CITIGROUP INC
Form 10-K
February 26, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2009

Commission file number 1-9924

Citigroup Inc.

(Exact name of registrant as specified in its charter)

Delaware (State or other jurisdiction of incorporation or organization)	52-1568099 (I.R.S. Employer Identification No.)
399 Park Avenue, New York, NY (Address of principal executive offices)	10043 (Zip code)

Registrant's telephone number, including area code: (212) 559-1000

Securities registered pursuant to Section 12(b) of the Act: See Exhibit 99.02

Securities registered pursuant to Section 12(g) of the Act: none

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. X Yes ¨ No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. ¨ Yes X No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. X Yes ¨ No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). X Yes ¨ No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. ¨

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

X Large accelerated filer	¨ Accelerated filer	¨ Non-accelerated filer (Do not check if a smaller reporting company)	¨ Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). ¨ Yes X No

The aggregate market value of Citigroup Inc. common stock held by non-affiliates of Citigroup Inc. on June 30, 2009 was approximately $16.3 billion.

Number of shares of common stock outstanding on January 31, 2010: 28,476,886,087

Documents Incorporated by Reference: Portions of the Registrant's Proxy Statement for the annual meeting of stockholders scheduled to be held on April 20, 2010, are incorporated by reference in this Form 10-K in response to Items 10, 11, 12, 13 and 14 of Part III.

10-K CROSS-REFERENCE INDEX

This Annual Report on Form 10-K incorporates the requirements of the accounting profession and the Securities and Exchange Commission, including a comprehensive explanation of 2009 results.

OVERVIEW

Citigroup's history dates back to the founding of Citibank in 1812. Citigroup's original corporate predecessor was incorporated in 1988 under the laws of the State of Delaware. Following a series of transactions over a number of years, Citigroup Inc. was formed in 1998 upon the merger of Citicorp and Travelers Group Inc.

Citigroup is now a global diversified financial services holding company whose businesses provide consumers, corporations, governments and institutions with a broad range of financial products and services. Citi has approximately 200 million customer accounts and does business in more than 140 countries.

Citigroup currently operates, for management reporting purposes, via two primary business segments: Citicorp, consisting of our Regional Consumer Banking businesses and Institutional Clients Group; and Citi Holdings, consisting of our Brokerage and Asset Management and Local Consumer Lending businesses, and a Special Asset Pool. There is also a third segment, Corporate/Other. For a further description of the business segments and the products and services they provide, see "Citigroup Segments" below, "Management's Discussion and Analysis of Financial Condition and Results of Operations" and Note 4 to the Consolidated Financial Statements.

Throughout this report, "Citigroup" and "Citi" refer to Citigroup Inc. and its consolidated subsidiaries.

As described above, Citigroup is managed pursuant to the following segments:

*Note: See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations—Citi Holdings” for a discussion of certain assets, totaling approximately $61 billion, that will be moved from Citi Holdings to Citicorp during the first quarter of 2010.

The following are the four regions in which Citigroup operates. The regional results are fully reflected in the segment results above.

(1) Asia includes Japan, Latin America includes Mexico, and North America comprises the U.S., Canada and Puerto Rico.

OVERVIEW (Continued)

On December 23, 2009, Citigroup repaid $20 billion of trust preferred securities held by the U.S. Treasury under the U.S. government's Troubled Asset Relief Program (TARP) and exited from the loss-sharing agreement, which covered a specified pool of assets, with the U.S. Treasury, FDIC and the Federal Reserve Bank of New York. In connection with the exiting from the loss-sharing agreement, $1.8 billion of the approximately $7.1 billion of additional trust preferred securities held by the U.S. Treasury and FDIC was cancelled. As a result of the repayment of TARP and the exit from the loss-sharing agreement, effective in 2010, Citi is no longer deemed to be a beneficiary of "exceptional financial assistance" under TARP.

Following these transactions, as of December 31, 2009 (i) the U.S. Treasury continued to hold approximately 7.7 billion shares, or approximately 27%, of Citi's common stock, (ii) the U.S. Treasury and FDIC continue to hold an aggregate of approximately $5.3 billion of Citi's trust preferred securities, and (iii) the U.S. Treasury continues to hold three warrants exercisable for an aggregate of approximately 465.1 million shares of Citi's common stock. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—Executive Summary—Repayment of TARP and Exit from Loss-Sharing Agreement; Common and Preferred Stock Activities" for additional information.

At December 31, 2009, Citi had approximately 265,300 full-time employees and 3,700 part-time employees. At December 31, 2008, Citi had approximately 322,800 full-time and 4,100 part-time employees.

Additional information about Citigroup is available on the company's Web site at www.citigroup.com. Citigroup's recent annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, as well as its other filings with the Securities and Exchange Commission (SEC) are available free of charge through the Web site by clicking on the "Investors" page and selecting "All SEC Filings." The SEC Web site also contains reports, proxy and information statements, and other information regarding Citi, at www.sec.gov.

Please see "Risk Factors" below for a discussion of certain risks and uncertainties that could materially impact Citigroup's financial condition and results of operations.

Certain reclassifications have been made to the prior periods' financial statements to conform to the current period's presentation.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

EXECUTIVE SUMMARY

Introduction

Citigroup is a global diversified financial services holding company whose businesses provide consumers, corporations, governments and institutions with a broad range of financial products and services, including consumer banking, credit cards, corporate and investment banking, securities brokerage and wealth management. Citigroup has approximately 200 million customer accounts and does business in more than 140 countries.

In response to the dramatic and profound changes in the market environment that became increasingly apparent through 2008, in early 2009, Citigroup decided to increase the focus on its core businesses and reorganized into three business segments for management and reporting purposes: Citicorp (Regional Consumer Banking and Institutional Clients Group); Citi Holdings (Brokerage and Asset Management, Local Consumer Lending, and Special Asset Pool); and Corporate/Other (Treasury, corporate expenses). Citi believes the realignment allows it to enhance the capabilities and performance of Citigroup's core assets, through Citicorp, as well as to tighten its focus on risk management and reduce and realize value from its non-core assets, through Citi Holdings.

Citigroup reported a net loss for 2009 of $1.6 billion, as compared to a $27.7 billion loss in 2008. Diluted EPS was a loss of $0.80 per share in 2009, versus a loss of $5.63 per share in 2008, and net revenue was $80.3 billion in 2009, versus $51.6 billion in 2008. Net interest revenue declined by $4.8 billion to $48.9 billion in 2009, generally as a result of lower average interest-earning assets, as the company continued its focus on de-risking its balance sheet and decreasing its total assets. Non-interest revenues improved by approximately $33.5 billion to $31.4 billion in 2009, primarily due to lower negative revenue marks in 2009. The decrease in net loss from year to year was primarily attributable to lower revenue marks in 2009 compared with 2008 (a pretax loss of $3.4 billion in 2009 versus a pretax loss of $38.5 billion in 2008), the $11.1 billion pretax Smith Barney gain on sale recorded in the second quarter of 2009 and a $1.4 billion pretax gain related to the exchange offers recognized in the third quarter of 2009. Partially offsetting these items were increasing credit loss provisions during the year and a $10.1 billion pretax loss associated with the repayment of TARP and the exit from the loss-sharing agreement with the U.S. government. Additionally, 2008 included a $9.6 billion pretax goodwill impairment, a $0.9 billion pretax impairment related to Nikko Asset Management, and $3.3 billion pretax of restructuring/repositioning charges. Continued strength of the core Citi franchise was demonstrated by strong revenues in Securities and Banking (S&B) (up 23% from 2008 levels, excluding credit value adjustments (CVA)) and continued stability in both the retail and institutional deposit bases. At December 31, 2009, total deposits were $836 billion, up 8% from December 31, 2008.

Despite very difficult market and economic conditions, Citicorp remained profitable with $14.8 billion in income from continuing operations in 2009 versus $6.2 billion in 2008, reflecting the strength of the underlying franchise, continued client focus, cost management and strengthened risk management. Citi Holdings recorded a loss of $8.2 billion in 2009 versus a $36.0 billion loss in 2008 as substantial reductions in negative revenue marks, cost cuts and the Smith Barney gain more than offset continued increases in credit costs within Local Consumer Lending. The gain related to the exchange offers and loss associated with TARP repayment and exiting the loss-sharing agreement was recorded in Corporate/Other.

Citigroup's 2009 financial results include the impact of 18 divestitures completed in 2009, including Smith Barney, Nikko Cordial Securities and Nikko Asset Management, and 19 divestitures completed in 2008, including Citi's German retail banking operations, CitiCapital and Redecard. These divestitures were completed in accordance with Citi's strategy of exiting non-core businesses, while optimizing value for shareholders.

Citi's effective tax rate on continuing operations in 2009 was 86%, versus 39% in 2008. The tax provision reflected a benefit arising from a higher proportion of income earned and indefinitely reinvested in countries with relatively lower tax rates, which accounted for 26 percentage points of the differential between the federal statutory tax rate and Citi's effective tax rate in 2009, as well as a higher proportion of income from tax-advantaged sources.

Repayment of TARP and Exit from Loss-Sharing Agreement; Common and Preferred Stock Activities

Background

In October and December 2008, Citigroup raised $25 billion and $20 billion, respectively, through the sale of preferred stock and warrants to purchase common stock to the U.S. Treasury as part of TARP. In January 2009, Citi issued approximately $7.1 billion of preferred stock to the U.S. Treasury and FDIC, as well as a warrant to purchase common stock to the U.S. Treasury, as consideration for the loss-sharing agreement with the U.S. Treasury, FDIC and the Federal Reserve Bank of New York covering a specified pool of Citigroup assets.

Pursuant to Citigroup's exchange offers consummated in July 2009, the $25 billion of TARP preferred stock issued to the U.S. Treasury in October 2008 was exchanged for approximately 7.7 billion shares of Citigroup common stock. At the same time, the $20 billion of TARP preferred stock issued to the U.S. Treasury in December 2008 and the approximately $7.1 billion of

preferred stock issued to the U.S. Treasury and FDIC as consideration for the loss-sharing agreement were exchanged for trust preferred securities. Prior to the exchange of the preferred stock held by the U.S. government pursuant to the exchange offers, Citigroup paid the U.S. government approximately $2.2 billion in preferred dividends on its investment in Citi, and has subsequently paid approximately $800 million in interest on the trust preferred securities issued pursuant to the exchange offers.

Repayment of TARP and Exit from loss-sharing agreement

On December 23, 2009, Citigroup repaid the $20 billion of TARP trust preferred securities held by the U.S. Treasury and exited the loss-sharing agreement. In connection with the exit of the loss-sharing agreement, $1.8 billion of the trust preferred securities held by the U.S. Treasury out of the approximately $7.1 billion of trust preferred securities issued in consideration for such agreement to the U.S. Treasury and FDIC was cancelled.

In connection with the repayment of TARP in December 2009, Citigroup raised an aggregate of approximately $20.3 billion in common equity. On December 22, 2009 Citigroup issued $17.0 billion of common stock, or approximately 5.4 billion shares, and $3.5 billion of tangible equity units (T-DECs) of which approximately $2.8 billion was recorded as common equity and $0.7 billion was recorded as long-term debt. On December 29, 2009, Citigroup raised an additional approximate $0.6 billion of common stock, or approximately 185 million shares, pursuant to exercise of the underwriters' overallotment option. In addition, in January 2010, Citigroup issued $1.7 billion of common stock equivalents to its employees in lieu of cash compensation they would have otherwise received. Subject to shareholder approval at Citi's annual shareholder meeting scheduled to be held on April 20, 2010, the common stock equivalents will be converted into common stock.

Following the repayment of TARP and exit from the loss-sharing agreement, as of December 31, 2009, the U.S. Treasury continues to hold approximately 7.7 billion shares, or approximately 27.0%, of Citi's common stock, not including the exercise of the warrants issued to the U.S. Treasury that remain outstanding, as described below. The U.S. Treasury has indicated that it intends to sell its holding in Citi common stock in 2010, subject to a 90-day lock-up period expiring on March 16, 2010. In addition, the U.S. Treasury and FDIC continue to hold an aggregate of approximately $5.3 billion of the trust preferred securities originally issued by Citi as consideration for the loss-sharing agreement.

As a result of Citi's repayment of the $20 billion of TARP trust preferred securities and the exit of the loss-sharing agreement, effective in 2010, Citi is no longer deemed to be a beneficiary of "exceptional financial assistance" under TARP.

Common stock warrants issued to the U.S. Treasury

The three warrants issued to the U.S. Treasury as part of TARP and the loss-sharing agreement remain outstanding as of December 31, 2009 following Citi's repayment of TARP and exit from the loss-sharing agreement.

Each of the warrants has a term of 10 years from the date of issuance. The warrant issued to the U.S. Treasury in October 2008 has an exercise price of $17.85 per share and is exercisable for approximately 210.1 million shares of common stock. The warrant issued to the U.S. Treasury in December 2008 has an exercise price of $10.61 per share and is exercisable for approximately 188.5 million shares of common stock. The warrant issued to the U.S. Treasury as part of the loss-sharing agreement in January 2009 also has an exercise price of $10.61 and is exercisable for approximately 66.5 million shares of common stock.

The following table summarizes Citigroup's issuances, exchanges and repayments of preferred and common stock and trust preferred securities during 2008 and 2009:

In millions of dollars, shares in millions		Preferred stock	Common stock and additional paid-in capital	Citigroup common stock outstanding
	Balance, December 31, 2007	$ —	$ 18,062	4,995
First quarter 2008	Issuance of $12.5 billion of convertible preferred stock in a private offering, $3.2 billion of convertible preferred stock in a public offering, and $3.7 billion of non-convertible preferred stock in public offerings	19,384	—	—

	Other activity (primarily employee benefit plans)	—	349	(16)
	Balance, end of period	$ 312	$ 79,032	22,864
Fourth quarter 2009	Issuance of new common equity and tangible equity units (T-DECs) pursuant to repayment of TARP and exiting of loss-sharing agreement	—	20,298	5,582
	Other activity (primarily employee benefit plans)	—	(902)	37
	Balance, December 31, 2009	$ 312	$ 98,428	28,483

(1) In addition to the U.S. government exchanges, pursuant to the exchange offers, private holders of approximately $12.5 billion aggregate liquidation value of Citi preferred stock exchanged such preferred stock for approximately 3.8 billion shares of Citi common stock. In addition, public holders of approximately $20.3 billion aggregate liquidation value of Citi preferred stock and trust preferred securities exchanged such securities for approximately 5.8 billion shares of Citi common stock.

9

Business Environment

The business environment for financial services firms continued to be challenging in 2009, particularly for firms with significant exposure to consumer credit. U.S. unemployment reached 10.1%, GDP continued to contract through the second quarter, housing markets remained weak, and personal and business bankruptcies increased. These factors drove substantial increases in credit costs across consumer and corporate portfolios. Credit spreads continued to widen earlier in the year, driving further declines in the value of credit-sensitive financial instruments. Equity markets were also very weak during early 2009. At its low point in March 2009, the S&P 500 had declined 55% from December 31, 2007 levels.

While these trends were negative for the economy and the financial services industry as a whole, they were accompanied by very high levels of volatility and wide spreads within fixed income markets during the first quarter of 2009, which provided substantial trading opportunities. As a result, fixed income capital markets businesses achieved high levels of revenue and profitability during the first quarter, offsetting some of the substantial credit losses incurred in consumer-oriented businesses, including mortgages and cards.

Beginning in late 2008, significant U.S. government actions were implemented to help stabilize the U.S. economy and restore confidence in the capital markets. The U.S. government had available over $700 billion to invest in financial institutions, including $45 billion in Citi, through TARP. In early 2009, a $787 billion stimulus bill was signed into law. A number of additional programs helped further stimulate demand in 2009, including the U.S. government's first-time home buyer credit programs. The U.S. government also directly supported the capital markets through various programs, including the Term Asset-Backed Securities Loan Facility (TALF) and the Temporary Liquidity Guarantee Program (TLGP), and through substantial direct purchases of mortgage-backed securities. These actions, combined with continued accommodative monetary policy on the part of the Federal Reserve Board, helped keep home mortgage rates near historic lows and worked to facilitate the continued flow of credit to consumers.

Late in 2009, some early positive economic signs were observed. U.S. GDP growth was positive in the third and fourth quarters. The S&P 500 finished the year up 23% from December 31, 2008, and up 67% from the trough level in March 2009, though still down 24% from December 31, 2007. Credit spreads, while still elevated, tightened significantly from peak levels in the early part of 2009. In the second half of the year, Citi began to observe some very early signs of stabilization and, in some areas, moderation in U.S. consumer credit trends as net credit losses declined sequentially during the third and fourth quarters, though remaining quite elevated. In addition,
improving economic and market trends led to relatively stronger advisory and equity underwriting volumes in the fourth quarter. On the other hand, lower levels of market volatility and volumes resulted in diminished trading opportunities, which led to significant sequential declines in S&B revenues in the second half of the year. In certain key markets in Asia and Latin America, improvement in the labor markets and overall economic recovery was earlier, and somewhat stronger, than that observed in the U.S. Citi observed improving credit trends in key markets including South Korea, Mexico, Australia, Singapore and India, driven by improving economic conditions as well as Citi's loss mitigation efforts. Further, while EMEA continued to be affected by a challenging economic environment, labor markets began to show some improvement, particularly in Russia and Turkey, and there were some early signs of financial stability returning to some of Citi's key markets in the region.

While some economic and market improvements were observed in late 2009, Citi remains cautious, particularly with respect to its North American businesses, as U.S. unemployment remains high at 10.0% as of December 31, 2009, and housing markets remain relatively weak. In addition, there remains significant uncertainty regarding the pace of economic recovery and the impact of the U.S. government's unwinding of its extensive economic and market supports, which may accelerate in 2010. See "2010 Business Outlook" below.

Citigroup's Actions in Response to Market Challenges

During 2009, Citigroup sought to respond to market challenges and the profound changes in the market environment—changes in funding markets, operating models and client needs—including:

Citi restructured into two primary operating segments—Citicorp and Citi Holdings.

As described above, Citicorp comprises Citi's core franchise, while Citi Holdings consists of non-core businesses and assets that Citi intends to exit as quickly as practicable while seeking to optimize value for shareholders.

Citigroup continued to reduce operating expenses and headcount.

Citi's ongoing operating expenses in the fourth quarter of 2009 totaled $12.3 billion, down from $15.1 billion (excluding the goodwill impairment charge) in the fourth quarter of 2008 and $15.7 billion in the fourth quarter of 2007. The decline in expenses was primarily driven by divestitures and re-engineering efforts. In addition, Citi reduced headcount by over 100,000 to approximately 265,000 at December 31, 2009, compared to 375,000 at peak levels in 2007.

Citigroup strengthened its balance sheet.

- Citi increased its common capital ratios.
  Citi significantly increased its Tier 1 Common and Tangible Common Equity (TCE) ratios during 2009, primarily as a result of its exchange offers completed in the third quarter of 2009. At December 31, 2009, Citi's Tier 1 Common ratio was 9.6% and its TCE ratio was 10.9%, compared to 2.3% and 3.1% at December 31, 2008, respectively. In addition, Citi's Tier 1 Capital ratio was 11.7% at December 31, 2009. Tier 1 Common and related ratios are measures used and relied on by U.S. banking regulators; however, Tier 1 Common, TCE and related ratios are non-GAAP financial measures for SEC purposes. See "Capital Resources and Liquidity—Capital Resources" for additional information on these measures.

- Citi improved its liquidity position.
  Citigroup lengthened the maturity structure of its liabilities, increased balances of cash and highly liquid securities, continued to grow its deposit base, raised substantial equity capital and reduced illiquid assets, primarily in Citi Holdings. As a result, structural liquidity (defined as deposits, long-term debt and equity as a percentage of total assets) grew to 73% as of December 31, 2009, compared to 66% at December 31, 2008 and 63% at December 31, 2007. Citigroup had $193 billion of cash and deposits with banks as of December 31, 2009. Citi currently anticipates issuing less than $15 billion of Citigroup-level long-term debt in 2010 (down from $85 billion in 2009) due to its current strong liquidity position and anticipated asset reductions within Citi Holdings.

- Citi continued to de-risk and decrease the amount of its total assets.
  Citi's total assets were approximately $1.86 trillion as of December 31,2009, down from approximately $1.94 trillion at December 31, 2008 and $2.19 trillion at December 31, 2007. Consistent with Citi's strategy, Citi Holdings now represents less than 30% of Citi's total assets as of December 31, 2009, compared to 41% at the start of 2008. While Citi made progress in de-risking and decreasing total assets, particularly in Citi Holdings, these actions, together with an expansion of the Company's loss mitigation efforts and declining yields in the trading book, resulted in a 9% reduction in net interest revenue in 2009 versus 2008 and a decrease in Citi's net interest margin (NIM) to 2.65% at December 31, 2009 compared to 3.26% at December 31, 2008.

Citigroup increased its allowance for loan losses.
During 2009, Citi added a net build of $8.0 billion to its allowance for loan losses. The allowance for loan losses was $36 billion at December 31, 2009, or 6.1% of loans, compared to $29.6 billion, or 4.3% of loans, at year-end 2008. With the adoption of SFAS 166 and 167 in the first quarter of 2010, loan loss reserves would have been $49.4 billion, or 6.6% of loans, each as of December 31, 2009 and based on current estimates. The consumer loan loss reserve was $28.4 billion at December 31, 2009, representing 14.1 months of concurrent charge-off coverage, versus 13.1 months at December 31, 2008.

Citi began to make selected investments in its core businesses.
Within Regional Consumer Banking, Citi began making selected investments in its core businesses in the latter part of 2009. For example, in Asia, Citi invested in new customer acquisition in the emerging affluent segment and in card usage promotion. In Latin America, Citi invested in card account acquisition, with a focus on higher-quality new accounts, consistent with portfolio repositioning objectives. Citigroup also continued to invest in consumer banking technology, for example, in banking products in markets such as Singapore, Hong Kong and South Korea, where mobile phones and mobile banking have intersected in ways not yet seen in the U.S. Within Transaction Services, Citi continued to invest in technology to support its global network, including its investor services suite of products, prepaid and commercial cards offerings and launch of a new front end online banking technology that provides a diverse set of functionality beyond traditional transaction management and reporting. These and similar investments have increased, and will likely continue to increase, Citi's operating expenses.

2010 BUSINESS OUTLOOK
While showing signs of improvement, the macroeconomic environment going into 2010 remains challenging, with U.S. unemployment still elevated. The U.S. government has indicated its intention to continue scaling back programs put in place to support the market during 2008 and 2009. The impact of the U.S. government's exit from many of these programs is a source of uncertainty in 2010, as is the future course of monetary policy. In addition, the potential impact of new laws and regulations (e.g., The Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act)), potential new capital standards, and other legislative and regulatory initiatives is a source of significant additional uncertainty regarding the business and market environment.

Citigroup is maintaining a cautious stance in light of this uncertain market environment and continued macroeconomic headwinds. As it enters 2010, Citi is focused on maintaining high levels of capital and liquidity, rigorous risk management practices and cost discipline. In Citi Holdings, Citi will continue to focus on reducing assets, which could result in lower revenues and operating expenses in 2010. In Citicorp, the focus will remain on serving the company's core institutional, corporate and retail client base in the U.S. and around the world. Citi will continue to focus on credit loss mitigation and expense control, and may continue to invest in areas such as Asia and Latin America, where economic recovery and growth appear to be taking hold. Operating expenses may grow modestly in Citicorp in 2010, as a portion of the cost reductions achieved in Citi Holdings is re-invested in the core franchise.

Credit costs will likely remain a significant driver of Citigroup's results in 2010, particularly inNorth America, where credit trends will largely depend on the broader macroeconomic environment, as well as the impact of industry factors such as CARD Act implementation and the outcome of the Home Affordable Modification Program (HAMP) and other loss mitigation efforts. See "Results of Operations—Citicorp—North America Regional Consumer Banking," "—Citi Holdings—Local Consumer Lending" and "Managing Global Risk—Credit Risk" for additional information. Citi expects U.S. consumer net credit losses to increase modestly in the first quarter of 2010 from fourth quarter 2009 levels, due in part to expected seasonal patterns, after which there may be some slight improvement. However, net credit losses in the second half of 2010 will be dependent on the macroeconomic environment and success of the company's ongoing loss mitigation efforts. Changes to Citigroup's consumer loan loss reserve balances will continue to reflect the losses embedded in Citi's consumer loan portfolio due to underlying credit trends as well as the impact of Citi's forbearance programs. Citi currently expects NIM to remain under pressure due to its enhanced liquidity position and ongoing de-risking of the balance sheet.

RESULTS OF OPERATIONS

FIVE-YEAR SUMMARY OF SELECTED FINANCIAL DATA

Citigroup Inc. and Consolidated Subsidiaries

(1) On January 1, 2009, Citigroup adopted SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (now ASC 810-10-45-15, Consolidation: Noncontrolling Interest in a Subsidiary), and FSP EITF 03- 6-1, “Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities” (now ASC 260-10-45-59A, Earnings Per Share: Participating Securities and the Two-Class Method). All prior periods have been restated to conform to the current period’s presentation.

(2) Discontinued operations for 2005 to 2009 reflect the sale of Nikko Cordial Securities to Sumitomo Mitsui Banking Corporation, the sale of Citigroup’s German retail banking operations to Crédit Mutuel, and the sale of CitiCapital’s equipment finance unit to General Electric. In addition, discontinued operations for 2005 and 2006 include the operations and associated gain on sale of substantially all of Citigroup’s asset management business, the majority of which closed on December 1, 2005. Discontinued operations from 2005 and 2006 also include the operations and associated gain on sale of Citigroup’s Travelers Life & Annuity, substantially all of Citigroup’s international insurance business and Citigroup’s Argentine pension business to MetLife Inc., which closed on July 1, 2005. See Note 3 to the Consolidated Financial Statements.

(3)

Accounting change of $(49) million in 2005 represents the adoption of Financial Accounting Standards Board (FASB) Interpretation No. 47, Accounting for Conditional Asset Retirement Obligations, an interpretation of SFAS No. 143 (FIN 47) (now ASC 410-20, Asset Retirement and Environmental Obligations: Asset Retirement Obligations).

(4) The return on average common stockholders' equity is calculated using net income less preferred stock dividends divided by average common stockholders' equity. The return on total stockholders' equity is calculated using net income divided by average stockholders' equity.

(5) Tier 1 Capital divided by each year's fourth quarter adjusted average total assets (hereinafter as adjusted average total assets).

(6) Dividends declared per common share as a percentage of net income per diluted share.

CITICORP

Citicorp is the company's global bank for consumers and businesses and represents Citi's core franchise. Citicorp is focused on providing best-in-class products and services to customers and leveraging Citigroup's unparalleled global network. Citicorp is physically present in nearly 100 countries, many for over 100 years, and offers services in over 140 countries. Citi believes this global network provides a strong foundation for servicing the broad financial services needs of large multinational clients and for meeting the needs of retail, private banking and commercial customers around the world. Citigroup's global footprint provides coverage of the world's emerging economies, which the company believes represents a strong area of growth. As discussed in the "Executive Summary," Citicorp remained profitable in 2008 and 2009, despite very difficult market conditions. At December 31, 2009, Citicorp had approximately $1.1 trillion of assets and $731 billion of deposits, representing approximately 60% of Citi's total assets and approximately 90% of its deposits.

Citicorp consists of the following businesses: Regional Consumer Banking (which includes retail banking and Citi-branded cards in four regions—North America, EMEA, Latin America and Asia) and Institutional Clients Group (which includes Securities and Banking and Transaction Services).

REGIONAL CONSUMER BANKING

Regional Consumer Banking (RCB) consists of Citigroup's four regional consumer banks that provide traditional banking services to retail customers. RCB also contains Citigroup's branded cards business and small commercial banking business.RCB is a globally diversified business with nearly 4,000 branches in 39 countries around the world. During 2009, 68% of total RCB revenues were from outside North America. Additionally, the majority of international revenues and loans were from emerging economies in Asia, Latin America, and Central and Eastern Europe. At year-end 2009, RCB had $213 billion of assets and $290 billion of deposits.

NORTH AMERICA REGIONAL CONSUMER BANKING

North America Regional Consumer Banking (NA RCB) provides traditional banking and Citi-branded card services to retail customers and small to mid-size businesses in the U.S. NA RCB'sapproximately 1,000 retail bank branches and 12 million retail customer accounts are largely concentrated in the greater metropolitan areas of New York, Los Angeles, San Francisco, Chicago, Miami, Washington, D.C., Boston, Philadelphia, and the larger cities in Texas. At December 31, 2009, NA RCB had approximately $7.2 billion of retail banking loans and $143.7 billion of deposits. In addition, NA RCB had approximately 23.1 million Citi-branded credit card accounts, with $82.7 billion in outstanding loan balances on a managed basis.

2009 vs. 2008

Revenues, net of interest expense declined 7%, primarily reflecting higher credit losses in the securitization trusts, which were offset by higher credit-card-securitization revenue, higher net interest margin in cards and higher volumes in retail banking.

Net interest revenue was up 24%, driven by the impact of pricing actions and lower funding costs in Citi-branded cards, and by higher deposit volumes in retail banking, with average deposits up 11% from the prior year.

Non-interest revenue declined 34%, driven by higher credit losses flowing through the securitization trusts partially offset by securitization revenue, and by the absence of a $349 million gain on the sale of Visa shares and a $170 million gain from a cards portfolio sale in the prior year.

Operating expenses declined 36% from the prior year. Excluding a 2008 goodwill impairment charge of $2.3 billion, expenses were down 12% reflecting the benefits from re-engineering efforts, lower marketing costs, and the absence of $217 million in repositioning charges in the prior year offset by the absence of a prior-year $159 million Visa litigation reserve release.

Provisions for loan losses and for benefits and claims increased $562 million, or 52%, primarily due to rising net credit losses in both cards and retail banking. Continued weakening of leading credit indicators and trends in the macroeconomic environment, including rising unemployment and higher bankruptcy filings, primarily drove higher credit costs. The cards managed net credit loss ratio increased 386 basis points to 9.58%, while the retail banking net credit loss ratio increased 75 basis points to 4.29% (see the "Managed Presentations" section below).

2008 vs. 2007

Revenues, net of interest expense decreased 21%, driven by lower securitization revenue and higher credit losses in the securitization trusts, which were partially offset by higher net interest margin in cards and higher revenues in retail banking. Lower securitization revenue was mainly driven by a write-down of $1.1 billion in the residual interest in securitized balances. The residual interest was primarily affected by deterioration in the projected credit loss assumption used to value the asset.

Net interest revenue was up 21%, mainly driven by lower funding costs.

Non-interest revenue decreased 39%, primarily due to lower securitization revenue, higher credit losses in the securitization trusts, and the absence of a $297 million gain on the sale of MasterCard shares in 2007. This decline was partially offset by a $349 million gain on the sale of Visa shares and a $170 million gain from a cards portfolio sale in 2008.

Operating expenses increased 31%, primarily driven by a $2.3 billion goodwill impairment charge in 2008. Excluding the charge, expenses were down 5% mainly reflecting the absence of a $292 million Visa litigation-related charge in 2007 and a $159 million Visa litigation reserve release in 2008, partially offset by $217 million repositioning charges in 2008.

Provisions for loan losses and for benefits and claims increased $540 million driven by higher net credit losses, up $165 million, and a higher loan loss reserve build, up $367 million, in both cards and retail banking. Higher credit costs reflected a weakening of leading credit indicators, including the continued acceleration in the rate at which delinquent cards customers advanced to write-off, as well as trends in the macroeconomic environment, including the housing market downturn and rising unemployment. The cards managed net credit loss ratio increased 191 basis points to 5.72%, while the retail banking net credit loss ratio increased 14 basis points to 3.54%.

Managed Presentations

Managed-basis (Managed) presentations detail certain non-GAAP financial measures. Managed presentations (applicable only to North American branded and retail partner credit card operations in NA RCB and Citi Holdings—Local Consumer Lending, respectively, as there are no deconsolidated credit card securitizations in any other region) include results from both the on-balance-sheet loans and off-balance-sheet loans, and exclude the impact of credit card securitizations activity. Managed presentations assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as Citigroup's owned loans. Citigroup believes that Managed presentations are useful to investors because they are widely used by analysts and investors within the credit card industry. Managed presentations are commonly used by other companies within the financial services industry. See also the "2010 Outlook" for NA RCB below.

	2009	2008	2007
Managed credit losses as a percentage of average managed loans	9.14%	5.62%	3.81%
Impact from credit card securitizations	3.30%	2.02%	1.13%
Net credit losses as a percentage of average loans	5.84%	3.60%	2.68%

2010 Outlook

In 2010, NA RCB is expected to continue to operate in a challenging economic and credit environment. Revenues will be affected by the continued U.S. economic downturn that has impacted customer demand and credit performance, as well as by legislative and regulatory changes. Both retail banking and cards will continue to focus on tight expense control, productivity improvements, and effective credit management. With high levels of unemployment and bankruptcy filings in 2010, net credit losses, delinquencies and defaults are expected to remain at elevated levels during the year.

NA RCB results will also continue to be impacted by Citi's continued implementation of the CARD Act as well as the company's loss mitigation and forbearance programs, particularly in Citi's card and U.S. mortgage businesses. The majority of the provisions of the CARD Act will have taken effect by February 2010. The CARD Act implementation began to impact card revenues in the fourth quarter of 2009 as lower net interest rate revenue due to such implementation was partially mitigated by pricing actions. Management within NA RCB continues to review and revise the company's credit card business model to implement the required changes of the CARD Act, and this will likely continue throughout 2010. While management of NA RCB believes that it can mitigate a portion of the impact of the CARD Act, Citi currently estimates that the net impact of the CARD Act on NA RCB revenues for 2010 could be a reduction of approximately $400 to $600 million. See also "Results of Operations—Citi Holdings—Local Consumer Lending" and "Managing Global Risk—Credit Risk" below.

In addition, on January 1, 2010, Citi adopted SFAS No. 166, Accounting for Transfers of Financial Assets, an Amendment of FASB Statement No. 140 (SFAS 166) and SFAS No. 167 Amendments to FASB Interpretation No. 46(R) (SFAS 167). These new accounting standards will be applied prospectively and will require consolidation of certain credit card securitization trusts and the elimination of sale accounting for transfers of credit card receivables to those trusts. Under previous accounting standards, transfers of credit card receivables to the securitization trusts were accounted for as sales. Consequently, beginning in 2010, the financial results of NA RCB will vary from previously reported financial results prepared under the amended accounting standards. See Note 1 to the Consolidated Financial Statements for a discussion of "Future Application of Accounting Standards" for further detail.

19

EMEA REGIONAL CONSUMER BANKING

EMEA Regional Consumer Banking (EMEA RCB) provides traditional banking and Citi-branded card services to retail customers and small to mid-size businesses, primarily in Central and Eastern Europe, the Middle East and Africa. Western Europe retail banking is included in Citi Holdings. EMEA RCB has repositioned its business, shifting from a strategy of widespread distribution to a focused strategy concentrating on larger urban markets within the region. An exception is Bank Handlowy, which has a mass market presence in Poland. The countries in which EMEA RCB has the largest presence are Poland, Turkey, Russia and the United Arab Emirates. At December 31, 2009, EMEA RCB had approximately 341 retail bank branches with approximately 4.2 million customer accounts, $5.2 billion in retail banking loans and $10.1 billion in deposits. In addition, the business had approximately 2.7 million Citi-branded card accounts with $3.0 billion in outstanding loan balances.

2009 vs. 2008

Revenues, net of interest expense declined 17%. More than half of the revenue decline is attributable to the impact of FX translation. Other drivers included lower wealth-management and lending revenues due to lower volumes and spread compression from credit tightening initiatives. Investment sales declined by 26% due to market conditions at the start of the year with assets under management increasing by 9% by year end.

Net interest revenue was 23% lower than the prior year due to external competitive pressure on rates and higher funding costs, with average loans for retail banking down 18% and average deposits down 18%.

Non-interest revenue decreased by 3%, primarily due to the impact of FX translation. Excluding FX there was marginal growth.

Operating expenses declined 27%, reflecting expense control actions, lower marketing expenses and the impact of FX translation. Cost savings were achieved by branch closures, headcount reductions and process re-engineering efforts.

Provisions for loan losses increased $482 million to $794 million. Net credit losses increased from $237 million to $487 million, while the loan loss reserve build increased from $75 million to $307 million. Higher credit costs reflected continued credit deterioration across the region.

2008 vs. 2007

Revenues, net of interest expense increased 18% due to growth in the size of the portfolio across Central and Eastern Europe and the Middle East. Investment sales declined by 39% with assets under management declining by 42% as a result of market conditions in the second half of 2008.

Net interest revenue was 31% higher than the prior year due to growth in the size of the portfolio across Central and Eastern Europe and the Middle East and growth in revolving balances. Average loans for retail banking were up 26%, cards were up 49% and average deposits were up 22%.

Non-interest revenue decreased by 4% due to reduced investment revenue as a result of market conditions.

Operating expenses increased 19%, reflecting growth in the portfolio and repositioning charges.

Provisions for loan losses increased 49% to $312 million. Net credit losses increased from $113 million to $237 million, while the Loan loss reserve build decreased by 22% to $75 million. Credit costs increased as a result of market conditions driving deterioration in the portfolio.

2010 Outlook

During 2010, EMEA RCB businesses are expected to operate in an environment of continued challenging economic and credit conditions. While key business drivers, including deposits, investment sales and card purchase sales, began to show some signs of improvement during the latter part of 2009, continued positive developments, if any, will depend on the success of EMEA RCB's strategy of concentrated focus on larger urban markets. Credit quality is currently anticipated to improve modestly with remedial programs and tighter origination standards reducing both delinquencies and credit losses, with some continued pockets of weakness in Poland and Hungary. Loan and card volume growth will continue to be controlled, driven by tighter origination standards.

LATIN AMERICA REGIONAL CONSUMER BANKING

Latin America Regional Consumer Banking (LATAM RCB) provides traditional banking and Citi-branded card services to retail customers and small to mid-size businesses, with the largest presence in Mexico and Brazil. LATAM RCB includes branch networks throughout Latin America as well as Banamex, Mexico's second largest bank with over 1,700 branches. At December 31, 2009,LATAM RCB had approximately 2,216 retail branches, with 16.6 million customer accounts, $18.2 billion in retail banking loan balances and $41.4 billion in deposits. In addition, the business had approximately 12.2 million Citi-branded card accounts with $12.2 billion in outstanding loan balances.

Total	$ 323	$(3,348)	$1,616	NM	NM

NM Not meaningful

2009 vs. 2008

Revenues, net of interest expense declined 16%, driven by the impact of FX translation as well as lower activity in the branded cards business.

Net interest revenue decreased 17%, mainly driven by FX translation impact as well as lower volumes and spread compression in the branded cards business that offset the growth in loans, deposits and investment products in the retail business.

Non interest revenue decreased 13%, driven also by FX impact and lower branded cards fee income from lower customer activity.

Operating expenses decreased 52%, primarily driven by the absence of a goodwill impairment charge of $4.3 billion in 2008, the benefit associated with the FX impact and saves from restructuring actions implemented primarily at the end of 2008. The $125 million related to 2008 restructuring charges was offset by an expense benefit of $257 million related to a legal vehicle restructuring in 2008. Expenses increased slightly in the fourth quarter of 2009 primarily due to selected marketing and investment spending.

Provisions for loan losses and for benefits and claims decreased 13% primarily reflecting lower loan loss reserve builds as a result of lower volumes, improved portfolio quality and lower net credit losses in the branded cards portfolio primarily in Mexico due to repositioning in the portfolio.

2008 vs. 2007

Revenues, net of interest expense increased 6% compared to the prior year, associated with higher volumes and partially offset by the extraordinary gains recorded in 2007: a $235 million gain on the sale of Visa shares and a $78 million gain on the sale of MasterCard shares.

Net interest revenue increased 15% driven by higher volumes in both the branded cards and retail businesses.

Non-interest revenue declined, driven by the 2007 Visa and MasterCard extraordinary gains.

Operating expenses growth of 97% was mainly driven by goodwill impairment of $4.3 billion in 2008, and to a lesser extent, restructuring charges of $125 million. Partially offsetting these increases was a $257 million expense benefit related to a legal vehicle restructuring.

Provisions for loan losses and for benefits and claims increased 94%, primarily driven by higher loan loss reserve builds in 2008 reflecting portfolio growth and market conditions.

2010 Outlook

Improving economic conditions across the region, including the level of exchange rates, the credit environment and unemployment rates, are currently expected to have a positive impact on LATAM RCB performance in 2010. However, LATAM RCB results will depend on overall macroeconomic conditions in the region as well as the impact of loss mitigation efforts and the repositioning of the portfolio.

During the fourth quarter of 2009, LATAM RCB began to increase investments in card account acquisition, with a focus on higher-quality accounts. This step may begin to contribute to account and card revenue growth in 2010. While the business anticipates continued selective marketing and investment spending during the year, management of LATAM RCB currently expects that overall operating expenses will continue to reflect re-engineering efforts.

In addition, Mexico’s Ministry of Finance has publicly stated that the U.S. government ownership stake in Citigroup does not violate Mexican law barring indirect foreign government ownership of Mexican affiliate banks. The Mexican Senate has asked the Mexican Supreme Court to determine the constitutionality of the Ministry’s interpretation. The Mexican Supreme Court is considering and will issue a resolution on the matter. Neither Citi, Banamex nor the U.S. government is a party to this proceeding.

ASIA REGIONAL CONSUMER BANKING

Asia Regional Consumer Banking (Asia RCB) provides traditional banking and Citi-branded card services to retail customers and small to mid-size businesses, with the largest Citi presence in South Korea, Australia, Singapore, India, Taiwan, Malaysia, Japan and Hong Kong. At December 31, 2009, Asia RCB had approximately 633 retail branches, $94.5 billion in customer deposits, 15.8 million customer accounts and $50.1 billion in retail banking loans. In addition, the business had approximately 15.1 million Citi-branded card accounts with $17.7 billion in outstanding loan balances at December 31, 2009.

2009 vs. 2008

Revenues, net of interest expense declined 9%, driven by the absence of the gain on Visa shares in the prior year, lower investment product revenues and cards purchase sales, lower spreads, and the impact of FX translation.

Net interest revenue was 5% lower than the prior year. Average loans and deposits were down 10% and 4%, respectively, in each case partly due to the impact of FX translation.

Non-interest revenue declined 19%, primarily due to the decline in investment revenues, lower cards purchase sales, the absence of the gain on Visa shares and the impact of FX translation.

Operating expenses declined 9%, reflecting the benefits of re-engineering efforts and the impact of FX translation. Expenses increased slightly in the fourth quarter of 2009 primarily due to selected marketing and investment spending.

Provisions for loan losses and for benefits and claims increased 28%, mainly due to the impact of a higher credit reserve build and an increase in net credit losses partially offset by the impact of FX translation. In the first half of the year, rising credit losses were particularly apparent in the portfolios in India and South Korea. However, delinquencies improved in recent periods and net credit losses flattened as the region showed early signs of economic recovery and increased levels of customer activity.

2008 vs. 2007

Revenues, net of interest expense increased 4%, driven by higher cards purchase sales and higher loan and deposit volumes, partially offset by lower gains on Visa shares than the prior year and a 47% decline in investment sales.

Net interest revenue was 13% higher than the prior year reflecting higher card balances, higher average loans and deposits, and better spreads.

Non-interest revenue declined 11%, primarily due to the lower gains on Visa shares than the prior year and the decline in investment sales, partially offset by higher cards purchase sales.

Operating expenses increased 11%, reflecting higher business volume and restructuring expenses in 2008.

Provisions for loan losses and for benefits and claims increased 64%, mainly due to higher net credit losses and higher credit reserve builds, reflective of the overall economic environment in the region.

2010 Outlook

The 2010 performance of Asia RCB will continue to be driven by improving macroeconomic conditions in the region, supported by continued investment spending in the business and product capability. Asia RCB anticipates continued investment in expanded retail distribution, an enhanced wealth management offering and increased expenditure on card promotion and account acquisition, which could result in an increase in year-on-year expenses. While Asia RCB currently expects credit trends, including declining net credit losses and improving delinquencies, to continue in 2010, credit trends in the region will also be affected by the pace of recovery in the U.S. and European Union.

INSTITUTIONAL CLIENTS GROUP

Institutional Clients Group (ICG) includes Securities and Banking and Transaction Services. ICG provides corporate, institutional and high-net-worth clients with a full range of products and services, including cash management, trading, underwriting, lending and advisory services, around the world. ICG's international presence is supported by trading floors in approximately 75 countries and a proprietary network within Transaction Services in over 90 countries. At December 31, 2009, ICG had approximately $866 billion of assets and $442 billion of deposits.

SECURITIES AND BANKING

Securities and Banking (S&B) offers a wide array of investment and commercial banking services and products for corporations, governments, institutional and retail investors, and ultra-high-net worth individuals. S&B includes investment banking and advisory services, lending, debt and equity sales and trading, institutional brokerage, foreign exchange, structured products, cash instruments and related derivatives, and private banking. S&B revenue is generated primarily from fees for investment banking and advisory services, fees and interest on loans, fees and spread on foreign exchange, structured products, cash instruments and related derivatives, income earned on principal transactions, and fees and spreads on private banking services.

2009 vs. 2008

Revenues, net of interest expense increased 11% or $2.7 billion, as markets began to recover in the early part of 2009, bringing back higher levels of volume activity and higher levels of liquidity, which began to decline again in the third quarter of 2009. The growth in revenue in the early part of the year was mainly due to a $7.1 billion increase in fixed income markets, reflecting strong trading opportunities across all asset classes in the first half of 2009, and a $1.5 billion increase in investment banking revenue primarily from increases in debt and equity underwriting activities reflecting higher transaction volumes from depressed 2008 levels. These increases were offset by a $6.4 billion decrease in lending revenue primarily from losses on credit default swap hedges. Excluding the 2009 and 2008 CVA impact, as indicated in the table below, revenues increased 23% or $5.5 billion.

Operating expenses decreased 17%, or $2.7 billion. Excluding the 2008 repositioning and restructuring charges and the 2009 litigation reserve release, operating expenses declined 11% or $1.6 billion, mainly as a result of headcount reductions and benefits from expense management.

Provisions for loan losses and for benefits and claims decreased 7% or $129 million, to $1.7 billion, mainly due to lower credit reserve builds and net credit losses, due to an improved credit environment, particularly in the latter part of the year.

2008 vs. 2007

Revenues, net of interest expense decreased 2% or $0.4 billion reflecting the overall difficult market conditions. Excluding the 2008 and 2007 CVA impact, revenues decreased 3% or $0.6 billion. The reduction in revenue was primarily due to a decrease in investment banking revenue of $2.3 billion to $3.2 billion, mainly in debt and equity underwriting, reflecting lower volumes, and a decrease in equity markets revenue of $2.3 billion to $2.9 billion due to extremely high volatility and reduced levels of activity. These reductions were offset by an increase in fixed income markets of $2.9 billion to $14.4 billion due to strong performance in interest rates and currencies, and an increase in lending revenue of $2.4 billion to $4.2 billion mainly from gains on credit default swap hedges.

Operating expenses decreased by 2% or $0.4 billion. Excluding the 2008 and 2007 repositioning and restructuring charges and the 2007 litigation reserve reversal, operating expenses decreased by 7% or $1.1 billion driven by headcount reduction and lower performance-based incentives.

Provisions for credit losses and for benefits and claims increased $1.3 billion to $1.8 billion mainly from higher credit reserve builds and net credit losses offset by a lower provision for unfunded lending commitments due to deterioration in the credit environment.

Certain Revenues Impacting Securities and Banking

Items that impacted S&B revenues during 2009 and 2008 are set forth in the table below.

	Pretax revenue	
In millions of dollars	2009	2008
Private equity and equity investments	$ 201	$ (377)
Alt-A mortgages (1) (2)	321	(737)
Commercial real estate (CRE) positions (1) (3)	68	270
CVA on Citi debt liabilities under fair value option	(3,974)	4,325
CVA on derivatives positions, excluding monoline insurers	2,204	(3,292)
Total significant revenue items	$ (1,180)	$ 189

(1) Net of hedges.

(2) For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans. See “Managing Global Risk—Credit Risk—U.S. Consumer Mortgage Lending.”

(3) S&B’scommercial real estate exposure is split into three categories of assets: held at fair value; held-to-maturity/held-for-investment; and equity. See “Managing Global Risk—Credit Risk—Exposure to Commercial Real Estate” section for a further discussion.

In the table above, 2009 includes a $330 million pretax adjustment to the CVA balance, which reduced pretax revenues for the year, reflecting a correction of an error related to prior periods. See “Significant Accounting Policies and Significant Estimates” below and Notes 1 and 34 to the Consolidated Financial Statements for a further discussion of this adjustment.

2010 Outlook

The 2010 outlook for S&B will depend on the level of client activity and on macroeconomic conditions, market valuations and volatility, interest rates and other market factors. Management of S&B currently expects to maintain client activity throughout 2010 and to operate in market conditions that offer moderate volatility and increased liquidity.

Operating expenses will benefit from continued re-engineering and expense management initiatives, but will be offset by investments in talent and infrastructure to support growth.

28

TRANSACTION SERVICES

Transaction Services is composed of Treasury and Trade Solutions (TTS) and Securities and Fund Services (SFS). TTS provides comprehensive cash management and trade finance for corporations, financial institutions and public sector entities worldwide. SFS provides custody and funds services to investors such as insurance companies and mutual funds, clearing services to intermediaries such as broker-dealers, and depository and agency/trust services to multinational corporations and governments globally. Revenue is generated from net interest revenue on deposits in TTS and SFS, as well as trade loans and from fees for transaction processing and fees on assets under custody in SFS.

NM Not meaningful

2009 vs. 2008

Revenues, net of interest expense declined 2% compared to 2008 as strong growth in balances was more than offset by lower spreads driven by low interest rates globally.

Average deposits and other customer liability balances grew 8%, driven by strong growth in all regions.

Treasury and Trade Solutions revenues grew 7% as a result of strong growth in balances and higher trade revenues.

Securities and Funds Services revenues declined 18%, attributable to reductions in asset valuations and volumes.

Operating expenses declined 12%, mainly as a result of headcount reductions and successful execution of reengineering initiatives.

Cost of credit declined 80%, which was primarily attributable to overall portfolio management.

Net income increased 12%, leading to a record net income, with growth across all regions reflecting benefits of continued re-engineering and expense management efforts.

2008 vs. 2007

Revenues, net of interest expense grew 23% driven by new business and implementations, growth in customer liability balances, increased

transaction volumes and the impact of acquisitions.

Average deposits and other customer liability balances grew 14% driven by success of new business growth and implementations.

Treasury and Trade Solutions revenues grew 26% as a result of strong liability and fee growth as well as increased client penetration.

Securities and Funds Services revenues grew 17% as a result of increased assets under custody, volumes and liability balances.

2010 Outlook

Transaction Services business performance will continue to be impacted in 2010 by levels of interest rates, economic activity, volatility in global capital markets, foreign exchange and market valuations globally. Levels of client activity and client cash and security flows are key factors dependent on macroeconomic conditions. Transaction Services intends to continue to invest in technology to support its global network, as well as investments to build out its investor services suite of products aimed at large, under-penetrated markets for middle and back office outsourcing among a range of investors. These and similar investments could lead to increasing operating expenses.

CITI HOLDINGS

Citi Holdings contains businesses and portfolios of assets that Citigroup has determined are not central to its core Citicorp business. These noncore businesses tend to be more asset-intensive and reliant on wholesale funding and also may be product-driven rather than client-driven. Citi intends to exit these businesses as quickly as practicable yet in an economically rational manner through business divestitures, portfolio run-off and asset sales. Citi has made substantial progress divesting and exiting businesses from Citi Holdings, having completed 15 divestitures in 2009, including Smith Barney, Nikko Cordial Securities, Nikko Asset Management Financial Institution Credit Card business (FI) and Diners Club North America. Citi Holdings' assets have been reduced by nearly 40%, or $351 billion, from the peak level of $898 billion in the first quarter of 2008 to $547 billion at year-end 2009. Citi Holdings' assets represented less than 30% of Citi's assets as of December 31, 2009. Asset reductions from Citi Holdings have the combined benefits of further fortifying Citigroup's capital base, lowering risk, simplifying the organization and allowing Citi to allocate capital to fund long-term strategic businesses.

Citi Holdings consists of the following businesses: Brokerage and Asset Management; Local Consumer Lending; and Special Asset Pool.

With Citi's exit from the loss-sharing agreement with the U.S. government in December 2009, the Company conducted a broad review of the Citi Holdings asset base to determine which assets are strategically important to Citicorp. As a result of this analysis, approximately $61 billion of assets will be moved from Citi Holdings into Citicorp in the first quarter of 2010. The assets consist primarily of approximately $34 billion of U.S. mortgages that will be transferred to NA RCB, approximately $19 billion of commercial and corporate loans and securities related to core Citicorp clients, of which approximately $17 billion will be moved to S&B and the remainder to NA RCB, and approximately $5.0 billion of assets related to Citi's Mexico asset management business that will be moved toLATAM RCB.

BROKERAGE AND ASSET MANAGEMENT

Brokerage and Asset Management (BAM), which constituted approximately 6% of Citi Holdings by assets as of December 31, 2009, consists of Citi's global retail brokerage and asset management businesses. This segment was substantially affected and reduced in size in 2009 due to the divestitures of Smith Barney (to the Morgan Stanley Smith Barney joint venture (MSSB JV)) and Nikko Cordial Securities. At December 31, 2009, BAM had approximately $35 billion of assets, which included $26 billion of assets from the 49% interest in the MSSB JV ($13 billion investment and $13 billion in loans associated with the clients of the MSSB JV) and $9 billion of assets from a diverse set of asset management and insurance businesses of which approximately half will be transferred into the LATAM RCB during the first quarter of 2010, as discussed under "Citi Holdings" above. Morgan Stanley has options to purchase Citi's remaining stake in the MSSB JV over three years starting in 2012. The 2009 results include an $11.1 billion gain ($6.7 billion after-tax) on the sale of Smith Barney.

2009 vs. 2008

Revenues, net of interest expense increased 80% versus the prior year mainly driven by the $11.1 billion pretax gain on the sale ($6.7 billion after-tax) on the MSSB JV transaction in the second quarter of 2009 and a $320 million pretax gain on the sale of the managed futures business to the MSSB JV in the third quarter of 2009. Excluding these gains, revenue decreased primarily due to the absence of Smith Barney from May 2009 onwards and the absence of fourth-quarter revenue of Nikko Asset Management, partially offset by an improvement in marks in Retail Alternative Investments. Revenues in the prior year include a $347 million pretax gain on sale of CitiStreet and charges related to the settlement of auction rate securities of $393 million pretax.

Operating expenses decreased 64% from the prior year, mainly driven by the absence of Smith Barney and Nikko Asset Management expenses, re-engineering efforts and the absence of 2008 one-time expenses ($0.9 billion intangible impairment, $0.2 billion of restructuring and $0.5 billion of write-downs and other charges).

Provisions for loan losses and for benefits and claims decreased 15% mainly reflecting a $50 million decrease in provision for benefits and claims, partially offset by increased reserve builds of $28 million.

