### Dear Shareholder

In the final months of 2011, financial markets were highly volatile but were in a mode of gradual improvement. Global central bank actions and better-than-expected economic data tempered investors' anxiety after markets had been upended in the previous quarter by sovereign debt turmoil in the United States and Europe. Improving sentiment carried over into early 2012 as investors felt some relief from the world's financial woes. Volatility was low and risk assets (including stocks, commodities and high yield bonds) moved boldly higher through the first two months of 2012, while climbing Treasury yields pressured higher-quality fixed income assets.

Markets reversed course in the spring when Europe's debt problems boiled over once again. High levels of volatility returned as political instability threatened Greece's membership in the eurozone and debt problems in Spain grew increasingly severe. Sovereign debt yields in peripheral European countries continued to rise while finance leaders deliberated over the fiscal integration of the currency bloc. Alongside the drama in Europe, investors were discouraged by gloomy economic reports from various parts of the world. A slowdown in China, a key powerhouse for global growth, emerged as a particular concern. In the United States, disappointing jobs reports dealt a crushing blow to investor sentiment. Risk assets sold off in the second quarter as investors retreated to safe haven assets.

Despite ongoing concerns about the health of the global economy and the debt crisis in Europe, most asset classes enjoyed a robust summer rally powered mainly by expectations for policy stimulus from central banks in Europe and the United States. Global economic data continued to be mixed, but the spate of downside surprises seen in the second quarter had receded and, outside of some areas of Europe, the risk of recession largely subsided. Additionally, in response to mounting debt pressures, the European Central Bank allayed fears by affirming its conviction to preserve the euro bloc. Early in September, the European Central Bank announced its plan to purchase sovereign debt in the eurozone's most troubled nations. Later that month, the US Federal Reserve announced its long-awaited and surprisingly aggressive stimulus program, committing to purchase \$40 billion of agency mortgage-backed securities per month until the US economy exhibits enough strength to sustain real growth and the labor market shows solid improvement. These central bank actions boosted investor confidence and risk assets rallied globally.

European stocks continued their advance in the final month of the reporting period as progress toward fiscal integration created a more positive atmosphere for investors. However, as corporate earnings season got underway in the United States, lackluster results pointed to the fragility of global growth and pushed US equity markets down for the month of October. The period ended with increasing concern about how and when US politicians would resolve the nation's looming fiscal crisis, known as the fiscal cliff.

All asset classes performed well for the 12-month period ended October 31, 2012, with the strongest returns coming from US stocks and high yield bonds. For the six-month period ended October 31, 2012, equities underperformed fixed income investments, where high yield was the leading sector. US and international stocks finished the six-month period with modest gains, while emerging market stocks lagged other asset classes amid ongoing uncertainty. Near-zero short term interest rates continued to keep yields on money market securities near their all-time lows.

Although the financial world remains highly uncertain, we believe there are new avenues of opportunity—new ways to invest and new markets to consider. We believe it's our responsibility to help investors adapt to today's new world of investing and build the portfolios these times require. We encourage you to visit [www.blackrock.com/newworld](http://www.blackrock.com/newworld) for more information.

Sincerely,

Rob Kapito

**Fund Summary** as of October 31, 2012

**BlackRock Credit Allocation Income Trust I, Inc.**

**Fund Overview**

BlackRock Credit Allocation Income Trust I, Inc.'s (PSW) (the Fund) primary investment objective is to provide holders of common shares (Common Shareholders) with high current income. The secondary investment objective of the Fund is to provide Common Shareholders with capital appreciation. The Fund seeks to achieve its investment objectives by investing, under normal market conditions, at least 80% of its assets in credit-related securities, including, but not limited to, investment grade corporate bonds, high yield bonds (commonly referred to as junk bonds), bank loans, preferred securities or convertible bonds or derivatives with economic characteristics similar to these credit-related securities. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

**Portfolio Management Commentary**

On July 27, 2012, the Board of Directors of PSW approved a plan of reorganization whereby BlackRock Credit Allocation Income Trust IV (BTZ) would acquire all of the assets and assume all of the liabilities of PSW in exchange for newly issued shares of BTZ in a merger transaction. At a shareholder meeting on November 2, 2012, PSW shareholders approved the plan of reorganization and BTZ shareholders approved the issuance of BTZ shares in connection with the reorganization. The reorganization took place on December 10, 2012.

**How did the Fund perform?**

For the 12-month period ended October 31, 2012, the Fund returned 24.59% based on market price and 17.95% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 21.64% based on market price and 15.80% based on NAV. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

**What factors influenced performance?**

The largest contributor to performance for the period was the Fund's allocation to the financials sector, which has seen very strong performance in 2012, especially in the first quarter. The rally in financials was driven mainly by the completion of the widely anticipated Greek sovereign debt restructuring and the launch of a second allotment of long-term refinancing operations (LTROs) from the European Central Bank (ECB). Risk assets broadly moved higher through the first quarter due to the reduction of systemic risk stemming from the eurozone's sovereign debt crisis coupled with improving economic data in the United States. The Fund has held a long position in financials since the latter half of 2011 when valuations became attractive and credit fundamentals began to improve due to heightened industry regulation following the 2008 financial crisis. Another source of positive performance was the Fund's allocation to capital trust securities, which have experienced significant price appreciation due to banking and financial industry regulatory reform under Basel III and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act). Positioning within industrials aided performance as the Fund was selectively overweight in higher-beta names (i.e., those with greater sensitivity to market movements) early in 2012, particularly in the technology, media and telecommunications space. The Fund's exposure to high yield corporate bonds drove strong returns and supported the Fund's overall yield.

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

Detracting modestly from the Fund's performance was an allocation to the metals and mining space. As China has shown signs of slowing economic growth and a move away from its investment-based economy, the metals and mining sector has struggled given its close ties to the Chinese growth story.

### **Describe recent portfolio activity.**

Early in the 12-month period, the Fund reduced its overall risk profile by favoring high quality companies with strong balance sheets and by decreasing leverage and portfolio duration (sensitivity to interest rate movements). However, following an important step by the ECB to alleviate liquidity strains in the financial markets through its LTROs, the Fund increased risk significantly in early 2012 as the market appeared to be poised for a strong rally. Improving credit fundamentals coupled with the reduction of major liquidity risks proved the right formula for a rally in the credit space. The Fund expressed this view largely by increasing exposure to the financials sector, where valuations were attractive. The Fund reduced risk again at the end of the first quarter as the positive effect of the ECB's LTROs began to fade and the market was growing impatient with the stalling global economic growth. Accordingly, the Fund positioned itself away from sectors directly tied to growth, and instead focused on companies that derive cash flows from the United States and are less sensitive to slowing global growth. In particular, the Fund increased exposure to US pipelines and electric companies as they tend to generate stable cash flows despite the slowing growth dynamic.

### **Describe portfolio positioning at period end.**

As of period end, the Fund maintained diversified exposure across investment grade and high yield corporate credits. While investment grade credit has experienced dramatic spread tightening in the past year, Fund management continued to find value in this space. The Fund continued to generate additional yield from its sizeable allocation to high yield debt. Within the credit space, the Fund retained a strong allocation to financials, although to a lesser extent than earlier in 2012. The Fund's holdings at period end reflected a slightly more defensive bias, with a focus on the US growth story, which remained relatively benign as compared to the rest of the world. To this end, the Fund favored companies with cash flows derived from the United States and a lower sensitivity to recession in Europe.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

**Table of Contents****Fund Summary** as of October 31, 2012**BlackRock Credit Allocation Income Trust IV****Fund Overview**

BlackRock Credit Allocation Income Trust IV's (BTZ) (the Fund) investment objective is to provide current income, current gains and capital appreciation. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in credit-related securities, including, but not limited to, investment grade corporate bonds, high yield bonds (commonly referred to as junk bonds), bank loans, preferred securities or convertible bonds or derivatives with economic characteristics similar to these credit-related securities. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objective will be achieved.

**Portfolio Management Commentary**

On July 27, 2012, the Board of Directors of BTZ approved separate plans of reorganization whereby BTZ would acquire all of the assets and assume all of the liabilities of PSW, PSY and BPP (PSW, PSY and BPP, each a Target Fund) in exchange for newly issued shares of BTZ in a merger transaction. At a shareholder meeting on November 2, 2012, each Target Fund's shareholders approved their respective plan of reorganization and BTZ shareholders approved the issuance of BTZ shares in connection with the reorganization. The reorganization took place on December 10, 2012.

