XINYUAN REAL ESTATE CO., LTD. ANNOUNCES FIRST QUARTER 2011

FINANCIAL RESULTS

BEIJING, China, May 12, 2011 Xinyuan Real Estate Co., Ltd. (Xinyuan or the Company) (NYSE: XIN), a residential real estate developer with a focus on high growth, strategic Tier II cities in China, today announced its unaudited financial results for the first quarter of 2011.

Highlights for the First Quarter 2011

First quarter results were impacted by additional restrictive government policies issued in the quarter to curb speculation. Full year outlook remains strong with healthy sales growth and solid profits.

Total first quarter revenues were US\$91.8 million, a 17% decrease from US\$110.7 million reported in the first quarter of 2010, and 33% below the US\$137.2 million recorded in the fourth quarter of 2010.

Contract sales totaled US\$98.0 million, a 32% decrease from US\$143.4 million recorded in the first quarter of 2010, and 50% below the US\$194.1 million recorded in the fourth quarter of 2010.

Total gross floor area (GFA) sales were 81,600 square meters, a 36% decrease from 126,900 square meters sold in the first quarter of 2010 and 53% below the 173,200 square meters sold in the fourth quarter of 2010.

Selling, General, and Administrative (SG&A) expenses decreased by US\$0.5 million in absolute terms from the first quarter of 2010, but edged up as a percent of total revenue to 8.0% from 7.1% in the first quarter of 2010.

Net income was US\$11.7 million, a US\$0.2 million decrease from US\$11.9 million reported in the first quarter of 2010 and a US\$9.9 million decrease from US\$21.6 million in the fourth quarter of 2010.

Diluted net earnings per share attributable to ordinary shareholders were US\$0.08, equivalent to US\$0.16 per American Depositary Share (ADS), compared to diluted net earnings per share of US\$0.07, equivalent to US\$0.14 per ADS in the first quarter of 2010.

Cash and cash equivalents, including restricted cash, increased by US\$53 million to US\$348.6 million as of March 31, 2011 from US\$295.6 million as of December 31, 2010. Short and long term debt increased by US\$27.6 million to US\$323.5 million compared to US\$295.9 million as of December 31, 2010.

Table of Contents

Zhengzhou Yipinxiangshan II started pre-sales in March 2011, ahead of the original schedule of Q2 2011. Mr. Yong Zhang, Xinyuan's Chairman and Chief Executive Officer commented, "Our first quarter sales were below our expectations as buyers became increasingly cautious due to new government measures to further curb housing prices and speculation. At the end of January, the Beijing government issued purchase restrictions which prohibit local residents from having more than two dwellings. Purchase restrictions for non-local residents are stricter. During February, municipal governments also issued their specific purchase restrictions. This not only impacted individuals and families who were looking to buy second homes to upgrade their living condition, but also first time home buyers who are waiting to see if there will be additional restrictive policies that might impact their ability to purchase a home. Potential buyers are also looking for indications that prices in certain regions are likely to decline in the near future. While the new tightening measures are having a negative impact on our sales, we believe that, as was the case over the past year, consumers will eventually learn to cope with these new policies. We have seen some encouraging recovery signs since April."

Though we cannot control the government's actions or policies, we remain confident in our strategy to offer affordable developments targeting homeowners in Tier II and III cities, where speculation is far less prevalent than Tier I cities. The urbanization rate in China for 2010 was approximately 47%, and is expected to reach 65% in 2030, according to the Development Center of the State Council. We believe our strategies and continued urbanization and migration patterns will benefit the Company in the long run. We have a solid balance sheet, an ample cash position, a low debt ratio, an attractive land bank, and the Shandong project will start pre-sales in the second quarter. All these factors contribute to our optimism about our growth prospects," concluded Mr. Zhang.

Financial Results for the 2011 First Quarter

Contract Sales

Contract sales totaled US\$98.0 million in the first quarter compared to US\$194.1 million in the fourth quarter of 2010. The Company's GFA sales were 81,600 square meters in the first quarter of 2011 versus 173,200 square meters in the fourth quarter of 2010 and 126,900 square meters in the first quarter of 2010. The average selling price per square meter sold increased by 4.3% reaching RMB7,908 (US\$1,201) versus RMB7,584 (US\$1,120) in the fourth quarter of 2010. The Company has not lowered the price of any category of apartment in any project.

The sequential sales volume decrease was attributable to both the seasonal effects of Chinese New Year and the impact of new central government policy pronouncements in late January 2011 and updated specific purchase restrictions in municipalities throughout February.

Revenue under the Percentage of Completion Method

In the first quarter of 2011, the Company's total revenue using the percentage of completion method was US\$91.8 million compared to US\$137.2 million in the quarter ended December 31, 2010 and US\$110.7 million in the first quarter of 2010.

In the first quarter of 2011, the Company recorded contract sales for Kunshan International City Garden of US\$6.8 million for 41 apartments at an ASP per square meter of Rmb11,336 (US\$1,722). All contracts recorded in the first quarter of 2011 are clearly executable under prevailing government policies as of today, May 12, 2011. If future government policies further restrict contracted purchasers to the extent those contracts become not executable, it may be necessary to record further reversals. In our other projects throughout China, where over 90% of buyers are owner occupiers with no significant mortgage availability problem, we have encountered no such reversal issue.

