Hitachi took into account the valuation results received from Nomura Securities using each method in its Valuation Report as reference and comprehensively considered examples of premiums added as of determining tender offer prices in past examples of tender offers for shares by entities other than issuers; whether the Board of Directors of Hitachi Plant Technologies would accept the Tender Offer; the market share price trend of Hitachi Plant Technologies' common stock; the expected number of subscriptions to the Tender Offer; and other factors. Furthermore, taking into account the results of consultations and negotiations with Hitachi Plant Technologies, the final Tender Offer Price was determined at ¥610 per share of common stock by Hitachi's President and Chief Executive Officer today.

The Tender Offer Price per share of ¥610 represents a premium of 29.8% (rounded to the first decimal place) on the closing price of ¥470 of common stock of Hitachi Plant Technologies on the First Section of the Tokyo Stock Exchange on July 24, 2009 (Note 1). It also represents a premium of 32.3% (rounded to the first decimal place) on the simple average of ¥461 (rounded to the nearest yen) of the closing share prices of common stock of Hitachi Plant Technologies for the past one month (from June 25 to July 24, 2009), a premium of 33.2% (rounded to the first decimal place) on the simple average of ¥458 (rounded to the nearest yen) of the closing share prices of common stock of Hitachi Plant Technologies for the past three months (from April 27 to July 24, 2009), and a premium of 62.2% (rounded to the first decimal place) on the simple average of ¥376 (rounded to the nearest yen) of the closing share prices of common stock of Hitachi Plant Technologies for the past six months (from January 26 to July 24, 2009) (Note 2).

Notes:

1. The stock price of Hitachi Plant Technologies rose following a news report regarding the business restructuring of the Hitachi Group on July 27, 2009, which is the day before the day when the aforementioned decision was made by Hitachi's President and Chief Executive Officer. Considering this rise in the stock price, the premium was calculated using the stock price on July 24, 2009, a business day before July 27, 2009. The calculations of the respective premiums on the simple average of the closing share prices of common stock for the past one month, for the past three months and for the past six months were made in the same manner.
2. The stock price of Hitachi Plant Technologies rose and continued to move at prices near the Tender Offer Price until today following the aforementioned news report regarding the business restructuring of the Hitachi Group on July 27, 2009, and the subsequent public announcement concerning the Tender Offer by Hitachi on July 28, 2009. Consequently, the Tender Offer Price per share of ¥610 represents a premium of 0.7% (rounded to the first decimal place) on the closing share price of ¥606 of the common stock of Hitachi Plant Technologies on the First Section of the Tokyo Stock Exchange today. It also represents a premium of 5.4% (rounded to the first decimal place) on the simple average of ¥579 (rounded to the nearest yen) of the closing share prices of the common stock of Hitachi Plant Technologies for the past one month (from July 21 to August 19, 2009), a premium of 20.3% (rounded to the first decimal place) on the simple average of ¥507 (rounded to the nearest yen) of the closing share prices of the common stock of Hitachi Plant Technologies for the past three months (from May 20 to August 19, 2009), and a premium of 45.2% (rounded to the first decimal place) on the simple average of ¥420 (rounded to the nearest yen) of the closing share prices of the common stock of Hitachi Plant Technologies for the past six months (from February 20 to August 19, 2009).

Furthermore, as for adhesive tapes and adhesion technology in Hitachi Maxell's Functional Materials & Components business, further reinforcement of competitiveness can be expected in the automobile and electronics fields developed by the Hitachi Group. In the medical field as well, synergies and the exploration of new markets can be expected, with such medical equipment as blood measurement devices and biomaterials and components such as bio-beads for DNA analysis. In addition, by optimizing the Maxell brand and sales channel that Hitachi Maxell has nurtured worldwide, significant reinforcement of Hitachi's consumer products sales capability can be expected.
