Table of Contents**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)****Note 1 Summary of Significant Accounting Policies**

The accounting and financial reporting policies of Umpqua Holdings Corporation (referred to in this report as *we*, *our* or *the Company*) conform to accounting principles generally accepted in the United States of America. The accompanying interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, Umpqua Bank (*Bank*), and Umpqua Investments, Inc. (*Umpqua Investments*). Prior to July 2009, Umpqua Investments was known as Strand, Atkinson, Williams & York, Inc. All material inter-company balances and transactions have been eliminated. The consolidated financial statements have not been audited. A more detailed description of our accounting policies is included in the 2009 Annual Report filed on Form 10-K. These interim condensed consolidated financial statements should be read in conjunction with the financial statements and related notes contained in the 2009 Annual Report filed on Form 10-K.

In preparing these financial statements, the Company has evaluated events and transactions subsequent to March 31, 2010 for potential recognition or disclosure. In management's opinion, all accounting adjustments necessary to accurately reflect the financial position and results of operations on the accompanying financial statements have been made. These adjustments include normal and recurring accruals considered necessary for a fair and accurate presentation. The results for interim periods are not necessarily indicative of results for the full year or any other interim period. Certain reclassifications of prior period amounts have been made to conform to current classifications.

Note 2 Business Combinations

On January 22, 2010, the Washington Department of Financial Institutions closed EvergreenBank (*Evergreen*), Seattle, Washington and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver. That same date, Umpqua Bank assumed the banking operations of Evergreen from the FDIC under a whole bank purchase and assumption agreement with loss sharing. Under the terms of the loss sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (*OREO*) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$90 million on covered assets for Evergreen and absorb 95% of losses and share in 95% of loss recoveries exceeding \$90 million, except for the Bank will incur losses up to \$30.2 million before the loss-sharing will commence. The loss sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition date. With this agreement, Umpqua Bank now operates seven additional store locations in the greater Seattle, Washington market. This acquisition is consistent with our community banking expansion strategy and provides further opportunity to fill in our market presence in the greater Seattle, Washington market.

The operations of Evergreen are included in our operating results from January 23, 2010, and added revenue of \$11.7 million, non-interest expense of \$2.5 million, and net earnings of \$6.0 million for the first quarter of 2010. Such operating results include a bargain purchase gain of \$8.5 million, and are not necessarily indicative of future operating results. Evergreen's results of operations prior to the acquisition are not included in our operating results. Merger-related expenses of \$1.1 million have been incurred in connection with the acquisition of Evergreen and recognized as a separate line item on the *Condensed Consolidated Statements of Operations*.

On February 26, 2010, the Washington Department of Financial Institutions closed Rainier Pacific Bank (*Rainier*), Tacoma, Washington and appointed the Federal Deposit Insurance Corporation (FDIC) as receiver. That same date, Umpqua Bank assumed the banking operations of Rainier from the FDIC under a whole bank purchase and assumption agreement with loss sharing. Under the terms of the loss sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (*OREO*) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$95 million of losses on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$95 million. The loss sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates. With this agreement, Umpqua Bank now operates 14 additional store locations in Pierce County and surrounding areas. This acquisition expands our presence in the south Puget Sound region of Washington State.

The operations of Rainier are included in our operating results from February 27, 2010, and added revenue of \$2.7 million, non-interest expense of \$2.1 million, and net earnings of \$350,000 for the first quarter of 2010. Such operating results do not include any loan or other real estate owned losses because of the FDIC loss sharing agreement and are not necessarily indicative of future operating results. Rainier's results of operations prior to the acquisition are not included in our operating results. Merger-related expenses of \$674,000 have been incurred in connection with the acquisition of Rainier and recognized as a separate line item on the *Condensed Consolidated Statements of Operations*.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

We refer to the acquired loan portfolios and other real estate owned as covered loans and covered other real estate owned, respectively, and these are presented as separate line items in our consolidated balance sheet. Collectively these balances are referred to as covered assets.

Table of Contents

The assets acquired and liabilities assumed for the Evergreen and Rainier acquisitions have been accounted for under the acquisition method of accounting (formerly the purchase method). The assets and liabilities, both tangible and intangible, were recorded at their estimated fair values as of the acquisition dates. The fair values of the assets acquired and liabilities assumed were determined based on the requirements of the Fair Value Measurements and Disclosures topic of the Financial Accounting Standards Board Accounting Standards Codification (the FASB ASC). The foregoing fair value amounts are subject to change for up to one year after the closing date of each acquisition as additional information relating to closing date fair values becomes available. The amounts are also subject to adjustments based upon final settlement with the FDIC. In addition, the tax treatment of FDIC assisted acquisitions is complex and subject to interpretations that may result in future adjustments of deferred taxes as of the acquisition date. The terms of the agreements provide for the FDIC to indemnify the Bank against claims with respect to liabilities of Evergreen and Rainier not assumed by the Bank and certain other types of claims identified in the agreement. The application of the acquisition method of accounting resulted in the recognition of a bargain purchase gain of \$8.5 million in the Evergreen acquisition and \$34.3 million of goodwill in the Rainier acquisition.

A summary of the net assets (liabilities) received from the FDIC and the estimated fair value adjustments resulting in the bargain purchase gain in the Evergreen acquisition and goodwill in the Rainier acquisition are presented below:

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010
Cost basis net assets (liabilities)	\$ 58,811	\$ (50,295)
Cash payment received from the FDIC	-	59,351
Fair value adjustments:		
Loans	(118,414)	(100,060)
Other real estate owned	(2,422)	(6,581)
Other intangible assets	440	6,253
FDIC indemnification asset	73,774	72,822
Deposits	(1,023)	(1,815)
Term debt	(2,496)	(13,907)
Other	(214)	(85)
Bargain purchase gain (goodwill)	\$ 8,456	\$ (34,317)

In FDIC-assisted transactions, only certain assets and liabilities are transferred to the acquirer and, depending on the nature and amount of the acquirer's bid, the FDIC may be required to make a cash payment to the acquirer. In the Evergreen acquisition, cost basis net assets of \$58.8 million were transferred to the Company. The bargain purchase gain represents the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities assumed.

In the Rainier acquisition, cost basis net liabilities of \$50.3 million and a cash payment received from the FDIC of \$59.4 million were transferred to the Company. The goodwill represents the excess of the estimated fair value of the liabilities assumed over the estimated fair value of the assets acquired.

The Bank did not immediately acquire all the real estate, banking facilities, furniture or equipment of Evergreen or Rainier as part of the purchase and assumption agreements. However, the Bank has the option to purchase or lease the real estate and furniture and equipment from the FDIC. The term of this option expires 90 days from the acquisition dates, unless extended by the FDIC. Acquisition costs of the real estate and furniture and equipment will be based on current appraisals and determined at a later date.

Table of Contents

The statement of assets acquired and liabilities assumed at their estimated fair values of Evergreen and Rainier are presented below:

(in thousands)	Evergreen January 22, 2010	Rainier February 26, 2010
Assets Acquired:		
Cash and equivalents	\$ 18,919	\$ 94,067
Investment securities	3,850	26,478
Covered loans	251,528	461,417
Premises and equipment	-	17
Restricted equity securities	3,073	13,712
Goodwill	-	34,317
Other intangible assets	440	6,253
Mortgage servicing rights	-	62
Covered other real estate owned	2,421	6,580
FDIC indemnification asset	73,774	72,822
Other assets	1,293	5,436
Total assets acquired	\$ 355,298	\$ 721,161
Liabilities Assumed:		
Deposits	\$ 285,775	\$ 425,758
Term debt	60,813	293,191
Other liabilities	254	2,212
Total liabilities assumed	346,842	721,161
Net assets acquired/bargain purchase gain	\$ 8,456	\$ -

The acquisition of Rainier's assets and liabilities were significant at a level to require disclosure of one year of historical financial statements and related pro forma financial disclosure. However, given the pervasive nature of the loss sharing agreement entered into with the FDIC, the historical information of Rainier is much less relevant for purposes of assessing the future operations of the combined entity. In addition, prior to closure Rainier had not completed an audit of their financial statements, and we determined that audited financial statements are not and will not be reasonably available for the year ended December 31, 2009. Given these considerations, the Company requested, and received, relief from the Securities and Exchange Commission from submitting certain financial information of Rainier.

On January 16, 2009, the Washington Department of Financial Institutions closed the Bank of Clark County, Vancouver, Washington, and appointed the Federal Deposit Insurance Corporation (FDIC) as its receiver. The FDIC entered into a purchase and assumption agreement with Umpqua Bank to assume the insured non-brokered deposit balances, which totaled \$183.9 million, at no premium. The Company recorded the deposit related liabilities at book value. In connection with the assumption, Umpqua Bank acquired certain assets totaling \$23.0 million, primarily cash and marketable securities, with the difference of \$160.9 million representing funds received directly from the FDIC. Through this agreement, Umpqua Bank now operates two additional store locations in Vancouver, Washington. In addition, the FDIC reimbursed Umpqua Bank for all overhead costs related to the acquired Bank of Clark County operations for 90 days following closing, while Umpqua Bank paid the FDIC a servicing fee on assumed deposit accounts for that same period.

The results of the Bank of Clark County's operations have been included in the consolidated financial statements beginning January 17, 2009 and added net earnings of approximately \$659,000 and \$310,000 for the first quarter of 2010 and 2009, respectively, net of tax, which primarily represents interest income earned from the proceeds of the assumption which were invested in investment securities available for sale and service income on deposits. This was partially offset by interest expense on deposits, salaries and employee benefits expense, and the accrued servicing fee paid to the FDIC. Umpqua did not incur the FDIC servicing fee expense during the second or third quarter of 2009, but began incurring overhead expenses such as salaries and employee benefits expense and rent expense. The Company does not expect to incur any significant additional acquisition-related expenses in connection with the assumption of the Bank of Clark County deposits and assets. Given the nature and terms of the FDIC-assisted purchase and assumption of assets and liabilities of the Bank of Clark County, it is deemed impractical to provide historical pro forma financial information since financial information related to assets and liabilities assumed is not available. Additionally, management believes the effect of the operations assumed from the Bank of Clark County would not have had a material impact

on the Company's historical results of operations.

Note 3 Investment Securities

The following table presents the amortized costs, unrealized gains, unrealized losses and approximate fair values of investment securities at March 31, 2010 and December 31, 2009:

Investment securities that were in an unrealized loss position as of March 31, 2010 and December 31, 2009 are presented in the following tables, based on the length of time individual securities have been in an unrealized loss position. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral.

The unrealized losses on investments in U.S. Treasury and agencies securities were caused by interest rate increases subsequent to the purchase of these securities. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than par. Because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

The unrealized losses on obligations of political subdivisions were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities. Management monitors published credit ratings of these securities and no adverse ratings changes have occurred since the date of purchase of obligations of political subdivisions which are in an unrealized loss position as of March 31, 2010. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

the Bank does not intend to sell the securities in this class and it is not likely that Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

Of the residential mortgage-backed securities and collateralized mortgage obligations portfolio in an unrealized loss position at March 31, 2010, 99.5% are issued or guaranteed by governmental agencies. The unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations were caused by changes in market interest rates or the widening of market spreads subsequent to the initial purchase of these securities, and not concerns regarding the underlying credit of the issuers or the underlying collateral. It is expected that these securities will not be settled at a price less than the amortized cost of each investment. Because the decline in fair value is attributable to changes in interest rates or widening market spreads and not credit quality, and because the Bank does not intend to sell the securities in this class and it is not likely that the Bank will be required to sell these securities before recovery of their amortized cost basis, which may include holding each security until contractual maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (OTTI) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors. For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire

Table of Contents

impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (OCI). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the OTTI amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is re-evaluated accordingly to the procedures described above.

The following tables present the OTTI losses for the three months ended March 31, 2010 and 2009 in the held to maturity portfolio. There were no OTTI losses for the periods shown in investment securities available for sale:

(in thousands)

	Three months ended	
	2010	2009
Total other-than-temporary impairment losses	\$ 5	\$ 2,137
Portion of other-than-temporary impairment losses transferred from (recognized in) other comprehensive income ⁽¹⁾	284	-
Net impairment losses recognized in earnings ⁽²⁾	\$ 289	\$ 2,137

(1) Represents other-than-temporary impairment losses related to all other factors.

(2) Represents other-than-temporary impairment losses related to credit losses.

The OTTI recognized on investment securities held to maturity relate to non-agency collateralized mortgage obligations for all periods presented. Each of these securities holds various levels of credit subordination. The underlying mortgage loans of these securities were originated from 2003 through 2007. At origination, the weighted average loan-to-value of the underlying mortgages was 69%; the underlying borrowers had weighted average FICO scores of 731, and 59% were limited documentation loans. These securities are valued by third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. We estimate cash flows of the underlying collateral for each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then used a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows are then discounted at the interest rate used to recognize interest income on each security. We review the actual collateral performance of these securities on a quarterly basis and update the inputs as appropriate to determine the projected cash flows. The following table presents a summary of the significant inputs utilized to measure management's estimate of the credit loss component on these non-agency collateralized mortgage obligations as of March 31, 2010:

	Range		Weighted
	Minimum	Minimum	Average
Constant prepayment rate	4.0%	25.0%	14.8%
Collateral default rate	8.0%	45.0%	16.8%
Loss severity	20.0%	50.0%	34.7%

The following table presents a rollforward of the credit loss component of held to maturity debt securities that have been written down for OTTI with the credit loss component recognized in earnings and the remaining impairment loss related to all other factors recognized in OCI for the three months ended March 31, 2010:

Table of Contents

(in thousands)

	Three months ended March 31, 2010
Balance, beginning of period	\$ 12,364
Additions:	
Subsequent OTTI credit losses	289
Balance, end of period	\$ 12,653

The following table presents the maturities of investment securities at March 31, 2010:

(in thousands)

	Available For Sale		Held To Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
AMOUNTS MATURING IN:				
Three months or less	\$ 3,785	\$ 3,804	\$ 826	\$ 828
Over three months through twelve months	96,925	98,767	539	545
After one year through five years	1,343,284	1,390,911	3,851	3,883
After five years through ten years	252,284	259,396	830	840
After ten years	27,440	27,851	16	14
Other investment securities	1,959	2,015	-	-
	\$ 1,725,677	\$ 1,782,744	\$ 6,062	\$ 6,110

The amortized cost and fair value of collateralized mortgage obligations and mortgage-backed securities are presented by expected average life, rather than contractual maturity, in the preceding table. Expected maturities may differ from contractual maturities because borrowers have the right to prepay underlying loans without prepayment penalties.

The following table presents the gross realized gains and gross realized losses on the sale of securities available for sale for the three months ended March 31, 2010 and 2009:

(in thousands)

	Three months ended March 31, 2010		Three months ended March 31, 2009	
	Gains	Losses	Gains	Losses
Obligations of states and political subdivisions	\$ 2	\$ 1	\$ -	\$ -
Residential mortgage-backed securities and collateralized mortgage obligations	-	-	2,210	38
	\$ 2	\$ 1	\$ 2,210	\$ 38

The following table presents, as of March 31, 2010, investment securities which were pledged to secure borrowings and public deposits as permitted or required by law:

(in thousands)

	Amortized Cost	Fair Value
To Federal Home Loan Bank to secure borrowings	\$ 354,156	\$ 369,953
To state and local governments to secure public deposits	850,253	872,965
To U.S. Treasury and Federal Reserve to secure customer tax payments	6,298	6,577
Other securities pledged, principally to secure deposits	258,489	267,922
Total pledged securities	\$ 1,469,196	\$ 1,517,417

Note 4 Non-covered Loans, Leases and Allowance for Loan and Lease Losses

Non-covered loans refer to loans not covered by the FDIC loss sharing agreements. Covered loans are discussed in Note 5.

The following table presents the major types of non-covered loans recorded in the balance sheets as of March 31, 2010 and December 31, 2009. The classification of non-covered loan balances presented is reported in accordance with the regulatory reporting requirements.

Table of Contents**Non-covered Loan Concentrations**

(in thousands)

	March 31, 2010	December 31, 2009
Real estate - construction and land development	\$ 548,375	\$ 618,476
Real estate - commercial and agricultural	3,466,898	3,482,687
Real estate - single and multi-family residential	740,326	726,658
Commercial, industrial and agricultural	1,002,371	1,090,275
Leases	32,740	34,528
Installment and other	52,181	58,044
	5,842,891	6,010,668
Deferred loan fees, net	(11,033)	(11,401)
Total loans and leases	\$ 5,831,858	\$ 5,999,267

The following table summarizes activity related to the allowance for loan and lease losses (ALLL) on non-covered loans for the three months ended March 31, 2010 and 2009:

Allowance for Loan and Lease Losses

(in thousands)

	Three months ended March 31, 2010	2009
Balance, beginning of period	\$ 107,657	\$ 95,865
Provision for loan and lease losses	42,106	59,092
Charge-offs	(39,759)	(60,414)
Recoveries	780	543
Balance, end of period	\$ 110,784	\$ 95,086

At March 31, 2010, the recorded investment in non-covered loans classified as impaired totaled \$281.5 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses on non-covered loans) of \$3.2 million. Due to declining real estate values in our markets, it is increasingly likely that an impairment reserve on collateral dependent real estate non-covered loans represents a confirmed loss. As a result, the Company recognizes the charge-off of impairment reserves on non-covered impaired loans in the period it arises for collateral dependent loans. Therefore, the non-covered non-accrual loans as of March 31, 2010 have already been written-down to their estimated net realizable value, based on disposition value, and are expected to be resolved with no additional material loss, absent further decline in market prices. The valuation allowance on non-covered impaired loans primarily represents the impairment reserves on performing restructured loans, and is measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. At December 31, 2009, the total recorded investment in non-covered impaired loans totaled \$328.0 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses on non-covered) of \$2.7 million. The average recorded investment in non-covered impaired loans was approximately \$304.8 million during the three months ended March 31, 2010 and \$234.5 million for the year ended December 31, 2009.

At March 31, 2010 and December 31, 2009, non-covered impaired loans of \$98.0 million and \$134.9 million were classified as accruing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The non-covered restructured loans on accrual status represent the only impaired loans accruing interest at each respective date. In order for a restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. The Company has no obligations to lend additional funds on the non-covered restructured loans as of March 31, 2010. Non-covered non-accrual loans totaled \$183.5 million at March 31, 2010, and \$193.1 million at December 31, 2009.

Note 5 Covered Assets and FDIC Indemnification Asset

Covered Loans Loans acquired in a FDIC assisted acquisition that are subject to a loss-share agreement are referred to as covered loans and reported separately in our statements of financial condition. Covered loans are reported exclusive of the expected cash flow reimbursements expected from the FDIC.

Table of Contents

Acquired loans are valued as of acquisition date in accordance with Financial Accounting Standards Board Accounting Standards Codification (FASB ASC) 805, *Business Combinations*. Loans purchased with evidence of credit deterioration since origination for which it is probable that all contractually required payments will not be collected are accounted for under FASB ASC 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*. In addition, because of the significant discounts associated with the acquired portfolios, the Company elected to account for all acquired loans under ASC 310-30. Under FASB ASC 805 and ASC 310-30, loans are recorded at fair value at acquisition date, factoring in credit losses expected to be incurred over the life of the loan. Accordingly, an allowance for loan losses is not carried over or recorded as of the acquisition date.

The covered loans acquired are and will continue to be subject to the Company's internal and external credit review and monitoring. If credit deterioration is experienced subsequent to the initial acquisition fair value amount, such deterioration will be measured, and a provision for credit losses will be charged to earnings. These provisions will be mostly offset by an increase to the FDIC indemnification asset, and will be recognized in non-interest income.

The following table reflects the estimated fair value of the acquired loans at the acquisition dates:

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010
Gross loans acquired	\$ 369,942	\$ 561,477
Discount	(118,414)	(100,060)
Covered loans, net	\$ 251,528	\$ 461,417

The outstanding contractual principal balance, excluding purchase accounting adjustments, at March 31, 2010 was \$337.3 million and \$547.2 million, for Evergreen and Rainier, respectively.

The following table presents the major types of covered loans as of March 31, 2010. The classification of covered loan balances presented is reported in accordance with the regulatory reporting requirements.

