Table of Contents**NOTES TO CONDENSED FINANCIAL STATEMENTS**

(Unaudited)

(1) GENERAL

The accompanying unaudited financial statements of Veramark Technologies, Inc. (the Company), include all adjustments of a normal and recurring nature which, in the opinion of Company's management, are necessary to present fairly, the Company's financial position as of March 31, 2013, the results of its operations for the three months ended March 31, 2013 and 2012, and cash flows for the three months ended March 31, 2013 and 2012.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted pursuant to the rules and regulations of the Securities and Exchange Commission. These condensed financial statements should be read in conjunction with the financial statements and related notes contained in the Company's Annual Report on Form 10-K to the Securities and Exchange Commission for the year ended December 31, 2012.

The results of operations and cash flows for the three months ended March 31, 2013 are not necessarily indicative of the results to be expected for the full year's operation. Certain prior period amounts have been reclassified to conform to the current period presentation.

(2) PROPERTY AND EQUIPMENT

The major classifications of property and equipment at March 31, 2013, and December 31, 2012 were:

	March 31, 2013	December 31, 2012
Machinery and equipment	\$ 186,204	\$ 186,204
Computer hardware and software	1,482,179	1,434,636
Furniture and fixtures	923,777	967,241
	\$ 2,592,160	\$ 2,588,081

For the three months ended March 31, 2013 and 2012, the Company recorded depreciation expense of \$46,735 and \$48,799, respectively.

(3) STOCK-BASED COMPENSATION

The Company's share-based compensation consists of restricted stock and stock options, vesting over periods ranging from one to four years. For the three months ended March 31, 2013, the Company awarded 53,000 stock options, canceled 24,000 stock options, and exercised 59,000 stock options. During the first three months of 2012, the Company awarded 67,000 stock options, and canceled 19,250 stock options.

Table of Contents

A summary of the status of the Company's stock option plan as of March 31, 2013, is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Grant-Date Fair Value	Average Remaining Contractual Term (Yrs)	Intrinsic Value
Outstanding as of December 31, 2012	1,455,583	\$ 0.67	\$ 0.63	5.6	\$ 28,870
Granted	53,000	0.47	0.44		0
Exercised	(59,000)	0.40			(3,700)
Canceled	(24,000)	0.40			(530)
Outstanding as of March 31, 2013	1,425,583	\$ 0.68	\$ 0.63	5.7	\$ 24,640
Options exercisable at March 31, 2013	1,096,770	\$ 0.72	\$ 0.66	4.8	\$ 24,640

As of March 31, 2013, there was \$114,659 of total unrecognized compensation cost related to non-vested stock options granted under the Plan, and \$2,340 of unrecognized compensation cost related to non-vested restricted stock grants. The compensation cost for stock options will be recognized over a weighted-average period of 1.3 years. The compensation costs of restricted stock will be recognized over a weighted-average period of 0.3 years.

(4) NET INCOME PER SHARE (EPS)

ASC 260-10 Earnings Per Share requires the Company to calculate net income per share based on basic and diluted net income per share, as defined. Basic EPS excludes dilution and is computed by dividing net income by the weighted average number of shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. The dilutive effect of outstanding options issued by the Company are reflected in diluted EPS using the treasury stock method. Under the treasury stock method, options will only have a dilutive effect when the average market price of common stock during the period exceeds the exercise price of the options.

Table of Contents**Calculations of Earnings Per Share**

	Three Months Ended	
	2013	March 31, 2012
<u>Basic</u>		
Net Income	\$ 20,172	\$ 80,432
Weighted average common shares outstanding	10,757,194	10,616,771
Net Income per common share	\$ 0.00	\$ 0.01
<u>Diluted</u>		
Net Income	\$ 20,172	\$ 80,432
Weighted average common shares outstanding	10,757,194	10,616,771
Additional dilutive effect of stock options after application of treasury stock method	122,305	16,989
Weighted average dilutive shares outstanding	10,879,499	10,633,760
Net Income per common share assuming full dilution	\$ 0.00	\$ 0.01

(5) INDEMNIFICATION OF CUSTOMERS

Our agreements with customers generally require us to indemnify the customer against claims that our software infringes third party patent, copyright, trademark or other proprietary rights. Such indemnification obligations are generally limited in a variety of industry-standard respects, including our right to replace an infringing product. As of March 31, 2013, we had not experienced any material losses related to these indemnification obligations and no material claims with respect thereto were outstanding. We do not expect significant claims related to these indemnification obligations, and consequently, we have not established any related reserves.

(6) BENEFIT PLANS

The Company sponsors an employee incentive savings plan under Section 401(k) for all eligible employees. The Company's contributions to the plan are discretionary. During the first quarter of 2012, there were no contributions to the plan. For the first quarter of 2013, the Company's contribution to employee 401(k) accounts totaled \$60,465.

