Table of Contents**CAPE FEAR BANK CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE A - BASIS OF PRESENTATION**

In management's opinion, the financial information, which is unaudited, reflects all adjustments (consisting solely of normal recurring adjustments) necessary for a fair presentation of the financial information as of and for the three and nine month periods ended September 30, 2006 and 2005 in conformity with accounting principles generally accepted in the United States of America. The financial statements include the accounts of Cape Fear Bank Corporation (the Company) and its wholly owned subsidiary, Cape Fear Bank (the Bank). All significant inter-company transactions and balances are eliminated in consolidation. Operating results for the three and nine month periods ended September 30, 2006 are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2006.

The organization and business of the Cape Fear Bank Corporation and subsidiary (the Company), accounting policies followed by the Company and other information are contained in the notes to the consolidated financial statements filed as part of the Company's 2005 annual report on Form 10-KSB. This quarterly report should be read in conjunction with such annual report.

NOTE B - COMMITMENTS

At September 30, 2006, loan commitments are as follows:

	(In thousands)
Undisbursed lines of credit	\$ 71,290
Commitments to extend credit	14,712
Letters of credit	1,073

NOTE C - NET INCOME PER COMMON SHARE

Basic and diluted net income per share has been computed based on the weighted average number of shares outstanding during each period after retroactively adjusting for a 5% stock dividend on June 30, 2006. Diluted net income per share reflects the potential dilution that could occur if outstanding stock options were exercised.

NOTE D - COMPREHENSIVE INCOME

A summary of comprehensive income is as follows:

CAPE FEAR BANK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE E - STOCK BASED COMPENSATION

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards No. 123R (revised 2004), Share-Based Payment, (SFAS No. 123R) which was issued by the FASB in December 2004. SFAS No. 123R revises SFAS No. 123 Accounting for Stock Based Compensation, and supersedes APB No. 25, Accounting for Stock Issued to Employees, (APB No. 25) and its related interpretations. SFAS No.123R requires recognition of the cost of employee services received in exchange for an award of equity instruments in the financial statements over the period the employee is required to perform the services in exchange for the award (presumptively the vesting period). SFAS No. 123R also requires measurement of the cost of employee services received in exchange for an award based on the grant-date fair value of the award. SFAS No. 123R also amends SFAS No. 95 Statement of Cash Flows, to require that excess tax benefits be reported as financing cash inflows, rather than as a reduction of taxes paid, which is included within operating cash flows.

The Company adopted SFAS No. 123R using the modified prospective application as permitted under SFAS No. 123R. Accordingly, prior period amounts have not been restated. Under this application, the Company is required to record compensation expense for all awards granted after the date of adoption and for the unvested portion of previously granted awards that remain outstanding at the date of adoption. Prior to the adoption of SFAS No. 123R, the Company used the intrinsic value method as prescribed by APB No. 25 and thus recognized no compensation expense for options granted with exercise prices equal to the fair market value of the Company's common stock on the date of grant.

The Company has two share-based compensation plans in effect at September 30, 2006. The compensation cost that has been charged against income for those plans was approximately \$30,000 and \$89,000 for the three and nine months ended September 30, 2006, respectively. There have been no deferred tax assets recorded due to the fact that stock based compensation expense results solely from incentive stock options.

During 1999 the Company adopted, with shareholder approval, an Employee Stock Option Plan (the Employee Plan) and a Director Stock Option Plan (the Director Plan). Each plan was amended as of June 17, 2005 with shareholder approval to increase the number of shares available for options to purchase shares of the Company's common stock. As of September 30, 2006, the Employee Plan authorized the Board of Directors to grant options for employees and officers of the Company to purchase up to 358,705 shares of the Company's common stock and the Director Plan authorized the Board of Directors to grant non-qualified options to directors to purchase up to 215,222 shares of the Company's common stock, for an aggregate number of common shares reserved for options of 573,927. Options granted under the 1999 Stock Option Plans have a term of up to ten years from the date of the grant. Vesting of options is determined at the time of the grant and ranges from immediate to five years. Options under these plans must be granted at a price not less than the fair market value at the date of the grant.

