**The information in this prospectus is not complete and may be changed. No person may sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.**

**SUBJECT TO COMPLETION, DATED SEPTEMBER 6, 2013**

**PROSPECTUS**

**656,998 Shares**

**Common Stock**

This prospectus relates to the possible resale of up to 656,998 shares of common stock of Wheeler Real Estate Investment Trust, Inc. that may be offered and sold from time to time by the selling stockholders named in this prospectus. For information on the selling stockholders, please see the section entitled "Selling Stockholders" beginning on page 23 of this prospectus.

We are registering the applicable shares of our common stock to provide the selling stockholders with freely tradable securities. Such shares of our common stock will be issued to the selling stockholders upon conversion of shares of our Series A Preferred Stock ( "Series A Stock" ). The registration of the shares of our common stock covered by this prospectus does not necessarily mean that any shares of our common stock will be sold by the selling stockholders.

We will not receive any proceeds from the sale of the shares of common stock covered by this prospectus. We will pay the expenses of registering the shares of common stock to be sold in this offering under the Securities Act of 1933, as amended (the "Securities Act" ).

Our common stock trades on the Nasdaq Capital Market under the symbol "WHLR". On September 5, 2013, the last reported sale price of our common stock on the Nasdaq Capital Market was \$4.30 per share.

**CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS**

This prospectus contains forward-looking statements, including discussion and analysis of our financial condition, anticipated capital expenditures required to complete projects, amounts of anticipated cash distributions to our shareholders in the future and other matters. These forward-looking statements are not historical facts but are the intent, belief or current expectations of our management based on its knowledge and understanding of our business and industry. Forward-looking statements are typically identified by the use of terms such as may, will, should, potential, predicts, anticipates, expects, intends, plans, believes, seeks, estimates, or the negative of variations of these words and similar expressions. These statements are not guarantees of future performance and are subject to risks, uncertainties and other factors, some of which are beyond our control, are difficult to predict and could cause actual results to differ materially from those expressed or forecasted in the forward-looking statements.

Forward-looking statements that were true at the time made may ultimately prove to be incorrect or false. You are cautioned to not place undue reliance on forward-looking statements, which reflect our management's view only as of the date of prospectus. We undertake no obligation to update or revise forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results. Factors that could cause actual results to differ materially from any forward-looking statements made in this prospectus include:

the imposition of federal taxes if we fail to qualify as a real estate investment trust ( REIT ) in any taxable year or forego an opportunity to ensure REIT status;

uncertainties related to the national economy, the real estate industry in general and in our specific markets;

legislative or regulatory changes, including changes to laws governing REITs;

adverse economic or real estate developments in Virginia, Florida, Georgia, South Carolina, Tennessee, North Carolina or Oklahoma;

increases in interest rates and operating costs;

inability to obtain necessary outside financing;

litigation risks;

lease-up risks;

inability to obtain new tenants upon the expiration of existing leases;

inability to generate sufficient cash flows due to market conditions, competition, uninsured losses, changes in tax or other applicable laws; and

the need to fund tenant improvements or other capital expenditures out of operating cash flow.

These forward-looking statements should be read in light of these factors.

**Table of Contents**

**WHEELER REAL ESTATE INVESTMENT TRUST, INC.**

*Unless the context otherwise requires or indicates, references to the company , we , our or us refers to Wheeler Real Estate Investment Trust, Inc., a Maryland corporation, together with its consolidated subsidiaries, including Wheeler REIT, L.P., a Virginia limited partnership of which we are the sole general partner (the Operating Partnership ).*

We are a Maryland corporation formed with the principal objective of acquiring, financing, developing, leasing, owning and managing income producing assets such as strip centers, neighborhood centers, grocery-anchored centers, community centers and free-standing retail properties. Our strategy is to opportunistically acquire and reinvigorate well-located, potentially dominant retail properties in secondary and tertiary markets that generate attractive risk-adjusted returns. We target competitively protected properties in communities that have stable demographics and have historically exhibited favorable trends, such as strong population and income growth. We generally lease our properties to national and regional retailers that offer consumer goods and generate regular consumer traffic. We believe our tenants carry goods that are less impacted by fluctuations in the broader U.S. economy and consumers disposable income, generating more predictable property-level cash flows.

We currently own a portfolio consisting of twelve properties including seven retail shopping centers, four free-standing retail properties, and one office property, totaling 545,350 net rentable square feet of which approximately 95.1% were leased as of June 30, 2013.

We believe the current market environment creates a substantial number of favorable investment opportunities with attractive yields on investment and significant upside potential. We believe the markets we plan to pursue in the Mid-Atlantic, Southeast and Southwest have strong demographics and dynamic, diversified economies that will continue to generate jobs and future demand for commercial real estate. We anticipate that the depth and breadth of our real estate experience allows us to capitalize on revenue-enhancing opportunities in our portfolio and source and execute new acquisition and development opportunities in our markets, while maintaining stable cash flows throughout various business and economic cycles.

Jon S. Wheeler, our Chairman and Chief Executive Officer, has 31 years of experience in the real estate sector with particular experience in strategic financial and market analyses and assessments of new or existing properties to maximize returns. We have an integrated team of professionals with experience across all stages of the real estate investment cycle.

We were organized as a Maryland corporation on June 23, 2011 and intend to elect to be taxed as a REIT beginning with our taxable year ending December 31, 2012. We conduct substantially all of our business through our Operating Partnership. We are structured as an umbrella partnership real estate investment trust ( UPREIT ), which means that we will own most of our properties through our Operating Partnership and its subsidiaries. As an UPREIT, we may be able to acquire properties on more attractive terms from sellers who can defer tax obligations by contributing properties to our Operating Partnership in exchange for Operating Partnership units, which will be redeemable for cash or exchangeable for shares of our common stock at our election.

WHLR Management, LLC (our Administrative Service Company ), which is wholly owned by Mr. Wheeler, provides administrative services to our company. Pursuant to the terms of an administrative services agreement between our Administrative Service Company and us, our Administrative Service Company is responsible for identifying targeted real estate investments; handling the disposition of the real estate investments our board of directors has chosen to sell; and administering our day-to-day business operations, including but not limited to, leasing duties, property management, payroll and accounting functions. We also benefit from Mr. Wheeler s partially or wholly owned related

business and platform that specializes in retail real estate investment and management. Mr. Wheeler's organization includes (i) Wheeler Interests, LLC, an acquisition and asset management firm, (ii) Wheeler Real Estate, LLC, a real estate leasing management and administration firm, (iii) Wheeler Development, LLC, a full service real estate development firm, (iv) Wheeler Capital, LLC, a capital investment firm specializing in venture capital, financing, and small business loans, (v) Site Applications, LLC, a full service facility company equipped to handle all levels of building maintenance and (vi) TESR, LLC, a tenant coordination company specializing in tenant relations and community events. Our headquarters is located at Riversedge North, 2529 Virginia Beach Boulevard, Suite 200, Virginia Beach, Virginia 23452. Our telephone number is (757) 627-9088. Our website is located at [www.WHLR.us](http://www.WHLR.us). Our Internet website and the information contained therein or connected thereto do not constitute a part of this prospectus or any amendment or supplement hereto.