Table of Contents

The Company also sponsors an unfunded Supplemental Executive Retirement Program (SERP), which is a non-qualified plan that provides certain former employees, and one current employee defined pension benefits. Periodic pension expense for the three months ended March 31, 2013 and 2012 consisted of the following:

	Three Months Ended	
	March 31,	
	2013	2012
Interest Cost	53,400	60,000

The Company paid pension obligations of \$139,665 for the three months ended March 31, 2013 and \$125,515 for the three months ended March 31, 2012.

The discount rate used in determining the actuarial present value of the projected benefit obligation was 4.0% for the three months ended March 31, 2013 and 4.5% for the three months ended March 31, 2012.

The Company maintains life insurance covering certain current and former employees under its SERP with the Company named as beneficiary. The Company intends to use the death benefits of these policies, as well as loans against the accumulating cash surrender value of the policies, to fund future pension obligations. The total death benefit associated with these policies is \$10.2 million, with an associated accumulated cash surrender value of \$3,438,171 at March 31, 2013. The accumulated cash surrender values of these policies at December 31, 2012 was approximately \$3,430,020.

The projected pension benefits paid or expected to be paid under this plan are as follows, assuming retirement at age 65 and life expectancies based on IRS mortality tables:

Period Ending December 31, Unless Stated Otherwise,

2013	558,660
2014	490,660
2015	449,060
2016	454,340
2017	490,740
2018 - 2022	2,597,047

Table of Contents**(7) INTANGIBLE ASSETS AND GOODWILL**

Under the purchase method of accounting, we allocated the fair value of the total consideration expected to be transferred, to the tangible and identifiable intangible assets acquired from Source Loop in June 2010, based on their estimated fair values on the date of acquisition. The fair values assigned to the identifiable intangible assets were based on estimates and assumptions determined by management. The following table summarizes the fair values assigned to the identifiable intangible assets by asset class at the time of acquisition, and the subsequent amortization through March 31, 2013 of those intangible assets.

Amortization of Intangible Assets Acquired in Source Loop Acquisition

(In 000s except weighted avg life in years)

Intangible Asset Class	Weighted Avg Life Years	FMV at Acquisition Date	Current Year Amortization	Accumulated Amortization at 3/31/13	Net Value by Asset Class at 3/31/13
Customer Contracts	3	\$ 526	\$ 15	\$ 308	\$ 218
Customer Relationships	3	260	8	173	87
Key Employee Agreements	1	177	10	148	29
Other	1	30	1	27	3
Sub-Total Intangibles Subject to Amortization	3	993	\$ 34	\$ 656	\$ 337
Goodwill		336			
Total Intangible Assets Acquired		\$ 1,329			

Expected Future Amortization

Intangible Asset Class	Q2-Q4 2013	2014	2015	2016	2017
Customer Contracts	\$ 47	\$ 55	\$ 47	\$ 41	\$ 28
Customer Relationships	23	25	19	15	5
Key Employee Agreements	29	0	0	0	0
Other	2	1	0	0	0
Sub-Total Intangibles Subject to Amortization	\$ 101	\$ 81	\$ 66	\$ 56	\$ 33

Goodwill represents the excess of the purchase price paid over the fair value of assets acquired. Goodwill is not amortized and is subject to an impairment test conducted in December of each year, or more frequently if a change in circumstances or the occurrence of events indicates that potential impairment exists. Through March 31, 2013, there has been no impairment of goodwill associated with the Source Loop acquisition.

Table of Contents

(8) COMMITMENTS AND CONTINGENCIES

On June 16, 2011, the Company entered into a Nonexclusive Patent License and Settlement Agreement to settle an action brought by Asentinel LLC, against Veramark, AnchorPoint a division of MTS, and CASS Information Systems, alleging infringement of two patents held by Asentinel concerning systems and methods for identifying and processing billing exceptions in telecommunications invoices.

Material terms of the settlement agreement included:

Asentinel waived all claims for damages for prior infringement and agreed not to make claims for future infringement of its patents.

The Company agreed to pay Asentinel \$500,000. Of that amount \$250,000 was paid upon execution of the agreement, and \$250,000 was paid on June 16, 2012.

The lawsuit was dismissed against the Company.

(9) REVOLVING DEMAND NOTE AGREEMENT

On October 31, 2008, the Company entered into a Revolving Demand Note Agreement (the Note), with Manufacturers and Traders Trust Company (the Bank) to provide working capital in the ordinary course of business. The Note amended in October 2010 to increase the amount available under the agreement from \$400,000 to \$750,000. At March 31, 2013, the Company had no outstanding balance, under the Note.

The material terms of the Note include:

The maximum outstanding principal balance under the Note is Seven Hundred Fifty Thousand Dollars (\$750,000).

