NOTES TO UNAUDITED CONDENSED CONSOLIDATED STATEMENTS

(in thousands, except per share amounts)

1. Summary of Significant Accounting Policies

Basis of Presentation

The condensed consolidated financial statements for the three and six months ended October 31, 2007 and 2006 include the accounts of Korn/Ferry International and all of its wholly and majority owned/controlled domestic and international subsidiaries (collectively, the Company). The condensed consolidated financial statements are unaudited, but include all adjustments, consisting of normal recurring accruals and any other adjustments that management considers necessary for a fair presentation of the results for these periods. These financial statements have been prepared consistently with the accounting policies described in the Company's Annual Report on Form 10-K for the fiscal year ended April 30, 2007 (the Annual Report) and should be read together with the Annual Report.

Critical Accounting Policies and Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. As a result, actual results could differ from these estimates. The most significant areas that require management judgment are revenue recognition, deferred compensation and the carrying values of goodwill, other intangible assets and deferred income taxes.

Cash and Cash Equivalents

The Company considers cash equivalents to be only those investments which are highly liquid, readily convertible and mature within three months from the date of purchase.

Available-for-Sale Securities

The Company considers its marketable securities as available-for-sale as defined in SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. These investments are recorded at fair value and are classified as marketable securities in the accompanying consolidated balance sheets as of October 31, 2007 and April 30, 2007. The changes in fair values, net of applicable taxes, are recorded as unrealized gains (losses) as a component of accumulated other comprehensive income in stockholders' equity. Investments are made based on the Company's investment policy which restricts the types of investments that can be made.

As of October 31, 2007 and April 30, 2007, the Company's marketable securities included \$52.5 million and \$35.2 million, respectively, held in trust for settlement of the Company's obligations under its Executive Capital Accumulation Plan (ECAP). See additional discussion in Footnote 4, Deferred Compensation, Retirement Plans and Executive Capital Accumulation Plan.

A portion of our marketable securities consist of auction rate securities. These investments, which have original maturities beyond one year, are classified as current in the accompanying balance sheets based on their highly liquid nature and because these securities represent the investment of cash that is available for current operations. As of October 31, 2007, we concluded that it was appropriate to classify certain of our investments previously classified as cash and cash equivalents as marketable securities. To conform to the current period presentation, we have reclassified \$56.6 million from cash and cash equivalents to marketable securities as of April 30, 2007.

Stock-Based Compensation

The Company has employee compensation plans under which various types of stock-based instruments are granted. These instruments, as more fully described below, principally include stock options, stock appreciation rights (SARs), restricted stock, and an Employee Stock Purchase Plan (ESPP). The Company accounts for stock-based instruments in accordance with Statement of Financial Accounting Standards No. 123(R), Share-Based Payment (SFAS No. 123(R)).

Table of Contents**KORN/FERRY INTERNATIONAL AND SUBSIDIARIES****NOTES TO UNAUDITED CONDENSED CONSOLIDATED STATEMENTS (Continued)****(in thousands, except per share amounts)**

The following table reflects the components of stock-based compensation expense recognized in the Company's condensed consolidated statements of income for the three and six months ended October 31, 2007 and 2006:

	Three Months Ended		Six Months Ended	
	October 31, 2007	October 31, 2006	October 31, 2007	October 31, 2006

Total stock-based compensation expense, pre-tax	4,255	3,718	8,140	6,680
Tax benefit from stock-based compensation expense	(1,553)	(1,403)	(2,971)	(2,627)
Total stock-based compensation expense, net of tax	\$ 2,702	\$ 2,315	\$ 5,169	\$ 4,053

The Company uses the Black-Scholes option valuation model to estimate the grant date fair value of employee stock options. The expected volatility reflects the consideration of the historical volatility in the Company's publicly traded instruments during the period the option is granted. The Company believes historical volatility in these instruments is more indicative of expected future volatility than the implied volatility in the price of the Company's common stock. The expected life of the option is estimated using historical data to estimate the expected life of the options. The risk-free interest rate is based on the U.S. Treasury zero-coupon issue with a remaining term approximating the expected term of the options. The Company uses historical data to estimate forfeiture rates applied to the gross amount of expense determined using the option valuation model. The assumptions used to estimate the fair value of the stock options using the Black-Scholes option valuation model were as follows for the six months ended October 31, 2007 and 2006:

	Six Months Ended	
	October 31, 2007	October 31, 2006
Expected volatility	44.42%	48.05%
Risk-free interest rate	4.60%	4.95%
Expected option life (in years)	4.00	4.00
Expected dividend yield	0.0%	0.0%

The Black-Scholes option pricing model was developed for use in estimating the fair value of traded options. The assumptions used in option valuation models are highly subjective, particularly the expected stock price volatility of the underlying stock.

Stock Option Plans

The Company's employee stock option plans provide for option grants designated as either nonqualified, incentive stock options or SARs. Options granted to officers, non-employee directors and other key employees generally vest over a three to five year period, and generally expire ten years from the date of grant. Key employees are eligible to receive a grant of stock options annually with the number of options determined by the employee's performance level. In addition, certain key management periodically receives stock option or restricted stock grants upon commencement of employment.

Restricted Stock

The Company grants restricted stock to executive officers and other senior employees generally vesting over a three to four year period. Restricted stock is granted at a price equal to the fair market value of the common stock on the date of grant. Employees may receive restricted stock annually in conjunction with the Company's performance review as well as throughout the year upon commencement of employment. The fair values of restricted stock shares are determined based on the closing price of the Company's common stock on the grant dates.

Information regarding our restricted stock during the six months ended October 31, 2007 is as follows:

	Shares (in thousands)	Weighted- average grant date fair value
Nonvested shares		
Nonvested at April 30, 2007	1,356	\$ 19.26

Forfeited	(11)	23.38
Nonvested at October 31, 2007	1,957	\$ 22.37

As of October 31, 2007, there was \$38,251 of total unrecognized compensation cost related to nonvested awards of shares of restricted stock. That cost is expected to be recognized over a weighted-average period of 3 years. For restricted stock awards subject to graded vesting, the Company recognizes the total compensation cost on a straight-line basis over the service period for the entire award. In the three and six months ended October 31, 2007, four and 158 restricted stock shares totaling \$60 and \$4,145, respectively, were repurchased by the Company at the option of the employee to pay for taxes on restricted stock shares vesting in the periods. In the three and six months ended October 31, 2006, two and 70 restricted shares totaling \$53 and \$1,381, respectively, were repurchased to pay for taxes on restricted stock shares vesting in the periods.

Employee Stock Purchase Plan

In October 2003, the Company implemented an ESPP that, in accordance with Section 423 of the Internal Revenue Code, allows eligible employees to authorize payroll deductions of up to 15% of their salary to purchase shares of the Company's common stock at 85% of the fair market price of the common stock on the last day of the enrollment period. The maximum number of shares of common stock reserved for ESPP issuance is 1,500, subject to adjustment for certain changes in the Company's capital structure and other extraordinary events. During the six months ended October 31, 2007 and 2006, employees purchased 73 shares at \$22.32 per share, and 85 shares at \$16.65 per share, respectively. At October 31, 2007, the plan had approximately 800 shares available for future issuance.

Common Stock

The Company issued approximately 102 and 986 common shares as a result of the exercise of stock options and 73 common shares in conjunction with the Company's ESPP in the three and six months ended October 31, 2007, respectively. The Company issued approximately 729 and 1,095 common shares as a result of the exercise of stock options and 85 common shares in conjunction with the Company's ESPP in the three and six months ended October 31, 2006, respectively.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation.