Assets decreased 40% versus the prior year, mostly driven by the sales of Nikko Cordial Securities and Nikko Asset Management ($25 billion) and the managed futures business ($1.4 billion), partially offset by increased Smith Barney assets of $4 billion.

2008 vs. 2007

Revenues, net of interest expense decreased 21% from the prior year primarily due to lower transactional and investment revenues in Smith Barney, lower revenues in Nikko Asset Management and higher markdowns in Retail Alternative Investments.

Operating expenses increased 16% versus the prior year, mainly driven by a $0.9 billion intangible impairment in Nikko Asset Management in the fourth quarter of 2008, $0.2 billion of restructuring charges and $0.5 billion of write-downs and other charges.

Provisions for loan losses and for benefits and claims increased $65 million compared to the prior year, mainly due to a $52 million increase in provisions for benefits and claims.

Assets increased 4% versus the prior year.

LOCAL CONSUMER LENDING

Local Consumer Lending (LCL), which constituted approximately 65% of Citi Holdings by assets as of December 31, 2009, includes a portion of Citigroup's North American mortgage business, retail partner cards, Western European cards and retail banking, CitiFinancial North America, Primerica, Student Loan Corporation and other local consumer finance businesses globally. At December 31, 2009, LCL had $358 billion of assets ($317 billion in North America). About one-half of the assets in LCL as of December 31, 2009 consisted of U.S. mortgages in the company's CitiMortgage and CitiFinancial operations. The North American assets consist of residential mortgage loans, retail partner card loans, student loans, personal loans, auto loans, commercial real estate, and other consumer loans and assets.

NM Not meaningful

2009 vs. 2008

Revenues, net of interest expense decreased 22% versus the prior year, mostly due to lower net interest revenue. Net interest revenue was 23% lower than the prior year, primarily due to lower balances, de-risking of the portfolio, and spread compression. Net interest revenue as a percentage of average loans decreased 63 basis points from the prior year, primarily due to the impact of higher delinquencies, interest write-offs, loan modification programs, higher FDIC charges and CARD Act implementation (in the latter part of 2009), partially offset by retail partner cards pricing actions. LCL results will continue to be impacted by the CARD Act. Citi currently estimates that the net impact on LCL revenues for 2010 could be a reduction of approximately $50 to $150 million. See also "North America Regional Consumer Banking" and "Managing Global Risk—Credit Risk" for additional information on the impact of the CARD Act to Citi's credit card businesses. Average loans decreased 12%, with North America down 11% and international down 19%. Non-interest revenue decreased $1.1 billion mostly driven by the impact of higher credit losses flowing through the securitization trusts.

Operating expenses declined 30% from the prior year, due to lower volumes and reductions from expense re-engineering actions, and the impact of goodwill write-offs of $3.0 billion in the fourth quarter of 2008, partially offset by higher other real estate owned and collection costs.

Provisions for loan losses and for benefits and claims increased 14% versus the prior year reflecting an increase in net credit losses of $6.1 billion,partially offset by lower reserve builds of $2.7 billion. Higher net credit losses were primarily driven by higher losses of $3.6 billion in residential real estate lending, $1.0 billion in retail partner cards, and $0.7 billion in international.

Assets decreased $58 billion versus the prior year, primarily driven by lower originations, wind-down of specific businesses, asset sales, divestitures, write-offs and higher loan loss reserve balances. Key divestitures in 2009 included the FI credit card business, Italy consumer finance, Diners Europe, Portugal cards, Norway consumer, and Diners Club North America.

2008 vs. 2007

Revenues, net of interest expense decreased 9% versus the prior year, mostly due to lower Non-interest revenue. Net interest revenue declined 1% versus the prior year. Average loans increased 3%; however, revenues declined, driven by lower balances, de-risking of the portfolio, and spread compression. Non-interest revenue decreased $2 billion, primarily due to the impact of securitization in retail partners cards and the mark-to-market on the mortgage servicing rights asset and related hedge in real estate lending.

Operating expenses increased 31%, driven by the impact of goodwill write-offs of $3.0 billion in the fourth quarter of 2008 and restructuring costs. Excluding one-time expenses, expenses were slightly higher due to increased volumes.

Provisions for loan losses and for benefits and claims increased 76% versus the prior year reflecting increased net credit losses of $6.4 billion and higher reserve builds of $3.1 billion. Higher net credit losses were primarily driven by $3.9 billion in real estate lending and $0.8 billion in retail partner cards.

Assets decreased $65 billion versus the prior year, primarily driven by Real Estate Lending and higher loan loss reserve balances in 2008.

Managed Presentations

The following is a reconciliation of Managed-basis net credit losses in LCL. For a discussion of Managed-basis presentations, see North America Regional Consumer Banking.

	2009	2008	2007
Managed credit losses as a percentage of average managed loans	6.60%	4.00%	2.25%
Impact from credit card securitizations	0.69%	0.44%	0.35%
Net credit losses as a percentage of average loans	5.91%	3.56%	1.90%

Certain Details on LCL Loans

The following table provides additional information, as of December 31, 2009, regarding LCL loan details. For additional information on loans within LCL, see "Managing Global Risk—Credit Risk—Consumer Loan Details" below.

	Composition of loans within Local Consumer Lending as of December 31, 2009		
In billions of dollars	Total loans	Fourth quarter 2009 net credit loss ratio	90+ days past due % (1)
North America			
First mortgages	$118.2	3.51%	10.93%
Second mortgages	54.2	7.00	2.96
Student	26.3	0.42	3.33
Cards (retail partners)	18.9	14.43	4.50
Personal and other	18.3	10.83	3.04
Auto	13.8	7.80	1.96
Commercial real estate	10.6	3.49	3.35
Total North America	$260.3	5.61%	6.55%
International			
EMEA	$ 23.0	6.95%	4.86%
Asia	9.8	12.65	2.25
Latin America	0.3	17.25	2.16
Total international	$ 33.1	8.69%	4.06%
Total	$293.4	5.97%	6.26%

(1) Loans 90+ days past due exclude U.S. mortgage loans that are guaranteed by U.S. government-sponsored agencies, since the potential loss predominantly resides with the U.S. agencies.

Note: Totals may not sum due to rounding.

Japan Consumer Finance

Citigroup continues to actively monitor a number of matters involving its Japan Consumer Finance business, including customer refund claims and defaults, as well as financial and legislative, regulatory, judicial and other political developments, relating to the charging of "gray zone" interest. Gray zone interest represents interest at rates that are legal but for which claims may not be enforceable. This business has incurred and will continue to face net credit losses and refunds, due in part to the impact of Japanese consumer lending laws passed in the fourth quarter of 2006 and judicial and regulatory actions. In addition, legislation effective in 2010 will impose a lower interest rate cap and lower lending cap on consumer lending in Japan, which may reduce credit availability and increase potential claims and losses relating to gray zone interest.

Citi determined in 2008 to exit its Japanese Consumer Finance business and has been liquidating its portfolio and otherwise winding down the business. Citi continues to monitor and evaluate both currently and previously outstanding accounts in its Japanese Consumer Finance business and its reserves related thereto. However, the trend in the type, number and amount of claims, and the potential full amount of losses and their impact on Citi requires evaluation in a potentially volatile environment, is subject to significant uncertainties and continues to be difficult to predict.

SPECIAL ASSET POOL

Special Asset Pool (SAP), which constituted approximately 28% of Citi Holdings by assets as of December 31, 2009, is a portfolio of securities, loans and other assets that Citigroup intends to actively reduce over time through asset sales and portfolio run-off. At December 31, 2009, SAP had $154 billion of assets. SAP assets have declined by $197 billion or 56% from peak levels in 2007 reflecting cumulative write-downs, asset sales and portfolio run-off. Assets have been reduced by $87 billion from year-ago levels. Approximately 60% of SAP assets are now accounted for on an accrual basis, which has helped reduce income volatility.

In millions of dollars	2009	2008	2007	% Change 2009 vs. 2008	% Change 2008 vs. 2007

2009 vs. 2008

Revenues, net of interest expense increased $35.9 billion in 2009, primarily due to the absence of significant negative revenue marks occurring in the prior year. Total negative marks were $1.9 billion in 2009 as compared to $38.1 billion in 2008, as described in more detail below. Revenue in the current year included a positive $1.3 billion CVA on derivative positions, excluding monoline insurers, and positive marks of $0.8 billion on subprime-related direct exposures. These positive revenues were partially offset by negative revenues of $1.5 billion on Alt-A mortgages, $1.3 billion of write-downs on commercial real estate, and a negative $1.6 billion CVA on the monoline insurers and fair value option liabilities. Revenue was also affected by negative marks on private equity positions and write-downs on highly leveraged finance commitments.

Operating expenses decreased 9% in 2009, mainly driven by lower compensation and lower volumes and transaction expenses, partially offset by costs associated with the U.S. government loss-sharing agreement, which Citi exited in the fourth quarter of 2009.

Provisions for credit losses and for benefits and claims increased $1.5 billion, primarily driven by $4.5 billion in increased net credit losses, partially offset by a lower reserve build of $3.0 billion.

Assets declined 36% versus the prior year, primarily driven by amortization and prepayments, sales, marks and charge-offs. Asset sales during the fourth quarter of 2009 ($10 billion) were executed at or above Citi's marks generating $800 million in pretax gains for the quarter.

2008 vs. 2007

Revenues, net of interest expense decreased $21.7 billion, primarily due to negative net revenue marks. Revenue included $14.3 billion of write-downs on subprime-related direct exposures and a negative $6.8 billion CVA related to the monoline insurers and derivative positions. Revenue was also negatively affected by write-downs on highly leveraged finance commitments, Alt-A mortgage revenue, write-downs on structured investment vehicles and commercial real estate, and mark-to-market on auction rate securities. Total negative marks were $38.1 billion in 2008 as compared to $20.2 billion in 2007, which are described in more detail below.

Operating expenses decreased 8%, mainly driven by lower compensation and transaction expenses.

Provisions for credit losses and for benefits and claims increased $2.7 billion, primarily due to a $2.2 billion increase in the reserve build and an increase in net credit losses of $0.5 billion.

Assets declined 31% versus the prior year, primarily driven by amortization and prepayments, sales, and marks and charge-offs.

The following table provides details of the composition of SAP assets as of December 31, 2009.

In billions of dollars	Assets within Special Asset Pool as of December 31, 2009 Carrying value of assets	Face value	Carrying value as % of face value
Securities in AFS/HTM (1)			
Corporates	$ 10.3	$ 10.6	97%
Prime and non-U.S. MBS	15.4	19.2	80
Auction rate securities	7.8	10.5	74
Alt-A mortgages	8.7	16.9	51
Other securities (2)	5.7	8.0	71
Total securities in AFS/HTM	$ 47.9	$ 65.3	73%
Loans, leases and letters of credit (LCs) in HFI/HFS (3)			
Corporates	$ 20.3	$ 22.2	91%
Commercial real estate (CRE)	13.5	14.4	94
Other	3.4	4.1	83
Loan loss reserves	(4.1)	NM	NM
Total loans, leases and LCs in HFI/HFS	$ 33.1	NM	NM
Mark-to-market			
Subprime securities (4)	$ 7.3	$ 18.9	39%
Other securities (5)	5.6	25.7	22
Derivatives	6.2	NM	NM
Loans, leases and letters of credit	5.1	8.4	61
Repurchase agreements	6.5	NM	NM
Total mark to market	$ 30.7	NM	NM
Highly leveraged finance commitments	$ 2.8	$ 4.8	58%
Equities (excludes ARS in AFS)	11.3	NM	NM
Structured investment vehicles	16.0	20.5	78
Monolines	1.0	NM	NM
Consumer and other (6)	11.6	NM	NM
Total	$ 154.4		

(1) Available-for-sale (AFS) accounts for approximately one-third of the total. HTM means held-to-maturity.
(2) Includes commercial real estate ($2.1 billion), municipals ($1.1 billion) and asset-backed securities ($1.5 billion).
(3) Held-for-sale (HFS) accounts for approximately $0.9 billion of the total.
(4) This $7.3 billion of assets is reflected in the exposures set forth under “Managing Global Risk—U.S. Subprime-Related Direct Exposure in Citi Holdings—Special Asset Pool.”
(5) Includes $1.9 billion of corporate and $0.7 billion of commercial real estate.
(6) Includes $4.6 billion of small business banking and finance loans.
Note: Totals may not sum due to rounding.
NM Not meaningful

Items Impacting SAP Revenues

The table below provides additional information regarding the net revenue marks affecting the SAP during 2009 and 2008.

	Pretax revenue	
In millions of dollars	2009	2008
Subprime-related direct exposures (1)(2)	$ 810	$ (14,283)
Private equity and equity investments (3)	(1,148)	(2,196)
Alt-A mortgages (1)(4)	(1,451)	(3,075)
Highly leveraged loans and financing commitments (5)	(521)	(4,892)
Commercial real estate positions (1)(6)(7)	(1,526)	(2,898)
Structured investment vehicles' (SIVs) assets	(80)	(3,269)
Auction rate securities proprietary positions (8)	(23)	(1,732)
CVA related to exposure to monoline insurers	(1,301)	(5,736)
CVA on Citi debt liabilities under fair value option	(252)	233
CVA on derivatives positions, excluding monoline insurers	1,283	(1,059)
Subtotal	$ (4,209)	$ (38,907)
Accretion on reclassified assets	1,994	190
Total selected revenue items	$ (2,215)	$ (38,717)

(1) Net of hedges.

(2) See "Managing Global Risk—Credit Risk—U.S. Subprime-Related Direct Exposure in Citi Holdings—Special Asset Pool" for a further discussion of the related risk exposures and the associated marks recorded.

(3) 2009: $95 million recorded in BAM; $1,053 million recorded in SAP. 2008: $418 million recorded in BAM; $1,778 million recorded in SAP.

(4) For these purposes, Alt-A mortgage securities are non-agency RMBS where (i) the underlying collateral has weighted average FICO scores between 680 and 720 or (ii) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans. See "Managing Global Risk—Credit Risk—U.S. Consumer Mortgage Lending."

(5) Net of underwriting fees. See "Managing Global Risk—Credit Risk—Highly Leveraged Financing Transactions" for further discussion.

(6) The aggregate $1,526 million recorded in 2009 is comprised of $1,121 million of losses, net of hedges, on exposures recorded at fair value, $562 million of losses on equity method investments, and $157 million of gains recorded on exposures classified as held-for-investment/held-to-maturity. Citi Holdings' commercial real estate exposure is split into three categories of assets: held at fair value; held-to-maturity/held-for-investment; and equity. See "Managing Global Risk—Credit Risk—Exposure to Commercial Real Estate" for further discussion.

(7) Excludes positions in SIVs. Commercial real estate write-downs above include $182 million in 2009 and $191 million in 2008 recorded in BAM.

(8) Excludes write-downs of $6 million in 2009 ($16 million loss recorded in SAP; $8 million gain recorded in BAM) and $393 million in 2008 (all recorded in BAM) arising from the ARS legal settlements.

Credit Valuation Adjustment (CVA) Related to Monoline Insurers

CVA is calculated by applying forward default probabilities, which are derived using the counterparty's current credit spread, to the expected exposure profile. The exposure primarily relates to hedges on super-senior subprime exposures that were executed with various monoline insurance companies. See "Managing Global Risk—Credit Risk—Direct Exposure to Monolines" for further discussion.

Credit Valuation Adjustment on Citi's Debt Liabilities for Which Citi Has Elected the FairValue Option

Citi is required to use its own credit spreads in determining the current value for its derivative liabilities and all other liabilities for which it has elected the fair value option. When Citi's credit spreads widen (deteriorate), Citi recognizes a gain on these liabilities because the value of the liabilities has decreased. When Citi's credit spreads narrow (improve), Citi recognizes a loss on these liabilities because the value of the liabilities has increased. The approximately $252 million of losses recorded in SAP on its fair value option liabilities (excluding derivative liabilities) during 2009 was principally due to the maturing of debt on which Citi has elected the fair value option.

Credit Valuation Adjustment on Derivative Positions, Excluding Monoline Insurers

The approximately $1,283 million net gain in derivative positions held in SAP during 2009 was due to the narrowing spreads of Citi's counterparties on its derivative assets. See "Derivatives—Fair Valuation Adjustments for Derivatives" for further discussion.

Accretion on Reclassified Assets

In the fourth quarter of 2008, Citi Holdings reclassified $33.3 billion of debt securities within SAP from trading securities to HTM investments, $4.7 billion of debt securities from trading securities to AFS, and $15.7 billion of loans from held-for-sale to held-for-investment. All assets were reclassified with an amortized cost equal to the fair value on the date of reclassification. The difference between the amortized cost basis and the expected principal cash flows is treated as a purchase discount and accreted into income over the remaining life of the security or loan. All of these reclassified debt securities and loans are held in SAP. During 2009, SAP recognized approximately $1,994 million of interest revenue from this accretion.

CORPORATE/OTHER

Corporate/Other includes global staff functions (includes finance, risk, human resources, legal and compliance) and other corporate expense, global operations and technology (O&T), residual Corporate Treasury and Corporate items. At December 31, 2009, this segment had approximately $230 billion of assets, consisting primarily of the Company's liquidity portfolio, including $110 billion of cash and cash equivalents.

In millions of dollars	2009	2008	2007
Net interest revenue	$ (1,663)	$ (2,680)	$ (2,008)
Non-interest revenue	(8,893)	422	(302)
Total revenues, net of interest expense	$ (10,556)	$ (2,258)	$ (2,310)
Total operating expenses	$ 1,420	$ 510	$ 1,813
Provisions for loan losses and for benefits and claims	(1)	1	(3)
(Loss) from continuing operations before taxes	$ (11,975)	$ (2,769)	$ (4,120)
Income taxes (benefits)	(4,369)	(587)	(1,446)
(Loss) from continuing operations	$ (7,606)	$ (2,182)	$ (2,674)
Income (loss) from discontinued operations, net of taxes	(445)	4,002	708
Net income (loss) before attribution of noncontrolling interests	$ (8,051)	$ 1,820	$ (1,966)
Net income attributable to noncontrolling interests	—	—	2
Net income (loss)	$ (8,051)	$ 1,820	$ (1,968)

2009 vs. 2008

Revenues, net of interest expense declined, primarily due to the pretax loss on debt extinguishment related to the repayment of the $20 billion of TARP trust preferred securities and the pretax loss in connection with the exit from the loss-sharing agreement with the U.S. government. Revenues also declined, due to the absence of the 2008 sale of Citigroup Global Services Limited recorded in O&T. This was partially offset by a pretax gain related to the exchange offers, revenues and higher intersegment eliminations.

Operating expenses increased, primarily due to intersegment eliminations and increases in compensation, partially offset by lower repositioning reserves.

2008 vs. 2007

Revenues, net of interest expense increased primarily due to the gain in 2007 on the sale of certain corporate-owned assets and higher intersegment eliminations, partially offset by improved Treasury hedging activities.

Operating expenses declined, primarily due to lower restructuring charges in 2008 as well as reductions in incentive compensation and benefits expense.

BALANCE SHEET REVIEW

In billions of dollars	December 31, 2009	2008	Increase (decrease)	% Change
Assets

Total liabilities and stockholders' equity	$ 1,857	$ 1,938	$ (81)	(4)%

Loans

Loans are an extension of credit to individuals, corporations, or government institutions. Loans vary across regions and industries and primarily include credit cards, mortgages, other real estate lending, personal loans, auto loans, student loans, and corporate loans. The majority of loans are carried at cost with a minimal amount recorded at fair value.

Consumer and corporate loans comprised 72% and 28%, respectively, of Citi's total loans (net of unearned income and before the allowance for loan losses) as of December 31, 2009.

During 2009, consumer loans (net of allowance for loan losses) decreased by $64 billion, or 14%, primarily due to a:

- $33 billion, or 12%, decrease in mortgage and real estate loans; and
- $17 billion, or 19%, decrease in credit card loans, mostly in the U.S.

These decreases were driven by tightened lending standards and credit activity during the year.

During 2009, corporate loans decreased $46 billion, or 22%, primarily driven by a decrease of $21 billion, or 20%, in commercial and industrial loans.

During 2009, average consumer loans (net of unearned income) of $456 billion yielded an average rate of 7.8%, compared to $513 billion and 8.9% in the prior year. Average corporate loans of $190 billion yielded an average rate of 6.3% in 2009, compared to $221 billion and 7.7% in the prior year.

For further information, see "Loans Outstanding" under "Managing Global Risk—Credit Risk" and Note 17 to the Consolidated Financial Statements.

Trading Account Assets (Liabilities)

Trading account assets include debt and marketable equity securities, derivatives in a receivable position, residual interests in securitizations, and physical commodities inventory. In addition, certain assets that Citigroup has elected to carry at fair value, such as certain loans and purchase guarantees, are also included in Trading account assets. Trading account liabilities include securities sold, not yet purchased (short positions) and derivatives in a net payable position as well as certain liabilities that Citigroup has elected to carry at fair value.

All Trading account assets and Trading account liabilities are reported at their fair value, except for physical commodities inventory which is carried at the lower of cost or market, with unrealized gains and losses recognized in current income.

During 2009, Trading account assets decreased by $35 billion, or 9%, due to a:

- $56 billion, or 49%, decrease in revaluation gains primarily consisting of decreases in interest rate and foreign exchange contracts as well as a decrease in netting agreements;
- $16 billion, or 30%, decrease in mortgage loan securities driven by decreased agency and subprime debt;
- $20 billion, or 172%, increase in U.S. Treasury and federal agency securities;
- $15 billion, or 27%, increase in foreign government securities; and
- $7 billion, or 9%, increase in corporate and other debt securities.

Total average Trading account assets were $267 billion in 2009, compared to $373 billion in 2008, yielding average rates of 4.0% and 4.7%, respectively.

During 2009, Trading account liabilities decreased by $28 billion, or 17%, due to a:

- $51 billion, or 44%, decrease in revaluation losses primarily due to decreases in interest rate, foreign exchange and equity contracts as well as a decrease in netting agreements; and
- $23 billion, or 45%, increase in securities sold, not yet purchased, comprised of an $18 billion increase in debt securities, with U.S. Treasury securities increasing by $5 billion.

In 2009, average Trading account liabilities were $60 billion, yielding an average rate of 0.5%, compared to $75 billion and 1.7% in the prior year.

For further discussion regarding Trading account assets and Trading account liabilities, see Note 15 to the Consolidated Financial Statements.

Federal Funds Sold (Purchased) and Securities Borrowed (Loaned) or Purchased (Sold) Under Agreements to Resell (Repurchase)

Federal funds sold and federal funds purchased consist of unsecured advances of excess balances in reserve accounts held at Federal Reserve banks. When Citigroup advances federal funds to a third party, it is selling its excess reserves. Similarly, when Citigroup receives federal funds, it is purchasing reserves from a third party. These interest-bearing transactions typically have an original maturity of one business day.

Securities borrowed and securities loaned are recorded at the amount of cash advanced or received, with a minimal amount adjusted for fair value. With respect to securities borrowed, Citi pays cash collateral in an amount in excess of the market value of securities borrowed, and receives excess in the case of securities loaned. Citigroup monitors the market value of securities borrowed and loaned on a daily basis with additional collateral advanced or obtained as necessary. Interest received or paid for these transactions is recorded in interest income or interest expense.

Securities purchased under agreements to resell and securities sold under agreements to repurchase are treated as collateralized financing transactions and are primarily carried at fair value since January 1, 2007. Citigroup's policy is to take possession of securities purchased under agreements to resell. The market value of securities to be repurchased and resold is monitored, and additional collateral is obtained where appropriate to protect against credit exposure.

During 2009, the increase of $38 billion, or 21%, in federal funds sold and securities borrowed or purchased under agreements to resell, and the decrease of $51 billion, or 25%, in federal funds purchased and securities loaned or sold under agreements to repurchase were primarily driven by Citi's liquidity management objective of increasing cash and liquid securities positions.

For further information regarding these balance sheet categories, see Note 13 to the Consolidated Financial Statements.

Investments

Investments consist of debt and equity securities that are available-for-sale, debt securities that are held-to-maturity, non-marketable equity securities that are carried at fair value, and non-marketable equity securities carried at cost. Debt securities include bonds, notes and redeemable preferred stock, as well as loan-backed securities (such as mortgage-backed securities) and other structured notes. Marketable and non-marketable equity securities carried at fair value include common and nonredeemable preferred stock. These instruments provide Citi with long-term investment opportunities while in most cases remaining relatively liquid.

Non-marketable equity securities carried at cost primarily include equity shares issued by the Federal Reserve Bank and the Federal Home Loan Bank that Citigroup is required to hold.

Investment securities classified as available-for-sale are primarily carried at fair value with the changes in fair value generally recognized in stockholders' equity (accumulated other comprehensive income). Declines in fair value that are deemed other-than-temporary, as well as gains and losses from the sale of these investment securities, are recognized in current earnings. Certain investments in non-marketable equity securities and certain investments that would otherwise be accounted for using the equity method are carried at fair value. Changes in fair value of such investments are recorded in earnings. Debt securities classified as held-to-maturity are carried at cost unless a decline in fair value below cost is deemed other-than-temporary, in which case such a decline is recorded in current earnings.

During 2009, investments increased by $50 billion, or 20%, principally due to a:

- $64 billion increase in available-for-sale securities (U.S. Treasury and federal agency securities, $30 billion; foreign governments, $22 billion; and corporate, $10 billion); and
- $13 billion decrease in held-to-maturity securities (predominantly asset-backed securities).

For further information regarding investments, see Note 16 to the Consolidated Financial Statements.

Other Assets

Other assets are composed of cash and due from banks, deposits with banks, brokerage receivables, goodwill, intangibles, and various other assets.

During 2009, Other assets decreased $24 billion, or 5%, due to a:

- $11 billion decrease in Brokerage receivables, driven by the absence of unsettled customer trades as markets have become more liquid;
- $5 billion decrease in Intangible assets and $2 billion decrease in Goodwill, predominantly from the sale of Nikko Cordial Securities and Nikko Asset Management and the MSSB JV with Morgan Stanley;
- $3 billion decrease in Deposits with banks, from decreased deposits with the Federal Reserve used to purchase highly liquid securities; and
- $5 billion decrease in various other assets.

For further information regarding Goodwill and Intangible assets, see Note 19 to the Consolidated Financial Statements. For further discussion on Brokerage receivables, see Note 14 to the Consolidated Financial Statements.

Deposits

Deposits represent customer funds that are payable on demand or upon maturity. The majority of deposits are carried at cost, with a minimal amount recorded at fair value. Deposits can be interest-bearing or non-interest-bearing. Interest-bearing deposits payable by foreign and U.S. domestic banking subsidiaries of Citigroup comprise 58% and 28% of total deposits, respectively, while non-interest-bearing deposits comprise 5% and 9% of total deposits, respectively.

During 2009, total deposits increased by $62 billion, or 8%. Total average deposits increased $10 billion or 1% during 2009.

For more information on deposits, see “Capital Resources and Liquidity—Liquidity.”

Debt

Debt is composed of both short-term and long-term borrowings. It includes commercial paper, borrowings from unaffiliated banks, senior notes (including collateralized advances from the Federal Home Loan Bank), subordinated notes and trust preferred securities. The majority of debt is carried at cost, with approximately $27 billion recorded at fair value.

During 2009, total debt decreased by $53 billion, or 11%, with Short-term borrowings decreasing by $58 billion, or 46%. Long-term debt increased by only $5 billion, or 1%.

The decrease in Short-term borrowings was due to a decline of $39 billion in other funds borrowed and $19 billion in commercial paper primarily caused by decreased need for short-term funding due to excess liquidity caused by increased deposits and a reduction in assets.

Average commercial paper outstanding in 2009 was $25 billion with an average rate of 1.0%, compared to $32 billion and 3.1% in 2008. Average other funds borrowed in 2009 were $77 billion, with an average rate of 1.5%, compared to $83 billion and 1.7% in the prior year.

Average long-term debt outstanding during 2009 was $345 billion, compared to $348 billion in 2008, with an average rate of 3.6% and 4.6%, respectively.

For more information on debt, see Note 20 to the Consolidated Financial Statements and “Capital Resources and Liquidity—Liquidity.”

SEGMENT BALANCE SHEET AT DECEMBER 31, 2009

In millions of dollars	Regional Consumer Banking	Institutional Clients Group	Subtotal Citicorp	Citi Holdings	Corporate/Other, Discontinued Operations and Consolidating Eliminations	Total Citigroup Consolidated

The above supplemental information reflects Citigroup's consolidated GAAP balance sheet by reporting segment as of December 31, 2009. The respective segment information closely depicts the assets and liabilities managed by each segment as of such date. While this presentation is not defined by GAAP, Citi believes that these non-GAAP financial measures enhance investors' understanding of the balance sheet components managed by the underlying business segments, as well as the beneficial interrelationship of the asset and liability dynamics of the balance sheet components among Citi's business segments.

CAPITAL RESOURCES AND LIQUIDITY

CAPITAL RESOURCES

Overview

Capital has historically been generated by earnings from Citi's operating businesses. Citi may also augment its capital through issuances of common stock, convertible preferred stock, preferred stock, equity issued through awards under employee benefit plans, and, in the case of regulatory capital, through the issuance of subordinated debt underlying trust preferred securities. In addition, the impact of future events on Citi's business results, such as corporate and asset dispositions, as well as changes in accounting standards, also affect Citi's capital levels.

Generally, capital is used primarily to support assets in Citi's businesses and to absorb market, credit, or operational losses. While capital may be used for other purposes, such as to pay dividends or repurchase common stock, Citi's ability to utilize its capital for these purposes is currently restricted due to its agreements with the U.S. government, generally for so long as the U.S. government continues to hold Citi's common stock or trust preferred securities. See also "Supervision and Regulation" below.

Citigroup's capital management framework is designed to ensure that Citigroup and its principal subsidiaries maintain sufficient capital consistent with Citi's risk profile and all applicable regulatory standards and guidelines, as well as external rating agency considerations. The capital management process is centrally overseen by senior management and is reviewed at the consolidated, legal entity, and country level.

Senior management is responsible for the capital management process mainly through Citigroup's Finance and Asset and Liability Committee (FinALCO), with oversight from the Risk Management and Finance Committee of Citigroup's Board of Directors. The FinALCO is composed of the senior-most management of Citigroup for the purpose of engaging management in decision-making and related discussions on capital and liquidity matters. Among other things, FinALCO's responsibilities include: determining the financial structure of Citigroup and its principal subsidiaries; ensuring that Citigroup and its regulated entities are adequately capitalized in consultation with its regulators; determining appropriate asset levels and return hurdles for Citigroup and individual businesses; reviewing the funding and capital markets plan for Citigroup; and monitoring interest rate risk, corporate and bank liquidity, and the impact of currency translation on non-U.S. earnings and capital.

Capital Ratios

Citigroup is subject to the risk-based capital guidelines issued by the Federal Reserve Board. Historically, capital adequacy has been measured, in part, based on two risk-based capital ratios, the Tier 1 Capital and Total Capital (Tier 1 Capital + Tier 2 Capital) ratios. Tier 1 Capital consists of the sum of "core capital elements," such as qualifying common stockholders' equity, as adjusted, qualifying noncontrolling interests, and qualifying mandatorily redeemable securities of subsidiary trusts, principally reduced by goodwill, other disallowed intangible assets, and disallowed deferred tax assets. Total Capital also includes "supplementary" Tier 2 Capital elements, such as qualifying subordinated debt and a limited portion of the allowance for credit losses. Both measures of capital adequacy are stated as a percentage of risk-weighted assets. Further, in conjunction with the conduct of the 2009 Supervisory Capital Assessment Program (SCAP), U.S. banking regulators developed a new measure of capital termed "Tier 1 Common," which has been defined as Tier 1 Capital less non-common elements, including qualifying perpetual preferred stock, qualifying noncontrolling interests, and qualifying mandatorily redeemable securities of subsidiary trusts.

Citigroup's risk-weighted assets are principally derived from application of the risk-based capital guidelines related to the measurement of credit risk. Pursuant to these guidelines, on-balance-sheet assets and the credit equivalent amount of certain off-balance-sheet exposures (such as financial guarantees, unfunded lending commitments, letters of credit, and derivatives) are assigned to one of several prescribed risk-weight categories based upon the perceived credit risk associated with the obligor, or if relevant, the guarantor, the nature of the collateral, or external credit ratings. Risk-weighted assets also incorporate a measure for market risk on covered trading account positions and all foreign exchange and commodity positions whether or not carried in the trading account. Excluded from risk-weighted assets are any assets, such as goodwill and deferred tax assets, to the extent required to be deducted from regulatory capital. See "Components of Capital Under Regulatory Guidelines" below.

Citigroup is also subject to a Leverage ratio requirement, a non-risk-based measure of capital adequacy, which is defined as Tier 1 Capital as a percentage of quarterly adjusted average total assets.

To be "well capitalized" under federal bank regulatory agency definitions, a bank holding company must have a Tier 1 Capital ratio of at least 6%, a Total Capital ratio of at least 10%, and a Leverage ratio of at least 3%, and not be subject to a Federal Reserve Board directive to maintain higher capital levels. The following table sets forth Citigroup's regulatory capital ratios as of December 31, 2009 and December 31, 2008.

Citigroup Regulatory Capital Ratios

At year end	2009	2008
Tier 1 Common	9.60%	2.30%
Tier 1 Capital	11.67	11.92
Total Capital (Tier 1 Capital and Tier 2 Capital)	15.25	15.70
Leverage	6.89	6.08

As noted in the table above, Citigroup was "well capitalized" under the federal bank regulatory agency definitions at year end for both 2009 and 2008.

Components of Capital Under Regulatory Guidelines

In millions of dollars at year end	2009	2008 (
Tier 1 Common		
Citigroup common stockholders' equity	$ 152,388	$ 70,966
Less: Net unrealized losses on securities available-for-sale, net of tax (2)	(4,347)	(9,647)
Less: Accumulated net losses on cash flow hedges, net of tax	(3,182)	(5,189)
Less: Pension liability adjustment, net of tax (3)	(3,461)	(2,615)
Less: Cumulative effect included in fair value of financial liabilities attributable to the change in own credit worthiness, net of tax (4)	760	3,391
Less: Disallowed deferred tax assets (5)	26,044	23,520
Less: Intangible assets:		
Goodwill	25,392	27,132
Other disallowed intangible assets	5,899	10,607
Other	(788)	(840)
Total Tier 1 Common	$ 104,495	$ 22,927
Qualifying perpetual preferred stock	$ 312	$ 70,664
Qualifying mandatorily redeemable securities of subsidiary trusts	19,217	23,899
Qualifying noncontrolling interests	1,135	1,268
Other	1,875	—
Total Tier 1 Capital	$ 127,034	$ 118,758
Tier 2 Capital		
Allowance for credit losses (6)	$ 13,934	$ 12,806
Qualifying subordinated debt (7)	24,242	24,791
Net unrealized pretax gains on available-for-sale equity securities (2)	773	43
Total Tier 2 Capital	$ 38,949	$ 37,640
Total Capital (Tier 1 Capital and Tier 2 Capital)	$ 165,983	$ 156,398
Risk-weighted assets (8)	$ 1,088,526	$ 996,247

(1) Reclassified to conform to the current period presentation.

(2) Tier 1 Capital excludes net unrealized gains (losses) on available-for-sale debt securities and net unrealized gains on available-for-sale equity securities with readily determinable fair values, in accordance with risk-based capital guidelines. In arriving at Tier 1 Capital, banking organizations are required to deduct net unrealized losses on available-for-sale equity securities with readily determinable fair values, net of tax. Banking organizations are permitted to include in Tier 2 Capital up to 45% of net unrealized pretax gains on available-for-sale equity securities with readily determinable fair values.

(3) The Federal Reserve Board granted interim capital relief for the impact of ASC 715-20, Compensation—Retirement Benefits—Defined Benefits Plans (formerly SFAS 158).

(4) The impact of including Citigroup's own credit rating in valuing financial liabilities for which the fair value option has been elected is excluded from Tier 1 Capital, in accordance with risk-based capital guidelines.

(5) Of Citi's approximately $46 billion of net deferred tax assets at December 31, 2009, approximately $15 billion of such assets were includable without limitation in regulatory capital pursuant to risk-based capital guidelines, while approximately $26 billion of such assets exceeded the limitation imposed by these guidelines and, as "disallowed deferred tax assets," were deducted in arriving at Tier 1 Capital. Citigroup's other approximately $5 billion of net deferred tax assets primarily represented approximately $3 billion of deferred tax effects of unrealized gains and losses on available-for-sale debt securities and approximately $2 billion of deferred tax effects of the pension liability adjustment, which are permitted to be excluded prior to deriving the amount of net deferred tax assets subject to limitation under the guidelines. Citi had approximately $24 billion of disallowed deferred tax assets at December 31, 2008.

(6) Includable up to 1.25% of risk-weighted assets. Any excess allowance is deducted in arriving at risk-weighted assets.

(7) Includes qualifying subordinated debt in an amount not exceeding 50% of Tier 1 Capital.

(8) Includes risk-weighted credit equivalent amounts, net of applicable bilateral netting agreements, of $64.5 billion for interest rate, commodity, and equity derivative contracts, foreign exchange contracts, and credit derivatives as of December 31, 2009, compared with $102.9 billion as of December 31, 2008. Market risk equivalent assets included in risk-weighted assets amounted to $80.8 billion at December 31, 2009 and $101.8 billion at December 31, 2008. Risk-weighted assets also include the effect of certain other off-balance-sheet exposures, such as unused lending commitments and letters of credit, and reflect deductions such as certain intangible assets and any excess allowance for credit losses.

2009 Actions Significantly Impacting Citigroup's Capital

Primarily as a result of the preferred stock and trust preferred securities exchange offers consummated in the third quarter of 2009, and capital raised in connection with the $20 billion TARP repayment as well as the exiting of the loss-sharing agreement in the fourth quarter of 2009, the overall quality of Citigroup's capital was enhanced, with Tier 1 Common increasing by approximately $82 billion from December 31, 2008 to December 31, 2009. In addition, Citigroup's Tangible Common Equity (TCE) increased by approximately $87 billion from December 31, 2008 to December 31, 2009. Tier 1 Common and related capital adequacy ratios are measures used and relied upon by U.S. banking regulators, while TCE is a capital adequacy metric used and relied upon by industry analysts. However, both metrics and related ratios are considered "non-GAAP financial measures" for SEC purposes. See "Capital Ratios," "Components of Capital Under Regulatory Guidelines," and "Tangible Common Equity" for additional information on these measures.

2009 Actions Significantly Impacting Citigroup's Risk-Weighted Assets

In the fourth quarter of 2009, Citigroup entered into an agreement to exit the loss-sharing agreement with the U.S. Treasury, FDIC, and Federal Reserve Bank of New York, which covered losses on a specifically designated portfolio, principally comprised of consumer assets, and initially valued at approximately $301 billion as of November 21, 2008. Under the agreement, these designated assets had been risk-weighted at 20% for purposes of calculating Citi's risk-based capital ratios. With the exiting of the agreement, commencing December 31, 2009, Citigroup discontinued risk-weighting these assets at 20%. Rather, the assets were risk-weighted as required in accordance with risk-based capital guidelines, as described above, and consistent to that prior to entering into the agreement. The exiting of the loss-sharing agreement increased Citigroup's risk-weighted assets by approximately $136 billion, and correspondingly decreased Citi's Tier 1 Common, Tier 1 Capital, and Total Capital ratios by approximately 125 basis points, approximately 157 basis points, and approximately 183 basis points, respectively, at December 31, 2009.

In addition, during the first half of 2009, all three of Citigroup's primary credit card securitization trusts—the Master Trust, Omni Trust, and Broadway Trust—had bonds placed on ratings watch with negative implications by rating agencies. As a result of the ratings watch status, certain actions were taken by Citi with respect to each of the trusts. In general, the actions subordinated certain senior interests in the trust assets that were retained by Citi, which effectively placed these interests below investor interests in terms of priority of payment.

As a result of these actions, based on the applicable regulatory capital rules, Citigroup began including the sold assets for all three of the credit card securitization trusts in its risk-weighted assets for purposes of calculating its risk-based capital ratios during 2009. The increase in risk-weighted assets occurred in the quarter during 2009 in which the respective actions took place. The effect of these changes increased Citigroup's risk-weighted assets by approximately $82 billion, and decreased Citigroup's Tier 1 Capital ratio
by approximately 100 basis points each as of March 31, 2009, with respect to the Master and Omni Trusts. The inclusion of the Broadway Trust increased Citigroup's risk-weighted assets by an additional approximate $900 million at June 30, 2009. All bond ratings for each of the trusts have been affirmed by the rating agencies, and no downgrades had occurred as of December 31, 2009.

2010 Accounting Changes Significantly Impacting Citigroup's Capital—Elimination of Qualifying Special Purpose Entities (QSPEs) and Changes in the Consolidation Model for Variable Interest Entities (VIEs)

Changes that the FASB adopted in 2009 regarding sales treatment for assets and consolidation of off-balance-sheet VIEs, as promulgated in SFAS 166 and SFAS 167, respectively, will have a significant and immediate impact on Citigroup's capital ratios beginning in the first quarter of 2010. Specifically, the pro forma impact on Citigroup's capital ratios of the adoption on January 1, 2010 of SFAS 166 and SFAS 167 (based on financial information as of December 31, 2009) would be as follows:

	As of December 31, 2009		
	As reported	Pro forma	Impact
Tier 1 Common	9.60%	8.21%	(139) bps
Tier 1 Capital	11.67	10.26	(141) bps
Total Capital	15.25	13.82	(143) bps
Leverage	6.89	6.14	(75) bps
TCE (TCE/RWA)	10.86%	9.99%	(87) bps

For more information, see Notes 1 and 23 to the Consolidated Financial Statements, including "Funding, Liquidity Facilities and Subordinate Interests" below.

Common Stockholders' Equity

Citigroup's common stockholders' equity increased during 2009 by $81.4 billion to $152.4 billion, and represented 8.2% of total assets as of December 31, 2009. Citigroup's common stockholders' equity was $71.0 billion, which represented 3.7% of total assets, at December 31, 2008.

The table below summarizes the change in Citigroup's common stockholders' equity during 2009:

In billions of dollars	
Common stockholders' equity, December 31, 2008	$ 71.0
Net loss (1) (2)	(1.6)

Employee benefit plans and other activities	1.0
Dividends	(3.4)
Exchange offers (1)	58.8
Issuance of common equity and T-DECs	20.3
Net change in accumulated other comprehensive income (loss), net of tax	6.3
Common stockholders' equity, December 31, 2009	$ 152.4

(1) Net loss includes a $0.9 billion after-tax gain related to the conversion of trust preferred securities held by public investors into common stock, pursuant to Citi's public and private exchange offers consummated in July 2009 and completed in their entirety in September 2009.

(2) Net loss includes a $6.2 billion after-tax loss associated with the $20 billion TARP repayment as well as the exiting of the loss-sharing agreement in December 2009.

As of December 31, 2009, approximately $6.7 billion of stock repurchases remained under Citi's authorized repurchase programs. No material repurchases were made in 2009 or 2008. In addition, for so long as the U.S. government holds any Citigroup common stock or trust preferred securities acquired pursuant to the preferred stock exchange offers, Citigroup has agreed not to acquire, repurchase, or redeem any Citigroup equity or trust preferred securities, other than pursuant to administering its employee benefit plans or other customary exceptions, or with the consent of the U.S. government. See also "Supervision and Regulation."

Tangible Common Equity

TCE, as defined by Citigroup, represents Common equity less Goodwill and Intangible assets (other than Mortgage Servicing Rights (MSRs)) net of the related net deferred taxes. Other companies may calculate TCE in a manner different from that of Citigroup. Citi's TCE was $118.2 billion and $31.1 billion at December 31, 2009 and 2008, respectively.

The TCE ratio (TCE divided by risk-weighted assets) was 10.9% and 3.1% at December 31, 2009 and 2008, respectively.

A reconciliation of Citigroup's total stockholders' equity to TCE follows:

In millions of dollars at year end, except ratios	2009	2008
Total Citigroup stockholders' equity	$ 152,700	$ 141,630
Less:		
Preferred stock	312	70,664
Common equity	$ 152,388	$ 70,966
Less:		
Goodwill	25,392	27,132
Intangible assets (other than MSRs)	8,714	14,159
Related net deferred taxes	68	(1,382)
Tangible common equity (TCE)	$ 118,214	$ 31,057
Tangible assets		
GAAP assets	$ 1,856,646	$ 1,938,470
Less:		
Goodwill	25,392	27,132
Intangible assets (other than MSRs)	8,714	14,159
Related deferred tax assets	386	1,285
Tangible assets (TA)	$ 1,822,154	$ 1,895,894
Risk-weighted assets (RWA)	$ 1,088,526	$ 996,247
TCE/TA ratio	6.49%	1.64%
TCE ratio (TCE/RWA)	10.86%	3.12%

Capital Resources of Citigroup's Depository Institutions

Citigroup's U.S. subsidiary depository institutions are subject to risk-based capital guidelines issued by their respective primary federal bank regulatory agencies, which are similar to the guidelines of the Federal Reserve Board. To be "well capitalized" under these regulatory definitions, Citigroup's depository institutions must have a Tier 1 Capital ratio of at least 6%, a Total Capital (Tier 1 Capital + Tier 2 Capital) ratio of at least 10%, and a Leverage ratio of at least 5%, and not be subject to a regulatory directive to meet and maintain higher capital levels.

At December 31, 2009, all of Citigroup's subsidiary depository institutions were "well capitalized" under federal bank regulatory agency definitions, including Citigroup's primary depository institution, Citibank, N.A., as noted in the following table:

Citibank, N.A. Components of Capital and Ratios Under Regulatory Guidelines

In billions of dollars at year end	2009	2008
Tier 1 Capital	$ 96.8	$ 71.0
Total Capital (Tier 1 Capital and Tier 2 Capital)	110.6	108.4
Tier 1 Capital ratio	13.16%	9.94%
Total Capital ratio	15.03	15.18
Leverage ratio (1)	8.31	5.82

(1) Tier 1 Capital divided by each period's quarterly adjusted average total assets.

Citibank, N.A. had a $2.8 billion net loss for 2009. In addition, during 2009, Citibank, N.A. received capital contributions from its immediate parent company, Citicorp, in the amount of $33.0 billion. Total subordinated notes issued to Citibank, N.A.'s immediate parent company, Citicorp, included in Citibank, N.A.'s Tier 2 Capital declined from $28.2 billion outstanding at December 31, 2008 to $4.0 billion outstanding at December 31, 2009, reflecting the redemption of $24.2 billion of subordinated notes during 2009.

The following table presents the estimated sensitivity of Citigroup's and Citibank, N.A.'s capital ratios to changes of $100 million in Tier 1 Common, Tier 1 Capital, or Total Capital (numerator), or changes of $1 billion in risk-weighted assets or adjusted average total assets (denominator) based on financial information as of December 31, 2009. This information is provided for the purpose of analyzing the impact that a change in Citigroup's and

Citibank, N.A.'s financial position or results of operations could have on these ratios. These sensitivities only consider a single change to either a component of capital, risk-weighted assets, or adjusted average total assets. Accordingly, an event that affects more than one factor may have a larger basis point impact than is reflected in this table.

	Tier 1 Common ratio		Tier 1 Capital ratio		Total Capital ratio		Leverage ratio	
	Impact of $100 million change in Tier 1 Common	Impact of $1 billion change in risk-weighted assets	Impact of $100 million change in Tier 1 Capital	Impact of $1 billion change in risk-weighted assets	Impact of $100 million change in Total Capital	Impact of $1 billion change in risk-weighted assets	Impact of $100 million change in Tier 1 Capital	Impact of $1 billion change in adjusted average total assets
Citigroup	0.9 bps	0.9 bps	0.9 bps	1.1 bps	0.9 bps	1.4 bps	0.5 bps	0.4 bps
Citibank, N.A.	—	—	1.4 bps	1.8 bps	1.4 bps	2.0 bps	0.9 bps	0.7 bps

Broker-Dealer Subsidiaries

At December 31, 2009, Citigroup Global Markets Inc., a broker-dealer registered with the SEC that is an indirect wholly owned subsidiary of Citigroup Global Markets Holdings Inc., had net capital, computed in accordance with the SEC's net capital rule, of $10.9 billion, which exceeded the minimum requirement by $10.2 billion.

In addition, certain of Citi's broker-dealer subsidiaries are subject to regulation in the other countries in which they do business, including requirements to maintain specified levels of net capital or its equivalent. Citigroup's broker-dealer subsidiaries were in compliance with their capital requirements at December 31, 2009. The requirements applicable to these subsidiaries in the U.S. and other jurisdictions may be subject to political uncertainty and potential change in light of the recent financial crisis and regulatory reform proposals currently being considered at both the legislative and regulatory levels.

Regulatory Capital Standards Developments

Citigroup supports the move to a new set of risk-based capital standards, published on June 26, 2004 (and subsequently amended in November 2005) by the Basel Committee on Banking Supervision, consisting of central banks and bank supervisors from 13 countries. The international version of the Basel II framework will allow Citigroup to leverage internal risk models used to measure credit, operational, and market risk exposures to drive regulatory capital calculations.

On December 7, 2007, the U.S. banking regulators published the rules for large banks to comply with Basel II in the U.S. These rules require Citigroup, as a large and internationally active bank, to comply with the most advanced Basel II approaches for calculating credit and operational risk capital requirements. The U.S. implementation timetable consists of a parallel calculation period under the current regulatory capital regime (Basel I) and Basel II, starting anytime between April 1, 2008 and April 1, 2010, followed by a three-year transition period, typically starting 12 months after the beginning of parallel reporting. U.S. regulators have reserved the right to change how Basel II is applied in the U.S. following a review at the end of the second year of the transitional period, and to retain the existing prompt corrective action and leverage capital requirements applicable to banking organizations in the U.S. Citigroup intends to implement Basel II within the timeframe required by the final rules. The Basel II (or its successor) requirements are the subject of political uncertainty and potential tightening or other change in light of the recent financial crisis and regulatory reform proposals currently being considered at both the legislative and regulatory levels. See also "Risk Factors."

FUNDING AND LIQUIDITY

General

Citigroup's cash flows and liquidity needs are primarily generated within its operating subsidiaries. Exceptions exist for major corporate items, such as the TARP repayment, and for equity and certain long-term debt issuances, which take place at the Citigroup corporate level. Generally, Citi's management of funding and liquidity is designed to optimize availability of funds as needed within Citi's legal and regulatory structure. Various constraints limit certain subsidiaries' ability to pay dividends or otherwise make funds available. Consistent with these constraints, Citigroup's primary objectives for funding and liquidity management are established by entity and in aggregate across three main operating entities, as follows: (i) Citigroup, as the parent holding company; (ii) banking subsidiaries; and (iii) non-banking subsidiaries.

Citigroup sources of funding include deposits, collateralized financing transactions and a variety of unsecured short- and long-term instruments, including federal funds purchased, commercial paper, long-term debt, trust preferred securities, preferred stock and common stock.

As a result of continued deleveraging, growth in deposits, term securitization under government and non-government programs, the issuance of long-term debt under the FDIC's Temporary Liquidity Guarantee Program (TLGP) and the issuance of non-guaranteed debt (particularly during the latter part of 2009), Citigroup substantially increased its balances of cash and highly liquid securities and reduced its short-term borrowings during 2009.

Citi has focused on growing a geographically diverse retail and corporate deposit base that stood at approximately $836 billion as of December 31, 2009, up $62 billion compared to December 31, 2008. On a volume basis, deposit increases occurred in Regional Consumer Banking, particularly in North America, and in Transaction Services due to growth in all regions and strength in Treasury and Trade Solutions. Excluding the impact of foreign exchange, Citi's deposit base has increased sequentially over each of the last six quarters. The deposits are diversified across products and regions, with approximately 64% outside of the U.S. This diversification provides Citi with an important and low-cost source of funding. A significant portion of these deposits has been, and is currently expected to be, long-term and stable and is considered to be core. During 2010, although our deposit balances may be subject to seasonal fluctuations, we anticipate pursuing modest deposit growth while concentrating on widening spreads.

At December 31, 2009, long-term debt and commercial paper outstanding for Citigroup, Citigroup Global Market Holdings Inc. (CGMHI), Citigroup Funding Inc. (CFI) and other Citigroup subsidiaries, collectively, were as follows:

In billions of dollars	Citigroup parent company	CGMHI (1)	CFI (1)	Other Citigroup subsidiaries
Long-term debt	$ 197.8 (3)	$ 13.4	$ 55.5	$ 97.3 (2)
Commercial paper	$ —	$ —	$ 9.8	$ 0.4

(1) Citigroup guarantees all of CFI's debt and CGMHI's publicly issued securities.
(2) At December 31, 2009, approximately $24.1 billion relates to collateralized advances from the Federal Home Loan Bank.
(3) Of this amount, approximately $64.6 billion is guaranteed by the FDIC with $6.3 billion maturing in 2010, $20.3 billion maturing in 2011 and $38 billion maturing in 2012.

The table below details the long-term debt issuances of Citigroup during the past five quarters.

In billions of dollars	4Q08	1Q09	2Q09	3Q09	4Q09	2009 Total
Debt issued under TLGP guarantee	$ 5.8	$ 21.9	$ 17.0	$ 10.0	$ 10.0	$ 58.9
Debt issued without TLGP guarantee:						
Citigroup parent company/CFI	0.3	2.0	7.4	12.6	4.0 (3)	26.0
Other Citigroup subsidiaries	0.5	0.5	10.1 (1)	7.9 (2)	5.8 (4)	24.3
Total	$ 6.6	$ 24.4	$ 34.5	$ 30.5	$ 19.8	$ 109.2

(1) Includes $8.5 billion issued through the U.S. government-sponsored Department of Education Conduit Facility, and $1 billion issued by Citibank Pty. Ltd. Australia and guaranteed by the Commonwealth of Australia.
(2) Includes $3.3 billion issued through the U.S. government-sponsored Department of Education Conduit Facility, and $1 billion issued by Citibank Pty. Ltd. Australia and guaranteed by the Commonwealth of Australia.
(3) Includes $1.9 billion of senior debt issued under remarketing of $1.9 billion of Citigroup trust preferred securities held by the Abu Dhabi Investment Authority (ADIA) to provide funds for settlement of the forward stock purchase contract in March 2010, as provided for by the agreement between Citi and

ADIA.

(4) Includes $1.4 billion issued through the U.S. government-sponsored Department of Education Conduit Facility.

See Note 20 to the Consolidated Financial Statements for further detail on Citigroup's and its affiliates' long-term debt and commercial paper outstanding. Commercial paper outstanding as of December 31, 2009 has decreased from $29 billion as of December 31, 2008 to $10 billion. In 2010, commercial paper is expected to continue to be an important source of funding for Citi, maintained at approximately the $10 billion level.

The TLGP expired on October 31, 2009 and Citigroup and its affiliates elected not to participate in any FDIC-approved extension of the program. In addition, as of the end of 2009, Citigroup had substantially eliminated utilization of short-term government funding programs.