The fair market value of each option award is estimated on the date of grant using the Black-Scholes option pricing model. The risk-free interest rate is based upon a U.S. Treasury instrument with a life that is similar to the expected life of the option grant. Expected volatility is based upon the historical volatility of the Company based upon the previous three years trading history. The expected term of the options is based upon the average life of previously issued stock options. The expected dividend yield is based upon current yield on date of grant. No post-vesting restrictions exist for these options. No options were granted for the three and nine months ended September 30, 2006 and 163,406 options were granted for the same periods in 2005.

Table of Contents**CAPE FEAR BANK CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE E - STOCK BASED COMPENSATION (continued)**

A summary of option activity under the stock option plans as of September 30, 2006 and changes during the nine month period ended September 30, 2006 is presented below:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at December 31, 2005	414,568	\$ 7.71		
Exercised	(262)	3.97		
Authorized				
Forfeited	(1)	3.97		
Granted				
Outstanding at September 30, 2006	414,305	\$ 7.72	5.62 years	\$ 2,046,667
Exercisable at September 30, 2006	329,923	\$ 7.07	4.81 years	\$ 1,844,270

There were 262 options exercised during the three and nine months ended September 30, 2006. No options were exercised during the three months and 11,747 options exercised during the nine months ended September 30, 2005. There was a one-half fractional share (rounded to one share) forfeited in connection with the exercise of the 262 shares in the current period. The intrinsic value of options exercised for the three and nine months ended September 30, 2005 was approximately \$0 and \$20,000, respectively. For the three and nine months ended September 30, 2006, the intrinsic value of options exercised was approximately \$2,000 for both periods.

A summary of the status of the Company's non-vested stock options as of September 30, 2006, and changes during the nine months then ended is presented below:

	Shares	Weighted Average Fair Value	Grant Date
Non-vested - December 31, 2005	163,511	\$ 3.14	
Granted			
Vested	(79,129)	3.14	
Forfeited			
Non-vested - September 30, 2006	84,382	\$ 3.14	

There were 37,681 and 79,129 stock options vested during the three and nine months ended September 30, 2006. There were no stock options vested during the three month period and 485 stock options vested during the nine month period ended September 30, 2005. The fair value of stock options vested during the three and nine months ended September 30, 2006, were \$118,000 and \$248,000, respectively.

Table of Contents**CAPE FEAR BANK CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****NOTE E - STOCK BASED COMPENSATION (continued)**

For the three and nine month periods ended September 30, 2005, the fair value of stock options vested was \$0 and \$800, respectively.

As of September 30, 2006, there was \$242,000 of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under all of the Company's stock benefit plans. That cost is expected to be recognized over a weighted-average period of 2.11 years.

The Company funds the option shares from authorized but unissued shares. The Company does not typically purchase shares to fulfill the obligations of the stock benefit plans. The option plan requires option holders to exercise options with payment in cash.

The adoption of SFAS 123R and its fair value compensation cost recognition provisions are different from the non-recognition provisions under SFAS 123 and the intrinsic value method for compensation cost allowed under APB 25. The effect (increase/(decrease)) of the adoption of SFAS 123R is as follows (in thousands, except per share data):

	Three Months Ended September 30, 2006	Nine Months Ended September 30, 2006
Income before income tax expense	\$ (30)	\$ (89)
Net income	\$ (30)	\$ (89)
Cash flow from operating activities	\$ 30	\$ 89
Cash flow provided by financing activities		
Basic earnings per share	\$ (0.01)	\$ (0.02)
Diluted earnings per share	\$ (0.01)	\$ (0.02)

The following illustrates the effect on net income available to common stockholders if the Company had applied the fair value recognition provisions of SFAS No. 123 to the prior year quarter and nine months ended September 30, 2005 (in thousands, except per share data):

