These stores are operated under the *Hush Puppies*[®], *Hush Puppies and Family*SM, *Track N Trail*[®], *Sebago*[®], *Wolverine Company Store*, *Rockford Footwear Depot*[®] and *Merrell*[®] names. The *Rockford Footwear Depot*[®], *Track N Trail*[®], *Hush Puppies*[®] and *Hush Puppies and Family*SM retail formats carry a large selection of Company-branded products, featuring such brands as *Wolverine*[®], *Merrell*[®], *Hush Puppies*[®], *Cat*[®], *Chaco*[®], *Cushe*[®], *Patagonia*[®], *Sebago*[®] and *Harley-Davidson*[®]. The Company also operates *Merrell*[®] concept stores, *Hush Puppies*[®] concept stores and *Sebago*[®] concept stores, providing a platform to showcase these brands exclusively. In addition, the Company operates 42 consumer-direct retail websites, including www.merrell.com, www.wolverine.com, www.cushe.com, www.hushpuppies.com, www.chacos.com, www.catfootwear.com, www.sebago.com and www.batesfootwear.com.
2. **The Wolverine Leathers Division** The Wolverine Leathers Division markets pigskin leather for use primarily in the footwear industry. The Company believes pigskin leather offers superior performance and other advantages over cowhide leather. The Company's waterproof and stain resistant leathers are featured in some of the Company's footwear lines and many products offered by the Company's international licensees and distributors.

Marketing

The Company's marketing strategy is to develop brand-specific plans and related promotional materials for U.S. and international markets to foster a consistent message for each of the Company's core brands. Each brand

Table of Contents

operating group has dedicated marketing personnel who develop the marketing strategy for brands within that group. Marketing campaigns and strategies vary by brand and are designed to target accounts and/or end users as the brand operating groups strive to increase awareness of, and affinity for, the Company's brands. The Company's advertisements typically emphasize fashion, comfort, quality, durability, functionality and other performance and lifestyle aspects of the Company's products. Components of the brand-specific plans vary and may include print, radio and television advertising, search engine optimization, social networking sites, event sponsorships, in-store point-of-purchase displays, promotional materials, and sales and technical assistance.

The Company's brand operating groups provide its licensees and distributors with creative direction, brand images and other materials to convey consistent brand messaging, including (i) direction on the categories of footwear to be promoted, (ii) photography and layouts, (iii) broadcast advertising, including commercials and film footage, (iv) point-of-purchase presentation specifications, blueprints and packaging, (v) sales materials and (vi) consulting services regarding retail store layout and design. The Company believes its brand names represent a competitive advantage, and the Company makes significant expenditures on marketing and promotion to support the position of its products and enhance brand awareness.

Domestic Sales and Distribution

The Company uses a wide variety of domestic distribution channels and strategies to distribute its branded products:

The Company uses a dedicated sales force and customer service team, advertising and point-of-purchase support and maintains in-stock inventories to service department stores, national chains, specialty retailers, catalogs, independent retailers, uniform outlets and its own consumer direct business.

Volume direct programs ship products directly to the retail customer without going through a Company distribution center and provide products at competitive prices with limited marketing support. The Company uses these programs to service major retail, catalog, mass merchant and government customers.

A network of independent *Shoemobile*[®] distribution outlets distributes the Company's work and occupational footwear at industrial facilities.

The Company solicits all branches of the United States military and submits bids for contracts to supply specific footwear products. Such contracts typically contain future purchase options that may or may not be exercised.

In addition to its wholesale activities, the Company also operates a consumer-direct business as described above. The Company continues to develop new programs, both independently and in conjunction with its retail customers, for the distribution of its products.

A broad distribution base insulates the Company from dependence on any one customer. No customer of the Company accounted for more than 10% of the Company's revenue in fiscal year 2011.

The Company experiences moderate fluctuations in sales volume during the year as reflected in quarterly revenue (and taking into consideration the 16 weeks or 17 weeks included in the Company's fiscal fourth quarter versus the 12 weeks included in each of the first three fiscal quarters). The Company expects current seasonal sales patterns to continue in future years. The Company also experiences some fluctuation in its levels of working capital, typically including an increase in working capital requirements near the end of the first and third quarters. The Company meets its working capital requirements through internal free cash flow and, as needed, a revolving credit agreement.