Gross Profit

Gross profit for the first quarter of 2011 was US\$25.1 million, or 27.3% of revenue, compared to gross profit of US\$24.7 million, or 22.3% of revenue, in the first quarter of 2010 and gross profit of US\$41.4 million, or 30.2% of revenue, in the fourth quarter of 2010.

Table of Contents

The Company revised total project cost and sales estimates for certain projects such that US\$3.4 million of cumulative gross profit was recognized in the first quarter of 2011 under the percentage of completion method due to changes in estimates. The first quarter impact was primarily driven by one project: Yipinxiangshan I, a project acquired with the Jiantou Xinyuan acquisition in November 2010. This project that is 97% sold and 97% complete recorded higher than expected ASPs in the fourth quarter of 2010 and, more importantly, we were able to enjoy certain economies in lowering our completed project cost estimates.

Through March 31, 2011 we have amortized US\$4.2 million of a total US\$10.2 million purchase price adjustment related to the acquisition of Jiantou Xinyuan made in November 2010. The purchase price adjustment was based on an independent appraisal of our Yipinxianshan I and II projects and the allocated amount by project is being amortized over the remaining contract sales of each project.

Selling, General, and Administrative Expenses

SG&A expenses were US\$7.4 million for the first quarter of 2011 compared to US\$7.9 million for the first quarter of 2010 and US\$9.1 million for the fourth quarter of 2010. As a percentage of total revenue, SG&A expenses were 8.1% compared to 7.1% in the first quarter of 2010 and 6.7% in the fourth quarter of 2010.

Share-based Compensation

Share-based compensation was US\$0.5 million for the first quarter of 2011 compared to US\$0.7 million for the first quarter of 2010 and US\$0.6 million for the fourth quarter of 2010.

Net Income

Net income for the first quarter of 2011 was US\$11.7 million compared to US\$11.9 million for the same period in 2010 and US\$21.6 million in the fourth quarter of 2010. Diluted earnings per share for the first quarter of 2011 were US\$0.08, equivalent to US\$0.16 per ADS compared to a profit of US\$0.07 per share, equivalent to US\$0.14 per ADS for the same period in 2010, and US\$0.14, equivalent to US\$0.28 per ADS in the fourth quarter of 2010.

Balance Sheet

As of March 31, 2011, the Company reported US\$348.6 million in cash and cash equivalents (including restricted cash) compared to US\$295.6 million as of December 31, 2010. Total debt outstanding was US\$323.5 million, an increase of US\$27.6 million compared to US\$295.9 million at the end of the fourth quarter of 2010. Real estate property under development was US\$669.1 million at first quarter end compared to US\$710.6 million at the end of the fourth quarter of 2010.

Total Xinyuan projects in planning	913.1	
Total active projects	736.6	
Total Xinyuan projects	1,649.7	

Second Quarter and 2011 Outlook

The company launched Yipinxiangshan II at the end of March. Jinan Splendid is due to launch later this month, and Zhengzhou Century East A may launch before the end of the second quarter, although we do not include it in our second quarter forecast. Because of these new projects, the continued strong performance of our Chengdu Splendid II, Xuzhou Colorful Garden and Zhengzhou Modern City projects, and an encouraging sales recovery in April, the Company is able to provide performance guidance with reasonable confidence.

Table of Contents

In the second quarter of 2011 we expect a sequential contract sales increase over the first quarter of at least 55% to US\$155 to US\$160 million. Revenue under the percentage of completion method is expected to range between US\$140 to US\$150 million while net income should exceed US\$20 million.

For the full year 2011 the Company continues to expect healthy sales growth due to our project pipeline. Contract sales are expected to reach US\$650 to US\$675 million for the year while revenue under the percentage of completion method should range from US\$625 to US\$650 million. Both figures are down slightly from previous guidance due to our first quarter shortfall. Net income guidance for the year remains unchanged at US\$75 million.

Percentage of Completion Accounting

Xinyuan's projects recognize revenue under the percentage of completion method. This requires the Company to re-evaluate its estimates of future revenues and costs on a quarterly basis project by project.

$$\text{Cumulative revenue} = \frac{\text{Cumulative contract sales proceeds} \times \text{Cumulative incurred cost}}{\text{Total estimated project cost}}$$

$$\text{Cumulative cost of sales} = \frac{\text{Cumulative contract sales} \times \text{Cumulative incurred cost}}{\text{Total estimated project revenue}}$$

Whenever Xinyuan makes changes to expected total project life profit margins, a catch-up adjustment must be made in the quarter of change to account for the difference between profits previously recognized using the previous profit margin estimate and the comparable profit using the new profit margin estimates. Further, if the updated profit margin indicates that the Company will have to sell units at a price less than its costs to develop them, it must recognize the full expected gross loss over the life of the project at that time regardless of whether the units have been sold. Additionally for such unprofitable projects the Company must also determine whether an impairment exists, and, if so, write down the cost to the fair value of the project which, in turn, may be less than the basis after recognizing the effect of future losses.
