Item 7.01 Regulation FD Disclosure.

During the second quarter of 2012, MRC Global Inc. (the Company) purchased in the open market \$102 million in face amount of the Company's 9.50% senior secured notes due 2016 for \$110.4 million. The purchases were funded from drawings against the Company's global asset-based lending facility, and the weighted average price of these purchases was \$108.28 per \$100 of face value. These purchases are consistent with the Company's strategy following its initial public offering of the Company's common stock to reduce its long-term debt, reduce its interest expense and continue its efforts to improve the Company's cash flow. The Company is expected to record an after-tax charge of \$7.3 million in the second quarter of 2012, or an earnings per share impact of approximately seven cents per share. The Company expects to reduce its interest expense (inclusive of reduced amortization expense for original issuance discount and debt issuance costs) as a result of the purchases by approximately \$8.6 million per year pre-tax (\$5.5 million per year after-tax) on a run rate basis during the remaining term of the notes, or about 6 cents per share after-tax earnings per share benefit, assuming current shares outstanding.