In addition to growing its deposit base and engaging in long-term debt funding, Citi has been actively building its structural liquidity by reducing total assets. Total assets as of December 31, 2009 have declined 4% as compared to December 31, 2008. Loans (net of allowance), which are one of Citi's most illiquid assets, are down $109 billion, or approximately 15%. Deposits as a percentage of loans have increased to 150% as of December 31, 2009 from 116% as of December 31, 2008. Structural liquidity, defined as the sum of deposits, long-term debt and stockholders' equity as a percentage of total assets, has increased steadily through 2008and 2009 and was 73% at December 31, 2009, as compared with 66% at December 31, 2008.

Aggregate Liquidity Resources

	Parent and broker-dealer		Significant bank entities		Total	
In billions of dollars at year end	2009	2008	2009	2008	2009	2008
Cash at major central banks	$ 10.4	$ 49.2	$ 105.1	$ 74.5	$ 115.5	$ 123.7
Liquid securities and assets pledged at major central banks	76.4	22.8	123.6	53.8	200.0	76.6
Total	$ 86.8	$ 72.0	$ 228.7	$ 128.3	$ 315.5	$ 200.3

As noted in the table above, Citigroup's aggregate liquidity resources totaled $315.5 billion as of December 31, 2009, compared with $200.3 billion as of December 31, 2008. As of December 31, 2009, Citigroup's and its affiliates' liquidity portfolio and broker-dealer "cash box" totaled $86.8 billion as compared with $72.0 billion at December 31, 2008. This includes the liquidity portfolio and cash box held in the U.S. as well as government bonds held by Citigroup's broker-dealer entities in the United Kingdom and Japan. Further, at December 31, 2009, Citigroup's bank subsidiaries had an aggregate of approximately $105.1 billion of cash on deposit with major Central Banks (including the U.S. Federal Reserve Bank of New York, the European Central Bank, Bank of England, Swiss National Bank, Bank of Japan, the Monetary Authority of Singapore, and the Hong Kong Monetary Authority), compared with approximately $74.5 billion at December 31, 2008. Citigroup's bank subsidiaries also have significant additional liquidity resources through unencumbered highly liquid securities available for secured funding through private markets or that are, or could be, pledged to the major Central Banks and the U.S. Federal Home Loan Banks. The value of these liquid securities was $123.6 billion at December 31, 2009 compared with $53.8 billion at December 31, 2008. Significant amounts of cash and liquid securities are also available in other Citigroup entities.

Consistent with the strategic reconfiguration of Citi's balance sheet, the build-up of liquidity resources and the shift in focus on increasing structural liabilities, Citigroup entered 2010 with much of its required long-term debt funding already in place. As a consequence, it is currently expected that the direct long-term funding requirements for Citigroup and CFI in 2010 will be $15 billion, which is well below the $39 billion of expected maturities.

Banking Subsidiaries—Constraints on Supplying Funds

There are various legal and regulatory limitations on the ability of Citigroup's subsidiary depository institutions to pay dividends, extend credit or otherwise supply funds to Citigroup and its non-bank subsidiaries. In determining the declaration of dividends, each depository institution must also consider its effect on applicable risk-based capital and leverage ratio requirements, as well as policy statements of the federal regulatory agencies that indicate that banking organizations should generally pay dividends out of current operating earnings. Citigroup did not receive any dividends from its banking subsidiaries during 2009.

Some of Citigroup's non-bank subsidiaries have credit facilities with Citigroup's subsidiary depository institutions, including Citibank, N.A. Borrowings under these facilities must be secured in accordance with Section 23A of the Federal Reserve Act. There are various legal restrictions on the extent to which Citi's subsidiary depository institutions can lend or extend credit to or engage in certain other transactions with Citigroup and certain of its non-bank subsidiaries. In general, transactions must be on arm's-length terms and be secured by designated amounts of specified collateral. See Note 20 to the Consolidated Financial Statements.

Management of Liquidity

Management of liquidity at Citigroup is the responsibility of the Treasurer. Citigroup runs a centralized treasury model where the overall balance sheet is managed by Citigroup Treasury through Global Franchise Treasurers and Regional Treasurers. Day-to-day liquidity and funding are managed by treasurers at the country and business level and are monitored by Corporate Treasury and independent risk management.

A uniform liquidity risk management policy exists for Citigroup, its consolidated subsidiaries and managed affiliates. Under this policy, there is a single set of standards for the measurement of liquidity risk in order to ensure consistency across businesses, stability in methodologies, transparency of risk, and establishment of appropriate risk appetite.

Liquidity management is overseen by the Board of Directors through its Risk Management and Finance Committee and by senior management through Citigroup's Finance and Asset and Liability Committee (FinALCO). One of the objectives of the Risk Management and Finance Committee of Citigroup's Board of Directors as well as the FinALCO is to monitor and review overall liquidity policies and practices as well as the liquidity and balance sheet positions of Citigroup and its principal subsidiaries. Additionally, oversight of liquidity is provided by Citigroup's Global Asset and Liability Committee. Asset and Liability Committees are also established for each region, country and/or major line of business.

MONITORING LIQUIDITY

Funding and Liquidity Plans

Each principal operating subsidiary and/or country must prepare a Funding and Liquidity Plan for approval by the Treasurer and independent risk management. For significant entities, as defined by balance sheet size and the liquidity risk position, the Funding and Liquidity Plan is prepared and approved on an annual basis. The Funding and Liquidity Plan addresses strategic liquidity issues and establishes the parameters for identifying, measuring, monitoring and limiting liquidity risk and sets forth key assumptions for liquidity risk management. The Funding and Liquidity Plan includes analysis of the balance sheet, as well as the economic and business conditions impacting, or potentially impacting, the liquidity of the major operating subsidiary and/or country. As part of the Funding and Liquidity Plan, liquidity limits, liquidity ratios, market triggers, and assumptions for periodic stress tests are established and approved.

Risk Tolerance

Citigroup establishes its key risk tolerances based on stress tests and a cash capital ratio (as described in "Liquidity Ratios" below). This framework requires that entities be self-sufficient or net providers of liquidity in their designated stress tests and have excess cash capital. Aggregate self sufficiency targets have been established for the banking subsidiaries, Citigroup, the parent holding company, and CGMHI as well as for individual entities as part of their Funding and Liquidity Plans. In addition, an important benchmark for the combined Citigroup, the parent holding company, and CGMHI is to maintain sufficient liquidity to meet all maturing obligations for a one-year period without access to the unsecured wholesale markets.

Within this context, there are a series of tools used to monitor Citigroup's liquidity position. These include liquidity gaps and associated limits, liquidity ratios, stress testing and market triggers, as described below.

Liquidity Gaps and Limits

Citigroup uses a monitoring tool that measures potential funding gaps over various time horizons in a standard operating environment. The gap for any given funding need represents the potential market access required, or placements to the market (internal or external) over designated tenors. Limits establish risk appetite for potential market access in standard operating conditions and are monitored against the liquidity position on a daily basis. Limits are established based on evaluation of available contingent actions and liquidity vulnerabilities under designated stress scenarios. While the contingent capacity places a cap on the limits, the limits are also evaluated based on the structural liquidity of the balance sheet, stability of liabilities, liquidity of assets, depth of markets, the experience of management, size of the balance sheet, historical utilization, and an evaluation of expected business and funding strategy. Limits are established such that in stress scenarios, entities are self-funded or net providers of liquidity. Thus, the risk tolerance for liquidity funding gaps is limited based on the capacity to cover the position in a stressed environment. These limits are the key daily risk-management tool for Citigroup, the parent holding company, and its banking subsidiaries.

Liquidity Ratios

A series of standard corporate-wide liquidity ratios has been established to monitor the structural elements of Citigroup's liquidity. One of the key structural liquidity measures is the cash capital ratio. Cash capital is a broader measure of the ability to fund the structurally illiquid portion of Citigroup's balance sheet than traditional measures such as deposits to loans or core deposits to loans. Cash capital measures the amount of long-term funding (>1 year) available to fund illiquid assets. Long-term funding includes core customer deposits, long-term debt and equity. Illiquid assets include loans (net of liquidity adjustments), illiquid securities, securities haircuts and other assets (i.e., goodwill, intangibles, fixed assets, receivables, etc.). Cash capital targets are established for Citigroup, the parent holding company, CGMHI and Citigroup's aggregate banking subsidiaries. In addition, each entity is required to calculate a cash capital ratio on a monthly basis. Benchmarks must be established and approved for the cash capital ratio as part of the entities' Funding and Liquidity plan. At December 31, 2009, the combined Citigroup, the parent holding company, and CGMHI, as well as the aggregate banking subsidiaries had an excess of cash capital. In addition, as of December 31, 2009 the combined Citigroup, the parent holding company, and CGMHI maintained liquidity to meet all maturing obligations significantly in excess of a one-year period without access to the unsecured wholesale markets.

Stress Testing

Simulated liquidity stress testing is periodically performed for each major operating subsidiary and/or country. Stress testing / scenario analyses are intended to quantify the likely impact of an event on the balance sheet and liquidity position and to identify viable funding alternatives that can be utilized in a liquidity event. A variety of firm-specific and market-related scenarios are used at the consolidated level and in individual countries. These scenarios include assumptions about significant changes in key funding sources, credit ratings, contingent uses of funding, and political and economic conditions in certain countries. The results of stress tests of individual countries and operating subsidiaries are reviewed to ensure that each individual major operating subsidiary or country is either self-funded or a net provider of liquidity. In addition, a Contingency Funding Plan is prepared on a periodic basis for Citigroup. The plan includes detailed policies, procedures, roles and responsibilities, and the results of corporate stress tests. The product of these stress tests is a series of alternatives that can be used by the Treasurer in a liquidity event.

As a result of the recent financial crisis, Citigroup increased the frequency, duration, and severity of certain stress testing, particularly related to the interconnection of idiosyncratic and systemic risk. Citigroup, the parent holding company, CGMHI and Citigroup's largest bank entities perform their key stress tests at a minimum on a monthly basis. In addition, in conformity with recommendations made by the Credit Risk Management Policy Group, Citigroup calculates a stressed 30-day maximum cash outflow compared with its liquidity resources for some of its key operating entities. This 30-day maximum cash outflow is performed on a daily basis. For other entities, stress testing is performed at a minimum on a quarterly basis.

Market Triggers

Market triggers are internal or external market or economic factors that may imply a change to market liquidity or Citigroup's access to the markets. Citigroup market triggers are monitored by the Treasurer and the head of risk architecture and are presented to the FinALCO.

Appropriate market triggers are also established and monitored for each major operating subsidiary and/or country. Local triggers are reviewed with the local country or business Asset and Liability Committee and independent risk management.

Credit Ratings

Citigroup's ability to access the capital markets and other sources of funds, as well as the cost of these funds and its ability to maintain certain deposits, is dependent on its credit ratings. The table below indicates the current ratings for Citigroup.

As a result of the Citigroup guarantee, changes in ratings for Citigroup Funding Inc. are the same as those of Citigroup noted above.

Citigroup's Debt Ratings as of December 31, 2009

	Citigroup Inc.		Citigroup Funding Inc.		Citibank, N.A.	
	Senior debt	Commercial paper	Senior debt	Commercial paper	Long-term	Short-term
Fitch Ratings	A+	F1+	A+	F1+	A+	F1+
Moody's Investors Service	A3	P-1	A3	P-1	A1	P-1
Standard & Poor's	A	A-1	A	A-1	A+	A-1

On February 9, 2010, S&P affirmed the counterparty credit and debt ratings of Citi. At the same time, S&P revised its outlook on Citi to negative from stable. This action was the result of S&P's view that there is increased uncertainty about the U.S. government's willingness to provide extraordinary support to a number of systematically important financial institutions. Outlooks from both Moody's and Fitch remained stable.

Ratings downgrades by Fitch Ratings, Moody's Investors Service or Standard & Poor's have had and could continue to have material impacts on funding and liquidity, and could also have further explicit material impact on liquidity due to collateral triggers and other cash requirements. Because of the current credit ratings of Citigroup Inc., a one-notch downgrade of its senior debt/long-term rating could impact Citigroup Inc.'s commercial paper/short-term rating. As of December 31, 2009, a one-notch downgrade of the senior debt/long-term rating of Citigroup Inc., accompanied by a one-notch downgrade of Citigroup Inc.'s commercial paper/short-term rating, would result in an approximate $4.2 billion funding requirement in the form of collateral and cash obligations. Further, as of December 31, 2009, a one-notch downgrade of the senior debt/long-term ratings of Citibank, N.A. would result in an approximate $4.2 billion funding requirement in the form of collateral and cash obligations. Because of the current credit ratings of Citibank, N.A., a one-notch downgrade of its senior debt/long-term rating is unlikely to have any impact on its commercial paper/short-term rating.

OFF-BALANCE-SHEET ARRANGEMENTS

Citigroup and its subsidiaries are involved with several types of off-balance-sheet arrangements, including special purpose entities (SPEs), primarily in connection with securitization activities in Regional Consumer Banking and Institutional Clients Group. Citigroup and its subsidiaries use SPEs principally to obtain liquidity and favorable capital treatment by securitizing certain of Citigroup's financial assets, assisting clients in securitizing their financial assets and creating investment products for clients. For further information on Citi's securitization activities and involvement in SPEs,
see Note 23 to the Consolidated Financial Statements and "Significant Accounting Policies and Significant Estimates—Securitizations."

The following tables describe certain characteristics of assets owned by certain identified significant unconsolidated variable interest entities (VIEs) as of December 31, 2009. These VIEs and Citi's exposure to the VIEs are described in Note 23 to the Consolidated Financial Statements.

	Total assets (In billions of dollars)	Weighted average life	Credit rating distribution AAA	AA	A	BBB/BBB+
Citi-administered asset-backed commercial paper conduits	$ 36.3	4.7 years	37%	13%	42%	8%

Asset class	% of total portfolio
Student loans	33%
Trade receivables	5%
Credit cards and consumer loans	4%
Portfolio finance	10%
Commercial loans and corporate credit	18%
Export finance	22%
Auto	4%
Residential mortgage	4%
Total	100%

Collateralized debt and loan obligations	Total assets (In billions of dollars)	Weighted average life	Credit rating distribution A or higher	BBB	BB/B	CCC	Unrated
Collateralized debt obligations (CDOs)	$ 19.3	3.9 years	12%	11%	16%	48%	13%
Collateralized loan obligations (CLOs)	$ 18.8	6.8 years	8%	5%	37%	11%	39%

Municipal securities tender option bond (TOB) trusts	Total assets (In billions of dollars)	Weighted average life	Credit rating distribution AAA/Aaa	AA/Aa1 – AA-/Aa3	Less than AA-/Aa3
Customer TOB trusts (not consolidated)	$ 8.5	12.2 years	12%	85%	3%
Proprietary TOB trusts (consolidated and not consolidated)	$ 12.3	16.4 years	7%	75%	18%
QSPE TOB trusts (not consolidated)	$ 0.7	10.7 years	89%	11%	0%

See "Significant Accounting Policies and Significant Estimates—Securitizations" and Note 1 to the Consolidated Financial Statements for a discussion of SFAS Nos. 166 and 167, effective in the first quarter of 2010, and their impact on Citi.

CONTRACTUAL OBLIGATIONS

The following table includes aggregated information about Citigroup's contractual obligations that impact its short- and long-term liquidity and capital needs. The table includes information about payments due under specified contractual obligations, aggregated by type of contractual obligation. It includes the maturity profile of Citigroup's consolidated long-term debt, leases and other long-term liabilities.

Citigroup's contractual obligations include purchase obligations that are enforceable and legally binding for Citi. For the purposes of the table below, purchase obligations are included through the termination date of the respective agreements, even if the contract is renewable. Many of the purchase agreements for goods or services include clauses that would allow Citigroup to cancel the agreement with specified notice; however, that impact is not included in the table (unless Citigroup has already notified the counterparty of its intention to terminate the agreement).

Other liabilities reflected on Citigroup's Consolidated Balance Sheet include obligations for goods and services that have already been received, uncertain tax positions, as well as other long-term liabilities that have been incurred and will ultimately be paid in cash.

Excluded from the following table are obligations that are generally short-term in nature, including deposit liabilities and securities sold under agreements to repurchase. The table also excludes certain insurance and investment contracts subject to mortality and morbidity risks or without defined maturities, such that the timing of payments and withdrawals is uncertain. The liabilities related to these insurance and investment contracts are included on the Consolidated Balance Sheet as Insurance Policy and Claims Reserves, Contractholder Funds, and Separate and Variable Accounts.

Citigroup's funding policy for pension plans is generally to fund to the minimum amounts required by the applicable laws and regulations. At December 31, 2009, there were no minimum required contributions, and no contributions are currently planned for the U.S. pension plans. Accordingly, no amounts have been included in the table below for future contributions to the U.S. pension plans. For the non-U.S. pension plans, discretionary contributions in 2010 are anticipated to be approximately $160 million. The anticipated cash contributions in 2010 related to the non-U.S. postretirement benefit plans are $72 million. These amounts are included in the purchase obligations in the table below. The estimated pension and postretirement plan contributions are subject to change, since contribution decisions are affected by various factors, such as market performance, regulatory and legal requirements, and management's ability to change funding policy. For additional information regarding Citi's retirement benefit obligations, see Note 9 to the Consolidated Financial Statements.

	Contractual obligations by year					
In millions of dollars at year end	2010	2011	2012	2013	2014	Thereafter
Long-term debt obligations (1)	$47,162	$59,656	$69,344	$28,132	$34,895	$124,830
Lease obligations	1,247	1,110	1,007	900	851	2,770
Purchase obligations	1,032	446	331	267	258	783
Other long-term liabilities reflected on Citi's Consolidated Balance Sheet (2)	34,218	156	36	35	36	3,009
Total	$83,659	$61,368	$70,718	$29,334	$36,040	$131,392

(1) For additional information about long-term debt and trust preferred securities, see Note 20 to the Consolidated Financial Statements.

(2) Relates primarily to accounts payable and accrued expenses included in Other liabilities in Citi's Consolidated Balance Sheet.

RISK FACTORS

The economic recession and disruptions in the global financial markets have adversely affected, and may continue to adversely affect, Citigroup's business and results of operations.

The financial services industry and the capital markets have been, and may continue to be, materially and adversely affected by the economic recession and disruptions in the global financial markets. These market disruptions were initially triggered by declines that impacted the value of subprime mortgages, but spread to all mortgage and real estate asset classes, to leveraged bank loans and to nearly all asset classes, including equities. These market disruptions resulted in significant write-downs of asset values by financial institutions, including Citigroup, causing many financial institutions to seek additional capital, merge with other financial institutions or, in some cases, go bankrupt.

Disruptions in the global financial markets have also adversely affected, and may continue to adversely affect, the corporate bond markets, equity markets, debt and equity underwriting, and other elements of the financial markets. Such disruptions have caused some lenders and institutional investors to reduce and, in some cases, cease to provide funding to certain borrowers, including other financial institutions. Credit headwinds, increasingly volatile financial markets and reduced levels of business activity may continue to negatively impact Citigroup's business, capital, liquidity, financial condition and results of operations, as well as the trading price of Citigroup common stock, preferred stock and debt securities.

Moreover, market and economic disruptions have affected, and may continue to affect, consumer confidence levels, consumer spending, personal bankruptcy rates, and levels of incurrence and default on consumer debt and home prices, among other factors, in certain of the markets in which Citigroup operates. Any of these factors, along with persistently high levels of unemployment, may result in a greater likelihood of reduced client interaction or elevated delinquencies on consumer loans, particularly with respect to Citi's credit card and mortgage programs, or other obligations to Citigroup. This, in turn, could result in a higher level of loan losses and Citi's allowances for credit losses, all of which could adversely affect Citigroup's earnings. While Citigroup has instituted loss mitigation programs to work with distressed borrowers and potentially mitigate these effects, these programs are in the early stages, and it is uncertain whether they will be successful.

In connection with significant government and central bank actions taken in late 2008 and in 2009, the U.S. and global economies began to see signs of stabilization in certain areas, and some early positive economic signs were observed in late 2009. Despite these positive signs, there remains significant uncertainty regarding the sustainability and pace of economic recovery, unemployment levels, the impact of the U.S. and other governments' unwinding of their extensive economic and market supports, which may accelerate in 2010, and Citi's delinquency and credit loss trends.

Previously enacted and potential future legislation, including legislation to reform the U.S. financial regulatory system, could require Citigroup to change certain of its business practices, impose additional costs on Citigroup or otherwise adversely affect its businesses.

In addition to previously enacted governmental assistance programs designed to stabilize and stimulate the U.S. economy (including without limitation the Emergency Economic Stabilization Act of 2008 (EESA) and the American Recovery and Reinvestment Act of 2009 (ARRA)), recent economic, political and market conditions have led to numerous proposals in the U.S. for changes in the regulation of the financial industry in an effort to prevent future crises and to reform the financial regulatory system.

Some of these proposals have already been adopted. For example, in May 2009, the U.S. Congress enacted the Credit Card Accountability Responsibility and Disclosure Act of 2009 (CARD Act), which, among other things, restricts certain credit card practices, requires expanded disclosures to consumers and provides consumers with the right to opt out of certain interest rate increases. Complying with these legislative changes, as well as the requirements of the amendments to Regulation Z (Truth in Lending) adopted by the Federal Reserve Board and effective July 2010, will require Citigroup to invest significant management attention and resources to make the necessary disclosure and system changes in its U.S. card businesses and will affect the results of such businesses. See "Management's Discussion and Analysis of Financial Condition and Results of Operations—North America Regional Consumer Banking" above and "Managing Global Risk—Credit Risk—2010 Credit Outlook" and "—North America Cards" below for additional information.

In addition, in 2009, the Obama Administration released a comprehensive plan for regulatory reform in the financial industry. The Administration's plan calls for significant proposed structural reforms and new substantive regulation across the financial industry, including, without limitation, requiring that broker-dealers who provide investment advice about securities to investors have the same fiduciary obligations as registered investment advisers; new requirements for the securitization market, including requiring a securitizer to retain a material economic interest in the credit risk associated with the underlying securitization; and additional regulation with respect to the trading of over-the-counter derivatives. In addition, the Administration's plan calls for increased scrutiny and regulation, including potentially heightened capital requirements, for any financial institution whose combination of size, leverage and interconnectedness could pose a threat to market-wide financial stability if it failed. This is sometimes referred to as "systemic risk" and may adversely affect Citigroup, as well as the financial intermediaries with which it interacts on a daily basis such as clearing agencies, clearing houses, banks, securities firms and exchanges.

The House Financial Services Committee began considering legislation based on the Administration's proposal, and in December 2009, the U.S. House of Representatives passed the Wall Street Reform and Consumer Protection Act. The bill calls for comprehensive financial regulatory reform and would create a Consumer Protection Agency whose mandate includes measures that would subject federally chartered financial institutions to state consumer protection laws that have historically been preempted. The bill would also provide Federal regulators with the authority to rein in or dismantle financial institutions whose collapse could pose a systemic risk to the financial stability or economy of the U.S. due to their size, leverage or interconnectedness. The Senate Banking, Housing and Urban Affairs Committee also issued a discussion draft of a bill in November 2009 based on the Administration's proposal, which differs significantly from the House bill in many respects.

More recently, in early 2010, the Obama Administration proposed further restrictions on the size and scope of banks and other financial institutions. There can be no assurance as to whether or when any of the parts of the Administration's plan or other proposals will be enacted into legislation and, if adopted, what the final provisions of such legislation will be. New legislation and regulatory changes could require Citigroup to further change certain of its business practices, impose additional costs on Citigroup, some significant, adversely affect its ability to pursue business opportunities it might otherwise consider engaging in, cause business disruptions or impact the value of assets that Citigroup holds.

Citigroup's participation in government programs to modify first and second lien mortgage loans could adversely affect the amount and timing of its earnings and credit losses relating to those loans.

The U.S. Treasury has announced guidelines for its first and second lien modification programs under the Home Affordable Modification Program (HAMP). Citigroup began participating in the HAMP with respect to first mortgages during the second quarter of 2009 and is actively engaged in discussions with the U.S. Treasury for the second lien program.

Participation in the HAMP could result in a reduction in the principal balances of certain first and second lien mortgage loans and the acceleration of loss recognition on those loans. In addition to the principal reduction aspect of the programs, loan modification efforts can impact the interest rate and term of these loans, which would in turn impact the total return on those assets and the timing of those returns. Participation in the programs as a servicer could also reduce servicing income to the extent the principal balance of a serviced loan is reduced or because it increases the cost of servicing a loan.

In order to participate in the HAMP, borrowers must currently complete a three- to five-month trial period during which the original terms of the loans remain in effect pending final modification. As a result, Citigroup is uncertain of the overall impact the HAMP will have on its delinquency trends, net credit losses and other loan loss metrics.

The expiration of a provision of the U.S. tax law that allows Citigroup to defer U.S. taxes on certain active financial services income could significantly increase Citi's tax expense.

Citigroup's tax provision has historically been reduced because active financing income earned and indefinitely reinvested outside the U.S. is taxed at the lower local tax rate rather than at the higher U.S. tax rate. Such reduction has been dependent upon a provision of the U.S. tax law that defers the imposition of U.S. taxes on certain active financial services income until that income is repatriated to the U.S. as a dividend. This "active financing exception" expired on December 31, 2009, and while it has been scheduled to expire on five prior occasions and has been extended each time, there can be no assurance that the exception will continue to be extended. The Obama Administration's 2011 budget proposal includes a two-year extension of the active financing exception. In addition, the U.S. House of Representatives has passed a one-year extension of the exception that is now pending a vote in the U.S. Senate. In the event this exception is not extended beyond 2009, the U.S. tax imposed on Citi's active financing income earned outside the U.S. would increase, which could further result in Citi's tax expense increasing significantly.

Citigroup's businesses are subject to risks arising from extensive operations outside the United States.

As a global participant in the financial services industry, Citigroup is subject to extensive regulation, including fiscal and monetary policies, in jurisdictions around the world.

As a result of the current financial crisis, there are currently numerous reform efforts underway outside the U.S., including without limitation proposals by the European Commission to amend bank capital requirements and by the Financial Services Authority in the United Kingdom to enhance regulatory standards applicable to financial institutions. This level of regulation could further increase in all jurisdictions in which Citigroup conducts business. Any regulatory changes could lead to business disruptions or could impact the value of assets that Citigroup holds or the scope or profitability of its business activities. Such changes could also require Citigroup to change certain of its business practices and could expose Citigroup to additional costs, including compliance costs, and liabilities as well as reputational harm. To the extent the regulations strictly control the activities of financial services institutions, such changes would also make it more difficult for Citigroup to distinguish itself from competitors.

In addition, the emerging markets in which Citigroup operates or invests, or in which it may do so in the future, particularly as a result of its overall strategy, may be more volatile than the U.S. markets or other developed markets outside the U.S. and are subject to changing political, economic, financial and social factors. Among other factors, these include the possibility of recent or future changes in political leadership and economic and fiscal policies and the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to companies or investments in these countries. Citigroup's inability to remain in compliance with local laws in a particular market could have a materially adverse effect not only on its business in that market but also on its reputation generally.

Future issuances of Citigroup common stock and preferred stock may reduce any earnings available to Citi's common stockholders and the return on the company's equity.

During 2009, Citigroup raised a total of approximately $79 billion in private and public offerings of common stock in connection with its exchange offers and as required by the U.S. government pursuant to Citigroup's repayment of TARP. This amount does not include approximately $3.5 billion of tangible equity units issued in December 2009 that will be settled for additional shares of Citigroup common stock that may be issued over a three-year period but in no event later than December 2012.

In addition, in January 2010, Citigroup issued $1.7 billion of common stock equivalents to its employees in lieu of cash compensation they would have otherwise received. Subject to shareholder approval at Citi's annual shareholder meeting scheduled to be held on April 20, 2010, such amount of common stock equivalents will be converted to common stock. Further, pursuant to its agreement with the Abu Dhabi Investment Authority (ADIA), entered into in November 2007, Citi will issue an aggregate of $7.5 billion of common stock, at a price per share of $31.83, over an approximately two-year period beginning in March 2010.

While this additional capital has provided, or will provide, funding to Citigroup's businesses and has improved, or will improve, Citigroup's financial position and capital strength, it has increased, or will increase, Citigroup's equity and the number of actual and diluted shares of Citigroup common stock. Such increases in the outstanding shares of common stock reduce Citigroup's earnings per share and the return on Citigroup's equity, unless Citigroup's earnings increase correspondingly. In addition, any additional future issuances of common stock, including without limitation pursuant to U.S. governmental requirements or programs, could further dilute the existing common stockholders and any earnings available to the common stockholders.

The sale by the U.S. Treasury of its stake in Citigroup will result in a substantial amount of Citigroup common stock entering the market, which could adversely affect the market price of Citigroup common stock.

As of December 31, 2009, the U.S. Treasury held a 27.0% ownership stake in Citigroup. In December 2009, the U.S. Treasury announced that it planned to divest its stake during 2010, subject to market conditions and following a 90-day lockup period that will expire on March 16, 2010, resulting in approximately 7.7 billion shares of Citigroup common stock being sold into the market. The divestiture of such a large number of shares of Citigroup common stock within the announced timeframe could adversely affect the market price of Citigroup common stock.

Citigroup's ability to utilize its deferred tax assets (DTAs) to offset future taxable income may be significantly limited if it experiences an "ownership change" under the Internal Revenue Code.

As of December 31, 2009, Citigroup had recognized net DTAs of approximately $46.1 billion, which are included in its tangible common equity. Citigroup's ability to utilize its DTAs to offset future taxable income may be significantly limited if Citigroup experiences an "ownership change" as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the Code). In general, an ownership change will occur if there is a cumulative change in Citigroup's ownership by "5-percent shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period.

The common stock issued pursuant to the exchange offers in July 2009, and the common stock and tangible equity units issued in December 2009 as part of Citigroup's TARP repayment, did not result in an ownership change under the Code. However, these common stock issuances have materially increased the risk that Citigroup will experience an ownership change in the future.

On June 9, 2009, the Board of Directors of Citigroup adopted a Tax Benefits Preservation Plan. This Plan is subject to shareholders' approval at the 2010 Annual Meeting. The purpose of the Plan is to minimize the likelihood of an ownership change occurring for Section 382 purposes. Despite adoption of the Plan, future transactions in Citigroup stock that may not be in its control may cause Citigroup to experience an ownership change and thus limit its ability to utilize its DTAs, as well as cause a reduction in Citigroup's tangible common equity and stockholders' equity.

Increases in FDIC insurance premiums and other proposed fees on banks may adversely affect Citigroup's earnings.

During 2008 and continuing in 2009, higher levels of bank failures have dramatically increased resolution costs of the FDIC and depleted the deposit insurance fund. In order to maintain a strong funding position and restore reserve ratios of the deposit insurance fund, the FDIC has increased, and may further increase in the future, assessment rates of insured institutions. In November 2009, the FDIC adopted a rule requiring banks to prepay three years of estimated premiums to replenish the depleted insurance fund, which Citigroup paid in the fourth quarter of 2009. There have also been proposals to change the basis on which these assessment rates are determined. Moreover, the Obama Administration has recently suggested the imposition of other fees on banking institutions.

Citigroup is generally unable to control the basis or the amount of premiums that it is required to pay for FDIC insurance or the levying of other fees or assessments on financial institutions. If there are additional bank or financial institution failures, Citigroup may be required to pay even higher FDIC premiums than the recently increased levels. These announced increases and prepayments, and any future increases or other required fees, could adversely impact Citigroup's earnings.

56

Citigroup's businesses may be materially adversely affected if it is unable to hire and retain qualified employees.

Citigroup's performance is heavily dependent on the talents and efforts of the highly skilled individuals that Citigroup is able to attract and retain. Competition from within the financial services industry and from businesses outside of the financial services industry for qualified employees has often been intense.

Citigroup is required to comply with the U.S. government's standards for executive compensation and related corporate governance set forth in the ARRA generally for so long as the U.S. government holds certain Citigroup securities. These standards generally apply to Citigroup's senior-most executives and certain other highly compensated employees. The incentive compensation arrangements for Citigroup's top 30 most highly compensated employees are also subject to review under the incentive compensation principles set by the Federal Reserve Board, in consultation with Citi's other regulators. In addition, the U.K. recently imposed a one-time 50% tax on bonuses above a certain amount paid to employees of banks operating in the country.

Furthermore, the market price of Citigroup common stock has declined significantly from a closing price of $55.12 on May 25, 2007. Because a substantial portion of Citigroup's annual bonus compensation paid to its senior employees has been paid in the form of equity, such awards may not be as valuable from a compensatory or retention perspective.

There can be no assurance that, as a result of these restrictions, or any potential future compensation restrictions or guidelines imposed on Citigroup, Citigroup will be able to attract new employees and retain and motivate its existing employees, which may in turn affect its ability to compete effectively in its businesses, manage its businesses effectively and expand into new businesses and geographic regions.

Failure to maintain the value of the Citigroup brand may adversely affect its businesses.

Citigroup's success depends on the continued strength and recognition of the Citigroup brand on a global basis. The Citi name is integral to its business as well as to the implementation of its strategy for expanding its businesses, including outside the U.S. Maintaining, promoting and positioning the Citigroup brand will depend largely on the success of its ability to provide consistent, high-quality financial services and products to its clients around the world. Citigroup's brand could be adversely affected if it fails to achieve these objectives or if its public image or reputation were to be tarnished by negative views about Citigroup or the financial services industry in general, or by a negative perception of Citigroup's short-term or long-term financial prospects. Any of these events could have a material adverse effect on Citigroup's businesses.

Although Citigroup currently believes it is "well capitalized," its capitalization may not prove to be sufficiently consistent with its risk profile or sufficiently robust relative to future capital requirements.

Citigroup's capital management framework is designed to ensure that Citigroup and its principal subsidiaries maintain sufficient capital consistent with Citigroup's risk profile, all applicable regulatory standards and guidelines as well as external rating agency conditions. Citigroup is subject to the risk based capital guidelines issued by the Federal Reserve Board. Capital adequacy is measured, in part, based on two risk based capital ratios, the Tier 1 Capital and Total Capital (Tier 1 Capital plus Tier 2 Capital) ratios. In conjunction with the conclusion of the Supervisory Capital Assessment Program (SCAP), U.S. banking regulators developed a new measure of capital called Tier 1 Common. While Tier 1 Common and related ratios are measures used and relied on by U.S. banking regulators, they are non-GAAP financial measures for SEC purposes. See "Capital Resources and Liquidity" above for additional information on these metrics. Citigroup is also subject to a Leverage ratio requirement, a non-risk-based measure of capital adequacy. For additional information on these capital adequacy metrics, including the estimated impact to Citi's capital ratios of adopting SFAS 166 and SFAS 167 as of January 1, 2010, see "Capital Resources and Liquidity—Capital Resources."

To be "well capitalized" under U.S. federal bank regulatory agency definitions, a bank holding company must have a Tier 1 Capital ratio of at least 6%, a Total Capital ratio of at least 10% and a Leverage ratio of at least 3%, and not be subject to a Federal Reserve Board directive to maintain higher capital levels. As of December 31, 2009, Citigroup was "well capitalized," with a Tier 1 Capital ratio of 11.7%, a Total Capital ratio of 15.2% and a Leverage ratio of 6.9%, as well as a Tier 1 Common ratio of 9.6%. There can be no assurance, however, that Citigroup will be able to maintain sufficient capital consistent with its risk profile or remain "well capitalized." Moreover, the various regulators in the U.S. and abroad have not reached consensus as to the appropriate level of capitalization for financial services institutions such as Citigroup. These regulators, including the Federal Reserve Board, may alter the current regulatory capital requirements to which Citigroup is subject and thereby necessitate equity increases that could dilute existing stockholders, lead to required asset sales or adversely impact the availability of Citi's DTAs, as described above, among other issues.

In addition, Citigroup could adopt the provisions of the Basel II regulatory capital framework as early as April 1, 2011. This new regulatory capital framework is likely to result in a need for Citigroup to hold additional regulatory capital. If market conditions do not improve, the capital requirements of Basel II could increase prior to scheduled implementation in 2011, further increasing the amount of capital needed by Citi. The new rules could also result in changes in Citigroup's funding mix, resulting in lower net income and/or continued shrinking of the balance sheet. Separate from the above Basel II rules for credit and operational risk, the Basel Committee on Banking Supervision has also proposed revisions to the market risk framework that could also lead to additional capital requirements. Although not yet ratified by the U.S. regulators, the Basel II rules for market risk are currently scheduled for January 1, 2011, one quarter ahead of Citigroup's earliest date for Basel II implementation for credit and operational risk.

Liquidity is essential to Citigroup's businesses, and Citigroup relies on external sources to finance a significant portion of its operations.
Adequate liquidity is essential to Citigroup's businesses. Citigroup's liquidity could be materially, adversely affected by factors Citigroup cannot control, such as general disruption of the financial markets or negative views about the financial services industry in general. In addition, Citigroup's ability to raise funding could be impaired if lenders develop a negative perception of Citigroup's short-term or long-term financial prospects, or a perception that it is experiencing greater liquidity risk.

Regulatory measures instituted in late 2008 and 2009, such as the FDIC's temporary guarantee of the newly issued senior debt as well as deposits in non-interest-bearing deposit transaction accounts, and the commercial paper funding facility of the Federal Reserve Board were designed to stabilize the financial markets and the liquidity position of financial institutions such as Citigroup. While much of Citigroup's long-term and short-term unsecured funding during 2009 was issued pursuant to these government-sponsored funding programs, Citigroup began to access funding outside of these programs, particularly during the fourth quarter of 2009, due, in part, to the fact that many of these facilities were terminating. Citi's reliance on government-sponsored short-term funding facilities was substantially reduced as of the end of 2009. The impact that the termination of any of these facilities could have on Citigroup's ability to access funding in the future is uncertain. It is also unclear whether Citigroup will be able to regain access to the public long-term unsecured debt markets on historically customary terms.

Citigroup's cost of obtaining long-term unsecured funding is directly related to its credit spreads in both the cash bond and derivatives markets. Increases in Citigroup's credit qualifying spreads can significantly increase the cost of this funding. Credit spreads are influenced by market and rating agency perceptions of Citigroup's creditworthiness and may be influenced by movements in the costs to purchasers of credit default swaps referenced to Citigroup's long-term debt.

In addition, a significant portion of Citigroup's business activities are based on gathering deposits and borrowing money and then lending or investing those funds, including through market-making activities in tradable securities. Citigroup's profitability is in part a function of the spread between interest rates earned on such loans and investments, as well as other interest-earning assets, and the interest rates paid on deposits and other interest-bearing liabilities. During 2009, the need to maintain adequate liquidity caused Citigroup to invest available funds in lower-yielding assets, such as those issued by the U.S. government. As a result, during 2009, the yields across both the interest-earning assets and the interest-bearing liabilities dropped significantly from 2008. The lower asset yields more than offset the lower cost of funds, resulting in lower net interest margins compared to 2008. There can be no assurance that Citigroup's net interest margins will not continue to remain low.
Any reduction in Citigroup's and its subsidiaries' credit ratings could increase the cost of its funding from, and restrict its access to, the capital markets and have a material adverse effect on its results of operations and financial condition.
Each of Citigroup's and Citibank, N.A.'s long-term/senior debt is currently rated investment grade by Fitch Ratings, Moody's Investors Service and Standard & Poor's. The rating agencies regularly evaluate Citigroup and its subsidiaries, and their ratings of Citigroup's and its subsidiaries' long-term and short-term debt are based on a number of factors, including financial strength, as well as factors not entirely within the control of Citigroup and its subsidiaries, such as conditions affecting the financial services industry generally.

In light of the difficulties in the financial services industry and the financial markets generally, or as a result of events affecting Citigroup more specifically, Citigroup and its subsidiaries may not be able to maintain their current respective ratings. A reduction in Citigroup's or its subsidiaries' credit ratings could adversely affect Citigroup's liquidity, widen its credit spreads or otherwise increase its borrowing costs, limit its access to the capital markets or trigger obligations under certain bilateral provisions in some of Citigroup's trading and collateralized financing contracts. In addition, under these provisions, counterparties could be permitted to terminate certain contracts with Citigroup or require it to post additional collateral. Termination of Citigroup's trading and collateralized financing contracts could cause Citigroup to sustain losses and impair its liquidity by requiring Citigroup to find other sources of financing or to make significant cash payments or securities transfers. For additional information on the potential impact of a reduction in Citigroup's or its subsidiaries' credit ratings, see "Capital Resources and Liquidity."

Certain of the credit rating agencies have stated that the credit ratings of Citi and other financial institutions have benefited from the implicit support that the U.S. government and regulators have provided to the financial industry through the financial crisis. The expectation that this support will be reduced over time, unless offset by improvement in standalone credit profiles, could have a negative impact on the credit ratings of financial institutions, including Citi.

Market disruptions may increase the risk of customer or counterparty delinquency or default.
Market and economic disruptions, as well as the policies of the Federal Reserve Board or other government agencies or entities, can adversely affect Citigroup's customers, obligors on securities or other instruments or other counterparties, potentially increasing the risk that they may fail to repay their securities or loans or otherwise default on their contractual obligations to Citigroup, some of which maybe significant. These customers, obligors or counterparties could include individuals or corporate or governmental entities. Moreover, Citigroup may incur significant credit risk exposure from holding securities or other obligations or entering into swap or other derivative contracts under which obligors or other counterparties have long-term obligations to make payments to Citigroup. Market conditions over the last several years, including credit deterioration, decreased liquidity and pricing transparency along with increased market volatility, have negatively impacted Citigroup's credit risk exposure. Although Citigroup regularly reviews its credit exposures, default risk may arise from events or circumstances that are difficult to detect or foresee.

Citigroup may fail to realize all of the anticipated benefits of the realignment of its businesses.

Effective in the second quarter of 2009, Citigroup realigned into two primary business segments, Citicorp and Citi Holdings, for management and reporting purposes. The realignment is part of Citigroup's strategy to focus on its core businesses and reduce non-core assets in a disciplined and deliberate manner. Citigroup believes this structure will allow it to enhance the capabilities and performance of Citigroup's core assets, through Citicorp, as well as realize value from its non-core assets, through Citi Holdings.

Citigroup intends to exit the Citi Holdings non-core businesses as quickly as practicable yet in an economically rational manner through business divestitures, portfolio run-off and asset sales. Citigroup has been making substantial progress divesting and exiting businesses included within Citi Holdings, having completed more than 20 divestitures over the last two years, including the Morgan Stanley Smith Barney joint venture, Nikko Cordial Securities and Nikko Asset Management sales. Citi Holdings' assets have been reduced from a peak level of approximately $898 billion in the first quarter of 2008 to approximately $547 billion at year-end 2009.

Despite these efforts, given the rapidly changing and uncertain financial environment, there can be no assurance that the realignment of Citigroup's businesses will achieve the company's desired objectives or benefits, including simplifying the organization and permitting Citigroup to allocate capital to fund its long-term strategic businesses comprising Citicorp, or that Citi will be able to continue to make progress in divesting or exiting businesses within Citi Holdings in an orderly and timely manner.

Citigroup may experience further write-downs of its financial instruments and other losses related to volatile and illiquid market conditions.

Market volatility, illiquid market conditions and disruptions in the credit markets have made it extremely difficult to value certain of Citigroup's assets. Subsequent valuations, in light of factors then prevailing, may result in significant changes in the values of these assets in future periods. In addition, at the time of any sales of these assets, the price Citigroup ultimately realizes will depend on the demand and liquidity in the market at that time and may be materially lower than their current fair value. Further, Citigroup's hedging strategies with respect to these assets may not be effective. Any of these factors could require Citigroup to take further write-downs in respect of these assets, which may negatively affect Citigroup's results of operations and financial condition in future periods.

Citigroup finances and acquires principal positions in a number of real estate and real-estate-related products for its own account, for investment vehicles managed by affiliates in which it also may have a significant investment, for separate accounts managed by affiliates and for major participants in the commercial and residential real estate markets, and originates loans secured by commercial and residential properties. Citigroup also securitizes and trades in a wide range of commercial and residential real estate and real-estate-related whole loans, mortgages and other real estate and commercial assets and products, including residential and commercial mortgage-backed securities. These businesses have been, and may continue to be, adversely affected by the downturn in the real estate sector.

Furthermore, in the past, Citigroup has provided financial support to certain of its investment products and vehicles in difficult market conditions, and Citigroup may decide to do so again in the future for contractual reasons or, at its discretion, for reputational or business reasons, including through equity investments or cash or capital infusions.

Should unemployment rates continue to be high, and if stresses in the real estate market continue to depress housing prices, Citi could experience greater write-offs and also need to set aside larger loan loss reserves for mortgage and credit card portfolios as well as other consumer loans.

The elimination of QSPEs from the guidance in SFAS 140 and changes in FIN 46(R) will significantly impact, and may continue to significantly impact, Citigroup's Consolidated Financial Statements.

During 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets, which eliminates Qualifying Special Purpose Entities (QSPEs) from the guidance in SFAS No. 140, and SFAS No. 167, Amendments to FASB Interpretation No. 46(R), which makes three key changes to the consolidation model in FIN 46(R), "Consolidation of Variable Interest Entities". Such changes include: (i) former QSPEs will now be included in the scope of SFAS No. 167; (ii) FIN 46(R) has been amended to change the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE to a qualitative determination of "power" combined with potentially significant benefits or losses; and (iii) the analysis of primary beneficiaries has to be re-evaluated whenever circumstances change.

These standards became effective January 1, 2010, including for Citigroup, and they will have a significant impact, and may have an ongoing significant impact, on Citigroup's Consolidated Financial Statements as Citi will be required to bring a portion of assets that were not historically on its balance sheet onto its balance sheet, which will also impact Citi's capital ratios. For a further discussion of these changes, see "Significant Accounting Policies and Significant Estimates" and Note 1 to the Consolidated Financial Statements. See also "Capital Resources and Liquidity—Capital Resources."

Citigroup's financial statements are based in part on assumptions and estimates, which, if wrong, could cause unexpected losses in the future.

Pursuant to U.S. GAAP, Citigroup is required to use certain assumptions and estimates in preparing its financial statements, including in determining credit loss reserves, reserves related to litigation and the fair value of certain assets and liabilities, among other items. If assumptions or estimates underlying Citigroup's financial statements are incorrect, Citigroup may experience material losses. For additional information, see "Significant Accounting Policies and Significant Estimates."

Changes in accounting standards can be difficult to predict and can materially impact how Citigroup records and reports its financial condition and results of operations.

Citigroup's accounting policies and methods are fundamental to how it records and reports its financial condition and results of operations. From

time to time, the FASB changes the financial accounting and reporting standards that govern the preparation of Citigroup's financial statements. These changes can be hard

to anticipate and implement and can materially impact how Citigroup records and reports its financial condition and results of operations. For example, the FASB's current financial instruments project could, among other things, significantly change the way loan loss provisions are determined from an incurred loss model to an expected loss model, and may also result in most financial instruments being required to be reported at fair value.

Citigroup may incur significant losses as a result of ineffective risk management processes and strategies, and concentration of risk increases the potential for such losses.
Citigroup seeks to monitor and control its risk exposure through a risk and control framework encompassing a variety of separate but complementary financial, credit, operational, compliance and legal reporting systems, internal controls, management review processes and other mechanisms. While Citigroup employs a broad and diversified set of risk monitoring and risk mitigation techniques, those techniques and the judgments that accompany their application may not be effective and may not anticipate every economic and financial outcome in all market environments or the specifics and timing of such outcomes. Market conditions over the last several years have involved unprecedented dislocations and highlight the limitations inherent in using historical data to manage risk.

These market movements can, and have, limited the effectiveness of Citigroup's hedging strategies and have caused Citigroup to incur significant losses, and they may do so again in the future. In addition, concentration of risk increases the potential for significant losses in certain of Citigroup's businesses. For example, Citigroup extends large commitments as part of its credit origination activities. Citigroup's inability to reduce its credit risk by selling, syndicating or securitizing these positions, including during periods of market dislocation, could negatively affect its results of operations due to a decrease in the fair value of the positions, as well as the loss of revenues associated with selling such securities or loans. Further, Citigroup routinely executes a high volume of transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks and investment funds. This has resulted in significant credit concentration with respect to this industry.

The financial services industry faces substantial legal liability and regulatory risks, and Citigroup may face damage to its reputation and incur significant legal and regulatory liability.
Citigroup faces significant legal and regulatory risks in its businesses, and the volume of claims and amount of damages and penalties claimed in litigation and regulatory proceedings against financial institutions remain high. Citigroup's experience has been that legal claims by shareholders, regulators, customers and clients increase in a market downturn. In addition, employment-related claims typically increase in periods when Citigroup has reduced the total number of employees, such as during the prior two fiscal
years. There have also been a number of highly publicized cases involving fraud or other misconduct by employees in the financial services industry in recent years, and Citigroup runs the risk that employee misconduct could occur. It is not always possible to deter or prevent employee misconduct, and the extensive precautions Citigroup takes to prevent and detect this activity may not be effective in all cases.

For further information relating to Citigroup's legal and regulatory risks, see "Legal Proceedings" and Note 30 to the Consolidated Financial Statements.

A failure in Citigroup's operational systems or infrastructure, or those of third parties, could impair its liquidity, disrupt its businesses, result in the disclosure of confidential information, damage Citigroup's reputation and cause losses.
Citigroup's businesses are highly dependent on its ability to process and monitor, on a daily basis, a very large number of transactions, many of which are highly complex, across numerous and diverse markets in many currencies. These transactions, as well as the information technology services Citigroup provides to clients, often must adhere to client-specific guidelines, as well as legal and regulatory standards. Due to the breadth of Citigroup's client base and its geographical reach, developing and maintaining Citigroup's operational systems and infrastructure is challenging. Citigroup's financial, account, data processing or other operating systems and facilities may fail to operate properly or become disabled as a result of events that are wholly or partially beyond its control, such as a spike in transaction volume or unforeseen catastrophic events, adversely affecting Citigroup's ability to process these transactions or provide these services.

Citigroup also faces the risk of operational failure, termination or capacity constraints of any of the clearing agents, exchanges, clearing houses or other financial intermediaries Citigroup uses to facilitate its transactions, and as Citigroup's interconnectivity with its clients grows, it increasingly faces the risk of operational failure with respect to its clients' systems.

In addition, Citigroup's operations rely on the secure processing, storage and transmission of confidential and other information in its computer systems and networks. Although Citigroup takes protective measures and endeavors to modify them as circumstances warrant, its computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code, and other events that could have a security impact. Given the high volume of transactions at Citigroup, certain errors may be repeated or compounded before they are discovered and rectified. If one or more of such events occurs, this could potentially jeopardize Citigroup's, its clients', its counterparties' or third parties' confidential and other information processed and stored in, and transmitted through, Citigroup's computer systems and networks, or otherwise cause interruptions or malfunctions in Citigroup's, its clients', its counterparties' or third parties' operations, which could result in significant losses or reputational damage.

MANAGING GLOBAL RISK

RISK MANAGEMENT—OVERVIEW

Citigroup believes that effective risk management is of primary importance to its success. Accordingly, Citigroup has a comprehensive risk management process to monitor, evaluate and manage the principal risks it assumes in conducting its activities. These include credit, market (including liquidity) and operational risks (including legal and reputational exposures). Each of credit, market and operational risk is discussed in more detail throughout this section.

Citigroup's risk management framework is designed to balance corporate oversight with well-defined independent risk management functions. Enhancements continued to be made to the risk management framework throughout 2009 based on guiding principles established by Citi's Chief Risk Officer:

- a common risk capital model to evaluate risks;
- a defined risk appetite, aligned with business strategy;
- accountability through a common framework to manage risks;
- risk decisions based on transparent, accurate and rigorous analytics;
- expertise, stature, authority and independence of risk managers; and
- empowering risk managers to make decisions and escalate issues.

Significant focus has been placed on fostering a risk culture based on a policy of "Taking Intelligent Risk with Shared Responsibility, Without Forsaking Individual Accountability:"

- "Taking intelligent risk" means that Citi must carefully measure and aggregate risks, must appreciate potential downside risks, and must understand risk/return relationships.
- "Shared responsibility" means that risk and business management must actively partner to own risk controls and influence business outcomes.
- "Individual accountability" means that all individuals are ultimately responsible for identifying, understanding and managing risks.

The Chief Risk Officer, working closely with the Citi CEO and established management committees, and with oversight from the Risk Management and Finance Committee of the Board of Directors as well as the full Board of Directors, is responsible for:

- establishing core standards for the management, measurement and reporting of risk;
- identifying, assessing, communicating and monitoring risks on a company-wide basis;
- engaging with senior management and on a frequent basis on material matters with respect to risk-taking activities in the businesses and related risk management processes; and
- ensuring that the risk function has adequate independence, authority, expertise, staffing, technology and resources.

The risk management organization is structured so as to facilitate the management of risk across three dimensions: businesses, regions and critical products. Each of the company's major business groups has a Business Chief Risk Officer who is the focal point for risk decisions, such as setting risk limits or approving transactions in the business. There are also Regional Chief Risk Officers, accountable for the risks in their geographic areas, who are the primary risk contacts for the regional business heads and local regulators. In addition, the positions of Product Chief Risk Officers were created for those areas of critical importance to Citigroup, such as real estate, structured products and fundamental credit. The Product Chief Risk Officers are accountable for the risks within their specialty and focus on problem areas across businesses and regions. The Product Chief Risk Officers serve as a resource to the Chief Risk Officer, as well as to the Business and Regional Chief Risk Officers, to better enable the Business and Regional Chief Risk Officers to focus on the day-to-day management of risks and responsiveness to business flow.

In addition to revising the risk management organization to facilitate the management of risk across these three dimensions, the risk organization also includes the business management team to ensure that the risk organization has the appropriate infrastructure, processes and management reporting. This team includes:

- the risk capital group, which continues to enhance the risk capital model and ensure that it is consistent across all our business activities;
- the risk architecture group, which ensures the company has integrated systems and common metrics, and thereby allows us to aggregate and stress-test exposures across the institution;
- the infrastructure risk group, which focuses on improving our operational processes across businesses and regions; and
- the office of the Chief Administrative Officer, which focuses on re-engineering, risk communications and relationships, including our critical regulatory relationships.

RISK AGGREGATION AND STRESS TESTING

While Citi's major risk areas are described individually on the following pages, these risks also need to be reviewed and managed in conjunction with one another and across the various businesses.

The Chief Risk Officer, as noted above, monitors and controls major risk exposures and concentrations across the organization. This means aggregating risks, within and across businesses, as well as subjecting those risks to alternative stress scenarios in order to assess the potential economic impact they may have on Citigroup.

Comprehensive stress tests are in place across Citi for mark-to-market, available-for-sale, and accrual portfolios. These firm-wide stress reports measure the potential impact to Citi and its component businesses of very large changes in various types of key risk factors (e.g., interest rates, credit spreads), as well as the potential impact of a number of historical and hypothetical forward-looking systemic stress scenarios.

Supplementing the stress testing described above, Risk Management, working with input from the businesses and finance, provides enhanced periodic updates to senior management on significant potential exposures across Citigroup arising from risk concentrations (e.g., residential real estate), financial market participants (e.g., monoline insurers), and other systemic issues (e.g., commercial paper markets). These risk assessments are forward-looking exercises, intended to inform senior management about the potential economic impacts to Citi that may occur, directly or indirectly, as a result of hypothetical scenarios, based on judgmental analysis from independent risk managers. Risk Management also reports to the Risk Management and Finance Committee of the Board of Directors, as well as the full Board of Directors on these matters.