Table of Contents

International Operations and Global Licensing

The Company's foreign-sourced revenue is generated from a combination of (i) sales of branded footwear and apparel through the Company's owned operations in Canada, the United Kingdom and several branch offices in Europe; (ii) sales to third-party distributors for certain markets and businesses; and (iii) royalty income from a network of third-party licensees and distributors. The Company's owned operations are located in markets where the Company believes it can gain a strategic advantage by directly controlling the sale of its products into retail accounts. License and distribution arrangements enable the Company to develop sales in other markets without the capital commitment required to maintain related foreign operations, employees, inventories or localized marketing programs.

The Company continues to develop its network of licensees and distributors to market its branded products. The Company assists its licensees in designing products that are appropriate to each foreign market, but consistent with the global brand position. Pursuant to distribution or license agreements, third-party licensees and distributors either purchase goods directly from the Company and authorized third-party manufacturers or manufacture branded products themselves, consistent with Company standards. Distributors and licensees are responsible for independently marketing and distributing Company branded products in their respective territories, with product and marketing support from the Company.

Manufacturing and Sourcing

The Company directly controls the majority of the units of footwear and apparel manufactured or sourced under the Company's brand names. The balance is controlled directly by the Company's licensees. A substantial majority of the units sourced and/or manufactured by the Company are purchased or sourced from third parties, with the remainder produced at Company-owned facilities. The Company sources a majority of its footwear from numerous third-party manufacturers in the Asia Pacific region, South America and India. The Company maintains offices in the Asia Pacific region to facilitate and develop strategies for the sourcing and importation of quality footwear and apparel. The Company has established guidelines for each of its third-party manufacturers in order to monitor product quality, labor practices and financial viability. The Company has adopted Engagement Criteria for Partners & Sources, a policy that requires that the Company's domestic and foreign manufacturers, licensees and distributors use ethical business standards; comply with all applicable health and safety laws and regulations; commit to use environmentally safe practices; treat employees fairly with respect to wages, benefits and working conditions; and not use child or prison labor. Footwear produced by the Company is manufactured at Company-operated facilities located in Michigan and the Dominican Republic.

The Company's owned manufacturing operations allow the Company to (i) reduce its production lead time, to more quickly respond to market demand and reduce inventory risk, (ii) lower freight, shipping and duty costs for sales to certain markets, and (iii) more closely monitor product quality. The Company's third-party sourcing strategy allows the Company to (i) benefit from lower manufacturing costs and state-of-the-art manufacturing facilities, (ii) source high quality raw materials from around the world, and (iii) avoid capital expenditures necessary for additional owned factories. The Company believes that its overall global manufacturing strategy provides the flexibility to properly balance the need for timely shipments, high quality products and competitive pricing.

The Company's principal required raw material is quality leather, which it purchases from a select group of domestic and foreign suppliers. The global availability of common upper materials and specialty leathers eliminates any reliance by the Company on a sole supplier.

The Company currently purchases all of the raw pigskins used for its Wolverine Leathers Division from one domestic source, which has been a reliable and consistent supplier to the Company for over 40 years. Alternative sources of raw pigskin are available, but with less advantageous pricing, quality and compatibility with the Company's processing method. The Company purchases all of its other raw materials and component parts from a variety of sources and does not believe that any of these sources are a dominant supplier.

Table of Contents

The Company is subject to the normal risks of doing business abroad due to its international operations, including the risk of expropriation, acts of war or terrorism, political disturbances and similar events, the imposition of trade barriers, quotas, tariffs and duties, loss of most favored nation trading status and currency and exchange rate fluctuations. With respect to international sourcing activities, management believes that over a period of time, it could arrange adequate alternative sources of supply for the products currently obtained from its foreign suppliers, but that a sustained disruption of such sources of supply could have an adverse impact on the Company's results of operations and financial position.