Our consolidated financial statements include the accounts of the company and the Operating Partnership. We control the Operating Partnership through our sole general partnership interest and conduct substantially all our business through the Operating Partnership.

**Table of Contents**

**THE OFFERING**

This prospectus relates to the resale of up to 656,998 shares of our common stock that may be offered and sold from time to time by the selling stockholders named in this prospectus.

**RISK FACTORS**

*Investing in our common stock involves risks. In addition to other information contained in this prospectus, you should carefully consider the following factors before acquiring shares of our common stock offered by this prospectus. The occurrence of any of the following risks could materially and adversely affect our business, prospects, financial condition, results of operations and our ability to make cash distributions to our stockholders, which could cause you to lose all or a part of your investment in our common stock. Some statements in this prospectus, including statements in the following risk factors, constitute forward-looking statements. Please refer to the section entitled *Forward-Looking Statements*.*

**Risks Related to Our Business and Operations**

***We have a limited operating history as a REIT and a publicly traded company. We have limited financing sources, and we may not be able to successfully operate as a REIT or a publicly traded company.***

We have a limited operating history as a REIT and a publicly traded company. We cannot assure you that the past experience of Mr. Wheeler and the management teams of our Services Companies will be sufficient to successfully operate our company as a REIT or a publicly traded company, including the requirements to timely meet disclosure requirements of the Securities and Exchange Commission ( SEC ), and comply with the Sarbanes-Oxley Act of 2002 and REIT requirements imposed by the Internal Revenue Code of 1986, as amended (the Code ). Failure to operate successfully as a public company or maintain our qualification as a REIT would have an adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock. See Risks Related to Our Status as a REIT Failure to qualify as a REIT would have significant adverse consequences to us and the value of our common stock.

Additionally, we have limited financing sources. If our capital resources are insufficient to support our operations, we will not be successful. You should consider our prospects in light of the risks, uncertainties and difficulties frequently encountered by companies that are, like us, in their early stage of development. To be successful in this market, we must, among other things:

identify and acquire additional investments that further our investment strategies;

increase awareness of our REIT within the investment products market;

attract, integrate, motivate and retain qualified personnel to manage our day-to-day operations;

respond to competition for our targeted real estate properties and other investments as well as for potential investors; and

continue to build and expand our operations structure to support our business.

We cannot guarantee that we will succeed in achieving these goals, and our failure to do so could cause you to lose all or a portion of your investment.

***Our portfolio of properties is dependent upon regional and local economic conditions and is geographically concentrated in the Mid-Atlantic, Southeast and Southwest, which may cause us to be more susceptible to adverse developments in those markets than if we owned a more geographically diverse portfolio.***

Our properties are located in Virginia, North Carolina, Florida, Georgia, South Carolina and Oklahoma, which exposes us to greater economic risks than if we owned a more geographically diverse portfolio. Our Riversedge North property, which houses our company's offices and the offices of our Administrative Service Company, comprises 5.3% of the total annualized base rent of the properties in our portfolio. As of June 30, 2013, our current properties in Virginia represented approximately 51.1% of the total annualized base rent of the properties in our portfolio. As a result, we are particularly susceptible to adverse economic or other conditions in this market (such as periods of economic slowdown or recession, business layoffs or downsizing, industry slowdowns, relocations of businesses, increases in real estate and other taxes and the cost of complying with governmental regulations or increased regulation). If there is a downturn in the economy in our markets, our operations and our revenue and cash available for distribution, including cash available to pay distributions to our stockholders, could be materially adversely affected. We cannot assure you that our

## **Table of Contents**

markets will grow or that underlying real estate fundamentals will be favorable to owners and operators of retail properties. Our operations may also be affected if competing properties are built in our markets. Moreover, submarkets within any of our markets may be dependent upon a limited number of industries. Any adverse economic or real estate developments in the Mid-Atlantic, Southeast or Southwest markets, or any decrease in demand for retail space resulting from the regulatory environment, business climate or energy or fiscal problems, could adversely impact our financial condition, results of operations, cash flow, our ability to satisfy our debt service obligations and our ability to pay distributions to our stockholders.

***As of June 30, 2013 we had approximately \$39.9 million of indebtedness outstanding, which may expose us to the risk of default under our debt obligations.***

As of June 30, 2013, our total indebtedness was approximately \$39.9 million, a substantial portion of which is guaranteed by our Operating Partnership, and we may incur additional debt to finance future acquisition and development activities.

Payments of principal and interest on borrowings may leave us with insufficient cash resources to operate our properties or to pay the dividends currently contemplated or necessary to maintain our REIT qualification. Our level of debt and the limitations imposed on us by our debt agreements could have significant adverse consequences, including the following:

our cash flow may be insufficient to meet our required principal and interest payments;

we may be unable to borrow additional funds as needed or on favorable terms, which could, among other things, adversely affect our ability to meet operational needs;

we may be unable to refinance our indebtedness at maturity or the refinancing terms may be less favorable than the terms of our original indebtedness;

we may be forced to dispose of one or more of our properties, possibly on unfavorable terms or in violation of certain covenants to which we may be subject;

we may violate financial covenants in our loan documents, which would entitle the lenders to accelerate our debt obligations; and

our default under any loan with cross default provisions could result in a default on other indebtedness.

If any one of these events were to occur, our financial condition, results of operations, cash flow and per share trading price of our common stock could be adversely affected. Furthermore, foreclosures could create taxable income without accompanying cash proceeds, which could hinder our ability to meet the REIT distribution requirements imposed by Internal Revenue Code of 1986, as amended (the Code).

***The majority of our properties are retail shopping centers and depend on anchor stores or major tenants to attract shoppers and could be adversely affected by the loss of, or a store closure by, one or more of these tenants.***

Our properties typically are anchored by large, regionally or nationally recognized tenants. At any time, our tenants may experience a downturn in their business that may significantly weaken their financial condition. As a result, our tenants, including our anchor and other major tenants, may fail to comply with their contractual obligations to us, seek concessions in order to continue operations or declare bankruptcy, any of which could result in the termination of such

tenants' leases and the loss of rental income attributable to the terminated leases. In addition, certain of our tenants may cease operations while continuing to pay rent, which could decrease customer traffic, thereby decreasing sales for our other tenants at the applicable retail property. In addition to these potential effects of a business downturn, mergers or consolidations among large retail establishments could result in the closure of existing stores or duplicate or geographically overlapping store locations, which could include stores at our retail properties.