The stress testing and risk assessment exercises are a supplement to the standard limit-setting and risk-capital exercises described below, as these processes incorporate events in the marketplace and within Citi that impact the firm's outlook on the form, magnitude, correlation and timing of identified risks that may arise. In addition to enhancing awareness and understanding of potential exposures, the results of these processes then serve as the starting point for developing risk management and mitigation strategies.

RISK CAPITAL

Risk capital is defined as the amount of capital required to absorb potential unexpected economic losses resulting from extremely severe events over a one-year time period:

- "Economic losses" include losses that appear on the income statement and fair value adjustments to the financial statements, as well as any further declines in value not captured on the income statement.
- "Unexpected losses" are the difference between potential extremely severe losses and Citigroup's expected (average) loss over a one-year time period.
- "Extremely severe" is defined as potential loss at a 99.97% confidence level, based on the distribution of observed events and scenario analysis.

The drivers of "economic losses" are risks, which for Citi can be broadly categorized as credit risk (including cross-border risk), market risk (including liquidity) and operational risk (including legal and regulatory):

- Credit risk losses primarily result from a borrower's or counterparty's inability to meet its obligations.
- Market risk losses arise from fluctuations in the market value of trading and non-trading positions, including the treatment changes in value resulting from fluctuations in rates.
- Operational risk losses result from inadequate or failed internal processes, systems or human factors or from external events.

These risks are measured and aggregated within businesses and across Citigroup to facilitate the understanding of our exposure to extreme downside events as described under "Risk Aggregation and Stress Testing."

The risk capital framework is reviewed and enhanced on a regular basis in light of market developments and evolving practices.

The following is a more detailed discussion of the principal risks Citi assumes in conducting its activities: credit, market and operational risk.

CREDIT RISK

Credit risk is the potential for financial loss resulting from the failure of a borrower or counterparty to honor its financial or contractual obligations. Credit risk arises in many of Citigroup's business activities, including:

- lending;
- sales and trading;
- derivatives;
- securities transactions;
- settlement; and
- when Citigroup acts as an intermediary.

Loan and Credit Overview

During 2009, Citigroup reduced its aggregate loan portfolio by $102.7 billion to $591.5 billion. In addition, Citi's total allowance for loan losses totaled $36.0 billion at December 31, 2009, a coverage ratio of 6.09% of total loans, up from 4.27% at December 31, 2008.

During 2009, Citigroup recorded a net build of $8.0 billion to its credit reserves, which was $6.6 billion lower than the build in 2008. The net build consisted of a net build of $7.6 billion for consumer loans ($1.7 billion in RCB and $5.9 billion in LCL) and a net build of $0.4 billion for corporate loans (a build of $0.9 billion in ICG and a release of $0.5 billion in SAP).

Net credit losses of $30.7 billion during 2009 increased $11.7 billion from year-ago levels. The increase consisted of $7.6 billion for consumer loans ($1.3 billion in RCB, $6.1 billion in LCL and $0.2 billion in SAP) and a net increase of $4.1 billion for corporate loans ($0.2 billion decrease in ICG offset by a $4.3 billion increase in SAP).

Consumer non-accrual loans totaled $18.6 billion at December 31, 2009, compared to $12.6 billion at December 31, 2008. The consumer loan 90 days past due delinquency rate was 4.82% at December 31, 2009, compared to 2.96% at December 31, 2008. The 90 days past due delinquencies continue to rise for the first mortgage portfolio in the U.S., primarily due to the lengthening of the foreclosure process by many states and the increasing impact of the Home Affordable Modification Program (HAMP). Loans in the HAMP trial modification period are reported as delinquent if the original contractual payments are not received on time (even if the reduced payments agreed to under the program are made by the borrower) until the loan has completed the trial period under the program (see "Consumer Loan Modification Programs" and "U.S. Consumer Mortgage Lending" below). The 30 to 89 days past due delinquency rate was 3.56% at December 31, 2009, compared to 3.51% at December 31, 2008.

Corporate non-accrual loans were $13.5 billion at December 31, 2009, compared to $9.7 billion at December 31, 2008. The increase from the prior year is mainly due to Citi's continued policy of actively moving loans into non-accrual at earlier stages of anticipated distress. Over two-thirds of the non-accrual corporate loans are current and continue to make their contractual payments.

For Citi's loan accounting policies, see Note 1 to the Consolidated Financial Statements.

2010 Credit Outlook

Credit costs will remain a significant driver of Citi's financial performance in 2010. Certain regions, includingAsia and Latin America, are showing improvement in consumer credit trends. This trend is expected to continue into 2010 as long as economic recovery in these regions is sustained. In North America, however, credit trends will largely depend on the broader macroeconomic environment, as well as the impact of industry factors such as CARD Act implementation and the outcome of the HAMP, each as discussed in more detail. Across North America, a modest increase in net credit losses is expected in the first quarter of 2010, after which there may be some slight improvement. However, the outcome for the second half of 2010 will largely depend on the economy, and the success of Citi's ongoing loss mitigation efforts. Changes to the Company's consumer loan loss reserve balances will continue to reflect the losses embedded in the portfolio due to underlying credit trends, as well as the impact of forbearance programs.

Corporate credit is inherently difficult to predict, and accordingly, the recognition of credit losses and changes in reserves will be somewhat episodic.

Loans Outstanding

In millions of dollars at year end	2009	2008	2007	2006	2005

Citicorp	$10,066	$ 7,684	$ 4,910		
Citi Holdings	25,967	21,932	11,207		
Total Citigroup	$36,033	$29,616	$16,117		

(1) 2009 primarily includes reductions to the loan loss reserve of approximately $543 million related to securitizations, approximately $402 million related to the sale or transfers to held-for-sale of U.S. real estate lending loans, and $562 million related to the transfer of the U.K. cards portfolio to held-for-sale. 2008 primarily includes reductions to the loan loss reserve of approximately $800 million related to FX translation, $102 million related to securitizations, $244 million for the sale of the German retail banking operation, $156 million for the sale of CitiCapital, partially offset by additions of $106 million related to the Cuscatlán and Bank of Overseas Chinese acquisitions. 2007 primarily includes reductions to the loan loss reserve of $475 million related to securitizations and transfers to loans held-for-sale, and reductions of $83 million related to the transfer of the U.K. CitiFinancial portfolio to held-for-sale, offset by additions of $610 million related to the acquisitions of Egg, Nikko Cordial, Grupo Cuscatlán and Grupo Financiero Uno. 2006 primarily includes reductions to the loan-loss reserve of $429 million related to securitizations and portfolio sales and the addition of $84 million related to the acquisition of the CrediCard portfolio. 2005 primarily includes reductions to the loan loss reserve of $584 million related to securitizations and portfolio sales, a reduction of $110 million related to purchase accounting adjustments from the KorAm acquisition, and a reduction of $90 million from the sale of

CitiCapital's transportation portfolio.

(2) Represents additional credit loss reserves for unfunded lending commitments and letters of credit recorded in Other Liabilities on the Consolidated Balance Sheet.

(3) Allowance for loan losses represents management's best estimate of probable losses inherent in the portfolio, as well as probable losses related to large individually evaluated impaired loans and troubled debt restructurings. See "Significant Accounting Policies and Significant Estimates." Attribution of the allowance is made for analytical purposes only, and the entire allowance is available to absorb probable credit losses inherent in the overall portfolio.

Non-Accrual Assets

The table below summarizes Citigroup's view of non-accrual loans as of the periods indicated. Non-accrual loans are loans in which the borrower has fallen behind in interest payments or, for corporate loans, where Citi has determined that the payment of interest or principal is doubtful, and which are therefore considered impaired. Consistent with industry conventions, Citi generally accrues interest on credit card loans until such loans are charged-off, which typically occurs at 180 days contractual delinquency. As such, the non-accrual loan disclosures in this section do not include credit card loans. As discussed under "Accounting Policies" in Note 1 to the Consolidated Financial Statements, in situations where Citi reasonably expects that only a portion of the principal and interest owed will ultimately be collected, all payments received are reflected as a reduction of principal and not as interest income. There is no industry-wide definition of non-accrual assets, however, and as such, analysis against the industry is not always comparable.

As discussed under "Loan and Credit Overview," Citigroup has been actively moving corporate loans into the non-accrual category at earlier stages of anticipated distress. Corporate non-accrual loans may still be current on interest payments, however, and as of December 31, 2009, over two-thirds of the total portfolio of non-accrual corporate loans are current and continue to make their contractual payments.

Non-accrual loans

In millions of dollars	2009	2008	2007	2006	2005
Citicorp	$ 4,968	$ 3,193	$2,027	$1,141	$1,136

(1) Total loans exclude interest and fees on credit cards.

(2) The ratios of 90 days or more past due and 30-89 days past due are calculated based on end-of-period loans.

(3) The 90 days or more past due balances for Citi-branded cards and retail partners cards are generally still accruing interest. Citigroup's policy is generally to accrue interest on credit card loans until 180 days past due, unless notification of bankruptcy filing has been received earlier.

(4) The 90 or more and 30-89 days past due and related ratio for North America LCL (excluding cards) excludes U.S. mortgage loans that are guaranteed by U.S. government-sponsored agencies since the potential loss predominantly resides within the U.S. agencies. The amounts excluded for loans 90+days past due and (end-of-period loans) for each period are: $5.4 billion ($9.0 billion), $3.0 billion ($6.2 billion), and $1.8 billion ($3.3 billion) as of December 31, 2009, December 31, 2008 and December 31, 2007, respectively. The amounts excluded for loans 30-89 days past due (end-of-period loans have the same adjustment as above) for each period are: $1.0 billion, $0.6 billion, and $0.4 billion, as of December 31, 2009, December 31, 2008, and December 31, 2007, respectively.

(1) Total average loans exclude interest and fees on credit cards.
(2) The ratios of net credit losses are calculated based on average loans, net of unearned income.

Consumer Loan Modification Programs

Citigroup has instituted a variety of modification programs to assist borrowers with financial difficulties. These programs include modifying the original loan terms, reducing interest rates, extending the remaining loan duration and/or waiving a portion of the remaining principal balance. Citi's programs consist of the U.S. Treasury's Home Affordable Modification Program (HAMP), as well as short-term forbearance and long-term modification programs, each summarized below.

HAMP. The HAMP is designed to reduce monthly mortgage payments to a 31% housing debt ratio by lowering the interest rate, extending the term of the loan and forbearing principal of certain eligible borrowers who have defaulted on their mortgages or who are at risk of imminent default due to economic hardship. In order to be entitled to loan modifications, borrowers must complete a three- to five-month trial period, make the agreed payments and provide the required documentation. Effective June 1, 2010, documentation must be provided prior to beginning the trial period, whereas prior to that date, it was required to be provided before the end of the trial period. This change generally means that Citi will be able to verify income up front for potential HAMP participants before they begin making lower monthly payments. We believe this change will limit the number of borrowers who ultimately fall out from the trials and potentially mitigate the impact of HAMP trial participants on early bucket delinquency data.

During the trial period, Citi requires that the original terms of the loans remain in effect pending completion of the modification. As of December 31, 2009, approximately $7.1 billion of first mortgages were enrolled in the HAMP trial period, while $300 million have successfully completed the trial period. Upon completion of the trial period, the terms of the loan are contractually modified, and it is accounted for as a "troubled debt restructuring" (see "Long-Term Programs" below). For additional information on HAMP, see "U.S. Consumer Lending—Mortgage Lending" below.

Short-term programs. Citigroup has also instituted interest rate reduction programs (primarily in the United States) to assist borrowers experiencing temporary hardships. These programs include short-term (12 months or less) interest rate reductions and deferrals of past due payments. The loan volume under these short-term programs increased significantly during 2009, and loan loss reserves for these loans have been enhanced, giving consideration to the higher risk associated with those borrowers and reflecting the estimated future credit losses for those loans. See Note 1 to the Consolidated Financial Statements for a further discussion of the allowance for loan losses for such modified loans.

The following table presents the amounts of gross loans modified under short-term interest rate reduction programs in the U.S. as of December 31, 2009:

	December 31, 2009	
In millions of dollars	Accrual	Non-accrual
Mortgage and real estate	$7,087	$ 398
Cards	813	—
Installment and other	1,734	29

Long-term programs. Long-term modification programs, or "troubled debt restructurings" (TDRs), occur when the terms of a loan have been modified due to the borrowers' financial difficulties and a long-term concession has been granted to the borrower. Substantially all programs in place provide permanent interest rate reductions. Valuation allowances for TDRs are determined by comparing estimated cash flows of the loans discounted at the loans' original contractual interest rates to the carrying value of the loans. See Note 1 to the Consolidated Financial Statements for a further discussion of the allowance for loan losses for such modified loans.

The following table presents the amounts of gross loans related to these TDRs as of December 31, 2009 and 2008:

			December 31	
	Accrual		Non-accrual	
In millions of dollars	2009	2008	2009	2008
Mortgage and real estate	$8,654	$4,364	$1,413	$207
Cards	2,303	1,054	150	41
Installment and other	3,128	2,345	250	141

Payment deferrals that do not continue to accrue interest primarily occur in the U.S. residential mortgage business. Other payment deferrals continue to accrue interest and are not deemed to offer concessions to the customer. Other types of concessions are not material.

As discussed in more detail in "U.S. Consumer Lending—Mortgage Lending" and "U.S. Consumer Lending—North America Cards" below, the measurement of the success of Citi's loan modification programs varies by program objectives, type of loan, geography, and other factors. Citigroup uses a variety of metrics to evaluate success, including re-default rates and balance reduction trends. These metrics may be compared against the performance of similarly situated customers who did not receive concessions.

U.S. CONSUMER LENDING
Mortgage Lending

Overview
Citi's North America consumer mortgage portfolio consists of both first lien and second lien mortgages. As of December 31, 2009, the first lien mortgage portfolio in LCL totaled approximately $118 billion while the second lien mortgage portfolio in LCL was approximately $54 billion. Although the majority of the mortgage portfolio is managed by LCL within Citi Holdings, there are $0.5 billion of first lien mortgages and $1.7 billion of second lien mortgages reported in Citicorp. Additionally, as mentioned above, in the first quarter of 2010, approximately $34 billion of U.S. mortgages will be transferred from LCL within Citi Holdings to NA RCB within Citicorp.

Citi's first lien mortgage portfolio includes $9.0 billion of loans with Federal Housing Administration or Veterans Administration guarantees. These portfolios consist of loans originated to low-to-moderate-income borrowers with lower FICO (Fair Isaac Corporation) scores and generally have higher loan-to-value ratios (LTVs). These loans have high delinquency rates but, given the guarantees, Citi has experienced negligible credit losses on these loans. The first lien mortgage portfolio also includes $1.8 billion of loans with LTVs above 80%, which have insurance through private mortgage insurance (PMI) companies, and $3.5 billion of loans subject to Long-Term Standby Commitments[1] with U.S. government sponsored enterprises (GSE), for which Citi has limited exposure to credit losses.

The following charts detail the quarterly trends in delinquencies and net credit losses for Citi's first and second North America consumer mortgage portfolios.

For first mortgages, both delinquencies and net credit losses are impacted by the HAMP trial loans in the U.S. mortgage portfolio. As set forth in the first chart, first mortgage delinquencies rates continued to increase in 2009, exacerbated in part by the reduction in loan balances. The continued increase in first mortgage delinquencies during the third and fourth quarters of 2009 was primarily attributable to both the growing backlog of foreclosures in process and HAMP modifications.

The growing amount of foreclosures in process, which is related to an industry-wide phenomenon resulting from foreclosure moratoria and other efforts to prevent or forestall foreclosure, have specific implications on the portfolio:

- It tends to inflate the amount of 180+ day delinquencies in our mortgage statistics.
- It can result in increasing levels of consumer non-accrual loans, as we are unable to take possession of the underlying assets and sell these properties on a timely basis.
- It may have a dampening effect on NIM as non-accrual assets build on the Company's balance sheet.

As discussed in "Consumer Loan Modification Programs" above, Citigroup offers short-term and long-term real estate loan modification programs. Citi monitors the performance of its real estate loan modification programs by tracking credit loss rates by vintage. At 18 months after modifying an account, in Citi's experience to date, we typically reduce credit loss rates by approximately one-third compared to similar accounts that were not modified.

Currently, Citi's efforts are concentrated on the HAMP. Contractual modifications of loans that successfully completed the HAMP trial period began in September 2009; accordingly, this is the earliest HAMP vintage available for comparison. While early indications of the performance of these HAMP modifications are encouraging, Citi remains cautious and will continue to monitor the performance of these HAMP and non-HAMP modification programs and their impact on reducing Citi's credit losses.

As previously disclosed, loans in the HAMP trial modification period that do not make their original contractual payment are reported as delinquent, even if the reduced payments agreed to under the program are made by the borrower. Further, HAMP trial modifications have the effect of marginally reducing our net credit losses and increasing our required loan loss reserves. Specifically, the HAMP impacted Citi's net credit losses in the first mortgage portfolio during the third and fourth quarters of 2009 as loans in the trial period are not charged off at 180 DPD as long as they have made at least one payment. Citigroup has increased its loan loss provisions to appropriately reserve for this risk.

Citigroup believes that the success rate of the HAMP will be a key factor influencing net credit losses from delinquent first mortgage loans, at least during the first half of 2010, and the outcome of the program will largely depend on the success rates of borrowers completing the trial period and meeting the documentation requirements.

By contrast, second mortgages continue to show positive trends in both net credit losses and delinquencies, reflecting the impact of portfolio re-positioning and loss mitigation. Citi continues to actively manage this exposure by reducing the riskiest accounts, including by tightening credit requirements through higher FICOs, lower LTVs, and increased documentation and verifications. As discussed under "Risk Factors," Citigroup is actively engaged in discussions with the U.S. Treasury for the second lien program under HAMP.

1 A Long-Term Standby Commitment (LTSC) is a structured transaction in which Citi transfers the credit risk of certain eligible loans to an investor in exchange for a fee. These loans remain on balance sheet unless they reach a certain delinquency level (between 120 and 180 days), in which case the LTSC investor is required to buy the loan at par.

73

First Mortgages

Note: Includes loans for Canada and Puerto Rico. Excludes loans that are guaranteed by U.S. government sponsored agencies.

Second Mortgages

Note: Includes loans for Canada and Puerto Rico.

Data appearing in the tables below have been sourced from Citigroup’s risk systems and, as such, may not reconcile with disclosures elsewhere generally due to differences in methodology or variations in the manner in which information is captured. Citi has noted such variations in instances where it believes they could be material to reconcile the information presented elsewhere.

Citi’s credit risk policy is not to offer option ARMs/negative amortizing mortgage products to its customers. As a result, option ARMs/negative amortizing mortgages represent an insignificant portion of total balances that were acquired only incidentally as part of prior portfolio and business purchases.

A portion of loans in the U.S. mortgage portfolio currently requires a payment to satisfy only the current accrued interest for the payment period, or an interest-only payment. Our mortgage portfolio includes approximately $28 billion of first and second lien home equity lines of credit (HELOCs) that are still within their revolving period and have not commenced amortization. The interest-only payment feature during the revolving period is standard for the HELOC product across the industry. The first mortgage portfolio contains approximately $33 billion of mostly adjustable rate mortgages (ARMs) that are currently required to make an interest-only payment. These loans will be required to make a fully amortizing payment upon expiration of their interest-only payment period, and most will do so within a few years of origination. Borrowers that are currently required to make an interest-only payment cannot select a lower payment that would negatively amortize the loan. First mortgage loans with this payment feature are primarily to high-credit-quality borrowers that have on average significantly higher refreshed FICO scores than other loans in the first mortgage portfolio.

Loan balances

First mortgages—Loan balances. As a consequence of the difficult economic environment and the decrease in housing prices, LTV and FICO scores have deteriorated since origination as depicted in the table below. On a refreshed basis, approximately 28% of first lien mortgages had a LTV ratio above 100%, compared to approximately 0% at origination. Approximately 30% of the first lien mortgages had FICO scores less than 620 on a refreshed basis, compared to 15% at origination. One half of the first lien mortgages with refreshed LTV ratios above 100% have refreshed FICO scores greater than 660; 90 + DPD rates for this portion of the portfolio were 2.8%.

Balances: December 31, 2009—First Lien Mortgages

LTV ≤ 80%	30%	4%	10%
80% < LTV ≤100%	16%	3%	9%
LTV > 100%	14%	3%	11%

Note: NM – Not meaningful. First lien mortgage table excludes loans in Canada and Puerto Rico. Table excludes loans guaranteed by U.S. government sponsored agencies and loans subject to LTSCs. Table also excludes $2.0 billion from At Origination balances and $1.0 billion from Refreshed balances for which FICO or LTV data were unavailable. Balances exclude deferred fees/costs. Refreshed FICO scores based on updated credit scores obtained from Fair Isaac Corporation. Refreshed LTV ratios are derived from data at origination updated using mainly the Case-Shiller Home Price Index or the Federal Housing Finance Agency Price Index.

Second mortgages—Loan balances. In the second lien mortgage portfolio, the majority of loans are in the higher FICO categories. The challenging economic conditions have caused a migration towards lower FICO scores and higher LTV ratios. Approximately 42% of that portfolio had refreshed loan-to-value ratios above 100%, compared to approximately 0% at origination. Approximately 18% of second lien mortgages had FICO scores less than 620 on a refreshed basis, compared to 4% at origination. Over two thirds of the second lien loans with LTV ratios greater than 100% had refreshed FICO scores greater than 660; 90+ DPD rates for this portion of the portfolio were 0.4%.

Balances: December 31, 2009—Second Lien Mortgages

AT ORIGINATION	FICO ≥ 660	620 ≤ FICO <660	FICO < 620
LTV ≤ 80%	48%	2%	2%
80% < LTV ≤100%	43%	3%	2%
LTV > 100%	NM	NM	NM

REFRESHED	FICO ≥ 660	620 ≤FICO <660	FICO<620
LTV ≤ 80%	23%	1%	3%
80% < LTV ≤100%	23%	2%	5%
LTV > 100%	29%	4%	10%

Note: NM—Not meaningful. Second lien mortgage table excludes loans in Canada and Puerto Rico. Table excludes loans subject to LTSCs. Table also excludes $1.7 billion from At Origination balances and $0.8 billion from Refreshed balances for which FICO or LTV data were unavailable. Refreshed FICO scores, based on updated credit scores obtained from Fair Isaac Corporation. Refreshed LTV ratios are derived from data at origination updated using mainly the Case-Shiller Home Price Index or the Federal Housing Finance Agency Price Index.

Delinquencies

The tables below provide delinquency statistics for loans 90+DPD, as a percentage of outstandings in each of the FICO/LTV combinations, in both the first lien and second lien mortgage portfolios. For example, loans with FICO ≥ 660 and LTV ≤ 80% at origination have a 90+DPD rate of 7.9%.

Loans with FICO scores of less than 620 exhibit significantly higher delinquencies than in any other FICO band. Similarly, loans with LTVs greater than 100% have higher delinquencies than LTVs of less than or equal to 100%.

The first mortgage delinquencies continued to rise during 2009. Further breakout of the FICO below 620 segment indicates that delinquencies in this segment, on a refreshed basis, are about three times higher than in the overall first mortgage portfolio.

Delinquencies: 90+DPD Rates—First Lien Mortgages

AT ORIGINATION	FICO ≥ 660	620 ≤ FICO <660	FICO < 620
LTV ≤ 80%	7.9%	13.1%	14.0%
80% < LTV ≤100%	10.2%	17.3%	20.7%
LTV > 100%	NM	NM	NM

REFRESHED	FICO ≥ 660	620 ≤FICO <660	FICO < 620
LTV ≤ 80%	0.3%	3.8%	18.0%
80% < LTV ≤100%	0.8%	8.5%	27.3%
LTV > 100%	2.8%	23.3%	42.0%

Note: NM—Not meaningful. 90+DPD rates are based on balances referenced in the tables above.

Delinquencies: 90+DPD Rates—Second Lien Mortgages

AT ORIGINATION	FICO ≥ 660	620 ≤ FICO <660	FICO < 620
LTV ≤ 80%	1.5%	4.2%	5.6%
80% < LTV ≤100%	4.2%	5.3%	7.6%
LTV > 100%	NM	NM	NM

REFRESHED	FICO ≥ 660	620 ≤FICO <660	FICO < 620
LTV ≤ 80%	0.0%	0.7%	8.5%
80% < LTV ≤100%	0.1%	1.3%	9.8%
LTV > 100%	0.4%	4.5%	19.3%

Note: NM—Not meaningful. 90+DPD rates are based on balances referenced in the tables above.

Origination channel, geographic distribution and origination vintage

The following tables detail Citi's first and second lien U.S. consumer mortgage portfolio by origination channel, geographic distribution and origination vintage.

By origination channel

Citi's U.S. consumer mortgage portfolio has been originated from three main channels: retail, broker and correspondent.

- Retail: loans originated through a direct relationship with the borrower.
- Broker: loans originated through a mortgage broker, where Citi underwrites the loan directly with the borrower.
- Correspondent: loans originated and funded by a third party, where Citi purchases the closed loans after the correspondent has funded the loan. This channel includes loans acquired in large bulk purchases from other mortgage originators primarily in 2006 and 2007. Such bulk purchases were discontinued in 2007.

First Lien Mortgages: December 31, 2009

As of December 31, 2009, approximately 55% of the first lien mortgage portfolio was originated through third-party channels. Given that loans originated through correspondents have exhibited higher 90+DPD delinquency rates than retail originated mortgages, Citi terminated business with a number of correspondent sellers in 2007 and 2008. During 2008, Citi also severed relationships with a number of brokers, only maintaining those who have produced strong, high-quality and profitable volume. Citi has also discontinued purchasing loans held in portfolio from correspondents and significantly reduced bulk purchases.

CHANNELS ($ in billions)	FIRST LIEN MORTGAGES	CHANNEL % TOTAL	90+DPD %	*FICO < 620	*LTV > 100%
RETAIL	$48.2	44.9%	5.1%	$14.3	$ 9.1
BROKER	$19.0	17.7%	11.3%	$ 3.7	$ 5.7
CORRESPONDENT	$40.1	37.4%	16.6%	$14.0	$15.0

* Refreshed FICO and LTV.

Note: First lien mortgage table excludes Canada and Puerto Rico, deferred fees/costs, loans guaranteed by U.S. government sponsored agencies and loans subject to LTSCs.

Second Lien Mortgages: December 31, 2009

For second lien mortgages, approximately 49% of the loans were originated through third-party channels. As these mortgages have demonstrated a higher incidence of delinquencies, Citi no longer originates second mortgages through third-party channels.

CHANNELS	SECOND LIEN	CHANNEL	90+DPD%	*FICO < 620	*LTV > 100%
($ in billions)	MORTGAGES	% TOTAL			
RETAIL	$25.2	51.0%	1.7%	$3.9	$6.9
BROKER	$12.4	25.0%	3.9%	$2.2	$6.8
CORRESPONDENT	$11.8	24.0%	5.0%	$2.9	$7.0

* Refreshed FICO and LTV.

Note: Excludes Canada and Puerto Rico and loans subject to LTSCs.

By state

Approximately half of Citi's U.S. consumer mortgage portfolio is located in five states: California, New York, Florida, Texas and Illinois. Those states represent 50% of first lien mortgages and 54% of second lien mortgages.

Florida and Illinois have above-average 90+DPD delinquency rates. Florida has 55% of its first lien mortgage portfolio with refreshed LTV>100%, compared to 28% overall for first lien mortgages. Illinois has 35% of its loan portfolio with refreshed LTV>100%. Texas, despite having 40% of its portfolio with FICO<620, has a lower delinquency rate relative to the overall portfolio. Texas has less than 0.5% of its loan portfolio with refreshed LTV>100%.

First Lien Mortgages: December 31, 2009

STATES	FIRST LIEN	STATE	90+DPD %	*FICO < 620	*LTV > 100%
($ in billions)	MORTGAGES	% TOTAL			
CALIFORNIA	$29.6	27.6%	10.4%	$ 4.8	$12.6
NEW YORK	$ 8.9	8.3%	7.1%	$ 1.6	$ 0.5
FLORIDA	$ 6.6	6.2%	18.1%	$ 2.5	$ 3.7
ILLINOIS	$ 4.5	4.2%	12.3%	$ 1.5	$ 1.6
TEXAS	$ 4.2	3.9%	6.2%	$ 1.7	$ 0.0
OTHERS	$53.5	49.9%	10.4%	$19.8	$11.5

* Refreshed FICO and LTV.

Note: First lien mortgage table excludes Canada and Puerto Rico, deferred fees/costs, loans guaranteed by U.S. government sponsored agencies and loans subject to LTSCs.

In the second lien mortgage portfolio, Florida continues to experience above-average delinquencies, with approximately 72% of their loans with LTV > 100% compared to 42% overall for second lien mortgages.

Second Lien Mortgages: December 31, 2009

STATES	SECOND LIEN	STATE	90+DPD %	*FICO < 620	*LTV > 100%
($ in billions)	MORTGAGES	% TOTAL			
CALIFORNIA	$13.7	27.8%	3.4%	$1.9	$7.3
NEW YORK	$ 6.6	13.4%	2.0%	$0.8	$1.1
FLORIDA	$ 3.2	6.6%	5.4%	$0.8	$2.3
ILLINOIS	$ 1.9	3.9%	2.9%	$0.4	$1.1
TEXAS	$ 1.4	2.8%	1.5%	$0.2	$0.0
OTHERS	$22.5	45.5%	2.9%	$4.8	$8.7

* Refreshed FICO and LTV.

Note: Excludes Canada and Puerto Rico and loans subject to LTSCs.

By vintage

For Citigroup's combined U.S. consumer mortgage portfolio (first and second lien mortgages), approximately half of the portfolio consists of 2006 and 2007 vintages, which demonstrate above-average delinquencies. In first mortgages, approximately 43% of the portfolio is of 2006 and 2007 vintages, which have 90+DPD rates well above the overall portfolio rate. In second mortgages, 62% of the portfolio is of 2006 and 2007 vintages, which again have higher delinquencies compared to the overall portfolio rate.

First Lien Mortgages: December 31, 2009

VINTAGES	FIRST LIEN	VINTAGE	90+DPD %	*FICO < 620	*LTV > 100%
($ in billions)	MORTGAGES	% TOTAL			

2009	$ 4.5	4.2%	0.6%	$ 0.6	$ 0.1
2008	$13.8	12.8%	5.5%	$ 3.0	$ 2.1
2007	$27.2	25.4%	16.9%	$10.2	$11.5
2006	$19.5	18.1%	14.3%	$ 6.4	$ 8.4
2005	$18.6	17.4%	7.8%	$ 4.4	$ 5.9
≤ 2004	$23.7	22.1%	6.9%	$ 7.4	$ 1.8

* Refreshed FICO and LTV.
Note: First lien mortgage table excludes Canada and Puerto Rico, deferred fees/costs, loans guaranteed by U.S. government sponsored agencies and loans subject to LTSCs.

Second Lien Mortgages: December 31, 2009

VINTAGES ($ in billions)	SECOND LIEN MORTGAGES	VINTAGE % TOTAL	90+DPD %	*FICO < 620	*LTV > 100%
2009	$ 0.6	1.2%	0.5%	$0.0	$0.0
2008	$ 4.3	8.7%	1.1%	$0.6	$0.7
2007	$14.6	29.5%	3.6%	$2.9	$6.8
2006	$16.1	32.6%	3.7%	$3.2	$8.4
2005	$ 9.5	19.3%	2.7%	$1.5	$4.0
≤ 2004	$ 4.3	8.6%	1.9%	$0.7	$0.6

* Refreshed FICO and LTV.
Note: Excludes Canada and Puerto Rico and loans subject to LTSCs.

North America Cards

Citi's North America cards portfolio consists of our Citi-branded and retail partner cards portfolios located in Citicorp—Regional Consumer Banking and Citi Holdings—Local Consumer Lending, respectively. As of December 31, 2009, the Citi-branded portfolio totaled approximately $83 billion while the retail partner cards portfolio was approximately $58 billion, both reported on a managed basis.

The following charts detail the quarterly trends in delinquencies and net credit losses for Citigroup's North America Citi-branded and retail partner cards portfolios.

In each of the two portfolios, Citi has been actively eliminating riskier accounts and sales to mitigate losses. First, we have removed high-risk customers from the portfolio by either reducing available lines of credit or closing accounts. On a net basis, end of period open accounts are down 11% in both Citi-branded and retail partner cards versus prior-year levels. Second, Citi has improved the tools used to identify and manage exposure in each of the portfolios by targeting unique customer attributes.

In Citi's experience to date, these portfolios have significantly different characteristics:

- Citi-branded cards tend to have a longer estimated account life, with higher credit lines and balances reflecting the greater utility of a multi-purpose credit card.
- Retail partner cards tend to have a shorter account life, with smaller credit lines and balances. The account portfolio, by nature, turns faster and the loan balances reflect more recent vintages.

As a result, loss mitigation efforts, such as stricter underwriting standards for new accounts, decreasing higher-risk credit lines, closing high-risk accounts and re-pricing, tend to affect the retail partner cards portfolio faster than the branded portfolio.

In addition to tightening credit standards, Citi also continues to pursue other loss mitigation efforts, including improvements in collections effectiveness and various forbearance programs. We believe forbearance programs improve the longer-term quality of these accounts.

Citigroup offers both short-term and long-term modification programs to its credit card customers, primarily in the U.S. The short-term U.S. programs provide interest rate reductions for up to 12 months, while the long-term programs provide interest rate reductions for up to five years. In both types of U.S. programs, the annual percentage rate (APR) is typically reduced to below 10%.

Citigroup monitors the performance of these U.S. credit card short-term and long-term modification programs by tracking cumulative loss rates by vintages (when customers enter a program) and comparing that performance with that of similar accounts whose terms were not modified. For example, for U.S. credit cards, in Citi's experience to date, at 24 months after modifying an account, Citi typically reduces credit losses by approximately one-third compared to similar accounts that were not modified. Citi has observed that this improved performance of modified loans relative to those not modified is generally greatest during the first 12 months after modification. Following that period, losses have tended to increase but typically stabilize at levels which are still below those for similar loans that were not modified, resulting in an improved cumulative loss performance. To date, Citi has tended to see that this benefit is sustained over time across our U.S. credit card portfolios.

Recognizing the impact of various forbearance programs, we are nevertheless seeing some early positive credit trends in both Citi-branded and retail partner cards. While both portfolios experienced an expected seasonal increase in 90+ day delinquencies in the fourth quarter of 2009, which we currently expect could lead to a moderate increase in net credit losses in the first quarter of 2010, earlier bucket delinquencies (30–89 days past due) improved on a dollar basis.

Overall, however, Citi remains cautious and currently believes that net credit losses in each of the cards portfolios will continue to remain at elevated levels and will continue to be highly dependent on the external environment and industry changes.

Citi-Branded Cards

Note: Includes Puerto Rico.

Retail Partners Cards

Note: Includes Canada, Puerto Rico and Installment Lending.

As set forth in the table below, approximately 73% of the Citi-branded portfolio had FICO credit scores of at least 660 on a refreshed basis as of December 31, 2009, while 63% of the retail partner cards portfolio had scores above 660.

Balances: December 31, 2009

Refreshed	Citi Branded	Retail Partners
FICO ≥ 660	73%	63%
620 ≤FICO < 660	11%	13%
FICO < 620	16%	24%

Note: Based on balances of $137 billion. Balances include interest and fees. Excludes Canada, Puerto Rico, Installment and Classified portfolios. Excludes balances where FICO was unavailable ($0.7 billion for Citi-branded, $2.1 billion for retail partners cards).

The table below provides delinquency statistics for loans 90+DPD for both the Citi-branded and retail partners cards portfolios as of December 31, 2009. Given the economic environment, customers have migrated down from higher FICO score ranges, driven by their delinquencies with Citi and/or with other creditors. As these customers roll through the delinquency buckets, they materially damage their credit score and may ultimately go to charge-off. Loans 90+DPD are more likely to be associated with low refreshed FICO scores, both because low scores are indicative of repayment risk and because their delinquency has been reported by Citigroup to the credit bureaus. Loans with FICO scores less than 620, which constitute 16% of the Citi-branded portfolio, have a 90+DPD rate of 16.9%; in the retail partner cards portfolio, loans with FICO scores less than 620 constitute 24% of the portfolio and have a 90+DPD rate of 18.0%.

90+DPD Delinquency Rate: December 31, 2009

Refreshed	Citi Branded 90+DPD%	Retail Partners 90+DPD%
FICO ≥ 660	0.1%	0.2%
620 ≤ FICO < 660	0.4%	0.7%
FICO < 620	16.9%	18.0%

Note: Based on balances of $137 billion. Balances include interest and fees. Excludes Canada, Puerto Rico, Installment and Classified portfolios.

U.S. Installment and Other Revolving Loans

In the table below, Citi's U.S. Installment portfolio consists of consumer loans in the following businesses: Consumer Finance, Retail Banking, Auto, Student Lending and Cards. Other Revolving consists of consumer loans (Ready Credit and Checking Plus products) in the Consumer Retail Banking business. Commercial-related loans are not included.

As of December 31, 2009, the U.S. Installment portfolio totaled approximately $56 billion, while the U.S. Other Revolving portfolio was approximately $1 billion. While substantially all of the U.S. Installment portfolio is managed under LCL within Citi Holdings, it does include $0.4 billion of Consumer Retail Banking loans which are reported in Citicorp. The U.S. Other Revolving portfolio is managed under Citicorp.

The U.S. Installment portfolio includes $20 billion of Student Loans originated under the Federal Family Education Loan Program (FFELP) where losses are substantially mitigated by federal guarantees. These loans generally have higher 90+DPD rates compared to other installment loans, but due to the federal guarantees, have lower net credit loss rates relative to other installment loans.

Approximately 43% of the Installment portfolio had FICO credit scores less than 620 on a refreshed basis. Approximately 30% of the Other Revolving portfolio is composed of loans having FICO less than 620.

Balances: December 31, 2009

Refreshed	Installment	Other Revolving
FICO ≥ 660	42%	55%
620 ≤ FICO < 660	15%	15%
FICO < 620	43%	30%

Note: Based on balances of $54 billion for Installment and $0.9 billion for Other Revolving. Excludes Canada and Puerto Rico. Excludes balances where FICO was unavailable ($2.3 billion for Installment, $0.1 billion for Other Revolving).

The table below provides delinquency statistics for loans 90+DPD for both the Installment and Other Revolving portfolios. Loans 90+DPD are more likely to be associated with low refreshed FICO scores both because low scores are indicative of repayment risk and because their delinquency has been reported by Citigroup to the credit bureaus. On a refreshed basis, loans with FICO scores of less than 620 exhibit significantly higher delinquencies than in any other FICO band and will drive the majority of the losses.

90+DPD Delinquency Rate: December 31, 2009

Refreshed	Installment 90+DPD%	Other Revolving 90+DPD%
FICO ≥ 660	0.2%	0.0%
620 ≤ FICO < 660	0.7%	0.3%

FICO < 620	6.1%	8.3%

Note: Based on balances of $54 billion for Installment and $0.9 billion for Other Revolving. Excludes Canada and Puerto Rico.

Interest Rate Risk Associated with Consumer Mortgage Lending Activity

Citigroup originates and funds mortgage loans. As with all other lending activity, this exposes Citigroup to several risks, including credit, liquidity and interest rate risks. To manage credit and liquidity risk, Citigroup sells most of the mortgage loans it originates, but retains the servicing rights. These sale transactions create an intangible asset referred to as mortgage servicing rights (MSRs). The fair value of this asset is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. Thus, by retaining the servicing rights of sold mortgage loans, Citigroup is still exposed to interest rate risk.

In managing this risk, Citigroup hedges a significant portion of the value of its MSRs through the use of interest rate derivative contracts, forward purchase commitments of mortgage-backed securities, and purchased securities classified as trading (primarily mortgage-backed securities including principal-only strips).

Since the change in the value of these hedging instruments does not perfectly match the change in the value of the MSRs, Citigroup is still exposed to what is commonly referred to as “basis risk.” Citigroup manages this risk by reviewing the mix of the various hedging instruments referred to above on a daily basis.

Citigroup’s MSRs totaled $6.530 billion and $5.657 billion at December 31, 2009 and December 31, 2008, respectively. For additional information on Citi’s MSRs, see Notes 19 and 23 to the Consolidated Financial Statements.

As part of the mortgage lending activity, Citigroup commonly enters into purchase commitments to fund residential mortgage loans at specific interest rates within a given period of time, generally up to 60 days after the rate has been set. If the resulting loans from these commitments will be classified as loans held-for-sale, Citigroup accounts for the commitments as derivatives. Accordingly, the initial and subsequent changes in the fair value of these commitments, which are driven by changes in mortgage interest rates, are recognized in current earnings after taking into consideration the likelihood that the commitment will be funded.

Citigroup hedges its exposure to the change in the value of these commitments by utilizing hedging instruments similar to those referred to above.

CORPORATE LOAN DETAILS

For corporate clients and investment banking activities across Citigroup, the credit process is grounded in a series of fundamental policies, in addition to those described under "Managing Global Risk—Risk Management—Overview," above. These include:

- joint business and independent risk management responsibility for managing credit risks;
- a single center of control for each credit relationship that coordinates credit activities with that client;
- portfolio limits to ensure diversification and maintain risk/capital alignment;
- a minimum of two authorized credit officer signatures required on extensions of credit, one of which must be from a credit officer in credit risk management;
- risk rating standards, applicable to every obligor and facility; and
- consistent standards for credit origination documentation and remedial management.

Corporate Credit Portfolio

The following table presents credit data for Citigroup's corporate loans and unfunded lending commitments at December 31, 2009. The ratings scale is based on Citi's internal risk ratings, which generally correspond to the ratings as defined by S&P and Moody's.

In millions of dollars	At December 31, 2009			
Corporate loans (1)	Recorded investment in loans (2)	% of total (3)	Unfunded lending commitments	% of total (3)
Investment grade (4)	$ 91,565	59%	$ 271,444	88%
Non-investment grade (4)				
Noncriticized	17,984	12	13,769	4
Criticized performing (5)	30,873	20	19,953	6
Commercial real estate (CRE)	6,926	4	1,872	1
Commercial and Industrial and Other	23,947	16	18,081	6
Non-accrual (criticized) (5)	13,545	9	2,570	1
Commercial real estate (CRE)	4,051	3	732	0
Commercial and Industrial and Other	9,494	6	1,838	1
Total non-investment grade	$ 62,402	41%	$ 36,292	12%
Private Banking loans managed on a delinquency basis (4)	14,349		2,451	
Loans at fair value	1,405		—	
Total corporate loans	$ 169,721		$ 310,187	
Unearned income	(2,274)		—	
Corporate loans, net of unearned income	$ 167,447		$ 310,187	

(1) Includes $955 million of TDRs for which concessions, such as the reduction of interest rates or the deferral of interest or principal payments, have been granted as a result of deterioration in the borrowers' financial condition. Each of the borrowers is current under the restructured terms.

(2) Recorded investment in a loan includes accrued interest, net deferred loan fees and costs, unamortized premium or discount, less any direct write-downs.

(3) Percentages disclosed above exclude Private Banking loans managed on a delinquency basis and loans at fair value.

(4) Held-for-investment loans accounted for on an amortized cost basis.

(5) Criticized exposures correspond to the "Special Mention," "Substandard" and "Doubtful" asset categories defined by banking regulatory authorities.

The following tables represent the corporate credit portfolio (excluding Private Banking), before consideration of collateral, by maturity at December 31, 2009. The corporate portfolio is broken out by direct outstandings that include drawn loans, overdrafts, interbank placements, bankers' acceptances, certain investment securities and leases and unfunded commitments that include unused commitments to lend, letters of credit and financial guarantees.

				At December 31, 2009
In billions of dollars	Due within 1 year	Greater than 1 year but within 5 years	Greater than 5 years	Total exposure
Direct outstandings	$213	$ 66	$ 7	$286
Unfunded lending commitments	182	120	10	312
Total	$395	$ 186	$ 17	$598

				At December 31, 2008
In billions of dollars	Due within 1 year	Greater than 1 year but within 5 years	Greater than 5 years	Total exposure
Direct outstandings	$161	$ 100	$ 9	$270
Unfunded lending commitments	206	141	12	359
Total	$367	$ 241	$ 21	$629

Portfolio Mix

The corporate credit portfolio is diverse across counterparty and industry, and geography. The following table shows direct outstandings and unfunded commitments by region:

	December 31, 2009	December 31, 2008
North America	51%	49%
EMEA	27	29
Latin America	9	8
Asia	13	14
Total	100%	100%

The maintenance of accurate and consistent risk ratings across the corporate credit portfolio facilitates the comparison of credit exposure across all lines of business, geographic regions and products.

Obligor risk ratings reflect an estimated probability of default for an obligor and are derived primarily through the use of statistical models (which are validated periodically), external rating agencies (under defined circumstances) or approved scoring methodologies. Facility risk ratings are assigned, using the obligor risk rating, and then factors that affect the loss-given default of the facility, such as support or collateral, are taken into account.With regard to climate change risk, factors evaluated include consideration of the business impact, impact of regulatory requirements, or lack thereof, and impact of physical effects on obligors and their assets.
These factors may adversely affect the ability of some obligors to perform and thus increase the risk of lending activities to these obligors. Citigroup also has incorporated climate risk assessment criteria for certain obligors, as necessary.

Internal obligor ratings equivalent to BBB and above are considered investment grade. Ratings below the equivalent of the BBB category are considered non-investment grade.

The following table presents the corporate credit portfolio by facility risk rating at December 31, 2009 and 2008, as a percentage of the total portfolio:

		Direct outstandings and unfunded commitments
	December 31, 2009	December 31, 2008
AAA/AA/A	58%	58%
BBB	24	24
BB/B	11	13

CCC or below	7	5
Unrated	—	—
Total	100%	100%

The corporate credit portfolio is diversified by industry, with a concentration only in the financial sector, including banks, other financial institutions, insurance companies, investment banks and government and central banks. The following table shows the allocation of direct outstandings and unfunded commitments to industries as a percentage of the total corporate portfolio:

	Direct outstandings and unfunded commitments	
	December 31, 2009	December 31, 2008
Government and central banks	12%	11%

Credit Risk Mitigation

As part of its overall risk management activities, Citigroup uses credit derivatives and other risk mitigants to hedge portions of the credit risk in its portfolio, in addition to outright asset sales. The purpose of these transactions is to transfer credit risk to third parties. The results of the mark-to-market and any realized gains or losses on credit derivatives are reflected in the Principal transactions line on the Consolidated Statement of Income.

At December 31, 2009 and 2008, $59.6 billion and $95.5 billion, respectively, of credit risk exposure were economically hedged. Citigroup's expected loss model used in the calculation of its loan loss reserve does not include the favorable impact of credit derivatives and other risk mitigants. In addition, the reported amounts of direct outstandings and unfunded commitments in this report do not reflect the impact of these hedging transactions. At December 31, 2009 and 2008, the credit protection was economically hedging underlying credit exposure with the following risk rating distribution, respectively:

Rating of Hedged Exposure

	December 31, 2009	December 31, 2008
AAA/AA/A	45%	54%
BBB	37	32
BB/B	11	9
CCC or below	7	5
Total	100%	100%

At December 31, 2009 and 2008, the credit protection was economically hedging underlying credit exposure with the following industry distribution, respectively:

Industry of Hedged Exposure

	December 31, 2009	December 31, 2008
Utilities	9%	10%
Telephone and cable	9	9
Agriculture and food preparation	8	7

(1) Includes all other industries, none of which is greater than 2% of the total hedged amount.

U.S. Subprime-Related Direct Exposure in Citi Holdings—Special Asset Pool

The following table summarizes Citigroup's U.S. subprime-related direct exposures in Citi Holdings—SAP at December 31, 2009 and December 31, 2008:

In billions of dollars	Dec. 31, 2008 exposures	2009 write-ups (downs) (1)	2009 other (2)	Dec. 31, 2009 exposures
Direct ABS CDO super-senior exposures:				
Gross ABS CDO super-senior exposures (A)	$ 18.9			$ 13.3
Hedged exposures (B)	6.9			5.9
Net ABS CDO super-senior exposures:				
ABCP/CDO (3)	9.9	$ 0.6	$ (3.6)	7.0
High grade	0.8	0.3	(1.0)	0.1
Mezzanine	1.3	— (4)	(1.0)	0.3
Total net ABS CDO super-senior exposures (A-B=C)	$ 12.0	$ 0.9	$ (5.6) (4)	$ 7.4
Lending and structuring exposures (D)	$ 2.0	$ (0.1)	$ (0.9)	$ 1.0
Total net exposures (C+D) (5) (6)	$ 14.1	$ 0.8	$ (6.5)	$ 8.4
Credit adjustment on hedged counterparty exposures (E) (7)		$ (1.3)		
Total net write-ups (downs) (C+D+E)		$ (0.5)		

Note: Table may not foot or cross-foot due to rounding.

(1) Includes net profits and losses associated with liquidations.

(2) Reflects sales, transfers and repayment or liquidations of principal.

(3) Consists of older-vintage, high-grade ABS CDOs.

(4) A portion of the underlying securities was purchased in liquidations of CDOs and reported as Trading account assets. As of December 31, 2009, $235 million relating to deals liquidated was held in the trading books.

(5) Composed of net CDO super-senior exposures and gross lending and structuring exposures.

(6) This $8.4 billion in net direct exposures includes the $7.3 billion of assets reflected in the table titled "Assets Within Special Asset Pool" under "Results of Operations—Citi Holdings—Special Asset Pool" above.

(7) Adjustment related to counterparty credit risk.

Citi Holdings had approximately $8.4 billion in net U.S. subprime-related direct exposures in the SAP at December 31, 2009. The exposure consisted of (a) approximately $7.4 billion of net exposures in the super-senior tranches (i.e., the most senior tranches) of CDOs, which are collateralized by asset-backed securities, derivatives on asset-backed securities, or both (ABS CDOs), and (b) approximately $1.0 billion of exposures in its lending and structuring business.

The SAP also has trading positions, both long and short, in U.S. subprime RMBS and related products, including ABS CDOs, which are not included in the figures above. The exposure from these positions is actively managed and hedged, although the effectiveness of the hedging products used may vary with material changes in market conditions.

Direct ABS CDO super-senior exposures

The net $7.4 billion in ABS CDO super-senior exposures as of December 31, 2009 is collateralized primarily by subprime RMBS, derivatives on RMBS, or both.

Citi Holdings' CDO super-senior subprime direct exposures are Level 3 assets. The valuation of the high-grade and mezzanine ABS CDO positions uses trader prices based on the underlying assets of each high-grade and mezzanine ABS CDO. Unlike the ABCP positions, the high-grade and
mezzanine positions are now largely hedged through the ABX and bond short positions, which are trader priced. This results in closer symmetry in the way these long and short positions are valued by the business. Citi Holdings intends to use trader marks to value this portion of the portfolio going forward so long as it remains largely hedged.

The valuation of the ABCP positions is subject to valuation based on significant unobservable inputs. Fair value of these exposures is based on estimates of future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, Citi estimates the prepayments, defaults and loss severities based on a number of macroeconomic factors. The model is calibrated using available mortgage loan information including historical loan performance. An appropriate discount rate is then applied to the cash flows generated for each ABCP tranche, in order to estimate its fair value under current market conditions.

The valuation as of December 31, 2009 assumes that U.S. housing prices are unchanged in 2010, increase 1.1% in 2011, increase 1.4% in 2012, and increase 3% from 2013 onwards. The U.S. unemployment rate is assumed to peak at 10.3% during the first half of 2010.

85

The primary drivers that currently impact the model valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance. Each 10-basis-point change in the discount rate used generally results in an approximate $24 million change in the fair value of Citi's direct ABCP exposures as of December 31, 2009.

Estimates of the fair value of the CDO super-senior exposures depend on market conditions and are subject to further change over time. For a further discussion of the valuation methodology and assumptions used to value direct ABS CDO super-senior exposures to U.S. subprime mortgages, see Note 26 to the Consolidated Financial Statements.

Lending and structuring exposures

The $1.0 billion of subprime-related exposures includes approximately $0.6 billion of actively managed subprime loans purchased for resale or securitization at a discount to par during 2007 that continue to be held by SAP and approximately $0.4 billion of financing transactions with customers secured by subprime collateral, and are carried at fair value.

Exposure to Commercial Real Estate in ICG and SAP

ICG and the SAP, through their business activities and as capital markets participants, incur exposures that are directly or indirectly tied to the commercial real estate (CRE) market. These exposures are represented primarily by the following three categories:

(1) Assets held at fair value include approximately $5.5 billion, of which approximately $4.6 billion are securities, loans and other items linked to CRE that are carried at fair value as trading account assets, and of which approximately $0.9 billion are securities backed by CRE carried at fair value as available-for-sale (AFS) investments. Changes in fair value for these trading account assets are reported in current earnings, while AFS investments are reported in Accumulated other comprehensive income with other-than-temporary impairments reported in current earnings.

The majority of these exposures are classified as Level 3 in the fair value hierarchy. Weakening activity in the trading markets for some of these instruments resulted in reduced liquidity, thereby decreasing the observable inputs for such valuations, and could have an adverse impact on how these instruments are valued in the future if such conditions persist.

(2) Assets held at amortized cost include approximately $1.8 billion of securities classified as held-to-maturity (HTM) and $20.9 billion of loans and commitments. The HTM securities were classified as such during the fourth quarter of 2008 and were previously classified as either trading or AFS. They are accounted for at amortized cost, subject to other-than-temporary impairment. Loans and commitments are recorded at amortized cost, less loan loss reserves. The impact from changes in credit is reflected in the calculation of the allowance for loan losses and in net credit losses.

(3) Equity and other investments include approximately $4.3 billion of equity and other investments such as limited partner fund investments that are accounted for under the equity method, which recognizes gains or losses based on the investor's share of the net income of the investee.

Direct Exposure to Monolines

Citi Holdings has exposure, via the SAP, to various monoline bond insurers (Monolines), listed in the table below, from hedges on certain investments and from trading positions. The hedges are composed of credit default swaps and other hedge instruments. Citi Holdings recorded $1.3 billion
in downward credit valuation adjustments (CVA) related to exposure to Monolines during 2009, bringing the total CVA balance to $5.6 billion.

The following table summarizes the market value of Citi Holdings' direct exposures to and the corresponding notional amounts of transactions with the various Monolines, as well as the aggregate credit valuation adjustment associated with these exposures as of December 31, 2009 and 2008.

