks and rewards that are different from those of other segments. For the periods presented, the Group has one operating segment which is the provision of wireline telecommunications services. All the Group's operating activities are carried out in the PRC.

(Note 14)

Note:

- (i) In connection with the Restructuring, the First Acquisition and the Second Acquisition, the land use rights of the Group were revalued as required by the relevant PRC rules and regulations. The tax bases of the land use rights have been adjusted to conform to such revalued amounts. The land use rights were not revalued for financial reporting purposes and accordingly, deferred tax assets were created with corresponding increases in shareholders' equity.

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

In the second quarter of 2004, certain subsidiaries with operations in the western region of the PRC obtained approval from tax authority to reduce the income tax rate from 33% to 15% for the period from 1 January 2004 to 31 December 2010. Accordingly, the effect of the change in tax rate on the amount of the deferred tax asset expected to be realised during 2004 to 2010 amounting to RMB166 million was charged to shareholders' equity.

15. DIVIDENDS

Pursuant to the shareholders' approval at the Annual General Meeting held on 3 May 2004, a final dividend of RMB0.069083 per share totaling RMB5,224 million in respect of the year ended 31 December 2003 was declared and was paid on 20 May 2004.

B-20

Pursuant to the shareholders' approval at the Annual General Meeting held on 20 June 2003, a final dividend of RMB0.008897 per share totaling RMB673 million in respect of the year ended 31 December 2002 was declared and was paid on 10 July 2003.

The Board of Directors has resolved not to pay an interim dividend for the year ending 31 December 2004.

16. BASIC EARNINGS PER SHARE

The calculation of basic earnings per share for the six-month period ended 30 June 2004 is based on the net profit of RMB14,708 million and the weighted average number of shares in issue during the period of 76,724,576,113 shares. The weighted average number of shares in issue during the six-month period ended 30 June 2004 reflects the issuance of 5,318,181,818 new H shares in May 2004 (see Note 10). The calculation of basic earnings per share for the six-month period ended 30 June 2003 is based on the net profit of RMB13,058 million divided by 75,614,186,503 shares.

The amount of diluted earnings per share is not presented as there were no dilutive potential ordinary shares in existence for both periods presented.

- (viii) Represent amounts charged from/to China Telecom for interconnection of domestic long distance telephone calls.
- (ix) Represent interest paid and payable to China Telecom with respect to the deferred consideration payable to China Telecom in connection with the First Acquisition and interest with respect to loans from China Telecom (Note 7).

In connection with the Second Acquisition, the Group and China Telecom Group entered into a number of agreements on 13 April 2004. The principal terms of these agreements are similar to those disclosed in Note 32 to the Group's 2003 consolidated financial statements, other than an increase in the maximum commission rate for domestic equipment procurement from 1.8% to 3% to reflect the latest market price.

In addition, the Company entered into a comprehensive services framework agreement with China Telecom on 13 April 2004 to govern the terms and conditions of transactions between the Group and entities within China Telecom Group which were not within the scope of the agreements entered into previously. Such transactions include procurement of telecommunications equipment, network design, software upgrade, system integration, manufacture of calling cards and other services. Pursuant to this agreement, China Telecom Group charges the Group for these services in accordance with the following terms:

government prescribed price;

where there is no government prescribed price but where there is a government guided price, the government guided price will apply;

where there is neither a government prescribed price nor a government guided price, the market price will apply;

where none of the above is available, the price is to be agreed between the relevant parties, which shall be based on the cost incurred in providing the services plus a reasonable profit margin.

The directors of the Company are of the opinion that the above transactions with related parties were conducted in the ordinary course of business and on normal commercial terms or in accordance with the agreements governing such transactions, and this has been confirmed by the independent non-executive directors.

Supplementary Information for American Depository Shareholders

The Group's accounting policies conform with IFRS which differ in certain significant respects from accounting principles generally accepted in the United States of America (US GAAP). The nature of differences which have a significant effect on the Group's net profit and shareholders' equity are set out below. The US GAAP reconciliation presented below is included as supplemental information and is not required as part of the basic interim financial statements and has not been subject to independent audit or review.

(a) Revaluation of property, plant and equipment

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

In connection with the Restructuring, the property, plant and equipment of the Company's predecessor operations were revalued as at 31 December 2001. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2001. Such revaluation resulted in an increase directly to shareholders' equity of RMB4,154 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB11,930 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

B-23

In connection with the First Acquisition, the property, plant and equipment of the First Acquired Group were revalued as at 31 December 2002. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2002. Such revaluation resulted in an increase directly to shareholders' equity of RMB760 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB14,690 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

In connection with the Second Acquisition, the property, plant and equipment of the Second Acquired Group were revalued as at 31 December 2003. The net revaluation deficit has been reflected in the consolidated financial statements as at 31 December 2003. Such revaluation resulted in an increase directly to shareholders' equity of RMB1,537 million with respect to the increase in carrying amount of certain property, plant and equipment above their historical cost bases, and a charge to income of RMB14,832 million with respect to the reduction in carrying amount of certain property, plant and equipment below their historical cost bases.