Loss of, or a store closure by, an anchor or major tenant could significantly reduce our occupancy level or the rent we receive from our retail properties, and we may not have the right to re-lease vacated space or we may be unable to re-lease vacated space at attractive rents or at all. Moreover, in the event of default by a major tenant or anchor store, we may experience delays and costs in enforcing our rights as landlord to recover amounts due to us under the terms of our agreements with those parties. The occurrence of any of the situations described above, particularly if it involves an anchor tenant with leases in multiple locations, could seriously harm our performance and could adversely affect the value of the applicable retail property.

## **Table of Contents**

***Some of the leases at our retail properties contain co-tenancy or go-dark provisions, which, if triggered, may allow tenants to pay reduced rent, cease operations or terminate their leases, any of which could adversely affect our performance or the value of the applicable retail property.***

Some of the leases at our retail properties contain co-tenancy provisions that condition a tenant's obligation to remain open, the amount of rent payable by the tenant or the tenant's obligation to continue occupancy on certain conditions, including: (1) the presence of a certain anchor tenant or tenants; (2) the continued operation of an anchor tenant's store; and (3) minimum occupancy levels at the applicable retail property. If a co-tenancy provision is triggered by a failure of any of these or other applicable conditions, a tenant could have the right to cease operations, to terminate its lease early or to a reduction of its rent. In periods of prolonged economic decline, there is a higher than normal risk that co-tenancy provisions will be triggered as there is a higher risk of tenants closing stores or terminating leases during these periods. In addition to these co-tenancy provisions, certain of the leases at our retail properties contain go-dark provisions that allow the tenant to cease operations while continuing to pay rent. This could result in decreased customer traffic at the applicable retail property, thereby decreasing sales for our other tenants at that property, which may result in our other tenants being unable to pay their minimum rents or expense recovery charges. These provisions also may result in lower rental revenue generated under the applicable leases. To the extent co-tenancy or go-dark provisions in our retail leases result in lower revenue or tenant sales or tenants' rights to terminate their leases early or to a reduction of their rent, our performance or the value of the applicable retail property could be adversely affected.

***We may be unable to renew leases, lease vacant space or re-let space as leases expire, thereby increasing or prolonging vacancies, which could adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock.***

As of June 30, 2013, leases representing approximately 6.6% of the square footage and approximately 6.7% of the annualized base rent of the properties in our portfolio will expire in the remainder of 2013, and an additional 4.9% of the square footage of the properties in our portfolio was available. We cannot assure you that leases will be renewed or that our properties will be re-let at net effective rental rates equal to or above the current average net effective rental rates or that substantial rent abatements, tenant improvements, early termination rights or below-market renewal options will not be offered to attract new tenants or retain existing tenants. If the rental rates for our properties decrease, our existing tenants do not renew their leases or we do not re-let a significant portion of our available space and space for which leases will expire, our financial condition, results of operations, cash flow and per share trading price of our common stock could be adversely affected.

***We may be unable to identify and complete acquisitions of properties that meet our criteria, which may impede our growth and ability to pay dividends as expected.***

Our business strategy involves the acquisition of income producing assets such as strip centers, neighborhood centers, grocery-anchored centers, community centers and free-standing retail properties. These activities require us to identify suitable acquisition candidates or investment opportunities that meet our criteria and are compatible with our growth strategies. We continue to evaluate the market of available properties and may attempt to acquire properties when strategic opportunities exist. However, we may be unable to acquire properties identified as potential acquisition opportunities. Our ability to acquire properties on favorable terms, or at all, may be exposed to the following significant risks:

we may incur significant costs and divert management attention in connection with evaluating and negotiating potential acquisitions, including ones that we are subsequently unable to complete;

even if we enter into agreements for the acquisition of properties, these agreements are subject to conditions to closing, which we may be unable to satisfy; and

we may be unable to finance the acquisition on favorable terms or at all.

If we are unable to finance property acquisitions or acquire properties on favorable terms, or at all, our financial condition, results of operations, cash flow and per share trading price of our common stock could be adversely affected. In addition, failure to identify or complete acquisitions of suitable properties could slow our growth and hinder our ability to pay dividends as expected.

***We face significant competition for acquisitions of real properties, which may reduce the number of acquisition opportunities available to us and increase the costs of these acquisitions.***

The current market for acquisitions continues to be extremely competitive. This competition may increase the demand for the types of properties in which we typically invest and, therefore, reduce the number of suitable acquisition opportunities available to us and increase the prices paid for such acquisition properties. We also face significant competition for attractive acquisition

## **Table of Contents**

opportunities from an indeterminate number of investors, including publicly traded and privately held REITs, private equity investors and institutional investment funds, some of which have greater financial resources than we do, a greater ability to borrow funds to acquire properties and the ability to accept more risk than we can prudently manage, including risks with respect to the geographic proximity of investments and the payment of higher acquisition prices. This competition will increase if investments in real estate become more attractive relative to other forms of investment. Competition for investments may reduce the number of suitable investment opportunities available to us and may have the effect of increasing prices paid for such acquisition properties and/or reducing the rents we can charge and, as a result, adversely affecting our operating results.

***Our future acquisitions may not yield the returns we expect, and we may otherwise be unable to operate these properties to meet our financial expectations, which could adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock.***

Our future acquisitions and our ability to successfully operate the properties we acquire in such acquisitions may be exposed to the following significant risks:

even if we are able to acquire a desired property, competition from other potential acquirers may significantly increase the purchase price;

we may acquire properties that are not accretive to our results upon acquisition, and we may not successfully manage and lease those properties to meet our expectations;

our cash flow may be insufficient to meet our required principal and interest payments;

we may spend more than budgeted amounts to make necessary improvements or renovations to acquired properties;

we may be unable to quickly and efficiently integrate new acquisitions, particularly acquisitions of portfolios of properties, into our existing operations, and as a result our results of operations and financial condition could be adversely affected;

market conditions may result in higher than expected vacancy rates and lower than expected rental rates; and

we may acquire properties subject to liabilities and without any recourse, or with only limited recourse, with respect to unknown liabilities such as liabilities for clean-up of undisclosed environmental contamination, claims by tenants, vendors or other persons dealing with the former owners of the properties, liabilities incurred in the ordinary course of business and claims for indemnification by general partners, directors, officers and others indemnified by the former owners of the properties.