	Three Months Ended September 30, 2005	Nine Months Ended September 30, 2005
Net income, as reported	\$ 422	\$ 1,046
Less: Stock-based employee compensation expense determined under fair value based method of all awards, net of related income taxes	154	159
Proforma net income	\$ 268	\$ 887
Earnings per share - basic, as reported	\$ 0.12	\$ 0.29
Earnings per share - basic, pro forma	0.07	0.25
Earnings per share - diluted, as reported	0.11	0.29
Earnings per share - diluted, pro forma	0.07	0.24

Table of Contents

CAPE FEAR BANK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE F RECENT ACCOUNTING PRONOUNCEMENTS

SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* an amendment of SFAS No. 133 and 140 provides entities relief from the requirement to separately determine the fair value of an embedded derivative that would otherwise be bifurcated from the host contract under SFAS 133. This statement allows an irrevocable election on an instrument-by-instrument basis to measure such a hybrid financial instrument at fair value. This statement is effective for all financial instruments acquired or issued after the beginning of the fiscal years beginning after September 15, 2006. The Company has evaluated this statement and does not believe it will have a material effect on the Company's financial position, results of operations and cash flows.

SFAS No. 156, *Accounting for Servicing of Financial Assets* an amendment of SFAS No. 140 requires that all separately recognized servicing assets and liabilities be initially measured at fair value and permits (but does not require) subsequent measurement of servicing assets and liabilities at fair value. This statement is effective for fiscal years beginning after September 15, 2006. The Company has evaluated this statement and does not believe it will have a material effect on the Company's financial position, results of operations and cash flows.

In July 2006, the FASB issued Financial Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*-an interpretation of FASB Statement No. 109 (FIN 48), which is a change in accounting for income taxes. FIN 48 specifies how tax benefits for uncertain tax positions are to be recognized, measured, and derecognized in financial statements; requires certain disclosures of uncertain tax matters; specifies how reserves for uncertain tax positions should be classified on the balance sheet; and provides transition and interim period guidance, among other provisions. FIN 48 is effective for fiscal years beginning after December 15, 2006 and as a result, is effective for the Company in the first quarter of fiscal 2007. The Company is currently evaluating the impact of FIN 48 on its Consolidated Financial Statements

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (FAS 157). FAS 157 enhances existing guidance for measuring assets and liabilities using fair value. Prior to the issuance of FAS 157, guidance for applying fair value was incorporated in several accounting pronouncements. FAS 157 provides a single definition of fair value, together with a framework for measuring it, and requires additional disclosure about the use of fair value to measure assets and liabilities. FAS 157 also emphasizes that fair value is a market-based measurement, not an

Table of Contents

CAPE FEAR BANK CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE F RECENT ACCOUNTING PRONOUNCEMENTS (continued)

entity-specific measurement, and sets out a fair value hierarchy with the highest priority being quoted prices in active markets. Under FAS 157, fair value measurements are disclosed by level within that hierarchy. While FAS 157 does not add any new fair value measurements, it does change current practice. Changes to practice include: (1) a requirement for an entity to include its own credit standing in the measurement of its liabilities; (2) a modification of the transaction price presumption; (3) a prohibition on the use of block discounts when valuing large blocks of securities for broker-dealers and investment companies; and (4) a requirement to adjust the value of restricted stock for the effect of the restriction even if the restriction lapses within one year. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company has not determined the impact of adopting FAS 157 on its financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (an amendment of FASB Statements No. 87, 88, 106, and 132R)* (FAS 158), requires an employer to: (a) Recognize in its statement of financial position an asset for a plan's overfunded status or a liability for a plan's underfunded status; (b) measure a plan's assets and its obligations that determine its funded status as of the end of the employer's fiscal year (with limited exceptions); and (c) recognize changes in the funded status of a defined benefit postretirement plan in the year in which the changes occur. Those changes will be reported in comprehensive income of a business entity and in changes in net assets of a not-for-profit organization. The requirement by FAS 158 to recognize the funded status of a benefit plan and the disclosure requirements of FAS 158 are effective as of the end of the fiscal year ending after December 15, 2006 for entities with publicly traded equity securities. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year-end statement of financial position is effective for fiscal years ending after December 15, 2008. The Company does not expect the adoption of FAS 158 to have a material effect on its financial position at December 31, 2006.