**How did the Fund perform?**

For the 12-month period ended October 31, 2012, the Fund returned 26.44% based on market price and 18.35% based on NAV. For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 21.64% based on market price and 15.80% based on NAV. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

**What factors influenced performance?**

The largest contributor to performance for the period was the Fund's allocation to the financials sector, which has seen very strong performance in 2012, especially in the first quarter. The rally in financials was driven mainly by the completion of the widely anticipated Greek sovereign debt restructuring and the launch of a second allotment of LTROs from the ECB. Risk assets broadly moved higher through the first quarter due to the reduction of systemic risk stemming from the eurozone's sovereign debt crisis coupled with improving economic data in the United States. The Fund has held a long position in financials since the latter half of 2011 when valuations became attractive and credit fundamentals began to improve due to heightened industry regulation following the 2008 financial crisis. Another source of positive performance was the Fund's allocation to capital trust securities, which have experienced significant price appreciation due to banking and financial industry regulatory reform under Basel III and the Dodd-Frank Act. Positioning within industrials aided performance as the Fund was selectively overweight in higher-beta names (i.e., those with greater sensitivity to market movements) early in 2012, particularly in the technology, media and telecommunications space. The Fund's exposure to high yield corporate bonds drove strong returns and supported the Fund's overall yield.

Detracting modestly from the Fund's performance was an allocation to the metals and mining space. As China has shown signs of slowing economic growth and a move away from its investment-based economy, the metals and mining sector has struggled given its close ties to the Chinese growth story.

**Describe recent portfolio activity.**

Early in the 12-month period, the Fund reduced its overall risk profile by favoring high quality companies with strong balance sheets and by decreasing leverage and portfolio duration (sensitivity to interest rate movements). However, following an important step by the ECB to

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

alleviate liquidity strains in the financial markets through its LTROs, the Fund increased risk significantly in early 2012 as the market appeared to be poised for a strong rally. Improving credit fundamentals coupled with the reduction of major liquidity risks proved the right formula for a rally in the credit space. The Fund expressed this view largely by increasing exposure to the financials sector, where valuations were attractive. The Fund reduced risk again at the end of the first quarter as the positive effect of the ECB's LTROs began to fade and the market was growing impatient with the stalling global economic growth. Accordingly, the Fund positioned itself away from sectors directly tied to growth, and instead focused on companies that derive cash flows from the United States and are less sensitive to slowing global growth. In particular, the Fund increased exposure to US pipelines and electric companies as they tend to generate stable cash flows despite the slowing growth dynamic.

### **Describe portfolio positioning at period end.**

As of period end, the Fund maintained diversified exposure across investment grade and high yield corporate credits. While investment grade credit has experienced dramatic spread tightening in the past year, Fund management continued to find value in this space. The Fund continued to generate additional yield from its sizeable allocation to high yield debt. Within the credit space, the Fund retained a strong allocation to financials, although to a lesser extent than earlier in 2012. The Fund's holdings at period end reflected a slightly more defensive bias, with a focus on the US growth story, which remained relatively benign as compared to the rest of the world. To this end, the Fund favored companies with cash flows derived from the United States and a lower sensitivity to recession in Europe.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

OCTOBER 31, 2012

11

---

## **Table of Contents**

### **Fund Summary** as of October 31, 2012

**BlackRock Floating Rate Income Trust**

#### **Fund Overview**

BlackRock Floating Rate Income Trust's (BGT) (the Fund) primary investment objective is to provide a high level of current income. The Fund's secondary investment objective is to seek the preservation of capital. The Fund seeks to achieve its investment objectives by investing primarily, under normal conditions, at least 80% of its assets in floating and variable rate instruments of US and non-US issuers, including a substantial portion of its assets in global floating and variable rate securities including senior secured floating rate loans made to corporate and other business entities. Under normal market conditions, the Fund expects that the average effective duration of its portfolio will be no more than 1.5 years. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund's investment objectives will be achieved.

#### **Portfolio Management Commentary**

##### **How did the Fund perform?**

For the 12-month period ended October 31, 2012, the Fund returned 25.33% based on market price and 12.37% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 21.76% based on market price and 12.63% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

##### **What factors influenced performance?**

Security selection in the gaming, diversified manufacturing, electric and consumer services industries contributed positively to results, as did the Fund's tactical allocation to fixed-rate high yield corporate bonds, which outperformed floating rate loan interests (bank loans) over the period.

Conversely, security selection in the media non-cable industry detracted from performance, along with exposure to the media cable and independent energy industries. The Fund's limited exposure to emerging market securities hindered returns as this segment of the fixed income universe outperformed both high yield and bank loans.

##### **Describe recent portfolio activity.**

During the 12-month period, the Fund maintained its focus on the higher quality portions of the loan market in terms of loan structure, liquidity and overall credit quality. The Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. Given mixed economic data along with global policy uncertainty and an overall weak outlook for global growth, the Fund remained cautious of lower-rated, less-liquid loans.

Financial markets improved during the period due to the long-term refinancing operations introduced by the European Central Bank (ECB) in December 2011 and additional monetary stimulus from both the ECB and the US Federal Reserve in September 2012. These global central bank actions were supportive of risk markets, but did not have a significant influence on the Fund's view on risk within the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macro risks.

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

### **Describe portfolio positioning at period end.**

At period end, the Fund held 80% of its total portfolio in floating rate loan interests and 16% in corporate bonds, with the remainder invested in a mix of asset-backed securities, foreign agency obligations and common stocks. The Fund's largest sector exposures included health care, media cable and chemicals. The Fund ended the period with leverage at 30% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

## Table of Contents

### The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage by borrowing through a credit facility and/or entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund's shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund's capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund's long-term investments, and therefore the Fund's shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds' portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the

redemption value of the Funds' borrowings does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds' NAV positively or negatively in addition to the impact on Fund performance from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds' NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds' net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund's ability to invest in certain types of securities or use certain types of hedging strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), the Funds are permitted to issue senior securities representing indebtedness up to 33 1/3% of their total managed assets (each Fund's net assets plus the proceeds of any outstanding borrowings). If the Funds segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Fund voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of October 31, 2012, the Funds had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

	<b>Percent of Economic Leverage</b>
PSW	33%
PSY	32%
BPP	32%
BTZ	32%
BGT	30%

**Table of Contents**

## Derivative Financial Instruments

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds' ability to use a

derivative financial instrument successfully depends on the investment advisor's ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements.

**Schedule of Investments (continued)**

**BlackRock Credit Allocation Income Trust I, Inc. (PSW)**

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (d) Convertible security.
- (e) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (f) Security is perpetual in nature and has no stated maturity date.
- (g) Non-income producing security.
- (h) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (i) Investments in issuers considered to be an affiliate of the Fund during the year ended October 31, 2012, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

<b>Affiliate</b>	<b>Shares Held at October 31, 2011</b>	<b>Net Activity</b>	<b>Shares Held at October 31, 2012</b>	<b>Income</b>
BlackRock Liquidity Funds, TempFund, Institutional Class	1,362,932	(479,754)	883,178	\$ 1,279

- (j) Represents the current yield as of report date.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Reverse repurchase agreements outstanding as of October 31, 2012 were as follows:

<sup>3</sup> Fund pays the fixed rate and receives the floating rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

**Table of Contents**

Schedule of Investments (continued)

**BlackRock Credit Allocation Income Trust I, Inc. (PSW)**

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of October 31, 2012:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 665,738	\$ 588,250	\$ 1,253,988
Corporate Bonds		137,830,721	1,354,375	139,185,096
Floating Rate Loan Interests		41,192		41,192
Preferred Securities	\$ 653,421	27,610,528		28,263,949
Taxable Municipal Bonds		1,007,312		1,007,312
US Govern- ment Sponsored Agency Securities		341,349		341,349
US Treasury Obligations		3,415,278		3,415,278
Short-Term Securities	883,178			883,178
<b>Total</b>	\$ 1,536,599	\$ 170,912,118	\$ 1,942,625	\$ 174,391,342
<b>Derivative Financial Instruments<sup>1</sup></b>				
<b>Assets:</b>				
Credit contracts		\$ 73,988		\$ 73,988
Foreign currency exchange contracts		2,443		2,443
Interest rate contracts	\$ 132,884	117,558		250,442
<b>Liabilities:</b>				
Credit contracts		(39,930)		(39,930)
Interest rate contracts	(47,046)	(118,048)		(165,094)
<b>Total</b>	\$ 85,838	\$ 36,011		\$ 121,849

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

Certain of the Fund's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of October 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Foreign currency at value	\$ 8,814			\$ 8,814
Cash pledged as collateral for financial futures contracts	207,000			207,000
Cash pledged as collateral for swaps	120,000			120,000
<b>Liabilities:</b>				
Reverse repurchase agreements		\$ (57,959,120)		(57,959,120)
<b>Total</b>	<b>\$ 335,814</b>	<b>\$ (57,959,120)</b>		<b>\$ (57,623,306)</b>

There were no transfers between Level 1 and Level 2 during the year ended October 31, 2012.

Certain of the Fund's investments and derivative financial instruments are categorized as Level 3 and were valued utilizing transaction prices or third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments and derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Corporate Bonds	Total
<b>Assets:</b>			
Opening balance, as of October 31, 2011	\$ 503,750	\$ 858,000	\$ 1,361,750
Transfers into Level 3 <sup>2</sup>			
Transfers out of Level 3 <sup>2</sup>			
Accrued discounts/premiums	15,649		15,649
Net realized gain (loss)			
Net change in unrealized appreciation/depreciation <sup>3</sup>	68,851	(3,625)	65,226
Purchases		500,000	500,000
Sales			
<b>Closing Balance, as of October 31, 2012</b>	<b>\$ 588,250</b>	<b>\$ 1,354,375</b>	<b>\$ 1,942,625</b>

<sup>2</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

<sup>3</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of October 31, 2012 was \$65,226.

