TSMC Reports First Quarter EPS of NT\$1.29

Hsinchu, Taiwan, R.O.C., April 26, 2012 TSMC today announced consolidated revenue of NT\$105.51 billion, net income of NT\$33.47 billion, and diluted earnings per share of NT\$1.29 (US\$0.22 per ADR unit) for the first quarter ended March 31, 2012.

Year-over-year, first quarter revenue increased 0.1% while both net income and diluted EPS decreased 7.7%. Compared to fourth quarter of 2011, first quarter of 2012 results represent a 0.8% increase in revenue, and a 6% increase in both net income and diluted EPS. All figures were prepared in accordance with R.O.C. GAAP on a consolidated basis.

In US dollars, first quarter revenue increased 2.7% from the previous quarter and decreased 1.3% year-over-year.

Gross margin for the quarter was 47.7%, operating margin was 33.6%, and net margin was 31.7%.

28-nanometer process technology accounted for 5% of total wafer revenues, 40-nanometer was 32%, and 65-nanometer accounted for 26%. These advanced technologies accounted for 63% of total wafer revenues.

Due to the fast growth of mobile computing devices, our customers replenishing inventories, and TSMC's leadership in technology and capacity, we have experienced strong orders in the last few months, said Lora Ho, SVP and Chief Financial Officer of TSMC. Based on our current business outlook and exchange rate assumption of 1 US dollar to 29.58 NT dollars, management expects overall performance for second quarter 2012 to be as follows :

Revenue is expected to be between NT\$126 billion and NT\$128 billion;

Gross profit margin is expected to be between 47% and 49%;

Operating profit margin is expected to be between 34.5% and 36.5%.

Due to stronger demand for TSMC's 28-nanometer technology and the pull-in of a 20-nanometer R&D process line, our estimate for 2012 capital expenditure is raised and is in the US\$8-8.5 billion range.

TSMC's 2012 first quarter consolidated results:
