Overseas, revenues were down 14% to 6,523 million yen compared to 7,577 million yen in the same period of the previous fiscal year due primarily to the lower level of operating assets as a result of the sale of a business unit in the third quarter of the previous fiscal year.

In Japan, revenues were up 10% to 51,542 million yen compared to 46,798 million yen in the same period of the previous fiscal year due to an expansion in real estate and automobile operating leases in addition to an increase in revenues from the precision measuring and other equipment rental operations. Overseas, revenues were up 24% to 19,174 million yen compared to 15,507 million yen in the same period of the previous fiscal year due to the expansion of automobile operating leases in the Asia, Oceania and Europe segment, despite a decrease in revenues from gains on sales of operating lease assets.

- Note:** 1. The results of the reported segments from the first quarter of this fiscal year reflect the revised business classification of the Company. Accordingly, leasing operations of the affiliates, which had been included in the Other segment, have been included in the Corporate Financial Services segment from the first quarter of this fiscal year. Therefore, certain related amounts that had been previously reported are reclassified.
2. Since the Company evaluates the performance of its segments based on profits before income taxes, tax expenses are not included in segment profits. In addition, results of discontinued operations are included in Segment Revenues and Segment Profits of each segment, if any.