See Notes to Financial Statements.

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

**Fair Value Measurements** Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

**Level 1** unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

**Level 2** other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

**Level 3** unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of October 31, 2012:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:

ANNUAL REPORT

OCTOBER 31, 2012

35

**Table of Contents**

Schedule of Investments (concluded)

**BlackRock Credit Allocation Income Trust II, Inc. (PSY)**

	Level 1	Level 2	Level 3	Total
<b>Derivative Financial Instruments<sup>1</sup></b>				
<b>Assets:</b>				
Credit contracts		\$ 200,205		\$ 200,205
Foreign currency exchange contracts		7,118		7,118
Interest rate contracts	\$ 553,055	484,885		1,037,940
<b>Liabilities:</b>				
Credit contracts		(170,089)		(170,089)
Interest rate contracts	(219,658)	(505,803)		(725,461)
<b>Total</b>	\$ 333,397	\$ 16,316		\$ 349,713

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

Certain of the Fund's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of October 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Foreign currency at value	\$ 3,738			\$ 3,738
Cash pledged as collateral for financial futures contracts	868,000			868,000
Cash pledged as collateral for swaps	160,000			160,000
<b>Liabilities:</b>				
Reverse repurchase agreements		\$ (235,518,351)		(235,518,351)
Cash received as collateral for reverse repurchase agreements		(3,336,000)		(3,336,000)
Cash received as collateral for swaps		(600,000)		(600,000)
<b>Total</b>	\$ 1,031,738	\$ (239,454,351)		\$ (238,422,613)

There were no transfers between Level 1 and Level 2 during the year ended October 31, 2012.

Certain of the Fund's investments and derivative financial instruments are categorized as Level 3 and were valued utilizing transaction prices or third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments and derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	<b>Asset-Backed Securities</b>	<b>Corporate Bonds</b>	<b>Total</b>
<b>Assets:</b>			
Opening balance, as of October 31, 2011	\$ 2,053,750	\$ 3,536,000	\$ 5,589,750
Transfers into Level 3 <sup>2</sup>			
Transfers out of Level 3 <sup>2</sup>			
Accrued discounts/premiums	37,775		37,775
Net realized gain (loss)			
Net change in unrealized appreciation/depreciation <sup>3</sup>	306,725	(25,625)	281,100
Purchases		1,450,000	1,450,000
Sales			
<b>Closing Balance, as of October 31, 2012</b>	<b>\$ 2,398,250</b>	<b>\$ 4,960,375</b>	<b>\$ 7,358,625</b>

<sup>2</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

<sup>3</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of October 31, 2012 was \$281,100. The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	<b>Credit Contracts</b>
<b>Assets:</b>	
Opening balance, as of October 31, 2011	\$ 5,018
Transfers into Level 3 <sup>2</sup>	
Transfers out of Level 3 <sup>2</sup>	
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation <sup>4</sup>	(5,018)
Purchases	

Issues<sup>5</sup>

Sales

Settlements<sup>6</sup>

**Closing Balance, as of October 31, 2012**

<sup>4</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held as of October 31, 2012 was \$0.

<sup>5</sup> Issues represent upfront cash received on certain derivative financial instruments.

<sup>6</sup> Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

See Notes to Financial Statements.

<b>Total</b>					\$ 302,670

<sup>3</sup> Fund pays the fixed rate and receives the floating rate.

<sup>4</sup> Fund pays the floating rate and receives the fixed rate.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of

three broad levels for financial statement purposes as follows:

**Level 1** unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

**Level 2** other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

**Level 3** unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of October 31, 2012:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:				
Asset-Backed Securities			\$ 1,176,500	\$ 1,176,500

Floating Rate Loan Interests		85,435		85,435
Preferred Securities	\$ 1,178,055	48,483,313		49,661,368
Taxable Municipal Bonds		2,109,059		2,109,059
US Govern- ment Sponsored Agency Securities		704,579		704,579
US Treasury Obligations		16,354,555		16,354,555
Short-Term Securities	4,101,982			4,101,982
<b>Total</b>	\$ 5,280,037	\$ 350,591,275	\$ 3,544,200	\$ 359,415,512

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments <sup>1</sup>				
<b>Assets:</b>				
Credit contracts		\$ 78,252		\$ 78,252
Foreign currency exchange contracts		423		423
Interest rate contracts	\$ 228,820	425,943		654,763
<b>Liabilities:</b>				
Credit contracts		(65,504)		(65,504)
Foreign currency exchange contracts		(12,860)		(12,860)
Interest rate contracts	(113,509)	(1,428,429)		(1,541,938)
<b>Total</b>	\$ 115,311	\$ (1,002,175)		\$ (886,864)

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

See Notes to Financial Statements.

ANNUAL REPORT

OCTOBER 31, 2012

45

**Table of Contents**

Schedule of Investments (concluded)

**BlackRock Credit Allocation Income Trust III (BPP)**

Certain of the Fund's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of October 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
<b>Assets:</b>				
Foreign currency at value	\$ 10,231			\$ 10,231
Cash pledged as collateral for financial futures contracts	266,000			266,000
Cash pledged as collateral for swaps	571,000			571,000
<b>Liabilities:</b>				
Reverse repurchase agreements		\$ (117,132,156)		(117,132,156)
Cash received as collateral for reverse repurchase agreements		(1,297,000)		(1,297,000)
<b>Total</b>	\$ 847,231	\$ (118,429,156)		\$ (117,581,925)

There were no transfers between Level 1 and Level 2 during the year ended October 31, 2012.

Certain of the Fund's investments and derivative financial instruments are categorized as Level 3 and were valued utilizing transaction prices, third party pricing information or net asset value without adjustment. Such valuations are based on unobservable inputs. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments and derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	<b>Asset-Backed Securities</b>	<b>Corporate Bonds</b>	<b>Total</b>
<b>Assets:</b>			
Opening balance, as of October 31, 2011	\$ 1,007,500	\$ 1,690,000	\$ 2,697,500
Transfers into Level 3 <sup>1</sup>			
Transfers out of Level 3 <sup>1</sup>			
Accrued discounts/premiums	18,531		18,531

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

Net realized gain (loss)			
Net change in unrealized appreciation/depreciation <sup>2</sup>	150,469	(12,300)	138,169
Purchases		690,000	690,000
Sales			
<b>Closing Balance, as of October 31, 2012</b>	<b>\$ 1,176,500</b>	<b>\$ 2,367,700</b>	<b>\$ 3,544,200</b>

<sup>1</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

<sup>2</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of October 31, 2012 was \$138,169. The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	<b>Credit Contracts</b>
<b>Assets:</b>	
Opening balance, as of October 31, 2011	\$ 2,351
Transfers into Level 3 <sup>1</sup>	
Transfers out of Level 3 <sup>1</sup>	
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation <sup>3</sup>	(2,351)
Purchases	
Issues <sup>4</sup>	
Sales	
Settlements <sup>5</sup>	
<b>Closing Balance, as of October 31, 2012</b>	

<sup>3</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/ depreciation on derivative financial instruments still held as of October 31, 2012 was \$0.

<sup>4</sup> Issues represent upfront cash received on certain derivative financial instruments.

<sup>5</sup> Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

See Notes to Financial Statements.

(a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(b) Variable rate security. Rate shown is as of report date.

(c) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.

(d) Convertible security.

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

(e) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.

(f) Security is perpetual in nature and has no stated maturity date.

(g) Non-income producing security.

(h) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(i) Investments in issuers considered to be an affiliate of the Fund during the year ended October 31, 2012, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at October 31, 2011	Net Activity	Shares Held at October 31, 2012	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	3,823,108	(2,170,452)	1,652,656	\$ 6,626

(j) Represents the current yield as of report date.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Reverse repurchase agreements outstanding as of October 31, 2012 were as follows:

<sup>4</sup> Fund pays the floating rate and receives the fixed rate.