In millions of dollars	December 31, 2009 Fair value exposure	December 31, 2009 Notional amount of transactions	December 31, 2008 Fair value exposure	December 31, 2008 Notional amount of transactions
Direct subprime ABS CDO super senior—Ambac	$ 4,468	$ 5,295	$ 4,461	$ 5,357
Trading assets—non-subprime:				
MBIA	$ 1,939	$ 3,828	$ 1,924	$ 4,040
FSA	52	835	204	1,126
Assured	81	452	141	465
Radian	3	150	58	150
Ambac	—	178	21	1,106
Subtotal trading assets—non-subprime	$ 2,075	$ 5,443	$ 2,348	$ 6,887
Total gross fair value direct exposure	$ 6,543		$ 6,809	
Credit valuation adjustment	(5,580)		(4,279)	
Total net fair value direct exposure	$ 963		$ 2,530	

The fair value exposure, net of payable and receivable positions, represents the market value of the contract as of December 31, 2009 and 2008, respectively, excluding the CVA. The notional amount of the transactions, including both long and short positions, is used as a reference value to calculate payments. The CVA is a downward adjustment to the fair value exposure to a counterparty to reflect the counterparty's creditworthiness in respect of the obligations in question.

Credit valuation adjustments are based on credit spreads and on estimates of the terms and timing of the payment obligations of the Monolines. Timing in turn depends on estimates of the performance of the transactions to which Citi's exposure relates, estimates of whether and when liquidation of such transactions may occur and other factors, each considered in the context of the terms of the Monolines' obligations.

As of December 31, 2009 and 2008, SAP had $5.9 billion and $6.9 billion, respectively, in notional amount of hedges against its direct subprime ABS CDO super-senior positions. Of those amounts, $5.3 billion and $5.4 billion, respectively, were purchased from Monolines and are included in the notional amount of transactions in the table above.

With respect to SAP's trading assets, there were $2.1 billion and $2.3 billion of fair value exposure to Monolines as of December 31, 2009 and 2008, respectively. Trading assets include trading positions, both long and short, in U.S. subprime RMBS and related products, including ABS CDOs.

The notional amount of transactions related to the remaining non-subprime trading assets as of December 31, 2009 was $5.4 billion. Of the $5.4 billion, $4.7 billion was in the form of credit default swaps and total return swaps with a fair value exposure of $2.1 billion. The remaining notional amount comprised $0.7 billion, primarily in interest-rate swaps, with a corresponding fair value exposure of $12 million net payable.

The notional amount of transactions related to the remaining non-subprime trading assets at December 31, 2008 was $6.9 billion, with a corresponding fair value exposure of $2.3 billion. Of the $6.9 billion, $5.1 billion was in the form of credit default swaps and total return swaps with a fair value of $2.3 billion. The remaining notional amount comprised $1.8 billion, primarily in interest-rate swaps with a corresponding fair value exposure of $3.9 million.

Citigroup has purchased mortgage insurance from various Monoline mortgage insurers on first-mortgage loans. The notional amount of this insurance protection was approximately $230 million and $400 million as of December 31, 2009 and 2008, respectively, with nominal pending claims against this notional amount.

In addition, Citigroup has indirect exposure to Monolines in various other parts of its businesses. Indirect exposure includes circumstances in which Citigroup is not a contractual counterparty to the Monolines, but instead owns securities that may benefit from embedded credit enhancements provided by a Monoline. For example, corporate or municipal bonds in the trading business may be insured by the Monolines. The table and discussion above do not reflect this type of indirect exposure to the Monolines.

Highly Leveraged Financing Transactions

Highly leveraged financing commitments are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally the case for other companies. In recent years through mid-2008, highly leveraged financing had been commonly employed in corporate acquisitions, management buy-outs and similar transactions.

In these financings, debt service (that is, principal and interest payments) absorbs a significant portion of the cash flows generated by the borrower's business. Consequently, the risk that the borrower may not be able to meet its debt obligations is greater. Due to this risk, the interest rates and fees charged for this type of financing are generally higher than for other types of financing.

Prior to funding, highly leveraged financing commitments are assessed for impairment and losses are recorded when they are probable and reasonably estimable. For the portion of loan commitments that relates to loans that will be held for investment, loss estimates are made based on the borrower's ability to repay the facility according to its contractual terms. For the portion of loan commitments that relates to loans that will be held-for-sale, loss estimates are made in reference to current conditions in the resale market (both interest rate risk and credit risk are considered in the estimate). Loan origination, commitment, underwriting and other fees are netted against any recorded losses.

Citigroup generally manages the risk associated with highly leveraged financings it has entered into by seeking to sell a majority of its exposures to the market prior to or shortly after funding. In certain cases, all or a portion of a highly leveraged financing to be retained is hedged with credit derivatives or other hedging instruments. Thus, when a highly leveraged financing is funded, Citigroup records the resulting loan as follows:

- the portion that Citigroup will seek to sell is recorded as a loan held-for-sale in Other assets on the Consolidated Balance Sheet, and measured at the lower of cost or market; and
- the portion that will be retained is recorded as a loan held-for-investment in Loans and measured at amortized cost less a reserve for loan losses.

Due to the dislocation of the credit markets and the reduced market interest in higher-risk/higher-yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited. This has resulted in Citi's recording pretax write-downs on funded and unfunded highly leveraged finance exposures of $521 million in 2009 and $4.9 billion in 2008.

Citigroup's exposures to highly leveraged financing commitments totaled $5.0 billion at December 31, 2009 ($4.7 billion funded and $0.3 billion in unfunded commitments), reflecting a decrease of $5 billion from December 31, 2008.

In 2008, Citigroup completed the transfer of approximately $12.0 billion of loans to third parties, of which $8.5 billion relates to highly leveraged loan commitments. In these transactions, the third parties purchased subordinate interests backed by the transferred loans. These subordinate interests absorb first loss on the transferred loans and provide the third parties with control of the loans. Citigroup retained senior debt securities backed by the transferred loans. These transactions were accounted for as sales of the transferred loans. The loans were removed from the balance sheet and the retained securities are classified as AFS securities on Citi's Consolidated Balance Sheet.

In addition, Citigroup purchased protection on the senior debt securities from the third-party subordinate interest holders via total return swaps (TRS). The counterparty credit risk in the TRS is protected through margin agreements that provide for both initial margin and additional margin at specified triggers. Due to the initial cash margin received, the existing margin requirements on the TRS, and the substantive subordinate investments made by third parties, Citi believes that the transactions largely mitigate Citi's risk related to the transferred loans.

Citigroup's sole remaining exposure to the transferred loans are the senior debt securities, which have an amortized cost basis and fair value of $7.0 billion at December 31, 2009. The change in the value of the retained senior debt securities that are classified as AFS securities are recorded in AOCI as they are deemed temporary. The offsetting change in the TRS are recorded as cash flow hedges within AOCI. See Notes 16 and 22 to the Consolidated Financial Statements for additional information.

MARKET RISK

Market risk encompasses liquidity risk and price risk, both of which arise in the normal course of business of a global financial intermediary. Liquidity risk is the risk that an entity may be unable to meet a financial commitment to a customer, creditor, or investor when due. See “Capital Resources and Liquidity” for further discussion.

Price risk is the earnings risk from changes in interest rates, foreign exchange rates, and equity and commodity prices, and in their implied volatilities. Price risk arises in non-trading portfolios, as well as in trading portfolios.

Market risks are measured in accordance with established standards to ensure consistency across businesses and the ability to aggregate risk. Each business is required to establish, with approval from independent market risk management, a market risk limit framework for identified risk factors that clearly defines approved risk profiles and is within the parameters of Citigroup’s overall risk appetite. In all cases, the businesses are ultimately responsible for the market risks they take and for remaining within their defined limits.

Non-Trading Portfolios Interest Rate Risk

One of Citigroup’s primary business functions is providing financial products that meet the needs of its customers. Loans and deposits are tailored to the customers’ requirements with regard to tenor, index (if applicable), and rate type. Net interest revenue (NIR) is the difference between the yield earned on the non-trading portfolio assets (including customer loans) and the rate paid on the liabilities (including customer deposits or company borrowings). NIR is affected by changes in the level of interest rates. For example:

- At any given time, there may be an unequal amount of assets and liabilities that are subject to market rates due to maturation or repricing. Whenever the amount of liabilities subject to repricing exceeds the amount of assets subject to repricing, a company is considered “liability-sensitive.” In this case, a company’s NIR will deteriorate in a rising-rate environment.
- The assets and liabilities of a company may reprice at different speeds or mature at different times, subjecting both “liability-sensitive” and “asset-sensitive” companies to NIR sensitivity from changing interest rates. For example, a company may have a large amount of loans that are subject to repricing in the current period, but the majority of deposits are not scheduled for repricing until the following period. That company would suffer from NIR deterioration if interest rates were to fall.

NIR in the current period is the result of customer transactions and the related contractual rates originated in prior periods as well as new transactions in the current period; those prior-period transactions will be impacted by changes in rates on floating-rate assets and liabilities in the current period.

Due to the long-term nature of portfolios, NIR will vary from quarter to quarter even assuming no change in the shape or level of the yield curve as assets and liabilities reprice. These repricings are a function of implied forward interest rates, which represent the overall market’s estimate of future interest rates and incorporate possible changes in the Federal Funds rate as well as the shape of the yield curve.

Interest Rate Risk Governance

The risks in Citigroup’s non-traded portfolios are estimated using a common set of standards that define, measure, limit and report the market risk. Each business is required to establish, with approval from independent market risk management, a market risk limit framework that clearly defines approved risk profiles and is within the parameters of Citigroup’s overall risk appetite. In all cases, the businesses are ultimately responsible for the market risks they take and for remaining within their defined limits. These limits are monitored by independent market risk, country and business Asset and Liability Committees (ALCOs) and the Global Finance and Asset and Liability Committee (FinALCO).

Interest Rate Risk Measurement

Citigroup’s principal measure of risk to NIR is interest rate exposure (IRE). IRE measures the change in expected NIR in each currency resulting solely from unanticipated changes in forward interest rates. Factors such as changes in volumes, spreads, margins and the impact of prior-period pricing decisions are not captured by IRE. IRE assumes that businesses make no additional changes in pricing or balances in response to the unanticipated rate changes.

IRE tests the impact on NIR resulting from unanticipated changes in forward interest rates. For example, if the current 90-day LIBOR rate is 3% and the one-year-forward rate is 5% (i.e., the estimated 90-day LIBOR rate in one year), the +100 bps IRE scenario measures the impact on the company’s NIR of a 100 bps instantaneous change in the 90-day LIBOR to 6% in one year.

The impact of changing prepayment rates on loan portfolios is incorporated into the results. For example, in the declining interest rate scenarios, it is assumed that mortgage portfolios prepay faster and income is reduced. In addition, in a rising interest rate scenario, portions of the deposit portfolio are assumed to experience rate increases that may be less than the change in market interest rates.

Mitigation and Hedging of Risk

Financial institutions’ financial performance is subject to some degree of risk due to changes in interest rates. In order to manage these risks effectively, Citigroup may modify pricing on new customer loans and deposits, enter into transactions with other institutions or enter into off-balance-sheet derivative transactions that have the opposite risk exposures. Therefore, Citigroup regularly assesses the viability of strategies to reduce unacceptable risks to earnings and implements such strategies when it believes those actions are prudent. As information becomes available, Citigroup formulates strategies aimed at protecting earnings from the potential negative effects of changes in interest rates.

Citigroup employs additional measurements, including stress testing the impact of non-linear interest rate movements on the value of the balance sheet; the analysis of portfolio duration and volatility, particularly as they relate to mortgage loans and mortgage-backed securities; and the potential impact of the change in the spread between different market indices.

Non-Trading Portfolios

The exposures in the following table represent the approximate annualized risk to NIR assuming an unanticipated parallel instantaneous 100 bps change, as well as a more gradual 100 bps (25 bps per quarter) parallel change in rates compared with the market forward interest rates in selected currencies.

	December 31, 2009		December 31, 2008	
In millions of dollars	Increase	Decrease	Increase	Decrease
U.S. dollar				
Instantaneous change				
Gross IRE	$(1,194)	$1,473	$(801)	$ 391
Less: ICG trading	336	(350)	563	(465)
Net non-trading IRE	$ (859)	$1,123	$(238)	$ (74)
Gradual change				
Gross IRE	$ (565)	$ 872	$(456)	$ 81
Less: ICG trading	105	(164)	281	(308)
Net non-trading IRE	$ (460)	$ 708	$(175)	$ (227)
Mexican peso				
Instantaneous change	$ 50	$ (50)	$ (18)	$ 18
Gradual change	$ 26	$ (26)	$ (14)	$ 14
Euro				
Instantaneous change	$ (139)	$ 87	$ (56)	$ 57
Gradual change	$ (89)	$ 89	$ (43)	$ 43
Japanese yen				
Instantaneous change	$ 213	NM	$ 172	NM
Gradual change	$ 124	NM	$ 51	NM
Pound sterling				
Instantaneous change	$ (4)	$ 15	$ (1)	$ 1
Gradual change	$ (1)	$ 1	$ —	$ —

NM Not meaningful. A 100 bps decrease in interest rates would imply negative rates for the Japanese yen yield curve.

Certain trading-oriented businesses within Citi have accrual-accounted positions that are hedged with mark-to-market positions. If the economic impact of these offsetting positions is included, Citi's 12-month exposure to a 100 bps instantaneous rise in interest rates is reduced from $(1,194) million to $(731) million. The changes in the U.S. dollar IRE from the prior year reflect changes in the customer-related asset and liability mix, the expected impact of market rates on customer behavior and Citigroup's view of prevailing interest rates.

The following table shows the risk to NIR from six different changes in the implied-forward rates. Each scenario assumes that the rate change will occur on a gradual basis every three months over the course of one year.

	Scenario 1	Scenario 2	Scenario 3	Scenario 4	Scenario 5	Scenario 6
Overnight rate change (bps)	—	100	200	(200)	(100)	—
10-year rate change (bps)	(100)	—	100	(100)	—	100
Impact to net interest revenue (in millions of dollars)	$ 199	$ (502)	$ (1,161)	$ 560	$ 464	$ (42)

Trading Portfolios

Price risk in trading portfolios is monitored using a series of measures, including:

- factor sensitivities;
- value-at-risk (VAR); and
- stress testing.

Factor sensitivities are expressed as the change in the value of a position for a defined change in a market risk factor, such as a change in the value of a Treasury bill for a one-basis-point change in interest rates. Citigroup's independent market risk management ensures that factor sensitivities are calculated, monitored and, in most cases, limited, for all relevant risks taken in a trading portfolio.

VAR estimates the potential decline in the value of a position or a portfolio under normal market conditions. The VAR method incorporates the factor sensitivities of the trading portfolio with the volatilities and correlations of those factors and is expressed as the risk to Citigroup over a one-day holding period, at a 99% confidence level. Citigroup's VAR is based on the volatilities of and correlations among a multitude of market risk factors as well as factors that track the specific issuer risk in debt and equity securities.

Stress testing is performed on trading portfolios on a regular basis to estimate the impact of extreme market movements. It is performed on both individual trading portfolios, and on aggregations of portfolios and businesses. Independent market risk management, in conjunction with the businesses, develops stress scenarios, reviews the output of periodic stress-testing exercises, and uses the information to make judgments as to the ongoing appropriateness of exposure levels and limits.

Each trading portfolio has its own market risk limit framework encompassing these measures and other controls, including permitted product lists and a new product approval process for complex products.

Total revenues of the trading business consist of:

- customer revenue, which includes spreads from customer flow and positions taken to facilitate customer orders;
- proprietary trading activities in both cash and derivative transactions; and
- net interest revenue.

All trading positions are marked-to-market, with the result reflected in earnings. In 2009, negative trading-related revenue (net losses) was recorded for 58 of 260 trading days. Of the 58 days on which negative revenue (net losses) was recorded, two days were greater than $400 million. The following histogram of total daily revenue or loss captures trading volatility and shows the number of days in which Citigroup's trading-related revenues fell within particular ranges.

Histogram of Daily-Trading Related Revenue—12 Months Ended December 31, 2009

Revenues (in millions of dollars)

Citigroup periodically performs extensive back-testing of many hypothetical test portfolios as one check of the accuracy of its VAR. Back-testing is the process in which the daily VAR of a portfolio is compared to the actual daily change in the market value of its transactions. Back-testing is conducted
to confirm that the daily market value losses in excess of a 99% confidence level occur, on average, only 1% of the time. The VAR calculation for the hypothetical test portfolios, with different degrees of risk concentration, meets this statistical criteria.

The level of price risk exposure at any given point in time depends on the market environment and expectations of future price and market movements, and will vary from period to period.

For Citigroup's major trading centers, the aggregate pretax VAR in the trading portfolios was $205 million at December 31, 2009 and $319 million at December 31, 2008. Daily exposures averaged $266 million in 2009 and ranged from $200 million to $335 million.

The following table summarizes VAR to Citigroup in the trading portfolios as of December 31, 2009 and 2008, including the total VAR, the specific risk-only component of VAR, and total—general market factors only, along with the yearly averages:

In millions of dollars	Dec. 31, 2009	2009 average	Dec. 31, 2008	2008 average
Interest rate	$ 191	$ 235	$ 320	$ 280
Foreign exchange	45	65	118	54
Equity	69	79	84	99
Commodity	18	34	15	34
Covariance adjustment	(118)	(147)	(218)	(175)
Total—all market risk factors, including general and specific risk	$ 205	$ 266	$ 319	$ 292
Specific risk-only component	$ 20	$ 20	$ 8	$ 21
Total—general market factors only	$ 185	$ 246	$ 311	$ 271

VAR reflects the divestiture of Phibro LLC as of December 31, 2009 (see Note 2 to the Consolidated Financial Statements). The specific risk-only component represents the level of equity and debt issuer-specific risk embedded in VAR.
The table below provides the range of VAR in each type of trading portfolio that was experienced during 2009 and 2008:

	2009		2008	
In millions of dollars	Low	High	Low	High
Interest rate	$ 185	$320	$ 227	$339
Foreign exchange	18	140	23	130
Equity	46	167	58	235
Commodity	12	50	12	60

The following table provides the VAR for Citicorp'sSecurities and Banking business (ICG Citicorp VAR, which excludes Consumer) during 2009:

In millions of dollars	December 31, 2009
Total—all market risk factors, including general and specific risk	$163
Average—during year	180
High—during year	247
Low—during year	144

Interest Revenue/Expense and Yields

Average Rates—Interest Revenue, Interest Expense and Net Interest Margin

In millions of dollars	2009	2008 (1)	2007 (1)	Change 2009 vs. 2008	Change 2008 vs. 2007
Interest revenue (2)	$ 76,635	$ 106,499	$ 121,347	(28)%	(12)%
Interest expense (3)	27,721	52,750	75,958	(47)	(31)
Net interest revenue (2) (3)	$ 48,914	$ 53,749	$ 45,389	(9)%	18%
Interest revenue—average rate	4.75%	6.13%	6.47%	(138) bps	(34) bps
Interest expense—average rate	1.92%	3.28%	4.43%	(136) bps	(115) bps
Net interest margin	3.03%	3.09%	2.42%	(6) bps	67 bps
Interest-rate benchmarks:					
Federal Funds rate—end of period	0.00-0.25%	0.00-0.25%	4.25%	—	(400+) bps
Federal Funds rate—average rate	0.00-0.25%	2.08%	5.05%	—	(297) bps
Two-year U.S. Treasury note—average rate	0.96%	2.01%	4.36%	(105) bps	(235) bps
10-year U.S. Treasury note—average rate	3.26%	3.66%	4.63%	(40) bps	(97) bps
10-year vs. two-year spread	230 bps	165 bps	27 bps		

(1) Reclassified to conform to the current period's presentation and to exclude discontinued operations.

(2) Excludes taxable equivalent adjustments (based on the U.S. federal statutory tax rate of 35%) of $752 million, $323 million, and $125 million for 2009, 2008, and 2007, respectively.

(3) Excludes expenses associated with hybrid financial instruments and beneficial interest in consolidated VIEs. These obligations are classified as Long-term debt and accounted for at fair value with changes recorded in Principal transactions. In addition, the majority of the funding provided by Treasury to CitiCapital operations is excluded from this line.

A significant portion of Citi's business activities are based upon gathering deposits and borrowing money and then lending or investing those funds, including market-making activities in tradable securities. Net interest margin (NIM) is calculated by dividing annualized gross interest revenue less gross interest expense by average interest earning assets.

During the second half of 2009, the yields across both the interest-earning assets as well as the interest-bearing liabilities dropped significantly from the same period in 2008. The lower asset yields more than offset the lower cost of funds, resulting in slightly lower NIM compared to the prior-year period. The narrowing of yields in Citi's asset businesses due to the continued de-risking of loan portfolios and expansion of loss mitigation efforts and the natural compression of spreads in the deposit businesses, a result of the continued low rates environment, negatively impacted NIM. The impact of these factors was reduced by the lower asset base.

(1) Interest revenue excludes the taxable equivalent adjustments (based on the U.S. federal statutory tax rate of 35%) of $752 million, $323 million, and $125 million for 2009, 2008, and 2007, respectively.

(2) Interest rates and amounts include the effects of risk management activities associated with the respective asset and liability categories.

(3) Monthly or quarterly averages have been used by certain subsidiaries where daily averages are unavailable.

(4) Detailed average volume, interest revenue and interest expense exclude discontinued operations. See Note 3 to the Consolidated Financial Statements.

(5) Average rates reflect prevailing local interest rates, including inflationary effects and monetary corrections in certain countries.

(6) Average volumes of securities borrowed or purchased under agreements to resell are reported net. However, Interest revenue is reflected gross.

(7) The fair value carrying amounts of derivative and foreign exchange contracts are reported in non-interest-earning assets and other non-interest-bearing liabilities.

(8) Interest expense on Trading account liabilities of ICG is reported as a reduction of interest revenue. Interest revenue and interest expense on cash collateral positions are reported in Trading account assets and Trading account liabilities, respectively.

(9) Includes cash-basis loans.

Reclassified to conform to the current period's presentation.

(2) Rate/volume variance is allocated based on the percentage relationship of changes in volume and changes in rate to the total net change.
(3) Detailed average volume, interest revenue and interest expense exclude discontinued operations. See Note 3 to the Consolidated Financial Statements.
(4) Changes in average rates reflect changes in prevailing local interest rates, including inflationary effects and monetary corrections in certain countries.
(5) Interest expense on Trading account liabilities of ICG is reported as a reduction of interest revenue. Interest revenue and interest expense on cash collateral positions are reported in Trading account assets and Trading account liabilities, respectively.

OPERATIONAL RISK

Operational risk is the risk of loss resulting from inadequate or failed internal processes, systems or human factors, or from external events. It includes the reputation and franchise risk associated with business practices or market conduct in which Citi is involved. Operational risk is inherent in Citigroup's global business activities and, as with other risk types, is managed through an overall framework designed to balance strong corporate oversight with well-defined independent risk management. This framework includes:

- recognized ownership of the risk by the businesses;
- oversight by independent risk management; and
- independent review by Citi's Audit and Risk Review (ARR).

The goal is to keep operational risk at appropriate levels relative to the characteristics of Citigroup's businesses, the markets in which the company operates its capital and liquidity, and the competitive, economic and regulatory environment. Notwithstanding these controls, Citigroup incurs operational losses.

Framework

To monitor, mitigate and control operational risk, Citigroup maintains a system of comprehensive policies and has established a consistent, value-added framework for assessing and communicating operational risk and the overall effectiveness of the internal control environment across Citigroup. An Operational Risk Council provides oversight for operational risk across Citigroup. The Council's membership includes senior members of the Chief Risk Officer's organization covering multiple dimensions of risk management with representatives of the Business and Regional Chief Risk Officers' organizations and the Business Management Group. The Council's focus is on further advancing operational risk management at Citigroup with a focus on proactive identification and mitigation of operational risk and related incidents. The Council works with the business segments and the control functions to help ensure a transparent, consistent and comprehensive framework for managing operational risk globally.

Each major business segment must implement an operational risk process consistent with the requirements of this framework. The process for operational risk management includes the following steps:

- identify and assess key operational risks;
- establish key risk indicators;
- produce a comprehensive operational risk report; and
- prioritize and assure adequate resources to actively improve the operational risk environment and mitigate emerging risks.

The operational risk standards facilitate the effective communication and mitigation of operational risk both within and across businesses. As new products and business activities are developed, processes are designed, modified or sourced through alternative means and operational risks are considered. Information about the businesses' operational risk, historical losses, and the control environment is reported by each major business segment and functional area, and is summarized and reported to senior management as well as the Risk Management and Finance Committee of Citi's Board of Directors and the full Board of Directors.

Measurement and Basel II

To support advanced capital modeling and management, the businesses are required to capture relevant operational risk capital information. An enhanced version of the risk capital model for operational risk has been developed and implemented across the major business segments as a step toward readiness for Basel II capital calculations. The risk capital calculation is designed to qualify as an "Advanced Measurement Approach" under Basel II. It uses a combination of internal and external loss data to support statistical modeling of capital requirement estimates, which are then adjusted to reflect qualitative data regarding the operational risk and control environment.

Information Security and Continuity of Business

Information security and the protection of confidential and sensitive customer data are a priority for Citigroup. Citi has implemented an Information Security Program that complies with the Gramm-Leach-Bliley Act and other regulatory guidance. The Information Security Program is reviewed and enhanced periodically to address emerging threats to customers' information.

The Corporate Office of Business Continuity, with the support of senior management, continues to coordinate global preparedness and mitigate business continuity risks by reviewing and testing recovery procedures.

COUNTRY AND FFIEC CROSS-BORDER RISK MANAGEMENT PROCESS

Country Risk

Country risk is the risk that an event in a foreign country will impair the value of Citigroup assets or will adversely affect the ability of obligors within that country to honor their obligations to Citigroup. Country risk events may include sovereign defaults, banking or currency crises, social instability, and changes in governmental policies (for example, expropriation, nationalization, confiscation of assets and other changes in legislation relating to international ownership). Country risk includes local franchise risk, credit risk, market risk, operational risk and cross-border risk.

The country risk management framework at Citigroup includes a number of tools and management processes designed to facilitate the ongoing analysis of individual countries and their risks. These include country risk rating models, scenario planning and stress testing, internal watch lists, and the Country Risk Committee process.

The Citigroup Country Risk Committee is the senior forum to evaluate Citi's total business footprint within a specific country franchise with emphasis on responses to current potential country risk events. The Committee is chaired by the Head of Global Country Risk Management and includes as its members senior risk management officers, senior regional business heads, and senior product heads. The Committee regularly reviews all risk exposures within a country, makes recommendations as to actions, and follows up to ensure appropriate accountability.

Cross-Border Risk

Cross-border risk is the risk that actions taken by a non-U.S. government may prevent the conversion of local currency into non-local currency and/ or the transfer of funds outside the country, among other risks, thereby impacting the ability of Citigroup and its customers to transact business across borders. Examples of cross-border risk include actions taken by foreign governments such as exchange controls, debt moratoria, or restrictions on the remittance of funds. These actions might restrict the transfer of funds or the ability of Citigroup to obtain payment from customers on their contractual obligations. See Note 32 to the Consolidated Financial Statements for a recent example of this risk.

Management oversight of cross-border risk is performed through a formal review process that includes annual setting of cross-border limits and ongoing monitoring of cross-border exposures, as well as monitoring of economic conditions globally and the establishment of internal cross-border risk management policies.

Under Federal Financial Institutions Examination Council (FFIEC) regulatory guidelines, total reported cross-border outstandings include cross-border claims on third parties, as well as investments in and funding of local franchises. Cross-border claims on third parties (trade and short-, medium- and long-term claims) include cross-border loans, securities, deposits with banks, investments in affiliates, and other monetary assets, as well as net revaluation gains on foreign exchange and derivative products.

Cross-border outstandings are reported based on the country of the obligor or guarantor. Outstandings backed by cash collateral are assigned to the country in which the collateral is held. For securities received as collateral, cross-border outstandings are reported in the domicile of the issuer of the securities. Cross-border resale agreements are presented based on the domicile of the counterparty in accordance with FFIEC guidelines.

Investments in and funding of local franchises represent the excess of local country assets over local country liabilities. Local country assets are claims on local residents recorded by branches and majority-owned subsidiaries of Citigroup domiciled in the country, adjusted for externally guaranteed claims and certain collateral. Local country liabilities are obligations of non-U.S. branches and majority-owned subsidiaries of Citigroup for which no cross-border guarantee has been issued by another Citigroup office.

COUNTRY AND CROSS-BORDER RISK

The table below shows all countries where total Federal Financial Institutions Examination Council (FFIEC) cross-border outstandings exceed 0.75% of total Citigroup assets:

							December 31, 2009		December 31, 2008	
	Cross-Border Claims on Third Parties									
In billions of dollars	Banks	Public	Private	Total	Trading and short-term claims	Investments in and funding of local franchises	Total cross-border outstandings (1)	Commitments (2)	Total cross-border outstandings	Commitments (2)
France	$ 11.4	$ 10.9	$ 10.4	$ 32.7	$ 22.8	—	$32.7	$ 68.5	$21.4	$66.4
Germany	9.6	9.2	5.9	24.7	17.7	3.8	28.5	53.1	29.9	48.6
India	1.7	0.4	10.1	12.2	9.4	15.8	28.0	1.8	28.0	1.6
South Korea	1.1	1.4	8.0	10.5	10.3	11.6	22.1	14.4	22.0	15.7
Italy	0.9	15.9	3.0	19.8	13.6	1.9	21.7	21.2	14.7	20.2
Netherlands	7.0	5.1	8.2	20.3	13.0	—	20.3	65.7	17.7	67.4

Japan	11.2	0.1	3.4	14.7	14.1	4.1	18.8	26.3	4.3	31.8
Cayman Islands	0.2	—	16.5	16.7	15.2	—	16.7	6.1	22.1	8.2
United Kingdom	6.5	0.2	9.8	16.5	13.6	—	16.5	140.2	26.3	128.3

(1) Included in total cross-border claims on third parties.

(2) Commitments (not included in total cross-border outstandings) include legally binding cross-border letters of credit and other commitments and contingencies as defined by the FFIEC. Effective March 31, 2006, the FFIEC revised the definition of commitments to include commitments to local residents to be funded with local currency local liabilities.

DERIVATIVES

See Note 24 to the Consolidated Financial Statements for a discussion and disclosures relate to Citigroup's derivative activities. The following discussions relate to the Derivative Obligor Information, the Fair Valuation for Derivatives and Credit Derivatives activities.

Derivative Obligor Information

The following table presents the global derivatives portfolio by internal obligor credit rating at December 31, 2009 and 2008, as a percentage of credit exposure:

	December 31, 2009	December 31, 2008
AAA/AA/A	68%	68%
BBB	17	20
BB/B	8	7
CCC or below	7	5
Unrated	—	—
Total	100%	100%

The following table presents the global derivatives portfolio by industry of the obligor as a percentage of credit exposure:

	December 31, 2009	December 31, 2008
Financial institutions	64%	73%
Governments	8	7
Corporations	28	20
Total	100%	100%

Fair Valuation Adjustments for Derivatives

The fair value adjustments applied by Citigroup to its derivative carrying values consist of the following items:

- Liquidity adjustments are applied to items in Level 2 or Level 3 of the fair-value hierarchy (see Note 26 to the Consolidated Financial Statements for more details) to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid/offer spread for an instrument, adjusted to take into account the size of the position.
- Credit valuation adjustments (CVA) are applied to over-the-counter derivative instruments, in which the base valuation generally discounts expected cash flows using LIBOR interest rate curves. Because not all counterparties have the same credit risk as that implied by the relevant LIBOR curve, a CVA is necessary to incorporate the market view of both counterparty credit risk and Citi's own credit risk in the valuation.

Citigroup CVA methodology comprises two steps. First, the exposure profile for each counterparty is determined using the terms of all individual derivative positions and a Monte Carlo simulation or other quantitative analysis to generate a series of expected cash flows at future points in time. The calculation of this exposure profile considers the effect of credit risk mitigants, including pledged cash or other collateral and any legal right of offset that exists with a counterparty through arrangements such as netting agreements. Individual derivative contracts that are subject to an enforceable master netting agreement with a counterparty are aggregated for this purpose, since it is those aggregate net cash flows that are subject to nonperformance risk. This process identifies specific, point-in-time future cash flows that are subject to nonperformance risk, rather than using the current recognized net asset or liability as a basis to measure the CVA.

Second, market-based views of default probabilities derived from observed credit spreads in the credit default swap market are applied to the expected future cash flows determined in step one. Own-credit CVA is determined using Citi-specific CDS spreads for the relevant tenor. Generally, counterparty CVA is determined using CDS spread indices for each credit rating and tenor. For certain identified facilities where individual analysis is practicable (for example, exposures to monoline counterparties) counterparty-specific CDS spreads are used.

The CVA adjustment is designed to incorporate a market view of the credit risk inherent in the derivative portfolio. However, most derivative instruments are negotiated bilateral contracts and are not commonly transferred to third parties. Derivative instruments are normally settled contractually, or if terminated early, are terminated at a value negotiated bilaterally between

the counterparties. Therefore, the CVA (both counterparty and own-credit) may not be realized upon a settlement or termination in the normal course of business. In addition, all or a portion of the credit valuation adjustments may be reversed or otherwise adjusted in future periods in the event of changes in the credit risk of Citi or its counterparties, or changes in the credit mitigants (collateral and netting agreements) associated with the derivative instruments. Historically, Citigroup's credit spreads have moved in tandem with general counterparty credit spreads, thus providing offsetting CVAs affecting revenue. However, in the fourth quarter of 2008, Citigroup's credit spreads generally narrowed and counterparty credit spreads widened, each of which negatively affected revenues in 2008. During 2009, both Citigroup's and counterparty credit spreads narrowed. The table below summarizes the CVA applied to the fair value of derivative instruments as of December 31, 2009 and 2008.

	Credit valuation adjustment Contra-liability (contra-asset)	
In millions of dollars	December 31, 2009	December 31, 2008
Non-monoline counterparties	$ (2,483)	$ (8,266)
Citigroup (own)	1,349	3,646
Net non-monoline CVA	$ (1,134)	$ (4,620)
Monoline counterparties (1)	(5,580)	(4,279)
Total CVA—derivative instruments	$ (6,714)	$ (8,899)

(1) Certain derivatives with monoline counterparties were terminated during 2008.

The table below summarizes pretax gains (losses) related to changes in credit valuation adjustments on derivative instruments for the years ended December 31, 2009 and 2008:

	Credit valuation adjustment gain (loss)	
In millions of dollars	2009	2008
Non-monoline counterparties	$ 5,783	$ (6,653)
Citigroup (own)	(2,297)	2,303
Net non-monoline CVA	$ 3,486	$ (4,350)
Monoline counterparties	(1,301)	(5,736)
Total CVA—derivative instruments	$ 2,185	$ (10,086)

The credit valuation adjustment amounts shown above relate solely to the derivative portfolio, and do not include:

- Own-credit adjustments for non-derivative liabilities measured at fair value under the fair value option. See Note 26 to the Consolidated Financial Statements for further information.
- The effect of counterparty credit risk embedded in non-derivative instruments. During 2008 and 2009 a range of financial instruments. Losses on non-derivative instruments, such as bonds and loans, related to counterparty credit risk are not included in the table above.

Credit Derivatives

Citigroup makes markets in and trades a range of credit derivatives, both on behalf of clients as well as for its own account. Through these contracts Citigroup either purchases or writes protection on either a single-name or portfolio basis. Citi uses credit derivatives to help mitigate credit risk in its corporate loan portfolio and other cash positions, to take proprietary trading positions, and to facilitate client transactions.

Credit derivatives generally require that the seller of credit protection make payments to the buyer upon the occurrence of predefined events (settlement triggers). These settlement triggers, which are defined by the form of the derivative and the referenced credit, are generally limited to the market standard of failure to pay on indebtedness and bankruptcy (or comparable events) of the reference credit and, in a more limited range of transactions, debt restructuring.

Credit derivative transactions referring to emerging market reference credits will also typically include additional settlement triggers to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions on a portfolio of referenced credits or asset-backed securities, the seller of protection may not be required to make payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

The following tables summarize the key characteristics of Citi's credit derivative portfolio by counterparty and derivative form as of December 31, 2009 and December 31, 2008:

2009		Fair values		Notionals
In millions of dollars	Receivable	Payable	Beneficiary	Guarantor
By industry/counterparty				
Bank	$ 52,383	$ 50,778	$ 872,523	$ 807,484
Broker-dealer	23,241	22,932	338,829	340,949
Monoline	5,860	—	10,018	33
Non-financial	339	371	13,437	13,221
Insurance and other financial institutions	10,969	8,343	98,155	52,366
Total by industry/counterparty	$ 92,792	$ 82,424	$ 1,332,962	$ 1,214,053
By instrument				
Credit default swaps and options	$ 91,625	$ 81,174	$ 1,305,724	$ 1,213,208
Total return swaps and other	1,167	1,250	27,238	845
Total by instrument	$ 92,792	$ 82,424	$ 1,332,962	$ 1,214,053

2008		Fair values		Notionals
In millions of dollars	Receivable	Payable	Beneficiary	Guarantor
By industry/counterparty				
Bank	$ 128,042	$ 121,811	$ 996,248	$ 943,949
Broker-dealer	59,321	56,858	403,501	365,664
Monoline	6,886	91	9,973	139
Non-financial	4,874	2,561	5,608	7,540
Insurance and other financial institutions	29,228	22,388	180,354	125,988
Total by industry/counterparty	$ 228,351	$ 203,709	$ 1,595,684	$ 1,443,280
By instrument				
Credit default swaps and options	$ 221,159	$ 203,220	$ 1,560,222	$ 1,441,375
Total return swaps and other	7,192	489	35,462	1,905
Total by instrument	$ 228,351	$ 203,709	$ 1,595,684	$ 1,443,280

The fair values shown are prior to the application of any netting agreements, cash collateral, and market or credit value adjustments.

Citigroup actively participates in trading a variety of credit derivatives products as both an active two-way market-maker for clients and to manage credit risk. The majority of this activity was transacted with other financial intermediaries, including both banks and broker-dealers. Citigroup generally has a mismatch between the total notional amounts of protection purchased and sold and it may hold the reference assets directly, rather than entering into offsetting credit derivative contracts as and when desired. The open risk exposures from credit derivative contracts are largely matched after certain cash positions in reference assets are considered and after notional amounts are adjusted, either to a duration-based equivalent basis or to reflect the level of subordination in tranched structures.

Citi actively monitors its counterparty credit risk in credit derivative contracts. Approximately 85% and 88% of the gross receivables are from counterparties with which Citi maintains collateral agreements as of December 31, 2009 and 2008, respectively. A majority of Citi's top 15 counterparties (by receivable balance owed to the company) are banks, financial institutions or other dealers. Contracts with these counterparties do not include ratings-based termination events. However, counterparty rating downgrades may have an incremental effect by lowering the threshold at which Citigroup may call for additional collateral. A number of the remaining significant counterparties are monolines (which have CVA as shown above).

PENSION AND POSTRETIREMENT PLANS

Citigroup has several non-contributory defined benefit pension plans covering substantially all U.S. employees and has various defined benefit pension and termination indemnity plans covering employees outside the United States. The U.S. defined benefit plan provides benefits under a cash balance formula. Employees satisfying certain age and service requirements remain covered by a prior final pay formula. Citigroup also offers postretirement health care and life insurance benefits to certain eligible U.S. retired employees, as well as to certain eligible employees outside the United States.

The following table shows the pension (benefit) expense and contributions for Citigroup's plans:

	U.S. plans			Non-U.S. plans		
In millions of dollars	2009	2008	2007	2009	2008	2007
Pension (benefit) expense (1)	$(148)	$(160)	$179	$198	$205	$123
Company contributions (2)	—	—	—	382	286	223

(1) The 2008 expense includes a $23 million curtailment loss for the U.S. plans and $22 million for the non-U.S. plans recognized in the fourth quarter of 2008 relating to Citigroup's restructuring actions.
(2) In addition, Citigroup absorbed $11 million, $13 million and $15 million during 2009, 2008 and 2007, respectively, relating to certain investment management fees and administration costs for the U.S. plans, which are excluded from this table.

The following table shows the combined postretirement expense and contributions for Citigroup's U.S. and foreign plans:

	U.S. and non-U.S. plans		
In millions of dollars	2009	2008	2007
Postretirement expense (1)	$109	$115	$69
Company contributions	91	103	72

(1) The 2008 expense includes a $6 million curtailment loss related to Citigroup's fourth quarter of 2008 restructuring actions.

Expected Rate of Return

Citigroup determines its assumptions for the expected rate of return on plan assets for its U.S. pension and postretirement plans using a "building block" approach, which focuses on ranges of anticipated rates of return for each asset class. A weighted range of nominal rates is then determined based on target allocations to each asset class. Citigroup considers the expected rate of return to be a long-term assessment of return expectations and does not anticipate changing this assumption annually unless there are significant changes in investment strategy or economic conditions. This contrasts with the selection of the discount rate, future compensation increase rate, and certain other assumptions, which are reconsidered annually in accordance with generally accepted accounting principles.

The expected rate of return for the U.S. pension and post-retirement plans was 7.75% at December 31, 2009, 7.75% at December 31, 2008 and 8% at December 31, 2007, reflecting the performance of the global capital markets. Actual returns in 2009 and 2008 were less than the expected returns, while actual returns in 2007 were more than the expected returns. This expected amount reflects the expected annual appreciation of the plan assets and reduces the annual pension expense of Citigroup. It is deducted from the sum of service cost, interest and other components of pension expense to arrive at the net pension (benefit) expense. Net pension (benefit) expense for the U.S. pension plans for 2009, 2008 and 2007 reflects deductions of $912, $949 million and $889 million of expected returns, respectively.

The following table shows the expected versus actual rate of return on plan assets for the U.S. pension and postretirement plans:

	2009	2008	2007
Expected rate of return	7.75%	7.75%	8.0%
Actual rate of return (1)	(2.77)%	(5.42)%	13.2%

(1) Actual rates of return are presented gross of fees.

For the foreign plans, pension expense for 2009 was reduced by the expected return of $336 million, compared with the actual return of $728 million. Pension expense for 2008 and 2007 was reduced by expected returns of $487 million and $477 million, respectively. Actual returns were higher in 2007, but lower in 2008, than the expected returns in those years.

Discount Rate

The 2009 and 2008 discount rates for the U.S. pension and postretirement plans were selected by reference to a Citigroup-specific analysis using each plan’s specific cash flows and compared with the Moody’s Aa Long-Term Corporate Bond Yield for reasonableness. Citigroup’s policy is to round to the nearest tenth of a percent. Accordingly, at December 31, 2009, the discount rate was set at 5.9% for the pension plans and at 5.55% for the postretirement welfare plans.

At December 31, 2008, the discount rate was set at 6.1% for the pension plans and 6.0% for the postretirement plans, referencing a Citigroup-specific cash flow analysis.

At December 31, 2007, the discount rate was set at 6.2% for the pension plans and 6.0% for the postretirement plans, referencing a Citigroup-specific cash flow analysis.

The discount rates for the foreign pension and postretirement plans are selected by reference to high-quality corporate bond rates in countries that have developed corporate bond markets. However, where developed corporate bond markets do not exist, the discount rates are selected by reference to local government bond rates with a premium added to reflect the additional risk for corporate bonds.

For additional information on the pension and postretirement plans, and on discount rates used in determining pension and postretirement benefit obligations and net benefit expense for Citigroup’s plans, as well as the effects of a one-percentage-point change in the expected rates of return and the discount rates, see Note 9 to the Consolidated Financial Statements.

SIGNIFICANT ACCOUNTING POLICIES AND SIGNIFICANT ESTIMATES

Note 1 to the Consolidated Financial Statements contains a summary of Citigroup's significant accounting policies, including a discussion of recently issued accounting pronouncements. These policies, as well as estimates made by management, are integral to the presentation of the company's financial condition. While all of these policies require a certain level of management judgment and estimates, this section highlights and discusses the significant accounting policies that require management to make highly difficult, complex, or subjective judgments and estimates, at times regarding matters that are inherently uncertain and susceptible to change. Management has discussed each of these significant accounting policies, the related estimates, and its judgments with the Audit Committee of the Board of Directors. Additional information about these policies can be found in Note 1 to the Consolidated Financial Statements.

VALUATIONS OF FINANCIAL INSTRUMENTS

Citigroup holds fixed-income and equity securities, derivatives, retained interests in securitizations, investments in private equity, and other financial instruments. In addition, Citigroup purchases securities under agreements to resell and sells securities under agreements to repurchase. Citigroup holds its investments, trading assets and liabilities, and resale and repurchase agreements on the balance sheet to meet customer needs, to manage liquidity needs and interest rate risks, and for proprietary trading and private equity investing.

Substantially all of the assets and liabilities described in the preceding paragraph are reflected at fair value on Citigroup's balance sheet. In addition, certain loans, short-term borrowings, long-term debt and deposits as well as certain securities borrowed and loaned positions that are collateralized with cash are carried at fair value. Approximately 37.6% and 34.2% of total assets, and 16.5% and 20.4% of total liabilities, are accounted for at fair value as of December 31, 2009 and 2008, respectively.

When available, Citi generally uses quoted market prices to determine fair value and classifies such items within Level 1 of the fair value hierarchy established under ASC 820-10, Fair Value Measurements and Disclosures (see Note 26 to the Consolidated Financial Statements). If quoted market prices are not available, fair value is based upon internally developed valuation models that use, where possible, current market-based or independently sourced market parameters, such as interest rates, currency rates, option volatilities, etc. Where a model is internally developed and used to price a significant product, it is subject to validation and testing by independent personnel. Such models are often based on a discounted cash flow analysis.

Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

As seen during the second half of 2007, the credit crisis has caused some markets to become illiquid, thus reducing the availability of certain observable data used by Citigroup's valuation techniques. This illiquidity continued through 2008 and 2009. When or if liquidity returns to these markets, the valuations will revert to using the related observable inputs in verifying internally calculated values. For additional information on Citigroup's fair value analysis, see "Managing Global Risk" and "Balance Sheet Review."

Recognition of Changes in Fair Value

Changes in the valuation of the trading assets and liabilities, as well as all other assets (excluding available-for-sale securities) and liabilities carried at fair value are recorded in the Consolidated Statement of Income. Changes in the valuation of available-for-sale securities, other than write-offs and credit impairments, generally are recorded in Accumulated other comprehensive income (loss) (AOCI), which is a component of Stockholders' equity on the Consolidated Balance Sheet. A full description of Citi's related policies and procedures can be found in Notes 1, 26, 27 and 28 to the Consolidated Financial Statements.

Evaluation of Other-than-Temporary Impairment

Citigroup's conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. Prior to January 1, 2009 these reviews were conducted pursuant to FSP FAS 115-2 and FAS 124-2 (now ASC 320-10-35, Investments—Debt and Equity Securities: Subsequent Measurement). Any unrealized loss identified as other than temporary was recorded directly in the Consolidated Statement of Income. As of January 1, 2009, Citigroup adopted ASC 320-10. Accordingly, any credit-related impairment related to debt securities that Citi does not plan to sell and is not likely to be required to sell is recognized in the Consolidated Statement of Income, with the non-credit-related impairment recognized in AOCI. For other impaired debt securities, the entire impairment is recognized in the Consolidated Statement of Income. An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Unrealized losses that are determined to be temporary in nature are recorded, net of tax, in AOCI for available-for-sale securities, while such losses related to held-to-maturity securities are not recorded, as these investments are carried at their amortized cost (less any other-than-temporary impairment). For securities transferred to held-to-maturity from Trading account assets, amortized cost is defined as the fair value amount of the securities at the date of transfer. For securities transferred to held-to-maturity from available-for-sale, amortized cost is defined as the original purchase cost, plus or minus any accretion or amortization of interest, less any impairment recognized in earnings.

Regardless of the classification of the securities as available-for-sale or held-to-maturity, Citi has assessed each position for credit impairment.

For a further discussion, see Note 16 to the Consolidated Financial Statements.

Key Controls over Fair Value Measurement

Citi's processes include a number of key controls that are designed to ensure that fair value is measured appropriately, particularly where a fair-value model is internally developed and used to price a significant product. Such controls include a model validation policy requiring that valuation models be validated by qualified personnel, independent from those who created the models and escalation procedures, to ensure that valuations using unverifiable inputs are identified and monitored on a regular basis by senior management.

CVA Methodology

ASC 820-10 requires that Citi's own credit risk be considered in determining the market value of any Citi liability carried at fair value. These liabilities include derivative instruments as well as debt and other liabilities for which the fair value option was elected. The credit valuation adjustment (CVA) is recognized on the balance sheet as a reduction in the associated liability to arrive at the fair value (carrying value) of the liability.

Prior to the fourth quarter of 2008, Citi had historically used its credit spreads observed in the credit default swap (CDS) market to estimate the market value of these liabilities. Beginning in September 2008, Citi's CDS spread and credit spreads observed in the bond market (cash spreads) diverged from each other and from their historical relationship. For example, the three-year CDS spread narrowed from 315 basis points (bps) on September 30, 2008, to 202 bps on December 31, 2008, while the three-year cash spread widened from 430 bps to 490 bps over the same time period. Due to the persistence and significance of this divergence during the fourth quarter of 2008, management determined that such a pattern may not be temporary and that using cash spreads would be more relevant to the valuation of debt instruments (whether issued as liabilities or purchased as assets). Therefore, Citi changed its method of estimating the market value of liabilities for which the fair value option was elected to incorporate Citi's cash spreads. (CDS spreads continue to be used to calculate the CVA for derivative positions.) This change in estimation methodology resulted in a $2.5 billion pretax gain recognized in earnings in the fourth quarter of 2008. Citigroup recognized a pretax gain of $4,558 million due to changes in the CVA balance in 2008.

The table below summarizes the CVA for fair value option debt instruments, determined under each methodology as of December 31, 2008 and 2007, and the pretax gain that would have been recognized in 2008 had each methodology been used consistently during 2008 and 2007.

In millions of dollars	2008	2007
Year-end CVA reserve balance as calculated using		
CDS spreads	$2,953	$ 888
Cash spreads	5,446	1,359
Difference (1)	$2,493	$ 471
Year-to-date pretax gain from the change in CVA reserve that would have been recorded in the income statement as calculated using		
CDS spreads	$2,065	$ 888
Cash spreads	4,087	1,359

(1) In changing the methodology for calculating the CVA reserve, Citi recorded the 2008 cumulative difference of $2.493 billion in December 2008, resulting in a year-to-date pretax gain of $4.558 billion recorded in the Consolidated Statement of Income.

The CVA recognized on fair value option debt instruments was $1,220 million and $5,446 million as of December 31, 2009 and 2008, respectively. Citigroup recognized a pretax loss of $4,226 million in 2009 due to changes in the CVA balance. The pretax loss in 2009 includes a pretax adjustment of $330 million reflecting a correction of errors in the calculation of CVA for periods through December 31, 2008.

For a further discussion, see Notes 1 and 34 to the Consolidated Financial Statements.

ALLOWANCE FOR CREDIT LOSSES

Management provides reserves for an estimate of probable losses inherent in the funded loan portfolio on the balance sheet in the form of an allowance for loan losses. These reserves are established in accordance with Citigroup's Credit Reserve Policies, as approved by the Audit Committee of the Board of Directors. Citi's Chief Risk Officer and Chief Financial Officer review the adequacy of the credit loss reserves each quarter with representatives from the Risk Management and Finance staffs for each applicable business area.

During these reviews, the above-mentioned representatives covering the business area having classifiably managed portfolios (that is, portfolios where internal credit risk ratings are assigned, which are primarily ICG, Regional Consumer Banking and Local Consumer Lending) and modified consumer loans where a concession was granted due to the borrowers' financial difficulties, and present recommended reserve balances for their funded and unfunded lending portfolios along with supporting quantitative and qualitative data. The quantitative data include:

- Estimated probable losses for nonperforming, nonhomogeneous exposures within a business line's classifiably managed portfolioand impaired smaller-balance homogeneous loans whose terms have been modified due to the borrowers' financial difficulties, andit was determined that a long-term concession was granted to the borrower. Consideration may be given to the following, as appropriate, when determining this estimate: (i) the present value of expected future cash flows; (ii) the borrower's overall financial condition, resources and payment record; and (iii) the prospects for support from financially responsible guarantors or the realizable value of any collateral. When impairment is measured based on the present value of expected future cash flows, the entire change in present value is recorded in the Provision for loan losses.
- Statistically calculated losses inherent in the classifiably managed portfolio for performing and de minimis non-performing exposures. The calculation is based upon: (i) Citigroup's internal system of credit-risk ratings, which are analogous to the risk ratings of the major rating agencies; and (ii) historical default and loss data, including rating agency information regarding default rates from 1983 to 2008, and internal data dating to the early 1970s on severity of losses in the event of default.
- Additional adjustments include: (i) statistically calculated estimates to cover the historical fluctuation of the default rates over the credit cycle, the historical variability of loss severity among defaulted loans, and the degree to which there are large obligor concentrations in the global portfolio; and (ii) adjustments made for specifically known items, such as current environmental factors and credit trends.

In addition, representatives from both the Risk Management and Finance staffs that cover business areas with delinquency-managed portfolios containing smaller homogeneous loans (primarily the noncommercial lending areas of Regional Consumer Banking) present their recommended reserve balances based upon leading credit indicators, including loan delinquencies and changes in portfolio size, as well as economic trends including housing prices, unemployment and GDP. This methodology is applied separately for each individual product within each different geographic region in which these portfolios exist.

This evaluation process is subject to numerous estimates and judgments. The frequency of default, risk ratings, loss recovery rates, the size and diversity of individual large credits, and the ability of borrowers with foreign currency obligations to obtain the foreign currency necessary for orderly debt servicing, among other things, are all taken into account during this review. Changes in these estimates could have a direct impact on the credit costs in any quarter and could result in a change in the allowance. Changes to the reserve flow through the Consolidated Statement of Income on the lines Provision for loan losses and Provision for unfunded lending commitments. For a further description of the loan loss reserve and related accounts, see "Managing Global Risk—Credit Risk" and Notes 1 and 18 to the Consolidated Financial Statements.

SECURITIZATIONS

Citigroup securitizes a number of different asset classes as a means of strengthening its balance sheet and accessing competitive financing rates in the market. Under these securitization programs, assets are transferred into a trust and used as collateral by the trust to obtain financing. The cash flows from assets in the trust service the corresponding trust securities. If the structure of the trust meets certain accounting guidelines, trust assets are treated as sold and are no longer reflected as assets of Citi. If these guidelines are not met, the assets continue to be recorded as Citi's assets, with the financing activity recorded as liabilities on Citigroup's balance sheet.

Citigroup also assists its clients in securitizing their financial assets and packages and securitizes financial assets purchased in the financial markets. Citi may also provide administrative, asset management, underwriting, liquidity facilities and/or other services to the resulting securitization entities and may continue to service some of these financial assets.

Elimination of QSPEs and Changes in the
Consolidation Model for Variable Interest Entities

In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140 (SFAS 166), that will eliminate Qualifying Special Purpose Entities (QSPEs). SFAS 166 is effective for fiscal years that begin after November 15, 2009. This change will have a significant impact on Citigroup's Consolidated Financial Statements. Beginning January 1, 2010, Citigroup will lose sales treatment for certain future asset transfers that would have been considered sales under SFAS 140, and for certain transfers of portions of assets that do not meet the definition of participating interests.