(in thousands)

	Evergreen March 31, 2010	Rainier March 31, 2010
Real estate - construction and land development	\$ 28,277	\$ 22,723
Real estate - commercial and agricultural	126,471	216,695
Real estate - single and multi-family residential	60,845	183,659
Commercial, industrial and agricultural	22,938	20,916
Installment and other	3,215	11,100
	241,746	455,093
Deferred loan fees, net	(57)	-
Total loans and leases	\$ 241,689	\$ 455,093

In estimating the fair value of the covered loans at the acquisition date, we (a) calculated the contractual amount and timing of undiscounted principal and interest payments and (b) estimated the amount and timing of undiscounted expected principal and interest payments. The difference between these two amounts represent the nonaccretable difference.

On the acquisition date, the amount by which the undiscounted expected cash flows exceed the estimated fair value of the acquired loans is the accretable yield. The accretable yield is then measured at each financial reporting date and represents the difference between the remaining undiscounted expected cash flows and the current carrying value of the loans.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The following table summarizes the accretable yield on the covered loans as of the acquisitions dates and the changes therein through March 31, 2010:

Table of Contents

(in thousands)

	Evergreen January 22, 2010	Rainier February 26, 2010
Estimated fair value of loans acquired	\$ 251,528	\$ 461,417
Less: undiscounted cash flows expected to be collected		
Undiscounted contractual cash flows	\$ 412,377	\$ 746,025
Undiscounted cash flows not expected to be collected (nonaccretable difference)	(114,779)	(90,184)
Undiscounted cash flows expected to be collected	297,598	655,841
Accretable yield at acquisition	(46,070)	(194,424)
Accretion to interest income	3,144	3,022
Accretable yield at March 31, 2010	\$ (42,926)	\$ (191,402)

Covered Other Real Estate Owned All OREO acquired in FDIC-assisted acquisitions that are subject to a FDIC loss-share agreement are referred to as covered OREO and reported separately in our statements of financial position. Covered OREO is reported exclusive of expected reimbursement cash flows from the FDIC. Foreclosed covered loan collateral is transferred into covered OREO at the loan's carrying value, inclusive of the acquisition date fair value discount.

Covered OREO was initially recorded at its estimated fair value on the acquisition date based on similar market comparable valuations less estimated selling costs. Any subsequent valuation adjustments due to declines in fair value will be charged to non-interest expense, and will be mostly offset by non-interest income representing the corresponding increase to the FDIC indemnification asset for the offsetting loss reimbursement amount. Any recoveries of previous valuation adjustments will be credited to non-interest expense with a corresponding charge to non-interest income for the portion of the recovery that is due to the FDIC.

The following table summarizes the activity related to the covered OREO for the three months ended March 31, 2010:

(thousands)

	Three months ended March 31, 2010
Balance, at acquisition	\$ 9,001
Additions to covered OREO	109
Dispositions of covered OREO	(115)
Balance, end of period	\$ 8,995

FDIC Indemnification Asset The Company has elected to account for amounts receivable under the loss-share agreement as an indemnification asset in accordance with FASB ASC 805, *Business Combinations*. The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement. The difference between the present value and the undiscounted cash flows the Company expects to collect from the FDIC will be accreted into non-interest income over the life of the FDIC indemnification asset.

The FDIC indemnification asset is reviewed quarterly and adjusted for any changes in expected cash flows based on recent performance and expectations for future performance of the covered portfolio. These adjustments are measured on the same basis as the related covered loans and covered other real estate owned. Any increases in cash flow of the covered assets over those expected will reduce the FDIC indemnification asset and any decreases in cash flow of the covered assets under those expected will increase the FDIC indemnification asset. Increases and

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

decreases to the FDIC indemnification asset are recorded as adjustments to non-interest income.

Changes in the FDIC loss sharing asset since the acquisition dates are as follows:

Table of Contents**Note 6 Mortgage Servicing Rights**

The following table presents the changes in the Company's mortgage servicing rights (MSR) for the three months ended March 31, 2010 and 2009:

(in thousands)

	Three months ended March 31,	
	2010	2009
Balance, beginning of period	\$ 12,625	\$ 8,205
Additions for new mortgage servicing rights capitalized	1,070	1,968
Acquired mortgage servicing rights	62	-
Changes in fair value:		
Due to changes in model inputs or assumptions ⁽¹⁾	(155)	(1,068)
Other ⁽²⁾	26	(373)
Balance, end of period	\$ 13,628	\$ 8,732

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of March 31, 2010 and December 31, 2009 was as follows:

(dollars in thousands)

	March 31, 2010	December 31, 2009
Balance of loans serviced for others	\$ 1,345,554	\$ 1,277,832
MSR as a percentage of serviced loans	1.01%	0.99%
The amount of contractually specified servicing fees, late fees and ancillary fees earned, recorded in mortgage banking revenue on the <i>Condensed Consolidated Statements of Operations</i> , was \$903,000 for the three months ended March 31, 2010, as compared to \$654,000 for the three months ended March 31, 2009.		

Key assumptions used in measuring the fair value of MSR as of March 31, 2010 and December 31, 2009 were as follows:

	March 31, 2010	December 31, 2009
Constant prepayment rate	17.90%	18.35%
Discount rate	8.67%	8.70%
Weighted average life (years)	4.5	4.5

Note 7 Other Real Estate Owned

The following table presents the changes in non-covered other real estate owned for the three months ended March 31, 2010 and 2009:

	Three months ended March 31,	
	2010	2009
Balance, beginning of period	\$ 24,566	\$ 27,898
Additions to OREO	6,007	8,756
Dispositions of OREO	(10,794)	(2,277)
Valuation adjustments in the period	(907)	(1,611)
Balance, end of period	\$ 18,872	\$ 32,766

Note 8 Junior Subordinated Debentures

As of March 31, 2010, the Company had 14 wholly-owned trusts (Trusts), including a Master Trust formed in 2007 to issue two separate series of trust preferred securities, that were formed to issue trust preferred securities and related common securities of the

Table of Contents

Trusts and are not consolidated. Nine Trusts, representing aggregate total obligations of approximately \$96.0 million (fair value of approximately \$107.3 million as of the merger dates), were assumed in connection with previous mergers.

Following is information about the Trusts as of March 31, 2010:

Junior Subordinated Debentures

(dollars in thousands)

Trust Name	Issue Date	Issued Amount	Carrying Value ⁽¹⁾	Rate ⁽²⁾	Effective Rate ⁽³⁾	Maturity Date	Redemption Date

(1) Includes purchase accounting adjustments, net of accumulated amortization, for junior subordinated debentures assumed in connection with previous mergers as well as fair value adjustments related to trusts recorded at fair value.

(2) Contractual interest rate of junior subordinated debentures.

(3) Effective interest rate based upon the carrying value as of March 2010.

(4) Rate based on LIBOR plus 3.35%, adjusted quarterly.

(5) Rate based on LIBOR plus 3.45%, adjusted quarterly.

(6) Rate based on LIBOR plus 2.85%, adjusted quarterly.

(7) Rate based on LIBOR plus 1.35%, adjusted quarterly.

(8) Rate based on LIBOR plus 2.75%, adjusted quarterly.

(9) Rate based on LIBOR plus 3.60%, adjusted quarterly.

(10) Rate based on LIBOR plus 2.95%, adjusted quarterly.

(11) Rate based on LIBOR plus 3.58%, adjusted quarterly.

(12) Rate based on LIBOR plus 2.90%, adjusted quarterly.

The \$230.1 million of trust preferred securities issued to the Trusts as of March 31, 2010 and December 31, 2009, with carrying values of \$182.7 million and \$188.9 million, respectively, are reflected as junior subordinated debentures in the *Condensed Consolidated Balance Sheets*. The common stock issued by the Trusts is recorded in other assets in the *Condensed Consolidated Balance Sheets*, and totaled \$6.9 million at March 31, 2010 and December 31, 2009.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

All of the debentures issued to the Trusts, less the common stock of the Trusts, qualified as Tier 1 capital as of March 31, 2010, under guidance issued by the Board of Governors of the Federal Reserve System (Federal Reserve Board). Effective April 11, 2005, the Federal Reserve Board adopted a rule that permits the inclusion of trust preferred securities in Tier 1 capital, but with stricter quantitative limits. The Federal Reserve Board rule, with a five-year transition period set to end on March 31, 2009, would have limited the aggregate amount of trust preferred securities and certain other restricted core capital elements to 25% of Tier 1 capital, net of goodwill and any associated deferred tax liability. The rule allowed the amount of trust preferred securities and certain other elements in excess of the limit to be included in Tier 2 capital, subject to restrictions. In response to the stressed conditions in the financial markets and in order to promote stability in the financial markets and the banking industry, on March 17, 2009, the Federal Reserve Board adopted a new rule that delayed the effective date of the new limits on the inclusion of trust preferred securities and other restricted core capital elements in Tier 1 capital until March 31, 2011. At March 31, 2010, the Company's restricted core capital elements were 19% of total core capital, net of goodwill and any associated deferred tax liability. There can be no assurance that the Federal Reserve Board will not further limit the amount of trust preferred securities permitted to be included in Tier 1 capital for regulatory capital purposes.

Table of Contents

On January 1, 2007 the Company selected the fair value measurement option for certain pre-existing junior subordinated debentures of \$97.9 million (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007, the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for the junior subordinated debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost have been presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

Due to inactivity in the junior subordinated debenture market and the inability to obtain observable quotes of our, or similar, junior subordinated debenture liabilities or the related trust preferred securities when traded as assets, we utilize an income approach valuation technique to determine the fair value of these liabilities using our estimation of market discount rate assumptions. The significant inputs utilized in the estimation of fair value of these instruments is the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating both the inherent risk of the obligation and the Company's entity-specific credit risk. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments. Prior to the second quarter of 2009, we estimated the fair value of junior subordinated debentures using an internal discounted cash flow model. The future cash flows of these instruments were extended to the next available redemption date or maturity date as appropriate based upon the estimated credit risk adjusted spreads of recent issuances or quotes from brokers for comparable bank holding companies, as available, compared to the contractual spread of each junior subordinated debenture measured at fair value. For additional assurance, we obtain a valuation from a third-party pricing service to validate the results of our model.

In the second quarter of 2009, due to continued inactivity in the junior subordinated debenture and related markets and clarified guidance relating to the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased or where transactions are not orderly, management has evaluated and determined to rely on a third-party pricing service to estimate the fair value of these liabilities. The pricing service utilizes an income approach valuation technique, specifically an option-adjusted spread (OAS) valuation model. This OAS model values the cash flows over multiple interest rate scenarios and discounts these cash flows using a credit risk adjustment spread over the three month LIBOR swap curve. The OAS model currently being utilized is more sophisticated and computationally intensive than the model previously used; however, the models react similarly to changes in the underlying inputs, and the results are considered comparable. With the assistance of a third-party pricing service, we determined that a credit risk adjusted spread of 725 basis points is representative of the nonperformance risk premium a market participant would require under current market conditions as of March 31, 2010. Generally, an increase in the credit risk adjusted spread and/or a decrease in the swap curve will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the swap curve will result in negative fair value adjustments.

For the three months ended March 31, 2010, we recorded gains of \$6.1 million as compared to gains of \$580,000 for the three months ended March 31, 2009, respectively, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. The change in fair value of the junior subordinated debentures carried at fair value in the current year primarily results from the widening of the credit risk adjusted spread over the contractual rate of each junior subordinated debenture measured at fair value. Management believes that the credit risk adjusted spread being utilized is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. In management's estimation, the change in fair value of the junior subordinated debentures during the current period represents changes in the market's nonperformance risk expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. These gains were recorded in gain on junior subordinated debentures carried at fair value within non-interest income. The contractual interest expense on junior subordinated debentures continues to be recorded on an accrual basis and is reported in interest expense. The junior subordinated debentures recorded at fair value of \$79.6 million had contractual unpaid principal amounts of \$134.0 million outstanding as of March 31, 2010. The junior subordinated debentures recorded at fair value of \$85.7 million had contractual unpaid principal amounts of \$134.0 million outstanding as of December 31, 2009.

Note 9 Commitments and Contingencies

Lease Commitments The Company leases 119 sites under non-cancelable operating leases. The leases contain various provisions for increases in rental rates, based either on changes in the published Consumer Price Index or a predetermined escalation schedule. Substantially all of the leases provide the Company with the option to extend the lease term one or more times following expiration of the initial term. In connection with the Evergreen and Rainier acquisitions, the Company operated in 10 additional lease facilities at March 31, 2010. The option to assume these leases from the FDIC expires 90 days from acquisition date if not extended.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Rent expense for the three months ended March 31, 2010 was \$3.5 million, compared to \$3.1 million in the comparable period in 2009. Rent expense was offset by rent income for the three months ended March 31, 2010 of \$146,000, compared to \$148,000 in the comparable period in 2009.

Table of Contents

Financial Instruments with Off-Balance-Sheet Risk The Company's financial statements do not reflect various commitments and contingent liabilities that arise in the normal course of the Bank's business and involve elements of credit, liquidity, interest rate risk.

The following table presents a summary of the Bank's commitments and contingent liabilities:

(in thousands)

As of March 31, 2010

Commitments to extend credit	\$	1,022,189
Commitments to extend overdrafts	\$	208,560
Commitments to originate loans held for sale	\$	92,743
Forward sales commitments	\$	66,500
Standby letters of credit	\$	52,246

The Bank is a party to financial instruments with off-balance-sheet credit risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and financial guarantees. Those instruments involve elements of credit and interest-rate risk similar to the amounts recognized in the *Condensed Consolidated Balance Sheets*. The contract or notional amounts of those instruments reflect the extent of the Bank's involvement in particular classes of financial instruments.

The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit, and financial guarantees written, is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any covenant or condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. While most standby letters of credit are not utilized, a significant portion of such utilization is on an immediate payment basis. The Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if it is deemed necessary by the Bank upon extension of credit, is based on management's credit evaluation of the counterparty. Collateral varies but may include cash, accounts receivable, inventory, premises and equipment and income-producing commercial properties.

Standby letters of credit and financial guarantees written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. These guarantees are primarily issued to support public and private borrowing arrangements, including international trade finance, commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank holds cash, marketable securities, or real estate as collateral supporting those commitments for which collateral is deemed necessary. The Bank has not been required to perform on any financial guarantees and did not incur any losses in connection with standby letters of credit during the three months ended March 31, 2010 and 2009. At March 31, 2010, approximately \$29.7 million of standby letters of credit expire within one year, and \$22.5 million expire thereafter. Upon issuance, the Company recognizes a liability equivalent to the amount of fees received from the customer for these standby letter of credit commitments. Fees are recognized ratably over the term of the standby letter of credit. The estimated fair value of guarantees associated with standby letters of credit was \$98,000 as of March 31, 2010.

At March 31, 2010 and December 31, 2009, the reserve for unfunded commitments, which is included in other liabilities on the *Condensed Consolidated Balance Sheets*, was \$765,000 and \$731,000, respectively. The adequacy of the reserve for unfunded commitments is reviewed on a quarterly basis, based upon changes in the amount of commitments, loss experience, and economic conditions.

Mortgage loans sold to investors may be sold with servicing rights retained, with only the standard legal representations and warranties regarding recourse to the Bank. Management believes that any liabilities that may result from such recourse provisions are not significant.

Legal Proceedings During 2007, Visa Inc. (Visa) announced that it completed restructuring transactions in preparation for an initial public offering of its Class A stock, and, as part of those transactions, Umpqua Bank's membership interest was exchanged for 764,036 shares of Class B common stock in Visa. In March 2008, Visa completed its initial public offering. Following the initial public offering, the Company received \$12.6 million proceeds as a mandatory partial redemption of 295,377 shares, reducing the

Table of Contents

Company's holdings from 764,036 shares to 468,659 shares of Class B common stock. A conversion ratio of 0.71429 was established for the conversion rate of Class B shares into Class A shares. Using the proceeds from this offering, Visa also established a \$3.0 billion escrow account to cover settlements, resolution of pending litigation and related claims (covered litigation).

In October 2008, Visa announced that it had reached a settlement with Discover Card related to an antitrust lawsuit. Umpqua Bank and other Visa member banks were obligated to fund the settlement and share in losses resulting from this litigation that were not already provided for in the escrow account. In December 2008, Visa deposited additional funds into the escrow account to cover the remaining amount of the settlement. The deposit of funds into the escrow account further reduced the conversion ratio applicable to Class B common stock outstanding from 0.71429 per Class A share to 0.6296 per Class A share.

In July 2009, Visa deposited an additional \$700 million into the litigation escrow account. While the outcome of the remaining litigation cases remains unknown, this addition to the escrow account provides additional reserves to cover potential losses. As a result of the deposit, the conversion ratio applicable to Class B common stock outstanding decreased further from 0.6296 per Class A share to 0.5824 per Class A share.

The remaining unredeemed shares of Visa Class B common stock are restricted and may not be transferred until the later of (1) three years from the date of the initial public offering or (2) the period of time necessary to resolve the covered litigation. If the funds in the escrow account are insufficient to settle all the covered litigation, Visa may sell additional Class A shares, use the proceeds to settle litigation, and further reduce the conversion ratio. If funds remain in the escrow account after all litigation is settled, the Class B conversion ratio will be increased to reflect that surplus.

As of March 31, 2010, the value of the Class A shares was \$91.03 per share. Utilizing the new conversion ratio effective in July 2009, the value of unredeemed Class A equivalent shares owned by the Company was \$24.8 million as of March 31, 2010, and has not been reflected in the accompanying financial statements.

In the ordinary course of business, various claims and lawsuits are brought by and against the Company, the Bank and Umpqua Investments. In the opinion of management, there is no pending or threatened proceeding in which an adverse decision could result in a material adverse change in the Company's consolidated financial condition or results of operations. Management has considered the potential impact of one or more adverse decisions in the actions brought by Kevin D. Padrick, Trustee of the Summit Accommodators Liquidating Trust and Danae Miller, et al., as described in Part II, Item 1. Based on the allegations in the complaint and our understanding of the relevant facts and circumstances, we believe that the claim is without merit and the Company is vigorously defending the claim. No loss accrual has been made for either of these claims in the accompanying unaudited consolidated financial statements.

Concentrations of Credit Risk The Company grants real estate mortgage, real estate construction, commercial, agricultural and installment loans and leases to customers throughout Oregon, Washington and California. In management's judgment, a concentration exists in real estate-related loans, which represented approximately 82% and 81% of the Company's non-covered loan and lease portfolio at March 31, 2010, and December 31, 2009, respectively. Commercial real estate concentrations are managed to assure wide geographic and business diversity. Although management believes such concentrations have no more than the normal risk of collectibility, a substantial decline in the economy in general, material increases in interest rates, changes in tax policies, tightening credit or refinancing markets, or a decline in real estate values in the Company's primary market areas in particular, such as was seen with the deterioration in the residential development market since 2007, could have an adverse impact on the repayment of these loans. Personal and business incomes, proceeds from the sale of real property, or proceeds from refinancing, represent the primary sources of repayment for a majority of these loans.

The Bank recognizes the credit risks inherent in dealing with other depository institutions. Accordingly, to prevent excessive exposure to any single correspondent, the Bank has established general standards for selecting correspondent banks as well as internal limits for allowable exposure to any single correspondent. In addition, the Bank has an investment policy that sets forth limitations that apply to all investments with respect to credit rating and concentrations with an issuer.

Note 10 Derivatives

The Company may use derivatives to hedge the risk of changes in the fair values of interest rate lock commitments, residential mortgage loans held for sale, and mortgage servicing rights. None of the Company's derivatives are designated as hedging instruments. Rather, they are accounted for as free-standing derivatives, or economic hedges, with changes in the fair value of the derivatives reported in income. The Company primarily utilizes forward interest rate contracts in its derivative risk management strategy.

The Bank enters into forward delivery contracts to sell residential mortgage loans or mortgage-backed securities to broker/dealers at specific prices and dates (MBS TBAs) in order to hedge the interest rate risk in its portfolio of mortgage loans held for sale and its residential mortgage

loan commitments. Credit risk associated with forward contracts is limited to the replacement cost of those

Table of Contents

forward contracts in a gain position. There were no counterparty default losses on forward contracts in the three months ended March 31, 2010 and 2009. Market risk with respect to forward contracts arises principally from changes in the value of contractual positions due to changes in interest rates. The Bank limits its exposure to market risk by monitoring differences between commitments to customers and forward contracts with broker/dealers. In the event the Company has forward delivery contract commitments in excess of available mortgage loans, the Company completes the transaction by either paying or receiving a fee to or from the broker/dealer equal to the increase or decrease in the market value of the forward contract. At March 31, 2010, the Bank had commitments to originate mortgage loans held for sale totaling \$92.7 million and forward sales commitments of \$66.5 million.