Under US GAAP, property, plant and equipment are stated at their historical cost less accumulated depreciation unless an impairment loss has been recorded. An impairment loss on property, plant and equipment is recorded under US GAAP if the carrying amount of such asset exceeds its future undiscounted cash flows resulting from the use of the asset and its eventual disposition. The future undiscounted cash flows of the Group's property, plant and equipment, whose carrying amount was reduced in connection with the Restructuring, the First Acquisition and the Second Acquisition, exceed the historical cost carrying amount of such property, plant and equipment and, therefore, impairment of such assets is not appropriate under US GAAP. Accordingly, the revaluation reserve recorded directly to shareholders' equity and the charge to income recorded under IFRS as a result of the Restructuring, the First Acquisition and the Second Acquisition, are reversed for US GAAP purposes.

However, as a result of the tax deductibility of the net revaluation deficit, a deferred tax liability related to the net revaluation deficit is created under US GAAP with a corresponding decrease in shareholders' equity.

(b) Disposal of revalued property, plant and equipment

Under IFRS, on disposal of a revalued asset, the gain and loss on disposal of the asset is determined with reference to the asset's revalued amount less subsequent depreciation, and any related revaluation surplus is transferred from the revaluation reserve to retained earnings. Under US GAAP, the gain and loss on disposal of an asset is determined with reference to the asset's historical cost carrying amount and included in current earnings.

(c) Effect of change in tax rate

Under IFRS, the effect of a change in tax rate that results in a change in the carrying amounts of deferred tax assets and liabilities is charged or credited directly to equity, to the extent that such deferred tax assets and liabilities are previously charged or credited to equity. Under US GAAP, the effect of a change in tax rate for all items of deferred tax assets and liabilities is recorded in the income statement.

Reconciliation of net profit and shareholders' equity under IFRS to US GAAP

The effect on net profit of significant differences between IFRS and US GAAP for the six-month period ended 30 June 2004 and 2003 is as follows:

	Six-month periods ended 30 June		
	2004	2004	2003
	<i>US\$ millions (Note)</i>	<i>RMB millions</i>	<i>RMB millions</i>

* Basic earnings per ADS is calculated on the basis that one ADS is equivalent to 100 H shares.

The effect on shareholders' equity of significant differences between IFRS and US GAAP as at 30 June 2004 and 31 December 2003 is as follows:

	30 June 2004	30 June 2004	31 December 2003
	<i>US\$ millions (Note)</i>	<i>RMB millions</i>	<i>RMB millions</i>
	Shareholders' equity under IFRS	17,533	145,114

AUDIT COMMITTEE

The audit committee has reviewed with management and the Company's international auditors, KPMG, the accounting principles and practices adopted by the Group and discussed internal control and financial reporting matters including the review of the Interim Report for the six months ended 30 June 2004.

COMPLIANCE WITH CODE OF BEST PRACTICE

None of the Directors is aware of any information that would reasonably indicate that the Company is not, or was not during the period, in compliance with the Code of Best Practice as set out in Appendix 14 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

INTERIM REPORT

The Interim Report for the six months ended 30 June 2004 will be despatched to shareholders as well as made available on The Stock Exchange of Hong Kong Limited's website (www.hkex.com.hk) and the Company's website (www.chinatelecom-h.com) in due course.

Forward-Looking Statements

The Company would also like to caution readers about the forward-looking nature of certain of the above statements. These forward-looking statements are subject to risks and uncertainties, some of which are beyond our control. Potential risks and uncertainties include those concerning the continued growth of the telecommunications industry in China, the development of the regulatory environment and our ability to successfully execute our business strategies.

BOARD OF DIRECTORS

As of the date of this announcement, our Board consists of Mr. Zhou Deqiang as the chairman and chief executive officer, Mr. Chang Xiaobing as the president and chief operating officer, Ms. Wu Andi as the executive vice president and chief financial officer, Mr. Zhang Jiping as the executive vice president, Ms. Huang Wenlin as the executive vice president, Mr. Li Ping as the executive vice president and company secretary, Mr. Wei Leping as the executive vice president, Mr. Cheng Xiyuan and Mr. Feng Xiong as the executive directors, Mr. Zhang Youcai, Mr. Vincent Lo Hong Sui and Mr. Shi Wanpeng as the independent non-executive directors.

Disclosure of Earnings Before Interest, Tax, Depreciation and Amortization (EBITDA) and Reconciliation to Cash Flows from Operating Activities

On September 1, 2004, the Company presented EBITDA in its interim report and announcement of the interim report for the six months ended June 30, 2004 in Hong Kong.

The Company's EBITDA represents profit before net finance costs, investment income, share of profit from associates, taxation, depreciation and amortisation and minority interests. As the telecommunications business is a capital-intensive industry, capital expenditures, the level of gearing and finance costs may have a significant impact on the net profit of companies with similar operating results. Therefore, the Company believes EBITDA may be helpful in analysing the operating results of a telecommunications service provider like itself. Although EBITDA is widely used in the global telecommunications industry as a benchmark to reflect operating performance, financing capability and liquidity, it is not regarded as a measure of operating performance and liquidity under generally accepted accounting principles (GAAP). It also does not represent cash flows from operating activities. In addition, the Company's EBITDA may not be comparable to similar indicators provided by other companies.