Veramark may borrow under the Note, from time to time, an amount less than or equal to, but not greater than, the available balance.

The outstanding principal balance will bear interest at a per annum rate equal to LIBOR rate plus 3.5% with a minimum rate of 4.0%.

The Bank may demand payment of the outstanding principal balance at any time.

(10) TERM NOTE AGREEMENT

On October 29, 2010, the Company entered into an agreement with the Bank to provide a three year term loan in the amount of \$200,000, the proceeds of which were used to purchase furnishings and fixtures for the Company's new headquarters facility. The loan bears an interest rate of LIBOR plus 4.0%, with a minimum interest rate of 4.5%. At March 31, 2013, the remaining balance of the term loan was \$38,889.

Table of Contents

(11) SUBSEQUENT EVENTS

Merger Agreement

On May 1, 2013, the Company announced that it has entered into a definitive merger agreement with Varsity Acquisition LLC ("Varsity") and All Big Ten Holdings, Inc., a wholly-owned subsidiary of Varsity ("Merger Sub") under which Merger Sub will acquire all of the outstanding common stock of the Company, par value \$0.10 per share, for \$0.98 per share in cash. The \$0.98 per share price represents a 38% premium over the 90-day average of the Company's shares and a 29% premium to the closing price of the Company's shares on April 30, 2013.

A special committee of the Company's Board of Directors, (the "Special Committee"), consisting solely of independent directors, and the Company's Board of Directors have both unanimously approved the transaction. In determining whether to approve the transaction, the Special Committee also obtained and considered a fairness opinion from an independent third-party advisor. The Special Committee ultimately concluded that Varsity's offer is fair to, and in the best interest of, the Company's shareholders.

Under the terms of the merger agreement, Merger Sub will commence a tender offer to purchase all outstanding shares of the Company on the fifth business day following the end of a 45-day "go-shop" period. Merger Sub's obligation to purchase the shares of the Company's common stock tendered in the tender offer is subject to certain conditions, including that the number of shares of the Company's common stock that have been validly tendered and not properly withdrawn, together with the shares beneficially owned by Varsity or Merger Sub, if any, represent at least a majority of the outstanding shares of the Company's common stock.

If Merger Sub owns at least 90% of the Company's outstanding shares as a result of its current shareholdings, shares tendered in the tender offer and the issuance of new shares by the Company pursuant to a "top-up" provision in the merger agreement, Merger Sub intends to cause the Company to enter into a short-form merger, pursuant to which shares not tendered in the tender offer would be converted into the right to receive \$0.98 per share in cash without interest. If Merger Sub does not own at least 90% of the Company's outstanding shares as a result of its current shareholdings, shares tendered in the tender offer and the issuance of new shares by the Company pursuant to the top-up provision in the merger agreement, the Company intends to solicit proxies from its shareholders in support of a merger between the Company and Merger Sub.

The transaction does not require antitrust approval and is expected to close in the third quarter of 2013 subject to satisfaction of the tender offer conditions and customary closing conditions.

Litigation

On May 7, 2013, in the Supreme Court of the State of New York, County of Nassau, Penelope Horn filed a class action complaint and demand for jury trial, index number 601167/2013 (the "Complaint") against the Company, the Board of Directors, Varsity Acquisition LLC, and All Big Ten Holdings, Inc., (collectively the "Defendants"), in response to the aforementioned definitive merger agreement. The Complaint alleges, among other things, that the Defendants violated their fiduciary duties of candor, loyalty, due care, independence, good faith, and fair dealing and, in doing so, that they did not obtain adequate, fair and maximum consideration. We intend to vigorously defend against the allegations in this lawsuit. Given that this lawsuit is in its early stages, we are unable to predict the outcome or determine the potential impact, if any, that could result from its final resolution.

Table of Contents

Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations

Management's Discussion and Analysis contains statements that are forward-looking. Such statements are identified by the use of words like plans, expects, intends, believes, will, anticipates, estimates and other words of similar meaning in conjunction with, among other things, discussions of future operations, financial performance, the Company's strategy for growth, product development, regulatory approvals, market position and expenditures. Forward-looking statements are based on management's expectations as of the date of this report. The Company cannot guarantee that any forward-looking statement will be accurate, although the Company believes that it has been reasonable in its expectations and assumptions. Forward-looking statements are subject to the risks identified in "Issues and Risks" and elsewhere in this report. Readers are cautioned not to place undue reliance on forward-looking statements and are advised to review the risks identified in "Issues and Risks" and elsewhere in this report. The Company has no obligation to update forward-looking statements.