In September 2006, the SEC staff issued SAB No. 108, *Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in the Current Year Financial Statements (SAB No. 108)*. SAB No. 108 addresses the diversity in practice by registrants when quantifying the effect of an error on the financial statements. SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements and is effective for annual periods ending after November 15, 2006. The Company will be required to adopt the provisions of SAB No. 108 effective December 31, 2006. We currently believe that the adoption of SAB No. 108 will not have a material financial impact on the Company's consolidated financial statements.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Management's discussion and analysis is intended to assist readers in the understanding and evaluation of the consolidated financial condition and results of operations of Cape Fear Bank Corporation (the "Company"). The analysis includes detailed discussions for each of the factors affecting the Company's operating results and financial condition for the periods ended September 30, 2006 and 2005. The following discussion should be read in conjunction with the Company's financial statements and the notes thereto located in this report and in the Bank's Annual Report on Form 10-KSB for the year ended December 31, 2005. Because the Company has no separate operations and conducts no business on its own other than owning Cape Fear Bank, the discussion contained in this Management's Discussion and Analysis concerns primarily the business of the Bank. However, for ease of reading and because the financial statements are presented on a consolidated basis, the Company and the Bank are collectively referred to herein as the Company unless otherwise noted. All significant intercompany transactions and balances are eliminated in consolidation.

Financial Condition at September 30, 2006 and December 31, 2005

During the first nine months of 2006, our total consolidated assets increased from \$343.3 million to \$423.2 million, an increase of \$79.9 million or 23.3%. This increase in assets resulted from an increase in deposits primarily related to branch expansion. Total customer deposits increased by \$76.7 million during the same nine-month period. In addition, long-term borrowings increased by \$1.0 million during the current period. Liquidity provided by this deposit growth and increased borrowings, combined with our net income for the nine-month period of \$1.6 million, provided for growth of \$10.8 million in interest-earning deposits in other banks plus time deposits in other banks, \$14.7 million in investment securities available for sale, and \$50.8 million in total loans receivable during the period. Our total shareholders' equity increased by \$1.8 million during the nine months, principally due to retention of net income of \$1.6 million earned during the period, \$89,000 from stock options valuation recognition, and an increase of \$113,000 in market value, net of taxes, of investment securities available for sale. Our regulatory capital was successfully maintained at well capitalized levels throughout the period.

Results of Operations for the Three Months Ended September 30, 2006 and 2005

Overview. The Company achieved net income of \$533,000 or \$0.14 per diluted share for the three months ended September 30, 2006 as compared with net income of \$422,000 or \$0.11 per diluted share for the third quarter of 2005. Comparing the two periods, net income increased by \$111,000 principally due to growth in interest earning assets. Earnings per share for the 2005 period have been restated to reflect the 5% stock dividend effective June 30, 2006.

Net Interest Income. Interest income increased by \$3.1 million when comparing the third quarters of 2006 and 2005, while interest expense increased by \$2.2 million, resulting in the increase in net interest income of \$882,000. This increase in the level of our net interest income resulted principally from the 44.0% increase in the level of our average interest earning assets offset by a 21 basis point decline, period to period, in our net interest margin to 3.33%. We experienced a 9 basis point decline in our net interest margin from the second quarter of 2006. The level of our average interest bearing liabilities experienced similar growth, increasing 48.6%. The increase in the level of our interest earning assets resulted primarily from our loan, interest earning deposits in other banks, and investment securities growth during the past year.

Provision for Loan Losses. The provision for loan losses was \$436,000 for the three months ended September 30, 2006 compared with a provision of \$355,000 for the three months ended September 30, 2005. The increase in the level of loan loss provision in the current period is due to management's

Table of Contents

recognition of the increased level of risk in the loan portfolio due to the Company's high concentration of construction and commercial real estate loans and a potential slow down in the real estate market. Also, the level of nonperforming assets was \$181,000 higher than at September 30, 2005. However, nonperforming loans as a percentage of total loans outstanding decreased from 0.30% at September 30, 2005 to 0.10% at September 30, 2006.