New Accounting Standards

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). The Company adopted FIN 48 as of May 1, 2007. FIN 48 clarifies the accounting for income taxes by prescribing a minimum threshold for benefit recognition of a tax position for financial reporting purposes. FIN 48 also establishes tax accounting rules for measurement, classification, interest and penalties, disclosure and interim period accounting. As a result of the adoption of FIN 48, the Company recorded a cumulative effect adjustment which reduced retained earnings by \$3,500. As of October 31, 2007, the Company had gross unrecognized benefits of \$10,700, which would impact the effective tax rate if recognized. Interest and penalties related to income tax matters are recorded to income tax expense. As of October 31, 2007, the Company accrued interest related to FIN 48 of \$300. The Company's Federal and state tax return filings remain subject to examination until 2010 and 2011, respectively.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS No. 157). This statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. The statement emphasizes that fair value is a market-based measurement, not an entity-specific measurement and establishes a fair value hierarchy. This statement also clarifies how the assumptions of risk and the effect of restrictions on sales or use of an asset effect the valuation. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Early adoption is permitted. The Company is assessing the impact this statement will have on its results of operations and financial position.

In February, 2007, FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159) including an amendment of SFAS No. 115. This statement provides companies with an option to report selected financial assets and liabilities at fair value. This statement is effective for fiscal years beginning after November 15, 2007, with early adoption permitted. The Company is assessing the impact this statement will have on its results of operations and financial position.

2. Basic and Diluted Earnings Per Share

Basic earnings per common share (basic EPS) was computed by dividing net income by the weighted average number of common shares outstanding. Diluted earnings per common share (diluted EPS) reflects the potential dilution that would occur if all in-the-money outstanding options or other contracts to issue common stock were exercised or converted and was computed by dividing adjusted net income, after assumed conversion of subordinated notes and preferred stock, by the weighted average number of common shares outstanding plus dilutive common equivalent shares. The following is a reconciliation of the numerator and denominator used in the computation of basic and diluted EPS:

Assumed exercises or conversions have been excluded in computing the diluted EPS when their inclusion would be anti-dilutive.

3. Comprehensive Income

Comprehensive income is comprised of net income and all changes to stockholders' equity, except those changes resulting from investments by owners (changes in paid in capital) and distributions to owners (dividends).

Total comprehensive income is as follows:

Executive Summary

Korn/Ferry International and all of its wholly and majority owned/controlled domestic and international subsidiaries (collectively, the Company, or in the first person, we, us and our) is a premier provider of talent management solutions. We are the largest provider of executive recruitment, outsourced recruiting and leadership development solutions with the broadest global presence in the recruitment industry. Our services include executive recruitment, middle-management recruitment and outsourced recruitment (through Futurestep), leadership development solutions and executive coaching. Over half of the executive recruitment engagements we performed in the last fiscal year were for board level, chief executive or other senior executive and general management positions. Our 4,742 clients in the last fiscal year included approximately 43% of the FORTUNE 500 companies. We have established strong client loyalty; more than 84% of the executive recruitment assignments we performed during the previous three fiscal years were on behalf of clients for whom we had conducted multiple assignments.

In an effort to maintain our long-term strategy of being the leading provider of executive recruitment, middle-management recruitment, outsourced recruiting and leadership development solutions, our strategic focus for fiscal 2008 will center upon increasing market share and further enhancing the cross-selling of our multi-product strategy. We will continue to address areas of increasing client demand, including Recruitment Process Outsourcing (RPO) and Leadership Development Solutions (LDS). We will explore new products and services, continue to pursue a disciplined acquisition strategy, enhance our technology and processes and aggressively leverage our brand through thought leadership and intellectual capital projects as a means of delivering world-class service to our clients.

Fee revenue increased 26% in the second quarter of fiscal year 2008 to \$195.9 million compared to the prior year's second quarter with increases in all regions. The North America and Europe, the Middle East, and Africa (EMEA) regions experienced the largest dollar increases in fee revenue. In the second quarter of fiscal 2008, we earned an operating profit of \$25.4 million with operating income from executive recruitment of \$33.0 million and \$1.5 million from Futurestep, offset by corporate expenses of \$9.1 million. This represents an increase of 20% over the prior year's quarterly operating income of \$21.1 million.

