Fair Value Hierarchy as of Period End

Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a fair value hierarchy consisting of three broad levels for financial reporting purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including Trusts own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The significant unobservable inputs used by the Global Valuation Committee in determining the price for Fair Valued Investments are typically categorized as level 3.

Changes in valuation techniques may result in transfers into or out of an assigned level within the hierarchy. In accordance with the Trust spolicy, transfers between different levels of the fair value hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investments and derivative financial instruments and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and derivative financial instruments, refer to the Trust s most recent financial statements as contained in its annual report.

As of August 31, 2015, the Trust used significant observable inputs in determining the value of certain investments. As of November 30, 2015, the Trust used unobservable inputs in determining the value of the same investments. As a result, investments with a beginning of period value of \$11,467,664 transferred from Level 2 to Level 3 in the disclosure hierarchy.

² Included in the related net change in unrealized appreciation/depreciation.

Any difference between net change in unrealized appreciation/depreciation and net change in unrealized appreciation/depreciation on investments held as of November 30, 2015 is generally due to investments no longer held or categorized as Level 3 at period end.

The Trust s investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information could results in a significantly lower or higher value of such Level 3 instruments.

The following table summarizes the valuation techniques used and unobservable inputs utilized by the BlackRock Global Valuation Methodologies Committee (the Global Valuation Committee) to determine the value of certain of the Trust s Level 3 investments as of period end. The table does not include Level 3 investments with values derived based upon unadjusted third party pricing information in the amount of \$55,899,751.

- Increase in unobservable input may result in a significant increase to value, while a decrease in the unobservable input may result in a significant decrease to value.
- ² Amount is stated in millions.
- 3 Present value of estimated future oil and gas revenues, net of estimated direct expenses discounted at an annual discount rate of 10%.
- ⁴ For the period ended November 30, 2015, the valuation technique for a certain investment classified as Corporate Bonds changed to Last Transaction Price. The investment was previously valued utilizing an income approach. Transaction Price was considered to be a more relevant measure of fair value for this investment which leverages the most recent market transactions.
- Decrease in unobservable input may result in a significant increase to value, while an increase in the unobservable input may result in a significant decrease to value.