Non-Interest Income. Non-interest income increased to \$267,000 for the three months ended September 30, 2006 as compared with \$264,000 for the three months ended September 30, 2005. This increase in non-interest income resulted primarily from growth in correspondent loan fees in the current period.

Non-Interest Expenses. Non-interest expenses increased from \$1.7 million for the third quarter of 2005 to \$2.4 million for the third quarter of 2006, an increase of \$683,000. A large component of this increase was a \$295,000 increase in salaries and employee benefits attributed to the addition of 32 full-time equivalent employees during the past year. This increase in employees is related to our expansion initiatives started at the beginning of 2006 with the opening of two new full service branches in Pender and Brunswick counties completed during April 2006 along with expansion of our administrative support services. The current period salary expense also included \$30,000 associated with the newly implemented expensing of stock options in 2006. Occupancy and equipment costs increased by \$161,000 with the addition of the two new branches during the second quarter 2006, as well as \$33,000 of expense recorded for an adjustment in the accounting for operating leases. Other non-interest expense increased by \$227,000 from period to period, including increases of \$81,000 in advertising costs, \$54,000 in data processing and check processing costs and other expenses associated with opening the two new branches. Other increases were growth related changes.

Income Taxes. The Company recorded an income tax expense of \$231,000 for the three months ended September 30, 2006 compared to \$221,000 for the same period in 2005. The effective tax rate for the 2006 period was 30.2% versus 34.4% for the 2005 period. The lower effective tax rate for the 2006 period is primarily the result of an overall greater proportion of pre-tax income being comprised of non-taxable income earned on bank owned life insurance and municipal securities.

Results of Operations for the Nine Months Ended September 30, 2006 and 2005

Overview. The Company achieved net income of \$1.6 million or \$0.43 per diluted share for the nine months ended September 30, 2006 as compared with net income of \$1.0 million or \$0.29 per diluted share for the first nine months of 2005. Net income increased by \$563,000 comparing the two periods due primarily to growth in interest earning assets. Earnings per share for the 2005 period has been restated to reflect the 5% stock dividend effective June 30, 2006.

Net Interest Income. Interest income increased by \$9.3 million when comparing the first nine months of 2006 and 2005, while interest expense increased by \$6.2 million, resulting in the increase in net interest income of \$3.1 million. This increase in the level of our net interest income resulted principally from the 54.8% increase in the level of our average interest earning assets offset by a 16 basis point decline period to period in our net interest margin to 3.41%. The level of our average interest bearing liabilities experienced similar growth, increasing 60.8%. The increase in the level of our interest earning assets resulted primarily from our loan, interest earning deposits in other banks, and investment securities growth during the past year.

Provision for Loan Losses. A provision for loan losses of \$1.1 million was made for both the nine month periods ended September 30, 2006 and 2005. Due to our high concentration of construction and commercial real estate loans, we continue to expand our loan loss provision in preparation for a potential slow down in the economy. As a result, our provision for loan losses remained virtually the same from

Table of Contents

period to period. Our nonperforming loans declined as a percentage of our outstanding loan portfolio, from 0.30% at September 30, 2005 to 0.10% at September 30, 2006.

Non-Interest Income. Non-interest income increased to \$846,000 for the nine months ended September 30, 2006 as compared with \$758,000 for the nine months ended September 30, 2005, an increase of \$88,000. This increase is principally a result of \$91,000 of recovered expenses in the second quarter of 2006, related to a loan charged off in 2003 offset by a \$7,000 decline in net revenue from bank-owned life insurance. Other increases in non-interest income were due to growth related changes.