Overview

On May 1, 2013, subsequent to the end of the first quarter, the Company announced that it had entered into a definitive merger agreement with Varsity Acquisition LLC and All Big Ten Holdings, Inc., a wholly owned subsidiary of Varsity. Pursuant to the agreement Varsity will acquire all of the outstanding common stock of the Company for \$0.98 per share in cash. The \$0.98 per share represented a 38% premium over the 90 day average of the Company's stock and a 29% premium to the closing price of the Company's shares on April 30, 2013. See note 11 to the Financial Statements for additional details.

Revenues for the first quarter ended March 31, 2013 of \$3,846,000 increased 7% from revenues of \$3,605,000 for the first quarter of 2012. Net income of \$20,000 for the quarter ended March 31, 2013 declined \$60,000 from net income of \$80,000 for the same quarter of 2012. The reduction in net income results primarily from expenses related to the merger agreement transaction referenced above.

Orders for the quarter ended March 31, 2013 of \$5.0 million increased 14% from \$4.4 million for the same quarter a year ago. Our backlog of recurring revenues of \$15.2 million at March 31, 2013 increased 9% from \$14.0 million at December 31, 2012.

Revenues

The Company's revenues are earned by providing Telecom Expense Management (TEM) products and services either through the direct sale of licensed software, or under multi-year managed service contracts, in either a hosted or cloud-based software as a service (SaaS) environment. Our solutions assist enterprises in reducing operational expenses associated with their mobile or fixed communication networks, thereby optimizing network efficiency.

For the quarter ended March 31, 2013 revenues from multi-year TEM service contracts increased 10% from revenues realized in the first quarter of 2012. Revenues generated from the sale of licensed software, including associated maintenance and service revenues, declined 2% from the same quarter of 2012.

Gross Margin

Gross margin (defined as revenues less cost of revenues) of \$2,219,000 for the first quarter ended March 31, 2013 increased 8% from gross margin of \$2,059,000 for the first quarter of 2012. As a percentage of revenues, gross margin improved from 57% of revenue for the quarter ended March 31, 2012 to 58% of revenues for the first quarter of 2013.

Table of Contents**Engineering and Software Development Costs**

Engineering and software development costs of \$323,000 for the first quarter of 2013, net of the capitalization of software development costs, increased \$30,000, or 10% from net expense of \$293,000 for the first quarter of 2012. The increase in net expense reflects a reduction in the level of software development costs capitalized in 2013 versus the prior year. In the first quarter of 2013 we capitalized \$134,000 of our development costs, which compares with the capitalization of \$169,000 of development costs for the same quarter of 2012. The chart below summarizes the first quarters of 2013 and 2012 in terms of gross expenditure for engineering and software development, development costs capitalized and the resulting net expense charged to the statement of operations.

	Three Months Ended	
	March 31,	
	2013	2012
Gross expenditures for engineering & software development	\$ 457,000	\$ 462,000
Less: Software development costs capitalized	(134,000)	(169,000)
Net expense for engineering and software development	\$ 323,000	\$ 293,000

Selling, General and Administrative Costs (SG&A)

SG&A expense of \$1,894,000 for the quarter ended March 31, 2013 increased \$192,000, or 11% from the prior year. The increase in expense reflects \$193,000 of legal and accounting expenses incurred in the first quarter of 2013, associated with the proposed merger agreement with Varsity Acquisition LLC.

Liquidity and Capital Resources

The Company cash position (cash and cash equivalents plus short term investments) totaled \$1,686,000 at March 31, 2013 representing a positive cash flow of \$370,000 from the December 31, 2012 cash position of \$1,316,000. The Company maintains a \$750,000 line of credit agreement with Manufacturers and Traders Trust Company, against which there was no borrowing at March 31, 2013.

Accounts receivable decreased \$73,000, from \$2,080,000 at December 31, 2012 to \$2,007,000 at the end of the first quarter. The reserve for bad debts increased slightly from \$45,000 at December 31, 2012 to \$50,000 at March 31, 2013, reflecting small movements in the aging of receivables. There were no significant write-offs of accounts in the first quarter.

Other current assets of \$1,387,000 at March 31, 2013 include \$1,373,000 of funds held on behalf of clients who have selected the bill-payment option of our TEM suite of services. This amount is offset by an identical balance in other accrued liabilities in our balance sheet. For customers selecting the bill-payment option, the Company pays the customers pre-approved wire-line and wireless invoices on their behalf and presents the client with a single consolidated monthly bill for the total amount. Bill payment services provide prompt, accurate payments, while reducing payment errors and labor costs for the client.

Table of Contents

Net capital expenditures additions in the first quarter of 2013 totaled \$4,000, down from \$41,000 for the same quarter of 2012. Depreciation expense for the quarter of \$47,000 compared with \$49,000 for the quarter ended March 31, 2012.

Software development costs capitalized and included on the Company's Balance Sheet at March 31, 2013 of \$2,503,000, compares with a balance of \$2,585,000 at the end of 2012. During the first quarter of 2013 development costs of \$134,000 were capitalized, and \$216,000 of development costs capitalized in previous periods were amortized and charged to cost of revenues.