If we cannot operate acquired properties to meet our financial expectations, our financial condition, results of operations, cash flow and per share trading price of our common stock could be adversely affected.

***We may not be able to control our operating costs or our expenses may remain constant or increase, even if our revenues do not increase, causing our results of operations to be adversely affected.***

Factors that may adversely affect our ability to control operating costs include the need to pay for insurance and other operating costs, including real estate taxes, which could increase over time, the need periodically to repair, renovate and re-lease space, the cost of compliance with governmental regulation, including zoning, environmental and tax laws, the potential for liability under applicable laws, interest rate levels and the availability of financing. If our

operating costs increase as a result of any of the foregoing factors, our results of operations may be adversely affected.

The expense of owning and operating a property is not necessarily reduced when circumstances such as market factors and competition cause a reduction in income from the property. As a result, if revenues decline, we may not be able to reduce our expenses accordingly. Costs associated with real estate investments, such as real estate taxes, insurance, loan payments and maintenance, generally will not be reduced even if a property is not fully occupied or other circumstances cause our revenues to decrease. If we are unable to decrease operating costs when demand for our properties decreases and our revenues decline, our financial condition, results of operations and our ability to make distributions to our stockholders may be adversely affected.

***High mortgage rates and/or unavailability of mortgage debt may make it difficult for us to finance or refinance properties, which could reduce the number of properties we can acquire, our net income and the amount of cash distributions we can make.***

If mortgage debt is unavailable at reasonable rates, we may not be able to finance the purchase of properties. If we place mortgage debt on properties, we may be unable to refinance the properties when the loans become due, or to refinance on favorable terms. If interest rates are higher when we refinance our properties, our income could be reduced. If any of these events occur, our cash flow could be reduced. This, in turn, could reduce cash available for distribution to our stockholders and may hinder our ability to raise more capital by issuing more stock or by borrowing more money.

## **Table of Contents**

### ***Mortgage debt obligations expose us to the possibility of foreclosure, which could result in the loss of our investment in a property or group of properties subject to mortgage debt.***

Incurring mortgage and other secured debt obligations increases our risk of property losses because defaults on indebtedness secured by properties may result in foreclosure actions initiated by lenders and ultimately our loss of the property securing any loans for which we are in default. Any foreclosure on a mortgaged property or group of properties could adversely affect the overall value of our portfolio of properties. For tax purposes, a foreclosure on any of our properties that is subject to a nonrecourse mortgage loan would be treated as a sale of the property for a purchase price equal to the outstanding balance of the debt secured by the mortgage. If the outstanding balance of the debt secured by the mortgage exceeds our tax basis in the property, we would recognize taxable income on foreclosure, but would not receive any cash proceeds, which could hinder our ability to meet the REIT distribution requirements imposed by the Code.

### ***Failure to hedge effectively against interest rate changes may adversely affect financial condition, results of operations, cash flow and per share trading price of our common stock.***

Subject to maintaining our qualification as a REIT, we may enter into hedging transactions to protect us from the effects of interest rate fluctuations on floating rate debt. Our hedging transactions may include entering into interest rate cap agreements or interest rate swap agreements. These agreements involve risks, such as the risk that such arrangements would not be effective in reducing our exposure to interest rate changes or that a court could rule that such an agreement is not legally enforceable. In addition, interest rate hedging can be expensive, particularly during periods of rising and volatile interest rates. Hedging could reduce the overall returns on our investments. Failure to hedge effectively against interest rate changes could materially adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock. In addition, while such agreements would be intended to lessen the impact of rising interest rates on us, they could also expose us to the risk that the other parties to the agreements would not perform, we could incur significant costs associated with the settlement of the agreements or that the underlying transactions could fail to qualify as highly-effective cash flow hedges under generally accepted accounting principles in the United States of America.

### ***Adverse economic and geopolitical conditions and dislocations in the credit markets could have a material adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock.***

Our business may be affected by market and economic challenges experienced by the U.S. economy or real estate industry as a whole, including the recent dislocations in the credit markets and general global economic downturn. These conditions, or similar conditions existing in the future, may adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock as a result of the following potential consequences, among others:

decreased demand for retail space, which would cause market rental rates and property values to be negatively impacted;

reduced values of our properties may limit our ability to dispose of assets at attractive prices or to obtain debt financing secured by our properties and may reduce the availability of unsecured loans; and

our ability to obtain financing on terms and conditions that we find acceptable, or at all, may be limited, which could reduce our ability to pursue acquisition and development opportunities and refinance existing debt, reduce our returns from our acquisition and development activities and increase our future interest expense.

In addition, the economic downturn has adversely affected, and may continue to adversely affect, the businesses of many of our tenants. As a result, we may see increases in bankruptcies of our tenants and increased defaults by tenants, and we may experience higher vacancy rates and delays in re-leasing vacant space, which could negatively impact our business and results of operations.

**Table of Contents**

***We are subject to risks that affect the general retail environment, such as weakness in the economy, the level of consumer spending, the adverse financial condition of large retailing companies and competition from discount and internet retailers, any of which could adversely affect market rents for retail space and the willingness or ability of retailers to lease space in our shopping centers.***

With the exception of our Riversedge North property, which houses our company's offices and the offices of our Administrative Service Company, all of our properties are in the retail real estate market. This means that we are subject to factors that affect the retail sector generally, as well as the market for retail space. The retail environment and the market for retail space have been, and could continue to be, adversely affected by weakness in the national, regional and local economies, the level of consumer spending and consumer confidence, the adverse financial condition of some large retailing companies, the ongoing consolidation in the retail sector, the excess amount of retail space in a number of markets and increasing competition from discount retailers, outlet malls, internet retailers and other online businesses. Increases in consumer spending via the internet may significantly affect our retail tenants ability to generate sales in their stores. In addition, some of our retail tenants face competition from the expanding market for digital content and hardware. New and enhanced technologies, including new digital technologies and new web services technologies, may increase competition for certain of our retail tenants.

Any of the foregoing factors could adversely affect the financial condition of our tenants and the willingness of retailers to lease space in our shopping centers. In turn, these conditions could negatively affect market rents for retail space and could materially and adversely affect our financial condition, results of operations, cash flow, the trading price of our common shares and our ability to satisfy our debt service obligations and to pay distributions to our stockholders.