Simultaneously, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (SFAS 167), which details three key changes to the consolidation model. First, former QSPEs will now be included in the scope of SFAS 167. In addition, the FASB has changed the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE (known as the primary beneficiary) to a qualitative determination of which party to the VIE has “power” combined with potentially significant benefits or losses, instead of the current quantitative risks and rewards model. The entity that has power has the ability to direct the activities of the VIE that most significantly impact the VIE’s economic performance. Finally, the new standard requires that the primary beneficiary analysis be re-evaluated whenever circumstances change. The current rules require reconsideration of the primary beneficiary only when specified reconsideration events occur.

As a result of implementing these new accounting standards, Citigroup will consolidate certain of the VIEs and former QSPEs with which it currently has involvement. An ongoing evaluation of the application of these new requirements could, with the resolution of certain uncertainties, result in the identification of additional VIEs and former QSPEs, other than those presented below, needing to be consolidated. It is not currently anticipated, however, that any such newly identified VIEs and former QSPEs would have a significant impact on Citigroup’s Consolidated Financial Statements or capital position.

In accordance with SFAS 167, Citigroup employed three approaches for consolidating all of the VIEs and former QSPEs that it consolidated as of January 1, 2010. The first approach requires initially measuring the assets, liabilities, and noncontrolling interests of the VIEs and former QSPEs at their carrying values (the amounts at which the assets, liabilities, and noncontrolling interests would have been carried in the Consolidated Financial Statements, if Citigroup had always consolidated these VIEs and former QSPEs). The second approach is to use the unpaid principal amounts, where using carrying values is not practicable. The third approach is to elect the fair value option, in which all of the financial assets and liabilities of certain designated VIEs and former QSPEs would be recorded at fair value upon adoption of SFAS 167 and continue to be marked to market thereafter, with changes in fair value reported in earnings.

Citigroup consolidated all required VIEs and former QSPEs as of January 1, 2010 at carrying values or unpaid principal amounts, except for certain private label residential mortgage and mutual fund deferred sales commissions VIEs, for which the fair value option was elected. The following tables present the pro forma impact of adopting these new accounting standards applying these approaches.

The pro forma impact of these changes on incremental GAAP assets and resulting risk-weighted assets for those VIEs and former QSPEs that were consolidated or deconsolidated for accounting purposes as of January 1, 2010 (based on financial information as of December 31, 2009), reflecting Citigroup’s present understanding of the new accounting requirements and immediate implementation of the recently issued final risk-based capital rules regarding SFAS 166 and SFAS 167, was as follows:

In billions of dollars	GAAP assets	Incremental Risk-weighted assets (1)
Impact of consolidation		
Credit cards	$ 86.3	$ 0.8
Commercial paper conduits	28.3	13.0
Student loans	13.6	3.7
Private label consumer mortgages	4.4	1.3
Municipal tender option bonds	0.6	0.1
Collateralized loan obligations	0.5	0.5
Mutual fund deferred sales commissions	0.5	0.5
Subtotal	$134.2	$ 19.9
Impact of deconsolidation		
Collateralized debt obligations (2)	$ 1.9	$ 3.6
Equity-linked notes (3)	1.2	0.5
Total	$137.3	$ 24.0

(1) Citigroup undertook certain actions during the first and second quarters of 2009 in support of its off-balance-sheet credit card securitization vehicles. As a result of these actions, Citigroup included approximately $82 billion of incremental risk-weighted assets in its risk-based capital ratios as of March 31, 2009 and an additional approximate $900 million as of June 30, 2009. See Note 23 to the Consolidated Financial Statements.

(2) The implementation of SFAS 167 will result in the deconsolidation of certain synthetic and cash collateralized debt obligation (CDO) VIEs that were previously consolidated under the requirements of ASC 810 (FIN 46(R)). Upon deconsolidation of these synthetic CDOs, Citigroup’s Consolidated Balance Sheet will reflect the recognition of current receivables and payables related to purchased and written credit default swaps entered into with these VIEs, which had previously been eliminated in consolidation. The deconsolidation of certain cash CDOs will have a minimal impact on GAAP assets, but will cause a sizable increase in risk-weighted assets. The impact on risk-weighted assets results from replacing, in Citigroup’s trading account, largely investment grade securities owned by these VIEs when consolidated, with Citigroup’s holdings of non-investment grade or unrated securities issued by these VIEs when deconsolidated.

(3) Certain equity-linked note client intermediation transactions that had previously been consolidated under the requirements of ASC 810 (FIN 46 (R)) will be deconsolidated with the implementation of SFAS 167. Upon deconsolidation, Citigroup’s Consolidated Balance Sheet will reflect both the equity-linked notes issued by the VIEs and held by Citigroup as trading assets, as well as related trading liabilities in the form of prepaid equity derivatives. These trading assets and trading liabilities were formerly eliminated in consolidation.

108

The preceding table reflects (i) the estimated portion of the assets of former QSPEs to which Citigroup, acting as principal, had transferred assets and received sales treatment as of December 31, 2009 (totaling approximately $712.0 billion), and (ii) the estimated assets of significant unconsolidated VIEs as of December 31, 2009 with which Citigroup is involved (totaling approximately $219.2 billion) that are required to be consolidated under the new accounting standards. Due to the variety of transaction structures and the level of Citigroup involvement in individual former QSPEs and VIEs, only a portion of the former QSPEs and VIEs with which Citi is involved are to be consolidated.

In addition, the cumulative effect of adopting these new accounting standards as of January 1, 2010, based on financial information as of December 31, 2009, would result in an estimated aggregate after-tax charge to Retained earnings of approximately $8.3 billion, reflecting the net effect of an overall pretax charge to Retained earnings (primarily relating to the establishment of loan loss reserves and the reversal of residual interests held) of approximately $13.4 billion and the recognition of related deferred tax assets amounting to approximately $5.1 billion.

The pro forma impact on certain of Citigroup's regulatory capital ratios of adopting these new accounting standards (based on financial information as of December 31, 2009), reflecting immediate implementation of the recently issued final risk-based capital rules regarding SFAS 166 and SFAS 167, would be as follows:

	As of December 31, 2009		
	As reported	Pro forma	Impact
Tier 1 Capital	11.67%	10.26%	(141) bps
Total Capital	15.25%	13.82%	(143) bps

The actual impact of adopting the new accounting standards on January 1, 2010 could differ, as financial information changes from the December 31, 2009 estimates and as several uncertainties in the application of these new standards are resolved.

Among these uncertainties, the FASB has proposed an indefinite deferral of the requirements of SFAS 167 for certain investment companies. Without the proposed deferral, Citi had most recently estimated that approximately $3.3 billion of assets held by investment funds managed by Citigroup would be newly consolidated upon the adoption of SFAS 167. If the proposed deferral were to be finalized as currently contemplated, Citi expects that many, if not all, of the investment vehicles managed by Citigroup would not be subject to the requirements of SFAS 167. Nevertheless, Citigroup is continuing to evaluate the potential impacts of the proposed requirements and, depending upon the eventual resolution of specific implementation matters, may be required to consolidate certain investment vehicles, the aggregate assets of which could range up to a total of approximately $1.2 billion. The effect on Citi's regulatory capital ratios, should consolidation of any or all such noted investment vehicles be required, is not expected to be significant. The preceding tables reflect Citi's view that none of the investment vehicles managed by Citigroup will be required to be consolidated under SFAS 167.

Proposed Changes to FDIC "Safe Harbor" Securitization Rule

As described above, FASB's issuance of SFAS Nos. 166 and 167, effective starting in the first quarter of 2010, will result in the loss of GAAP sale treatment in certain credit card and other securitization transactions and the consolidation of the assets of such transactions into the assets of the sponsoring entity. This development has raised concerns regarding effects under the FDIC's current "safe harbor" securitization rule. Under the current rule, if a securitization is accounted for as a sale for GAAP purposes and certain other conditions are satisfied, the FDIC, as conservator or receiver of an insolvent bank, will treat the transferred assets as sold and surrender any right to reclaim the assets transferred in the securitization. If securitized assets are at risk of seizure by the FDIC in cases of conservatorship or receivership, the credit treatment of the securitized transactions would be impacted by the credit status of the sponsoring bank; for example, the highest credit rating for a securitization transaction may be limited by the credit rating of the sponsoring bank.

On November 12, 2009, the FDIC amended its securitization rule on an interim basis so that it will continue to apply to assets transferred in securities transactions completed on or prior to March 31, 2010 if the transfers would have satisfied the conditions for GAAP sale treatment in effect for reporting periods prior to November 15, 2009. The FDIC is currently engaged in a rulemaking process regarding this issue, and the ultimate outcome is unknown. If Citi is unwilling or unable to meet the conditions of any final rule, the highest credit rating of securities issued in its credit card and certain other securitization transactions may be limited to its then-current rating, and Citi may engage in a reduced level of such transactions.

GOODWILL

Citigroup has recorded on its Consolidated Balance Sheet Goodwill of $25.4 billion (1.4% of assets) and $27.1 billion (1.4% of assets) at December 31, 2009 and December 31, 2008, respectively. No goodwill impairment was recorded during 2009. The December 31, 2008 balance is net of a $9.6 billion goodwill impairment charge recorded as a result of testing performed as of December 31, 2008. The impairment was composed of a $2.3 billion pretax charge ($2.0 billion after tax) related to North America Regional Consumer Banking, a $4.3 billion pretax charge ($4.1 billion after tax) related to Latin America Regional Consumer Banking, and a $3.0 billion pretax charge ($2.6 billion after tax) related to Local Consumer Lending—Other.

The primary cause for the goodwill impairment in the above reporting units was the rapid deterioration in the financial markets as well as in the global economic outlook, particularly during the period beginning mid-November through year-end 2008. This deterioration further weakened the near-term prospects for the financial services industry. The following summary describes Citigroup's process for accounting for goodwill and testing for impairment.

Goodwill is allocated to the reporting units at the date the goodwill is initially recorded. Once goodwill has been allocated to the reporting units, it generally no longer retains its identification with a particular acquisition, but instead becomes identified with the reporting unit as a whole. As a result, all of the fair value of each reporting unit is available to support the value of goodwill allocated to the unit. As of December 31, 2009, Citigroup operated in three core business segments, as discussed. Goodwill impairment testing is performed at the reporting unit level, one level below the business segment.

The changes in the organizational structure in 2009 resulted in the creation of new reporting segments. As a result, commencing with the second quarter 2009, Citi identified new reporting units as required under ASC 350, Intangibles—Goodwill and Other. Goodwill affected by the reorganization has been reassigned from 10 reporting units to nine, using a fair value approach. Subsequent to July 1, 2009, goodwill was allocated to disposals and tested for impairment under the new reporting units. The nine new reporting units, which remain unchanged at December 31, 2009, are North America Regional Consumer Banking, EMEA Regional Consumer Banking, Asia Regional Consumer Banking, LATAM Regional Consumer Banking, Securities and Banking, Transaction Services, Brokerage and Asset Management, Local Consumer Lending—Cards and Local Consumer Lending—Other.

Under ASC 350, the goodwill impairment analysis is done in two steps. The first step requires a comparison of the fair value of the individual reporting unit to its carrying value including goodwill. If the fair value of the reporting unit is in excess of the carrying value, the related goodwill

is considered not to be impaired and no further analysis is necessary. If the carrying value of the reporting unit exceeds the fair value, there is an indication of potential impairment and a second step of testing is performed to measure the amount of impairment, if any, for that reporting unit.

When required, the second step of testing involves calculating the implied fair value of goodwill for each of the affected reporting units. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination, which is the excess of the fair value of the reporting unit determined in step one over the fair value of the net assets and identifiable intangibles as if the reporting unit were being acquired. If the amount of the goodwill allocated to the reporting unit exceeds the implied fair value of the goodwill in the pro forma purchase price allocation, an impairment charge is recorded for the excess. A reorganized impairment charge subsequently cannot exceed the amount of goodwill allocated to a reporting unit and cannot be reversed even if the fair value of the reporting unit recovers.

Goodwill impairment testing involves management judgment, requiring an assessment of whether the carrying value of the reporting unit can be supported by the fair value of the individual reporting unit using widely accepted valuation techniques, such as the market approach (earnings multiples and/or transaction multiples) and/or discounted cash flow methods (DCF). In applying these methodologies, Citi utilizes a number of factors, including actual operating results, future business plans, economic projections, and market data. A combination of methodologies is used and weighted appropriately for reporting units with significant adverse changes in business climate. Management may engage an independent valuation specialist to assist in Citi's valuation process.

Prior to 2008, Citi primarily employed the market approach for estimating fair value of the reporting units. As a result of significant adverse changes during 2008 in certain of Citigroup reporting units, and the increase in financial sector volatility primarily in the U.S., Citigroup engaged the services of an independent valuation specialist to assist in Citi's valuation of all or a portion of the following reporting units during 2009—North America Regional Consumer Banking, Latin America Regional Consumer Banking, Securities and Banking, Local Consumer Lending—Cards and Local Consumer Lending—Other. The DCF method was incorporated to ensure reliability of results. Citi believes that the DCF method, using management projections for the selected reporting units and an appropriate risk-adjusted discount rate, is most reflective of a market participant's view of fair values given current market conditions. For the reporting units where both methods were utilized in 2009, the resulting fair values were relatively consistent and appropriate weighting was given to outputs from both methods.

The DCF method used at the time of each impairment test used discount rates that Citi believes adequately reflected the risk and uncertainty in the financial markets generally and specifically in the internally generated cash flow projections. The DCF method employs a capital asset pricing model in estimating the discount rate. Citi continues to value the remaining reporting units where it believes the risk of impairment to be low, using primarily the market approach.

Citi prepares a formal three-year strategic plan for its businesses on an annual basis. These projections incorporate certain external economic projections developed at the point in time the strategic plan is developed. For the purpose of performing any impairment test, the three-year forecast is updated by Citi to reflect current economic conditions as of the testing date. Citi used updated long-range financial forecasts as a basis for its interim goodwill impairment test performed as of April 1, 2009 and its annual goodwill impairment test performed as of July 1, 2009 (as discussed below). The 2009 Strategic Plan incorporating the most current market outlook was the basis for the interim impairment test as of November 30, 2009 (as discussed below).

As discussed above, management tests goodwill for impairment annually as of July 1. The results of the July 1, 2009 test validated that the fair values exceeded the carrying values for all reporting units. Citi is also required to test goodwill for impairment whenever events or circumstances make it more likely than not that impairment may have occurred, such as a significant adverse change in the business climate, a decision to sell or dispose of all or a significant portion of a reporting unit, or a significant decline in Citi's stock price. Implementation of the new organizational structure as of the second quarter of 2009 resulted in the performance of an interim goodwill impairment test and reallocation of goodwill among new reporting units as of April 1, 2009. An interim goodwill impairment test for Citigroup was performed for both the pre-reorganization reporting units and the post-reorganization reporting units as of April 1, 2009. Results of the test indicated no goodwill impairment for any of the pre- or post-reorganization reporting units. Based on negative macro-economic and industry-specific factors, Citigroup performed an additional impairment test for its Local Consumer Lending—Cards reporting unit as of November 30, 2009. The test validated that the fair value of the reporting unit was in excess of the associated carrying value and, therefore, that there was no indication of goodwill impairment.

Since none of the Company's reporting units are publicly traded, individual reporting unit fair value determinations cannot be directly correlated to Citigroup's stock price. The sum of the fair values of the reporting units significantly exceeds the overall market capitalization of Citi.

However, Citi believes that it is not meaningful to reconcile the sum of the fair values of the Company's reporting units to its market capitalization due to several factors. These factors, which do not directly impact the individual reporting unit fair values, include the significant economic stake and influence held by the U.S. government in Citi. In addition, the market capitalization of Citigroup reflects the execution risk in a transaction involving Citigroup due to its size. However, the individual reporting units' fair values are not subject to the same level of execution risk or a business model that is perceived to be complex.

While no impairment was noted in step one of Citigroup's Local Consumer Lending—Cards reporting unit impairment test at November 30, 2009, goodwill present in that reporting unit may be particularly sensitive to further deterioration in economic conditions. Under the market approach for valuing this reporting unit, the earnings multiples and transaction multiples were selected from multiples obtained using data from guideline companies and acquisitions. The selection of the actual multiple considers operating performance and financial condition such as return on equity and net income growth of Local Consumer Lending—Cards as compared to the guideline companies and acquisitions. For the valuation under the income approach, Citi utilized a discount rate that it believes reflects the risk and uncertainty related to the projected cash flows, and selected 2012 as the terminal year.

Small deterioration in the assumptions used in the valuations, in particular the discount-rate and growth-rate assumptions used in the net income projections, could significantly affect Citigroup's impairment evaluation and, hence, results. If the future were to differ adversely from management's best estimate of key economic assumptions, and associated cash flows were to decrease by a small margin, Citi could potentially experience future material impairment charges with respect to $4,683 million of goodwill remaining in our Local Consumer Lending—Cards reporting unit. Any such charges, by themselves, would not negatively affect Citi's Tier 1 and Total Capital regulatory ratios, or Tier 1 Common ratio, its Tangible Common Equity or Citi's liquidity position.

INCOME TAXES

Citigroup is subject to the income tax laws of the U.S., its states and local municipalities, and the foreign jurisdictions in which Citi operates. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant governmental taxing authorities. In establishing a provision for income tax expense, Citi must make judgments and interpretations about the application of these inherently complex tax laws. Citi must also make estimates about when in the future certain items will affect taxable income in the various tax jurisdictions, both domestic and foreign.

Disputes over interpretations of the tax laws may be subject to review / adjudication by the court systems of the various tax jurisdictions or may be settled with the taxing authority upon audit. Deferred taxes are recorded for the future consequences of events that have been recognized in the financial statements or tax returns, based upon enacted tax laws and rates. Deferred tax assets (DTAs) are recognized subject to management's judgment that realization is more likely than not.

Although realization is not assured, Citi believes that the realization of the recognized net deferred tax asset of $46.1 billion at December 31, 2009 is more likely than not based on expectations as to future taxable income in the jurisdictions in which the DTAs arise, and based on available tax planning strategies as defined in ASC 740 that could be implemented if necessary to prevent a carryforward from expiring.

The following table summarizes Citi's DTA balance at December 31, 2009 and 2008:

Jurisdiction/Component

In billions of dollars	DTA balance December 31, 2009	DTA balance December 31, 2008
U.S. Federal		
Net operating loss (NOL)	$ 5.1	$ 4.6
Foreign tax credit (FTC)	12.0	10.5
General business credit (GBC)	1.2	0.6
Future tax deductions and credits	17.5	19.9
Other	0.5	0.9
Total U.S. federal	$ 36.3	$ 36.5
State and local		
New York NOLs	$ 0.9	$ 1.2
Other State NOLs	0.4	0.4
Future tax deductions	3.0	2.7
Total State and local	$ 4.3	$ 4.3
Foreign		
APB 23 subsidiary NOLs	0.7	0.2
Non-APB 23 subsidiary NOLs	0.4	0.9
Future tax deductions	4.4	2.6
Total foreign	$ 5.5	$ 3.7
Total	$ 46.1	$ 44.5

Included in the net U.S. federal DTA of $36.3 billion are deferred tax liabilities of $5 billion that will reverse in the relevant carryforward period and may be used to support the DTA and $0.5 billion in compensation deductions that reduced additional paid-in capital in January 2010 and for which no adjustment to such DTA is permitted at December 31, 2009, because the related stock compensation was not yet deductible to Citi. Included in Citi's overall net DTA of $46.1 billion are $25 billion of future tax deductions and credits that arose largely due to timing differences between the recognition of income for GAAP and tax and represent net deductions and credits that have not yet been taken on a tax return. The most significant source of these timing differences is the loan loss reserve build, which accounts for approximately $15 billion of the net DTA. In general, Citi would need to generate approximately $86 billion of taxable income during the respective carryforward periods to fully realize its U.S. federal, state and local DTAs.

As a result of the recent losses incurred, Citi is in a three-year cumulative pretax loss position at December 31, 2009. A cumulative loss position is considered significant negative evidence in assessing the realizability of a DTA. Citi has concluded that there is sufficient positive evidence to overcome this negative evidence. The positive evidence includes two means by which Citi is able to fully realize its DTA. First, Citi forecasts sufficient taxable income in the carryforward period, exclusive of tax planning strategies, even under stressed scenarios. Secondly, Citi has sufficient tax planning strategies, including potential sales of businesses and assets, in which it could realize the excess of appreciated value over the tax basis of its assets, in an amount sufficient to fully realize its DTA. The amount of the DTA considered realizable, however, could be significantly reduced in the near term if estimates of future taxable income during the carryforward period are significantly lower than forecasted due to deterioration in market conditions.

Based upon the foregoing discussion, as well as tax planning opportunities and other factors discussed below, the U.S. federal and New York State and City net operating loss carryforward period of 20 years provides enough time to utilize the DTAs pertaining to the existing net operating loss carryforwards and any NOL that would be created by the reversal of the future net deductions that have not yet been taken on a tax return.

The U.S. foreign tax credit carryforward period is 10 years. In addition, utilization of foreign tax credits in any year is restricted to 35% of foreign source taxable income in that year. Further, overall domestic losses that Citi has incurred of approximately $45 billion are allowed to be reclassified as foreign source income to the extent of 50% of domestic source income produced in subsequent years, and such resulting foreign source income is in fact sufficient to cover the foreign tax credits being carried forward. As such, the foreign source taxable income limitation will not be an impediment to the foreign tax credit carryforward usage as long as Citi can generate sufficient domestic taxable income within the 10-year carryforward period.

Regarding the estimate of future taxable income, Citi has projected its pretax earnings, predominantly based upon the "core" businesses that Citi intends to conduct going forward. These "core" businesses have produced steady and strong earnings in the past. During 2008 and 2009, the "core" businesses were negatively affected by the large increase in consumer credit losses during this sharp downturn in the economic cycle. Citigroup has already taken steps to reduce its cost structure. Taking these items into account, Citi is projecting that it will generate sufficient pretax earnings within the 10-year carryforward period alluded to above to be able to fully utilize the foreign tax credit carryforward, in addition to any foreign tax credits produced in such period.

Citi has also examined tax planning strategies available to it in accordance with ASC 740 that would be employed, if necessary, to prevent a carryforward from expiring. These strategies include repatriating low-taxed foreign earnings for which an assertion that the earnings have been indefinitely reinvested has not been made, accelerating taxable income into or deferring deductions out of the latter years of the carryforward period with reversals to occur after the carryforward period (e.g., selling appreciated intangible assets and electing straight-line depreciation), holding onto available-for-sale debt securities with losses until they mature and selling certain assets that produce tax-exempt income, while purchasing assets that produce fully taxable income. In addition, the sale or restructuring of certain businesses can produce significant taxable income within the relevant carryforward periods.

Citi's ability to utilize its deferred tax assets to offset future taxable income may be significantly limited if Citi experiences an "ownership change," as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"). In general, an ownership change will occur if there is a cumulative change in Citi's ownership by "5% shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period.

The common stock issued pursuant to the exchange offers in July 2009 and the common stock and tangible equity units issued in December 2009 as part of Citigroup's TARP repayment did not result in an ownership change under the Code. However, these common stock issuances have materially increased the risk that Citigroup will experience an ownership change in the future. On June 9, 2009, the Board of Directors of Citigroup adopted a tax benefits preservation plan (the "Plan"). This Plan is subject to the shareholders' approval at the 2010 Annual Meeting. The purpose of the Plan is to minimize the likelihood of an ownership change occurring for Section 382 purposes. Despite adoption of the Plan, future transactions in our stock that may not be in our control may cause Citi to experience an ownership change and thus limit Citi's ability to utilize its deferred tax asset as well as cause a reduction in its TCE and stockholders' equity.

Approximately $15 billion of the net DTA is included in Tier 1 Common and Tier 1 Capital.

See Note 11 to the Consolidated Financial Statements for a further description of Citi's tax provision and related income tax assets and liabilities.

LEGAL RESERVES

See the discussions under "Legal Proceedings" and in Note 30 to the Consolidated Financial Statements for information regarding Citi's policies on establishing reserves for legal and regulatory claims.

ACCOUNTING CHANGES AND FUTURE APPLICATION OF ACCOUNTING STANDARDS

See Note 1 to the Consolidated Financial Statements for a discussion of "Accounting Changes" and the "Future Application of Accounting Standards."

FORWARD-LOOKING INFORMATION

Certain statements in this Form 10-K, including but not limited to statements included within the Management's Discussion and Analysis of Financial Condition and Results of Operations, are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Generally, forward-looking statements are not based on historical facts but instead represent only Citigroup's and management's beliefs regarding future events. Such statements may be identified by words such as believe, expect, anticipate, intend, estimate, may increase, may fluctuate, and similar expressions, or future or conditional verbs such as will, should, would and could.

Such statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from those included in these statements due to a variety of factors, including but not limited to the factors listed and described under "Risk Factors" in this Form 10-K and those factors described below:

- the impact of the economic recession and disruptions in the global financial markets on Citi's business and results of operations;
- the impact of previously enacted and potential future legislation on Citi'sbusiness practices, costs of operations or otherwise (including without limitation the CARD Act);
- Citi's participation in U.S. government programs to modify first andsecond lien mortgage loans, as well as Citi's own loss mitigation and forbearance programs, and their effect on the amount and timing of Citi's earnings and credit losses related to those loans;
- the expiration of a provision of the U.S. tax law allowing Citi to defer U.S. taxes on certain active financial services income and its effect on Citi's taxexpense;
- risks arising from Citi's extensive operations outside the U.S.;
- potential reduction in earnings available to Citi's common stockholdersand return on Citi's equity due to future issuances of Citi common stock and preferred stock;
- the effect of the U.S. Treasury's sale of its stake in Citi on the market priceof Citi common stock;
- an "ownership change" under the Internal Revenue Code and its effect on Citi's ability to utilize its deferred tax assets to offset future taxable income;
- the impact of increases in FDIC insurance premiums and other proposed fees on banks on Citi's earnings;
- Citi's ability to hire and retain qualified employees;
- Citi's ability to maintain the value of the Citi brand;
- Citi's ability to maintain sufficient capitalization consistent with its riskprofile and robust relative to future capital requirements;
- Citi's continuing ability to obtain financing from external sources andmaintain adequate liquidity;
- reduction in Citi's or its subsidiaries' credit ratings and its effect on the cost of funding from, and access to, the capital markets;
- market disruptions and their impact on the risk of customer or counterparty delinquency or default;
- failure to realize all of the anticipated benefits of the realignment of Citi'sbusiness;
- volatile and illiquid market conditions, which could lead to further write-downs of Citi's financial instruments;
- the elimination of QSPEs from the guidance in SFAS 140 and changes in FIN 46(R) and its impact on Citi's Consolidated Financial Statements;
- the accuracy of Citi's assumptions and estimates used to prepare itsfinancial statements;
- changes in accounting standards and its impact on how Citi records and reports its financial condition and results of operations;
- the effectiveness of Citi's risk management processes and strategies;
- the exposure of Citi to reputational damage and significant legal and regulatory liability as a member of the financial services industry; and
- a failure in Citi's operational systems or infrastructure, or those ofthird parties.

CONTROLS AND PROCEDURES

Disclosure

Citigroup's disclosure controls and procedures are designed to ensure that information required to be disclosed under the Securities Exchange Act of 1934 is accumulated and communicated to management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), to allow for timely decisions regarding required disclosure and appropriate SEC filings.

Citi's Disclosure Committee is responsible for ensuring that there is an adequate and effective process for establishing, maintaining and evaluating disclosure controls and procedures for Citi's external disclosures.

Citigroup's management, with the participation of the company's CEO and CFO, has evaluated the effectiveness of Citigroup's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) as of December 31, 2009 and, based on that evaluation, the CEO and CFO have concluded that at that date Citigroup's disclosure controls and procedures were effective.

Financial Reporting

There were no changes in Citigroup's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) during the fiscal quarter ended December 31, 2009 that materially affected, or are reasonably likely to materially affect, Citi's internal control over financial reporting.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Citigroup is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act). Citigroup's internal control system is designed to provide reasonable assurance to management and the Board of Directors regarding the preparation and fair presentation of published financial statements in accordance with U.S. generally accepted accounting principles. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management maintains a comprehensive system of controls intended to ensure that transactions are executed in accordance with management's authorization, assets are safeguarded, and financial records are reliable. Management also takes steps to ensure that information and communication flows are effective and to monitor performance, including performance of internal control procedures.

Citigroup management assessed the effectiveness of Citigroup's internal control over financial reporting as of December 31, 2009 based on the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. Based on this assessment, management believes that, as of December 31, 2009, Citigroup's internal control over financial reporting is effective.

The effectiveness of Citigroup's internal control over financial reporting as of December 31, 2009 has been audited by KPMG LLP, Citigroup's independent registered public accounting firm, as stated in their report below, which expressed an unqualified opinion on the effectiveness of Citigroup's internal control over financial reporting as of December 31, 2009.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM—INTERNAL CONTROL OVER FINANCIAL REPORTING

The Board of Directors and Stockholders
Citigroup Inc.:

We have audited Citigroup Inc. and subsidiaries' (the "Company" or "Citigroup") internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying management's report on internal control over financial reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the

maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Citigroup maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Citigroup as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2009, and our report dated February 26, 2010 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

New York, New York
February 26, 2010

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM—CONSOLIDATED FINANCIAL STATEMENTS

The Board of Directors and Stockholders
Citigroup Inc.:

We have audited the accompanying consolidated balance sheets of Citigroup Inc. and subsidiaries (the "Company" or "Citigroup") as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2009, and the related consolidated balance sheets of Citibank, N.A. and subsidiaries as of December 31, 2009 and 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Citigroup as of December 31, 2009 and 2008, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2009, and the financial position of Citibank, N.A. and subsidiaries as of December 31, 2009 and 2008, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the consolidated financial statements, in 2009, the Company changed its method of accounting for other-than-temporary impairments on investment securities, business combinations, noncontrolling interests in subsidiaries, and earnings per share.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Citigroup's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Income (loss) from continuing operations	$ (0.76)	$ (6.39)	$ 0.53
Income (loss) from discontinued operations, net of taxes	(0.04)	0.76	0.14
Net income (loss)	$ (0.80)	$ (5.63)	$ 0.67
Adjusted weighted average common shares outstanding	12,099.0	5,768.9	4,924.0

(1) As of January 1, 2009, the Company adopted ASC 320-10-65, Investments—Debt and Equity Securities. The Company disclosed comparable information with the prior year in its 2009 periodic reports. This accounting change was not applicable to 2007 and, accordingly, 2007 information is not disclosed above.

(2) The Diluted EPS calculation for 2009 and 2008 utilizes Basic shares and Income available to common shareholders (Basic) due to the negative Income available to common shareholders. Using actual Diluted shares and Income available to common shareholders (Diluted) would result in anti-dilution.

See Notes to the Consolidated Financial Statements.

Total equity	$ 154,973	$ 144,022	$ 118,755			
Comprehensive income (loss)						
Net income (loss) before attribution of noncontrolling interests	$ (1,511)	$ (28,027)	$ 3,900			
Net change in Accumulated other comprehensive income (loss)	6,715	(20,699)	(979)			
Total comprehensive income (loss)	$ 5,204	$ (48,726)	$ 2,921			
Comprehensive income (loss) attributable to the noncontrolling interests	$ 139	$ (507)	$ 413			
Comprehensive income (loss) attributable to Citigroup	$ 5,065	$ (48,219)	$ 2,508			

(1) The adjustment to the opening balances for Retained earnings and Accumulated other comprehensive income (loss) represents the cumulative effect of initially adopting ASC 320-10-35-34, Investments—Debt and Equity securities: Recognition of an Other-Than-Temporary Impairment (formerly FSP FAS 115-2 and FAS 124-2).

(2) The adjustment to the opening balance of Retained earnings in 2007 represents the total of the after-tax gain (loss) amounts for the adoption of the following accounting pronouncements:

- ASC 820, Fair Value Measurements and Disclosures (SFAS 157) for $75 million,
- ASC 825-10-05, Financial Instruments—Fair Value Option (SFAS 159) for $(99) million,
- ASC 840, Leases (FSP 13-2) for $(148) million, and
- ASC 740, Income Taxes (FIN 48) for $(14) million.

See Notes 1, 26 and 27 to the Consolidated Financial Statements.

(3) Common dividends declared were as follows: $0.01 per share in the first quarter of 2009, $0.32 per share in the first, second and third quarters of 2008, $0.16 in the fourth quarter of 2008; $0.54 per share in the first, second, third and fourth quarters of 2007.

(4) All open market repurchases were transacted under an existing authorized share repurchase plan and relate to customer fails/errors.

(5) The after-tax adjustment to the opening balance of Accumulated other comprehensive income (loss) represents the reclassification of the unrealized gains (losses) related to the Legg Mason securities as well as several miscellaneous items previously reported. The related unrealized gains and losses were reclassified to Retained earnings upon the adoption of the fair value option. See Notes 1, 26 and 27 to the Consolidated Financial Statements for further discussion.

(6)

In 2009, reflects decreased return on assets for the U.S. plan. In 2008, reflects decreased fair value of plan assets and a lower discount rate, which increased the PBO (Projected Benefit Obligation). In 2007, reflects changes in the funded status of the Company's pension and postretirement plans.

See Notes to the Consolidated Financial Statements.

CONSOLIDATED STATEMENT OF CASH FLOWS

Citigroup Inc. and Subsidiaries

See Notes to the Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The Consolidated Financial Statements include the accounts of Citigroup and its subsidiaries (the Company). The Company consolidates subsidiaries in which it holds, directly or indirectly, more than 50% of the voting rights or where it exercises control. Entities where the Company holds 20% to 50% of the voting rights and/or has the ability to exercise significant influence, other than investments of designated venture capital subsidiaries, or investments accounted for at fair value under the fair value option, are accounted for under the equity method, and the pro rata share of their income (loss) is included in Other revenue. Income from investments in less than 20%-owned companies is recognized when dividends are received. As discussed below, Citigroup consolidates entities deemed to be variable-interest entities when Citigroup is determined to be the primary beneficiary. Gains and losses on the disposition of branches, subsidiaries, affiliates, buildings, and other investments and charges for management's estimate of impairment in their value that is other than temporary, such that recovery of the carrying amount is deemed unlikely, are included in Other revenue.

Certain reclassifications have been made to the prior-period's financial statements and notes to conform to the current period's presentation.

Citibank, N.A.

Citibank, N.A. is a commercial bank and wholly owned subsidiary of Citigroup Inc. Citibank's principal offerings include consumer finance, mortgage lending, and retail banking products and services; investment banking, commercial banking, cash management, trade finance and e-commerce products and services; and private banking products and services.

The Company includes a balance sheet and statement of changes in stockholder's equity for Citibank, N.A. to provide information about this entity to shareholders and international regulatory agencies. (See Note 31 to the Consolidated Financial Statements for further discussion.)

Variable Interest Entities

An entity is referred to as a variable interest entity (VIE) if it meets the criteria outlined in ASC 810, Consolidation (formerly FASB Interpretation No. 46(R), Consolidation of Variable Interest Entities (revised December 2003) (FIN 46(R)), which are: (1) the entity has equity that is insufficient to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) the entity has equity investors that cannot make significant decisions about the entity's operations or that do not absorb their proportionate share of the expected losses or receive the expected returns of the entity.

In addition, a VIE must be consolidated by the Company if it is deemed to be the primary beneficiary of the VIE, which is the party involved with the VIE that has a majority of the expected losses or a majority of the expected residual returns or both.

Along with the VIEs that are consolidated in accordance with these guidelines, the Company has significant variable interests in other VIEs that are not consolidated because the Company is not the primary beneficiary.
These include multi-seller finance companies, certain collateralized debt obligations (CDOs), many structured finance transactions, and various investment funds.

However, these VIEs as well as all other unconsolidated VIEs are regularly monitored by the Company to determine if any reconsideration events have occurred that could cause its primary beneficiary status to change. These events include:

- additional purchases or sales of variable interests by Citigroup or an unrelated third party, which cause Citigroup's overall variable interest ownership to change;
- changes in contractual arrangements in a manner that reallocates expected losses and residual returns among the variable interest holders; and
- providing support to an entity that results in an implicit variable interest.

All other entities not deemed to be VIEs with which the Company has involvement are evaluated for consolidation under other subtopics of ASC 810 (formerly Accounting Research Bulletin (ARB) No. 51, Consolidated Financial Statements, SFAS No. 94, Consolidation of All Majority-Owned Subsidiaries, and EITF Issue No. 04-5, "Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights.")

Foreign Currency Translation

Assets and liabilities denominated in foreign currencies are translated into U.S. dollars using year-end spot foreign-exchange rates. Revenues and expenses are translated monthly at amounts that approximate weighted average exchange rates, with resulting transaction gains and losses included in income. The effects of translating net assets with a functional currency other than the U.S. dollar are included in a separate component of stockholders' equity along with related hedge and tax effects. The effects of translating income from transactions denominated in foreign currency subsidiaries with the U.S. dollar as the functional currency, including those in highly inflationary environments, are primarily included in Other revenue along with the related hedge effects. Hedges of foreign currency exposures include forward foreign currency, option and swap contracts and designated issues of non-U.S. dollar debt.

Investment Securities

Investments include fixed income and equity securities. Fixed income instruments include bonds, notes and redeemable preferred stocks, as well as certain loan-backed and structured securities that are subject to prepayment risk. Equity securities include common and nonredeemable preferred stocks. Investment securities are classified and accounted for as follows:

- Fixed income securities classified as "held-to-maturity" represent securities that the Company has both the ability and the intent to hold until maturity, and are carried at amortized cost. Interest income on such securities is included in Interest revenue.

- Fixed income securities and marketable equity securities classified as "available-for-sale" are carried at fair value with changes in fair value reported in a separate component of Stockholders' equity, netof applicable income taxes. As set out in Note 16 to the Consolidated Financial Statements, declines in fair value that are determined to be other than temporary are recorded in earnings immediately. Realized gains and losses on sales are included in income primarily on a specific identification cost basis, and interest and dividend income on such securities is included in Interest revenue.
- Venture capital investments held by Citigroup's private equity subsidiariesthat are considered investment companies are carried at fair value with changes in fair value reported in Other revenue. These subsidiaries include entities registered as Small Business Investment Companies and engage exclusively in venture capital activities.
- Certain investments in non-marketable equity securities and certain investments that would otherwise have been accounted for using the equity method are carried at fair value, since the Company has elected to apply fair value accounting. Changes in fair value of such investments are recorded in earnings.
- Certain non-marketable equity securities are carried at cost and periodically assessed for other-than-temporary impairment, as set out in Note 16 to the Consolidated Financial Statements.

For investments in fixed-income securities classified as held-to-maturity or available-for-sale, accrual of interest income is suspended for investments that are in default or on which it is likely that future interest payments will not be made as scheduled.

The Company uses a number of valuation techniques for investments carried at fair value, which are described in Note 26 to the Consolidated Financial Statements.

Trading Account Assets and Liabilities

Trading account assets include debt and marketable equity securities, derivatives in a receivable position, residual interests in securitizations and physical commodities inventory. In addition (as set out in Note 27 to the Consolidated Financial Statements), certain assets that Citigroup has elected to carry at fair value under the fair value option, such as loans and purchased guarantees, are also included in Trading account assets.

Trading account liabilities include securities sold, not yet purchased (short positions), and derivatives in a net payable position, as well as certain liabilities that Citigroup has elected to carry at fair value, as set out in Note 27 to the Consolidated Financial Statements.

Other than physical commodities inventory, all trading account assets and liabilities are carried at fair value. Revenues generated from trading assets and trading liabilities are generally reported in Principal transactions and include realized gains and losses as well as unrealized gains and losses resulting from changes in the fair value of such instruments. Interest income on trading assets is recorded in Interest revenue reduced by interest expense on trading liabilities.

Physical commodities inventory is carried at the lower of cost or market (LOCOM) with related gains or losses reported in Principal transactions. Realized gains and losses on sales of commodities inventory are included in Principal transactions on a "first in, first out" basis.

Derivatives used for trading purposes include interest rate, currency, equity, credit, and commodity swap agreements, options, caps and floors, warrants, and financial and commodity futures and forward contracts. Derivative asset and liability positions are presented net by counterparty on the Consolidated Balance Sheet when a valid master netting agreement exists and the other conditions set out in ASC 210-20, Balance Sheet—Offsetting (formerly FASB Interpretation No. 39, "Offsetting of Amounts Related to Certain Contracts") are met.

The Company uses a number of techniques to determine the fair value of trading assets and liabilities, all of which are described in Note 26 to the Consolidated Financial Statements.

Securities Borrowed and Securities Loaned

Securities borrowing and lending transactions generally do not constitute a sale of the underlying securities for accounting purposes, and so are treated as collateralized financing transactions when the transaction involves the exchange of cash. Such transactions are recorded at the amount of cash advanced or received plus accrued interest. As set out in Note 27 to the Consolidated Financial Statements, the Company has elected to apply fair value accounting to a number of securities borrowing and lending transactions. Irrespective of whether the Company has elected fair value accounting, fees paid or received for all securities lending and borrowing transactions are recorded in Interest expense or Interest revenue at the contractually specified rate.

Where the conditions of ASC 210-20 are met, amounts recognized in respect of securities borrowed and securities loaned are presented net on the Consolidated Balance Sheet.

With respect to securities borrowed or loaned, the Company pays or receives cash collateral in an amount in excess of the market value of securities borrowed or loaned. The Company monitors the market value of securities borrowed and loaned on a daily basis with additional collateral received or paid as necessary.

As described in Note 26 to the Consolidated Financial Statements, the Company uses a discounted cash flow technique to determine the fair value of securities lending and borrowing transactions.

Repurchase and Resale Agreements

Securities sold under agreements to repurchase (repos) and securities purchased under agreements to resell (reverse repos) generally do not constitute a sale for accounting purposes of the underlying securities, and so are treated as collateralized financing transactions. As set out in Note 27 to the Consolidated Financial Statements, the Company has elected to apply fair value accounting to a majority of such transactions, with changes in fair value reported in earnings. Any transactions for which fair value accounting has not been elected are recorded at the amount of cash advanced or received plus accrued interest. Irrespective of whether the Company has elected fair value accounting, interest paid or received on all repo and reverse repo transactions is recorded in Interest expense or Interest revenue at the contractually specified rate.

Where the conditions of ASC 210-20-45-11, Balance Sheet—Offsetting: Repurchase and Reverse Repurchase Agreements (formerly FASB Interpretation No. 41, “Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements”), are met, repos and reverse repos are presented net on the Consolidated Balance Sheet.

The Company’s policy is to take possession of securities purchased under agreements to resell. The market value of securities to be repurchased and resold is monitored, and additional collateral is obtained where appropriate to protect against credit exposure.

As described in Note 26 to the Consolidated Financial Statements, the Company uses a discounted cash flow technique to determine the fair value of repo and reverse repo transactions.

Loans

Loans are reported at their outstanding principal balances net of any unearned income and unamortized deferred fees and costs except that credit card receivable balances also include accrued interest and fees. Loan origination fees and certain direct origination costs are generally deferred and recognized as adjustments to income over the lives of the related loans.

As described in Note 27 to the Consolidated Financial Statements, the Company has elected fair value accounting for certain loans. Such loans are carried at fair value with changes in fair value reported in earnings. Interest income on such loans is recorded in Interest revenue at the contractually specified rate.

Loans for which the fair value option has not been elected are classified upon origination or acquisition as either held-for-investment or held-for-sale. This classification is based on management’s initial intent and ability with regard to those loans.

Loans that are held-for-investment are classified as Loans, net of unearned income on the Consolidated Balance Sheet, and the related cash flows are included within the cash flows from investing activities category in the Consolidated Statement of Cash Flows on the line Change in loans. However, when the initial intent for holding a loan has changed from held-for-investment to held-for-sale, the loan is reclassified to held-for-sale, but the related cash flows continue to be reported in cash flows from investing activities in the Consolidated Statement of Cash Flows on the line Proceeds from sales and securitizations of loans.

Substantially all of the consumer loans sold or securitized by Citigroup are U.S. prime residential mortgage loans or U.S. credit card receivables. The practice of the U.S. prime mortgage business has been to sell all of its loans except for non-conforming adjustable rate loans. U.S. prime mortgage conforming loans are classified as held-for-sale at the time of origination. The related cash flows are classified in the Consolidated Statement of Cash Flows in the cash flows from operating activities category on the line Change in loans held-for-sale.

U.S. credit card receivables are classified at origination as loans-held-for-sale to the extent that management does not have the intent to hold the receivables for the foreseeable future or until maturity. The U.S. credit card securitization forecast for the three months following the latest balance sheet date, excluding replenishments, is the basis for the amount of such loans classified as held-for-sale.
Cash flows related to U.S. credit card loans classified as held-for-sale at origination or acquisition are reported in the cash flows from operating activities category on the line Change in loans held-for-sale.

Consumer loans

Consumer loans represent loans and leases managed primarily by the Regional Consumer Banking and Local Consumer Lending businesses. As a general rule, interest accrual ceases for installment and real estate (both open- and closed-end) loans when payments are 90 days contractually past due. For credit cards and unsecured revolving loans, however, the Company generally accrues interest until payments are 180 days past due. Loans that have been modified to grant a short-term or long-term concession to a borrower who is in financial difficulty may not be accruing interest at the time of the modification. The policy for returning such modified loans to accrual status varies by product and/or region. In most cases, a minimum number of payments (ranging from one to six) are required, while in other cases the loan is never returned to accrual status.

Citi’s charge-off policies follow the general guidelines below:

- Unsecured installment loans are charged off at 120 days past due.
- Unsecured revolving loans and credit card loans are charged off at 180 days contractually past due.
- Loans secured with non-real estate collateral are written down to the estimated value of the collateral, less costs to sell, at 120 days past due.
- Real estate-secured loans are written down to the estimated value of the property, less costs to sell, at 180 days contractually past due.
- Non-bank loans secured by real estate are written down to the estimated value of the property, less costs to sell, at the earlier of the receipt of title or 12 months in foreclosure (a process that must commence when payments are 120 days contractually past due).
- Non-bank auto loans are written down to the estimated value of the collateral, less costs to sell, at repossession or, if repossession is not pursued, no later than 180 days contractually past due.
- Non-bank unsecured personal loans are charged off when the loan is 180 days contractually past due if there have been no payments within the last six months, but in no event can these loans exceed 360 days contractually past due.
- Unsecured loans in bankruptcy are charged off within 30 days of notification of filing by the bankruptcy court or within the contractual write-off periods, whichever occurs earlier.
- Real estate-secured loans in bankruptcy are written down to the estimated value of the property, less costs to sell, 60 days after notification if the borrower is 60 days contractually past due.
- Non-bank unsecured personal loans in bankruptcy are charged off when they are 30 days contractually past due.

Corporate loans

Corporate loans represent loans and leases managed by ICG or the Special Asset Pool. Corporate loans are identified as impaired and placed on a cash (non-accrual) basis when it is determined that the payment of interest or principal is doubtful or when interest or principal is 90 days past due, except when the loan is well collateralized and in the process of collection. Any interest accrued on impaired corporate loans and leases is reversed at 90 days and charged against current earnings, and interest is thereafter included in earnings only to the extent actually received in cash. When there is doubt regarding the ultimate collectability of principal, all cash receipts are thereafter applied to reduce the recorded investment in the loan.

Impaired corporate loans and leases are written down to the extent that principal is judged to be uncollectible. Impaired collateral-dependent loans and leases, where repayment is expected to be provided solely by the sale of the underlying collateral and there are no other available and reliable sources of repayment, are written down to the lower of cost or collateral value. Cash-basis loans are returned to an accrual status when all contractual principal and interest amounts are reasonably assured of repayment and there is a sustained period of repayment performance in accordance with the contractual terms.

Loans Held-for-Sale

Corporate and consumer loans that have been identified for sale are classified as loans held-for-sale included in Other assets. With the exception of certain mortgage loans for which the fair value option has been elected, these loans are accounted for at the lower of cost or market value (LOCOM), with any write-downs or subsequent recoveries charged to Other revenue.

Allowance for Loan Losses

Allowance for loan losses represents management's best estimate of probable losses inherent in the portfolio, as well as probable losses related to large individually evaluated impaired loans and troubled debt restructurings. Attribution of the allowance is made for analytical purposes only, and the entire allowance is available to absorb probable credit losses inherent in the overall portfolio. Additions to the allowance are made through the provision for credit losses. Credit losses are deducted from the allowance, and subsequent recoveries are added. Securities received in exchange for loan claims in debt restructurings are initially recorded at fair value, with any gain or loss reflected as a recovery or charge-off to the allowance, and are subsequently accounted for as securities available-for-sale.

Corporate loans

In the Corporate portfolios, the allowance for loan losses includes an asset-specific component and a statistically-based component. The asset specific component is calculated under ASC 310-10-35, Receivables—Subsequent Measurement (formerly SFAS 114) on an individual basis for larger-balance, non-homogeneous loans, which are considered impaired. An asset-specific allowance is established when the discounted cash flows, collateral value (less disposal costs), or observable market price of the impaired loan is lower than its carrying value. This allowance considers the borrower's overall financial condition, resources, and payment record, the prospects for support from any financially responsible guarantors and, if appropriate, the realizable value of any collateral. The asset specific component of the allowance for smaller balance impaired loans is calculated on a pool basis considering historical loss experience. The allowance for the remainder of the loan portfolio is calculated under ASC 450, Contingencies (formerly SFAS 5) using a statistical methodology, supplemented by management judgment. The statistical analysis considers the portfolio's size, remaining tenor, and credit quality as measured by internal risk ratings assigned to individual credit facilities, which reflect probability of default and loss given default. The statistical analysis considers historical default rates and historical loss severity in the event of default, including historical average levels and historical variability. The result is an estimated range for inherent losses. The best estimate within the range is then determined by management's quantitative and qualitative assessment of current conditions, including general economic conditions, specific industry and geographic trends, and internal factors including portfolio concentrations, trends in internal credit quality indicators, and current and past underwriting standards.

Consumer loans

For Consumer loans, each portfolio of smaller-balance, homogeneous loans—including consumer mortgage, installment, revolving credit, and most other consumer loans—is independently evaluated for impairment. The allowance for loan losses attributed to these loans is established via a process that estimates the probable losses inherent in the specific portfolio based upon various analyses. These include migration analysis, in which historical delinquency and credit loss experience is applied to the current aging of the portfolio, together with analyses that reflect current trends and conditions.

Management also considers overall portfolio indicators, including historical credit losses, delinquent, non-performing, and classified loans, trends in volumes and terms of loans, an evaluation of overall credit quality, the credit process, including lending policies and procedures, and economic, geographical, product and other environmental factors.

In addition, valuation allowances are determined for impaired smaller-balance homogeneous loans whose terms have been modified due to the borrowers' financial difficulties and where it has been determined that a concession will be granted to the borrower. Such modifications may include interest rate reductions, principal forgiveness and/or term extensions. Where long-term concessions have been granted, such modifications are accounted for

as "Troubled Debt Restructurings" (TDRs). The allowance for loan losses for TDRs is determined by comparing expected cash flows of the loans discounted at the loans' original effective interest rates to the carrying value of the loans. Where short-term concessions have been granted, the allowance for loan losses is calculated by the analyses described above for smaller-balance, homogeneous loans and also reflects the estimated future credit losses for those loans.

Reserve Estimates and Policies

Management provides reserves for an estimate of probable losses inherent in the funded loan portfolio on the balance sheet in the form of an allowance for loan losses. These reserves are established in accordance with Citigroup's Credit Reserve Policies, as approved by the Audit Committee of the Company's Board of Directors. The Company's Chief Risk Officer and Chief Financial Officer review the adequacy of the credit loss reserves each quarter with representatives from the Risk Management and Finance staffs for each applicable business area.

The above-mentioned representatives covering the business areas having classifiably managed portfolios, where internal credit-risk ratings are assigned (primarily ICG, Regional Consumer Banking and Local Consumer Lending), or modified consumer loans, where concessions were granted due to the borrowers' financial difficulties present recommended reserve balances for their funded and unfunded lending portfolios along with supporting quantitative and qualitative data. The quantitative data include:

- Estimated probable losses for non-performing, non-homogeneous exposures within a business line's classifiably managed portfolio and impaired smaller-balance homogeneous loans whose terms have been modified due to the borrowers' financial difficulties, and it was determined that a long-term concession was granted to the borrower. Consideration may be given to the following, as appropriate, when determining this estimate: (i) the present value of expected future cash flows discounted at the loan's original effective rate; (ii) the borrower's overall financial condition, resources and payment record; and (iii) the prospects for support from financially responsible guarantors or the realizable value of any collateral. When impairment is measured based on the present value of expected future cash flows, the entire change in present value is recorded in the Provision for loan losses.
- Statistically calculated losses inherent in the classifiably managed portfolio for performing and de minimis non-performing exposures.
  The calculation is based upon: (i) Citigroup's internal system of credit-riskratings, which are analogous to the risk ratings of the major rating agencies; and (ii) historical default and loss data, including rating-agency information regarding default rates from 1983 to 2008, and internal data dating to the early 1970s on severity of losses in the event of default.
- Additional adjustments include: (i) statistically calculated estimates to cover the historical fluctuation of the default rates over the credit cycle, the historical variability of loss severity among defaulted loans, and the degree to which there are large obligor concentrations in the global portfolio; and (ii) adjustments made for specifically known items, such as current environmental factors and credit trends.

In addition, representatives from both the Risk Management and Finance staffs that cover business areas that have delinquency-managed portfolios containing smaller homogeneous loans (primarily the non-commercial lending areas of Regional Consumer Banking) present their recommended reserve balances based upon leading credit indicators, including loan delinquencies and changes in portfolio size as well as economic trends including housing prices, unemployment and GDP. This methodology is applied separately for each individual product within each different geographic region in which these portfolios exist.

This evaluation process is subject to numerous estimates and judgments. The frequency of default, risk ratings, loss recovery rates, the size and diversity of individual large credits, and the ability of borrowers with foreign currency obligations to obtain the foreign currency necessary for orderly debt servicing, among other things, are all taken into account during this review. Changes in these estimates could have a direct impact on the credit costs in any quarter and could result in a change in the allowance. Changes to the reserve flow through the Consolidated Statement of Income on the lines Provision for loan losses and Provision for unfunded lending commitments.

Additional information on the allowance for loan losses is included in Note 18 to the Consolidated Financial Statements.

Allowance for Unfunded Lending Commitments

A similar approach to the allowance for loan losses is used for calculating a reserve for the expected losses related to unfunded loan commitments and standby letters of credit. This reserve is classified on the balance sheet in Other liabilities.

Mortgage Servicing Rights (MSRs)

Mortgage servicing rights (MSRs) are recognized as intangible assets when purchased or when the Company sells or securitizes loans acquired through purchase or origination and retains the right to service the loans.

Servicing rights in the U.S. mortgage and student loan classes of servicing rights are accounted for at fair value, with changes in value recorded in current earnings.

Additional information on the Company's MSRs can be found in Note 23 to the Consolidated Financial Statements.

Representations and Warranties

When selling a loan, the Company makes various representations and warranties relating to, among other things, the following:

- the Company’s ownership of the loan;
- the validity of the lien securing the loan;
- the absence of delinquent taxes or liens against the property securing the loan;
- the effectiveness of title insurance on the property securing the loan;
- the process used in selecting the loans for inclusion in a transaction;
- the loan’s compliance with any applicable loan criteria (e.g., loan balancelimits, property type, delinquency status) established by the buyer; and
- the loan’s compliance with applicable local, state and federal laws.