The following tables summarize the types of derivatives, separately by assets and liabilities, their locations on the *Condensed Consolidated Balance Sheets*, and the fair values of such derivatives as of March 31, 2010 and December 31, 2009:

(in thousands)

Underlying Risk Exposure	Description	Balance Sheet Location	March 31, 2010	December 31, 2009
Asset Derivatives				
Interest rate contracts	Rate lock commitments	Other assets	\$ 224	\$ 124
Interest rate contracts	Forward sales commitments	Other assets	341	845
Total asset derivatives			\$ 565	\$ 969
Liability Derivatives				
Interest rate contracts	Rate lock commitments	Other liabilities	\$ 67	\$ 133
Interest rate contracts	Forward sales commitments	Other liabilities	24	-
Total liability derivatives			\$ 91	\$ 133

The following table summarizes the types of derivatives, their locations within the *Condensed Consolidated Statements of Operations*, and the gains (losses) recorded during the three months ended March 31, 2010 and 2009:

(in thousands)

Underlying Risk Exposure	Description	Income Statement Location	Three months ended March 31,	
			2010	2009
Interest rate contracts	Rate lock commitments	Mortgage banking revenue	\$ 167	\$ 129
Interest rate contracts	Forward sales commitments	Mortgage banking revenue	(832)	(955)
Total			\$ (665)	\$ (826)

The Company's derivative instruments do not have specific credit risk-related contingent features. The forward sales commitments do have contingent features that may require transferring collateral to the broker/dealers upon their request. However, this amount would be limited to the net unsecured loss exposure at such point in time and would not materially affect the Company's liquidity or results of operations.

Note 11 Shareholders' Equity

On February 3, 2010, the Company raised \$303.6 million through a public offering by issuing 8,625,000 shares of the Company's common stock, including 1,125,000 shares pursuant to the underwriters' over-allotment option, at a share price of \$11.00 per share and 18,975,000 depository shares, including 2,475,000 depository shares pursuant to the underwriter's over-allotment option, also at a price of \$11.00 per share. Fractional interests (1/100th) in each share of the Series B Common Stock Equivalent are represented by the 18,975,000 depository shares; as a result, each depository share is converted into one share of common stock. The net proceeds to the Company after deducting underwriting discounts and

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

commissions and offering expenses were \$288.2 million. The net proceeds from the offering will qualify and the net proceeds of the depository shares offering will (when converted into common stock) qualify as tangible common equity and Tier 1 capital, and were used to redeem the preferred stock issued to the United States Department of the Treasury (U.S. Treasury) under the Troubled Asset Relief Program (TARP) Capital Purchase Program (CPP), to fund FDIC-assisted acquisition opportunities and for general corporate purposes.

On February 17, 2010, the Company redeemed all of the outstanding Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury under the TARP CPP for an aggregate purchase price of \$214.2 million. As a result of the repurchase of the Series A preferred stock, the Company incurred a one-time deemed dividend of \$9.7 million due to the accelerated amortization of the remaining issuance discount on the preferred stock.

On March 31, 2010, the Company repurchased the common stock warrant issued to the U.S. Treasury pursuant to the TARP CPP, for

Table of Contents

\$4.5 million. The warrant repurchase, together with the Company's redemption in February 2010 of the entire amount of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the U.S. Treasury.

Stock-Based Compensation

The compensation cost related to stock options, restricted stock and restricted stock units (included in salaries and employee benefits) was \$626,000 and \$916,000 for the three months ended March 31, 2010 and 2009, respectively. The total income tax benefit recognized related to stock based compensation was \$250,000 and \$366,000 for the three months ended March 31, 2010 and 2009, respectively.

The following table summarizes information about stock option activity for the three months ended March 31, 2010:

(in thousands, except per share data)

	Three months ended March 31, 2010			
	Options Outstanding	Weighted-Avg Exercise Price	Weighted-Avg Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Balance, beginning of period	1,763	\$ 15.05		
Granted	230	\$ 12.16		
Exercised	(81)	\$ 9.38		
Forfeited/expired	(7)	\$ 15.14		
Balance, end of period	1,905	\$ 14.94	6.25	\$ 3,135
Options exercisable, end of period	1,141	\$ 16.38	4.88	\$ 1,981

The total intrinsic value (which is the amount by which the stock price exceeded the exercise price on the date of exercise) of options exercised during the three months ended March 31, 2010 was \$289,000. This compared to the total intrinsic value of options exercised during the three months ended March 31, 2009 of \$19,000. During the three months ended March 31, 2010, the amount of cash received from the exercise of stock options was \$764,000, as compared to \$52,000 for the same period in 2009.

The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. The following weighted average assumptions were used for stock options granted in the three months ended March 31, 2010 and 2009:

	Three months ended March 31,	
	2010	2009
Dividend yield	2.73%	2.23%
Expected life (years)	7.1	7.3
Expected volatility	52%	45%
Risk-free rate	3.04%	2.16%
Weighted average fair value of options on date of grant	\$ 5.18	\$ 3.63

The Company grants restricted stock periodically as a part of the 2003 Stock Incentive Plan for the benefit of employees. Restricted shares issued generally vest on an annual basis over five years. A deferred restricted stock award was granted to an executive in the second quarter of 2007. The award vests monthly based on continued service in various increments through July 1, 2011. The Company will issue certificates for the vested award within the seventh month following termination of the executive's employment. The following table summarizes information about nonvested restricted share activity for the three months ended March 31, 2010:

(in thousands, except per share data)

Table of Contents

	Three months ended March 31, 2010	
	Restricted	Weighted
	Shares	Average Grant
	Outstanding	Date Fair
		Value
Balance, beginning of period	187	\$ 21.46
Granted	186	\$ 11.96
Released	(39)	\$ 22.58
Forfeited/expired	(1)	\$ 8.44
Balance, end of period	333	\$ 16.03

The total fair value of restricted shares vested and released during the three months ended March 31, 2010 and 2009 was \$487,000 and \$376,000, respectively.

The Company grants restricted stock units as a part of the 2007 Long Term Incentive Plan for the benefit of certain executive officers. Restricted stock unit grants are subject to performance-based vesting as well as other approved vesting conditions. In the second quarter of 2007, restricted stock units were granted that cliff vest after three years based on performance and service conditions. In the first quarter of 2008 and 2009, additional restricted stock units were granted to these executives under substantially similar vesting terms. The total number of restricted stock units granted represents the maximum number of restricted stock units eligible to vest based upon the performance and service conditions set forth in the grant agreements. The following table summarizes information about restricted stock unit activity for the three months ended March 31, 2010:

(in thousands, except per share data)

	Three months ended March 31, 2010	
	Restricted	Weighted Average
	Stock Units	Grant
	Outstanding	Date Fair Value
Balance, beginning of period	335	\$ 15.54
Granted	-	\$ -
Released	(16)	\$ 24.52
Forfeited/expired	(95)	\$ 24.52
Balance, end of period	224	\$ 11.13

The total fair value of restricted stock units vested and released during the three months ended March 31, 2010 was \$213,000. No restricted stock units were vested and released during the three month ended March 31, 2009.

As of March 31, 2010, there was \$2.4 million of total unrecognized compensation cost related to nonvested stock options which is expected to be recognized over a weighted-average period of 3.4 years. As of March 31, 2010, there was \$3.7 million of total unrecognized compensation cost related to nonvested restricted stock which is expected to be recognized over a weighted-average period of 3.1 years. As of March 31, 2010, there was \$239,000 of total unrecognized compensation cost related to nonvested restricted stock units which is expected to be recognized over a weighted-average period of 1.4 years, assuming expected performance conditions are met.

For the three months ended March 31, 2010 and 2009, the Company received income tax benefits of \$326,000 and \$218,000, respectively, related to the exercise of non-qualified employee stock options, disqualifying dispositions on the exercise of incentive stock options, the vesting of restricted shares and the vesting of restricted stock units. In the three months ended March 31, 2010, the Company had net tax deficiencies (tax deficiency resulting from tax deductions less than the compensation cost recognized) of \$195,000, compared to net tax deficiencies of \$331,000 for the three months ended March 31, 2009. Only cash flows from gross excess tax benefits are classified as financing cash flows.

Note 12 Income Taxes

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction, as well as the Oregon and California state jurisdictions. Except for the California amended returns of an acquired institution for the tax years 2001, 2002, and 2003, and only as it relates to the net interest deduction taken on these amended returns, the Company is no longer subject to U.S. federal or Oregon state tax authority examinations for years before 2006 and California state tax authority examinations for years before 2004. The Internal Revenue Service concluded an examination of the Company's U.S. income tax returns for 2003 and 2004 in the second

Table of Contents

quarter of 2006 and concluded an examination of the Company's U.S. amended income tax return for 2005 in the third quarter of 2009. The results of these examinations had no significant impact on the Company's financial statements.

Income taxes are accounted for using the asset and liability method. Under this method a deferred tax asset or liability is determined based on the enacted tax rates which will be in effect when the differences between the financial statement carrying amounts and tax basis of existing assets and liabilities are expected to be reported in the Company's income tax returns. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established to reduce the net carrying amount of deferred tax assets if it is determined to be more likely than not, that all or some portion of the potential deferred tax asset will not be realized.

The Company applies the provisions of FASB ASC 740, *Income Taxes*, relating to the accounting for uncertainty in income taxes. The Company periodically reviews its income tax positions based on tax laws and regulations and financial reporting considerations, and records adjustments as appropriate. This review takes into consideration the status of current taxing authorities' examinations of the Company's tax returns, recent positions taken by the taxing authorities on similar transactions, if any, and the overall tax environment.

The Company did not record any additional liability for unrecognized tax benefits relating to California tax incentives and temporary differences during the first quarter of 2010. The Company had gross unrecognized tax benefits recorded as of March 31, 2010 in the amount of \$2.3 million. If recognized the unrecognized tax benefit would impact the 2010 annual effective tax rate by 7.12%. During the first quarter of 2010, the Company also accrued \$34,000 of interest related to unrecognized tax benefits, which is reported by the Company as a component of tax expense. As of March 31, 2010, the accrued interest related to unrecognized tax benefits is \$399,000.

Note 13 Earnings Per Common Share

Nonvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities and are included in the computation of EPS pursuant to the two-class method. The two-class method is an earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net income, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. *Basic earnings per common share* is computed by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted earnings per common share is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares, excluding the participating securities, were issued using the treasury stock method. For all periods presented, warrants, stock options, certain restricted stock awards and restricted stock units are the only potentially dilutive non-participating instruments issued by the Company. Next, we determine and include in diluted earnings per common share calculation the more dilutive effect of the participating securities using the treasury stock method or the two-class method. Undistributed losses are not allocated to the nonvested share-based payment awards (the participating securities) under the two-class method as the holders are not contractually obligated to share in the losses of the Company.

The following is a computation of basic and diluted loss per common share for the three months ended March 31, 2010 and 2009:

Table of Contents

(in thousands, except per share data)

	Three months ended March 31,	
	2010	2009
NUMERATORS:		
Net income (loss)	\$ 9,725	\$ (15,249)
Less:		
Preferred stock dividends	12,192	3,191
Dividends and undistributed earnings allocated to participating securities ⁽¹⁾	15	8
Net loss available to common shareholders	\$ (2,482)	\$ (18,448)
DENOMINATORS:		
Weighted average number of common shares outstanding - basic	92,176	60,176
Effect of potentially dilutive common shares ⁽²⁾	-	-
Weighted average number of common shares outstanding - diluted	92,176	60,176
LOSS PER COMMON SHARE:		
Basic	\$ (0.03)	\$ (0.31)
Diluted	\$ (0.03)	\$ (0.31)

(1) Represents dividends paid and undistributed earnings allocated to nonvested restricted stock awards.

(2) Represents the effect of the assumed exercise of warrants, assumed exercise of stock options, vesting of non-participating restricted shares, and vesting of restricted stock units, based on the treasury stock method.

The following table presents the weighted average outstanding securities that were not included in the computation of diluted earnings per common share because their effect would be anti-dilutive for the three months ended March 31, 2010 and 2009.

(in thousands)

	Three months ended March 31,	
	2010	2009
Stock options	1,855	1,939
CPP warrant	1,111	2,222
Non-participating, nonvested restricted shares	12	21
Restricted stock units	56	141
	3,034	4,323

Note 14 Segment Information

The Company operates three primary segments: Community Banking, Mortgage Banking and Retail Brokerage. The Community Banking segment's principal business focus is the offering of loan and deposit products to business and retail customers in its primary market areas. As of March 31, 2010, the Community Banking segment operated 176 locations throughout Oregon, Northern California and Washington.

The Mortgage Banking segment, which operates as a division of the Bank, originates, sells and services residential mortgage loans.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The Retail Brokerage segment consists of the operations of Umpqua Investments, which offers a full range of retail brokerage services and products to its clients who consist primarily of individual investors. The Company accounts for intercompany fees and services between Umpqua Investments and the Bank at estimated fair value according to regulatory requirements for services provided. Intercompany items relate primarily to management services, referral fees and interest on intercompany borrowings.

Summarized financial information concerning the Company's reportable segments and the reconciliation to the consolidated financial results is shown in the following tables:

(1) Principally represents U.S. Treasury and agencies or residential mortgage-backed securities issued or guaranteed by governmental agencies.

The following methods were used to estimate the fair value of each class of financial instrument above:

Cash and Cash Equivalents For short-term instruments, including cash and due from banks, and interest-bearing deposits with banks, the carrying amount is a reasonable estimate of fair value.

Securities Fair values for investment securities are based on quoted market prices when available or through the use of alternative approaches, such as matrix or model pricing, or broker indicative bids, when market quotes are not readily accessible or available.

Loans Held For Sale For loans held for sale, carrying value approximates fair value.

Non-covered Loans Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type, including commercial, real estate and consumer loans. Each loan category is further segregated by fixed and variable rate, performing and nonperforming categories. The carrying values of variable rate real estate construction and development loans are discounted by a liquidity adjustment related to the current market environment. For the remaining variable rate loans, carrying value approximates fair value. The fair value of fixed rate loans is calculated by discounting contractual cash flows at rates which similar loans are currently being made and a liquidity adjustment related to the current market environment. The fair value of non-accrual loans are discounted further by a liquidity adjustment given the current market conditions.

Covered Loans Covered loans are measured at estimated fair value on the date of acquisition. Carrying value is calculated as the present value of expected cash flows and approximates fair value.

Restricted Equity Securities The carrying value of restricted equity securities approximates fair value as the shares can only be redeemed by the issuing institution at par.

Mortgage Servicing Rights The fair value of mortgage servicing rights is estimated using a discounted cash flow model. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys, as available. Due to the limited observability of all significant inputs utilized in the valuation model, particularly the discount rate and projected constant prepayment rate, and how changes in these assumptions could potentially impact the ending valuation of this asset, as well as the lack of readily available quotes or observable trades of similar assets in the current period, we have classified this as a Level 3 fair value measure in the third quarter of 2009. The transfer into Level 3 did not result in any changes in the methodology applied or the amount of realized or unrealized gains or losses recognized in the period. Management believes the significant inputs utilized are indicative of those that would be used by market participants.

Table of Contents

Bank Owned Life Insurance Assets Fair values of insurance policies owned are based on the insurance contract's cash surrender value.

Deposits The fair value of deposits with no stated maturity, such as non-interest-bearing deposits, savings and interest checking accounts, and money market accounts, is equal to the amount payable on demand as of March 31, 2010 and December 31, 2009. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

Securities Sold under Agreements to Repurchase and Federal Funds Purchased For short-term instruments, including securities sold under agreements to repurchase and federal funds purchased, the carrying amount is a reasonable estimate of fair value.

Term Debt The fair value of medium term notes is calculated based on the discounted value of the contractual cash flows using current rates at which such borrowings can be obtained.

Junior Subordinated Debentures The fair value of junior subordinated debentures is estimated using an income approach valuation technique. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants. Due to the increasing credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure since the third quarter of 2008. In the second quarter of 2009, due to continued inactivity in the junior subordinated debenture and related markets and clarified guidance relating to the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased or where transactions are not orderly, management evaluated and determined to rely on a third-party pricing service to estimate the fair value of these liabilities. The pricing service utilizes an income approach valuation technique, specifically an option-adjusted spread (OAS) valuation model. This OAS model values the cash flows over multiple interest rate scenarios and discounts these cash flows using a credit risk adjustment spread over the three month LIBOR swap curve. Prior to the second quarter of 2009, we estimated the fair value of junior subordinated debentures using an internal discounted cash flow model. The OAS model currently being utilized is more sophisticated and computationally intensive than the model previously used; however, the models react similarly to changes in the underlying inputs, and the results are considered comparable.

FDIC Indemnification Asset The FDIC indemnification asset is initially recorded at fair value, based on the discounted value of expected future cash flows under the loss-share agreement.

Derivative Instruments The fair value of the derivative instruments is estimated using quoted or published market prices for similar instruments, adjusted for factors such as pull-through rate assumptions based on historical information, where appropriate.

Visa Class B Common Stock The fair value of Visa Class B common stock is estimated by applying a 19% discount to the value of the unredeemed Class A equivalent shares. The discount is determined by a third-party and primarily represents the risk related to the further potential reduction of the conversion ratio between Class B and Class A shares and a liquidity risk premium.

The following table provides a reconciliation of assets and liabilities measured at fair value using significant unobservable inputs (Level 3) on a recurring basis during the three months ended March 31, 2010 and 2009. The amount included in the Transfers into Level 3 column represents the beginning balance of an item in the period for which it is designated as a Level 3 fair value measure.

(in thousands)

Three months ended March 31,	Beginning Balance	Change included in earnings	Purchases and issuances	Sales and settlements	Transfers into Level 3	Ending Balance	Net change in unrealized gains or losses relating to items held at end of period
2010							
Mortgage servicing rights	\$ 12,625	\$ (129)	\$ 1,132	\$ -	\$ -	\$ 13,628	\$ 105
Junior subordinated debentures	85,666	(5,134)	-	(969)	-	79,563	(5,134)
2009							
Junior subordinated debentures	\$ 92,520	\$ 884	\$ -	\$ (1,722)		\$ 91,682	\$ 884

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Gains (losses) on mortgage servicing rights carried at fair value are recorded in mortgage banking revenue within other non-interest income. Gains resulting from the widening of the credit risk adjusted spread and changes in the three month LIBOR swap curve are recorded as gains on junior subordinated debentures carried at fair value within other non-interest income. The contractual interest expense on the junior subordinated debentures is recorded on an accrual basis as interest on junior subordinated debentures within interest expense. Settlements relate to the junior subordinated debentures represent the payment of accrued interest that is embedded in the fair value of these liabilities.

Table of Contents

Management believes that the credit risk adjusted spread being utilized is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. Management attributes the change in fair value of the junior subordinated debentures during the period to market changes in the nonperformance expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk. The widening of the credit risk adjusted spread above the Company's contractual spreads has primarily contributed to the positive fair value adjustments. Future contractions in the credit risk adjusted spread relative to the spread currently utilized to measure the Company's junior subordinated debentures at fair value as of March 31, 2010, or the passage of time, will result in negative fair value adjustments. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR swap curve will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR swap curve will result in negative fair value adjustments.

Additionally, from time to time, certain assets are measured at fair value on a nonrecurring basis. These adjustments to fair value generally result from the application of lower-of-cost-or-market accounting or write-downs of individual assets due to impairment. The following table presents information about the Company's assets and liabilities measured at fair value on a nonrecurring basis for which a nonrecurring change in fair value has been recorded during the reporting period. The amounts disclosed below represent the fair values at the time the nonrecurring fair value measurements were made, and not necessarily the fair value as of the dates reported upon.