The following table sets forth a reconciliation of the EBITDA for the six months ended June 30, 2004 to cash flows from operating activities, being the most comparable GAAP measure under International Financial Reporting Standards:

The purpose of this circular is to provide you with information regarding the resolutions to be proposed at the EGM for the approval of (i) the appointment of Directors and (ii) the amendments to the Articles of Association.

2. PROPOSED APPOINTMENT OF DIRECTORS

The Directors propose to elect Mr. Yang Jie and Mr. Sun Kangmin as executive Directors. Their biographies are set out below:

Mr. Yang Jie

Mr. Yang Jie, aged 42, is a senior engineer. In 1984, Mr. Yang graduated from Beijing University of Posts and Telecommunications with a bachelor's degree in wireless electronic engineering. He then obtained a master degree of telecommunications and information management at the Norwegian School of Management. Mr. Yang previously served as the Deputy Director General of Shanxi Administration Bureau of Posts and Telecommunications, the General Manager of Shanxi Telecommunications Corporation, the Vice President of China Telecom Beijing Research Institute and the General Manager of the Northern Telecom Department of China Telecom. He is currently serving as the Deputy General Manager of China Telecommunications Corporation. Mr. Yang has 20 years of experience in handling issues relating to the operation and management of the telecommunications industry in China.

As of the date hereof, Mr. Yang has no equity interest in the Company.

After obtaining approval from shareholders in respect of Mr. Yang's appointment, the Company will enter into a service contract with Mr. Yang for a term expiring on September 9, 2005. His remuneration will be determined by the board of Directors.

Mr. Sun Kangmin

Mr. Sun Kangmin, aged 47, is a senior engineer. Mr. Sun previously served as the Department Head of the Information Industry Department of Sichuan Province, the Director General of Communications Bureau of Sichuan Province as well as the Chairman and the General Manager of Sichuan Telecom Company Limited. Mr. Sun has 21 years of experience in handling issues relating to the operation and management of the telecommunications industry in China.

As of the date hereof, Mr. Sun has no equity interest in the Company.

After obtaining approval from shareholders in respect of Mr. Sun's appointment, the Company will enter into a service contract with Mr. Sun for a term expiring on September 9, 2005. His remuneration will be determined by the board of Directors.

3. PROPOSED AMENDMENTS TO THE ARTICLES OF ASSOCIATION

The Directors propose to make certain amendments to its Articles of Association to meet the Company's development. A full text of the Proposed Amendments is set out in the notice of EGM set out in the Appendix to this circular. According to the Articles of Association and the relevant laws and regulations, the Proposed Amendments are subject to the approval of the Shareholders by way of a special resolution at the EGM.

4. ACTIONS TO BE TAKEN

A notice convening the EGM is set out in the Appendix to this circular. The relevant proxy form and notice of attendance are enclosed. At the EGM, an ordinary resolution will be proposed to approve the appointment of Mr. Yang Jie and Mr. Sun Kangmin as executive Directors, and a special resolution will be proposed to approve the amendments to Article 6, 20, 21, 24, 94 and 133 of the Articles of Association.

Edgar Filing: CHINA TELECOM CORP LTD - Form 6-K

Shareholders of the Company who intend to attend the EGM are required to return the notice of attendance to the Company on or before September 29, 2004.

Whether or not Shareholders are able to attend the EGM, they are requested to complete and return the enclosed form of proxy to the Company's registered office, 31 Jinrong Street, Xicheng District, Beijing 100032, PRC as soon as practicable and in any event by not later than 24 hours before the time appointed for holding the EGM. Completion and return of the form of proxy will not preclude Shareholders from attending and voting in person at the EGM should they so wish.

5. PROCEDURES FOR DEMANDING A POLL BY SHAREHOLDERS

Pursuant to the Articles of Association, a general voting shall be made at the shareholders meeting by a show of hands. However, (i) the chairman of the meeting, (ii) at least two shareholders or proxies of such shareholders with voting rights, and (iii) one or more shareholders including proxy or proxies of such shareholders accounting individually or jointly 10% or more of the Company shares with voting right(s), shall have the right to request for a voting by poll before or after a voting by show of hands.

Issues concerning election of the chairman or suspension of a meeting shall be voted by poll. Other issues shall be voted by poll at the time to be decided by the chairman, and the meeting can go on with discussion of other matters. The result of such voting shall also be regarded as the resolution adopted at the meeting. A person who has made a request for voting by poll can withdraw it.

6. RECOMMENDATIONS

The Directors believe that the proposed appointment of the executive Directors and the Proposed Amendments to the Articles of Association are in the best interests of the Company and the Shareholders as a whole and recommend the Shareholders to vote in favour of the relevant resolutions to be proposed at the EGM.