**Fair Value Measurements** Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

**Level 1** unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

**Level 2** other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

**Level 3** unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

**Table of Contents**

Schedule of Investments (concluded)

**BlackRock Credit Allocation Income Trust IV (BTZ)**

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of October 31, 2012:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 4,929,658	\$ 3,982,000	\$ 8,911,658
Corporate Bonds		917,652,041	8,192,550	925,844,591
Floating Rate Loan Interests		291,395		291,395
Preferred Securities	\$ 4,229,295	184,817,988		189,047,283
Taxable Municipal Bonds		10,941,745		10,941,745
US Govern- ment Spon- sored Agency Securities		2,420,075		2,420,075
US Treasury Obligations		27,384,482		27,384,482
Short-Term Securities	1,652,656			1,652,656
<b>Total</b>	\$ 5,881,951	\$ 1,148,437,384	\$ 12,174,550	\$ 1,166,493,885

	Level 1	Level 2	Level 3	Total
<b>Derivative Financial Instruments<sup>1</sup></b>				
<b>Assets:</b>				
Credit contracts		\$ 360,454		\$ 360,454
Interest rate contracts	\$ 747,505	1,391,182		2,138,687
<b>Liabilities:</b>				
Credit contracts		(293,124)		(293,124)
Interest rate contracts	(461,722)	(4,868,986)		(5,330,708)
<b>Total</b>	\$ 285,783	\$ (3,410,474)		\$ (3,124,691)

<sup>1</sup> Derivative financial instruments are swaps, financial futures contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

Certain of the Fund's assets and liabilities are held at carrying amount or face value, which approximates fair value for financial statement purposes. As of October 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Cash	\$ 57,836		\$	57,836
Foreign currency at value	44			44
Cash pledged as collateral for financial futures contracts	766,940			766,940
Cash pledged as collateral for swaps	3,640,000			3,640,000
<b>Liabilities:</b>				
Reverse repurchase agreements		\$ (373,715,690)		(373,715,690)
Cash received as collateral for reverse repurchase agreements		(11,059,900)		(11,059,900)
Cash received as collateral for swaps		(500,000)		(500,000)
<b>Total</b>	<b>\$ 4,464,820</b>	<b>\$ (385,275,590)</b>	<b>\$</b>	<b>(380,810,770)</b>

There were no transfers between Level 1 and Level 2 during the year ended October 31, 2012.

Certain of the Fund's investments and derivative financial instruments are categorized as Level 3 and were valued utilizing transaction prices or third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in the unobservable inputs could result in a significantly lower or higher value in such Level 3 investments and derivative financial instruments.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Fund had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed Securities	Corporate Bonds	Total
<b>Assets:</b>			
Opening balance, as of October 31, 2011	\$ 3,410,000	\$ 5,876,000	\$ 9,286,000
Transfers into Level 3 <sup>2</sup>			
Transfers out of Level 3 <sup>2</sup>			
Accrued discounts/premiums	62,713		62,713
Net realized gain (loss)			
Net change in unrealized appreciation/depreciation <sup>3</sup>	509,287	(43,450)	465,837
Purchases		2,360,000	2,360,000
Sales			
<b>Closing Balance, as of October 31, 2012</b>	<b>\$ 3,982,000</b>	<b>\$ 8,192,550</b>	<b>\$ 12,174,550</b>

<sup>2</sup> Transfers into and transfers out of Level 3 represent the values as of the beginning of the reporting period.

<sup>3</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of October 31, 2012 was \$465,837. The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used in determining fair value:

	<b>Credit Contracts</b>
<b>Assets:</b>	
Opening balance, as of October 31, 2011	\$ 8,182
Transfers into Level 3 <sup>2</sup>	
Transfers out of Level 3 <sup>2</sup>	
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation <sup>4</sup>	(8,182)
Purchases	
Issues <sup>5</sup>	
Sales	
Settlements <sup>6</sup>	

**Closing Balance, as of October 31, 2012**

<sup>4</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held as of October 31, 2012 was \$0.

<sup>5</sup> Issues represent upfront cash received on certain derivative financial instruments.

<sup>6</sup> Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.

See Notes to Financial Statements.

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (e) Convertible security.
- (f) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- (g) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (h) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- (i) Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- (j) Investments in issuers considered to be an affiliate of the Fund during the year ended October 31, 2012, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at October 31, 2011	Net Activity	Shares Held at October 31, 2012	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	1,071,567	1,669,127	2,740,694	\$ 1,817

- (k) Represents the current yield as of report date.

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Foreign currency exchange contracts as of October 31, 2012 were as follows:

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities that the Fund has the ability to access

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield

See Notes to Financial Statements.

**Table of Contents**

## Consolidated Schedule of Investments (continued)

**BlackRock Floating Rate Income Trust (BGT)**

curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund's own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement falls in its entirety is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund's policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund's investments and derivative financial instruments categorized in the disclosure hierarchy as of October 31, 2012:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investments:				
Long-Term Investments:				
Asset-Backed Securities		\$ 817,377	\$ 8,621,975	\$ 9,439,352

<b>Total</b>	<b>\$ 2,890,069</b>	<b>\$ 467,309,831</b>	<b>\$ 37,295,021</b>	<b>\$ 507,494,921</b>

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments <sup>1</sup>				

**Assets:**

Foreign currency exchange contracts	\$ 774,487	\$ 774,487
-------------------------------------	------------	------------

**Liabilities:**

Foreign currency exchange contracts	(119,911)	(119,911)
-------------------------------------	-----------	-----------

<b>Total</b>	\$ 654,576	\$ 654,576
--------------	------------	------------

<sup>1</sup> Derivative financial instruments are foreign currency exchange contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Fund's assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of October 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Cash	\$ 168,646			\$ 168,646
<b>Liabilities:</b>				
Bank overdraft on foreign currency at value		\$ (915,491)		(915,491)
Loan payable		(145,000,000)		(145,000,000)
<b>Total</b>	\$ 168,646	\$ (145,915,491)		\$ (145,746,845)

There were no transfers between Level 1 and Level 2 during the year ended October 31, 2012.

See Notes to Financial Statements.

**Table of Contents**

**Consolidated Schedule of Investments (concluded)**

**BlackRock Floating Rate Income Trust (BGT)**

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee ( Global Valuation Committee ) to determine the value of certain of the Fund's Level 3 investments as of October 31, 2012:

	Value	Valuation Techniques	Unobservable Inputs <sup>1</sup>	Range of Unobservable Inputs Utilized	Weighted Average of Unobservable Inputs <sup>2</sup>
<b>Assets:</b>					
Floating Rate Loan Interests	\$ 4,153,635	Market Comparable Companies	Illiquidity Discount	50%	50%
		Cost	Yield	9.64%	9.64%
			N/A <sup>3</sup>		
<b>Total<sup>4</sup></b>	<b>\$ 4,153,635</b>				

<sup>1</sup> A change to the unobservable input may result in a significant change to the value of the investment as follows:

Unobservable Input	Impact to	Impact to
	Value if Input Increases	Value if Input Decreases
Illiquidity Discount	Decrease	Increase
Yield	Decrease	Increase

<sup>2</sup> Unobservable inputs are weighted based on the value of the investments included in the range.

<sup>3</sup> The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund.

<sup>4</sup> Does not include Level 3 investments with values derived utilizing transaction prices from recent prior transactions or third party pricing information without adjustment for which such inputs are unobservable. The value of Level 3 investments derived using prices from prior transactions and/or third party pricing information is \$33,141,386. A significant change in third party pricing information could result in a significantly lower or higher value in such Level 3 investments.

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

Asset-Backed Securities	Common Stocks	Floating Rate Loan Interests	Foreign Agency	Other	Warrants	Total
-------------------------	---------------	------------------------------	----------------	-------	----------	-------

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

<b>Closing Balance, as of October 31, 2012</b>	<b>\$ 8,621,975</b>	<b>\$ 8,096</b>	<b>\$ 27,270,564</b>		<b>\$ 1,394,386</b>		<b>\$ 37,295,021</b>

<sup>5</sup> Transfers into Level 3 represent values as of the beginning of the reporting period.

<sup>6</sup> As of October 31, 2011, the Fund used significant unobservable inputs in determining the value of certain investments. As of October 31, 2012, the Fund used observable inputs in determining the value on the same investments. As a result, investments with a beginning of year value of \$11,031,896 transferred from Level 3 to Level 2 in the disclosure hierarchy.

<sup>7</sup> Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of October 31, 2012 was \$761,055.

See Notes to Financial Statements.

Net investment income <sup>4</sup>	6.40%	6.56%	6.28%	12.45%	10.79%
Dividends to Preferred Shareholders		0.06%	0.59%	1.09%	3.03%
Net investment income to Common Shareholders	6.40%	6.50%	5.69%	11.36%	7.76%
<b>Supplemental Data</b>					
Net assets applicable to Common Shareholders, end of year (000)	\$ 118,837	\$ 108,529	\$ 110,808	\$ 96,048	\$ 76,430
Preferred Shares outstanding at \$25,000 liquidation preference, end of year (000)			\$ 40,250	\$ 40,250	\$ 68,250
Borrowings outstanding, end of year (000)	\$ 57,959	\$ 53,268	\$ 6,083	\$ 4,972	\$ 4,024
Average borrowings outstanding during the year (000)	48,108	\$ 34,952	\$ 5,269	\$ 5,321	\$ 25,692

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

Portfolio turnover	37%	53%	66%	36%	119%
Asset coverage per Preferred Share at \$25,000 liquidation preference, end of year			\$ 93,831	\$ 84,663	\$ 53,009
Asset coverage, end of year per \$1,000	\$ 3,050	\$ 3,037			

<sup>1</sup> Based on average shares outstanding.