(in thousands)

Description	Total	March 31, 2010		
		Level 1	Level 2	Level 3
Investment securities, held to maturity				
Residential mortgage-backed securities and collateralized mortgage obligations	\$ 841	\$ -	\$ -	\$ 841
Non-covered loans and leases	73,751	-	-	73,751
Non-covered other real estate owned	1,995	-	-	1,995
	\$ 76,587	\$ -	\$ -	\$ 76,587

Description	Total	December 31, 2009		
		Level 1	Level 2	Level 3
Investment securities, held to maturity				
Residential mortgage-backed securities and collateralized mortgage obligations	\$ 2,875	\$ -	\$ -	\$ 2,875
Non-covered loans and leases	138,134	-	-	138,134
Goodwill	607,307	-	-	607,307

Non-covered other real estate owned	16,607	-	-	16,607
	\$ 765,218	\$ -	\$ -	\$ 765,218

The following table presents the losses resulting from nonrecurring fair value adjustments for the three months ended March 31, 2010 and 2009:

(in thousands)

	Three months ended	
	March 31, 2010	March 31, 2009
Investment securities, held to maturity	\$ 289	\$ 2,137

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Residential mortgage-backed securities and collateralized mortgage obligations

Non-covered loans and leases	33,140	54,372
Non-covered other real estate owned	907	1,611
Total loss from nonrecurring measurements	\$ 34,336	\$ 58,120

The investment securities held to maturity above relate to non-agency collateralized mortgage obligations where other-than-temporary impairment (OTTI) has been identified and the investments have been adjusted to fair value. The fair value of these investments securities were obtained from third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. While we do not expect to recover the entire amortized cost basis of these securities, as we as we do not intend

Table of Contents

to sell these securities and it is not likely that we will be required to sell these securities before maturity, only the credit loss component of the impairment is recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. The remaining impairment loss related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to a separate component other comprehensive income (OCI). We estimate the cash flows of the underlying collateral within each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then use a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows are then discounted at the interest rate used to recognize interest income on each security.

The non-covered loans and leases amount above represents impaired, collateral dependent loans that have been adjusted to fair value. When we identify a collateral dependent loan as impaired, we measure the impairment using the current fair value of the collateral, less selling costs. Depending on the characteristics of a loan, the fair value of collateral is generally estimated by obtaining external appraisals. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. The loss represents charge-offs or impairments on collateral dependent loans for fair value adjustments based on the fair value of collateral. The carrying value of loans fully charged-off is zero.

The non-covered other real estate owned amount above represents impaired real estate that has been adjusted to fair value. Non-covered other real estate owned represents real estate which the Bank has taken control of in partial or full satisfaction of loans. At the time of foreclosure, other real estate owned is recorded at the lower of the carrying amount of the loan or fair value less costs to sell, which becomes the property's new basis. Any write-downs based on the asset's fair value at the date of acquisition are charged to the allowance for loan and lease losses. After foreclosure, management periodically performs valuations such that the real estate is carried at the lower of its new cost basis or fair value, net of estimated costs to sell. Fair value adjustments on other real estate owned are recognized within net loss on real estate owned. The loss represents impairments on non-covered other real estate owned for fair value adjustments based on the fair value of the real estate.

Note 16 Subsequent Event

On April 20, 2010, shareholders of the Company approved an amendment to the Company's Restated Articles of Incorporation. The amendment, which became effective on April 21, 2010, increases the number of authorized shares of common stock to 200,000,000 (from 100,000,000). As a result of the effectiveness of the amendment, as of the close of business on April 21, 2010, the Company's Series B Common Stock Equivalent preferred stock automatically converted into newly issued shares of common stock at a conversion rate of 100 shares of common stock for each share of Series B Common Stock Equivalent preferred stock. Fractional interests (1/100th) in each share of the Series B Common Stock Equivalent are represented by 18,975,000 depositary shares; as a result, each depositary share converts into one share of common stock. All shares of Series B Common Stock Equivalent preferred stock and representative depositary shares cease to exist upon the conversion. Trading in the depositary shares on NASDAQ (ticker symbol UMPQP) ceased and the UMPQP symbol voluntarily delisted effective as of the close of business on April 21, 2010.

Forward-Looking Statements

This Report contains certain forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. These statements may include statements that expressly or implicitly predict future results, performance or events. Statements other than statements of historical fact are forward-looking statements. You can find many of these statements by looking for words such as anticipates, expects, believes, estimates and intends and words or phrases of similar meaning. We make forward-looking statements regarding projected sources of funds, use of proceeds, availability of acquisition and growth opportunities, dividends, adequacy of our allowance for loan and lease losses and provision for loan and lease losses, our commercial real estate portfolio and subsequent chargeoffs. Forward-looking statements involve substantial risks and uncertainties, many of which are difficult to predict and are generally beyond our control. There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. Risks and uncertainties include those set forth in our filings with the SEC, and the following factors that might cause actual results to differ materially from those presented:

- our ability to attract new deposits and loans and leases;
- demand for financial services in our market areas;
- competitive market pricing factors;
- deterioration in economic conditions that could result in increased loan and lease losses;
- risks associated with concentrations in real estate related loans;
- market interest rate volatility;
- stability of funding sources and continued availability of borrowings;
- changes in legal or regulatory requirements or the results of regulatory examinations that could restrict growth;
- our ability to recruit and retain key management and staff;
- availability of, and competition for, FDIC-assisted acquisition opportunities;
- risks associated with merger and acquisition integration;
- significant decline in the market value of the Company that could result in an impairment of goodwill;
- our ability to raise capital or incur debt on reasonable terms;
- regulatory limits on the Bank's ability to pay dividends to the Company;
- effectiveness of the Emergency Economic Stabilization Act of 2008 (EESA) and other legislative and regulatory efforts to help stabilize the U.S. financial markets;
- the impact of the EESA and the American Recovery and Reinvestment Act (ARRA), pending financial institution reform legislation and related rules and regulations on the Company's business operations and competitiveness, including the impact of executive compensation restrictions, which may affect the Company's ability to retain and recruit executives in competition with other firms who do not operate under those restrictions.

There are many factors that could cause actual results to differ materially from those contemplated by these forward-looking statements. We do not intend to update these forward-looking statements. Readers should consider any forward-looking statements in light of this explanation, and we caution readers about relying on forward-looking statements.

General

Umpqua Holdings Corporation (referred to in this report as we, our, Umpqua, and the Company), an Oregon corporation, is a financial holding company with two principal operating subsidiaries, Umpqua Bank (the Bank) and Umpqua Investments, Inc. (Umpqua Investments). Prior to July 2009, Umpqua Investments was known as Strand, Atkinson, Williams & York, Inc.

Our headquarters are located in Portland, Oregon, and we engage primarily in the business of commercial and retail banking and the delivery of retail brokerage services. The Bank provides a wide range of banking, mortgage banking and other financial services to corporate, institutional and individual customers. Along with our subsidiaries, we are subject to the regulations of state and federal agencies and undergo periodic examinations by these regulatory agencies.

Table of Contents

We are considered one of the most innovative community banks in the United States, combining a retail product delivery approach with an emphasis on quality-assured personal service. The Bank has evolved from a traditional community bank into a community-oriented financial services retailer by implementing a variety of retail marketing strategies to increase revenue and differentiate ourselves from our competition.

Umpqua Investments is a registered broker-dealer and investment advisor with offices in Portland, Eugene, and Medford, Oregon, and in many Umpqua Bank stores. The firm is one of the oldest investment companies in the Northwest and is active in many community events. Umpqua Investments offers a full range of investment products and services including: stocks, fixed income securities (municipal, corporate, and government bonds, CDs, and money market instruments), mutual funds, annuities, options, retirement planning, money management services, life insurance, disability insurance and medical supplement policies.

Executive Overview

Significant items for the first quarter of 2010 were as follows:

In February, the Company raised \$303.6 million through a public offering by issuing 8,625,000 shares of common stock and 18,975,000 depository shares. After deducting underwriting discounts and commissions and offering expenses, net proceeds to the Company were \$288.2 million. The proceeds from the offering qualify as Tier 1 capital and were used to redeem the preferred stock issued to the United States Department of the Treasury (U.S. Treasury) under the TARP Capital Purchase program (CPP), to fund FDIC-assisted acquisition opportunities and for general corporate purposes.

In February, the Company redeemed all of the outstanding preferred stock issued to the U.S. Treasury under the TARP CPP for an aggregate purchase price of \$214.2 million. Also, in March, the Company repurchased the common stock warrant issued to the U.S. Treasury for \$4.5 million. This represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the U.S. Treasury.

Net loss available to common shareholders per diluted common share was \$0.03 for the three months ended March 31, 2010, as compared to net loss available to common shareholders per diluted common share of \$0.31 for the three months ended March 31, 2009. Operating loss per diluted common share, defined as earnings available to common shareholders before gain on fair value of junior subordinated debentures, bargain purchase gain relating to the EvergreenBank acquisition, and merger related expenses, net of tax, divided by the same diluted share total used in determining diluted earnings per common share, was \$0.11 for the three months ended March 31, 2010, as compared to operating loss per diluted common share of \$0.31 for the three months ended March 31, 2009. Operating income per diluted share is considered a non-GAAP financial measure. More information regarding this measurement and reconciliation to the comparable GAAP measurement is provided under the heading *Results of Operations Overview* below.

Non-covered non-performing assets decreased to \$209.6 million, or 1.99% of total assets, as of March 31, 2010, as compared to \$223.6 million, or 2.38% of total assets, as of December 31, 2009. Non-covered non-performing loans decreased to \$190.7 million, or 3.27% of total non-covered loans, as of March 31, 2010, as compared to \$199.0 million, or 3.32% of total non-covered loans, as of December 31, 2009. Non-accrual loans have been written-down to their estimated net realizable values.

Net charge-offs were \$39.0 million for the three months ended March 31, 2010, or 2.66% of average non-covered loans and leases (annualized), as compared to net charge-offs of \$59.9 million, or 3.96% of average non-covered loans and leases (annualized), for the three months ended March 31, 2009.

The provision for loan and lease losses was \$42.1 million for the three months ended March 31, 2010, as compared to the \$59.1 million recognized for the three months ended March 31, 2009. This resulted from the decrease in net charge-offs and non-performing loans.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

We recorded gains of \$6.1 million representing the change in fair value on our junior subordinated debentures measured at fair value in the three months ended March 31, 2010, compared to gains of \$580,000 in the three months ended March 31, 2009. The gains recognized during these periods primarily resulted from the widening of the credit risk adjusted rate spread above the Company's contractual spreads.

Mortgage banking revenue was \$3.5 million for the three months ended March 31, 2010, compared to \$4.1 million for the three months ended March 31, 2009. Closed mortgage volume decreased 34% in the current quarter over the prior year same period due to a decrease in purchase and refinancing activity.

Umpqua Bank entered into purchase and assumption agreements with the FDIC to purchase certain assets and assume certain liabilities of EvergreenBank (Evergreen) in Seattle, Washington and Rainier Pacific Bank (Rainier) in Tacoma,

Table of Contents

Washington. Total assets assumed were \$355.3 million and \$721.2 million, respectively, and resulted in 7 and 14 new stores in the Washington market, respectively.

FDIC assessments increased to \$3.4 million for the three months ended March 31, 2010, compared to \$2.6 million for the three months ended March 31, 2009. The increase over the prior period is a result of an industry-wide increase in assessment rates, organic deposit growth, and the deposit growth in the first quarter resulting from the FDIC-assisted acquisitions of Evergreen and Rainier.

Net interest margin, on a tax equivalent basis, decreased to 4.04% for the three months ended March 31, 2010, compared to 4.07% for the same period a year ago. The decrease in net interest margin resulted primarily from interest reversals of new non-accrual loans, a decline in non-covered loans outstanding, and the impact of much higher levels of interest bearing cash, partially offset by the declining costs of interest bearing deposits. Excluding interest reversals on loans of \$1.1 million for the three months ended March 31, 2010, net interest margin would have been 4.09%.

Total risk based capital increased to 17.8% as of March 31, 2010, compared to 17.2% as of December 31, 2009, due to the successful public stock offering completed in February 2010 partially offset by the redemption of preferred stock issued to the U.S. Treasury.

Total gross non-covered loans and leases were \$5.8 billion as of March 31, 2010, a decrease of \$167.4 million, or 2.8%, as compared to December 31, 2009. This decrease is principally attributable to charge-offs of \$39.8 million, transfers to other real estate owned of \$6.0 million, and net loan paydowns and maturities of \$137.2 million during the period.

Total deposits were \$8.2 billion as of March 31, 2010, an increase of \$766.8 million, or 10.3%, as compared to December 31, 2009. Excluding the deposits acquired through the FDIC-assisted acquisitions, the annualized organic deposit growth rate was 6.2%.

Total consolidated assets were \$10.5 billion as of March 31, 2010, representing an increase of \$1.1 billion compared to December 31, 2009. The increase is primarily attributable to the purchase of certain assets in the FDIC-assisted acquisitions of Evergreen and Rainier.

Cash dividends declared in the first quarter of 2010 were \$0.05 per common share, consistent with the amounts declared since the fourth quarter of 2008.

Summary of Critical Accounting Policies

Our significant accounting policies are described in Note 1 to the Consolidated Financial Statements for the year ended December 31, 2009 included in the Form 10-K filed with the Securities and Exchange Commission (SEC) on February 25, 2010. Not all of these critical accounting policies require management to make difficult, subjective or complex judgments or estimates. Management believes that the following policies would be considered critical under the SEC's definition.

Allowance for Loan and Lease Losses and Reserve for Unfunded Commitments

The Bank performs regular credit reviews of the loan and lease portfolio to determine the credit quality and adherence to underwriting standards. When loans and leases are originated, they are assigned a risk rating that is reassessed periodically during the term of the loan through the credit review process. The Company's risk rating methodology assigns risk ratings ranging from 1 to 10, where a higher rating represents higher risk. The 10 risk rating categories are a primary factor in determining an appropriate amount for the allowance for loan and lease losses. The Bank has a management Allowance for Loan and Lease Losses (ALLL) Committee, which is responsible for, among other things, regularly reviewing the ALLL methodology, including loss factors, and ensuring that it is designed and applied in accordance with generally accepted accounting principles. The ALLL Committee reviews and approves loans and leases recommended for impaired status. The ALLL Committee also approves removing loans and leases from impaired status. The Bank's Audit and Compliance Committee provides board oversight of the ALLL process and reviews and approves the ALLL methodology on a quarterly basis.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Each risk rating is assessed an inherent credit loss factor that determines the amount of the allowance for loan and lease losses provided for that group of loans and leases with similar risk rating. Credit loss factors may vary by region based on management's belief that there may ultimately be different credit loss rates experienced in each region.

Regular credit reviews of the portfolio also identify loans that are considered potentially impaired. Potentially impaired loans are referred to the ALLL Committee which reviews and approves designated loans as impaired. A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. When we identify a loan as impaired, we measure the impairment using

Table of Contents

discounted cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. If we determine that the value of the impaired loan is less than the recorded investment in the loan, we either recognize an impairment reserve as a specific component to be provided for in the allowance for loan and lease losses or charge-off the impaired balance on collateral dependent loans if it is determined that such amount represents a confirmed loss. The combination of the risk rating-based allowance component and the impairment reserve allowance component lead to an allocated allowance for loan and lease losses.

The Bank may also maintain an unallocated allowance amount to provide for other credit losses inherent in a loan and lease portfolio that may not have been contemplated in the credit loss factors. This unallocated amount generally comprises less than 5% of the allowance, but may be maintained at higher levels during times of deteriorating economic conditions characterized by falling real estate values. The unallocated amount is reviewed periodically based on trends in credit losses, the results of credit reviews and overall economic trends.

The reserve for unfunded commitments (RUC) is established to absorb inherent losses associated with our commitment to lend funds, such as with a letter or line of credit. The adequacy of the ALLL and RUC are monitored on a regular basis and are based on management's evaluation of numerous factors. These factors include the quality of the current loan portfolio; the trend in the loan portfolio's risk ratings; current economic conditions; loan concentrations; loan growth rates; past-due and non-performing trends; evaluation of specific loss estimates for all significant problem loans; historical charge-off and recovery experience; and other pertinent information.

Management believes that the ALLL was adequate as of March 31, 2010. There is, however, no assurance that future loan losses will not exceed the levels provided for in the ALLL and could possibly result in additional charges to the provision for loan and lease losses. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review. Approximately 82% of our non-covered loan portfolio is secured by real estate, and a significant decline in real estate market values may require an increase in the allowance for loan and lease losses. Over the last several years, there has been deterioration in the residential development market which has led to an increase in non-performing loans and the allowance for loan and lease losses. A continued deterioration in this market or deterioration in other segments of our loan portfolio, such as commercial real estate or commercial construction, may lead to additional charges to the provision for loan and lease losses.

Mortgage Servicing Rights (MSR)

The Company determines its classes of servicing assets based on the asset type being serviced along with the methods used to manage the risk inherent in the servicing assets, which includes the market inputs used to value the servicing assets. The Company measures its residential mortgage servicing assets at fair value and reports changes in fair value through earnings. Fair value adjustments encompass market-driven valuation changes and the runoff in value that occurs from the passage of time, which are separately reported. Under the fair value method, the MSR is carried in the balance sheet at fair value and the changes in fair value are reported in earnings under the caption mortgage banking revenue in the period in which the change occurs.

Retained mortgage servicing rights are measured at fair values as of the date of sale. We use quoted market prices when available. Subsequent fair value measurements are determined using a discounted cash flow model. In order to determine the fair value of the MSR, the present value of expected future cash flows is estimated. Assumptions used include market discount rates, anticipated prepayment speeds, delinquency and foreclosure rates, and ancillary fee income. This model is periodically validated by an independent external model validation group. The model assumptions and the MSR fair value estimates are also compared to observable trades of similar portfolios as well as to MSR broker valuations and industry surveys.

The expected life of the loan can vary from management's estimates due to prepayments by borrowers, especially when rates fall. Prepayments in excess of management's estimates would negatively impact the recorded value of the mortgage servicing rights. The value of the mortgage servicing rights is also dependent upon the discount rate used in the model, which we base on current market rates. Management reviews this rate on an ongoing basis based on current market rates. A significant increase in the discount rate would reduce the value of mortgage servicing rights. Additional information is included in Note 6 of the *Notes to Consolidated Financial Statements*.

Valuation of Goodwill and Intangible Assets

At March 31, 2010, we had \$679.3 million in goodwill and other intangible assets as a result of business combinations. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management performs an impairment analysis for the intangible assets with indefinite lives on an annual basis as of December 31. Additionally, goodwill and other intangible assets with indefinite lives are evaluated on an interim basis when events or circumstance indicate impairment potentially exists. The impairment analysis requires management to make subjective judgments. Events and factors that may significantly affect the estimates include, among

others, competitive forces, customer behaviors and attrition, changes in revenue

Table of Contents

growth trends, cost structures, technology, changes in discount rates and specific industry and market conditions. There can be no assurance that changes in circumstances, estimates or assumption may result in additional impairment of all, or some portion of, goodwill.

Stock-based Compensation

In accordance with FASB ASC 718, *Stock Compensation*, we recognize expense in the income statement for the grant-date fair value of stock options and other equity-based forms of compensation issued to employees over the employees' requisite service period (generally the vesting period). The requisite service period may be subject to performance conditions. The fair value of each option grant is estimated as of the grant date using the Black-Scholes option-pricing model. Management assumptions utilized at the time of grant impact the fair value of the option calculated under the Black-Scholes methodology, and ultimately, the expense that will be recognized over the life of the option. Additional information is included in Note 11 of the *Notes to Consolidated Financial Statements*.

Fair Value

FASB ASC 820, *Fair Value Measurements and Disclosures* establishes a hierarchical disclosure framework associated with the level of pricing observability utilized in measuring financial instruments at fair value. The degree of judgment utilized in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Financial instruments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have little or no pricing observability and a higher degree of judgment utilized in measuring fair value. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and the characteristics specific to the transaction. See Note 2 of the *Notes to Consolidated Financial Statements* for additional information about the level of pricing transparency associated with financial instruments carried at fair value.