The intangible asset of \$337,000 at March 31, 2013 represents the remaining unamortized value of assets acquired from Source Loop in 2010. During the first quarter, \$34,000 was amortized and charged to SG&A expense. See note 7 to the financial statements for a summary of the original and remaining fair market values associated with that acquisition.

Pension assets at March 31, 2013 of \$3,438,000 consist of the accumulated cash surrender values of company- owned life insurance policies designed to fund current and future pension obligations. These cash surrender values are also available to fund current operations if required.

Current liabilities at March 31, 2013 of \$8,062,000 increased \$785,000, or 11% from the December 31, 2012 balance of \$7,277,000 resulting partially from increases in accounts payable (\$166,000), deferred revenue (\$321,000), and other accrued liabilities (\$522,000), and a decrease in accrued compensation (207,000). The increase in accounts payable includes a portion of the additional legal expenses referred to in the earlier discussion of SG&A expenses.

Deferred revenues represent the portion of customer orders for services such as maintenance, training, consulting and implementation services that will be performed in future periods and recognized as revenue at that time. A significant portion of the deferred revenues, which form a component of our backlog of recurring revenues, will be recognized as revenue over the next four quarters.

Other current liabilities include the \$1,373,000 offset to the funds held on behalf of clients utilizing our bill pay service option, and included in other current assets as discussed above.

Long- term pension liabilities at March 31, 2013 of \$5,373,000 decreased \$87,000 from the December 31, 2012 balance of \$5,460,000. The Company currently uses a discount rate of 4% to determine the net present value of future pension obligations. Further growth and participation in the plan was suspended in 2008. Future pension obligations are expected to be funded utilizing the cash surrender values and death benefits of the Company- owned life insurance contracts referred to above. The death benefits attached to those policies, which are not included in our balance sheet, total \$10.2M.

Other long-term liabilities at March 31, 2013 represents non-cash prepaid rent liability required of rent-free periods included in our Rochester, N.Y and Atlanta, Ga. facility leases.

Stockholder's equity of \$478,000 at March 31, 2013 increased \$89,000 from the December 31, 2012 balance of \$389,000. Additions included the first quarter net income of \$20,000 and \$48,000 in proceeds from shares purchased by employees via the Company's employee stock purchase plan and the exercise of employee stock options.

Table of Contents

It is management's opinion, given current cash and investment balances, availability under its line of credit arrangement, and access to cash surrender values of company-owned life insurance policies, that more than sufficient capital exists to fully fund operational and strategic objectives for the next twelve months and beyond.

Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards Update No. 2012-02, *Testing Indefinite-Lived Intangible Assets for Impairment*, to reduce the complexity of performing an impairment test for indefinite-lived intangible assets by simplifying how an entity tests those assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. The amendments permit an entity first to assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with Subtopic 350-30, Intangibles—Goodwill and Other—General Intangibles Other than Goodwill. The amendments of this update are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. This update did not have a material effect on the Company's financial statements.

In February 2013, the FASB issued Accounting Standards Update No. 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. This guidance requires the reporting of the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income. It is effective prospectively for fiscal years, and interim periods within those years, beginning after December 15, 2012. This update did not have a material effect on the Company's financial statements.

Critical Accounting Policies

Revenue Recognition The Company's revenue consists of revenues from the licensing of software to resellers and end user customers; fees for services rendered including installation, training, implementation, and customer maintenance contracts; and the outsourcing or hosting of services, commonly referred to as Software as a Service (SaaS).

The Company recognizes software license revenue under ASC 985-605, formerly Statement of Position No 97-2—Software Revenue Recognition, Statement of Position No. 98-9, Software Revenue Recognition With Respect to Certain Transactions, and under ASC 605-25, formerly Emerging Issues Task Force 00-21, Revenue Arrangements with Multiple Deliverables, and related interpretations, as amended.

Licensed software may be sold as a stand-alone element, with other software elements, or in conjunction with supplemental services. When an order consists of more than one element, it is considered to be a multiple element arrangement (MEA). When sold as a stand-alone element, the revenue is recognized upon shipment. When sold as part of a MEA, revenue from the licensed software is recognized when each element is activated at the customer site, via the entry of a software key-code. This typically occurs at the same time that installation occurs. Service revenues such as training, installation and implementation, are recognized when the service is complete, and acknowledged by the customer.

Table of Contents

For either a single element transaction or a MEA, the Company allocates consideration to all deliverables based on their relative stand-alone selling prices. Amendments to ASC 605-25, which became effective January 1, 2011, establish a hierarchy to determine the stand-alone selling price as follows:

Vendor Specific Objective Evidence of the fair value (VSOE),

Third Party Evidence (TPE)

Best Estimate of the Selling Price (ESP)

Sales which constitute a MEA are accounted for by determining whether the elements can be accounted for as separate accounting units, and if so, by applying values to those units, per the hierarchy above. If VSOE is not available, management estimates the fair selling price using historical pricing for similar items, in conjunction with current pricing and discount policies.