<sup>2</sup> Total investment returns based on market value, which can be significantly greater or lesser than the net asset value, may result in substantially different returns. Where applicable, total investment returns exclude the effects of any sales charges and include the reinvestment of dividends and distributions.

<sup>3</sup> Includes the proceeds from a settlement of litigation which impacted the Fund. Not including these proceeds the Fund's total return would have been 24.54%.

<sup>4</sup> Do not reflect the effect of dividends to Preferred Shareholders.

<sup>5</sup> Includes reorganization costs associated with the Fund's merger. Without these costs, total expenses, total expenses after fees waived and paid indirectly, and total expenses after fees waived and paid indirectly and excluding interest expense would have been 1.25%, 1.25% and 1.10%, respectively.

<sup>6</sup> Dividends and distributions are determined in accordance with federal income tax regulations.

See Notes to Financial Statements.

**Table of Contents****Notes to Financial Statements****1. Organization and Significant Accounting Policies:**

BlackRock Credit Allocation Income Trust I, Inc. ( PSW ) and BlackRock Credit Allocation Income Trust II, Inc. ( PSY ) are registered under the 1940 Act, as diversified, closed-end management investment companies. BlackRock Credit Allocation Income Trust III ( BPP ), BlackRock Credit Allocation Income Trust IV ( BTZ ) and BlackRock Floating Rate Income Trust ( BGT ) are registered under the 1940 Act as non-diversified, closed-end management investment companies. PSW and PSY are organized as Maryland corporations. BPP, BTZ and BGT are organized as Delaware statutory trusts. PSW, PSY, BPP, BTZ and BGT are collectively referred to as the Funds or individually as the Fund . The Funds financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ( US GAAP ), which may require management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates. The Boards of Directors and Boards of Trustees of the Funds are collectively referred to throughout this report as the Board of Directors or the Board , and the directors/trustees thereof are collectively referred to throughout this report as Directors . The Funds determine and make available for publication the NAVs of their Common Shares on a daily basis.

Reorganizations: On July 27, 2012, the Board approved separate plans of reorganization whereby BTZ would acquire all of the assets and assume all of the liabilities of PSW, PSY and BPP (each a Target Fund ) in exchange for newly issued shares of BTZ in a merger transaction. BlackRock Advisors, LLC (the Manager ) reimbursed PSY \$88,283, which is shown as reorganization costs reimbursed in the Statements of Operations.

The following is a summary of significant accounting policies followed by the Funds:

Basis of Consolidation: BGT s accompanying consolidated financial statements include the account of BGT JGW SPV, LLC (the Taxable Subsidiary ), a wholly owned taxable subsidiary of BGT. The Taxable Subsidiary enables BGT to hold its investment in J.G. Wentworth LLC Preferred Equity Interests that is organized as an operating partnership and still satisfy Regulated Investment Company ( RIC ) tax requirements. Income earned and gains realized on the investment held by the Taxable Subsidiary are taxable to such subsidiary. An income tax provision for all income, including realized and unrealized gains, if any, is reflected as a component of realized and unrealized gain (loss) on the Consolidated Statement of Operations. BGT may invest up to 25% of its total assets in the Taxable Subsidiary. Intercompany accounts and transactions have been eliminated. The Taxable Subsidiary is subject to the same investment policies and restrictions that apply to BGT.

Valuation: US GAAP defines fair value as the price the Funds would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The Funds fair value their financial instruments at market value using independent dealers or pricing services under policies approved by the Board. The Global Valuation Committee is the committee formed by management to

develop global pricing policies and procedures and to provide oversight of the pricing function for the Funds for all financial instruments.

The Funds value their bond investments on the basis of last available bid prices or current market quotations provided by dealers or pricing services. Floating rate loan interests are valued at the mean of the bid prices from one or more brokers or dealers as obtained from a pricing service. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures. Asset-backed and mortgage-backed securities are valued by independent pricing services using models that consider estimated cash flows of each tranche of the security, establish a benchmark yield and develop an estimated tranche specific spread to the benchmark yield based on the unique attributes of the tranche. Financial futures contracts traded on exchanges are valued at their last sale price. Swap agreements are valued utilizing quotes received daily by the Funds pricing service or through brokers, which are derived using daily swap curves and models that incorporate a number of market data factors, such as discounted cash flows, trades and values of the underlying reference instruments. Investments in open-end registered investment companies are valued at NAV each business day. Short-term securities with remaining maturities of 60 days or less may be valued at amortized cost, which approximates fair value.

Municipal investments (including commitments to purchase such investments on a when-issued basis) are valued on the basis of prices provided by dealers or pricing services. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market transactions in comparable investments and information with respect to various relationships between investments.

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

Equity investments traded on a recognized securities exchange or the NASDAQ Global Market System ( NASDAQ ) are valued at the last reported sale price that day or the NASDAQ official closing price, if applicable. For equity investments traded on more than one exchange, the last reported sale price on the exchange where the stock is primarily traded is used. Equity investments traded on a recognized exchange for which there were no sales on that day are valued at the last available bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day's price will be used, unless it is determined that such prior day's price no longer reflects the fair value of the security.

Securities and other assets and liabilities denominated in foreign currencies are translated into US dollars using exchange rates determined as of the close of business on the New York Stock Exchange ( NYSE ). Foreign currency exchange contracts are valued at the mean between the bid and ask prices and are determined as of the close of business on the NYSE. Interpolated values are derived when the settlement date of the contract is an interim date for which quotations are not available.

Exchange-traded options are valued at the mean between the last bid and ask prices at the close of the options market in which the options trade. An exchange-traded option for which there is no mean price is

**Table of Contents****Notes to Financial Statements (continued)**

valued at the last bid (long positions) or ask (short positions) price. If no bid or ask price is available, the prior day's price will be used, unless it is determined that the prior day's price no longer reflects the fair value of the option. Over-the-counter (OTC) options and swaptions are valued by an independent pricing service using a mathematical model, which incorporates a number of market data factors, such as the trades and prices of the underlying instruments.

In the event that application of these methods of valuation results in a price for an investment that is deemed not to be representative of the market value of such investment, or if a price is not available, the investment will be valued by the Global Valuation Committee, or its delegate, in accordance with a policy approved by the Board as reflecting fair value (Fair Value Assets). When determining the price for Fair Value Assets, the Global Valuation Committee, or its delegate, seeks to determine the price that each Fund might reasonably expect to receive from the current sale of that asset in an arm's-length transaction. Fair value determinations shall be based upon all available factors that the investment advisor and/or sub-advisor deems relevant consistent with the principles of fair value measurement which include the market approach, income approach and/or cost approach, as appropriate. A market approach generally consists of using comparable market transactions. The income approach generally is used to discount future cash flows to present value and adjusted for liquidity as appropriate. These factors include but are not limited to (i) attributes specific to the investment or asset; (ii) the principal market for the investment or asset; (iii) the customary participants in the principal market for the investment or asset; (iv) data assumptions by market participants for the investment or asset, if reasonably available; (v) quoted prices for similar investments or assets in active markets; and (vi) other factors, such as future cash flows, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, recovery rates, liquidation amounts and/or default rates. Due to the inherent uncertainty of valuations of such investments, the fair values may differ from the values that would have been used had an active market existed. The Global Valuation Committee, or its delegate, employs various methods for calibrating valuation approaches for investments where an active market does not exist, including regular due diligence of the Funds' pricing vendors, a regular review of key inputs and assumptions, transactional back-testing or disposition analysis to compare unrealized gains and losses to realized gains and losses, reviews of missing or stale prices and large movements in market values and reviews of any market related activity. The pricing of all Fair Value Assets is subsequently reported to the Board or a committee thereof on a quarterly basis.

Generally, trading in foreign instruments is substantially completed each day at various times prior to the close of business on the NYSE. Occasionally, events affecting the values of such instruments may occur between the foreign market close and the close of business on the NYSE that may not be reflected in the computation of the Funds' net assets. If events (for example, a company announcement, market volatility or a natural disaster) occur during such periods that are expected to affect the value of such instruments materially, those instruments may be Fair Value Assets and be valued at their fair value, as determined in good faith by

the Global Valuation Committee using a pricing service and/or policies approved by the Board.

**Foreign Currency:** The Funds' books and records are maintained in US dollars. Purchases and sales of investment securities are recorded at the rates of exchange prevailing on the respective date of such transactions. Generally, when the US dollar rises in value against a foreign currency, the Funds' investments denominated in that currency will lose value because that currency is worth fewer US dollars; the opposite effect occurs if the US dollar falls in relative value.

The Funds do not isolate the portion of the results of operations arising as a result of changes in the foreign exchange rates from the changes in the market prices of investments held or sold for financial reporting purposes. Accordingly, the effects of changes in foreign currency exchange rates on investments are not segregated on the Statements of Operations from the effects of changes in market prices of those investments but are included as a component of net realized and unrealized gain (loss) from investments. The Funds report realized currency gains (losses) on foreign currency related transactions as components of net realized gain (loss) for financial reporting purposes, whereas such components are treated as ordinary income for federal income tax purposes.