Acquired Loans

In accordance with FASB ASC 310-30, acquired loans are aggregated into pools based on individually evaluated common risk characteristics and aggregate expected cash flow were estimated for each pool. A pool is accounted for as a single asset with a single interest rate, cumulative loss rate and cash flow expectation. The Company aggregated all of the loans acquired in the FDIC-assisted acquisitions of Evergreen and Rainier into 45 and 52 different pools, respectively. A loan will be removed from a pool of loans only if the loan is sold, foreclosed, assets are received in satisfaction of the loan, or the loan is written off, and will be removed from the pool at the carrying value. If an individual loan is removed from a pool of loans, the difference between its relative carrying amount and the cash, fair value of the collateral, or other assets received will be recognized in income immediately and would not affect the effective yield used to recognize the accretable difference on the remaining pool. Loans originally placed into a performing pool will not be reported individually as 30-89 days past due, non-performing (90+ days past due or nonaccrual), or accounted for as a troubled debt restructuring as the pool is the unit of accounting. Rather, these metrics related to the underlying loans within a performing pool will be considered in our ongoing assessment and estimates of future cash flows. If, at acquisition, the loans are collateral dependent and acquired primarily for the rewards of ownership of the underlying collateral, or if cash flows expected to be collected cannot be reasonably estimated, accrual of income is inappropriate. Such loans will be placed into nonperforming (nonaccrual) loan pools.

The cash flows expected to be received over the life of the pool were estimated by management with the assistance of a third party valuation specialist. These cash flows were input into a ASC 310-30 compliant accounting loan system which calculates the carrying values of the pools and underlying loans, book yields, effective interest income and impairment, if any, based on actual and projected events. Default rates, loss severity, and prepayment speeds assumptions will be periodically reassessed and updated within the accounting model to update our expectation of future cash flows. The excess of the cash flows expected to be collected over the pool's carrying value is considered to be the accretable yield and is recognized as interest income over the estimated life of the loan or pool using the effective yield method. The accretable yield will change due to changes in the timing and amounts of expected cash flows. For the performing loan pools, we initially apply a prepayment assumption as documented by the valuation specialist. Changes in the accretable yield will be disclosed quarterly.

The excess of the contractual balances due over the cash flows expected to be collected is considered to be the nonaccretable difference. The nonaccretable difference represents our estimate of the credit losses expected to occur and was considered in determining the fair value of the loans as of the acquisition date. Subsequent to the acquisition date, any increases in expected cash flows over those expected at purchase date in excess of fair value are adjusted through the accretable difference on a prospective basis. Any subsequent decreases in expected cash flows over those expected at purchase date are recognized by recording a provision for loan losses. Any disposals of loans, including sales of loans, payments in full or foreclosures, result in the removal of the loan from the pool at its carrying amount. The difference between actual prepayments and expected prepayments will not affect the nonaccretable difference.

Table of Contents

The acquired loan portfolio also includes revolving lines of credit with funded and unfunded commitments. Funds advanced at the time of acquisition will be accounted for under FASB ASC 310-30. Any additional advances on these loans subsequent to the acquisition date will not be accounted for under ASC 310-30.

Recent Accounting Pronouncements

In April 2009, FASB amended FASB ASC 820, *Fair Value Measurements and Disclosures*, to address issues related to the determination of fair value when the volume and level of activity for an asset or liability has significantly decreased, and identifying transactions that are not orderly. The revisions affirm the objective that fair value is the price that would be received to sell an asset in an orderly transaction (that is not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions, even if the market is inactive. The amendment provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have decreased significantly. It also provides guidance on identifying circumstances that indicate a transaction is not orderly. If determined that a quoted price is distressed (not orderly), and thereby not representative of fair value, the entity may need to make adjustments to the quoted price or utilize an alternative valuation technique (e.g. income approach or multiple valuation techniques) to determine fair value. Additionally, an entity must incorporate appropriate risk premium adjustments, reflective of an orderly transaction under current market conditions, due to uncertainty in cash flows. The revised guidance requires disclosures in interim and annual periods regarding the inputs and valuation techniques used to measure fair value and a discussion of changes in valuation techniques and related inputs, if any, during the period. It also requires financial institutions to disclose the fair values of investment securities by major security type. The changes are effective for the interim reporting period ending after June 15, 2009, and are to be applied prospectively. The adoption of these amendments impacted the Company's determination of fair value related to our junior subordinated debentures measured at fair value. As of March 31, 2009, prior to the adoption of these amendments, we discounted these liabilities by the current three month LIBOR plus a credit risk adjusted spread of 500 basis points. Due to the lack of observable, orderly transactions, of either new issuances or trades, we estimated that a market participant would utilize a credit risk adjusted spread of 500 basis points if an actual market transaction in an active market were to take place for an entity with comparable nonperformance risk. The amendments clarify that a fair value measurement shall assume a risk premium market participants would require at a measurement date under current market conditions, even if the market is inactive. With the assistance of a third-party pricing service, we determined that a credit risk adjusted spread of 675 basis points would be representative of the nonperformance risk premium a market participant would require under current market conditions as of June 30, 2009. In accordance with the guidance, this was accounted for as a change in accounting estimate. This increase in the credit risk adjusted spread is the primary factor resulting in the \$8.6 million gain on junior subordinated debentures carried at fair value recognized in the second quarter of 2009. The effect of these amendments did not have a significant impact on the fair value measurement of any other assets or liabilities.

In April 2009, FASB revised FASB ASC 320, *Investments – Debt and Equity Securities*, to change the OTTI model for debt securities. Previously, an entity was required to assess whether it has the intent and ability to hold a security to recovery in determining whether an impairment of that security is other-than-temporary. If the impairment was deemed other-than-temporarily impaired, the investment was written-down to fair value through earnings. Under the revised guidance, OTTI is triggered if an entity has the intent to sell the security, it is likely that it will be required to sell the security before recovery, or if the entity does not expect to recover the entire amortized cost basis of the security. If the entity intends to sell the security or it is likely it will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If the entity does not intend to sell the security and it is not likely that the entity will be required to sell the security but the entity does not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings as an OTTI. The credit loss is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected of a security. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment loss related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, would be recognized as a charge to other comprehensive income (OCI). Impairment losses related to all other factors are to be presented as a separate category within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the OTTI amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is re-evaluated accordingly based on the procedures described above. Upon adoption of the revised guidance, the noncredit portion of previously recognized OTTI shall be reclassified to accumulated OCI by a cumulative-effect adjustment to the opening balance of retained earnings. These revisions became effective in the interim reporting period ending after June 15, 2009. Upon adoption of this guidance the Company analyzed the securities for which OTTI had been previously recognized and determined that as of the adoption date such losses were credit related. As such, there was no cumulative effect adjustment to the opening balance of retained earnings or a corresponding adjustment to accumulated OCI.

In December 2009, FASB issued ASU No. 2009-17, *Transfers and Servicing (Topic 860) – Accounting for Transfers of Financial Assets*. This update codifies SFAS No. 166, *Accounting for Transfers of Financial Assets – an Amendment of FASB Statement No. 140*, which was previously issued by FASB in June 2009 but was not included in the original codification. ASU 2009-17 eliminates the concept of a qualifying special-purpose entity, creates more stringent conditions for reporting a transfer of a portion of

Table of Contents

a financial asset as a sale, clarifies other sale-accounting criteria, and changes the initial measurement of a transferor's interest in transferred financial assets. This statement is effective for annual reporting periods beginning after November 15, 2009, and for interim periods therein. This standard will primarily impact the Company's accounting and reporting of transfers representing a portion of a financial asset for which the Company has a continuing involvement, generally known as loan participations. In order to recognize the transfer of a portion of a financial asset as a sale, the transferred portion and any portion that continues to be held by the transferor must represent a participating interest, and the transfer of the participating interest must meet the conditions for surrender of control. To qualify as a participating interest (i) the portions of a financial asset must represent a proportionate ownership interest in an entire financial asset, (ii) from the date of transfer, all cash flows received from the entire financial asset must be divided proportionately among the participating interest holders in an amount equal to their share of ownership, (iii) involve no recourse (other than standard representation and warranties) to, or subordination by, any participating interest holder, and (iv) no party has the right to pledge or exchange the entire financial asset. If the participating interest or surrender of control criteria are not met the transfer is not accounted for as a sale and derecognition of the asset is not appropriate. Rather the transaction is accounted for as a secured borrowing arrangement. The impact of certain participations being reported as secured borrowings rather than derecognizing a portion of a financial asset would increase total assets (loans), liabilities (term debt) and their respective interest income and expense. An increase in total assets also increases regulatory risk-weighted assets and could negatively impact our capital ratios. The Company is reviewing our participation agreements to ensure new originations meet the criteria to allow for sale accounting in order to limit the impact upon our financial statements. The terms contained in certain participation and loan sale agreements, however, are outside the control of the Company. These arrangements largely relate to Small Business Administration (SBA) loan sales. These sales agreements contain recourse provisions (generally 90 days) that will initially preclude sale accounting; however, once the recourse provision expires, transfers of portions of financial assets may be reevaluated to determine if they meet the participating interest definition. As a result, we expect to report SBA and potentially certain other transfers of financial assets as secured borrowings which will defer the gain of sale on these transactions, at least until the recourse provision expires, assuming all other sales criteria for each transaction are met. The Company does not believe it has or will have a significant amount of participations subject to recourse provisions or other features that would preclude derecognition of the assets transferred. The adoption of ASU No. 2009-17 did not materially impact the Company's consolidated financial statements.

In December 2009, FASB issued ASU No. 2009-18, *Consolidations (Topic 810) Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities*. This update codifies SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, which was previously issued by FASB in June 2009 but was not included in the original codification. ASU 2009-18 eliminates FASB Interpretations 46(R) (FIN 46(R)) exceptions to consolidating qualifying special-purpose entities, contains new criteria for determining the primary beneficiary, and increases the frequency of required reassessments to determine whether a company is the primary beneficiary of a variable interest entity (VIE). Under the revised guidance, the primary beneficiary of a VIE (party who must consolidate the VIE) is the enterprise that has (i) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, and (ii) the obligation to absorb losses of the VIE that could potentially be significant to the VIE, or the right to receive benefits of the VIE that could potentially be significant to the VIE. ASU 2009-18 also contains a new requirement that any term, transaction, or arrangement that does not have a substantive effect on an entity's status as a variable interest entity, a company's power over a variable interest entity, or a company's obligation to absorb losses or its right to receive benefits of an entity must be disregarded in applying FIN 46(R) provisions. The elimination of the qualifying special-purpose entity concept and its consolidation exceptions means more entities will be subject to consolidation assessments and reassessments. This statement requires additional disclosures regarding an entity's involvement in a variable interest entity. This statement is effective for annual reporting periods beginning after November 15, 2009, and for interim periods therein. The Company has evaluated the impact of this guidance in regards to our involvement with variable interest entities. This guidance potentially impacts the accounting for our limited partnership equity investments in affordable housing development funds and real estate investment funds. In regards to affordable housing investments, the primary activities that most significantly impacts the VIE's economic performance include leasing rental units at appropriate rent rates in compliance with low income housing restrictions and requirements, operating the rental property thereby generating income/loss from the partnership operations, and protecting the low income housing tax credits from recapture. As a limited partner, the Company generally does not participate in the control of the partnerships' business, our involvement is limited to providing a stated amount of financial support (commitment or subscription) as stated within contractual agreements, and the primary purpose of the investment is to receive the tax attributes (tax credits) of the partnership. The general partner, which generally are a developer or non-profit organization, exercise the day-to-day control and management of the partnerships that most significantly impacts the VIE's economic performance. In regards to the real estate investment funds, the primary activities that most significantly impacts the VIE's economic performance include the development, financing, and leasing of real estate related properties, and ultimately finding a profitable exit from such investments. The Company's involvement in these funds are limited minority interest partners. According to the terms of the partnerships, the general partners have exclusive control to manage the enterprise and power to direct activities that impact the VIE's economic performance. The impact of adoption did not result in the Company consolidating or deconsolidating any variable interest entities as accounted for under previous guidance and, therefore, did not have a material impact on the Company's consolidated financial statements.

In August 2009, the FASB issued ASU No. 2009-05, *Measuring Liabilities at Fair Value*. This update amends FASB ASC 820, *Fair Value Measurements and Disclosure*, in regards to the fair value measurement of liabilities. FASB ASC 820 clarifies that in circumstances in which a quoted price for a identical liability in an active market is not available, a reporting entity shall utilize one

Table of Contents

or more of the following techniques: i) the quoted price of the identical liability when traded as an asset, ii) the quoted price for a similar liability or a similar liability when traded as an asset, or iii) another valuation technique that is consistent with the principles of FASB ASC 820. In all instances a reporting entity shall utilize the approach that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs. Also, when measuring the fair value of a liability a reporting entity shall not include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. This update was effective for the Company in the fourth quarter of 2009, and primarily affected our considerations related to our measurement of junior subordinated debentures carried at fair value. The adoption of FASB ASU 2009-05 did not have a material impact on the Company's consolidated financial statements.

In January 2010, the FASB issued ASU No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements*. FASB ASU No. 2009-06 requires (i) fair value disclosures by each class of assets and liabilities (generally a subset within a line item as presented in the statement of financial position) rather than major category, (ii) for items measured at fair value on a recurring basis, the amounts of significant transfers between Levels 1 and 2, and transfers into and out of Level 3, and the reasons for those transfers, including separate discussion related to the transfers into each level apart from transfers out of each level, and (iii) gross presentation of the amounts of purchases, sales, issuances, and settlements in the Level 3 recurring measurement reconciliation. Additionally, the ASU clarifies that a description of the valuation techniques(s) and inputs used to measure fair values is required for both recurring and nonrecurring fair value measurements. Also, if a valuation technique has changed, entities should disclose that change and the reason for the change. Disclosures other than the gross presentation changes in the Level 3 reconciliation are effective for the first reporting period beginning after December 15, 2009. The requirement to present the Level 3 activity of purchases, sales, issuances, and settlements on a gross basis will be effective for fiscal years beginning after December 15, 2010. The adoption of this ASU did not have a material impact on the Company's consolidated financial statements.

In February 2010, the FASB issued ASU No. 2010-09, *Subsequent Events (Topic 855) Amendments to Certain Recognition and disclosure Requirements*. This ASU eliminates the requirement for to disclose the date through which a Company has evaluated subsequent events and refines the scope of the disclosure requirements for reissued financial statements. This ASU is effective for the first quarter of 2010. This ASU did not have a material impact on the Company's consolidated financial statements.

In March, the FASB issued ASU No. 2010-11, *Derivatives and Hedging (Topic 815) Scope Exception Related to Embedded Credit Derivatives*. The ASU eliminates the scope exception for bifurcation of embedded credit derivatives in interests in securitized financial assets, unless they are created solely by subordination of one financial instrument to another. The ASU is effective the first quarter beginning after June 15, 2010. The Company has evaluated the impact of adoption and does not expect the ASU will have a material impact on the Company's consolidated financial statements.

In April, the FASB issued ASU No. 2010-18, *Receivables (Topic 310) Effect of a Loan Modification When the Loan Is Part of a Pool That is Accounted for as a Single Asset*. This ASU clarifies that modifications of loans that are accounted for within a pool under Topic 310-30 do not result in the removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled debt restructuring. An entity will continue to be required to consider whether the pool of assets in which the loan is included is impaired if expected cash flows for the pool change. No additional disclosures are required with this ASU. The amendments in this ASU are effective for modifications of loans accounted for within pools under Topic 310-30 occurring in the first interim or annual period ending on or after July 15, 2010. The amendments are to be applied prospectively and early application is permitted. Upon initial adoption of the guidance in this ASU, an entity may make a onetime election to terminate accounting for loans as a pool under Topic 310-30. This election may be applied on a pool-by-pool basis and does not preclude an entity from applying pool accounting to subsequent acquisitions of loans with credit deterioration. The Company has evaluated the impact of adoption and does not expect the ASU will have a material impact on the Company's consolidated financial statements.

RESULTS OF OPERATIONS**OVERVIEW**

For the three months ended March 31, 2010, net loss available to common shareholders was \$2.5 million, or \$0.03 per diluted common share, as compared to net loss available to common shareholders of \$18.4 million, or \$0.31 per diluted common share for the three months ended March 31, 2009. The decrease in net loss available to common shareholders for the three months ended March 31, 2010 compared to the same periods of the prior year is principally attributable increased net interest income, decreased provision for loan losses, increased non-interest income, partially offset by increased non-interest expense and increased preferred stock dividends. Non-interest income includes a bargain purchase gain on acquisition in the first quarter of \$8.5 million relating to the acquisition of Evergreen. We assumed certain assets and liabilities of Evergreen and Rainier on January 22, 2010 and February 26, 2010, respectively, and the results of the acquired operations are included in our financial results starting on January 23, 2010 and February 27, 2010, respectively.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Umpqua recognizes gains or losses on our junior subordinated debentures carried at fair value resulting from changes in interest rates and the estimated market credit risk adjusted spread that do not directly correlate with the Company's operating performance. Also,

Table of Contents

Umpqua incurs significant expenses related to the completion and integration of mergers and acquisitions. Additionally, we may recognize goodwill impairment losses that have no direct effect on the Company's or the Bank's cash balances, liquidity, or regulatory capital ratios. Lastly, Umpqua may recognize one-time bargain purchase gains on certain FDIC-assisted acquisitions that are not reflective of Umpqua's on-going earnings power. Accordingly, management believes that our operating results are best measured on a comparative basis excluding the impact of gains or losses on junior subordinated debentures measured at fair value, net of tax, merger-related expenses, net of tax, and other charges related to business combinations such as goodwill impairment charges or bargain purchase gains, net of tax. We define *operating earnings* as earnings available to common shareholders before gains or losses on junior subordinated debentures carried at fair value, net of tax, bargain purchase gains on acquisitions, net of tax, merger related expenses, net of tax, and goodwill impairment, and we calculate operating earnings per diluted share by dividing operating earnings by the same diluted share total used in determining diluted earnings per common share.

The following table provides the reconciliation of loss available to common shareholders (GAAP) to operating loss (non-GAAP), and loss per diluted common share (GAAP) to operating loss per diluted share (non-GAAP) for the periods presented:

Reconciliation of Operating Loss to Net Loss Available to Common Shareholders

(in thousands, except per share data)

	Three months ended March 31,	
	2010	2009
Net loss available to common shareholders	\$ (2,482)	\$ (18,448)
Adjustments:		
Net gain on junior subordinated debentures carried at fair value, net of tax	(3,653)	(348)
Bargain purchase gain on acquisitions, net of tax	(5,074)	-
Merger-related expenses, net of tax	1,144	(120)
Operating loss	\$ (10,065)	\$ (18,916)
Per diluted share:		
Net loss available to common shareholders	\$ (0.03)	\$ (0.31)
Adjustments:		
Net gain on junior subordinated debentures carried at fair value, net of tax	(0.04)	-
Bargain purchase gain on acquisitions, net of tax	(0.05)	-
Merger-related expenses, net of tax	0.01	-
Operating loss	\$ (0.11)	\$ (0.31)

The following table presents the returns on average assets, average common shareholders' equity and average tangible common shareholders' equity for the three months ended March 31, 2010 and 2009. For each of the periods presented, the table includes the calculated ratios based on reported net loss available to common shareholders and operating loss income as shown in the table above. Our return on average common shareholders' equity is negatively impacted as the result of capital required to support goodwill. To the extent this performance metric is used to compare our performance with other financial institutions that do not have merger-related intangible assets, we believe it beneficial to also consider the return on average tangible common shareholders' equity. The return on average tangible common shareholders' equity is calculated by dividing net loss available to common shareholders by average shareholders' common equity less average goodwill and intangible assets, net (excluding MSRs). The return on average tangible common shareholders' equity is considered a non-GAAP financial measure and should be viewed in conjunction with the return on average common shareholders' equity.

Return on Average Assets, Common Shareholders' Equity and Tangible Common Shareholders' Equity

(dollars in thousands)

Table of Contents

	Three months ended March 31,	
	2010	2009
Returns on average assets:		
Net loss available to common shareholders	-0.10%	-0.86%
Operating loss	-0.41%	-0.87%
Returns on average common shareholders' equity:		
Net loss available to common shareholders	-0.71%	-5.80%
Operating loss	-2.86%	-5.88%
Returns on average tangible common shareholders' equity:		
Net loss available to common shareholders	-1.30%	-14.07%
Operating loss	-5.27%	-14.42%
Calculation of average common tangible shareholders' equity:		
Average common shareholders' equity	\$ 1,427,352	\$ 1,288,744
Less: average goodwill and other intangible assets, net	(653,336)	(757,055)
Average tangible common shareholders' equity	\$ 774,016	\$ 531,689

Additionally, management believes tangible common equity and the tangible common equity ratio are meaningful measures of capital adequacy. Umpqua believes the exclusion of certain intangible assets in the computation of tangible common equity and tangible common equity ratio provides a meaningful base for period-to-period and company-to-company comparisons, which management believes will assist investors in analyzing the operating results and capital of the Company. Tangible common equity is calculated as total shareholders' equity less preferred stock and less goodwill and other intangible assets, net (excluding MSRs). In addition, tangible assets are total assets less goodwill and other intangible assets, net (excluding MSRs). The tangible common equity ratio is calculated as tangible common shareholders' equity divided by tangible assets. The tangible common equity and tangible common equity ratio is considered a non-GAAP financial measure and should be viewed in conjunction with the total shareholders' equity and the total shareholders' equity ratio.