Non-Interest Expenses. Non-interest expenses increased from \$4.6 million for the first nine months of 2005 to \$6.8 million for the first nine months of 2006, an increase of \$2.2 million. A large component of this increase was a \$1.0 million increase in salaries and employee benefits attributed to the addition of 32 full-time equivalent employees during the past year. This increase in employees is related to our expansion initiatives started at the beginning of 2006 with the opening of two new full service branches in Pender and Brunswick counties completed during April 2006 along with expansion of our administrative support services. The increased salary expense also included an \$82,000 increase in the current period associated with supplemental retirement benefits and \$89,000 associated with the newly implemented expensing of stock options in 2006. Occupancy and equipment costs increased by \$423,000 with the addition of the two new branches during the current period, as well as \$98,000 of expense recorded for an adjustment in the accounting for operating leases. Other non-interest expenses increased \$785,000 from period to period. This increase, which is primarily related to the Company's branch expansion, includes \$185,000 in data processing and check processing costs, \$172,000 in advertising costs, \$56,000 in legal costs, and \$69,000 in consultant fees. Other increases in non-interest expenses were due to growth related changes.

Income Taxes. The Company recorded an income tax expense of \$901,000 for the nine months ended September 30, 2006 compared to \$515,000 for the same period in 2005. The effective tax rate for the 2006 period was 35.9% versus 33.0% for the 2005 period. The lower effective tax rate for the 2005 period is primarily the result of an overall greater proportion of pre-tax income being comprised of non-taxable income earned on bank owned life insurance.

Asset Quality

Maintaining a high level of asset quality is a primary goal in our lending function, and we employ a formal internal loan review process to ensure adherence to the lending policies approved by our Board of Directors. A systematic evaluation process fundamentally drives the function of determining the allowance for loan losses. This ongoing process serves as the basis for determining, on a monthly basis, the allowance for loan losses and any resulting provision to be charged against earnings. Consideration is given to historical loan loss experience, the value and adequacy of collateral, economic conditions in our market area and other factors. For loans determined to be impaired, the allowance is based on discounted cash flows using the loan's initial effective interest rate or the fair value of the collateral for certain collateral dependent loans. This evaluation is inherently subjective as it requires material estimates, including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. The allowance for loan losses represents management's estimate of the appropriate level of reserve to provide for probable losses inherent in the loan portfolio.

Our policy regarding past due loans requires a prompt charge-off to the allowance for loan losses following timely collection efforts and a thorough review. Further efforts are then pursued through various means available to recover charged off amounts. Loans carried in a non-accrual status are generally collateralized and probable losses are considered in the determination of the allowance for loan losses.

Table of Contents

Nonperforming Assets. The following table sets forth information with respect to our nonaccrual loans, restructured loans, total nonperforming loans (nonaccrual loans plus restructured loans), and total nonperforming assets.

	At September 30,	At December 31,	
	2006	2005	2004
	(Dollars in thousands)		
Nonaccrual loans	\$ 329	\$ 1,174	\$ 993
Restructured loans			
Total nonperforming loans	329	1,174	993
Real estate owned	616		195
Total nonperforming assets	\$ 945	\$ 1,174	\$ 1,188
Accruing loans past due 90 days or more	\$	\$	\$
Allowance for loan losses	4,305	3,510	2,106
Nonperforming loans to period end loans	0.10%	0.42%	0.61%
Allowance for loan losses to period end loans	1.31%	1.26%	1.30%
Allowance for loan losses to nonperforming loans	1308.51%	298.98%	212.08%
Nonperforming assets to total assets	0.22%	0.34%	0.59%

Our nonperforming loans decreased by \$845,000, or by approximately 72.0%, from December 31, 2005 to September 30, 2006 primarily due to the foreclosure of one commercial real estate loan for \$616,000 in August 2006. Based on our assessment of the property value, we do not expect any loss of principal related to this loan. The balance of the decrease in nonperforming loans resulted from the charge-off of \$290,000 in five commercial loan relationships during the current period. We charged off these loan relationships because we had doubts about recovery based on liquidation of non-real estate collateral unless the businesses were sold as an on-going concern. Subsequently, in April 2006, \$63,000 was recovered in full on one of those charged off loans. Another one of the charged off loans that totaled \$117,000 has a sale pending and we expect to recover in full on that loan as well. The amount of nonperforming loans as a percentage of our total loans declined from 0.42% to 0.10% during the same period. Approximately 51.7% of our nonperforming loans at September 30, 2006 consisted of one loan amounting to approximately \$170,000 which is secured by real estate. Based on our assessment of the property value, we expect to recover the balance on this loan.