Citigroup's repurchases are primarily from Government Sponsored Entities. The specific representations and warranties made by the Company depend on the nature of the transaction and the requirements of the buyer. Market conditions and credit-ratings agency requirements may also affect representations and warranties and the other provisions the Company may agree to in loan sales.

In the event of a breach of the representations and warranties, the Company may be required to either repurchase the mortgage loans (generally at unpaid principal balance plus accrued interest) with the identified defects or indemnify ("make-whole") the investor or insurer. The Company has recorded a repurchase reserve that is included in Other liabilities in the Consolidated Balance Sheet. In the case of a repurchase, the Company will bear any subsequent credit loss on the mortgage loans. The Company's representations and warranties are generally not subject to stated limits in amount or time of coverage. However, contractual liability arises only when the representations and warranties are breached and generally only when a loss results from the breach. In the case of a repurchase, the loan is typically considered a credit-impaired loan and accounted for under SOP 03-3, "Accounting for Certain Loans and Debt Securities, Acquired in a Transfer" (now incorporated into ASC 310-30, Receivables—Loans and Debt Securities Acquired with Deteriorated Credit Quality). These repurchases have not had a material impact on nonperforming loan statistics, because credit-impaired purchased SOP 03-3 loans are not included in nonaccrual loans.

The Company estimates its exposure to losses from its obligation to repurchase previously sold loans based on the probability of repurchase or make-whole and an estimated loss given repurchase or make-whole. This estimate is calculated separately by sales vintage (i.e., the year the loans were sold) based on a combination of historical trends and forecasted repurchases and losses considering the: (1) trends in requests by investors for loan documentation packages to be reviewed; (2) trends in recent repurchases and make-wholes; (3) historical percentage of claims made as a percentage of loan documentation package requests; (4) success rate in appealing claims; (5) inventory of unresolved claims; and (6) estimated loss given repurchase or make-whole, including the loss of principal, accrued interest, and foreclosure costs. The Company does not change its estimation methodology by counterparty, but the historical experience and trends are considered when evaluating the overall reserve.

The request for loan documentation packages is an early indicator of a potential claim. During 2009, loan documentation package requests and the level of outstanding claims increased. In addition, our loss severity estimates increased during 2009 due to the impact of macroeconomic factors and recent experience. These factors contributed to a $493 million change in estimate for this reserve in 2009.

As indicated above, the repurchase reserve is calculated by sales vintage. The majority of the repurchases in 2009 were from the 2006 and 2007 sales vintages, which also represent the vintages with the largest loss-given-repurchase. An insignificant percentage of 2009 repurchases were from vintages prior to 2006, and this is expected to decrease, because those
vintages are later in the credit cycle. Although early in the credit cycle, the Company has experienced improved repurchase and loss-given-repurchase statistics from the 2008 and 2009 vintages.

In the case of a repurchase of a credit-impaired SOP 03-3 loan (now incorporated into ASC 310-30), the difference between the loan's fair value and unpaid principal balance at the time of the repurchase is recorded as a utilization of the repurchase reserve. Payments to make the investor whole are also treated as utilizations and charged directly against the reserve. The provision for estimated probable losses arising from loan sales is recorded as an adjustment to the gain on sale, which is included in Other revenue in the Consolidated Statement of Income. A liability for representations and warranties is estimated when the Company sells loans and is updated quarterly. Any subsequent adjustment to the provision is recorded in Other revenue in the Consolidated Statement of Income.

The activity in the repurchase reserve for the years ended December 31, 2009 and 2008 is as follows:

In millions of dollars	2009	2008
Balance, beginning of the year	$ 75	$ 2
Additions for new sales	33	23
Change in estimate	493	59
Utilizations	(119)	(9)
Balance, end of the year	$ 482	$ 75

Goodwill

Goodwill represents an acquired company's acquisition cost over the fair value of net tangible and intangible assets acquired.Goodwill is subject to annual impairment tests, whereby Goodwill is allocated to the Company's reporting units and an impairment is deemed to exist if the carrying value of a reporting unit exceeds its estimated fair value. Furthermore, on any business dispositions, Goodwill is allocated to the business disposed of based on the ratio of the fair value of the business disposed of to the fair value of the reporting unit.

Intangible Assets

Intangible assets—including core deposit intangibles, present value of future profits, purchased credit card relationships, other customer relationships, and other intangible assets, but excluding MSRs—are amortized over their estimated useful lives. Intangible assets deemed to have indefinite useful lives, primarily certain asset management contracts and trade names, are not amortized and are subject to annual impairment tests. An impairment exists if the carrying value of the indefinite-lived intangible asset exceeds its fair value. For other Intangible assets subject to amortization, an impairment is recognized if the carrying amount is not recoverable and exceeds the fair value of the Intangible asset.

Other Assets and Other Liabilities

Other assets include, among other items, loans held-for-sale, deferred tax assets, equity-method investments, interest and fees receivable, premises and equipment, end-user derivatives in a net receivable position, repossessed assets, and other receivables.

Other liabilities includes, among other items, accrued expenses and other payables, deferred tax liabilities, minority interest, end-user derivatives in a net payable position, and reserves for legal claims, taxes, restructuring reserves for unfunded lending commitments, and other matters.

Repossessed Assets

Upon repossession, loans are adjusted, if necessary, to the estimated fair value of the underlying collateral and transferred to repossessed assets. This is reported in Other assets, net of a valuation allowance for selling costs and net declines in value as appropriate.

Securitizations

The Company primarily securitizes credit card receivables and mortgages. Other types of securitized assets include corporate debt instruments (in cash and synthetic form) and student loans.

There are two key accounting determinations that must be made relating to securitizations. First, in the case where Citigroup originated or owned the financial assets transferred to the securitization entity, a decision must be made as to whether that transfer is considered a sale under U.S. Generally Accepted Accounting Principles (GAAP). If it is a sale, the transferred assets are removed from the Company's Consolidated Balance Sheet with a gain or loss recognized. Alternatively, when the transfer would be considered to be a financing rather than a sale, the assets will remain on the Company's Consolidated Balance Sheet with an offsetting liability recognized in the amount of proceeds received.

Second, a determination must be made as to whether the securitization entity would be included in the Company's Consolidated Financial Statements. For each securitization entity with which it is involved, the Company makes a determination of whether the entity should be considered a subsidiary of the Company and be included in its Consolidated Financial Statements or whether the entity is sufficiently independent that it does not need to be consolidated. If the securitization entity's activities are sufficiently restricted to meet accounting requirements to be a qualifying special purpose entity (QSPE), the securitization entity is not consolidated by the seller of the transferred assets. If the securitization entity is determined to be a VIE, the Company consolidates the VIE if it is the primary beneficiary.

For all other securitization entities determined not to be VIEs in which Citigroup participates, a consolidation decision is made by evaluating several factors, including how much of the entity's ownership is in the hands of third-party investors, who controls the securitization entity, and who reaps the rewards and bears the risks of the entity. Only securitization entities controlled by Citigroup are consolidated.

Interests in the securitized and sold assets may be retained in the form of subordinated interest-only strips, subordinated tranches, spread accounts, and servicing rights. In credit
card securitizations, the Company retains a seller's interest in the credit card receivables transferred to the trusts, which is not in securitized form. Accordingly, the seller's interest is carried on a historical cost basis and classified asConsumer loans. Retained interests in securitized mortgage loans and student loans are classified as Trading account assets, as is a majority of the retained interests in securitized credit card receivables. Certain other retained interests are recorded as available-for-sale investments, but servicing rights are recorded at fair value and included in Intangible assets. Gains or losses on securitization and sale depend in part on the previous carrying amount of the loans involved in the transfer at the date of sale. Gains are recognized at the time of securitization and are reported in Other revenue.

The Company values its securitized retained interests at fair value using quoted market prices, if such positions are actively traded, or financial models that incorporate observable and unobservable inputs. More specifically, these models estimate the fair value of these retained interests by determining the present value of expected future cash flows, using modeling techniques that incorporate management's best estimates of key assumptions, including prepayment speeds, credit losses and discount rates, when observable inputs are not available. In addition, internally calculated fair values of retained interests are compared to recent sales of similar assets, if available.

Additional information on the Company's securitization activities can be found in Note 23 to the Consolidated Financial Statements.

Debt

Short-term borrowings and long-term debt are generally accounted for at amortized cost, except where the Company has elected to report certain structured notes at fair value.

Transfers of Financial Assets

For a transfer of financial assets to be considered a sale: the assets must have been isolated from the Company, even in bankruptcy or other receivership; the purchaser must have the right to sell the assets transferred or the purchaser must be a QSPE; and the Company may not have an option or any obligation to reacquire the assets. If these sale requirements are met, the assets are removed from the Company's Consolidated Balance Sheet. If the conditions for sale are not met, the transfer is considered to be a secured borrowing, the assets remain on the Consolidated Balance Sheet, and the sale proceeds are recognized as the Company's liability. A legal opinion on a sale is generally obtained for complex transactions or where the Company has continuing involvement with assets transferred or with the securitization entity. For a transfer to be eligible for sale accounting, those opinions must state that the asset transfer is considered a sale and that the assets transferred would not be consolidated with the Company'sOther assets in the event of the Company's insolvency.

See Note 23 to the Consolidated Financial Statements for further discussion.

Risk Management Activities—Derivatives Used for Non-Trading Purposes

The Company manages its exposures to market rate movements outside its trading activities by modifying the asset and liability mix, either directly or through the use of derivative financial products, including interest-rate swaps, futures, forwards, and purchased-option positions, as

well as foreign-exchange contracts. These end-user derivatives are carried at fair value in Other assets or Other liabilities.

To qualify as a hedge under the hedge accounting rules, a derivative must be highly effective in offsetting the risk designated as being hedged.

The hedge relationship must be formally documented at inception, detailing the particular risk management objective and strategy for the hedge, which includes the item and risk that is being hedged and the derivative that is being used, as well as how effectiveness will be assessed and ineffectiveness measured. The effectiveness of these hedging relationships is evaluated on a retrospective and prospective basis, typically using quantitative measures of correlation with hedge ineffectiveness measured and recorded in current earnings. If a hedge relationship is found to be ineffective, it no longer qualifies as a hedge and hedge accounting would not be applied. Any gains or losses attributable to the derivatives, as well as subsequent changes in fair value, are recognized in Other revenue with no offset on the hedged item, similar to trading derivatives.

The foregoing criteria are applied on a decentralized basis, consistent with the level at which market risk is managed, but are subject to various limits and controls. The underlying asset, liability or forecasted transaction may be an individual item or a portfolio of similar items.

For fair value hedges, in which derivatives hedge the fair value of assets or liabilities, changes in the fair value of derivatives are reflected in Other revenue, together with changes in the fair value of the related hedged risk. These are expected to, and generally do, offset each other. Any net amount, representing hedge ineffectiveness, is reflected in current earnings. Citigroup's fair value hedges are primarily hedges of fixed-rate long-term debt, and available-for-sale securities.

For cash flow hedges, in which derivatives hedge the variability of cash flows related to floating- and fixed-rate assets, liabilities or forecasted transactions, the accounting treatment depends on the effectiveness of the hedge. To the extent these derivatives are effective in offsetting the variability of the hedged cash flows, the effective portion of the changes in the derivatives' fair values will not be included in current earnings, but are reported in Accumulated other comprehensive income (loss). These changes in fair value will be included in earnings of future periods when the hedged cash flows impact earnings. To the extent these derivatives are not effective, changes in their fair values are immediately included in Other revenue. Citigroup's cash flow hedges primarily include hedges of floating- and fixed-rate debt, as well as rollovers of short-term fixed-rate liabilities and floating-rate liabilities.

For net investment hedges in which derivatives hedge the foreign currency exposure of a net investment in a foreign operation, the accounting treatment will similarly depend on the effectiveness of the hedge. The effective portion of the change in fair value of the derivative, including any forward premium or discount, is reflected in Accumulated other comprehensive income (loss) as part of the foreign currency translation adjustment.

End-user derivatives that are economic hedges, rather than qualifying for hedge accounting, are also carried at fair value, with changes in value included in Principal transactions or Other revenue. Citigroup often uses economic hedges when qualifying for hedge accounting would be too complex or operationally burdensome; examples are hedges of the credit risk component of commercial loans and loan commitments. Citigroup periodically evaluates its hedging strategies in other areas and may designate
either a qualifying hedge or an economic hedge, after considering the relative cost and benefits. Economic hedges are also employed when the hedged item itself is marked-to-market through current earnings, such as hedges of commitments to originate one-to-four-family mortgage loans to be held-for-sale and mortgage servicing rights (MSRs).

For those hedge relationships that are terminated or when hedge designations are removed, the hedge accounting treatment described in the paragraphs above is no longer applied. Instead, the end-user derivative is terminated or transferred to the trading account. For fair value hedges, any changes in the fair value of the hedged item remain as part of the basis of the asset or liability and are ultimately reflected as an element of the yield. For cash flow hedges, any changes in fair value of the end-user derivative remain in Accumulated other comprehensive income (loss) and are included in earnings of future periods when the hedged cash flows impact earnings. However, if the hedged forecasted transaction is no longer likely to occur, any changes in fair value of the end-user derivative are immediately reflected in Other revenue.

Employee Benefits Expense

Employee benefits expense includes current service costs of pension and other postretirement benefit plans, which are accrued on a current basis, contributions and unrestricted awards under other employee plans, the amortization of restricted stock awards and costs of other employee benefits.

Stock-Based Compensation

The Company recognizes compensation expense related to stock and option awards over the requisite service period based on the instruments' grant date fair value, reduced by expected forfeitures. Compensation cost related to awards granted to employees who meet certain age plus years-of-service requirements (retirement eligible employees) is accrued in the year prior to the grant date, in the same manner as the accrual for cash incentive compensation.

Income Taxes

The Company is subject to the income tax laws of the U.S., its states and municipalities and those of the foreign jurisdictions in which the Company operates. These tax laws are complex and subject to different interpretations by the taxpayer and the relevant governmental taxing authorities. In establishing a provision for income tax expense, the Company must make judgments and interpretations about the application of these inherently complex tax laws. The Company must also make estimates about when in the future certain items will affect taxable income in the various tax jurisdictions, both domestic and foreign.

Disputes over interpretations of the tax laws may be subject to review/adjudication by the court systems of the various tax jurisdictions or may be settled with the taxing authority upon examination or audit.

The Company implemented FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes" (FIN 48) (now ASC 740, Income

Taxes), on January 1, 2007, which sets out a consistent framework to determine the appropriate level of tax reserves to maintain for uncertain tax positions. See "Accounting Changes."

The Company treats interest and penalties on income taxes as a component of Income tax expense.

Deferred taxes are recorded for the future consequences of events that have been recognized for financial statements or tax returns, based upon enacted tax laws and rates. Deferred tax assets are recognized subject to management's judgment that realization is more likely than not.

See Note 11 to the Consolidated Financial Statements for a further description of the Company's provision and related income tax assets and liabilities.

Commissions, Underwriting and Principal Transactions

Commissions, underwriting and principal transactions revenues and related expenses are recognized in income on a trade-date basis.

Earnings per Share

Earnings per share (EPS) is computed after deducting preferred-stock dividends. The Company has granted restricted and deferred share awards that are considered to be participating securities, which constitute a second class of common stock. Accordingly, a portion of Citigroup's earnings is allocated to the second class of common stock in the EPS calculation.

Basic earnings per share is computed by dividing income available to common stockholders after the allocation of dividends and undistributed earnings to the second class of common stock by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised. It is computed after giving consideration to the weighted average dilutive effect of the Company's stock options and warrants, convertible securities, T-DECs, and the shares that could have been issued under the Company's Management Committee Long-Term Incentive Plan and after the allocation of earnings to the second class of common stock.

Use of Estimates

Management must make estimates and assumptions that affect the Consolidated Financial Statements and the related footnote disclosures. Such estimates are used in connection with certain fair value measurements. See Note 26 to the Consolidated Financial Statements for further discussions on estimates used in the determination of fair value. The Company also uses estimates in determining consolidation decisions for special-purpose entities as discussed in Note 23. Moreover, estimates are significant in determining the amounts of other-than-temporary impairments, impairments of goodwill and other intangible assets, provisions for probable losses that may arise from credit-related exposures and probable and estimable losses related to litigation and regulatory proceedings, and tax reserves. While management makes its best judgment, actual amounts or results could differ from those estimates. Current market conditions increase the risk and complexity of the judgments in these estimates.

Cash Flows

Cash equivalents are defined as those amounts included in cash and due from banks. Cash flows from risk management activities are classified in the same category as the related assets and liabilities.

Related Party Transactions

The Company has related party transactions with certain of its subsidiaries and affiliates. These transactions, which are primarily short-term in nature, include cash accounts, collateralized financing transactions, margin accounts, derivative trading, charges for operational support and the borrowing and lending of funds, and are entered into in the ordinary course of business.

ACCOUNTING CHANGES

FASB Launches Accounting Standards Codification

The FASB has issued FASB Statement No. 168, The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles (now ASC 105, Generally Accepted Accounting Principles). The statement establishes the FASB Accounting Standards Codification™ (Codification or ASC) as the single source of authoritative U.S. generally accepted accounting principles (GAAP) recognized by the FASB to be applied by nongovernmental entities. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. The Codification supersedes all existing non-SEC accounting and reporting standards. All other nongrandfathered, non-SEC accounting literature not included in the Codification has become nonauthoritative.

Following the Codification, the Board will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates (ASU), which will serve to update the Codification, provide background information about the guidance and provide the basis for conclusions on the changes to the Codification.

GAAP is not intended to be changed as a result of the FASB's Codification project, but what does change is the way the guidance is organized and presented. As a result, these changes have a significant impact on how companies reference GAAP in their financial statements and in their accounting policies for financial statements issued for interim and annual periods ending after September 15, 2009.

Citigroup is providing references to the Codification topics alongside references to the predecessor standards.

Investments in Certain Entities that Calculate Net Asset Value per Share

As of December 31, 2009, the Company adopted Accounting Standards Update (ASU) No. 2009-12, Investments in Certain Entities that Calculate Net Asset Value per Share (or its Equivalent), which provides guidance on measuring the fair value of certain alternative investments. The ASU permits entities to use net asset value as a practical expedient to measure the fair value of their investments in certain investment funds. The ASU also requires additional disclosures regarding the nature and risks of such investments and provides guidance on the classification of such investments as Level 2 or Level 3 of the fair value hierarchy. This ASU did not have a material impact on the Company's accounting for its investments in alternative investment funds.

Interim Disclosures about Fair Value of Financial Instruments

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, (now ASC 825-10-50-10, Financial Instruments: Fair Value of Financial Instruments). This FSP requires disclosing qualitative and quantitative information about the fair value of all financial instruments on a quarterly basis, including methods and significant assumptions used to estimate fair value during the period. These disclosures were previously only done annually.

The disclosures required by this FSP were effective for the quarter ended June 30, 2009. This FSP has no effect on how Citigroup accounts for these instruments.

Measurement of Fair Value in Inactive Markets

In April 2009, the FASB issued FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (now ASC 820-10-35-51A, Fair Value Measurements and Disclosures: Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased). The FSP reaffirms that fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions. The FSP also reaffirms the need to use judgment in determining whether a formerly active market has become inactive and in determining fair values when the market has become inactive. The adoption of the FSP had no effect on the Company's Consolidated Financial Statements.

Determining Fair Value in Inactive Markets

In October 2008, the FASB issued FSP FAS 157-3, Determining Fair Value of Financial Assets When the Market for That Asset is Not Active (now ASC 820-10-35-55A, Fair Value Measurements and Disclosures: Financial Assets in a Market That is Not Active). The FSP clarifies that companies can use internal assumptions to determine the fair value of a financial asset when markets are inactive, and do not necessarily have to rely on broker quotes. The FSP confirms a joint statement by the FASB and the SEC in which they stated that companies can use internal assumptions when relevant market information does not exist and provides an example of how to determine the fair value for a financial asset in a non-active market. The FASB emphasized that the FSP is not new guidance, but rather clarifies the principles in ASC 820, Fair Value Measurements and Disclosures (formerly SFAS 157).

Revisions resulting from a change in the valuation technique or its application should be accounted for prospectively as a change in accounting estimate.

The FSP was effective upon issuance and did not have a material impact.

Measuring Liabilities at Fair Value

As of September 30, 2009, the Company adopted ASU No. 2009-05, Measuring Liabilities at Fair Value. This ASU provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more of the following techniques:

A valuation technique that uses quoted prices for similar liabilities (or an identical liability) when traded as assets.

Another valuation technique that is consistent with the principles of ASC 820. This ASU also clarifies that both a quoted price in an active market for the identical liability at the measurement date and the quoted price for the identical liability when traded as an asset in an active market when no adjustments to the quoted price of the asset are required, are Level 1 fair value measurements.

This ASU did not have a material impact on the Company's fair value measurements.

Other-Than-Temporary Impairments on Investment Securities

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments (FSP FAS 115-2) (now ASC 320-10-35-34, Investments—Debt and Equity Securities: Recognition of an Other-Than-Temporary Impairment), which amends the recognition guidance for other-than-temporary impairments (OTTI) of debt securities and expands the financial statement disclosures for OTTI on debt and equity securities. Citigroup adopted the FSP in the first quarter of 2009.

As a result of the FSP, the Company's Consolidated Statement of Income reflects the full impairment (that is, the difference between the security's amortized cost basis and fair value) on debt securities that the Company intends to sell or would more-likely-than-not be required to sell before the expected recovery of the amortized cost basis. For available-for- sale (AFS) and held-to-maturity (HTM) debt securities that management has no intent to sell and believes that it more-likely-than-not will not be required to sell prior to recovery, only the credit loss component of the impairment is recognized in earnings, while the rest of the fair value loss is recognized in Accumulated other comprehensive income (AOCI). The credit loss component recognized in earnings is identified as the amount of principal cash flows not expected to be received over the remaining term of the security as projected using the Company's cash flow projections and its base assumptions. As a result of the adoption of the FSP, Citigroup's income in the first quarter of 2009 was higher by $631 million on a pretax basis ($391 million on an after-tax basis), respectively, and AOCI was decreased by a corresponding amount.

The cumulative effect of the change included an increase in the opening balance of Retained earnings at January 1, 2009 of $665 million on a pretax basis ($413 million after-tax). See Note 16 to the Consolidated Financial Statements for disclosures related to the Company's investment securities and OTTI.

Business Combinations

In December 2007, the FASB issued Statement No. 141(revised), Business Combinations (now ASC 805-10, Business Combinations), which is designed to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its financial reports about a business combination and its effects. The statement retains the fundamental principle that the acquisition method of accounting (which was called the purchase method) be used for all business combinations and for an acquirer to be identified for each business combination. The statement also retains the guidance for identifying and recognizing intangible assets separately from goodwill. The most significant changes are: (1) acquisition costs and restructuring costs will now be expensed; (2) stock consideration will be measured based on the quoted market price as of the acquisition date instead of the date the deal is announced; (3) contingent consideration arising from contractual and noncontractual contingencies that meet the more-likely-than-not recognition threshold will be measured and recognized as an asset or liability at fair value at the acquisition date using a probability-weighted discounted cash flows model, with subsequent changes in fair value reflected in earnings; noncontractual contingencies that do not meet the more-likely-than-not criteria will continue to be recognized when they are probable and reasonably estimable; and (4) the acquirer will record a 100% step-up to fair value for all assets and liabilities, including the minority interest portion, and goodwill is recorded as if a 100% interest was acquired.

Citigroup adopted the standard on January 1, 2009, and it is applied prospectively.

Noncontrolling Interests in Subsidiaries

In December 2007, the FASB issued Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements (now ASC 810-10-45-15, Consolidation—Noncontrolling Interests in a Subsidiary), which establishes standards for the accounting and reporting of noncontrolling interests in subsidiaries (previously called minority interests) in consolidated financial statements and for the loss of control of subsidiaries. The Standard requires that the equity interest of noncontrolling shareholders, partners, or other equity holders in subsidiaries be presented as a separate item in Citigroup's stockholders' equity, rather than as a liability. After the initial adoption, when a subsidiary is deconsolidated, any retained noncontrolling equity investment in the former subsidiary must be measured at fair value at the date of deconsolidation.

The gain or loss on the deconsolidation of the subsidiary is measured using the fair value of the remaining investment, rather than the previous carrying amount of that retained investment.

Citigroup adopted the Standard on January 1, 2009. As a result, $2.392 billion of noncontrolling interests was reclassified from Other liabilities to Citigroup'sstockholders' equity.

Sale with Repurchase Financing Agreements

In February 2008, the FASB issued FASB Staff Position (FSP) FAS 140-3, Accounting for Transfers of Financial Assets and Repurchase Financing Transactions (now ASC 860-10-40-42, Transfers and Servicing: Repurchase Financing). This FSP provides implementation guidance on whether a security transfer with a contemporaneous repurchase financing involving the transferred financial asset must be evaluated as one linked transaction or two separate de-linked transactions.

The FSP requires the recognition of the transfer and the repurchase agreement as one linked transaction, unless all of the following criteria are met: (1) the initial transfer and the repurchase financing are not contractually contingent on one another; (2) the initial transferor has full recourse upon default, and the repurchase agreement's price is fixed and not at fair value; (3) the financial asset is readily obtainable in the marketplace and the transfer and repurchase financing are executed at market rates; and (4) the maturity of the repurchase financing is before the maturity of the financial asset. The scope of this FSP is limited to transfers and subsequent repurchase financings that are entered into contemporaneously or in contemplation of one another.

Citigroup adopted the FSP on January 1, 2009. The impact of adopting this FSP was not material.

Enhanced Disclosures of Credit Derivative Instruments and Guarantees

In September 2008, the FASB issued FSP FAS 133-1 and FIN 45-4, "Disclosures About Credit Derivatives and Certain Guarantees: An Amendment of FASB Statement No. 133 and FASB Interpretation No. 45, and Clarification of the Effective Date of FASB Statement No. 161" (now ASC 815-10-50-4K, Derivatives and Hedging: Credit Derivatives) which requires additional disclosures for sellers of credit derivative instruments and certain guarantees. This FSP requires the disclosure of the maximum potential amount of future payments, the related fair value, and the current status of the payment/performance risk for certain guarantees and credit derivatives sold.

Measurement of Impairment for Certain Securities

In January 2009, the FASB issued FSP EITF 99-20-1, "Amendments to the Impairment Guidance of EITF Issue 99-20" (now incorporated into ASC 320-10-35-20, Investments—Debt and Equity Securities: Steps for Identifying and Accounting for Impairment), to achieve more consistent determination of whether other-than-temporary impairments of available-for-sale or held-to-maturity debt securities have occurred.

Prior guidance required entities to assess whether it was probable that the holder would be unable to collect all amounts due according to the contractual terms. The FSP eliminates the requirement to consider market participants' views of cash flows of a security in determining whether or not impairment has occurred.

The FSP is effective for interim and annual reporting periods ending after December 15, 2008 and is applied prospectively. The impact of adopting this FSP was not material.

SEC Staff Guidance on Loan Commitments Recorded at Fair Value Through Earnings

On January 1, 2008, the Company adopted Staff Accounting Bulletin No. 109 (SAB 109), which requires that the fair value of a written loan commitment that is marked-to-market through earnings should include the future cash flows related to the loan's servicing rights. However, the fair value measurement of a written loan commitment still must exclude the expected net cash flows related to internally developed intangible assets (such as customer relationship intangible assets). SAB 109 applies to two types of loan commitments: (1) written mortgage loan commitments for loans that will be held-for-sale when funded and are marked-to-market as derivatives; and (2) other written loan commitments that are accounted for at fair value through earnings under the fair value option. SAB 109 supersedes SAB 105, which applied only to derivative loan commitments and allowed the expected future cash flows related to the associated servicing of the loan to be recognized only after the servicing asset had been contractually separated from the underlying loan by sale or securitization of the loan with servicing retained. SAB 109 was applied prospectively to loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The impact of adopting this SAB was not material.

Netting of Cash Collateral Against Derivative Exposures

During April 2007, the FASB issued FSP FIN 39-1, "Amendment of FASB Interpretation No. 39" (now incorporated into ASC 815-10-45, Derivatives and Hedging—Other Presentation Matters) modifying certain provisions of FIN 39, "Offsetting of Amounts Related to Certain Contracts." This amendment clarified the acceptability of the existing market practice of offsetting the amounts recorded for cash collateral receivables or payables against the fair value amounts recognized for net derivative positions executed with the same counterparty under the same master netting agreement, which was the Company's prior accounting practice. Thus, this amendment did not affect the Company's consolidated financial statements.

Fair Value Measurements

The Company elected to early adopt SFAS No. 157, Fair Value Measurements (SFAS 157) (now ASC 820-10, Fair Value Measurements and Disclosures), as of January 1, 2007. The Statement defines fair value, expands disclosure requirements around fair value and specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs create the following fair value hierarchy:

- Level 1: Quoted prices for identical instruments in active markets.
- Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3: Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value. For some products or in certain market conditions, observable inputs may not always be available. For example, during the market dislocations that started in the second half of 2007, certain markets became illiquid, and some key observable inputs used in valuing certain exposures were unavailable. When and if these markets become liquid, the valuation of these exposures will use the related observable inputs available at that time from these markets.

Citigroup is required to take into account its own credit risk when measuring the fair value of derivative positions as well as the other liabilities for which fair value accounting has been elected. The adoption of ASC 820 also resulted in some other changes to the valuation techniques used by Citigroup when determining fair value, most notably the changes to the way that the probability of default of a counterparty is factored in and the elimination of a derivative valuation adjustment which is no longer necessary. The cumulative effect at January 1, 2007 of making these changes was a gain of $250 million after-tax ($402 million pretax), or $0.05 per diluted share, which was recorded in the first quarter of 2007 earnings within the Securities and Banking business.

The statement also precludes the use of block discounts for instruments traded in an active market, which were previously applied to large holdings of publicly traded equity securities, and requires the recognition of trade-date gains after consideration of all appropriate valuation adjustments related to certain derivative trades that use unobservable inputs in determining their fair value. Previous accounting guidance allowed the use of block discounts in certain circumstances and prohibited the recognition of day-one gains on certain derivative trades when determining the fair value of instruments not traded in an active market. The cumulative effect of these changes resulted in an increase to January 1, 2007 Retained earnings of $75 million.

Fair Value Option

The Company also early adopted SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159) (now ASC 825-10-05, Financial Instruments: Fair Value Option) as of January 1, 2007. The fair value option provides an option on an instrument-by-instrument basis for most financial assets and liabilities to be reported at fair value with changes in fair value reported in earnings. After the initial adoption, the election is made at the acquisition of a financial asset, a financial liability, or a firm commitment and it may not be revoked. The fair value option provides an opportunity to mitigate volatility in reported earnings that resulted prior to its adoption from being required to apply fair value accounting to certain economic hedges (e.g., derivatives) while having to measure the assets and liabilities being economically hedged using an accounting method other than fair value.

The Company elected to apply fair value accounting to certain financial instruments held at January 1, 2007 with future changes in value reported in earnings. The adoption of the fair value option resulted in a decrease to January 1, 2007 Retained earnings of $99 million.

Leveraged Leases

On January 1, 2007, the Company adopted FSP FAS 13-2, Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leverage Lease Transaction (FSP 13-2) (now incorporated into ASC 840-10-25, Leases), which provides guidance regarding changes or projected changes in the timing of cash flows relating to income taxes generated by a leveraged-lease transaction.

Leveraged leases can provide significant tax benefits to the lessor, primarily as a result of the timing of tax payments. Since changes in the timing and/or amount of these tax benefits may have a significant effect on the cash flows of a lease transaction, a lessor will be required to perform a recalculation of a leveraged-lease when there is a change or projected change in the timing of the realization of tax benefits generated by that lease. Previously, Citigroup did not recalculate the tax benefits if only the timing of cash flows had changed.

The adoption of FSP 13-2 resulted in a decrease to January 1, 2007 Retained earnings of $148 million. This decrease to retained earnings will be recognized in earnings over the remaining lives of the leases as tax benefits are realized.

Revisions to the Earnings-per-Share Calculation

In June 2008, the FASB issued FSP EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions are Participating Securities" (now incorporated into ASC 260-10-45-59A, Earnings Per Share: Participating Securities and the Two-Class Method). Under the FSP, unvested share-based payment awards that contain nonforfeitable rights to dividends are considered to be a separate class of common stock and included in the EPS calculation using the "two-class method." Citigroup's restricted and deferred share awards meet the definition of a participating security. In accordance with the FSP, restricted and deferred shares are now included as a separate class of common stock in the basic and diluted EPS calculation.

The following table shows the effect of adopting the FSP on Citigroup's basic and diluted EPS:

	2009	2008	2007
Basic earnings per share			
As reported	N/A	$(5.59)	$0.73
Two-class method	$(0.80)	$(5.63)	$0.68
Diluted earnings per share (1)			
As reported	N/A	$(5.59)	$0.72
Two-class method	(0.80)	$(5.63)	$0.67

(1) Diluted EPS is the same as Basic EPS in 2009 and 2008 due to the net loss available to common shareholders. Using actual diluted shares would result in anti-dilution.

N/A Not applicable

Fair Value Disclosures About Pension Plan Assets

In December 2008, the FASB issued FSP FAS 132(R)-1, Employers' Disclosures about Pensions and Other Postretirement Benefit Plan Assets (now incorporated into ASC 715-20-50, Compensation and Benefits—Disclosure). This FSP requires that more detailed information about plan assets be disclosed on an annual basis. Citigroup is required to separate plan assets into the three fair value hierarchy levels and provide a roll-forward of the changes in fair value of plan assets classified as Level 3.

The disclosures about plan assets required by this FSP are effective for fiscal years ending after December 15, 2009, but have no effect on the Consolidated Balance Sheet or Statement of Income.

Additional Disclosures for Derivative Instruments

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities, an Amendment to SFAS 133 (now incorporated into ASC 815-10-50, Derivatives and Hedging—Disclosure). The Standard requires enhanced disclosures about derivative instruments and hedged items that are accounted for under ASC 815 related interpretations. The Standard is effective for all of the Company's interim and annual financial statements beginning with the first quarter of 2009. The Standard expands the disclosure requirements for derivatives and hedged items and has no impact on how Citigroup accounts for these instruments.

Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock

Derivative contracts on a company's own stock may be accounted for as equity instruments, rather than as assets and liabilities, only if they are both indexed solely to the company's stock and settleable in shares.

In June 2008, the FASB ratified the consensus reached by the EITF on Issue 07-5, "Determining Whether an Instrument (or Embedded Feature) Is Indexed to an Entity's Own Stock" (Issue 07-5) (now ASC 815-40-15-5, Derivatives and Hedging: Evaluating Whether an Instrument is Considered Indexed to an Entity's Own Stock). An instrument (or embedded feature) would not be considered indexed to an entity's own stock if its settlement amount is affected by variables other than those used to determine the fair value of a "plain vanilla" option or forward contract on equity shares, or if the instrument contains a feature (such as a leverage factor) that increases exposure to those variables. An equity-linked financial instrument (or embedded feature) would not be considered indexed to the entity's own stock if the strike price is denominated in a currency other than the issuer's functional currency.

This issue is effective for Citigroup on January 1, 2009 and did not have a material impact.

Equity Method Investment Accounting Considerations

In November 2008, the FASB ratified the consensus reached by the EITF on Issue 08-6, "Equity Method Investment Accounting Considerations" (Issue 08-6) (now ASC 323-10, Investments—Equity Method and Joint Ventures). An entity shall measure its equity method investment initially at cost. Any other-than-temporary impairment of an equity method investment should be recognized in accordance with Opinion 18. An equity method investor shall not separately test an investee's underlying assets for impairment. Share issuance by an investee shall be accounted for as if the equity method investor had sold a proportionate share of its investment, with gain or loss recognized in earnings.

This issue is effective for Citigroup on January 1, 2009, and did not have a material impact.

Accounting for Defensive Intangible Assets

In November 2008, the FASB ratified the consensus reached by the EITF on Issue 08-7, "Accounting for Defensive Intangible Assets" (Issue 08-7) (now ASC 350-30-25-5, Intangibles — Goodwill and Other: Defensive Intangible Assets). An acquired defensive asset shall be accounted for as a separate unit of accounting (i.e., an asset separate from other assets of the acquirer). The useful life assigned to an acquired defensive asset shall be based on the period during which the asset would diminish in value. Issue 08-7 states that it would be rare for a defensive intangible asset to have an indefinite life. Issue 08-7 is effective for Citigroup on January 1, 2009, and did not have a material impact.

CVA Accounting Misstatement

The Company determined that an error existed in the process used to value certain liabilities for which the Company elected the fair value option (FVO). The error related to a calculation intended to measure the impact on the liability's fair value attributable to Citigroup's credit spreads. Because of the error in the process, both an initial Citi contractual credit spread and an initial own-credit valuation adjustment were being included at the time of issuance of new Citi FVO debt. The own-credit valuation adjustment was properly included; therefore, the initial Citi contractual credit spread should have been excluded. (See Note 27 for a description of own-credit valuation adjustments.) The cumulative effect of this error from January 1, 2007 (the date that FAS 157 (ASC 820), requiring the valuation of own-credit for FVO liabilities, was adopted) through December 31, 2008 was to overstate income and retained earnings by $204 million ($330 million on a pretax basis). The impact of this adjustment was determined not to be material to the Company's results of operations and financial position for any previously reported period. Consequently, in the accompanying financial statements, the cumulative effect through December 31, 2008 is recorded in 2009.

The table below summarizes the previously reported impact of CVA income for debt on which the FVO was elected and the related adjustments to correct the process error for the impacted reporting periods.

In millions of dollars	2008	2007
Pretax gain (loss) from the change in the CVA reserve on FVO debt that would have been recorded in the income statement:		
Previously reported	$4,558	$ 888
Corrected amount adjusted for removal of the error	4,352	764
Difference	$ 206	$ 124

In millions of dollars	2008	2007
Year-end CVA reserve reported as a contra-liability on FVO debt:		
Previously reported	$5,446	$ 888
Corrected amount adjusted for removal of the error	5,116	764
Difference	$ 330	$ 124

See also Note 34 to the Consolidated Financial Statements.

FUTURE APPLICATION OF ACCOUNTING STANDARDS

Additional Disclosures Regarding Fair Value Measurements

In January 2010, the FASB issued ASU 2010-06, Improving Disclosures about Fair Value Measurements. The ASU requires disclosing the amounts of significant transfers in and out of Level 1 and 2 fair value measurements and to describe the reasons for the transfers. The disclosures are effective for reporting periods beginning after December 15, 2009. Additionally, disclosures of the gross purchases, sales, issuances and settlements activity in Level 3 fair value measurements will be required for fiscal years beginning after December 15, 2010.

Elimination of QSPEs and Changes in the Consolidation Model for Variable Interest Entities

In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140 (SFAS 166), that will eliminate Qualifying Special Purpose Entities (QSPEs). SFAS 166 is effective for fiscal years that begin after November 15, 2009. This change will have a significant impact on Citigroup's Consolidated Financial Statements. Beginning January 1, 2010, the Company will lose sales treatment for certain future asset transfers that would have been considered sales under SFAS 140, and for certain transfers of portions of assets that do not meet the definition of participating interests.

Simultaneously, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (SFAS 167), which details three key changes to the consolidation model. First, former QSPEs will now be included in the scope of SFAS 167. In addition, the FASB has changed the method of analyzing which party to a variable interest entity (VIE) should consolidate the VIE (known as the primary beneficiary) to a qualitative determination of which party to the VIE has "power" combined with potentially significant benefits or losses, instead of the current quantitative risks and rewards model. The entity that has power has the ability to direct the activities of the VIE that most significantly impact the VIE's economic performance. Finally, the new standard requires that the primary beneficiary analysis be re-evaluated whenever circumstances change. The current rules require reconsideration of the primary beneficiary only when specified reconsideration events occur.

As a result of implementing these new accounting standards, Citigroup will consolidate certain of the VIEs and former QSPEs with which it currently has involvement. An ongoing evaluation of the application of these new requirements could, with the resolution of certain uncertainties, result in the identification of additional VIEs and former QSPEs, other than those presented below, needing to be consolidated. It is not currently anticipated, however, that any such newly identified VIEs and former QSPEs would have a significant impact on Citigroup's Consolidated Financial Statements or capital position.

In accordance with SFAS 167, Citigroup employed three approaches for consolidating all of the VIEs and former QSPEs that it consolidated as of January 1, 2010. The first approach requires initially measuring the assets, liabilities, and noncontrolling interests of the VIEs and former QSPEs at their carrying values (the amounts at which the assets, liabilities, and noncontrolling interests would have been carried in the Consolidated
Financial Statements, if Citigroup had always consolidated these VIEs and former QSPEs). The second approach is to use the unpaid principal amounts, where using carrying values is not practicable. The third approach is to elect the fair value option, in which all of the financial assets and liabilities of certain designated VIEs and former QSPEs would be recorded at fair value upon adoption of SFAS 167 and continue to be marked to market thereafter, with changes in fair value reported in earnings.

Citigroup consolidated all required VIEs and former QSPEs, as of January 1, 2010 at carrying values or unpaid principal amounts, except for certain private label residential mortgage and mutual fund deferred sales commissions VIEs, for which the fair value option was elected. The following tables present the pro forma impact of adopting these new accounting standards applying these approaches.

The pro forma impact of these changes on incremental GAAP assets and resulting risk-weighted assets for those VIEs and former QSPEs that were consolidated or deconsolidated for accounting purposes as of January 1, 2010 (based on financial information as of December 31, 2009), reflecting Citigroup's present understanding of the new accounting requirements and immediate implementation of the recently issued final risk-based capital rules regarding SFAS 166 and SFAS 167, was as follows:

In billions of dollars	GAAP assets	Incremental Risk-weighted assets (1)
Impact of consolidation		
Credit cards	$ 86.3	$ 0.8
Commercial paper conduits	28.3	13.0
Student loans	13.6	3.7
Private label consumer mortgages	4.4	1.3
Municipal tender option bonds	0.6	0.1
Collateralized loan obligations	0.5	0.5
Mutual fund deferred sales commissions	0.5	0.5
Subtotal	$ 134.2	$ 19.9
Impact of deconsolidation		
Collateralized debt obligations (2)	$ 1.9	$ 3.6
Equity-linked notes (3)	1.2	0.5
Total	$ 137.3	$ 24.0

(1) Citigroup undertook certain actions during the first and second quarters of 2009 in support of its off-balance-sheet credit card securitization vehicles. As a result of these actions, Citigroup included approximately $82 billion of incremental risk-weighted assets in its risk-based capital ratios as of March 31, 2009 and an additional approximate $900 million as of June 30, 2009. See Note 23 to the Consolidated Financial Statements.

(2) The implementation of SFAS 167 will result in the deconsolidation of certain synthetic and cash collateralized debt obligation (CDO) VIEs that were previously consolidated under the requirements of ASC 810 (FIN 46(R)). Upon deconsolidation of these synthetic CDOs, Citigroup's Consolidated Balance Sheet will reflect the recognition of current receivables and payables related to purchased and written credit default swaps entered into with these VIEs, which had previously been eliminated in consolidation. The deconsolidation of certain cash CDOs will have a minimal impact on GAAP assets, but will cause a sizable increase in risk-weighted assets. The impact on risk-weighted assets results from replacing, in Citigroup's trading account, largely investment grade securities owned by these VIEs when consolidated, with Citigroup's holdings of non-investment grade or unrated securities issued by these VIEs when deconsolidated.

(3) Certain equity-linked note client intermediation transactions that had previously been consolidated under the requirements of ASC 810 (FIN 46 (R)) will be deconsolidated with the implementation of SFAS 167. Upon deconsolidation, Citigroup's Consolidated Balance Sheet will reflect both the equity-linked notes issued by the VIEs and held by Citigroup as trading assets, as well as related trading liabilities in the form of prepaid equity derivatives. These trading assets and trading liabilities were formerly eliminated in consolidation.

The preceding table reflects: (i) the estimated portion of the assets of former QSPEs to which Citigroup, acting as principal, had transferred assets and received sales treatment as of December 31, 2009 (totaling approximately $712.0 billion), and (ii) the estimated assets of significant unconsolidated VIEs as of December 31, 2009 with which Citigroup is involved (totaling approximately $219.2 billion) that are required to be consolidated under the new accounting standards. Due to the variety of transaction structures and the level of Citigroup involvement in individual former QSPEs and VIEs, only a portion of the former QSPEs and VIEs with which the Company is involved are to be consolidated.

In addition, the cumulative effect of adopting these new accounting standards as of January 1, 2010, based on financial information as of December 31, 2009, would result in an estimated aggregate after-tax charge to Retained earnings of approximately $8.3 billion, reflecting the net effect of an overall pretax charge to Retained earnings (primarily relating to the establishment of loan loss reserves and the reversal of residual interests held) of approximately $13.4 billion and the recognition of related deferred tax assets amounting to approximately $5.1 billion.

The pro forma impact on certain of Citigroup's regulatory capital ratios of adopting these new accounting standards (based on financial information as of December 31, 2009), reflecting immediate implementation of the recently issued final risk-based capital rules regarding SFAS 166 and SFAS 167, would be as follows:

	As of December 31, 2009		
	As reported	Pro forma	Impact
Tier 1 Capital	11.67%	10.26%	(141) bps
Total Capital	15.25%	13.82%	(143) bps

The actual impact of adopting the new accounting standards on January 1, 2010 could differ, as financial information changes from the December 31, 2009 estimates and as several uncertainties in the application of these new standards are resolved.

Among these uncertainties, the FASB has proposed an indefinite deferral of the requirements of SFAS 167 for certain investment companies. Without the proposed deferral, the Company had most recently estimated that approximately $3.3 billion of assets held by investment funds managed by Citigroup would be newly consolidated upon the adoption of SFAS 167. If the proposed deferral were to be finalized as currently contemplated, the Company expects that many, if not all, of the investment vehicles managed by Citigroup would not be subject to the requirements of SFAS 167. Nevertheless, Citigroup is continuing to evaluate the potential impacts of the proposed requirements and, depending upon the eventual resolution of specific implementation matters, may be required to consolidate certain investment vehicles, the aggregate assets of which could range up to a total of approximately $1.2 billion. The effect on the Company's regulatory capital ratios, should consolidation of any or all such noted investment vehicles be required, is not expected to be significant. The preceding tables reflect the Company's view that none of the investment vehicles managed by Citigroup will be required to be consolidated under SFAS 167.

Loss-Contingency Disclosures

In June 2008, the FASB issued an exposure draft proposing expanded disclosures regarding loss contingencies. This proposal increases the number of loss contingencies subject to disclosure and requires substantial quantitative and qualitative information to be provided about those loss contingencies. The proposal will have no impact on the Company's accounting for loss contingencies.

Investment Company Audit Guide (SOP 07-1)

In July 2007, the AICPA issued Statement of Position 07-1, "Clarification of the Scope of the Audit and Accounting Guide for Investment Companies and Accounting by Parent Companies and Equity Method Investors for Investments in Investment Companies" (SOP 07-1) (now incorporated into ASC 946-10, Financial Services-Investment Companies), which was expected to be effective for fiscal years beginning on or after December 15, 2007. However, in February 2008, the FASB delayed the effective date indefinitely by issuing an FSP SOP 07-1-1, "Effective Date of AICPA Statement of Position 07-1." This statement sets forth more stringent criteria for qualifying as an investment company than does the predecessor Audit Guide. In addition, ASC 946-10 (SOP 07-1) establishes new criteria for a parent company or equity method investor to retain investment company accounting in their consolidated financial statements. Investment companies record all their investments at fair value with changes in value reflected in earnings. The Company is currently evaluating the potential impact of adopting the SOP.

2. BUSINESS DEVELOPMENTS

ACQUISITIONS

North America

Acquisition of ABN AMRO Mortgage Group

In 2007, Citigroup acquired ABN AMRO Mortgage Group (AAMG), a subsidiary of LaSalle Bank Corporation and ABN AMRO Bank N.V. AAMG is a national originator and servicer of prime residential mortgage loans. As part of this acquisition, Citigroup purchased approximately $12 billion in assets, including $3 billion of mortgage servicing rights, which resulted in the addition of approximately 1.5 million servicing customers. Results for AAMG are included within Citigroup'sNorth America Regional Consumer Banking business from March 1, 2007 forward.

Acquisition of Old Lane Partners, L.P.

In 2007, the Company completed the acquisition of Old Lane Partners, L.P. and Old Lane Partners, GP, LLC (Old Lane). Old Lane is the manager of a global, multistrategy hedge fund and a private equity fund. Results for Old Lane are included within ICG, from July 2, 2007 forward.

On June 12, 2008, Citigroup announced the restructuring of Old Lane and its multistrategy hedge fund (the "Fund") in anticipation of redemptions by all unaffiliated, non-Citigroup employee investors. To accomplish this restructuring, Citigroup purchased substantially all of the assets of the Fund at fair value on June 30, 2008. The fair value of assets purchased from the Fund was approximately $6 billion at June 30, 2008.

Acquisition of BISYS

In 2007, the Company completed its acquisition of BISYS Group, Inc. (BISYS) for $1.47 billion in cash. In addition, BISYS's shareholders received $18.2 million in the form of a special dividend paid by BISYS simultaneously. Citigroup completed the sale of the Retirement and Insurance Services Divisions of BISYS to affiliates of J.C. Flowers & Co. LLC, making the net cost of the transaction to Citigroup approximately $800 million. Citigroup retained the Fund Services and Alternative Investment Services businesses of BISYS, which provides administrative services for hedge funds, mutual funds and private equity funds. Results for BISYS are included within Transaction Services business from August 1, 2007 forward.

Acquisition of Automated Trading Desk

In 2007, Citigroup completed its acquisition of Automated Trading Desk (ATD), a leader in electronic market making and proprietary trading, for approximately $680 million ($102.6 million in cash and approximately 11.17 million shares of Citigroup common stock). ATD operates as a unit of Citigroup's Global Equities business, adding a network of broker-dealer customers to Citigroup's diverse base of institutional, broker-dealer and retail customers. Results for ATD are included within Citigroup'sSecurities and Banking business from October 3, 2007 forward.

Latin America

Acquisition of Grupo Financiero Uno

In 2007, Citigroup completed its acquisition of Grupo Financiero Uno (GFU), the largest credit card issuer in Central America, and its affiliates.

The acquisition of GFU, with $2.2 billion in assets, expands the presence of Citigroup'sLatin America Consumer Banking franchise, enhances its credit card business in the region and establishes a platform for regional growth in Consumer Finance and Retail Banking. GFU has more than one million retail clients and operates a distribution network of 75 branches and more than 100 mini-branches and points of sale. The results for GFU are included within Citigroup'sLatin America Regional Consumer Banking businesses from March 5, 2007 forward.

Acquisition of Grupo Cuscatlán

In 2007, Citigroup completed the acquisition of the subsidiaries of Grupo Cuscatlán for $1.51 billion ($755 million in cash and 14.2 million shares of Citigroup common stock) from Corporacion UBC Internacional S.A. Grupo Cuscatlán is one of the leading financial groups in Central America, with assets of $5.4 billion, loans of $3.5 billion, and deposits of $3.4 billion. Grupo Cuscatlán has operations in El Salvador, Guatemala, Costa Rica, Honduras and Panama. The results of Grupo Cuscatlán are included from May 11, 2007 forward and are recorded in Latin America Regional Consumer Banking.

Agreement to Establish Partnership with Quiñenco—Banco de Chile

In 2007, Citigroup and Quiñenco entered into a definitive agreement to establish a strategic partnership that combined Citigroup operations in Chile with Banco de Chile's local banking franchise to create a banking and financial services institution with approximately 20% market share of the Chilean banking industry. The transaction closed on January 1, 2008.

Under the agreement, Citigroup sold its Chilean operations and other assets in exchange for an approximate 32.96% stake in LQIF, a wholly owned subsidiary of Quiñenco that controls Banco de Chile, and is accounted for under the equity method of accounting. As part of the overall transaction, Citigroup also acquired the U.S. branches of Banco de Chile for approximately $130 million. The new partnership calls for active participation by Citigroup in the management of Banco de Chile including board representation at both LQIF and Banco de Chile.

On January 31, 2010 Citigroup elected to exercise its option to acquire approximately 8.5% of LQIF for approximately $500 million. The acquisition of the additional shares is expected to close on April 30, 2010 and will increase Citigroup's ownership in LQIF to approximately 41.5%. Citigroup retains an option to increase its ownership by an additional 8.5% of LQIF in 2010 for an additional $500 million.

Asia

Acquisition of Bank of Overseas Chinese

In 2007, Citigroup completed its acquisition of Bank of Overseas Chinese (BOOC) in Taiwan for approximately $427 million. BOOC offers a broad suite of corporate banking, consumer and wealth management products and services to more than one million clients through 55 branches in Taiwan. This transaction will strengthen Citigroup's presence in Asia, making it the largest international bank and thirteenth largest by total assets among all domestic Taiwan banks. Results for BOOC are included in Citigroup'sAsia Regional Consumer Banking and Securities and Banking businesses from December 1, 2007 forward.

EMEA

Acquisition of Egg

In 2007, Citigroup completed its acquisition of Egg Banking plc (Egg), one of the U.K.'s leading online financial services providers, from Prudential PLC for approximately $1.39 billion. Egg offers various financial products and services including online payment and account aggregation services, credit cards, personal loans, savings accounts, mortgages, insurance and investments. Results for Egg are included in Citi Holdings' LCL business from May 1, 2007 forward.

Purchase of 20% Equity Interest in Akbank

In 2007, Citigroup completed its purchase of a 20% equity interest in Akbank for approximately $3.1 billion, accounted for under the equity method of accounting. Akbank, the second-largest privately owned bank by assets in Turkey, is a premier, full-service retail, commercial, corporate and private bank.

Sabanci Holding, a 34% owner of Akbank shares, and its subsidiaries have granted Citigroup a right of first refusal or first offer over the sale of any of their Akbank shares in the future. Subject to certain exceptions, including purchases from Sabanci Holding and its subsidiaries, Citigroup has otherwise agreed not to increase its percentage ownership in Akbank.

DIVESTITURES

The following divestitures occurred in 2008 and 2009 and do not qualify as Discontinued operations:

Sale of Phibro LLC

On December 31, 2009 the Company sold 100% of its interest in Phibro LLC to Occidental Petroleum Corporation for a purchase price equal to approximately the net asset value of the business.

The decision to sell Phibro was the outcome of an evaluation of a variety of alternatives and is consistent with Citi's core strategy of a client-centered business model. The sale of Phibro does not affect Citi's client-facing commodities business lines, which will continue to operate and serve the needs of Citi's clients throughout the world.

Sale of Citi's Nikko Asset Management Business
and Trust and Banking Corporation

On October 1, 2009 the Company completed the sale of its entire stake in Nikko Asset Management ("Nikko AM") to the Sumitomo Trust and Banking Co., Ltd. ("Sumitomo Trust") and completed the sale of Nikko Citi Trust and Banking Corporation to Nomura Trust & Banking Co. Ltd.