The following table provides a reconciliation of ending shareholders' equity (GAAP) to ending tangible common equity (non-GAAP), and ending assets (GAAP) to ending tangible assets (non-GAAP) as of March 31, 2010 and December 31, 2009:

Reconciliations of Total Shareholders' Equity to Tangible Common Shareholders' Equity and Total Assets to Tangible Assets

(dollars in thousands)

	March 31, 2010	December 31, 2009

8.27%

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied, and are not audited. Although we believe these non-GAAP financial measure are frequently used by stakeholders in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation or as a substitute for analyses of results as reported under GAAP.

Table of Contents

NET INTEREST INCOME

Net interest income is the largest source of our operating income. Net interest income for the three months ended March 31, 2010 was \$87.1 million, an increase of \$11.6 million or 15% compared to the same period in 2009. Net interest income for the three months ended March 31, 2010 was negatively impacted by the \$1.1 million reversal of interest income on loans during the quarter. The results for the three months ended March 31, 2010 as compared to the same period in 2009 are attributable to growth in outstanding average interest-earning assets, primarily investment securities, partially offset by growth in interest-bearing liabilities, primarily time deposits, and a decrease in net interest margin. In addition to organic growth, the FDIC-assisted purchase and assumption of certain assets and liabilities of Evergreen and Rainier, which were completed on January 22, 2010 and February 26, 2010, respectively, contributed to the increase in assets and liabilities in the three months ended March 31, 2010 over the same period in 2009.

The net interest margin (net interest income as a percentage of average interest-earning assets) on a fully tax-equivalent basis was 4.04% for the three months ended March 31, 2010, a decrease of 3 basis points as compared to the same period in 2009. The decrease in net interest margin primarily resulted from the decreased yield on interest-earning assets of 54 basis points primarily resulting from holding higher interest bearing cash balances with the Federal Reserve Bank (at 25 basis points), the decline in non-covered loan balances, and interest reversals on loans. The increased interest bearing cash balances result from the historically low yields available in the bond markets that do not present an attractive long-term investment alternative. The \$1.1 million reversal of interest income on non-accrual loans in the quarter contributed to a 5 basis point decline in the tax equivalent net interest margin during the quarter. This was partially offset by the decrease in our interest expense to earning assets of 51 basis points resulting from the lower costs of interest bearing deposits, and junior subordinated debentures that are indexed to the three month LIBOR.

Our net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, as well as changes in the yields earned on interest-earning assets and rates paid on deposits and borrowed funds. The following table present condensed average balance sheet information, together with interest income and yields on average interest-earning assets, and interest expense and rates paid on average interest-bearing liabilities for the three months ended March 31, 2010 and 2009:

(1) Tax exempt income has been adjusted to a tax equivalent basis at a 35% tax rate.

PROVISION FOR LOAN AND LEASE LOSSES

The provision for loan and lease losses was \$42.1 million for the three months ended March 31, 2010 compared to \$59.1 million for the same period in 2009. As an annualized percentage of average outstanding loans, the provision for loan losses recorded for the three months ended March 31, 2010 was 2.88% as compared to 3.91% in the same period in 2009.

The decrease in the provision for loan and lease losses in the three months ended March 31, 2010 as compared to the same period in 2009 is attributable to a reduction in downgrades within the portfolio, an easing in the velocity of declining real estate values in our markets and the resulting impact on our commercial real estate and commercial construction portfolio, and the decrease in net charge-offs during the period.

The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Therefore, the non-covered non-accrual loans of \$183.5 million as of March 31, 2010 have already been written-down to their estimated fair value, less estimated costs to sell, and are expected to be resolved with no additional material loss, absent further decline in market prices. Depending on the characteristics of a loan, the fair value of collateral is estimated by obtaining external appraisals.

The provision for loan and lease losses is based on management's evaluation of inherent risks in the loan portfolio and a corresponding analysis of the allowance for loan and lease losses. Additional discussion on loan quality, our procedures to measure loan impairment, and the allowance for loan and lease losses is provided under the heading *Asset Quality and Non-Performing Assets* below.

NON-INTEREST INCOME

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Non-interest income for the three months ended March 31, 2010 was \$32.1 million, an increase of \$16.5 million, or 107%, as compared to the same period in 2009. The following table presents the key components of non-interest income for the three months ended March 31, 2010 and 2009:

Non-Interest Income

(dollars in thousands)

Table of Contents

	Three months ended March 31,			
	2010	2009	Change Amount	Change Percent
Service charges on deposit accounts	\$ 8,365	\$ 7,701	\$ 664	9%
Brokerage commissions and fees	2,639	1,379	1,260	91%
Mortgage banking revenue, net	3,478	4,070	(592)	-15%
(Loss) gain on investment securities, net	(288)	35	(323)	-923%
Gain on junior subordinated debentures carried at fair value	6,088	580	5,508	950%
Bargain purchase gain on acquisition	8,456	-	8,456	NM
Change in FDIC indemnification asset	610	-	610	NM
Other income	2,718	1,752	966	55%
Total	\$ 32,066	\$ 15,517	\$ 16,549	107%

The increase in deposit service charges in the three months ended March 31, 2010 over the same periods in 2009 is attributable to increased non-sufficient funds and overdraft fee income in the current period due to higher average overdraft balances and due to increased deposit service charges related to the deposits acquired in the Rainier and Evergreen acquisitions.

Brokerage commissions and fees for the three months ended March 31, 2010 increased 91% as a result of the increase in financial advisors and assets under management at Umpqua Investments.

Mortgage banking revenue for the three months ended March 31, 2010 decreased due to a decrease in purchase and refinancing activity, compared to the same period of the prior year. Closed mortgage volume for the three months ended March 31, 2010 was \$127.3 million, representing a 34% decrease compared to the same quarter of the prior year. The current low mortgage interest rate environment contributed to a \$129,000 decline in fair value on the mortgage servicing right (MSR) asset in the current quarter, compared to a \$1.4 million decline in fair value recognized in the same period prior year.

For the three months ended March 31, 2010, we recorded gains of \$6.1 million as compared to gains of \$580,000 for the three months ended March 31, 2009, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. The change in fair value of the junior subordinated debentures carried at fair value in the current year primarily resulted from the widening of the credit risk adjusted spread over the contractual rate of each junior subordinated debenture measured at fair value. Additional information on the junior subordinated debentures carried at fair value is included in Note 8 of the *Notes to Condensed Consolidated Financial Statements* and under the heading *Junior Subordinated Debentures*.

A bargain purchase gain of \$8.5 million represents the excess of the estimated fair value of the assets acquired over the estimated fair value of the liabilities in the Evergreen acquisition.

Other income for the three months ended March 31, 2010 increased \$1.0 million over the same period in the prior year, attributable primarily to proceeds received of \$230,000 from bank owned life insurance death benefits and \$393,000 due to the operations of recently acquired institutions.

NON-INTEREST EXPENSE

Non-interest expense for the three months ended March 31, 2010 was \$69.9 million, an increase of \$9.9 million, or 17%, as compared to the same period in 2009. The following table presents the key elements of non-interest expense for the three months ended March 31, 2010 and 2009:

Non-Interest Expense

(dollars in thousands)

Table of Contents

	Three months ended March 31,			
	2010	2009	Change Amount	Change Percent
Salaries and employee benefits	\$ 36,240	\$ 31,073	\$ 5,167	17%
Net occupancy and equipment	10,676	9,621	1,055	11%
Communications	2,224	1,753	471	27%
Marketing	1,009	970	39	4%
Services	4,915	5,329	(414)	-8%
Supplies	726	795	(69)	-9%
FDIC assessments	3,444	2,625	819	31%
Net loss on other real estate owned	2,311	2,299	12	1%
Intangible amortization	1,308	1,362	(54)	-4%
Merger related expenses	1,906	200	1,706	853%
Other expenses	5,112	3,924	1,188	30%
Total	\$ 69,871	\$ 59,951	\$ 9,920	17%

Salaries and employee benefits costs increased \$5.2 million in the three months ending March 31, 2010, as compared to the same period prior year. Approximately \$1.7 million of the increase is the result of the acquisition of Rainier and Evergreen and the remainder primarily results from the increase in full-time equivalent employees.

Net occupancy and equipment expense increased for the three months ended March 31, 2010, as compared to the same periods in the prior year. Approximately \$600,000 of the increase is the result of the cost of operating 21 new locations through the acquisition of Rainier and Evergreen, as well as the expansion into new locations during the prior year.

FDIC assessments increased for the three months ending March 31, 2010 as compared to the same periods of the prior year as a result of industry wide increase in the assessment rate, organic deposit growth, and deposit growth resulting from the FDIC-assisted acquisitions of Evergreen and Rainier.

We incur significant expenses in connection with the completion and integration of bank acquisitions that are not capitalizable. Classification of expenses as merger-related is done in accordance with the provisions of a Board-approved policy. The merger-related expenses incurred in 2009 relate primarily to the FDIC-assisted purchase and assumption of certain assets and liabilities of the Evergreen and Rainier.

The slowdown in the housing industry, which has continued to detrimentally affect our residential development portfolio, has led to a continued elevated level of foreclosures on residential development related properties and movement of the properties into other real estate owned (OREO). Declines in the market values of these properties after foreclosure have resulted in additional losses on the sale of the properties or by valuation adjustments. During the three months ended March 31, 2010, the Company recognized losses on sale of OREO of \$2.3 million.

INCOME TAXES

Our consolidated effective tax rate as a percentage of pre-tax income for the three months ended March 31, 2010 was (36.2)% as compared to 45.8% for the three months ended March 31, 2009. The effective tax rates differed from the federal statutory rate of 35% and the apportioned state rate of 6% (net of the federal tax benefit) principally because of non-taxable income arising from bank-owned life insurance, income on tax-exempt investment securities, tax credits arising from low income housing investments, and Business Energy tax credits.

FINANCIAL CONDITION**INVESTMENT SECURITIES**

Trading securities consist of securities held in inventory by Umpqua Investments for sale to its clients and securities invested in trust for the benefit of certain executives or former employees of acquired institutions as required by agreements. Trading securities were \$2.0 million at March 31, 2010, as compared to \$2.3 million at December 31, 2009. This decrease is principally attributable to a decrease in Umpqua Investments inventory of trading securities.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Investment securities available for sale were \$1.8 billion as of both March 31, 2010 and December 31, 2009. Investment securities available for sale of \$30.3 million assumed in the Evergreen and Rainier acquisitions, purchases of \$11.9 million of investment

Table of Contents

securities available for sale, and an increase in fair value of investments securities available for sale of \$13.8 million were partially offset by paydowns of \$60.8 million and amortization of net purchase price premiums of \$3.5 million.

Investment securities held to maturity were nearly unchanged at \$6.1 million as of March 31, 2010 as compared to holdings at December 31, 2009. Paydowns and maturities of investment securities held to maturity of \$259,000 were offset by other-than-temporary impairment (OTTI) charges of \$280,000 (of which all represents the credit loss component recognized as a charge to earnings).

The following table presents the available for sale and held to maturity investment securities portfolio by major type as of March 31, 2010 and December 31, 2009:

Investment Securities Composition

(dollars in thousands)

	Investment Securities Available for Sale			
	March 31, 2010		December 31, 2009	
	Fair Value	%	Fair Value	%
U.S. Treasury and agencies	\$ 12,224	1%	\$ 11,794	1%
Obligations of states and political subdivisions	226,712	13%	211,825	12%
Residential mortgage-backed securities and collateralized mortgage obligations	1,541,634	86%	1,569,849	87%
Other debt securities	159	0%	159	0%
Investments in mutual funds and other equity Securities	2,015	0%	1,989	0%
Total	\$ 1,782,744	100%	\$ 1,795,616	100%

	Investment Securities Held to Maturity			
	March 31, 2010		December 31, 2009	
	Amortized Cost	%	Amortized Cost	%
Obligations of states and political subdivisions	\$ 3,196	53%	\$ 3,216	53%
Residential mortgage-backed securities and collateralized mortgage obligations	2,866	47%	2,845	47%
Total	\$ 6,062	100%	\$ 6,061	100%

We review investment securities on an ongoing basis for the presence of other-than-temporary impairment (OTTI) or permanent impairment, taking into consideration current market conditions, fair value in relationship to cost, extent and nature of the change in fair value, issuer rating changes and trends, whether we intend to sell a security or if it is likely that we will be required to sell the security before recovery of our amortized cost basis of the investment, which may be maturity, and other factors. For debt securities, if we intend to sell the security or it is likely that we will be required to sell the security before recovering its cost basis, the entire impairment loss would be recognized in earnings as an OTTI. If we do not intend to sell the security and it is not likely that we will be required to sell the security but we do not expect to recover the entire amortized cost basis of the security, only the portion of the impairment loss representing credit losses would be recognized in earnings. The credit loss on a security is measured as the difference between the amortized cost basis and the present value of the cash flows expected to be collected. Projected cash flows are discounted by the original or current effective interest rate depending on the nature of the security being measured for potential OTTI. The remaining impairment related to all other factors, the difference between the present value of the cash flows expected to be collected and fair value, is recognized as a charge to other comprehensive income (OCI). Impairment losses related to all other factors are presented as separate categories within OCI. For investment securities held to maturity, this amount is accreted over the remaining life of the debt security prospectively based on the amount and timing of future estimated cash flows. The accretion of the OTTI amount recorded in OCI will increase the carrying value of the investment, and would not affect earnings. If there is an indication of additional credit losses the security is reevaluated according to the procedures described above.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The following tables present the OTTI losses for the three months ended March 31, 2010 and 2009 in the held to maturity portfolio. There were no OTTI losses for the periods shown in investment securities available for sale:

Table of Contents

(in thousands)

	Three months ended	
	2010	2009
Total other-than-temporary impairment losses	\$ 5	\$ 2,137
Portion of other-than-temporary impairment losses transferred from (recognized in) other comprehensive income ⁽¹⁾	284	-
Net impairment losses recognized in earnings ⁽²⁾	\$ 289	\$ 2,137

(1) Represents other-than-temporary impairment losses related to all other factors.

(2) Represents other-than-temporary impairment losses related to credit losses.

The OTTI recognized on investment securities held to maturity relates to non-agency collateralized mortgage obligations for all periods presented. Each of these securities holds various levels of credit subordination. The underlying mortgage loans of these securities were originated from 2003 through 2007. At origination, the weighted average loan-to-value of the underlying mortgages was 69%; the underlying borrowers had weighted average FICO scores of 731, and 59% were limited documentation loans. These securities were valued by third-party pricing services using matrix or model pricing methodologies and were corroborated by broker indicative bids. We estimated the cash flows of the underlying collateral for each security considering credit, interest and prepayment risk models that incorporate management's estimate of projected key assumptions including prepayment rates, collateral default rates and loss severity. Assumptions utilized vary from security to security, and are influenced by factors such as loan interest rates, geographic location, borrower characteristics and vintage, and historical experience. We then used a third party to obtain information about the structure of each security, including subordination and other credit enhancements, in order to determine how the underlying collateral cash flows will be distributed to each security issued in the structure. These cash flows were then discounted at the interest rate used to recognize interest income on each security. We review the actual collateral performance of these securities on a quarterly basis and update the inputs as appropriate to determine the projected cash flows. The following table presents a summary of the significant inputs utilized to measure management's estimate of the credit loss component on these non-agency collateralized mortgage obligations as of March 31, 2010:

	Range		Weighted Average
	Minimum	Maximum	
Constant prepayment rate	4.0%	25.0%	14.8%
Collateral default rate	8.0%	45.0%	16.8%
Loss severity	20.0%	50.0%	34.7%

Gross unrealized losses in the available for sale investment portfolio was \$1.4 million at March 31, 2010. This consisted primarily of unrealized losses on residential mortgage-backed securities and collateralized mortgage obligations of \$1.2 million and unrealized losses on obligations of states and political subdivisions of \$180,000. The unrealized losses were primarily caused by interest rate increases subsequent to the purchase of the securities, and not credit quality. In the opinion of management, these securities are considered only temporarily impaired due to changes in market interest rates or the widening of market spreads subsequent to the initial purchase of the securities, and not due to concerns regarding the underlying credit of the issuers or the underlying collateral. Additional information about the investment portfolio is provided in Note 3 of the *Notes to Condensed Consolidated Financial Statements*.

RESTRICTED EQUITY SECURITIES

Restricted equity securities were \$32.0 million at March 31, 2010 and \$15.2 million at December 31, 2009. The increase of \$16.8 million is attributable to the FDIC-assisted acquisitions of Evergreen and Rainier. Of the \$32.0 million at March 31, 2010, \$28.6 million represent the Bank's investment in the Federal Home Loan Banks (FHLB) of Seattle and San Francisco, respectively. FHLB stock is carried at par and does not have a readily determinable fair value. Ownership of FHLB stock is restricted to the FHLB and member institutions, and can only be purchased and redeemed at par. The remaining restricted equity securities represent investments in Pacific Coast Bankers Bancshares stock.

Although as of March 31, 2010, the FHLB of Seattle complies with all of its regulatory requirements (including the risk-based capital requirement), it remains classified as undercapitalized by the Federal Housing Finance Agency (Finance Agency).

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Management periodically evaluates FHLB stock for other-than-temporary or permanent impairment. Management's determination of whether these investments are impaired is based on its assessment of the ultimate recoverability of cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as (1) the significance of any decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the

Table of Contents

level of such payments in relation to the operating performance of the FHLB, (3) the impact of legislative and regulatory changes on institutions and, accordingly, the customer base of the FHLB, and (4) the liquidity position of the FHLB.

Under Finance Agency regulations, a FHLB that fails to meet any regulatory capital requirement may not declare a dividend or redeem or repurchase capital stock in excess of what is required for members' current loans. Moody's Investors Service (Moody's) current assessment of the FHLB's portfolios indicates that the true economic losses embedded in these securities are significantly less than the accounting impairments would suggest and are manageable given the FHLB's capital levels. According to Moody's, the large difference between the expected economic losses and the mark-to-market impairment losses for accounting purposes is attributed to market illiquidity, de-leveraging and stress in the credit market in general. The FHLBs have access to the U.S. Government-Sponsored Enterprise Credit Facility, a secured lending facility that serves as a liquidity backstop, substantially reducing the likelihood that the FHLBs would need to sell securities to raise liquidity and, thereby, cause the realization of large economic losses. Moody's has stated that their Aaa senior debt rating and Prime-1 short-term debt rating for the FHLB system are likely to remain unchanged based on expectations that the FHLBs have a very high degree of government support. Moody's rating of the FHLB of Seattle as Aaa with stable outlook was reaffirmed in May 2009 and Standard and Poors rating of AA+ was reaffirmed in August 2009. Based on the above, the Company has determined there is not an other-than-temporary impairment on the FHLB stock investment as of March 31, 2010.

LOANS AND LEASES*Non-covered loans and leases*

Total non-covered loans and leases outstanding at March 31, 2010 were \$5.8 billion, a decrease of \$167.4 million as compared to year-end 2009. This decrease is principally attributable to charge-offs of \$39.8 million and transfers to other real estate owned of \$6.0 million, and loan paydowns and maturities, net of loan originations, of \$137.2 million during the period. The following table presents the concentration distribution of our non-covered loan portfolio at March 31, 2010 and December 31, 2009. The classification of non-covered loan balances presented is reported in accordance with the regulatory reporting requirements.