**Asset-Backed and Mortgage-Backed Securities:** The Funds may invest in asset-backed securities. Asset-backed securities are generally issued as pass-through certificates, which represent undivided fractional ownership interests in an underlying pool of assets, or as debt instruments, which are also known as collateralized obligations, and are generally issued as the debt of a special purpose entity organized solely for the purpose of owning such assets and issuing such debt. Asset-backed securities are often backed by a pool of assets representing the obligations of a number of different parties. The yield characteristics of certain asset-backed securities may differ from traditional debt securities. One such major difference is that all or a principal part of the obligations may be prepaid at any time because the underlying assets (i.e., loans) may be prepaid at any time. As a result, a decrease in interest rates in the market may result in increases in the level of prepayments as borrowers, particularly mortgagors, refinance and repay their loans. An increased prepayment rate with respect to an asset-backed security subject to such a prepayment feature will have the effect of shortening the maturity of the security. If the Funds have purchased such an asset-backed security at a premium, a

faster than anticipated prepayment rate could result in a loss of principal to the extent of the premium paid.

The Funds may purchase certain mortgage pass-through securities. There are a number of important differences among the agencies and instrumentalities of the US government that issue mortgage-related securities and among the securities that they issue. For example, mortgage-related securities guaranteed by Ginnie Mae are guaranteed as to the timely payment of principal and interest by Ginnie Mae and such guarantee is backed by the full faith and credit of the United States. However, mortgage-related securities issued by Freddie Mac and Fannie Mae, including Freddie Mac and Fannie Mae guaranteed Mortgage Pass-Through Certificates, which are solely the obligations of Freddie Mac and Fannie Mae, are not backed by or entitled to the full faith and credit of

**Table of Contents****Notes to Financial Statements (continued)**

the United States but are supported by the right of the issuer to borrow from the Treasury.

**Collateralized Debt Obligations:** The Funds may invest in collateralized debt obligations ( CDOs ), which include collateralized bond obligations ( CBOs ) and collateralized loan obligations ( CLOs ). CBOs and CLOs are types of asset-backed securities. A CDO is an entity which is backed by a diversified pool of debt securities (CBOs) or syndicated bank loans (CLOs). The cash flows of the CDO can be split into multiple segments, called tranches , which will vary in risk profile and yield. The riskiest segment is the subordinated or equity tranche. This tranche bears the greatest risk of defaults from the underlying assets in the CDO and serves to protect the other, more senior, tranches from default in all but the most severe circumstances. Since it is shielded from defaults by the more junior tranches, a senior tranche will typically have higher credit ratings and lower yields than their underlying securities, and often receive investment grade ratings from one or more of the nationally recognized rating agencies. Despite the protection from the more junior tranches, senior tranches can experience substantial losses due to actual defaults, increased sensitivity to future defaults and the disappearance of one or more protecting tranches as a result of changes in the credit profile of the underlying pool of assets.

**Multiple Class Pass-Through Securities:** The Funds may invest in multiple class pass-through securities, including collateralized mortgage obligations ( CMOs ) and commercial mortgage-backed securities. These multiple class securities may be issued by Ginnie Mae, US government agencies or instrumentalities or by trusts formed by private originators of, or investors in, mortgage loans. In general, CMOs are debt obligations of a legal entity that are collateralized by, and multiple class pass-through securities represent direct ownership interests in, a pool of residential or commercial mortgage loans or mortgage pass-through securities (the Mortgage Assets ), the payments on which are used to make payments on the CMOs or multiple pass-through securities. Classes of CMOs include interest only ( IOs ), principal only ( POs ), planned amortization classes and targeted amortization classes. IOs and POs are stripped mortgage-backed securities representing interests in a pool of mortgages, the cash flow from which has been separated into interest and principal components. IOs receive the interest portion of the cash flow while POs receive the principal portion. IOs and POs can be extremely volatile in response to changes in interest rates. As interest rates rise and fall, the value of IOs tends to move in the same direction as interest rates. POs perform best when prepayments on the underlying mortgages rise since this increases the rate at which the principal is returned and the yield to maturity on the PO. When payments on mortgages underlying a PO are slower than anticipated, the life of the PO is lengthened and the yield to maturity is reduced. If the underlying Mortgage Assets experience greater than anticipated pre-payments of principal, the Funds may not fully recoup its initial investment in IOs.

**Zero-Coupon Bonds:** The Funds may invest in zero-coupon bonds, which are normally issued at a significant discount from face value and do not provide for periodic interest payments. Zero-coupon bonds may experience greater volatility in market value than similar maturity debt obligations which provide for regular interest payments.

**Capital Trusts:** The Funds may invest in capital trusts. These securities are typically issued by corporations, generally in the form of interest-bearing notes with preferred securities characteristics, or by an affiliated business trust of a corporation, generally in the form of beneficial interests in subordinated debentures or similarly structured securities. The securities can be structured as either fixed or adjustable coupon securities that can have either a perpetual or stated maturity date. Dividends can be deferred without creating an event of default or acceleration, although maturity cannot take place unless all cumulative payment obligations have been met. The deferral of payments does not affect the purchase or sale of these securities in the open market. Payments on these securities are treated as interest rather than dividends for federal income tax purposes. These securities generally are rated below that of the issuing company s senior debt securities.

**Preferred Stock:** The Funds may invest in preferred stocks. Preferred stock has a preference over common stock in liquidation (and generally in receiving dividends as well) but is subordinated to the liabilities of the issuer in all respects. As a general rule, the market value of preferred stock with a fixed dividend rate and no conversion element varies inversely with interest rates and perceived credit risk, while the market price of convertible preferred stock generally also reflects some element of conversion value. Because preferred stock is junior to debt securities and other obligations of the issuer, deterioration in the credit quality of the issuer will cause greater changes in the value of a preferred stock than in a more senior debt security with similar stated yield characteristics. Unlike interest payments on debt securities, preferred stock dividends are payable only if declared by the issuer s board of directors. Preferred stock also may be subject to optional or mandatory redemption provisions.

**Floating Rate Loan Interests:** The Funds may invest in floating rate loan interests. The floating rate loan interests the Funds hold are typically issued to companies (the borrower ) by banks, other financial institutions, and privately and publicly offered corporations (the lender ). Floating rate loan interests are generally non-investment grade, often involve borrowers whose financial condition is troubled or uncertain and companies that are highly leveraged. The Funds may invest in obligations of borrowers who are in bankruptcy proceedings. Floating rate loan interests may include fully funded term loans or revolving lines of credit. Floating rate loan interests are typically senior in the corporate capital structure of the borrower. Floating rate loan interests generally pay interest at rates that are periodically determined by reference to a base lending rate plus a

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

premium. The base lending rates are generally the lending rate offered by one or more European banks, such as London Interbank Offered Rate ( LIBOR ), the prime rate offered by one or more US banks or the certificate of deposit rate. Floating rate loan interests may involve foreign borrowers, and investments may be denominated in foreign currencies. The Funds consider these investments to be investments in debt securities for purposes of their investment policies.

When the Funds purchase a floating rate loan interest it may receive a facility fee and when it sells a floating rate loan interest it may pay a facility fee. On an ongoing basis, the Funds may receive a commitment fee based on the undrawn portion of the underlying line of credit amount

---

**Table of Contents****Notes to Financial Statements (continued)**

of a floating rate loan interest. Facility and commitment fees are typically amortized to income over the term of the loan or term of the commitment, respectively. Consent and amendment fees are recorded to income as earned. Prepayment penalty fees, which may be received by the Funds upon the prepayment of a floating rate loan interest by a borrower, are recorded as realized gains. The Funds may invest in multiple series or tranches of a loan. A different series or tranche may have varying terms and carry different associated risks.

Floating rate loan interests are usually freely callable at the borrower's option. The Funds may invest in such loans in the form of participations in loans ( Participations ) or assignments ( Assignments ) of all or a portion of loans from third parties. Participations typically will result in the Funds having a contractual relationship only with the lender, not with the borrower. The Funds will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the Participation and only upon receipt by the lender of the payments from the borrower. In connection with purchasing Participations, the Funds generally will have no right to enforce compliance by the borrower with the terms of the loan agreement, nor any rights of offset against the borrower, and the Funds may not benefit directly from any collateral supporting the loan in which it has purchased the Participation. As a result, the Funds will assume the credit risk of both the borrower and the lender that is selling the Participation. The Funds' investment in loan participation interests involves the risk of insolvency of the financial intermediaries who are parties to the transactions. In the event of the insolvency of the lender selling the Participation, the Funds may be treated as a general creditor of the lender and may not benefit from any offset between the lender and the borrower. Assignments typically result in the Funds having a direct contractual relationship with the borrower, and the Funds may enforce compliance by the borrower with the terms of the loan agreement.