Regardless of the form of sale, no revenue is recognized without persuasive evidence of an arrangement existing. Persuasive evidence is determined to be a signed purchase order received from the customer, or an equivalent form for those customers lacking a formalized purchase order system. Additionally, revenue is only recognized when a selling price is fixed or determinable, and collectability of the receivable is deemed to be probable.

Fees charged to customers for post-contract Technical Support are recognized ratably over the term of the contract. Costs related to maintenance obligations are expensed as incurred.

The Company's revenues generated through hosting solutions are recognized using the proportional performance method. Revenues are recognized in the month services are rendered and earned under service agreements with clients where service fees are fixed or determinable. Contracts can be terminated with 90 days written notice. All services provided by the Company through the date of cancellation are due and payable under the contract terms.

The Company believes its revenue recognition policies are appropriate, in all circumstances, and that its policies are reflective of complexities arising from customer arrangements involving such features as maintenance, warranty agreements, license agreements, and other normal course of business arrangements.

Capitalization of Software Development The Company capitalizes software development costs when technological feasibility has been established for the software in accordance with ASC 985-20, "Costs of software to be sold, leased, or marketed". Such capitalized costs are amortized on a product-by-product basis over their economic life or the ratio of current revenues to current and anticipated revenues from such software, whichever provides the greater amortization. The Company periodically reviews the carrying value of capitalized software development costs and impairments are recognized in the results of operations when the expected future undiscounted operating cash flow derived from the capitalized software is less than its carrying value. Should the Company inaccurately determine when a product reaches technological feasibility or the economic life of a product, results could differ materially from those reported. Veramark uses what it believes are reasonable assumptions and where applicable, established valuation techniques in making its estimates.

Allowance for Doubtful Accounts The Company maintains allowances for doubtful accounts for estimated losses resulting from the potential inability of its customers to make required payments. Management specifically analyzes accounts receivable, historical bad debts, credit concentrations and customer payment terms when evaluating the adequacy of the allowance for doubtful accounts.

Table of Contents

Pension Liability The Company sponsors an unfunded Supplemental Executive Retirement Program (SERP), which is a nonqualified plan that provides certain employees a defined pension benefit. In order to properly record the net present value of future pension obligations a number of assumptions are required to be made by Company's management. These assumptions include years of service, life expectancies, and the determination of the proper long-term interest and liability discount rates to be applied to these future obligations.

Should the Company need to alter any of these assumptions, there is the potential for significant adjustments to projected pension liabilities.

During the fourth quarter of 2011, the Company retrospectively changed its method of accounting for pension and other postretirement benefits. Historically, the Company has recognized actuarial gains and losses as a component of equity in its consolidated balance sheets on an annual basis. These gains and losses were amortized into operating results generally over the following year. Veramark elected to immediately recognize actuarial gains and losses in its operating results in the year in which the gains and losses occur. This change is intended to improve the transparency of the Company's operational performance by recognizing the effects of current economic and interest rate trends on plan assumptions, during the year in which they occur. Accordingly, the financial data for all periods presented has been adjusted to reflect the effect of this accounting change.

Goodwill and Intangibles Goodwill represents the excess of the purchase price paid over the fair value of assets acquired. Goodwill is not amortized and as per ASC 350-20, is subject to an impairment test conducted on an annual basis, or more frequently if a change in circumstances or the occurrence of events indicates that potential impairment exists. Through March 31, 2013, there has been no impairment of goodwill associated with the Source Loop acquisition.

In determining whether it is necessary to impair intangible assets other than goodwill, the Company follows the guidance provided under ASC 360-10, *Property, Plant and Equipment*. The Company considers factors such as, but not limited to, estimated useful life, amortization policies, and legal regulations related to the intangible asset. No impairment charges were recorded in 2013 or 2012.

Item 3 Quantitative and Qualitative Disclosures About Market Risk

On October 29, 2010 the Company entered into an agreement with Manufacturers and Traders Trust Company to provide a three year term note in the amount of \$200,000, the proceeds of which were used to purchase furnishings and fixtures for the Company's new headquarters facility. The loan bears an interest rate of LIBOR plus 4.0%, with a minimum interest rate of 4.5%. At March 31, 2013, the remaining balance of the term loan was \$38,889.