Our financial statements are prepared on the accrual basis of accounting, including the recognition of interest income on our loan portfolio, unless a loan is placed on a nonaccrual basis. Loans are placed on a nonaccrual basis when they become 90 days past due or whenever we believe that collection has become doubtful. Amounts received on non-accrual loans generally are applied first to principal and then to interest only after all principal has been collected. Restructured loans are those for which concessions, including the reduction of interest rates below a rate otherwise available to that borrower or the deferral of interest or principal, have been granted due to the borrower's weakened financial condition. Interest on restructured loans is accrued at the restructured rates when it is anticipated that no loss of original principal will occur. Loans are charged off when the collection of principal and interest has become doubtful and the loans no longer can be considered sound collectible assets (or, in the case of unsecured loans, when they become 90 days past due).

Interest on nonaccrual loans foregone was approximately \$105,000 and \$58,000 for the nine months ended September 30, 2006 and 2005, respectively, and \$76,000 for the year ended December 31, 2005.

Table of Contents

Allowance for Loan Losses. The allowance for loan losses is maintained at a level considered adequate by management to provide for probable loan losses based on management's assessment of various factors affecting the loan portfolio, including a review of problem loans, business conditions and loss experience and an overall evaluation of the quality of the underlying collateral. The allowance is increased by provisions charged to operations and reduced by loans charged off, net of recoveries.

While management believes that it uses the best information available to determine the allowance for loan losses, unforeseen market conditions could result in adjustments to the allowance for loan losses, and net income could be significantly affected, if circumstances differ substantially from the assumptions used in making the final determination. In addition, various regulatory agencies may require us to make adjustments to the allowance for loan losses based on their judgments about information available to them at the time of their examination. The following table shows the allocation of our allowance for loan losses at the dates indicated. The allocation is based on an evaluation of inherent loan risk, historical ratios of loan losses and other factors that may affect future loan losses in the categories of loans shown.

	At September 30, 2006		At December 31, 2005		2004	
	Amount	% of total loans (1)	Amount	% of total loans (1)	Amount	% of total loans (1)

Liquidity and Capital Resources

Our sources of funds are customer deposits, cash and demand balances due from other banks, interest-earning deposits in other banks, investment securities available for sale, brokered time deposits and borrowings from the Federal Home Loan Bank and other correspondent banks. These funds, together with loan repayments, are used to make loans and to fund continuing operations. In addition, at September 30, 2006, we had credit availability with the Federal Home Loan Bank of Atlanta (FHLB) of approximately \$63.4 million and credit lines with various financial institutions in the amount of \$11.6 million. We had \$23.0 million in borrowings outstanding under these credit facilities at September 30, 2006. In addition, the Company had \$10.3 million in subordinated long-term debt payable to its unconsolidated subsidiary, BKWW Statutory Trust I (the Trust) in connection with the Trust's issuance of trust preferred securities in October 2005. Total deposits were \$360.8 million and \$284.1

Table of Contents

million at September 30, 2006 and December 31, 2005, respectively. Because loan demand has exceeded the rate of growth in core deposits, we have relied heavily on time deposits as a source of funds. Certificates of deposit are the only deposit accounts that have stated maturity dates, and those deposits are generally considered to be rate sensitive. At September 30, 2006 and December 31, 2005, time deposits represented 75.4% and 77.5%, respectively, of total deposits. Certificates of deposit of \$100,000 or more represented 37.0% and 33.8% of total deposits at September 30, 2006 and December 31, 2005, respectively. The Bank advertises its certificate of deposit rates on the Internet, and we also obtain time deposits through deposit brokers. On September 30, 2006, those out-of-market deposits amounted to \$112.1 million, or approximately 31.1% of total deposits and approximately 41.2% of total certificates of deposit. With the exception of these out-of-market deposits, management believes most of our other time deposits are relationship-oriented, but it will be necessary to pay competitive rates to retain those deposits at their maturities. Brokered deposits represent a source of fixed rate funds priced competitively with Federal Home Loan Bank borrowings but do not require collateralization like Federal Home Loan Bank borrowings. Based upon prior experience, management anticipates that a substantial portion of our outstanding certificates of deposit, including out-of-market deposits, will renew upon maturity.