***We face significant competition in the leasing market, which may decrease or prevent increases of the occupancy and rental rates of our properties.***

We compete with numerous developers, owners and operators of real estate, many of which own properties similar to ours in the same submarkets in which our properties are located. If our competitors offer space at rental rates below current market rates, or below the rental rates we currently charge our tenants, we may lose existing or potential tenants and we may be pressured to reduce our rental rates below those we currently charge or to offer more substantial rent abatements, tenant improvements, early termination rights or below-market renewal options in order to retain tenants when our tenants' leases expire. As a result, our financial condition, results of operations, cash flow and per share trading price of our common stock could be adversely affected.

***We may be required to make rent or other concessions and/or significant capital expenditures to improve our properties in order to retain and attract tenants, causing our financial condition, results of operations, cash flow and per share trading price of our common stock to be adversely affected.***

To the extent adverse economic conditions continue in the real estate market and demand for retail space falls, we expect that, upon expiration of leases at our properties, we may be required to make rent or other concessions to tenants, accommodate requests for renovations, build-to-suit remodeling and other improvements or provide additional services to our tenants. As a result, we may have to make significant capital or other expenditures in order to retain tenants whose leases expire and to attract new tenants in sufficient numbers. Additionally, we may need to raise capital to make such expenditures. If we are unable to do so or capital is otherwise unavailable, we may be unable to make the required expenditures. This could result in non-renewals by tenants upon expiration of their leases, which could cause an adverse effect to our financial condition, results of operations, cash flow and per share trading price of our common stock.

***The actual rents we receive for the properties in our portfolio may be less than our asking rents, which could negatively impact our ability to generate cash flow growth.***

As a result of various factors, including competitive pricing pressure in our submarkets, adverse conditions in the Mid-Atlantic, Southeast and Southwest real estate markets, a general economic downturn and the desirability of our properties compared to other properties in our submarkets, we may be unable to realize the asking rents across the properties in our portfolio. In addition, the degree of discrepancy between our asking rents and the actual rents we are able to obtain may vary both from property to property and among different leased spaces within a single property. If we are unable to obtain rental rates that are on average comparable to our asking rents across our portfolio, then our ability to generate cash flow growth will be negatively impacted. In addition, depending on asking rental rates at any given time as compared to expiring leases in our portfolio, from time to time rental rates for expiring leases may be higher than starting rental rates for new leases.

**Table of Contents**

***We may acquire properties or portfolios of properties through tax deferred contribution transactions, which could result in stockholder dilution and limit our ability to sell such assets.***

In the future we may acquire properties or portfolios of properties through tax deferred contribution transactions in exchange for partnership interests in our Operating Partnership, which may result in stockholder dilution. This acquisition structure may have the effect of, among other things, reducing the amount of tax depreciation we could deduct over the tax life of the acquired properties, and may require that we agree to protect the contributors' ability to defer recognition of taxable gain through restrictions on our ability to dispose of the acquired properties and/or the allocation of partnership debt to the contributors to maintain their tax bases. These restrictions could limit our ability to sell an asset at a time, or on terms, that would be favorable absent such restrictions.

***Our real estate development activities are subject to risks particular to development, such as unanticipated expenses, delays and other contingencies, any of which could adversely affect our financial condition, results of operations, cash flow and the per share trading price of our common stock.***

We may engage in development and redevelopment activities with respect to certain of our properties. To the extent that we do so, we will be subject to the following risks associated with such development and redevelopment activities:

unsuccessful development or redevelopment opportunities could result in direct expenses to us;

construction or redevelopment costs of a project may exceed original estimates, possibly making the project less profitable than originally estimated, or unprofitable;

time required to complete the construction or redevelopment of a project or to lease up the completed project may be greater than originally anticipated, thereby adversely affecting our cash flow and liquidity;

contractor and subcontractor disputes, strikes, labor disputes or supply disruptions;

failure to achieve expected occupancy and/or rent levels within the projected time frame, if at all;

delays with respect to obtaining or the inability to obtain necessary zoning, occupancy, land use and other governmental permits, and changes in zoning and land use laws;

occupancy rates and rents of a completed project may not be sufficient to make the project profitable;

our ability to dispose of properties developed or redeveloped with the intent to sell could be impacted by the ability of prospective buyers to obtain financing given the current state of the credit markets; and

the availability and pricing of financing to fund our development activities on favorable terms or at all.

These risks could result in substantial unanticipated delays or expenses and, under certain circumstances, could prevent completion of development or redevelopment activities once undertaken, any of which could have an adverse effect on our financial condition, results of operations, cash flow and the per share trading price of our common stock.

***Our success depends on key personnel whose continued service is not guaranteed, and the loss of one or more of our key personnel could adversely affect our ability to manage our business and to implement our growth strategies, or could create a negative perception in the capital markets.***

Our ability to manage anticipated future growth depends, in large part, upon the efforts of key personnel, particularly Mr. Wheeler, who has experience with the market, beneficial relationships and exercises substantial influence over our operational, financing, acquisition and disposition activity. Among the reasons that Mr. Wheeler is important to our success is that he has a national and regional industry reputation that attracts business and investment opportunities and assists us in negotiations with lenders, existing and potential tenants and industry personnel. If we lose his services, our relationships with such personnel could diminish.

The loss of services of one or more members of our management team, or our inability to attract and retain highly qualified personnel, could adversely affect our business, diminish our investment opportunities and weaken our relationships with lenders, business partners, existing and prospective tenants and industry participants, which could adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock.

**Table of Contents**

***Mr. Wheeler will continue to be involved in outside businesses, which may interfere with his ability to devote time and attention to our business and affairs.***

We will rely on Mr. Wheeler and our Administrative Service Company for the day-to-day operations of our business. Our employment agreement with Mr. Wheeler requires him to devote his best efforts and a significant portion of his time to our business and affairs. Following the date hereof, however, Mr. Wheeler will continue to serve as President and CEO of Wheeler Interests, LLC which will continue to be involved in other businesses. As such, Mr. Wheeler will have certain ongoing duties to Wheeler Interests, LLC that could require a portion of his time and attention. Although we expect that Mr. Wheeler will devote a significant amount of his business time and attention to us, we cannot accurately predict the amount of time and attention that will be required of Mr. Wheeler to perform such ongoing duties. To the extent that Mr. Wheeler is required to dedicate time and attention to Wheeler Interests, LLC, his ability to devote a significant amount of his business time and attention to our business and affairs may be limited and could adversely affect our operations.