Item 4 Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based upon an evaluation as of the end of the period covered by this report, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is (i) recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and (ii) accumulated and communicated to the Company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

Table of Contents

The Company's disclosure controls and procedures and internal controls over financial reporting provide reasonable, but not absolute, assurance that all deficiencies in design or operation of those control systems, or all instances of errors or fraud, will be prevented or detected. Those control systems are designed to provide reasonable assurance of achieving the goals of those systems in light of the Company's resources and nature of the Company's business operations. The Company's disclosure controls and procedures and internal control over financial reporting remain subject to risks of human error and the risk that controls can be circumvented for wrongful purposes by one or more individuals in management or non-management positions.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal controls over financial reporting, that occurred during the period covered by this report, that have materially affected, or are reasonably likely to materially affect the Company's internal controls over financial reporting.

PART II OTHER INFORMATION

Item 1 Legal Proceedings

On June 16, 2011 the Company entered into a Nonexclusive Patent License and settlement agreement relating to an action brought by Asentinel LLC, against Veramark, AnchorPoint a division of MTS, and CASS Information Systems, alleging infringement of two patents held by Asentinel concerning systems and methods for identifying and processing billing exceptions in telecommunications invoices.

Material terms of the agreement included:

Asentinel waived all claims for damages for prior infringement and agreed not to make claims for future infringement of its patents.

The Company agreed to pay Asentinel \$500,000. Of that amount \$250,000 was paid upon execution of the agreement and \$250,000 was paid on June 16, 2012.

The lawsuit was dismissed against the Company.

On May 7, 2013, in the Supreme Court of the State of New York, County of Nassau, Penelope Horn filed a class action complaint and demand for jury trial, index number 601167/2013 (the Complaint) against the Company, the Board of Directors, Varsity Acquisition LLC, and All Big Ten Holdings, Inc., (collectively the Defendants), in response to the aforementioned definitive merger agreement. The Complaint alleges, among other things, that the Defendants violated their fiduciary duties of candor, loyalty, due care, independence, good faith, and fair dealing and, in doing so, that they did not obtain adequate, fair and maximum consideration. We intend to vigorously defend against the allegations in this lawsuit. Given that this lawsuit is in its early stages, we are unable to predict the outcome or determine the potential impact, if any, that could result from its final resolution.

Item 1A Risk Factors

The following factors, among others discussed herein and in the Company's filings under the Act, could cause actual results and future events to differ materially from those set forth or contemplated in this report: economic, competitive, governmental and technological factors, increased operating costs, failure to obtain necessary financing, risks related to natural disasters and financial market fluctuations. Such factors also include:

If we cannot continue to enforce the intellectual property rights on which our business depends, or if third parties assert that we violate their intellectual property rights, then our business, financial condition and results of operations could be materially adversely affected.

Veramark regards its products as proprietary and attempts to protect them with a combination of copyright, trademark and trade secret protections, employee and third-party non-disclosure agreements and other methods of protection. Despite those precautions, it may be possible for unauthorized third parties to copy certain portions of Veramark's products, reverse engineer or obtain and use information that Veramark regards as proprietary. The laws of some foreign countries do not protect Veramark's proprietary rights to the same extent as the laws of the United States. Any misappropriation of Veramark's intellectual property could have a material adverse effect on its business and results of operations. Furthermore, although Veramark takes steps to prevent unlawful infringement of other's intellectual property, there can be no assurance that third parties will not assert infringement claims against Veramark in the future with respect to current or future products. Any such assertion could require Veramark to enter into royalty arrangements or result in costly litigation.

Table of Contents

We depend on continued relationships with existing customers and the loss of one or more major customer could have a material adverse effect on our business and results of operations.

We derive a significant portion of our revenues from multi-year Managed Service contracts with our existing customers. Our customers have no obligation to renew their Managed Service contracts. We expect to continue to depend upon these multi-year contracts with existing customers for a significant portion of our revenues and, as a result, our ability to maintain and grow revenue depends in large part on renewals by existing customers. The loss of a major customer or the delay, reduction or cancellation of a Managed Service contract by one or more major customers could adversely affect our operating results. We cannot provide any assurances that present or future large customers will not terminate, significantly delay, reduce or fail to renew their Managed Service contracts with us, any of which would reduce our revenues and may have a negative impact on our business, financial condition and results of operations.

If we cannot develop new products, services and technologies to address the constantly evolving needs of our customers, it could have a material adverse effect on our business and results of operations.

Due to the competitive nature of the industries and markets in which we compete, we must continually introduce new products, services and technologies, enhance existing products and services, and effectively stimulate customer demand for new and upgraded products. We have made significant investments in research, development and marketing for new products, services and technologies, such as our VeraSMART software offering and its hosted or managed solutions. The success of new product introductions depends on a number of factors including, but not limited to, timely and successful product development, market acceptance, our ability to manage the risks associated with new product production issues, the availability of products and services for appropriate costs to meet anticipated demands and the risk that new products may have quality or other defects in the early stages of introduction. Accordingly, we cannot determine in advance the ultimate effect of new product introductions and transitions. Significant revenue from new products and services may not be achieved for a number of years, if at all, and in the event new products or services are profitable, operating margins may not be as high as the margins we have historically achieved.