We had no long-term debt or outstanding balance under our credit facility at October 31, 2007. Our working capital increased \$6.8 million in the first six months of fiscal year 2008 to \$242.1 million at October 31, 2007.

Critical Accounting Policies

The following discussion and analysis of our financial condition and operating results are based on our unaudited condensed consolidated financial statements. Preparation of this quarterly report on Form 10-Q requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, disclosure of contingent assets and liabilities at the date of our financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results may differ from those

Table of Contents

estimates and assumptions. In preparing our interim financial statements and accounting for the underlying transactions and balances, we apply our accounting policies as disclosed in our Notes to Unaudited Condensed Consolidated Financial Statements. We consider the policies related to revenue recognition, deferred compensation and the carrying values of goodwill, intangible assets and deferred income taxes as critical to an understanding of our interim consolidated financial statements because their application places the most significant demands on management's judgment. Specific risks for these critical accounting policies are described in our Fiscal 2007 Annual Report on Form 10-K.

Of the total increase in fee revenue, North America experienced the largest increase in fee revenue of \$2.6 million, or 34%, to \$10.3 million related to growth from Canada and the United States. Asia fee revenue increased \$1.9 million, or 37%, to

Table of Contents

\$7.1 million reflecting increased revenue from areas including RPO and individual searches. Exchange rates unfavorably impacted Futurestep compensation and benefits expense by \$1.1 million. Futurestep compensation and benefits expense, as a percentage of fee revenue, increased to 70% from 65% in the same period last year.

Executive recruitment general and administrative expenses increased \$3.8 million, or 18%, from \$21.1 million in the second quarter of fiscal year 2007 to \$24.9 million in the second quarter of current fiscal year. The increase was driven by increases in premise and office expense of \$1.7 million, \$1.1 million in business development expenses, \$0.6 million in bad debt expense, and \$0.3 million in realized foreign exchange losses. Increased premise and office expense was attributable to all regions due to increased rent expense, total space leased and associated utility costs. Business development increased primarily due to the growth in the business. Bad debt expense increased in relation to increase in the level of business and corresponding increase in revenues and accounts receivable balances. Executive recruitment general and administrative expenses, as a percentage of fee revenue, decreased to 15% in current quarter from 16% in the same period in prior year.

Futurestep general and administrative expenses increased \$1.3 million, or 30%, to \$5.7 million primarily due to an increase in premise and office expense of \$0.4 million, and bad debt expenses of \$0.5 million. Futurestep general and administrative expenses, as a percentage of fee revenue, remained constant at 21% in the current quarter as in the comparable period in prior year.

Corporate general and administrative expenses increased \$0.8 million, or 30%, to \$3.6 million primarily due to increased professional fees, travel and meetings and premise and office expenses related to additional office space.

The increase in depreciation expenses is attributable to an increase in fixed asset balances primarily associated with furniture and fixtures and leasehold improvements related to business expansion, office buildout and amortization of software costs that added new functionality in our corporate and executive search segments.

The decrease is primarily a result of interest expense on convertible securities in the three months ended October 31, 2006 that was not present in the three months ended October 31, 2007 as the securities were converted into shares of the Company's common stock in the fourth quarter of fiscal year 2007.

The provision for income taxes in the current quarter reflects a 38% effective tax rate. The provision for income taxes for the same period in prior year reflects a 37% effective tax rate. The increase from the comparable quarter last year is a result of decreases in net operating losses that can be utilized in the current fiscal year and increases in reserves for planned cash repatriations from subsidiaries.