Management anticipates that we will rely primarily upon customer deposits, loan repayments and current earnings to provide liquidity, and will use funds thus generated to make loans and to purchase securities, primarily securities issued by the federal government and its agencies, mortgage-backed securities, and municipal bonds. As of September 30, 2006, liquid assets (cash and due from banks, interest-earning bank deposits, time deposits in other banks and investment securities available for sale) were approximately \$83.1 million, which represented 19.6% of total assets and 23.0% of total deposits. At September 30, 2006, outstanding commitments to extend credit were \$14.7 million and available line of credit balances totaled \$71.2 million. Management believes that the combined aggregate liquidity position of the Company is sufficient to meet the funding requirements of loan demand and deposit maturities and withdrawals in the near term.

We are subject to minimum capital requirements. The following table indicates the Company's capital ratios at September 30, 2006. All capital ratios place the Company and the Bank in excess of the minimum necessary to be deemed "well capitalized" under regulatory guidelines.

	Actual Ratio	At September 30, 2006 Minimum Requirement	Well Capitalized Requirement
Total risk-based capital ratio	11.77%	8.0%	10.0%
Tier 1 risk-based capital ratio	10.24%	4.0%	6.0%
Leverage ratio	8.80%	4.0%	5.0%

Forward-Looking Information

Statements in this Report relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, expectations or beliefs about future events or results, and other statements that are not descriptions of historical facts, may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in reports we file with the U. S. Securities and Exchange Commission from time to time. Forward-looking statements may be identified by terms such as may, will, should, could, expects, plans, intends, anticipates, believes, estimates, predicts, for, continue, or similar terms or the negative of these terms, or other statements concerning opinions or

Table of Contents

judgments of our management about future events. Factors that could influence the accuracy of those forward-looking statements include, but are not limited to, the financial success or changing strategies of our customers; customer acceptance of our services, products and fee structure; the competitive nature of the financial services industry and our ability to compete effectively against other financial institutions in our banking market; actions of government regulators; our ability to manage our growth and to underwrite increasing volumes of loans; the impact on our profits of increased staffing and expenses resulting from expansion; the level of market interest rates and our ability to manage our interest rate risk; weather and similar conditions, particularly the effect of hurricanes on our banking and operations facilities and on our customers and the coastal communities in which we do business; changes in general economic conditions and the real estate market in our banking market (particularly changes that affect our loan portfolio, the abilities of our borrowers to repay their loans, and the values of loan collateral); and other developments or changes in our business that we do not expect. Although our management believes that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. The Company has no obligation to update these forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk reflects the risk of economic loss resulting from adverse changes in market price and interest rates. This risk of loss can be reflected in diminished current market values and/or reduced potential net interest income in future periods. The Company's market risk arises primarily from interest rate risk inherent in its lending and deposit-taking activities. Interest rate risk is the result of differing maturities or repricing intervals of interest-earning assets and interest-bearing liabilities and the fact that rates on these financial instruments do not change uniformly. These changes can have a direct impact on the Company's overall earnings. The current structure of the Company's loan and deposit portfolios is such that a significant decline in interest rates may have an adverse impact on net market values and net interest income. The Company does not maintain a trading account, nor is the Company subject to currency exchange risk or commodity price risk.

Management of the Company actively monitors interest rate risk through the development of and adherence to the Company's asset/liability management policy. The Company also has established an Asset Liability Management Committee (ALCO) which monitors interest rate risk exposure, liquidity and funding strategies to ensure that their potential impact is within approved guidelines.

Item 4. Controls and Procedures

An evaluation of the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report has been performed by the Company's management, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer. Based on that evaluation, the Company's management, including the Chief Executive Officer and Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

In connection with the above evaluation of the effectiveness of the Company's disclosure controls and procedures, no change in the Company's internal control over financial reporting was identified that occurred during the period covered by this report and that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