Trademarks, Licenses and Patents

The Company holds a significant portfolio of registered and common law trademarks that identify its branded products. The Company's owned trademarks include *Hush Puppies*[®], *Wolverine*[®], *Bates*[®], *Cushe*[®], *Chaco*[®], *Soft Style*[®], *Wolverine Fusion*[®], *DuraShocks*[®], *MultiShox*[®], *Wolverine Compressor*[®], *Hidden Tracks*[®], *iTechnology*[™], *Bounce*[®], *Comfort Curve*[®], *HyTest*[®], *Merrell*[®], M Circle Design (registered design trademark), *Continuum*[®], *Sebago*[®], *Q Form*[®] and *Track N Trail*. The Company's Wolverine Leathers Division markets its pigskin leathers under the trademarks *Wolverine Warrior Leather*[®], *Weather Tight*[®] and *All Season Weather Leathers*. The Company has footwear marketing and distribution rights under the *Cat*[®], *Harley-Davidson*[®] and *Patagonia*[®] trademarks pursuant to license arrangements with the respective trademark owners. The *Cat*[®], *Harley-Davidson*[®], and *Patagonia*[®] licenses extend for three or more years and are subject to early termination for breach.

The Company believes that consumers identify its products by the Company's trademarks and that its trademarks are valuable assets. The Company is not aware of any infringing uses or any prior claims of ownership of its trademarks that could materially affect its current business. The Company has a policy of registering its primary trademarks and vigorously defending its trademarks against infringement or other threats whenever practicable. The Company also holds many design and utility patents, copyrights and various other proprietary rights. The Company vigorously protects its proprietary rights under applicable laws.

Order Backlog

At December 31, 2011 the Company had an order backlog of approximately \$483 million compared to an order backlog of approximately \$470 million at January 1, 2011, determined on a consistent basis. A majority of the backlog relates to orders for products expected to be shipped in 2012. Orders in the backlog are subject to cancellation by customers and to changes in planned customer demand or at-once orders. The backlog at any particular time is affected by a number of factors, including seasonality, retail conditions, expected customer demand, product availability and the schedule for the manufacture and shipment of products. Accordingly, a comparison of backlog from period to period is not necessarily meaningful and may not be predictive of eventual actual shipments.

Competition

The Company markets its footwear and apparel lines in a highly competitive and fragmented environment. The Company competes with numerous domestic and international marketers and importers, some of which are larger and have greater resources than the Company. The Company has at least forty major competitors for its brands of footwear and apparel. Product performance and quality, including technological improvements, product identity, competitive pricing and ability to control costs, and the ability to adapt to style changes are all important elements of competition in the footwear and apparel markets served by the Company. The footwear and apparel industries in general are subject to changes in consumer preferences. The Company strives to maintain its competitive position through promotions designed to increase brand awareness, manufacturing and sourcing efficiencies, and the style, comfort and value of its products. Future sales by the Company will be affected by its continued ability to sell its products at competitive prices and to meet shifts in consumer preferences.

Table of Contents

Because of the lack of reliable published statistics, the Company is unable to state with certainty its competitive position in the overall footwear and apparel industries. Market shares in the non-athletic footwear and apparel industry are highly fragmented, and no one company has a dominant market position.

Research and Development

In addition to normal and recurring product development, design and styling activities, the Company engages in research and development activities related to the development of new production techniques and to the improvement of the function, performance, reliability and quality of its branded footwear and other products. For example, the Company's continuing relationship with the Biomechanics Evaluation Laboratory at Michigan State University has helped validate and refine specific biomechanical design concepts, such as *Bounce*[®], *DuraShocks*[®] and *Hidden Tracks*[®] comfort technologies, which have been incorporated into the Company's footwear. While the Company expects to continue to be a leading developer of footwear innovations, research and development costs do not represent a material portion of operating expenses.

Environmental Matters

Compliance with domestic and foreign federal, state and local requirements regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment have not had, nor are they expected to have, any material effect on the capital expenditures, earnings or competitive position of the Company. The Company uses and generates certain substances and wastes that are regulated or may be deemed hazardous to the environment under certain federal, state and local regulations. The Company works with domestic and foreign federal, state and local agencies from time to time to resolve cleanup issues at various waste sites and other regulatory issues.