***We may be subject to on-going or future litigation, including existing claims relating to the entities that own the properties described in this prospectus and otherwise in the ordinary course of business, which could have a material adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock.***

We may be subject to on-going litigation, including existing claims relating to the entities that own the properties and operate the businesses described in this prospectus and otherwise in the ordinary course of business. Some of these claims may result in significant defense costs and potentially significant judgments against us, some of which are not, or cannot be, insured against. We generally intend to vigorously defend ourselves; however, we cannot be certain of the ultimate outcomes of currently asserted claims or of those that may arise in the future. Resolution of these types of matters against us may result in our having to pay significant fines, judgments, or settlements, which, if uninsured, or if the fines, judgments, and settlements exceed insured levels, could adversely impact our earnings and cash flows, thereby having an adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock. Certain litigation or the resolution of certain litigation may affect the availability or cost of some of our insurance coverage, which could adversely impact our results of operations and cash flows, expose us to increased risks that would be uninsured, and/or adversely impact our ability to attract officers and directors.

On July 10, 2008, one of our subsidiaries, Perimeter Associates, LLC ( Perimeter ), sued a tenant for breach of contract, guaranty of the contract and fraud related to an executed lease. In response, on August 22, 2008, the defendant filed a counterclaim against Perimeter for breach of contract, unjust enrichment, reliance and fraud. On April 8, 2013, the court found in favor of the defendant and assessed damages against Perimeter in the amount of \$13,300. On or about May 8, 2013, Perimeter appealed the judgment of the lower court to the Oklahoma Supreme Court. Subsequent to the initial judgment, the defendant's attorney applied to the court to be reimbursed for approximately \$368,000 in legal fees incurred by the defendant during litigation. On July 9, 2013, the lower court awarded the defendant approximately \$267,000 of the defendant's legal fees. Perimeter expects to amend its appeal with the Oklahoma Supreme Court to include the issue of the award of legal fees. We have posted bonds for both judgments and have accrued for the judgments in our financial statements as of June 30, 2013. We will continue to vigorously litigate the issues raised upon appeal.

***We may not be able to rebuild our existing properties to their existing specifications if we experience a substantial or comprehensive loss of such properties.***

In the event that we experience a substantial or comprehensive loss of one of our properties, we may not be able to rebuild such property to its existing specifications. Further, reconstruction or improvement of such a property would

likely require significant upgrades to meet zoning and building code requirements. Environmental and legal restrictions could also restrict the rebuilding of our properties.

***Because Mr. Wheeler and our Administrative Service Company are not prohibited from creating further real estate programs that may use investment strategies that are similar to ours, our Administrative Service Company and its and our executive officers may face conflicts of interest relating to the purchase and leasing of properties and other investments, and such conflicts may not be resolved in our favor.***

If Mr. Wheeler or our Administrative Service Company were to create additional real estate programs, there may be periods during which one or more such sponsored programs are seeking to invest in similar properties and other real estate-related investments. As a result, we may be buying properties and other real estate-related investments at the same time as one or more other such sponsored programs managed by officers and employees of our Administrative Service Company, and these other such sponsored programs may use investment strategies that are similar to ours. There is a risk that our Administrative Service Company

## **Table of Contents**

will choose a property that provides lower returns to us than a property purchased by another program. In the event these conflicts arise, we cannot assure you that our best interests will be met when officers and employees acting on behalf of our Administrative Service Company and on behalf of other such sponsored programs decide whether to allocate any particular property to us or to another such sponsored program or affiliate of our Administrative Service Company or Mr. Wheeler, which may have an investment strategy that is similar to ours. In addition, we may acquire properties in geographic areas where such future sponsored programs own properties. If one of the other such sponsored programs attracts a tenant that we are competing for, we could suffer a loss of revenue due to delays in locating another suitable tenant. You will not have the opportunity to evaluate the manner in which these conflicts of interest are resolved before or after making your investment.

***Our Administrative Service Company will face conflicts of interest caused by its arrangements with us, which could result in actions that are not in the long-term best interests of our stockholders.***

Our Administrative Service Company is entitled to fees from us under the terms of the Administrative Service Agreement. Our Administrative Service Company is wholly owned by Mr. Wheeler. As a result, we did not have the benefit of arm's length negotiation of the type normally conducted between unrelated parties when this agreement was negotiated. These fees could influence our Administrative Service Company's advice to us as well as the judgment of the Services Companies performing services for us. Among other matters, these compensation arrangements could affect their judgment with respect to:

the continuation, renewal or enforcement of the Administrative Service Agreement;

property acquisitions from third parties, which entitle our Administrative Service Company to asset management fees; and

borrowings to acquire properties, which acquisitions will increase the aggregate fees payable to our Administrative Service Company.

***Joint venture investments could be adversely affected by our lack of sole decision-making authority, our reliance on co-venturers' financial condition and disputes between us and our co-venturers.***

We may co-invest in the future with other third parties through partnerships, joint ventures or other entities, acquiring non-controlling interests in or sharing responsibility for managing the affairs of a property, partnership, joint venture or other entity. Consequently, with respect to any such arrangement we may enter into in the future, we would not be in a position to exercise sole decision-making authority regarding the property, partnership, joint venture or other entity. Investments in partnerships, joint ventures or other entities may, under certain circumstances, involve risks not present were a third party not involved, including the possibility that partners or co-venturers might become bankrupt or fail to fund their share of required capital contributions. Partners or co-venturers may have economic or other business interests or goals which are inconsistent with our business interests or goals, and may be in a position to take actions contrary to our policies or objectives, and they may have competing interests in our markets that could create conflict of interest issues. Such investments may also have the potential risk of impasses on decisions, such as a sale, because neither we nor the partner or co-venturer would have full control over the partnership or joint venture. In addition, a sale or transfer by us to a third party of our interests in the joint venture may be subject to consent rights or rights of first refusal, in favor of our joint venture partners, which would in each case restrict our ability to dispose of our interest in the joint venture. Where we are a limited partner or non-managing member in any partnership or limited liability company, if such entity takes or expects to take actions that could jeopardize our status as a REIT or require us to pay tax, we may be forced to dispose of our interest in such entity. Disputes between us and partners or co-venturers may result in litigation or arbitration that would increase our expenses and prevent our officers and/or

directors from focusing their time and effort on our business. Consequently, actions by or disputes with partners or co-venturers might result in subjecting properties owned by the partnership or joint venture to additional risk. In addition, we may in certain circumstances be liable for the actions of our third-party partners or co-venturers. Our joint ventures may be subject to debt and, in the current volatile credit market, the refinancing of such debt may require equity capital calls.