Equity in Earnings of Unconsolidated Subsidiaries. Equity in earnings of unconsolidated subsidiaries is comprised of our less than 50% interest in our Mexican subsidiaries. Of the total increase in fee revenue, North America experienced the largest increase in fee revenue of \$4.2 million, or 27%, to \$19.6 million related to growth from Canada and the United States. Asia fee revenue increased \$3.7 million, or 37%, to \$13.6 million reflecting increased revenue from areas including RPO and individual searches. The increase was driven by increases in premise and office expense of \$3.9 million, \$2.2 million in business development expenses, \$1.8 million in bad debt expense and \$1.0 million in realized foreign exchange losses. Increased premise and office expense was attributable to all regions due to increased rent expense, total space leased and associated utility costs. Business development increased primarily due to the growth in the business. Bad debt expense increased in relation to an increase in the level of business and corresponding increase in revenues and accounts receivable balances. Executive recruitment general and administrative expenses, as a percentage of fee revenue, declined to 14% in current year from 15% in the same period in the prior year.

Depreciation expense relates mainly to computer equipment, software, furniture and leasehold improvements. The increase in depreciation expenses is attributable to an increase in fixed asset balances primarily associated with furniture and fixtures and leasehold improvements related to business expansion, office build-out and amortization of software costs that added new functionality in our corporate and executive search segments.

Equity in Earnings of Unconsolidated Subsidiaries. Equity in earnings of unconsolidated subsidiaries is comprised of our less than 50% interest in our Mexican subsidiaries. We report our interest in earnings or loss of our Mexican subsidiaries on the equity basis as a one-line adjustment to net income, net of taxes. Equity in earnings was \$1.8 million in the six months ended October 31, 2007 and October 31, 2006.

Liquidity and Capital Resources

We believe that cash on hand, borrowings available under our credit facility and funds from operations will be sufficient to meet our anticipated working capital, debt service requirements, capital expenditures and general corporate requirements. However, adverse changes in our revenue could require us to cut costs and/or obtain financing to meet our cash needs. We are not aware of any trends, demands or commitments that would materially affect liquidity or those that relate to our resources.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements and have not entered into any transactions involving unconsolidated, limited purpose entities.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

As a result of our global operating activities, we are exposed to certain market risks, including foreign currency exchange fluctuations and fluctuations in interest. We manage our exposure to these risks in the normal course of our business as described below. We have not utilized financial instruments for trading, hedging or other speculative purposes nor do we trade in derivative financial instruments.

Foreign Currency Risk

Substantially all our foreign subsidiaries' operations are measured in their local currencies. Assets and liabilities are translated into U.S. dollars at the rates of exchange in effect at the end of each reporting period and revenue and expenses are translated at average rates of exchange during the reporting period. Resulting translation adjustments are reported as a component of comprehensive income on our consolidated Statement of Stockholders' Equity and accumulated other comprehensive income on our consolidated Balance Sheets.

Transactions denominated in a currency other than the reporting entity's functional currency may give rise to transaction gains and losses that impact our results of operations. Historically, we have not realized significant foreign currency gains or losses on such transactions. In the three and six months ended October 31, 2007, we recognized foreign currency losses, after income taxes, of \$0.3 million and \$0.6 million, respectively, primarily related to our North America operations.

Our primary exposure to exchange losses is based on outstanding intercompany loan balances denominated in U.S. dollars. If the U.S. dollar strengthened 15%, 25% and 35% against the Pound Sterling, the Euro, the Canadian dollar, the Australian dollar and the Yen, our exchange loss would have been \$2.0 million, \$3.3 million and \$4.6 million, respectively, based on outstanding balances at October 31, 2007. If the U.S. dollar weakened by the same increments against the Pound Sterling, the Euro, the Canadian dollar, the Australian dollar and the Yen, our exchange gain would have been \$2.0 million, \$3.3 million and \$4.6 million, respectively, based on outstanding balances at October 31, 2007.

Interest Rate Risk

We primarily manage our exposure to fluctuations in interest rates through our regular financing activities, which generally are short-term and provide for variable market rates. As of October 31, 2007, we had no outstanding balance on our credit facility. We have \$60.4 million of borrowings against the cash surrender value of COLI contracts as of October 31, 2007 bearing interest primarily at variable rates. The risk of fluctuations in these variable rates is minimized by the fact that we receive a corresponding adjustment to our borrowed funds crediting rate on the cash surrender value on our COLI contracts.