Item 1A. Risk Factors

Changes in general economic conditions and other factors affecting consumer spending could adversely affect the Company's sales, operating results or financial position.

The Company's global operations depend on factors affecting consumer disposable income and spending patterns. These factors include general economic conditions, employment rates, business conditions, interest rates

and tax policy. Customers may defer or cancel purchases of the Company's products due to uncertainty about global economic conditions. Consumer confidence may decline due to recessionary economic cycles, high interest rates on consumer or business borrowings, restricted credit availability, inflation, high levels of unemployment or consumer debt, high tax rates or other economic factors. Declining consumer confidence could adversely affect demand for the Company's products. Changes in the amount or severity of bad weather and the growth or decline of global footwear, apparel or consumer-direct markets could affect negatively consumer spending. A decline in demand for the Company's products could reduce the Company's revenues or profit margins.

General economic conditions and regulatory factors such as those listed above, as well as increased costs of fuel, labor, commodities, insurance and health care, may increase the Company's cost of sales and operating expenses. Such increases could adversely affect the Company's financial position and results of operations.

The Company operates in competitive industries and markets.

The Company competes with a large number of marketers of footwear or apparel, and consumer-direct companies. Some of these competitors are larger and have greater resources than the Company. Important elements of such competition are product performance and quality, including technological improvements, product identity, competitive pricing and the ability to adapt to style changes. Consumer preferences and, as a result, the popularity of particular designs and categories of footwear and apparel generally change over time. The Company strives to maintain and improve its competitive position by monitoring and responding to changes in consumer preferences, increasing brand awareness, gaining sourcing efficiencies, and enhancing the style, comfort and perceived value of its products. The Company's continued ability to sell its products at competitive prices and to meet shifts in consumer preferences will affect its future sales. If the Company is unable to respond effectively to competitive pressures and changes in consumer spending, its results of operations and financial position may be adversely affected.

Many of the Company's competitors have more developed consumer and customer bases, lower prices, or greater financial, technical or marketing resources than the Company, particularly in the apparel and consumer-direct businesses. The Company's competitors may implement more effective marketing campaigns; adopt more aggressive pricing policies; make more attractive offers to potential employees, distribution partners and manufacturers; or respond more quickly to changes in consumer preferences, than the Company. The Company's results of operations and financial position could be adversely affected if the Company's businesses are not successful.

The Company's operating results depend on effectively managing inventory levels.

The Company's ability to manage its inventories effectively is an important factor in its operations. Inventory shortages can impede the Company's ability to meet orders, adversely affect the timing of shipments to customers, and, consequently, diminish brand loyalty. Conversely, excess inventories can result in lower gross margins if the Company lowers prices in order to liquidate excess inventories. The Company's business, results of operations and financial position could be adversely affected if the Company is unable to effectively manage its inventory.

Increases or changes in duties, quotas, tariffs and other trade restrictions could adversely impact the Company's sales and profitability.

All of the Company's products manufactured overseas and imported into the U.S., the European Union and other countries are subject to customs duties collected by customs authorities. Customs information submitted by the Company is routinely subject to review by customs authorities. Additional U.S. or foreign customs duties, quotas, tariffs, anti-dumping duties, safeguard measures, cargo restrictions to prevent terrorism or other trade restrictions may be imposed on the importation of the Company's products in the future. The imposition of such

costs or restrictions in foreign countries where the Company operates, as well as in countries where the Company's third-party distributors and licensees operate, could result in increases in the cost of the Company's products generally and could adversely affect the sales and profitability of the Company.

Foreign currency exchange rate fluctuations could adversely impact the Company's business.

Foreign currency fluctuations affect the Company's reported revenue and profitability. In addition, because the Company may employ hedging strategies over time, changes in currency exchange rates may impact the Company's financial results positively or negatively in one period and not another, which may make it difficult to compare the Company's operating results from different periods. Currency exchange rate fluctuations may also adversely impact third parties who manufacture the Company's products by making their costs of raw materials or other production costs more expensive and more difficult to finance, thereby raising prices for the Company, its distributors and licensees. For a more detailed discussion of risk relating to foreign currency fluctuation, see Item 7A, *Quantitative and Qualitative Disclosures About Market Risk*.