Forward Commitments and When-Issued Delayed Delivery Securities: The Funds may purchase securities on a when-issued basis and may purchase or sell securities on a forward commitment basis. Settlement of such transactions normally occurs within a month or more after the purchase or sale commitment is made. The Funds may purchase securities under such conditions with the intention of actually acquiring them, but may enter into a separate agreement to sell the securities before the settlement date. Since the value of securities purchased may fluctuate prior to settlement, the Funds may be required to pay more at settlement than the security is worth. In addition, the Funds are not entitled to any of the interest earned prior to settlement. When purchasing a security on a delayed delivery basis, the Funds assume the rights and risks of ownership of the security, including the risk of price and yield fluctuations. In the event of default by the counterparty, the Funds' maximum amount of loss is the unrealized appreciation of unsettled when-issued transactions, which is shown in the Schedules of Investments.

Reverse Repurchase Agreements: The Funds may enter into reverse repurchase agreements with qualified third party broker-dealers. In a reverse repurchase agreement, the Funds sell securities to a bank or broker-dealer and agree to repurchase the same securities at a mutually agreed upon date and price. Securities sold under reverse repurchase agreements are recorded as a liability in the Statements of Assets and

Liabilities at face value including accrued interest. Due to the short term nature of the reverse repurchase agreements, face value approximates fair value. During the term of the reverse repurchase agreement, the Funds continue to receive the principal and interest payments on these securities. Certain agreements have no stated maturity and can be terminated by either party at any time. Interest on the value of the reverse repurchase agreements issued and outstanding is based upon competitive market rates determined at the time of issuance. The Funds may utilize reverse repurchase agreements when it is anticipated that the interest income to be earned from the investment of the proceeds of the transaction is greater than the interest expense of the transaction. Reverse repurchase agreements involve leverage risk and also the risk that the market value of the securities that the Funds are obligated to repurchase under the agreement may decline below the repurchase price. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Funds' use of the proceeds of the agreement may be restricted while the other party, or its trustee or receiver, determines whether or not to enforce the Funds' obligation to repurchase the securities.

Segregation and Collateralization: In cases in which the 1940 Act and the interpretive positions of the Securities and Exchange Commission ( SEC ) require that each Fund either deliver collateral or segregate assets in connection with certain investments (e.g., financial futures contracts, foreign currency exchange contracts, swaps and options written), or certain borrowings (e.g., reverse repurchase agreements and loan payable), each Fund will, consistent with SEC rules and/or certain interpretive letters issued by the SEC, segregate collateral or designate on its books and records cash or liquid securities having a market value at least equal to the amount that would otherwise be required to be physically segregated. Furthermore, based on requirements and agreements with certain exchanges and third party broker-dealers, a Fund engaging in such transactions may have requirements to deliver/deposit securities to/with an exchange or broker-dealer as collateral for certain investments.

Investment Transactions and Investment Income: For financial reporting purposes, investment transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on investment transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Dividends from foreign securities where the ex-dividend date may have passed are

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

subsequently recorded when the Funds are informed of the ex-dividend date. Under the applicable foreign tax laws, a withholding tax at various rates may be imposed on capital gains, dividends and interest. Upon notification from issuers, some of the dividend income received from a real estate investment trust may be redesignated as a reduction of cost of the related investment and/or realized gain. Interest income, including amortization and accretion of premiums and discounts on debt securities, is recognized on the accrual basis. Consent fees are compensation for agreeing to changes in the terms of debt instruments and are included in interest income in the Statements of Operations.

Dividends and Distributions: Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates. The portion of distributions that exceeds a Fund's

**Table of Contents**

**Notes to Financial Statements (continued)**

current and accumulated earnings and profits, which are measured on a tax basis, will constitute a nontaxable return of capital. Distributions in excess of a Fund's taxable income and net capital gains, but not in excess of a Fund's earnings and profits, will be taxable to shareholders as ordinary income and will not constitute a nontaxable return of capital. Capital losses carried forward from years beginning before 2011 do not reduce earnings and profits, even if such carried forward losses offset current year realized gains. The character and timing of dividends and distributions are determined in accordance with federal income tax regulations, which may differ from US GAAP.

**Income Taxes:** It is the Funds' policy to comply with the requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and to distribute substantially all of their taxable income to their shareholders. Therefore, no federal income tax provision is required.

Each Fund files US federal and various state and local tax returns. No income tax returns are currently under examination. The statute of limitations on each Fund's US federal tax returns remains open for each of the four years ended October 31, 2012. The statutes of limitations on each Fund's state and local tax returns may remain open for an additional year depending upon the jurisdiction. Management does not believe there are any uncertain tax positions that require recognition of a tax liability.

**Recent Accounting Standard:** In December 2011, the Financial Accounting Standards Board issued guidance that will expand current disclosure requirements on the offsetting of certain assets and liabilities. The new disclosures will be required for investments and derivative financial instruments subject to master netting or similar agreements which are eligible for offset in the Statements of Assets and Liabilities and will require an entity to disclose both gross and net information about such investments and transactions in the financial statements. The guidance is effective for financial statements with fiscal years beginning on or after January 1, 2013, and interim periods within those fiscal years. Management is evaluating the impact of this guidance on the Funds' financial statement disclosures.

**Deferred Compensation and BlackRock Closed-End Share Equivalent Investment Plan:** Under the deferred compensation plan approved by each Fund's Board, independent Directors ( Independent Directors ) may defer a portion of their annual complex-wide compensation. Deferred amounts earn an approximate return as though equivalent dollar amounts had been invested in common shares of certain other BlackRock Closed-End Funds selected by the Independent Directors. This has approximately the same economic effect for the Independent Directors as if the Independent Directors had invested the deferred amounts directly in certain other BlackRock Closed-End Funds.

The deferred compensation plan is not funded and obligations thereunder represent general unsecured claims against the general assets of each Fund. Prior to March 31, 2012, each Fund elected to invest in common shares of certain other BlackRock Closed-End Funds selected by the Independent Directors in order to match its deferred compensation obligations. Dividends and distributions received from the BlackRock Closed-End Fund investments through March 31, 2012 are included in income affiliated in the Statements of Operations.

**Other:** Expenses directly related to a Fund are charged to that Fund. Other operating expenses shared by several funds are pro rated among those funds on the basis of relative net assets or other appropriate methods.

The Funds have an arrangement with the custodian whereby fees may be reduced by credits earned on uninvested cash balances, which, if applicable, are shown as fees paid indirectly in the Statements of Operations. The custodian imposes fees on overdrawn cash balances, which can be offset by accumulated credits earned or may result in additional custody charges.

**2. Derivative Financial Instruments:**

The Funds engage in various portfolio investment strategies using derivative contracts both to increase the returns of the Funds and/or to economically hedge, or protect, their exposure to certain risks such as credit risk, equity risk, interest rate risk or foreign currency exchange rate risk. These contracts may be transacted on an exchange or OTC.

Losses may arise if the value of the contract decreases due to an unfavorable change in the market rates or values of the underlying instrument or if the counterparty does not perform under the contract. The Funds' maximum risk of loss from counterparty credit risk on OTC derivatives is generally the aggregate unrealized gain netted against any collateral pledged by/posted to the counterparty. For OTC options purchased, the Funds bear the risk of loss in the amount of the premiums paid plus the positive change in market values net of any collateral received on the options should the counterparty fail to perform under the contracts. Options written by the Funds do not give rise to counterparty credit risk, as options written obligate the Funds to perform and not the counterparty. Counterparty risk related to exchange-traded financial futures contracts and options and centrally cleared swaps is deemed to be minimal due to the protection against defaults provided by the exchange on which these

contracts trade.

The Funds may mitigate counterparty risk by procuring collateral and through netting provisions included within an International Swaps and Derivatives Association, Inc. master agreement ( ISDA Master Agreement ) implemented between a Fund and each of its respective counterparties. An ISDA Master Agreement allows each Fund to offset with each separate counterparty certain derivative financial instrument s payables and/or receivables with collateral held. The amount of collateral moved to/from applicable counterparties is generally based upon minimum transfer amounts of up to \$500,000. To the extent amounts due to the Funds from their counterparties are not fully collateralized, contractually or otherwise, the Funds bear the risk of loss from counterparty non-performance. See Note 1 Segregation and Collateralization for information with respect to collateral practices. In addition, the Funds manage counterparty risk by entering into agreements only with counterparties that it believes have the financial resources to honor their obligations and by monitoring the financial stability of those counterparties.

Certain ISDA Master Agreements allow counterparties to OTC derivatives to terminate derivative contracts prior to maturity in the event the Funds net assets decline by a stated percentage or the Funds fail to meet the terms of its ISDA Master Agreements, which would cause the Funds to accelerate payment of any net liability owed to the counterparty.