Non-covered Loan Concentrations

The covered loans are subject to loss sharing agreements with the FDIC. Under the terms of the Evergreen acquisition loss sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (OREO) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$90 million on covered assets for Evergreen and absorb 95% of losses and share in 95% of loss recoveries exceeding \$90 million, except for the Bank will incur losses up to \$30.2 million before the loss-sharing will commence. The loss sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Under the terms of the Rainier loss sharing agreement, the FDIC will cover a substantial portion of any future losses on loans, related unfunded loan commitments, other real estate owned (OREO) and accrued interest on loans for up to 90 days. The FDIC will absorb 80% of losses and share in 80% of loss recoveries on the first \$95 million of losses on covered assets and absorb 95% of losses and share in 95% of loss recoveries exceeding \$95 million. The loss sharing arrangements for non-single family residential and single family residential loans are in effect for 5 years and 10 years, respectively, and the loss recovery provisions are in effect for 8 years and 10 years, respectively, from the acquisition dates.

Discussion of and tables related to the covered loan segment is provided under the heading *Asset Quality and Non-Performing Assets*.

ASSET QUALITY AND NON-PERFORMING ASSETS***Non-covered loans and leases***

Non-covered non-performing loans, which include non-covered non-accrual loans and non-covered accruing loans past due over 90 days, totaled \$190.7 million, or 3.27% of non-covered total loans, at March 31, 2010, as compared to \$199.0 million, or 3.32% of total non-covered loans, at December 31, 2009. Non-covered non-performing assets, which include non-covered non-performing loans and non-covered foreclosed real estate (other real estate owned), totaled \$209.6 million, or 1.99% of total assets, as of March 31, 2010, as compared to \$223.6 million, or 2.38% of total assets, as of December 31, 2009.

A loan is considered impaired when based on current information and events, we determine that we will probably not be able to collect all amounts due according to the loan contract, including scheduled interest payments. Generally, when loans are identified as impaired they are moved to our Special Assets Division. When we identify a loan as impaired, we measure the loan for potential impairment using discount cash flows, except when the sole remaining source of the repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of collateral, less selling costs. The starting point for determining the fair value of collateral is through obtaining external appraisals. Generally, external appraisals are updated every six to nine months. We obtain appraisals from a pre-approved list of independent, third party,

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

local appraisal firms. Approval and addition to the list is based on experience, reputation, character, consistency and knowledge of the respective real estate market. At a minimum, it is ascertained that the appraiser is: (a) currently licensed in the state in which the property is located, (b) is experienced in the appraisal of properties similar to the property being appraised, (c) is actively engaged in the appraisal work, (d) has knowledge of current real estate market conditions and financing trends, (e) is reputable, and (f) is not on Freddie Mac's nor the Bank's Exclusionary List of appraisers and brokers. In certain cases appraisals will be reviewed by our Real Estate Valuation Services group to ensure the quality of the appraisal and the expertise and independence of the appraiser. Upon receipt and review, an external appraisal is utilized to measure a loan for

Table of Contents

potential impairment. Our impairment analysis documents the date of the appraisal used in the analysis, whether the officer preparing the report deems it current, and, if not, allows for internal valuation adjustments with justification. Typical justified adjustments might include discounts for continued market deterioration subsequent to appraisal date, adjustments for the release of collateral contemplated in the appraisal, or the value of other collateral or consideration not contemplated in the appraisal. An appraisal over one year old in most cases will be considered stale dated and an updated or new appraisal will be required. Any adjustments from appraised value to net realizable value are detailed and justified in the impairment analysis, which is reviewed and approved by senior credit quality officers and the Company's Allowance for Loan and Lease Losses (ALLL) Committee. Although an external appraisal is the primary source to value collateral dependent loans, we may also utilize values obtained through purchase and sale agreements, negotiated short sales, broker price opinions, or the sales price of the note. These alternative sources of value are used only if deemed to be more representative of value based on updated information regarding collateral resolution. Impairment analyses are updated, reviewed and approved on a quarterly basis at or near the end of each reporting period. Based on these processes, we do not believe there are significant time lapses for the recognition of additional loan loss provisions or charge-offs from the date they become known.

Non-covered loans are classified as non-accrual when collection of principal or interest is doubtful generally if they are past due as to maturity or payment of principal or interest by 90 days or more unless such loans are well-secured and in the process of collection. Additionally, all non-covered loans that are impaired are considered for non-accrual status. Non-covered loans placed on non-accrual will typically remain on non-accrual status until all principal and interest payments are brought current and the prospects for future payments in accordance with the loan agreement appear relatively certain.

Upon acquisition of real estate collateral, typically through the foreclosure process, we promptly begin to market the property for sale. If we do not begin to receive offers or indications of interest we will analyze the price and review market conditions to assess whether a lower price reflects the market value of the property and would enable us to sell the property. In addition, we update appraisals on other real estate owned property six to nine months after the most recent appraisal. Increases in valuation adjustments recorded in a period are primarily based on i) updated appraisals received during the period, or ii) management's authorization to reduce the selling price of the property during the period. Unless a current appraisal is available, an appraisal will be ordered prior to a loan moving to other real estate owned. Foreclosed properties held as other real estate owned are recorded at the lower of the recorded investment in the loan or market value of the property less expected selling costs. Other real estate owned at March 31, 2010 totaled \$18.9 million and consisted of 48 properties. At March 31, 2010, one property with a carrying value of \$1.3 million is subject to a sales contract, but is accounted for under the deposit method and continues to be reported as other real estate owned.

Non-covered loans are reported as restructured when the Bank grants a concession(s) to a borrower experiencing financial difficulties that it would not otherwise consider. Examples of such concessions include a reduction in the loan rate, forgiveness of principal or accrued interest, extending the maturity date(s) or providing a lower interest rate than would be normally available for a transaction of similar risk. As a result of these concessions, restructured loans are impaired as the Bank will not collect all amounts due, both principal and interest, in accordance with the terms of the original loan agreement. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

The Company has written down impaired, non-covered non-accrual loans as of March 31, 2010 to their estimated net realizable value, based on disposition value, and are expected to be resolved with no additional material loss, absent further decline in market prices. The following table summarizes our non-covered non-performing assets and restructured loans as of March 31, 2010 and December 31, 2009:

Non-covered Non-Performing Assets

(dollars in thousands)

As of March 31, 2010, the non-covered non-performing assets of \$209.6 million have been written down by 45%, or \$172.3 million, from their original balance of \$381.9 million.

Our residential development loan portfolio, a subset of the construction and development category, has been adversely impacted by the housing market downturn. As a result, the Company has focused its efforts to reduce our exposure to this segment. The following table presents a geographic distribution of the non-covered residential development portfolio for the periods shown:

Non-covered Residential Development Loans

(dollars in thousands)

Non-covered commercial real estate, commercial and commercial construction represent 35%, 27% and 17%, respectively, of the remaining non-covered non-performing loans as of March 31, 2010, compared to 31%, 25% and 18%, respectively, as of December 31, 2009. Non-covered commercial real estate non-performing loans were \$66.7 million at March 31, 2010, compared to \$62.6 million at December 31, 2009. Non-covered commercial non-performing loans were \$52.4 million at March 31, 2010, compared to \$49.9 million at December 31, 2009. Non-covered commercial construction non-performing loans were \$31.9 million at March 31, 2010, compared to \$36.7 million at December 31, 2009. Of these non-covered non-performing loan balances as of March 31, 2010, 57% are directly affected by the housing market downturn or the real estate bubble, or indirectly impacted from the contraction of real estate dependent businesses. The remaining non-covered non-performing loans in these segments primarily reflect the impact of the U.S. recession on certain businesses.

During 2009, the Company performed extensive reviews of our permanent commercial real estate portfolio, including stress testing. These reviews were performed on both our non-owner and owner occupied credits. These reviews were completed to verify leasing status, to ensure the accuracy of risk ratings, and to develop pro-active action plans with borrowers on projects where debt service coverage has dropped below the Bank's benchmark. The stress testing was performed to determine the effect of rising cap rates, interest rates and vacancy rates, on this portfolio. Based on our analysis, the Company believes our lending teams are effectively managing the risks in this portfolio. There can be no

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

assurance that any further declines in economic conditions, such as potential increases in retail or office vacancy rates, will exceed the projected assumptions utilized in the stress testing and may result in additional non-covered non-performing loans in the future.

At March 31, 2010 and December 31, 2009, non-covered impaired loans of \$98.0 million and \$134.4 million were classified as non-covered performing restructured loans, respectively. The restructurings were granted in response to borrower financial difficulty, and generally provide for a temporary modification of loan repayment terms. The non-covered performing restructured loans on accrual status represent the only impaired loans accruing interest at each respective date. In order for a restructured loan to be considered performing and on accrual status, the loan's collateral coverage generally will be greater than or equal to 100% of the loan balance, the loan is current on payments, and the borrower must either prefund an interest reserve or demonstrate the ability to make payments from a verified source of cash flow. The Company has no obligations to lend additional funds on the restructured loans as of March 31, 2010.

The following tables summarize our performing non-covered restructured loans by loan type and region as of March 31, 2010 and December 31, 2009:

Table of Contents**Non-covered Restructured Loans by Type and Region**

The following table presents a distribution of our performing non-covered restructured loans by year of maturity, according to the restructured terms, as of March 31, 2010:

(in thousands)

Year	Amount
2010	\$ 69,548
2011	12,074
2012	1,493
2013	1,865
2014	1,671
Thereafter	11,320
Total	\$ 97,971

A further decline in the economic conditions in our general market areas or other factors could adversely impact individual borrowers or the loan portfolio in general. Accordingly, there can be no assurance that loans will not become 90 days or more past due, become impaired or placed on non-accrual status, restructured or transferred to other real estate owned in the future. Additional information about the loan portfolio is provided in Note 4 of the *Notes to Condensed Consolidated Financial Statements*.

Covered Non-Performing Assets

Covered nonperforming assets totaled \$43.7 million, representing 0.42% of total assets at March 31, 2010. These covered nonperforming assets are subject to shared-loss agreements with the FDIC. The following tables summarize our covered nonperforming assets at March 31, 2010.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

(dollars in thousands)

	March 31, 2010
Covered loans on non-accrual status	\$ 34,676
Total non-performing loans	34,676
Covered other real estate owned	8,995
Total non-performing assets	\$ 43,671
Asset quality ratios:	
Covered non-performing loans to covered loans and leases	4.98%
Covered non-performing assets to total assets	0.42%

Table of Contents**ALLOWANCE FOR LOAN AND LEASE LOSSES AND RESERVE FOR UNFUNDED COMMITMENTS**

The allowance for loan and lease losses (ALLL) totaled \$110.8 million at March 31, 2010, an increase of \$3.1 million from the \$107.7 million at December 31, 2009. The increase in the ALLL from the prior year-end results is principally attributable to an increase in provision for loan and lease losses in excess of charge-offs. The following table shows the activity in the ALLL for the three months ended March 31, 2010 and 2009:

Allowance for Loan and Lease Losses

(dollars in thousands)

	Three months ended March 31,	
	2010	2009
Balance, beginning of period	\$ 107,657	\$ 95,865
Provision for loan and lease losses	42,106	59,092
Loans charged-off	(39,759)	(60,414)
Charge-off recoveries	780	543
Net charge-offs	(38,979)	(59,871)
Total allowance for loan and lease losses	110,784	95,086
Reserve for unfunded commitments	765	935
Allowance for credit losses	\$ 111,549	\$ 96,021

**As a percentage of average loans and leases
(annualized):**

Net charge-offs	2.66%	3.96%
Provision for loan and lease losses	2.88%	3.91%

The increase in the allowance for loan and lease losses as of March 31, 2010 in relation to the same periods of the prior year is primarily a result of the significant slowdown in the housing industry, which has affected our non-covered residential development portfolio, and the U.S. recession and declining real estate values in our markets, and its impact on our non-covered commercial real estate and non-covered commercial construction portfolio, resulting in downgrades within the portfolio. Downgrades within the portfolio have increased our classified credit balances resulting in a higher risk rating-based component of the allowance for loan and lease losses.

All impaired loans are individually evaluated for impairment. If the measurement of each impaired loans' value is less than the recorded investment in the loan, we recognize this impairment and adjust the carrying value of the loan to fair value through the allowance for loan and lease losses. This can be accomplished by charging-off the impaired portion of the loan or establishing a specific component within the allowance for loan and lease losses. If in management's assessment the sources of repayment will not result in a reasonable probability that the carrying value of a loan can be recovered, the amount of a loan's specific impairment is charged-off against the allowance for loan and lease losses. The Company recognizes the charge-off of impairment reserves on impaired loans in the period they arise for collateral dependent loans. Impairment reserves on non-collateral dependent restructured loans are measured by comparing the present value of expected future cash flows on the restructured loans discounted at the interest rate of the original loan agreement to the loan's carrying value. These impairment reserves are recognized as a specific component to be provided for in the allowance for loan and lease losses.

At March 31, 2010, the recorded investment in non-covered loans classified as impaired totaled \$281.5 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$3.2 million. The valuation allowance on impaired loans represents the impairment reserves on performing non-covered restructured loans. At December 31, 2009, the total recorded investment in non-covered impaired loans was \$328.0 million, with a corresponding valuation allowance (included in the allowance for loan and lease losses) of \$2.7 million.

The following table presents the distribution of loan charge-offs by loan type for the three months ended March 31, 2010 and 2009, respectively:

Table of Contents**Charge-offs by Loan Type**

(dollars in thousands)

	Three months ended March 31,	
	2010	2009
Residential development	\$ 4,413	\$ 36,186
Commercial construction	1,145	6,842
Commercial real estate	10,373	4,178
Commercial	22,904	11,510
Other	924	1,698
Total loans charged-off	\$ 39,759	\$ 60,414

In the current year we have experienced increased charge-offs related to our commercial and commercial real estate portfolios. The majority of these charge-offs relate to borrowers that were directly affected by the housing market downturn or indirectly impacted from the contraction of real estate dependent businesses. Additional discussion on the change in provision for loan and lease losses is provided under the heading *Provision for Loan and Lease Losses* above.

The following table presents a summary of activity in the reserve for unfunded commitments (RUC):

Summary of Reserve for Unfunded Commitments Activity

(in thousands)

	Three months ended March 31,	
	2010	2009
Balance, beginning of period	\$ 731	\$ 983
Net increase (decrease) to other expense	34	(48)
Balance, end of period	\$ 765	\$ 935

We believe that the ALLL and RUC at March 31, 2010 are sufficient to absorb losses inherent in the loan portfolio and credit commitments outstanding as of that date, respectively, based on the best information available. This assessment, based in part on historical levels of net charge-offs, loan growth, and a detailed review of the quality of the loan portfolio, involves uncertainty and judgment. Therefore, the adequacy of the ALLL and RUC cannot be determined with precision and may be subject to change in future periods. In addition, bank regulatory authorities, as part of their periodic examination of the Bank, may require additional charges to the provision for loan and lease losses in future periods if warranted as a result of their review.

MORTGAGE SERVICING RIGHTS

The following table presents the key elements of our mortgage servicing rights asset for the three months ended March 31, 2010 and 2009, respectively:

Summary of Mortgage Servicing Rights

(in thousands)

	Three months ended March 31,	
	2010	2009
Balance, beginning of period	\$ 12,625	\$ 8,205
Additions for new mortgage servicing rights capitalized	1,070	1,968
Acquired mortgage servicing rights	62	-
Changes in fair value:		
Due to changes in model inputs or assumptions ⁽¹⁾	(155)	(1,068)
Other ⁽²⁾	26	(373)
Balance, end of period	\$ 13,628	\$ 8,732

(1) Principally reflects changes in discount rates and prepayment speed assumptions, which are primarily affected by changes in interest rates.

(2) Represents changes due to collection/realization of expected cash flows over time.

Information related to our serviced loan portfolio as of March 31, 2010 and December 31, 2009 was as follows:

Table of Contents

(dollars in thousands)

	March 31, 2010	December 31, 2009
Balance of loans serviced for others	\$ 1,345,554	\$ 1,277,832
MSR as a percentage of serviced loans	1.01%	0.99%

As of March 31, 2010, we serviced residential mortgage loans for others with an aggregate outstanding principal balance of \$1.3 billion for which servicing assets have been recorded. Mortgage servicing rights are adjusted to fair value quarterly with the change recorded in mortgage banking revenue.

GOODWILL AND OTHER INTANGIBLE ASSETS

At March 31, 2010, we had goodwill and other intangibles of \$679.3 million, as compared to \$639.6 million at December 31, 2009. The goodwill recorded in connection with acquisitions represents the excess of the purchase price over the estimated fair value of the net assets acquired. Goodwill and other intangible assets with indefinite lives are not amortized but instead are periodically tested for impairment. Management evaluates intangible assets with indefinite lives on an annual basis as of December 31. Additionally, we perform impairment evaluations on an interim basis when events or circumstances indicate impairment potentially exists. A significant amount of judgment is involved in determining if an indicator of impairment has occurred. Such indicators may include, among others, a significant decline in our expected future cash flows; a sustained, significant decline in our stock price and market capitalization; a significant adverse change in legal factors or in the business climate; adverse action or assessment by a regulator; and unanticipated competition.

The goodwill impairment test involves a two-step process. The first step compares the fair value of a reporting unit to its carrying value. If the reporting unit's fair value is less than its carrying value, the Company would be required to proceed to the second step. In the second step the Company calculates the implied fair value of the reporting unit's goodwill. The implied fair value of goodwill is determined in the same manner as goodwill recognized in a business combination. The estimated fair value of the Company is allocated to all of the Company's assets and liabilities, including any unrecognized identifiable intangible assets, as if the Company had been acquired in a business combination and the estimated fair value of the reporting unit is the price paid to acquire it. The allocation process is performed only for purposes of determining the amount of goodwill impairment. No assets or liabilities are written up or down, nor are any additional unrecognized identifiable intangible assets recorded as a part of this process. Any excess of the estimated purchase price over the fair value of the reporting unit's net assets represents the implied fair value of goodwill. If the carrying amount of the goodwill is greater than the implied fair value of that goodwill, an impairment loss would be recognized as a charge to earnings in an amount equal to that excess.

The Company evaluated goodwill for impairment as of March 31, 2010. The first step of the goodwill impairment test indicated that the reporting unit's fair value was greater than its carrying value. Therefore, no impairment was recognized in the first quarter of 2010.

At March 31, 2010, we had other intangible assets of \$35.0 million, as compared to \$29.6 million at December 31, 2009. As part of a FDIC assisted transactions during the first quarter, \$6.7 million of the purchase price was allocated to the value of other intangible assets such as the core deposits, which includes all deposits except certificates of deposit, and an insurance related customer relationship. The values of the core deposit intangible assets were determined by an analysis of the cost differential between the core deposits and alternative funding sources. The value of the customer list was determined based on market indicators. Intangible assets with definite useful lives are amortized to their estimated residual values over their respective estimated useful lives, and are also reviewed for impairment. We amortize other intangible assets on an accelerated or straight-line basis over an estimated ten to fifteen year life. No impairment losses separate from the scheduled amortization have been recognized in the periods presented.

DEPOSITS

Total deposits were \$8.2 billion at March 31, 2010, an increase of \$766.8 million, or 10.3%, as compared to year-end 2009. Excluding the deposits acquired through the FDIC-assisted purchase and assumption of Evergreen and Rainier, the annualized organic deposit growth rate was 6.2%. Management attributes the organic growth to ongoing business development and marketing efforts in our service markets. Information on average deposit balances and average rates paid is included under the *Net Interest Income* section of this report. Of the acquired deposits in the Evergreen and Rainier acquisitions, as of March 31, 2010, \$98.0 million, represent brokered time deposits which will not be renewed as they mature.

The following table presents the deposit balances by major category as of March 31, 2010 and December 31, 2009:

Table of Contents**Deposits**

(dollars in thousands)

	March 31, 2010		December 31, 2009	
	Amount	Percentage	Amount	Percentage
Non-interest bearing	\$ 1,472,408	18%	\$ 1,398,332	19%
Interest bearing				
demand	961,317	12%	872,184	12%
Savings and money market	3,071,591	37%	2,813,805	37%
Time, \$100,000 or greater	1,802,071	22%	1,603,410	22%
Time, less than \$100,000	899,835	11%	752,703	10%
Total	\$ 8,207,222	100%	\$ 7,440,434	100%

The Company has an agreement with Promontory Interfinancial Network LLC (Promontory) that makes it possible to provide FDIC deposit insurance to balances in excess of current deposit insurance limits. Promontory's Certificate of Deposit Account Registry Service (CDARS) uses a deposit-matching program to exchange Bank deposits in excess of the current deposit insurance limits for excess balances at other participating banks, on a dollar-for-dollar basis, that would be fully insured at the Bank. This product is designed to enhance our ability to attract and retain customers and increase deposits, by providing additional FDIC coverage to customers. CDARS deposits can be reciprocal or one-way. All of the Bank's CDARS deposits are reciprocal. At March 31, 2010 and December 31, 2009, the Company's CDARS balances totaled \$306.4 million and \$290.3 million, respectively. Of these totals, at March 31, 2010 and December 31, 2009, \$266.0 million and \$245.6 million, respectively, represented time deposits equal to or greater than \$100,000 but were fully insured under current deposit insurance limits.