The process of developing new products and services is complex, costly, time-consuming and uncertain, and any failure by us to anticipate customers' changing needs and emerging trends accurately could harm our market share and/or results of operations. Additionally, significant delays in new product releases or significant issues in the creation of new products, in particular any delays or significant issues regarding the VeraSMART suite of products and services, could adversely affect our business and results of operations.

A sudden decrease in demand for our solutions would likely have a material adverse effect on our business and results of operations.

If overall market demands for software and computer devices generally, as well as call accounting software or enterprise level products and services specifically, declines, or corporate spending for such products declines, Veramark's revenue could be adversely affected. Additionally, Veramark's revenues could be unfavorably impacted if customers reduce their purchases of new software products or upgrades to existing products.

Table of Contents

We operate in highly competitive markets and an inability to compete effectively may have a negative effect on our results of operations.

Veramark experiences intense competition across all markets for its products and services. Some competing firms have greater name recognition and more financial, marketing and technological resources than Veramark. These competitive pressures may result in decreased sales volumes, price reductions, and/or increased operating costs, such as for marketing and sales incentives, resulting in lower revenues, gross margins and operating income.

We rely on pre-existing relationships with companies as part of our marketing and distribution strategy; our business, financial condition and results of operations may be materially adversely affected if we are unable to maintain these relationships.

Veramark's marketing and distribution strategy is founded on building mutually beneficial relationships with companies that have established distribution networks. Some sell privately labeled, customized products developed and manufactured by Veramark to their specific specifications, while others resell Veramark's products. Any loss of the continued availability of those relationships could have a material adverse effect on Veramark's business and results of operations.

Security and privacy breaches in our systems may damage client relations and inhibit our growth

The uninterrupted operation of our hosted solutions and our ability to preserve the confidentiality of third party information that resides on our systems, are critical to our business. We have what we believe to be sufficient security safeguards in place to prevent major interruptions in service and to prevent unauthorized access. Any failure in our security and privacy measures could have a material adverse impact on our financial position and results of operations.

We depend on our key employees and senior management team and the loss of the services of one or more of our key employees or members of our senior management team could harm our business.

Veramark's delivery of quality products and services requires the experience and knowledge of our staff. The loss of key employees could hinder our ability to deliver services, possibly resulting in loss of customers or loss of revenue. Any loss of key employees could have a material adverse effect on Veramark's business and results of operations.

Our inability to raise additional capital on acceptable terms could have a negative impact on our business.

We may need access to additional capital in the future and may not be able to obtain debt or equity financing on favorable terms, or at all. Furthermore, if we are able to obtain equity financing, it could result in significant dilution of current ownership interests and a decline in the per-share value of our common stock. If we are able to obtain debt financing, it may be under terms that restrict our ability to incur additional indebtedness and/or maintain certain liquidity or other ratios, which could restrict our ability to raise additional capital in the future. If we require additional capital but are unable to raise it on acceptable terms, we may not be able to maintain a competitive software product, hire or retain experienced employees, fund growth in our operations or fund the acquisition of complementary products or businesses, which could have a material adverse effect on our business and results of operations.

Table of Contents

A failure of our information technology systems could materially adversely affect our business.

A failure or prolonged interruption in our information technology systems that compromises our ability to meet our customers' needs, or impairs our ability to record, process and report accurate information to the SEC could have a material adverse effect on our financial condition.

If we are unable to continue to access our customers' communications billing and usage data from communications carriers, the value of our solutions could be impaired.

Some of the features of the solutions that we offer depend on our ability to obtain certain communications billing and usage data from our customers' communications carriers. If one or more communications carriers were to prohibit their customers from providing us with this information, it could impair the functionality of our products and services, which would reduce the value of our solutions. Such impairment could impact our ability to compete, increase our expenses and reduce our sales, any of which would have an adverse effect on our results of operations.

Performance problems with our software may harm our reputation and market share, and result in significant costs to us.

Our solution utilizes complex software products that may contain undetected defects and errors that could cause our software to stop functioning, function improperly or not function at a level that meets our customers' expectations. Such performance problems could damage our reputation among our customers and in the market, which could result in the loss of future sales or the loss of current customers and, accordingly, the loss of market share. Further, our customers use our solution for integral parts of their businesses and any performance problems with our software could therefore damage our customers' businesses. Whether or not we are responsible for such performance problems, we may be required to spend significant resources in defense of any such claims, and could potentially pay significant fees, settlements or damages, which would have an adverse effect on our business and results of operations.

Item 4 Mine Safety Disclosures

Not Applicable.

Item 5 Other Information

None