---

**Table of Contents****Notes to Financial Statements (continued)**

**Financial Futures Contracts:** The Funds purchase or sell financial futures contracts and options on financial futures contracts to gain exposure to, or economically hedge against, changes in interest rates (interest rate risk). Financial futures contracts are agreements between the Fund and counterparty to buy or sell a specific quantity of an underlying instrument at a specified price and at a specified date. Depending on the terms of the particular contract, financial futures contracts are settled either through physical delivery of the underlying instrument on the settlement date or by payment of a cash settlement amount on the settlement date. Pursuant to the contract, the Funds agree to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Funds as unrealized appreciation or depreciation. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The use of financial futures contracts involves the risk of an imperfect correlation in the movements in the price of financial futures contracts, interest or foreign currency exchange rates and the underlying assets.

**Foreign Currency Exchange Contracts:** The Funds enter into foreign currency exchange contracts as an economic hedge against either specific transactions or portfolio instruments or to obtain exposure to foreign currencies (foreign currency exchange rate risk). A foreign currency exchange contract is an agreement between two parties to buy and sell a currency at a set exchange rate on a future date. Foreign currency exchange contracts, when used by the Funds, help to manage the overall exposure to the currencies in which some of the investments held by the Funds are denominated. The contract is marked-to-market daily and the change in market value is recorded by the Funds as an unrealized gain or loss. When the contract is closed, the Funds record a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. The use of foreign currency exchange contracts involves the risk that the value of a foreign currency exchange contract changes unfavorably due to movements in the value of the referenced foreign currencies and the risk that the counterparty to the contract does not perform its obligations under the agreement.

**Options:** The Funds purchase and write call and put options to increase or decrease their exposure to underlying instruments (including equity risk and/or interest rate risk) and/or, in the case of options written, to generate gains from options premiums. A call option gives the purchaser (holder) of the option the right (but not the obligation) to buy, and obligates the seller (writer) to sell (when the option is exercised), the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. A put option gives the holder the right to sell and obligates the writer to buy the underlying instrument at the exercise or strike price at any time or at a specified time during the option period. When the Funds purchase (write) an option, an amount equal to the premium paid (received) by the Funds is reflected as an asset (liability). The amount of the asset (liability) is subsequently marked-to-market to reflect the current market value of the option purchased (written). When an instrument is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the instrument acquired or deducted from

(or added to) the proceeds of the instrument sold. When an option expires (or the Funds enter into a closing transaction), the Funds realize a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premiums received or paid). When the Funds write a call option, such option is covered, meaning that the Funds hold the underlying instrument subject to being called by the option counterparty. When the Funds write a put option, such option is covered by cash in an amount sufficient to cover the obligation.

Options on swaps (swaptions) are similar to options on securities except that instead of selling or purchasing the right to buy or sell a security, the writer or purchaser of the swap option is granting or buying the right to enter into a previously agreed upon interest rate agreement (interest rate risk) at any time before the expiration of the option.

In purchasing and writing options, the Funds bear the risk of an unfavorable change in the value of the underlying instrument or the risk that the Funds may not be able to enter into a closing transaction due to an illiquid market. Exercise of a written option could result in the Funds purchasing or selling a security at a price different from the current market value.

**Swaps:** The Funds enter into swap agreements, in which the Fund and a counterparty agree to either make periodic net payments on a specified notional amount or a net payment upon termination. Swap agreements are privately negotiated in the OTC market and may be executed on a registered financial and commodities exchange (centrally cleared swaps). In a centrally cleared swap, the Funds typically enter into an agreement with a counterparty; however, performance is guaranteed by the central clearinghouse reducing or eliminating the Funds' exposure to the credit risk of the counterparty. These payments received or made by the Funds are recorded in the Statements of Operations as realized gains or losses, respectively. Any upfront fees paid are recorded as assets and any upfront fees received are recorded as liabilities and are shown as swap premiums paid and swap premiums received, respectively on the Statements of Assets and Liabilities and amortized over the term of the swap. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). The daily change in

## Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR

valuation of centrally cleared swaps, if any, is recorded as a receivable or payable for variation margin in the Statements of Assets and Liabilities. When the swap is terminated, the Funds will record a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Funds' basis in the contract, if any. Generally, the basis of the contracts is the premium received or paid. Swap transactions involve, to varying degrees, elements of interest rate, credit and market risk in excess of the amounts recognized in the Statements of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreements may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreements, and that there may be unfavorable changes in interest rates and/or market values associated with these transactions.

**Table of Contents****Notes to Financial Statements (continued)**

**Credit default swaps** The Funds enter into credit default swaps to manage their exposure to the market or certain sectors of the market, to reduce their risk exposure to defaults of corporate and/or sovereign issuers or to create exposure to corporate and/or sovereign issuers to which they are not otherwise exposed (credit risk). The Funds enter into credit default swap agreements to provide a measure of protection against the default of an issuer (as buyer of protection) and/or gain credit exposure to an issuer to which it is not otherwise exposed (as seller of protection). The Funds may either buy or sell (write) credit default swaps on single-name issuers (corporate or sovereign), a combination or basket of single-name issuers or traded indexes. Credit default swaps on single-name issuers are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a negative credit event take place with respect to the referenced entity (e.g., bankruptcy, failure to pay, obligation accelerators, repudiation, moratorium or restructuring). Credit default swaps on traded indexes are agreements in which the buyer pays fixed periodic payments to the seller in consideration for a guarantee from the seller to make a specific payment should a write-down, principal or interest shortfall or default of all or individual underlying securities included in the index occurs. As a buyer, if an underlying credit event occurs, the Funds will either receive from the seller an amount equal to the notional amount of the swap and deliver the referenced security or underlying securities comprising the index or receive a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index. As a seller (writer), if an underlying credit event occurs, the Funds will either pay the buyer an amount equal to the notional amount of the swap and take delivery of the referenced security or underlying securities comprising the index or pay a net settlement of cash equal to the notional amount of the swap less the recovery value of the security or underlying securities comprising the index.

**Interest rate swaps** The Funds enter into interest rate swaps to gain or reduce exposure to interest rates or to manage duration, the yield curve or interest rate risk by economically hedging the value of the fixed rate bonds which may decrease when interest rates rise (interest rate risk). Interest rate swaps are agreements in which one party pays a stream of interest payments, either fixed or floating, for another party's stream of interest payments, either fixed or floating, on the same notional amount for a specified period of time. Interest rate floors, which are a type of interest rate swap, are agreements in which one party agrees to make payments to the other party to the extent that interest rates fall below a specified rate or floor in return for a premium. In more complex swaps, the notional principal amount may decline (or amortize) over time.

**Table of Contents****Notes to Financial Statements (continued)****3. Investment Advisory Agreement and Other Transactions with Affiliates:**

The PNC Financial Services Group, Inc. ( PNC ) is the largest stockholder and an affiliate, for 1940 Act purposes, of BlackRock, Inc. ( BlackRock ).

Each Fund entered into an Investment Advisory Agreement with the Manager, the Funds' investment advisor, an indirect, wholly owned subsidiary of BlackRock, to provide investment advisory and administration services. The Manager is responsible for the management of each Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of each Fund. For such services, each Fund pays the Manager a monthly fee based on a percentage of each Fund's average daily (average weekly for BPP, BTZ and BGT) net assets (including any assets attributable to borrowings) at the following annual rates:

PSW	0.60%
PSY	0.60%
BPP	0.65%
BTZ	0.65%
BGT	0.75%

The Manager voluntarily agreed to waive a portion of the investment advisory fees or other expenses on BGT as a percentage of its average weekly net assets (including any assets attributable to borrowings) minus the sum of liabilities (other than borrowings representing financial leverage) by 0.05% for the period September 1, 2011 to August 31, 2012. For the year ended October 31, 2012, the Manager waived \$188,882, which is included in fees waived by Manager in the Statements of Operations.

The Manager voluntarily agreed to waive its investment advisory fees by the amount of investment advisory fees each Fund pays to the Manager indirectly through its investment in affiliated money market funds. However, the Manager does not waive its investment advisory fees by the amount of investment advisory fees paid in connection with each Fund's investment in other affiliated investment companies, if any. These amounts are included, in fees waived by Manager in the Statements of Operations. For the year ended October 31, 2012, the amounts waived were as follows:

PSW	\$ 663
PSY	\$ 2,325
BPP	\$ 1,200
BTZ	\$ 3,419
BGT	\$ 732

The Manager provides investment management and other services to the Taxable Subsidiary. The Manager does not receive separate compensation from the Taxable Subsidiary for providing investment management or administrative services. However, BGT pays the Manager based on the Fund's net assets, which includes the assets of the Taxable Subsidiary.

The Manager entered into a sub-advisory agreement with BlackRock Financial Management, Inc. ( BFM ), an affiliate of the Manager. The Manager pays BFM, for services it provides, a monthly fee that is a percentage of the investment advisory fees paid by each Fund to the Manager.

Certain officers and/or Directors of the Funds are officers and/or Directors of BlackRock or its affiliates. The Funds reimburse the Manager for a portion of the compensation paid to the Funds' Chief Compliance Officer.

**4. Investments:**

Purchases and sales of investments including paydowns, excluding short-term securities and US government securities for the year ended October 31, 2012, were as follows:

Edgar Filing: BLACKROCK CREDIT ALLOCATION INCOME TRUST IV - Form N-CSR