***Our growth depends on external sources of capital that are outside of our control and may not be available to us on commercially reasonable terms or at all, which could limit our ability, among other things, to meet our capital and operating needs or make the cash distributions to our stockholders necessary to maintain our qualification as a REIT.***

In order to maintain our qualification as a REIT, we are required under the Code, among other things, to distribute annually at least 90% of our REIT taxable income, determined without regard to the dividends paid deduction and excluding any net capital gain. In addition, we will be subject to income tax at regular corporate rates to the extent that we distribute less than 100% of our REIT taxable income, including any net capital gains. Because of these distribution requirements, we may not be able to fund future capital needs, including any necessary acquisition financing, from operating cash flow. Consequently, we intend to rely on third-party sources to fund our capital needs. We may not be able to obtain such financing on favorable terms or at all and any additional debt we incur will increase our leverage and likelihood of default. Our access to third-party sources of capital depends, in part, on:

general market conditions;

**Table of Contents**

the market's perception of our growth potential;

our current debt levels;

our current and expected future earnings;

our cash flow and cash distributions; and

the market price per share of our common stock.

Recently, the capital markets have been subject to significant disruptions. If we cannot obtain capital from third-party sources, we may not be able to acquire or develop properties when strategic opportunities exist, meet the capital and operating needs of our existing properties, satisfy our debt service obligations or make the cash distributions to our stockholders necessary to maintain our qualification as a REIT.

***Our estimated cash available for distribution is insufficient to cover our anticipated annual dividend of \$0.42 per share and distributions paid from sources other than our cash flow from operations will result in us having fewer funds available for the acquisition of properties, which may adversely affect our ability to fund future distributions with cash flow from operations and may adversely affect your overall return.***

We currently declare a monthly distribution on our shares of common stock at an annual rate of \$0.42 per share. This rate represents approximately 922% of our estimated cash available for distribution based on our pro forma operating results for the twelve months ended June 30, 2014. Therefore, we expect that our operating cash flow will be insufficient to cover our anticipated initial monthly distributions to stockholders for the twelve months ending June 30, 2014, and thereafter.

***Some of our distributions may include a return of capital for federal income tax purposes.***

Some of our distributions may include a return of capital. To the extent that we decide to make distributions in excess of our current and accumulated earnings and profits, such distributions would generally be considered a return of capital for federal income tax purposes to the extent of the holder's adjusted tax basis in its shares, and thereafter as gain on a sale or exchange of such shares. See Material U.S. Federal Income Tax Considerations.

***The market price and trading volume of our common stock may be volatile.***

The per share trading price of our common stock may be volatile. In addition, the trading volume in our common stock may fluctuate and cause significant price variations to occur. We cannot assure you that the per share trading price of our common stock will not fluctuate or decline significantly in the future.

Some of the factors that could negatively affect our share price or result in fluctuations in the price or trading volume of our common stock include:

actual or anticipated variations in our quarterly operating results or monthly dividends;

changes in our funds from operations or earnings estimates;

publication of research reports about us or the real estate industry;

increases in market interest rates that lead purchasers of our shares to demand a higher yield;

changes in market valuations of similar companies;

adverse market reaction to any additional debt we incur in the future;

additions or departures of key management personnel;

actions by institutional stockholders;

speculation in the press or investment community;

the realization of any of the other risk factors presented in this prospectus;

the extent of investor interest in our securities;

**Table of Contents**

the general reputation of REITs and the attractiveness of our equity securities in comparison to other equity securities, including securities issued by other real estate-based companies;

our underlying asset value;

investor confidence in the stock and bond markets, generally;

changes in tax laws;

future equity issuances;

failure to meet earnings estimates;

failure to meet and maintain REIT qualifications;

changes in our credit ratings; and

general market and economic conditions.

In the past, securities class action litigation has often been instituted against companies following periods of volatility in the price of their common stock. This type of litigation could result in substantial costs and divert our management attention and resources, which could have an adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock.

***Increases in market interest rates may have an adverse effect on the value of our common stock as prospective purchasers of our common stock may expect a higher dividend yield and as an increased cost of borrowing may decrease our funds available for distribution.***

One of the factors that will influence the price of our common stock will be the dividend yield on the common stock (as a percentage of the price of our common stock) relative to market interest rates. An increase in market interest rates, which are currently at low levels relative to historical rates, may lead prospective purchasers of our common stock to expect a higher dividend yield and higher interest rates would likely increase our borrowing costs and potentially decrease funds available for distribution. Thus, higher market interest rates could cause the market price of our common stock to decrease.

***The issuance of substantial numbers of shares of our common stock in the public market, or upon exchange of common units, or the perception that such issuances might occur could adversely affect the per share trading price of the shares of our common stock.***

The exchange of common units for common stock or the vesting of any restricted stock granted to certain directors, executive officers and other employees under our 2012 Share Incentive Plan, the issuance of our common stock or common units in connection with future property, portfolio or business acquisitions and other issuances of our common stock could have an adverse effect on the per share trading price of our common stock, and the existence of units, options or shares of our common stock issuable under our 2012 Share Incentive Plan or upon exchange of common units may adversely affect the terms upon which we may be able to obtain additional capital through the sale of equity securities. In addition, future issuances of shares of our common stock may be dilutive to existing stockholders.

***Future offerings of debt or equity securities, which would be senior to our common stock upon liquidation, and/or preferred equity securities which may be senior to our common stock for purposes of dividend distributions or upon liquidation, may adversely affect the per share trading price of our common stock.***

In the future, we may attempt to increase our capital resources by making additional offerings of debt or equity securities (or causing our Operating Partnership to issue debt securities), including medium-term notes, senior or subordinated notes and classes or series of preferred stock. Upon liquidation, holders of our debt securities and shares of preferred stock and lenders with respect to other borrowings will be entitled to receive our available assets prior to distribution to the holders of our common stock. Additionally, any convertible or exchangeable securities that we issue in the future may have rights, preferences and privileges more favorable than those of our common stock and may result in dilution to owners of our common stock. Holders of our common stock are not entitled to preemptive rights or other protections against dilution. Our preferred stock, if issued, could have a preference on liquidating distributions or a preference on dividend payments that could limit our ability pay dividends to the holders of our common stock. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Thus, our stockholders bear the risk of our future offerings.

