Form 6-K  
March 26, 2014

**FORM 6-K**

**SECURITIES AND EXCHANGE COMMISSION**

**Washington, D.C. 20549**

**Report of Foreign Private Issuer**

**Pursuant to Rule 13a-16 or 15d-16 of**

**the Securities Exchange Act of 1934**

**For the month of March 2014**

**CGG**

**Tour Maine Montparnasse - 33 Avenue du Maine BP 191 - 75755 PARIS CEDEX 15**

**(address of principal executive offices)**

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F  Form 40-F

Edgar Filing: CGG - Form 6-K

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes  No

If  Yes is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): 82

## **CGG and Baker Hughes Sign Exclusive Long-term RoqSCAN**

### **Agreement as part of Shale Science Alliance**

*Paris, France 26 March 2014*

CGG (NYSE/Euronext: CGG) announced today that it has signed an exclusive agreement with Baker Hughes Incorporated (NYSE: BHI) for RoqSCAN™ technology offered by CGG.

RoqSCAN is a real-time, fully portable, quantitative and automated rock properties and mineralogical analyzer. Developed by Robertson, a CGG company, and Carl Zeiss Microscopy Ltd., RoqSCAN delivers highly quantitative compositional and textural mineralogical data from drilling cuttings or core pieces, revealing the mineralogical DNA of the reservoir. This service can be provided at the wellsite during drilling operations, or later in core stores, field offices and laboratories.

Baker Hughes will include RoqSCAN in its shale reservoir evaluation services as part of the Shale Science Alliance with CGG. The agreement further strengthens the strategic relationship between the two companies, which is designed to help operators better understand shale plays and predict sweet spots based on the combination of seismic attributes and accurate wellbore measurements.

RoqSCAN is the latest addition to a suite of reservoir characterization services offered by Baker Hughes, said Derek Mathieson, Vice President, Strategy and Corporate Development for Baker Hughes. The data provided by RoqSCAN significantly improves the real-time evaluation of laterals, thereby allowing operators to deploy more efficient and effective completion strategies.

RoqSCAN acts as an innovative bridge, delivering important geologic information to our integrated geoscience offering with Baker Hughes and providing a ground truth for our predictive reservoir models. It allows us to properly characterize the geological factors behind the sweet spots and optimize the completion design and fracturing to maximize production and reduce costs in these capital-intensive shale play operations. This exclusive agreement strengthens our ties with Baker Hughes and offers an exciting opportunity to demonstrate the value of RoqSCAN and the benefits of our Shale Science Alliance to the industry, said Sophie Zurquiyah, Senior Executive Vice President of CGG's Geology, Geophysics & Reservoir Division (GGR).

### **About CGG**

*CGG ([www.cgg.com](http://www.cgg.com)) is a fully integrated Geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry. Through its three complementary business divisions of Equipment, Acquisition and Geology, Geophysics & Reservoir (GGR), CGG brings value across all aspects of natural resource exploration and exploitation. CGG employs over 9,800 people around the world, all with a Passion for Geoscience and working together to deliver the best solutions to its customers.*

*CGG is listed on the Euronext Paris SA (ISIN: 0000120164) and the New York Stock Exchange (in the form of American Depositary Shares. NYSE: CGG).*

### **About Baker Hughes**

*Baker Hughes is a leading supplier of oilfield services, products, technology and systems to the worldwide oil and natural gas industry. The company's 59,000-plus employees today work in more than 80 countries helping customers find, evaluate, drill, produce, transport and process hydrocarbon resources.