BORROWINGS

At March 31, 2010, the Bank had outstanding \$42.0 million of securities sold under agreements to repurchase and no outstanding federal funds purchased balances. The Bank had outstanding term debt of \$363.8 million at March 31, 2010. Term debt outstanding as of March 31, 2010 increased \$287.6 million since December 31, 2009 as a result of term debt assumed in the Evergreen and Rainier acquisitions, partially offset by repayment of FHLB borrowings. Advances from the FHLB amounted to \$349.6 of the total term debt and are secured by investment securities and residential mortgage loans. Of the \$349.6 million, \$93.0 million of the FHLB advances outstanding at March 31, 2010 had fixed interest rates ranging from 1.85% to 3.35% and the remaining balances of \$256.6 million had fixed interest rates ranging from 4.32% to 5.96%. Of the FHLB advances outstanding, \$99.6 million or 28% mature prior to December 31, 2010 and \$250.0 million or 72% mature in 2016 and 2017. Management expects continued use of FHLB advances as a source of short and long-term funding.

JUNIOR SUBORDINATED DEBENTURES

We had junior subordinated debentures with carrying values of \$182.7 million and \$188.9 million at March 31, 2010 and December 31, 2009, respectively.

At March 31, 2010, approximately \$219.6 million, or 95% of the total issued amount, had interest rates that are adjustable on a quarterly basis based on a spread over three month LIBOR. Interest expense for junior subordinated debentures has decreased for the three months ended March 31, 2010, compared to the same periods in 2009, primarily resulting from decreases in short-term market interest rates and LIBOR. Although increases in short-term market interest rates will increase the interest expense for junior subordinated debentures, we believe that other attributes of our balance sheet will serve to mitigate the impact to net interest income on a consolidated basis.

On January 1, 2007, Umpqua elected the fair value measurement option for certain pre-existing junior subordinated debentures of \$97.9 million (the Umpqua Statutory Trusts). The remaining junior subordinated debentures as of the adoption date were acquired through business combinations and were measured at fair value at the time of acquisition. In 2007 the Company issued two series of trust preferred securities and elected to measure each instrument at fair value. Accounting for junior subordinated debentures originally issued by the Company at fair value enables us to more closely align our financial performance with the economic value of those liabilities. Additionally, we believe it improves our

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

ability to manage the market and interest rate risks associated with the junior subordinated debentures. The junior subordinated debentures measured at fair value and amortized cost have been presented as separate line items on the balance sheet. The ending carrying (fair) value of the junior subordinated debentures measured at fair value represents the estimated amount that would be paid to transfer these liabilities in an orderly transaction amongst market participants under current market conditions as of the measurement date.

Prior to the second quarter of 2009, we estimated the fair value of junior subordinated debentures using an internal discounted cash flow model. The future cash flows of these instruments were extended to the next available redemption date or maturity date as appropriate based upon the spreads of recent issuances or quotes from brokers for comparable bank holding companies, as available, compared to the contractual spread of each junior subordinated debenture measured at fair value. The significant inputs utilized in the estimation of fair value of these instruments is the credit risk adjusted spread and three month LIBOR. The credit risk adjusted spread represents the nonperformance risk of the liability, contemplating both the inherent risk of the obligation and the Company's entity-

Table of Contents

specific credit risk. Generally, an increase in the credit risk adjusted spread and/or a decrease in the three month LIBOR will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the three month LIBOR will result in negative fair value adjustments. For additional assurance, we obtained valuations from a third-party pricing service to validate the results of our model.

Prior to the third quarter of 2008, we utilized a credit risk adjusted spread that was based upon recent issuances or quotes from brokers for comparable bank holding companies as of the date of valuation, and we considered this to be a Level 2 input. Due to the increasing credit concerns in the capital markets and inactivity in the trust preferred markets that have limited the observability of market spreads, we have classified this as a Level 3 fair value measure in the third quarter of 2008.

In the second quarter of 2009, due to continued inactivity in the junior subordinated debenture and related markets and clarified guidance relating to the determination of fair value when the volume and level of activity for an asset or liability have significantly decreased or where transactions are not orderly, management utilized a third-party pricing service to estimate the fair value of these liabilities. The pricing service utilizes an income approach valuation technique, specifically an option-adjusted spread (OAS) valuation model. This OAS model values the cash flows over multiple interest rate scenarios and discounts these cash flows using a credit risk adjustment spread over the three month LIBOR swap curve. The OAS model currently being utilized is more sophisticated and computationally intensive than the model previously used; however, the models react similarly to changes in the underlying inputs and the results are considered comparable. Generally, an increase in the credit risk adjusted spread and/or a decrease in the swap curve will result in positive fair value adjustments. Conversely, a decrease in the credit risk adjusted spread and/or an increase in the swap curve will result in negative fair value adjustments.

For the three months ended March 31, 2010, we recorded gains of \$6.1 million as compared to gains of \$580,000 for the three months ended March 31, 2009, resulting from the change in fair value of the junior subordinated debentures recorded at fair value. The change in fair value of the junior subordinated debentures carried at fair value in the current year primarily result from the widening of the credit risk adjusted spread. Management believes that the credit risk adjusted spread being utilized is indicative of the nonperformance risk premium a willing market participant would require under current market conditions, that is, the inactive market. In management's estimation, the change in fair value of the junior subordinated debentures during the current period represent changes in the market's nonperformance risk expectations and pricing of this type of debt, and not as a result of changes to our entity-specific credit risk.

Additional information regarding junior subordinated debentures measured at fair value is included in Note 15 of the *Notes to Condensed Consolidated Financial Statements*.

All of the debentures issued to the Trusts, less the common stock of the Trusts, qualified as Tier 1 capital as of March 31, 2010, under guidance issued by the Board of Governors of the Federal Reserve System. Additional information regarding the terms of the junior subordinated debentures, including maturity/redemption dates, interest rates and the fair value election, is included in Note 8 of the *Notes to Condensed Consolidated Financial Statements*.

LIQUIDITY AND CASH FLOW

The principal objective of our liquidity management program is to maintain the Bank's ability to meet the day-to-day cash flow requirements of our customers who either wish to withdraw funds or to draw upon credit facilities to meet their cash needs.

We monitor the sources and uses of funds on a daily basis to maintain an acceptable liquidity position. One source of funds includes public deposits. Individual state laws require banks to collateralize public deposits, typically as a percentage of their public deposit balance in excess of FDIC insurance. The amount of collateral required varies by state and may also vary by institution within each state, depending on the individual state's risk assessment of depository institutions. Changes in the pledging requirements for uninsured public deposits may require pledging additional collateral to secure these deposits, drawing on other sources of funds to finance the purchase of assets that would be available to be pledged to satisfy a pledging requirement, or could lead to the withdrawal of certain public deposits from the Bank. In addition to liquidity from core deposits and the repayments and maturities of loans and investment securities, the Bank can utilize established uncommitted federal funds lines of credit, sell securities under agreements to repurchase, borrow on a secured basis from the FHLB or issue brokered certificates of deposit.

The Bank had available lines of credit with the FHLB totaling \$2.1 billion at March 31, 2010 subject to certain collateral requirements, namely the amount of pledged loans and investment securities. The Bank had uncommitted federal funds line of credit agreements with additional financial institutions totaling \$125.0 million at March 31, 2010. Availability of lines is subject to federal funds balances available for loan and continued borrower eligibility. These lines are intended to support short-term liquidity needs, and the agreements may restrict consecutive day usage.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

The Company is a separate entity from the Bank and must provide for its own liquidity. Substantially all of the Company's revenues are obtained from dividends declared and paid by the Bank. There were no dividends paid by the Bank to the Company in the three

Table of Contents

months ended March 31, 2010. There are statutory and regulatory provisions that could limit the ability of the Bank to pay dividends to the Company. We believe that such restrictions will not have an adverse impact on the ability of the Company to fund its quarterly cash dividend distributions to common shareholders and meet its ongoing cash obligations, which consist principally of debt service on the \$230.1 million (issued amount) of outstanding junior subordinated debentures. As of March 31, 2010, the Company did not have any borrowing arrangements of its own.

As disclosed in the *Consolidated Statements of Cash Flows*, net cash provided by operating activities was \$60.7 million during the three months ended March 31, 2010. The difference between cash provided by operating activities and net loss largely consisted of non-cash items including a \$42.1 million provision for loan and lease losses. Net cash of \$307.4 million provided by investing activities consisted principally of net loan paydowns and maturities of \$137.2 million, proceeds from investment securities of \$65.4 million, cash acquired in the Rainier and Evergreen acquisitions of \$113.0 million, and proceeds from the sale of other real estate owned of \$5.8 million, partially offset by \$11.9 million of purchases of investment securities available for sale and \$3.5 million of purchases of premises and equipment. The \$48.9 million of cash provided by financing activities primarily consisted of \$55.5 million increase in net deposits, \$89.9 million in net proceeds from the issuance of common stock and \$198.3 million in net proceeds from the issuance of preferred stock, partially offset by \$66.4 million repayment of term debt, \$214.2 million of redemption of preferred stock, \$4.5 million of redemption of warrants, \$4.3 million of dividends paid on common stock and \$2.7 million of dividends paid on preferred stock.

Although we expect the Bank's and the Company's liquidity positions to remain satisfactory during 2010, it is possible that our deposit growth for 2010 may not be maintained at previous levels due to pricing pressure or, in order to generate deposit growth, our pricing may need to be adjusted in a manner that results in increased interest expense on deposits.

OFF-BALANCE-SHEET ARRANGEMENTS

Information regarding Off-Balance-Sheet Arrangements is included in Note 9 of the *Notes to Condensed Consolidated Financial Statements*.

CONCENTRATIONS OF CREDIT RISK

Information regarding Concentrations of Credit Risk is included in Note 9 of the *Notes to Condensed Consolidated Financial Statements*.

CAPITAL RESOURCES

Shareholders' equity at March 31, 2010 was \$1.6 billion, an increase of \$80.3 million from December 31, 2009. The increase in shareholders' equity during the three months ended March 31, 2010 was principally due to the \$288.2 million in net proceeds from the public stock offering, the net change in unrealized gains on investment securities available for sale of \$8.3 million (net of tax), net income of \$9.7 million for the three month period, offset by the redemption of preferred stock under the TARP CPP of \$214.2 million, repurchase of warrants issued to the U.S. Treasury for \$4.5 million, common stock dividends of \$4.8 million, and preferred stock dividends of \$3.7 million.

The following table shows Umpqua Holdings' consolidated and Umpqua Bank's capital adequacy ratios, as calculated under regulatory guidelines, compared to the regulatory minimum capital ratio and the regulatory minimum capital ratio needed to qualify as a well-capitalized institution at March 31, 2010 and December 31, 2009:

Table of Contents

(dollars in thousands)

Consolidated	\$ 1,110,311	15.91%	\$ 279,148	4.00%	\$ 418,722	6.00%
Umpqua Bank	\$ 851,227	12.21%	\$ 278,862	4.00%	\$ 418,293	6.00%
Tier I Capital (to Average Assets)						
Consolidated	\$ 1,110,311	12.79%	\$ 347,243	4.00%	\$ 434,054	5.00%
Umpqua Bank	\$ 851,227	9.81%	\$ 347,085	4.00%	\$ 433,857	5.00%

On February 3, 2010, the Company raised \$303.6 million through a public offering by issuing 8,625,000 shares of the Company's common stock, including 1,125,000 shares pursuant to the underwriters' over-allotment option, at a share price of \$11.00 per share and 18,975,000 depository shares, including 2,475,000 depository shares pursuant to the underwriter's over-allotment option, also at a price of \$11.00 per share. The net proceeds to the Company after deducting underwriting discounts and commissions and offering expenses were \$288.2 million. The net proceeds from the offering will qualify and the net proceeds of the depository shares offering will (when converted into common stock) qualify as tangible common equity and Tier 1 capital, and were used to redeem the preferred stock issued to the United States Department of the Treasury (U.S. Treasury) under the TARP Capital Purchase Program (CPP), to fund FDIC-assisted acquisition opportunities and for general corporate purposes.

On February 17, 2010, the Company redeemed all of the outstanding Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury under the TARP CPP for an aggregate purchase price of \$214.2 million. As a result of the repurchase of the Series A preferred stock, the Company incurred a one-time deemed dividend of \$9.7 million due to the accelerated amortization of the remaining issuance discount on the preferred stock.

On March 31, 2010, the Company repurchased the common stock warrant issued to the U.S. Treasury pursuant to the Troubled Asset Relief Program (TARP) Capital Purchase Program, for \$4.5 million. The warrant repurchase, together with the Company's redemption in February 2010 of the entire amount of Fixed Rate Cumulative Perpetual Preferred Stock, Series A, issued to the U.S. Treasury, represents full repayment of all TARP obligations and cancellation of all equity interests in the Company held by the U.S. Treasury.

On April 21, 2009, the Company announced that the Board of Directors approved an extension to the expiration date of the common stock repurchase plan from June 30, 2009 to June 30, 2011. As of March 31, 2010, a total of 1.5 million shares remained available for repurchase. No shares were repurchased under the repurchase plan during the first quarter of 2010. The timing and amount of future repurchases will depend upon the market price for our common stock, securities laws restricting repurchases, asset growth, earnings, and our capital plan. However, there are no longer limitations resulting from the Company's participation in the TARP Capital Purchase Program. In addition, our stock plans provide

that option and restricted stock award holders may pay for the exercise price and tax withholdings in part or whole by tendering previously held shares.

Table of Contents

The Company's dividend policy considers, among other things, earnings, regulatory capital levels, the overall payout ratio and expected asset growth to determine the amount of dividends declared, if any, on a quarterly basis. There is no assurance that future cash dividends on common shares will be declared or increased. The following table presents cash dividends declared and dividend payout ratios (dividends declared per common share divided by basic earnings per common share) for the three months ended March 31, 2010 and 2009:

Cash Dividends and Payout Ratios per Common Share

	Three months ended March 31,	
	2010	2009
Dividend declared per common share	\$ 0.05	\$ 0.05
Dividend payout ratio	-167%	-16%

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our assessment of market risk as of March 31, 2010 indicates there are no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 4. Controls and Procedures

Our management, including our Chief Executive Officer, Chief Financial Officer and Principal Accounting Officer, has concluded that our disclosure controls and procedures are effective in timely alerting them to information relating to us that is required to be included in our periodic SEC filings. The disclosure controls and procedures were last evaluated by management as of March 31, 2010.

There have been no changes in our internal controls or in other factors that have materially affected or are likely to materially affect our internal controls over financial reporting subsequent to the date of the evaluation.

Table of Contents

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

On June 19, 2009, in the Circuit Court of the State of Oregon for Multnomah County, Kevin D. Padrick, Trustee of the Summit Accommodators Liquidating Trust, as plaintiff, filed a complaint seeking damages of at least \$30 million from Umpqua Bank. Plaintiff alleges that the Bank's provision of banking services to Summit Accommodators, Inc. (Summit), a 1031 exchange accommodator, aided and abetted the principals of Summit to breach their fiduciary duty to Summit. Based on the allegations in the complaint and our understanding of the relevant facts and circumstances, we believe that the claim is without merit and the Company is vigorously defending the claim.

On September 10, 2009, Danae Miller and fifty-seven additional plaintiffs, who are creditors in the Summit bankruptcy, filed a complaint in Multnomah County Circuit Court seeking damages of at least \$30 million from Umpqua Bank. Plaintiffs make allegations that are similar to the allegations made by Padrick, i.e. that the Bank's provision of banking services to Summit aided and abetted Summit's breach of fiduciary duty to plaintiffs. Like the Padrick case, we believe that this claim is without merit and the Company is vigorously defending the claim.

No loss accrual has been made for either of these claims in the accompanying unaudited consolidated financial statements.

In addition, due to the nature of our business, we are involved in legal proceedings that arise in the ordinary course of our business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations, or cash flows.

See Note 9, Commitments and Contingencies, for a discussion of the Company's involvement in litigation pertaining to Visa, Inc.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under Part I Item 1A Risk Factors in our Form 10-K for the year ended December 31, 2009, as supplemented and updated by the discussion below. These factors could materially adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Umpqua Bank's assumption of the banking operations of EvergreenBank and Rainier Pacific Bank from the FDIC under Whole Bank Purchase and Assumption Agreements with Loss-Share.

Our decisions regarding the fair value of assets acquired, including the FDIC loss sharing assets, could be inaccurate which could materially and adversely affect our business, financial condition, results of operations, and future prospects. Management makes various assumptions and judgments about the collectability of the acquired loans, including the creditworthiness of borrowers and the value of the real estate and other assets serving as collateral for the repayment of secured loans. In FDIC-assisted acquisitions that include loss sharing agreements, we may record a loss sharing asset that we consider adequate to absorb future losses which may occur in the acquired loan portfolio. In determining the size of the loss sharing asset, we analyze the loan portfolio based on historical loss experience, volume and classification of loans, volume and trends in delinquencies and nonaccruals, local economic conditions, and other pertinent information.

If our assumptions are incorrect, the balance of the FDIC indemnification asset may at any time be insufficient to cover future loan losses, and credit loss provisions may be needed to respond to different economic conditions or adverse developments in the acquired loan portfolio. Any increase in future loan losses could have a negative effect on our operating results.

Our ability to obtain reimbursement under the loss sharing agreements on covered assets depends on our compliance with the terms of the loss sharing agreements. Management must certify to the FDIC on a quarterly basis our compliance with the terms of the FDIC loss sharing agreements as a prerequisite to obtaining reimbursement from the FDIC for realized losses on covered assets. The required terms of the agreements are extensive and failure to comply with any of the guidelines could result in a specific asset or group of assets permanently losing their loss sharing coverage. Additionally, management may decide to forgo loss share coverage on certain assets to allow greater flexibility over the management of certain assets. As of March 31, 2010, \$705.8 million, or 6.7%, of the Company's assets were covered by the aforementioned FDIC loss sharing agreements.

Edgar Filing: UMPQUA HOLDINGS CORP - Form 10-Q

Under the terms of the FDIC loss sharing agreements, the assignment or transfer of a loss sharing agreement to another entity generally requires the written consent of the FDIC. In addition, the Bank may not assign or otherwise transfer a loss sharing agreement during its term without the prior written consent of the FDIC. No assurances can be given that we will manage the covered assets in such a way as to always maintain loss share coverage on all such assets.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

- (a) Not Applicable
- (b) Not Applicable
- (c) The following table provides information about repurchases of common stock by the Company during the quarter ended March 31, 2010:

Period	Total number of Common Shares Purchased (1)	Average Price Paid per Common Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (2)	Maximum Number of Remaining Shares that May be Purchased at Period End under the Plan
1/1/10 - 1/31/10	7,627	\$ 12.43	-	1,542,945
2/1/10 - 2/28/10	3,769	\$ 11.75	-	1,542,945
3/1/10 - 3/31/10	8,325	\$ 13.36	-	1,542,945
Total for quarter	19,721	\$ 12.69	-	

- (1) Common shares repurchased by the Company during the quarter consist of cancellation of 11,396 restricted stock awards and 5,583 restricted stock units to pay withholding taxes. During the three months ended March 31, 2010, common shares repurchased consist of 2,742 tendered in connection with option exercises and no shares were repurchased pursuant to the Company's publicly announced corporate stock repurchase plan described in (3) below.
- (2) The repurchase plan, which was approved by the Board and announced in August 2003, originally authorized the repurchase of up to 1.0 million shares. The authorization was amended to increase the repurchase limit initially to 1.5 million shares and subsequently to 2.5 million shares. On April 19, 2007, the Company announced an expansion of the repurchase plan by increasing the repurchase limit to 6.0 million shares and extending the plan's expiration date to June 30, 2009. On April 21, 2009, the Company announced a further extension of the plan's expiration date to June 30, 2011.