## Table of Contents

### **Risks Related to the Real Estate Industry**

*Our performance and value are subject to risks associated with real estate assets and the real estate industry, including local oversupply, reduction in demand or adverse changes in financial conditions of buyers, sellers and tenants of properties, which could decrease revenues or increase costs, which would adversely affect our financial condition, results of operations, cash flow and the per share trading price of our common stock.*

Our ability to pay expected dividends to our stockholders depends on our ability to complete future acquisitions as well as our ability to generate revenues in excess of expenses, scheduled principal payments on debt and capital expenditure requirements. Events and conditions generally applicable to owners and operators of real property that are beyond our control may decrease cash available for distribution and the value of our properties. These events include many of the risks set forth above under Risks Related to Our Business and Operations, as well as the following:

local oversupply or reduction in demand for retail space;

adverse changes in financial conditions of buyers, sellers and tenants of properties;

vacancies or our inability to rent space on favorable terms, including possible market pressures to offer tenants rent abatements, tenant improvements, early termination rights or below-market renewal options, and the need to periodically repair, renovate and re-let space;

increased operating costs, including insurance premiums, utilities, real estate taxes and state and local taxes;

civil unrest, acts of war, terrorist attacks and natural disasters, including earthquakes and floods, which may result in uninsured or underinsured losses;

decreases in the underlying value of our real estate;

changing submarket demographics; and

changing traffic patterns.

In addition, periods of economic downturn or recession, rising interest rates or declining demand for real estate, or the public perception that any of these events may occur, could result in a general decline in rents or an increased incidence of defaults under existing leases, which would adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock.

*Illiquidity of real estate investments could significantly impede our ability to respond to adverse changes in the performance of our properties and harm our financial condition.*

The real estate investments made, and to be made, by us are relatively difficult to sell quickly. As a result, our ability to promptly sell one or more properties in our portfolio in response to changing economic, financial and investment conditions is limited. Return of capital and realization of gains, if any, from an investment generally will occur upon disposition or refinancing of the underlying property. We may be unable to realize our investment objectives by sale, other disposition or refinancing at attractive prices within any given period of time or may otherwise be unable to complete any exit strategy. In particular, our ability to dispose of one or more properties within a specific time period is subject to weakness in or even the lack of an established market for a property, changes in the financial condition or prospects of prospective purchasers, changes in national or international economic conditions, such as the current

economic downturn, and changes in laws, regulations or fiscal policies of jurisdictions in which the property is located.

In addition, the Code imposes restrictions on a REIT's ability to dispose of properties that are not applicable to other types of real estate companies. In particular, the tax laws applicable to REITs effectively require that we hold our properties for investment, rather than primarily for sale in the ordinary course of business, which may cause us to forego or defer sales of properties that otherwise would be in our best interest. Therefore, we may not be able to vary our portfolio in response to economic or other conditions promptly or on favorable terms, which may adversely affect our financial condition, results of operations, cash flow and per share trading price of our common stock.

**Table of Contents**

***Our property taxes could increase due to property tax rate changes or reassessment, which would adversely impact our cash flows.***

Even if we qualify as a REIT for federal income tax purposes, we will be required to pay some state and local taxes on our properties. The real property taxes on our properties may increase as property tax rates change or as our properties are assessed or reassessed by taxing authorities. The amount of property taxes we pay in the future may increase substantially from what we have paid in the past. If the property taxes we pay increase, our cash flow would be adversely impacted, and our ability to pay any expected dividends to our stockholders could be adversely affected.

***As an owner of real estate, we could incur significant costs and liabilities related to environmental matters.***

Under various federal, state and local laws and regulations relating to the environment, as a current or former owner or operator of real property, we may be liable for costs and damages resulting from the presence or discharge of hazardous or toxic substances, waste or petroleum products at, on, in, under or migrating from such property, including costs to investigate, clean up such contamination and liability for harm to natural resources. Such laws often impose liability without regard to whether the owner or operator knew of, or was responsible for, the presence of such contamination, and the liability may be joint and several. These liabilities could be substantial and the cost of any required remediation, removal, fines or other costs could exceed the value of the property and/or our aggregate assets. In addition, the presence of contamination or the failure to remediate contamination at our properties may expose us to third-party liability for costs of remediation and/or personal or property damage or materially adversely affect our ability to sell, lease or develop our properties or to borrow using the properties as collateral. In addition, environmental laws may create liens on contaminated sites in favor of the government for damages and costs it incurs to address such contamination. Moreover, if contamination is discovered on our properties, environmental laws may impose restrictions on the manner in which property may be used or businesses may be operated, and these restrictions may require substantial expenditures.

Additionally, we possess Phase I Environmental Site Assessments for all of the properties in our portfolio. However, the assessments are limited in scope (e.g., they do not generally include soil sampling, subsurface investigations, hazardous materials surveys or lead-based paint inspections or asbestos inspections) and may have failed to identify all environmental conditions or concerns. Furthermore, the Phase I Environmental Site Assessment reports for all of the properties in our portfolio are limited to the information available to the licensed site professional at the time of the investigation, and, as such, may not disclose all potential or existing environmental contamination liabilities at the properties in our portfolio arising after the date of such investigation. As a result, we could potentially incur material liability for these issues, which could adversely impact our financial condition, results of operations, cash flow and the per share trading price of our common stock. Some of the Phase I Environmental Site Assessments in our possession indicate the possibility of lead-based paint and asbestos containing materials located on and within buildings on some of our properties and polychlorinated biphenyl-containing electrical transformers located or adjacent to some of our properties.

As the owner of the buildings on our properties, we could face liability for the presence of hazardous materials (e.g., asbestos or lead) or other adverse conditions (e.g., poor indoor air quality) in our buildings. Environmental laws govern the presence, maintenance, and removal of hazardous materials in buildings, and if we do not comply with such laws, we could face fines for such noncompliance. Also, we could be liable to third parties (e.g., occupants of the buildings) for damages related to exposure to hazardous materials or adverse conditions in our buildings, and we could incur material expenses with respect to abatement or remediation of hazardous materials or other adverse conditions in our buildings. In addition, some of our tenants routinely handle and use hazardous or regulated substances and wastes as part of their operations at our properties, which are subject to regulation. Such environmental and health and safety laws and regulations could subject us or our tenants to liability resulting from these activities.

Environmental liabilities could affect a tenant's ability to make rental payments to us, and changes in laws could increase the potential liability for noncompliance. This may result in significant unanticipated expenditures or may otherwise materially and adversely affect our operations, or those of our tenants, which could in turn have an adverse effect on us.

We cannot assure you that costs or liabilities incurred as a result of environmental issues will not affect our ability to make distributions to you or that such costs or other remedial measures will not have an adverse effect on our financial condition, results of operations, cash flow and per share trading price of our common stock. If we do incur material environmental liabilities in the future, we may face significant remediation costs, and we may find it difficult to sell any affected properties.

***Our properties may contain or develop harmful mold or suffer from other air quality issues, which could lead to liability for adverse health effects and costs of remediation.***

When excessive moisture accumulates in buildings or on building materials, mold growth may occur, particularly if the moisture problem remains undiscovered or is not addressed over a period of time. Some molds may prod