The Nikko AM transaction was valued at 120 billion yen (U.S. $1.3 billion at an exchange rate of 89.60 yen to U.S. $1.00 as of September 30, 2009). The Company received all-cash consideration of 75.6 billion yen (U.S. $844 million), after certain deal related expenses and adjustments, for its 64% beneficial ownership interest in Nikko AM. Sumitomo Trust also acquired the beneficial ownership interests in Nikko AM held by various minority investors in Nikko AM, bringing Sumitomo Trust's total ownership stake in Nikko AM to 98.55% at closing.

For the sale of Nikko Citi Trust and Banking Corporation, the Company received all-cash consideration of 19 billion yen (U.S. $212 million at an exchange rate of 89.60 yen to U.S. $1.00 as of September 30, 2009) as part of the transaction, subject to certain post-closing purchase price adjustments.

Retail Partner Cards Sales

During 2009, Citigroup sold its Financial Institutions (FI) and Diners Club North America credit card businesses. Each of these businesses are reflected in Local Consumer Lending. Total credit card receivables disposed of in these transactions was approximately $2.2 billion.

Joint Venture with Morgan Stanley

On June 1, 2009, Citi and Morgan Stanley established a joint venture (JV) that combines the Global Wealth Management platform of Morgan Stanley with Citigroup’s Smith Barney, Quilter and Australia private client networks. Citi sold 100% of these businesses to Morgan Stanley in exchange for a 49% stake in the JV and an upfront cash payment of $2.75 billion. The Brokerage and Asset Management business recorded a pretax gain of approximately $11.1 billion ($6.7 billion after-tax) on this sale. Both Morgan Stanley and Citi will access the JV for retail distribution, and each firm's institutional businesses will continue to execute order flow from the JV.

Citigroup’s 49% ownership in the JV is recorded as an equity method investment. In determining the value of its 49% interest in the JV, Citigroup utilized the assistance of an independent third-party valuation firm and utilized both the income and the market approaches.

Sale of Citigroup Technology Services Limited

On December 23, 2008, Citigroup announced an agreement with Wipro Limited to sell all of Citigroup’s interest in Citi Technology Services Ltd. (CTS), Citigroup’s India-based captive provider of technology infrastructure support and application development, for all-cash consideration of approximately $127 million. A substantial portion of the proceeds from this sale will be recognized over the period in which Citigroup has a service contract with Wipro Limited. This transaction closed on January 20, 2009 and a loss of approximately $7 million was booked at that time.

Sale of Upromise Cards Portfolio

During 2008, the Company sold substantially all of the Upromise Cards portfolio to Bank of America for an after-tax gain of $127 million ($201 million pretax). The portfolio sold had balances of approximately $1.2 billion of credit card receivables. This transaction is reflected in the North America Regional Consumer Banking business results.

Sale of CitiStreet

On July 1, 2008, Citigroup and State Street Corporation completed the sale of CitiStreet, a benefits servicing business, to ING Group in an all-cash transaction valued at $900 million. CitiStreet is a joint venture formed in 2000 that, prior to the sale, was owned 50% each by Citigroup and State Street. The transaction closed on July 1, 2008, and generated an after-tax gain of $222 million ($347 million pretax).

Divestiture of Diners Club International

On June 30, 2008, Citigroup completed the sale of Diners Club International (DCI) to Discover Financial Services, resulting in an after-tax gain of approximately $56 million ($111 million pretax).

Citigroup will continue to issue Diners Club cards and support its brand and products through ownership of its many Diners Club card issuers around the world.

Sale of Citigroup Global Services Limited

In 2008, Citigroup sold all of its interest in Citigroup Global Services Limited (CGSL) to Tata Consultancy Services Limited (TCS) for all-cash consideration of approximately $515 million, resulting in an after-tax gain of $192 million ($263 million pretax). CGSL was the Citigroup captive provider of business process outsourcing services solely within the Banking and Financial Services sector.

In addition to the sale, Citigroup signed an agreement with TCS for TCS to provide, through CGSL, process outsourcing services to Citigroup and its affiliates in an aggregate amount of $2.5 billion over a period of 9.5 years.

3. DISCONTINUED OPERATIONS

Sale of Nikko Cordial

On October 1, 2009 the Company announced the successful completion of the sale of Nikko Cordial Securities to Sumitomo Mitsui Banking Corporation. The transaction had a total cash value to Citi of 776 billion yen (U.S. $8.7 billion at an exchange rate of 89.60 yen to U.S. $1.00 as of September 30, 2009). The cash value is composed of the purchase price for the transferred business of 545 billion yen, the purchase price for certain Japanese-listed equity securities held by Nikko Cordial Securities of 30 billion yen, and 201 billion yen of excess cash derived through the repayment of outstanding indebtedness to Citi. After considering the impact of foreign exchange hedges of the proceeds of the transaction, the sale resulted an immaterial gain in 2009. A total of about 7,800 employees are included in the transaction.

The Nikko Cordial operations had total assets and total liabilities of approximately $24 billion and $16 billion, respectively, at the time of sale, which were reflected in Citi Holdings prior to the sale.

Results for all of the Nikko Cordial businesses sold are reported as Discontinued operations for all periods presented.

Summarized financial information for Discontinued operations, including cash flows, related to the sale of Nikko Cordial is as follows:

In millions of dollars	2009	2008	2007
Total revenues, net of interest expense	$ 646	$ 1,194	$ 1,195
Income (loss) from discontinued operations	$ (623)	$ (694)	$ 128
Gain on sale	97	—	—

Sale of Citigroup's German Retail Banking Operations

On December 5, 2008, Citigroup sold its German retail banking operations to Crédit Mutuel for 5.2 billion Euro in cash plus the German retail bank's operating net earnings accrued in 2008 through the closing. The sale resulted in an after-tax gain of approximately $3.9 billion, including the after-tax gain on the foreign currency hedge of $383 million recognized during the fourth quarter of 2008.

The sale does not include the corporate and investment banking business or the Germany-based European data center.

The German retail banking operations had total assets and total liabilities as of November 30, 2008 of $15.6 billion and $11.8 billion, respectively.

Results for all of the German retail banking businesses sold, as well as the net gain recognized in 2008 from this sale, are reported as Discontinued operations for all periods presented.

Summarized financial information for Discontinued operations, including cash flows, related to the sale of the German retail banking operations is as follows:

In millions of dollars	2009	2008	2007
Total revenues, net of interest expense	$ 87	$ 6,592	$ 2,212

CitiCapital

On July 31, 2008, Citigroup sold substantially all of CitiCapital, the equipment finance unit in North America. The total proceeds from the transaction were approximately $12.5 billion and resulted in an after-tax loss to Citigroup of $305 million. This loss is included in Income from discontinued operations on the Company's Consolidated Statement of Income for the second quarter of 2008. The assets and liabilities for CitiCapital totaled approximately $12.9 billion and $0.5 billion, respectively, at June 30, 2008.

This transaction encompassed seven CitiCapital equipment finance business lines, including Healthcare Finance, Private Label Equipment Finance, Material Handling Finance, Franchise Finance, Construction Equipment Finance, Bankers Leasing, and CitiCapital Canada. CitiCapital's Tax Exempt Finance business was not part of the transaction and was retained by Citigroup.

CitiCapital had approximately 1,400 employees and 160,000 customers throughout North America.

Results for all of the CitiCapital businesses sold, as well as the net loss recognized in 2008 from this sale, are reported as Discontinued operations for all periods presented.

Summarized financial information for Discontinued operations, including cash flows, related to the sale of CitiCapital is as follows:

In millions of dollars	2009	2008	2007

Combined Results for Discontinued Operations

The following is summarized financial information for the Nikko Cordial business, German retail banking operations and CitiCapital business. Additionally, contingency consideration payments of $29 million pretax ($19 million after-tax) were received during 2009 related to the sale of Citigroup's Asset Management business, which was sold in December 2005. Also, in relation to the sale of its Life Insurance and Annuity business in 2005, the Company fulfilled its previously agreed upon obligations with regard to its remaining 10% economic interest in the long-term care business that it had sold to the predecessor of Genworth Financial in 2000. The reimbursement resulted in a pretax loss of $50 million ($33 million after-tax) at December 31, 2008. Both the Asset Management payment received and the Life Insurance and Annuity payment made are included in these balances.

In millions of dollars	2009	2008	2007
Total revenues, net of interest expense	$ 779	$ 7,810	$ 4,398
Income from discontinued operations	$ (653)	$ 784	$ 1,053

4. BUSINESS SEGMENTS

Citigroup is a diversified bank holding company whose businesses provide a broad range of financial services to consumer and corporate customers around the world. The Company's activities are conducted through theRegional Consumer Banking, Institutional Clients Group (ICG), Citi Holdings and Corporate/Other business segments.

The Regional Consumer Banking segment includes a global, full-service consumer franchise delivering a wide array of banking, credit card lending, and investment services through a network of local branches, offices and electronic delivery systems.

The businesses included in the Company'sICG segment provide corporations, governments, institutions and investors in approximately 100 countries with a broad range of banking and financial products and services.

The Citi Holdings segment is composed of the Brokerage and Asset Management, Local Consumer Lending and Special Asset Pool.

Corporate/Other includes net treasury results, unallocated corporate expenses, offsets to certain line-item reclassifications (eliminations), the results of discontinued operations and unallocated taxes.

The accounting policies of these reportable segments are the same as those disclosed in Note 1 to the Consolidated Financial Statements.

The following table presents certain information regarding the Company's continuing operations by segment:

In millions of dollars, except identifiable assets in billions	Revenues, net of interest expense (1)			Provision (benefit) for income taxes			Income (loss) from continuing operations (1)(2)(3)			Identifiable assets at year end	
	2009	2008	2007	2009	2008	2007	2009	2008	2007	2009	2008
Regional Consumer Banking	$ 22,771	$ 25,674	$ 26,643	$ (386)	$ 136	$ 2,122	$ 1,891	$ (3,140)	$ 5,589	$ 213	$ 199
Institutional Clients Group	37,435	34,881	33,454	5,261	2,746	3,116	12,888	9,305	8,969	866	803
Subtotal Citicorp	60,206	60,555	60,097	4,875	2,882	5,238	14,779	6,165	14,558	1,079	1,002
Citi Holdings	30,635	(6,698)	19,513	(7,239)	(22,621)	(6,338)	(8,239)	(36,012)	(8,692)	547	715
Corporate/Other	(10,556)	(2,258)	(2,310)	(4,369)	(587)	(1,446)	(7,606)	(2,182)	(2,674)	231	221
Total	$ 80,285	$ 51,599	$ 77,300	$ (6,733)	$ (20,326)	$ (2,546)	$ (1,066)	$ (32,029)	$ 3,192	$ 1,857	$ 1,938

(1) Includes Citicorp total revenues, net of interest expense, in North America of $19.2 billion, $20.9 billion and $20.4 billion; in EMEA of $15.0 billion, $11.5 billion and $12.3 billion; in Latin America of $12.1 billion, $12.6 billion and $12.6 billion; and in Asia of $13.9 billion, $15.5 billion and $14.7 billion in 2009, 2008 and 2007, respectively. Regional numbers exclude Citi Holdings and Corporate/Other, which largely operate within the U.S.

(2) Includes pretax provisions (credits) for credit losses and for benefits and claims in the Regional Consumer Banking results of $7.1 billion, $6.1 billion and $3.3 billion; in the ICG results of $1.7 billion, $1.9 billion and $557 million; and in the Citi Holdings results of $31.4 billion, $26.7 billion and $14.1 billion for 2009, 2008 and 2007, respectively.

(3) Corporate/Other reflects the restructuring charge, net of changes in estimates, of $1.5 billion for 2008 and $1.5 billion for 2007. Of the total charges, $890 million and $724 million is attributable to Citicorp; $267 million and $642 million to Citi Holdings; and $373 million and $131 million to Corporate/Other, for 2008 and 2007, respectively. See Note 10 to the Consolidated Financial Statements for further discussion.

5. INTEREST REVENUE AND EXPENSE

For the years ended December 31, 2009, 2008 and 2007, respectively, interest revenue and expense consisted of the following:

In millions of dollars	2009	2008 (1)	2007 (1)
Interest revenue			
Loan interest, including fees	$ 47,457	$ 62,336	$ 63,201
Deposits with banks	1,478	3,074	3,097
Federal funds sold and securities purchased under agreements to resell	3,084	9,150	18,341
Investments, including dividends	13,119	10,718	13,423
Trading account assets (2)	10,723	17,446	18,474
Other interest	774	3,775	4,811
Total interest revenue	$ 76,635	$ 106,499	$ 121,347
Interest expense			
Deposits (3)	$ 10,146	$ 20,271	$ 28,402
Federal funds purchased and securities loaned or sold under agreements to repurchase	3,433	11,265	23,003
Trading account liabilities (2)	289	1,257	1,420
Short-term borrowings	1,425	3,911	7,023
Long-term debt	12,428	16,046	16,110
Total interest expense	$ 27,721	$ 52,750	$ 75,958
Net interest revenue	$ 48,914	$ 53,749	$ 45,389
Provision for loan losses	38,760	33,674	16,832
Net interest revenue after provision for loan losses	$ 10,154	$ 20,075	$ 28,557

(1) Reclassified to conform to the current period's presentation.

(2) Interest expense on Trading account liabilities of ICG is reported as a reduction of interest revenue from Trading account assets.

(3) Includes FDIC deposit insurance fees and charges.

6. COMMISSIONS AND FEES

Commissions and fees revenue includes charges to customers for credit and bank cards, including transaction-processing fees and annual fees; advisory and equity and debt underwriting services; lending and deposit-related transactions, such as loan commitments, standby letters of credit and other deposit and loan servicing activities; investment management-related fees, including brokerage services and custody and trust services; and insurance fees and commissions.

The following table presents commissions and fees revenue for the years ended December 31:

In millions of dollars	2009	2008	2007
Credit cards and bank cards	$ 4,110	$ 4,517	$ 5,036
Investment banking	3,466	2,284	5,228
Smith Barney	837	2,836	3,265
ICG trading-related	1,729	2,322	2,706
Transaction services	1,306	1,423	1,166
Other consumer	1,343	1,211	649
Checking-related	1,043	1,134	1,108
Other ICG	531	747	295
Primerica	314	415	455
Loan servicing (1)	1,858	(1,731)	560
Corporate finance (2)	697	(4,876)	(667)
Other	(118)	84	267
Total commissions and fees	$17,116	$10,366	$20,068

(1) Includes fair value adjustments on mortgage servicing assets. The mark-to-market on the underlying economic hedges of the MSRs is included in Other revenue.

(2) Includes write-downs of approximately $4.9 billion in 2008 and $1.5 billion in 2007, net of underwriting fees, on funded and unfunded highly leveraged finance commitments, recorded at fair value and reported as loans held for sale in Other assets. Write-downs were recorded on all highly leveraged finance commitments where there was value impairment, regardless of funding date.

7. PRINCIPAL TRANSACTIONS

Principal transactions revenue consists of realized and unrealized gains and losses from trading activities. Trading activities include revenues from fixed income, equities, credit and commodities products, as well as foreign exchange transactions. Not included in the table below is the impact of net interest revenue related to trading activities, which is an integral part of trading activities' profitability. The following table presents principal transactions revenue for the years ended December 31:

In millions of dollars	2009	2008	2007
Regional Consumer Banking	$ 911	$ 149	$ 592
Institutional Clients Group	6,194	6,498	6,324
Subtotal Citicorp	$ 7,105	6,647	6,916
Local Consumer Lending	(449)	1,520	773
Brokerage and Asset Management	33	(4,958)	172
Special Asset Pool	(3,112)	(26,714)	(20,719)
Subtotal Citi Holdings	$ (3,528)	(30,152)	(19,774)
Corporate/Other	355	904	511
Total Citigroup	$ 3,932	$ (22,601)	$ (12,347)

In millions of dollars	2009	2008	2007
Interest rate contracts (1)	$ 4,075	$ (9,081)	159
Foreign exchange contracts (2)	2,762	3,921	2,573
Equity contracts (3)	(334)	(958)	521
Commodity and other contracts (4)	924	970	662
Credit derivatives (5)	(3,495)	(17,453)	(16,262)
Total Citigroup	$ 3,932	$ (22,601)	$ (12,347)

(1) Includes revenues from government securities and corporate debt, municipal securities, preferred stock, mortgage securities, and other debt instruments. Also includes spot and forward trading of currencies and exchange-traded and over-the-counter (OTC) currency options, options on fixed income securities, interest rate swaps, currency swaps, swap options, caps and floors, financial futures, OTC options, and forward contracts on fixed income securities.

(2) Includes revenues from foreign exchange spot, forward, option and swap contracts, as well as translation gains and losses.

(3) Includes revenues from common, preferred and convertible preferred stock, convertible corporate debt, equity-linked notes, and exchange-traded and OTC equity options and warrants.

(4) Primarily includes revenues from crude oil, refined oil products, natural gas, and other commodities trades.

(5) Includes revenues from structured credit products.

8. INCENTIVE PLANS

The Company has adopted a number of equity compensation plans under which it administers stock options, restricted or deferred stock awards, stock payments and stock purchase programs. The award programs are used to attract, retain and motivate officers, employees and non-employee directors, to provide incentives for their contributions to the long-term performance and growth of the Company, and to align their interests with those of stockholders. The plans are administered by the Personnel and Compensation Committee of the Citigroup Board of Directors (the Committee), which is composed entirely of independent non-employee directors. Since April 19, 2005, all equity awards have been pursuant to stockholder-approved plans.

At December 31, 2009, approximately 580.33 million shares were authorized and available for grant under Citigroup's 2009 Stock Incentive Plan, and approximately 66.45 million shares were available for purchase under Citigroup's 2000 Stock Purchase Plan. The final purchase date for the last offering under the stock purchase plan was in 2005 and the plan will expire by its terms on April 30, 2010. Citigroup's general practice is to deliver shares from treasury stock upon the exercise or vesting of equity awards.

The following table shows components of compensation expense relating to the Company's stock-based compensation programs as recorded during 2009, 2008 and 2007:

In millions of dollars	2009	2008	2007
Charges for estimated awards to retirement-eligible employees	$ 207	$ 110	$ 467
Option expense	55	29	86
Amortization of deferred cash awards	113	—	—
Amortization of MC LTIP awards (1)	19	18	18
Amortization of salary stock awards	162	—	—
Amortization of restricted and deferred stock awards (2)	1,543	3,133	2,728
Total	$ 2,099	$ 3,290	$ 3,299

(1)

Management Committee Long-Term Incentive Plan (MC LTIP) awards were granted in 2007. The awards expired in December 2009 without the issuance of shares.

(2) Represents amortization of expense over the remaining life of all unvested restricted and deferred stock awards granted to all employees prior to 2006. The 2009, 2008 and 2007 periods also include amortization expense for all unvested awards to non-retirement-eligible employees on or after January 1, 2006. Amortization includes estimated forfeitures of awards.

Stock Award Programs
Citigroup issues (and has issued) shares of its common stock in the form of restricted stock awards, deferred stock awards, and stock payments pursuant to the 2009 Stock Incentive Plan (and predecessor plans) to its officers, employees and non-employee directors.

Citigroup's primary stock award program is the Capital Accumulation Program (CAP). Generally, CAP awards of restricted or deferred stock constitute a percentage of annual incentive compensation and vest ratably over four-year periods, beginning on the first anniversary of the award date.

Continuous employment within Citigroup is generally required to vest in CAP and other stock award programs. Typically, full or partial vesting is provided for participants whose employment is terminated involuntarily during the vesting period for a reason other than "gross misconduct," who meet specified age and service requirements (retirement-eligible participants), or who die or become disabled during the vesting period. Post-employment vesting by retirement-eligible participants is generally conditioned upon their refraining from competing with Citigroup during the remaining vesting period.

Generally, in order to reduce the use of shares under Citigroup's stockholder-approved stock incentive plan, the percentages of total annual incentives awarded pursuant to CAP in 2009 and 2010 were reduced and were instead awarded as deferred cash awards in the U.S. and the U.K. The deferred cash awards are subject to two-year and four-year vesting schedules, but the other terms and conditions are the same as CAP awards. The deferred cash awards earn a return during the vesting period based on LIBOR; in 2010 only, a portion of the deferred cash award was denominated as a stock unit, the value of which will fluctuate based on the price of Citi common stock. In both cases, only cash will be delivered at vesting.

In 2009 and prior years, CAP awards were granted to Smith Barney financial advisors and employees of certain other businesses with two-year vesting schedules (FA CAP).

From 2003 to 2007, Citigroup granted annual stock awards under its Citigroup Ownership Program (COP) to a broad base of employees who were not eligible for CAP. The COP awards of restricted or deferred stock vest after three years, but otherwise have terms similar to CAP.

Non-employee directors receive part of their compensation in the form of deferred stock awards that vest in two years, and may elect to receive part of their retainer in the form of a stock payment, which they may elect to defer.

From time to time, restricted or deferred stock awards are made to induce talented employees to join Citigroup or as special retention awards to key employees. Vesting periods vary, but are generally two to four years. Generally, recipients must remain employed through the vesting dates to receive the shares awarded, except in cases of death, disability, or involuntary termination other than for "gross misconduct." Unlike CAP, these awards do not usually provide for post-employment vesting by retirement-eligible participants.

For all stock awards, during the applicable vesting period, the shares awarded are not issued to participants (in the case of a deferred stock award) or cannot be sold or transferred by the participants (in the case of a restricted stock award), until after the vesting conditions have been satisfied. Recipients of deferred stock awards do not have any stockholder rights until shares are delivered to them, but they generally are entitled to receive dividend-equivalent payments during the vesting period. Recipients of restricted stock awards are entitled to a limited voting right and to receive dividend equivalent payments during the vesting period. Once a stock award vests, the shares become freely transferable (but certain executives are required to hold the shares subject to a stock ownership commitment).

Compensation in respect of 2009 performance to certain officers and highly-compensated employees (other than the CEO, who received no incentive compensation) was administered pursuant to structures approved by the Special Master for TARP Executive Compensation (Special Master). Pursuant to such structures, the affected employees did not participate in CAP and instead received equity compensation in the form of salary stock payments (which become transferrable in monthly installments over periods of either one year or three years beginning in January 2010), and incentive awards in the form of fully-vested stock payments, long-term restricted stock (LTRS) and other restricted and deferred stock awards subject to vesting requirements and sale restrictions. The LTRS awards generally will not vest unless the employee remains employed until January 20, 2013, and vested shares will become transferable only in 25% installments as each 25% of Citi's TARP obligations is repaid. The awards are also subject to clawback provisions. Similar to CAP awards, the LTRS awards will vest in the event of the recipient's death or disability, but vesting upon retirement or a change in control are not provided. The other restricted and deferred stock awards vest ratably over three years pursuant to terms similar to CAP awards, but vested shares are subject to sale restrictions until the later of the first anniversary of the regularly scheduled vesting date, or January 20, 2013.

Unearned compensation expense associated with the CAP, COP and the other restricted and deferred stock awards described above represents the market value of Citigroup common stock at the date of grant and is recognized as a charge to income ratably over the vesting period, except for those awards granted to retirement-eligible employees. The charge to income for awards made to retirement-eligible employees is accelerated based on the dates the retirement rules are met. Beginning in 2006, stock awards to retirement-eligible employees are recognized in the year prior to the grant in the same manner as cash incentive compensation is accrued.

In connection with its agreement to repay $20 billion of its TARP obligations to the U.S. Treasury Department in December 2009, Citigroup announced that $1.7 billion of incentive compensation that would have otherwise been awarded in cash to employees in respect of 2009 performance would instead be awarded as "common stock equivalent" (CSE) awards. CSE awards are denominated in U.S. dollars or in local currency and will be paid in April 2010. CSEs are subject to forfeiture only if employment is terminated for reason of "gross misconduct" on or prior to the payment date. If stockholders approve in April 2010, the CSEs will be paid in fully transferable

shares of Citigroup common stock. The number of shares to be delivered will equal the CSE award value divided by the then fair market value of the common stock. For CSEs awarded to certain employees whose compensation structure was approved by the Special Master, 50% of the shares to be delivered in April 2010 will be subject to restrictions on sale and transfer until January 20, 2011. In lieu of 2010 CAP awards, certain retirement-eligible employees were instead awarded CSEs payable in April 2010, but any shares that are to be delivered in April 2010 (subject to stockholder approval) will be subject to restrictions on sale or transfer that will lapse in four equal annual installments beginning January 20, 2011. CSE awards have generally been accrued as compensation expenses in the year 2009 and will be recorded as a liability from the January 2010 grant date until the settlement date in April 2010. If stockholders approve delivery of Citigroup stock for the CSE awards, CSE awards will likely be paid as new issues of common stock as an exception to the Company's practice of delivering shares from treasury stock, and the recorded liability will be reclassified as equity at that time.

In January 2009, members of the Management Executive Committee (except the CEO and CFO) received 30% of their incentive awards for 2008 as performance vesting-equity awards. These awards vest 50% if the price of Citigroup common stock meets a price target of $10.61, and 50% for a price target of $17.85, in each case on or prior to January 14, 2013. The price target will be met only if the NYSE closing price equals or exceeds the applicable price target for at least 20 NYSE trading days within any period of 30 consecutive NYSE trading days ending on or before January 14, 2013. Any shares that have not vested by such date will vest according to a fraction, the numerator of which is the share price on the delivery date and the denominator of which is the price target of the unvested shares. No dividend equivalents are paid on unvested awards. Fair value of the awards is recognized as compensation expense ratably over the vesting period.

On July 17, 2007, the Committee approved the Management Committee Long-Term Incentive Plan (MC LTIP) (pursuant to the terms of the shareholder-approved 1999 Stock Incentive Plan) under which participants received an equity award that could be earned based on Citigroup's performance against various metrics relative to peer companies and publicly-stated return on equity (ROE) targets measured at the end of each calendar year beginning with 2007. The final expense for each of the three consecutive calendar years was adjusted based on the results of the ROE tests. No awards were earned for 2009, 2008 or 2007 and no shares were issued because performance targets were not met. No new awards were made under the MC LTIP since the initial award in July 2007.

CAP participants in 2008, 2007, 2006 and 2005, and FA CAP participants in those years and in 2009, could elect to receive all or part of their award in stock options. The figures presented in the stock option program tables (see "Stock Option Programs" below) include options granted in lieu of CAP and FA CAP stock awards in those years.

A summary of the status of Citigroup's unvested stock awards at December 31, 2009 and changes during the 12 months ended December 31, 2009 are presented below:

Unvested stock awards	Shares	Weighted-average grant date fair value
Unvested at January 1, 2009	226,210,859	$ 36.23
New awards	162,193,923	$ 4.35
Cancelled awards	(51,873,773)	$ 26.59
Deleted awards	(568,377)	$ 13.91
Vested awards (1)	(148,011,884)	$ 25.96
Unvested at December 31, 2009	187,950,748	$ 19.53

(1) The weighted-average market value of the vestings during 2009 was approximately $3.64 per share.

At December 31, 2009, there was $1.6 billion of total unrecognized compensation cost related to unvested stock awards net of the forfeiture provision. That cost is expected to be recognized over a weighted-average period of 1.3 years.

Stock Option Programs

The Company has a number of stock option programs for its non-employee directors, officers and employees. Generally, in January 2008, 2007 and 2006, stock options were granted only to CAP and FA CAP participants who elected to receive stock options in lieu of restricted or deferred stock awards, and to non-employee directors who elected to receive their compensation in the form of a stock option grant. Beginning in 2009, CAP participants, and directors may no longer elect to receive stock options. Occasionally, stock options also may be granted as sign-on awards. All stock options are granted on Citigroup common stock with exercise prices that are no less than the fair market value at the time of grant (which is defined under the plan to be the NYSE closing price on the trading day immediately preceding the grant date, or on the grant date for grants to certain officers). Generally, options granted from 2003 through 2009 have six-year terms, and vest ratably over three- or four-year periods; however, directors' options cliff vest after two years, and vesting schedules for sign-on grants may vary. The sale of shares acquired through the exercise of employee stock options granted from 2003 through 2008 (and FA CAP options granted in 2009) is restricted for a two-year period (and may be subject to the stock ownership commitment of senior executives thereafter).

Prior to 2003, Citigroup options, including options granted since the date of the merger of Citicorp and Travelers Group, Inc., generally vested at a rate of 20% per year over five years (with the first vesting date occurring 12 to 18 months following the grant date) and had 10-year terms. Certain options, mostly granted prior to January 1, 2003, and with 10-year terms, permit an employee exercising an option under certain conditions to be granted new options (reload options) in an amount equal to the number of common shares used to satisfy the exercise price and the withholding taxes due upon exercise. The reload options are granted for the remaining term of the related original option and vest after six months. Reload options may in turn be exercised using the reload method, given certain conditions. An option may not be exercised using the reload method unless the market price on the date of exercise is at least 20% greater than the option exercise price.

On October 29, 2009, Citigroup made a one-time broad-based option grant to employees worldwide. The options have a six-year term, and generally vest in three equal installments over three years, beginning on the first anniversary of the grant date. The options were awarded with a strike price equal to the NYSE closing price on the trading day immediately preceding the date of grant ($4.08). The CEO and other employees whose 2009 compensation was subject to structures approved by the Special Master did not participate in this grant.

In January 2009, members of the Management Executive Committee received 10% of their awards as performance-priced stock options, with an exercise price that placed the awards significantly "out of the money" on the date of grant. Half of each executive's options have an exercise price of $17.85 and half have an exercise price of $10.61. The options were granted on a day on which Citi's closing price was $4.53. The options have a 10-year term and vest ratably over a four-year period.

On January 22, 2008, Vikram Pandit, CEO, was awarded stock options to purchase three million shares of common stock. The options vest 25% per year beginning on the first anniversary of the grant date and expire on the tenth anniversary of the grant date. One-third of the options have an exercise price equal to the NYSE closing price of Citigroup stock on the grant date ($24.40), one-third have an exercise price equal to a 25% premium over the grant-date closing price ($30.50), and one-third have an exercise price equal to a 50% premium over the grant date closing price ($36.60). The first installment of these options vested on January 22, 2009. These options do not have a reload feature.

From 1997-2002, a broad base of employees participated in annual option grant programs. The options vested over five-year periods, or cliff vested after five years, and had 10-year terms but no reload features. No grants have been made under these programs since 2002.

Information with respect to stock option activity under Citigroup stock option programs for the years ended December 31, 2009, 2008 and 2007 is as follows:

	2009			2008			2007		
	Options	Weighted-average exercise price	Intrinsic value per share	Options	Weighted-average exercise price	Intrinsic value per share	Options	Weighted-average exercise price	Intrinsic value per share
Outstanding, beginning of period	143,860,657	$ 41.84	$—	172,767,122	$ 43.08	$—	212,067,917	$ 41.87	$ 13.83
Granted—original	321,244,728	4.27	—	18,140,448	24.70	—	2,178,136	54.21	—
Granted—reload	—	—	—	15,984	28.05	—	3,093,370	52.66	—
Forfeited or exchanged	(39,285,305)	36.98	—	(24,080,659)	42.19	—	(8,796,402)	46.26	1.52
Expired	(21,775,274)	36.21	—	(20,441,584)	38.88	—	(843,256)	43.40	4.38
Exercised	—	—	—	(2,540,654)	22.36	—	(34,932,643)	36.62	11.16
Outstanding, end of period	404,044,806	$ 12.75	$—	143,860,657	$ 41.84	$—	172,767,122	$ 43.08	$ —
Exercisable at end of period	78,939,093			123,654,795			165,024,814		

The following table summarizes the information about stock options outstanding under Citigroup stock option programs at December 31, 2009:

	Options outstanding			Options exercisable	
Range of exercise prices	Number outstanding	Weighted-average contractual life remaining	Weighted-average exercise price	Number exercisable	Weighted-average exercise price
$2.97–$9.99	310,267,922	5.8 years	$ 4.08	232,964	$ 5.89
$10.00–$19.99	5,718,033	8.6 years	14.75	257,547	15.74
$20.00–$29.99	10,765,908	4.5 years	24.52	3,518,919	24.81
$30.00–$39.99	6,340,854	3.8 years	34.66	4,836,471	35.01
$40.00–$49.99	63,222,120	1.0 years	46.17	62,878,916	46.16
$50.00–$56.41	7,729,969	2.0 years	52.12	7,214,276	51.96
	404,044,806	5.0 years	$ 12.76	78,939,093	$ 44.83

As of December 31, 2009, there was $445.6 million of total unrecognized compensation cost related to stock options; this cost is expected to be recognized over a weighted-average period of 1.9 years.

Fair Value Assumptions

Reload options are treated as separate grants from the related original grants. Pursuant to the terms of currently outstanding reloadable options, upon exercise of an option, if employees use previously owned shares to pay the exercise price and surrender shares otherwise to be received for related tax withholding, they will receive a reload option covering the same number of shares used for such purposes, but only if the market price on the date of exercise is at least 20% greater than the option exercise price. Reload options vest after six months and carry the same expiration date as the option that gave rise to the reload grant. The exercise price of a reload grant is the fair-market value of Citigroup common stock on the date the underlying option is exercised. Reload options are intended to encourage employees to exercise options at an earlier date and to retain the shares acquired. The result of this program is that employees generally will exercise options as soon as they are able and, therefore, these options have shorter expected lives. Shorter option lives result in lower valuations. However, such values are expensed more quickly due to the shorter vesting period of reload options. In addition,
since reload options are treated as separate grants, the existence of the reload feature results in a greater number of options being valued. Shares received through option exercises under the reload program, as well as certain other options, are subject to restrictions on sale.

Additional valuation and related assumption information for Citigroup option programs is presented below. Citigroup uses a lattice-type model to value stock options.

For options granted during	2009	2008	2007
Weighted-average per-share fair value, at December 31	$ 1.38	$ 3.62	$ 6.52
Weighted-average expected life			
Original grants	5.87 yrs.	5.00 yrs.	4.66 yrs.
Reload grants	N/A	1.04 yrs.	1.86 yrs.

Valuation assumptions			
Expected volatility	35.89%	25.11%	19.21%
Risk-free interest rate	2.79%	2.76%	4.79%
Expected dividend yield	0.02%	4.53%	4.03%
Expected annual forfeitures			
Original and reload grants	7.6%	7%	7%

N/A Not applicable

9. RETIREMENT BENEFITS

The Company has several non-contributory defined-benefit pension plans covering certain U.S. employees and has various defined-benefit pension and termination-indemnity plans covering employees outside the United States. The U.S. qualified defined-benefit plan provides benefits under a cash balance formula. However, employees satisfying certain age and service requirements remain covered by a prior final-average pay formula under that plan. Effective January 1, 2008, the U.S. qualified pension plan was frozen for most employees. Accordingly, no additional compensation-based contributions were credited to the cash-balance plan for existing plan participants during 2008 or 2009. However, certain employees covered under the prior final-pay plan continue to accrue benefits. The Company also offers postretirement health care and life insurance benefits to certain eligible U.S. retired employees, as well as to certain eligible employees outside the United States.

The following tables summarize the components of net (benefit) expense recognized in the Consolidated Statement of Income and the funded status and amounts recognized in the Consolidated Balance Sheet for the Company's U.S. qualified pension plan, postretirement plans and plans outside the United States. The Company uses a December 31 measurement date for the U.S. plans as well as the plans outside the United States.

Net (Benefit) Expense

	Pension plans						Postretirement benefit plans					
	U.S. plans (1)			Non-U.S. plans			U.S. plans			Non-U.S. plans		
In millions of dollars	2009	2008	2007	2009	2008	2007	2009	2008	2007	2009	2008	2007
Benefits earned during the year	$ 18	$ 23	$ 301	$ 148	$ 201	$ 202	$ 1	$ 1	$ 1	$ 26	$ 36	$ 27
Interest cost on benefit obligation	649	674	641	301	354	318	61	62	59	89	96	75
Expected return on plan assets	(912)	(949)	(889)	(336)	(487)	(477)	(10)	(12)	(12)	(77)	(109)	(103)
Amortization of unrecognized												
Net transition obligation	—	—	—	(1)	1	2	—	—	—	—	—	—
Prior service cost (benefit)	(1)	(2)	(3)	4	4	3	(1)	—	(3)	—	—	—
Net actuarial loss	10	—	84	60	24	39	2	4	3	18	21	13
Curtailment (gain) loss (2)	47	56	—	22	108	36	—	16	9	—	—	—
Net (benefit) expense	$ (189)	$ (198)	$ 134	$ 198	$ 205	$ 123	$ 53	$ 71	$ 57	$ 56	$ 44	$ 12

(1) The U.S. plans exclude nonqualified pension plans, for which the net expense was $41 million in 2009, $38 million in 2008 and $45 million in 2007.

(2) The 2009 curtailment loss in the non-U.S pension plans includes $18 million gain reflecting the sale of Citigroup's Nikko operations. See Note 3 to the Consolidated Financial Statements for further discussion of the sale of Nikko operations.

The estimated net actuarial loss, prior service cost and net transition obligation that will be amortized from Accumulated other comprehensive income (loss) into net expense in 2010 are approximately $104 million, $2 million and $(2) million, respectively, for defined-benefit pension plans. For postretirement plans, the estimated 2010 net actuarial loss and prior service cost amortizations are approximately $21 million and $(3) million, respectively.

Net Amount Recognized

	Pension plans				Post retirement benefit plans			
	U.S. plans (1)		Non-U.S. plans		U.S. plans		Non-U.S. plans	
In millions of dollars	2009	2008	2009	2008	2009	2008	2009	2008

Amounts recognized in Accumulated other comprehensive income (loss)								
Net transition obligation	$ —	$ —	$ (4)	$ (5)	$ —	$ —	$ 1	$ 1
Prior service cost (benefit)	(2)	(4)	23	29	(10)	(10)	(5)	(1)
Net actuarial loss	3,927	1,978	1,280	1,219	99	41	393	442
Net amount recognized in equity—pretax	$ 3,925	$ 1,974	$ 1,299	$ 1,243	$ 89	$ 31	$ 389	$ 442
Accumulated benefit obligation at year end	$ 11,129	$ 10,937	$ 4,902	$ 4,145	$ 1,086	$ 1,062	$ 1,141	$ 937

(1) The U.S. plans exclude nonqualified pension plans, for which the aggregate projected benefit obligation was $637 million and $586 million and the aggregate accumulated benefit obligation was $636 million and $580 million at December 31, 2009 and 2008, respectively. These plans are unfunded. As such, the funded status of these plans is $(637) million and $(586) million at December 31, 2009 and 2008, respectively. Accumulated other comprehensive income (loss) reflects pretax charges of $137 million and $72 million at December 31, 2009 and 2008, respectively, that primarily relate to net actuarial loss.

(2) Changes in projected benefit obligation due to curtailments in the non-U.S. pension plans in 2009 include $(3) million and $(9) million in curtailment gains and $16 million and $12 million in special termination costs during 2009 and 2008, respectively.

(3) Company contributions to the U.S. pension plan include $11 million and $13 million during 2009 and 2008, respectively, relating to certain investment advisory fees and administrative costs that were absorbed by the Company. Company contributions to the non-U.S. pension plans include $29 million and $55 million of benefits directly paid by the Company during 2009 and 2008, respectively.

(4) The U.S. qualified pension plan is fully funded under specified ERISA funding rules as of January 1, 2009 and projected to be fully funded under these rules as of December 31, 2009.

The following table shows the change in Accumulated other comprehensive income (loss) for the years ended December 31, 2009 and 2008:

In millions of dollars	2009	2008	Change
Other assets			
Prepaid benefit cost	$ 741	$ 1,017	$ (276)
Other liabilities			
Accrued benefit liability	3,576	2,309	1,267
Funded status (1)	$ (2,835)	$ (1,292)	$ (1,543)
Change in deferred taxes, net			$ 513
Amortization and other			184
Change in accumulated other comprehensive income (loss)			$ (846)

(1) Funded status consists of Net amount recognized on the balance sheet of the U.S. qualified and nonqualified pension and postretirement benefit plans, as well as the non-U.S. pension and postretirement plans.

At the end of 2009 and 2008, for both qualified and nonqualified plans and for both funded and unfunded plans, the aggregate projected benefit obligation (PBO), the aggregate accumulated benefit obligation (ABO), and the aggregate fair value of plan assets for pension plans with a projected benefit obligation in excess of plan assets, and pension plans with an accumulated benefit obligation in excess of plan assets, were as follows:

	PBO exceeds fair value of plan assets				ABO exceeds fair value of plan assets			
	U.S. plans(1)		Non-U.S. plans		U.S. plans(1)		Non-U.S. plans	
In millions of dollars	2009	2008	2009	2008	2009	2008	2009	2008
Projected benefit obligation	$ 11,815	$ 586	$ 1,662	$ 1,866	$ 11,815	$ 586	$ 1,288	$ 1,374
Accumulated benefit obligation	11,765	580	1,414	1,640	11,765	580	1,127	1,231
Fair value of plan assets	9,934	—	1,169	1,328	9,934	—	842	875

(1) In 2009, the PBO and ABO of the U.S. plans include $11,178 million and $11,129 million, respectively, relating to the qualified plan and $637 million and $636 million, respectively, relating to the nonqualified plans. The PBO and ABO of the U.S. qualified pension plan did not exceed fair value of plan assets at December 31, 2008 and were not included in the 2008 benefit obligations summarized above.

At December 31, 2009, combined accumulated benefit obligations for the U.S. and non-U.S. pension plans, excluding U.S. nonqualified plans, exceeded plan assets by $0.5 billion. At December 31, 2008, combined plan assets for the U.S. and non-U.S. pension plans, excluding U.S. nonqualified plans, exceeded the accumulated benefit obligations by $1.0 billion.

Assumptions

The discount rate and future rate of compensation assumptions used in determining pension and postretirement benefit obligations and net benefit expense for the Company's plans are shown in the following table:

At year end	2009	2008
Discount rate		
U.S. plans (1)		
Pension	5.90%	6.1%
Postretirement	5.55	6.0
Non-U.S. plans		
Range	2.00 to 13.25	1.75 to 17.0
Weighted average	6.50	6.6
Future compensation increase rate		
U.S. plans (2)	3.00	3.0
Non-U.S. plans		
Range	1.0 to 12.0	1.0 to 11.5
Weighted average	4.60	4.5

During the year	2009	2008
Discount rate		
U.S. plans (1)		
Pension	6.1%	6.2%
Postretirement	6.0	6.0
Non-U.S. plans		
Range	1.75 to 17.0	2.0 to 10.25
Weighted average	6.60	6.2
Future compensation increase rate		
U.S. plans (2)	3.0	3.0
Non-U.S. plans		
Range	1.0 to 11.5	1.0 to 8.25
Weighted average	4.5	4.4

(1) Weighted-average rates for the U.S. plans equal the stated rates.

(2) Effective January 1, 2008, the U.S. qualified pension plan was frozen. Only the future compensation increases for the grandfathered employees will affect future pension expense and obligations. Future compensation increase rates for small groups of employees were 4% or 6%.

A one-percentage-point change in the discount rates would have the following effects on pension expense:

	One-percentage-point increase			One-percentage-point decrease		
In millions of dollars	2009	2008	2007	2009	2008	2007
Effect on pension expense for U.S. plans (1)	$ 14	$ 36	$ 25	$ (27)	$ (24)	$ (5)
Effect on pension expense for non-U.S. plans	(40)	(58)	(59)	62	94	80

(1) Due to the freeze of the U.S. qualified pension plan commencing January 1, 2008, the majority of the prospective service cost has been eliminated and the gain/loss amortization period was changed to the life expectancy for inactive participants. As a result, pension expense for the U.S. qualified pension plan is driven more by interest costs than service costs, and an increase in the discount rate would increase pension expense, while a decrease in the discount rate would decrease pension expense.

Assumed health-care cost-trend rates were as follows:

	2009	2008
Health-care cost increase rate U.S. plans		
Following year	8.00%	7.50%
Ultimate rate to which cost increase is assumed to decline	5.00	5.00
Year in which the ultimate rate is reached	2016	2014

A one-percentage-point change in assumed health-care cost-trend rates would have the following effects:

	One-percentage-point increase		One-percentage-point decrease	
In millions of dollars	2009	2008	2009	2008
Effect on benefits earned and interest cost for U.S. plans	$ 3	$ 3	$ (3)	$ (2)
Effect on accumulated postretirement benefit obligation for U.S. plans	60	47	(49)	(41)

Citigroup considers the expected rate of return to be a long-term assessment of return expectations, based on each plan's expected asset allocation, and does not anticipate changing this assumption annually unless there are significant changes in economic conditions or portfolio composition. Market performance over a number of earlier years is evaluated covering a wide range of economic conditions to determine whether there are sound reasons for projecting any past trends.

The expected long-term rates of return on assets used in determining the Company's pension expense are shown below:

	2009	2008
Rate of return on assets		
U.S. plans (1)	7.75%	8.00%
Non-U.S. plans		
Range	2.50 to 13.0	3.14 to 12.5
Weighted average	7.31	7.62

(1) Weighted-average rates for the U.S. plans equal the stated rates. As of December 31, 2008, the Company lowered its expected rate of return to 7.75%.

A one-percentage-point change in the expected rates of return would have the following effects on pension expense:

	One-percentage-point increase			One-percentage-point decrease		
In millions of dollars	2009	2008	2007	2009	2008	2007
Effect on pension expense for U.S. plans	$ (109)	$ (118)	$ (118)	$ 109	$ 118	$ 118
Effect on pension expense for non-U.S. plans	(44)	(66)	(59)	44	66	59

Plan Assets

Citigroup's pension and postretirement plans' asset allocations for the U.S. plans at the end of 2009 and 2008, and the target allocations for 2010 by asset category based on asset fair values, are as follows:

	Target asset allocation	U.S. pension assets at December 31		U.S. postretirement assets at December 31	
Asset category (1)	2010	2009	2008	2009	2008
Equity securities (2)	0 to 34%	12%	6%	12%	6%
Debt securities	30 to 67	40	42	39	42
Real estate	0 to 7	5	6	5	6
Private equity	0 to 15	16	17	16	17
Other investments	8 to 34	27	29	28	29
Total		100%	100%	100%	100%

(1) Target asset allocations for the U.S. plans are set by investment strategy, not by investment product. For example, private equities with an underlying investment in real estate are classified in the real estate asset category, not private equity.

(2) Equity securities in the U.S. pension plans include no Citigroup common stock at the end of 2009 and 2008.

Third-party investment managers and third-party affiliated advisors provide their respective services to Citigroup's U.S. pension plans. Assets are rebalanced as the Pension Plan Investment Committee deems appropriate. Citigroup's investment strategy, with respect to its pension assets, is to maintain a globally diversified investment portfolio across several asset classes, targeting an annual rate of return of 7.75% that, when combined with Citigroup's contributions
to the plans, will maintain the plans' ability to meet all required benefit obligations.

Citigroup's pension and postretirement plans' weighted-average asset allocations for the non-U.S. plans and the actual ranges at the end of 2009 and 2008, and the weighted-average target allocations for 2010 by asset category based on asset fair values, are as follows:

				Non-U.S. pension plans	
	Weighted-average target asset allocation	Actual range at December 31		Weighted-average at December 31	
Asset category	2010	2009	2008	2009	2008
Equity securities	23%	0 to 64%	0 to 57%	34%	34%
Debt securities	67	0 to 99	0 to 86	55	55
Real estate	1	0 to 29	0 to 40	1	1
Other investments	9	0 to 100	0 to 100	10	10
Total	100%			100%	100%

				Non-U.S. postretirement plans	
	Weighted-average target asset allocation	Actual range at December 31		Weighted-average at December 31	
Asset category	2010	2009	2008	2009	2008
Equity securities	39%	0 to 53%	0 to 53%	52%	52%
Debt securities	41	0 to 100	36 to 100	37	37
Other investments	20	0 to 11	0 to 11	11	11
Total	100%			100%	100%

Fair Value Disclosure
Plan assets by detailed asset categories and the fair value hierarchy are as follows:

In millions of dollars	U.S. pension and postretirement benefit plans (1) Fair value measurement at December 31, 2009

Investment Strategy

Citigroup's global pension and postretirement funds' investment strategies are to invest in a prudent manner for the exclusive purpose of providing benefits to participants. The investment strategies are targeted to produce a total return that, when combined with Citigroup's contributions to the funds, will maintain the funds' ability to meet all required benefit obligations. Risk is controlled through diversification of asset types and investments in domestic and international equities, fixed-income securities and cash. The target asset allocation in most locations outside the U.S. is to have the majority of the assets in either equity or debt securities. These allocations may vary by geographic region and country depending on the nature of applicable obligations and various other regional considerations. The wide variation in the actual range of plan asset allocations for the funded non-U.S. plans is a result of differing local statutory requirements and economic conditions. For example, in certain countries local law requires that all pension plan assets must be invested in fixed-income investments, government funds, or local-country securities.

Significant Concentrations of Risk in Plan Assets

The assets of Citigroup's pension plans are diversified to limit the impact of any individual investment. The U.S. pension plan is diversified across multiple asset classes, with publicly traded fixed income, hedge funds and private equity representing the most significant asset allocations. Investments in these three asset classes are further diversified across funds, managers, strategies, vintages, sectors and geographies, depending on the specific characteristics of each asset class. The pension assets for Citigroup's largest non-U.S. plans are primarily invested in publicly-traded fixed income and publicly-traded equity securities.

Risk management practices

Risk management oversight for Citigroup's U.S. pension plans and largest non-U.S. pension plans is performed by Citigroup's Independent Risk Management Regional Units. The risk oversight function covers market risk, credit risk and operational risk. Although the specific components of risk oversight are tailored to the requirements of each region and of each country, the following risk management elements are common to all regions:

- Periodic asset liability management and strategic asset allocation studies
- Monitoring of funding levels and funding ratios

- Monitoring compliance with asset allocation guidelines
- Monitoring asset class performance against asset class benchmarks
- Monitoring investor manager performance against benchmarks
- Quarterly risk capital measurement

Risk management for the remaining non-U.S. pension assets and liabilities is performed by Citigroup's local country management.

Contributions

Citigroup's pension funding policy for U.S. plans and non-U.S. plans is generally to fund to applicable minimum funding requirements rather than to the amounts of accumulated benefit obligations. For the U.S. plans, the Company may increase its contributions above the minimum required contribution under ERISA, if appropriate to its tax and cash position and the plans' funded position. For the U.S. pension plans, at December 31, 2009, there were no minimum required cash contributions, and no discretionary or non-cash contributions are currently planned. For the non-U.S. pension plans, discretionary cash contributions in 2010 are anticipated to be approximately $160 million. In addition, the Company expects to contribute $35 million of benefits to be directly paid by the Company for its unfunded non-U.S. pension and postretirement plans. For the U.S. postretirement benefit plans, there are no expected or required contributions for 2010. For the non-U.S. postretirement benefit plans, expected cash contributions for 2010 are $72 million including $3 million of benefits to be directly paid by the Company. These estimates are subject to change, since contribution decisions are affected by various factors, such as market performance and regulatory requirements; in addition, management has the ability to change funding policy.

Estimated Future Benefit Payments

The Company expects to pay the following estimated benefit payments in future years:

In millions of dollars	U.S. plans Pension benefits	Non-U.S. plans Pension benefits	Non-U.S. plans Postretirement benefits
2010	$ 727	$ 327	$ 45
2011	739	290	47
2012	760	295	50
2013	774	302	54
2014	788	316	57
2015–2019	4,113	1,815	357

Prescription Drugs

In December 2003, the Medicare Prescription Drug Improvement and Modernization Act of 2003 (the "Act of 2003") was enacted. The Act of 2003 established a prescription drug benefit under Medicare known as "Medicare Part D," and a federal subsidy to sponsors of U.S. retiree health-care benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. The benefits provided to certain participants are at least actuarially equivalent to Medicare Part D and, accordingly, the Company is entitled to a subsidy.

The expected subsidy reduced the accumulated postretirement benefit obligation (APBO) by approximately $148 million and $142 million as of January 1, 2009 and 2008, respectively, and the postretirement expense by approximately $13 million and $17 million for 2009 and 2008, respectively.

The following table shows the estimated future benefit payments without the effect of the subsidy and the amounts of the expected subsidy in future years:

In millions of dollars	Expected U.S. postretirement benefit payments: Before Medicare Part D subsidy	Medicare Part D subsidy
2010	$ 113	$ 13
2011	113	13
2012	111	13
2013	109	14
2014	106	14
2015–2019	479	67

Citigroup 401(k)

Under the Citigroup 401(k) plan, a defined-contribution plan, eligible U.S. employees received matching contributions up to 6% of their compensation in 2009, subject to statutory limits. Effective January 7, 2010, the maximum amount of matching contributions paid on employee deferral contributions made into this plan will be reduced from 6% to 4% of eligible pay for all employees. The matching contribution is invested according to participants' individual elections. Additionally, for eligible employees whose compensation is $100,000 or less, a fixed contribution of up to 2% of compensation is provided.

The pretax expense associated with this plan amounted to approximately $442 million and $580 million in 2009 and 2008, respectively. The decrease in expense from 2008 to 2009 reflects the reduction in participants due to the Morgan Stanley Smith Barney joint venture and other reductions in workforce.

10. RESTRUCTURING

In the fourth quarter of 2008, Citigroup recorded a pretax restructuring expense of $1.581 billion related to the implementation of a Company-wide re-engineering plan. For the year ended December 31, 2009, Citigroup recorded a pretax net restructuring release of $110 million composed of a gross charge of $86 million and a credit of $196 million due to changes in estimates. The charges related to the 2008 Re-engineering Projects Restructuring Initiative are reported in Restructuring on the Company's Consolidated Statement of Income and are recorded in each segment.

In 2007, the Company completed a review of its structural expense base in a Company-wide effort to create a more streamlined organization, reduce expense growth, and provide investment funds for future growth initiatives. As a result of this review, a pretax restructuring charge of $1.4 billion was recorded in Corporate/Other during the first quarter of 2007. Additional net charges of $151 million were recognized in subsequent quarters throughout 2007, and net releases of $31 million and $3 million in 2008 and 2009, respectively, due to changes in estimates. The charges related to
the 2007 Structural Expense Review Restructuring Initiative are reported in Restructuring on the Company's Consolidated Statement of Income.

The primary goals of the 2008 Re-engineering Projects Restructuring Initiative and the 2007 Structural Expense Review Restructuring Initiative were:

- eliminate layers of management/improve workforce management;
- consolidate certain back-office, middle-office and corporate functions;
- increase the use of shared services;
- expand centralized procurement; and
- continue to rationalize operational spending on technology.

The implementation of these restructuring initiatives also caused certain related premises and equipment assets to become redundant. The remaining depreciable lives of these assets were shortened, and accelerated depreciation charges began in the second quarter of 2007 and fourth quarter of 2008 for the 2007 and 2008 initiatives, respectively, in addition to normal scheduled depreciation.

The following tables detail the Company's restructuring reserves.

2008 Re-engineering Projects Restructuring Charges

The total restructuring reserve balance and total charges as of December 31, 2009 and 2008 related to the 2008 Re-engineering Projects Restructuring Initiatives are presented below by business in the following tables. These charges are reported in Restructuring on the Company's Consolidated Statement of Income and are recorded in each business.

2008 Re-engineering Projects

	For the year ended December 31, 2009		
In millions of dollars	Total restructuring reserve balance as of December 31, 2009	Total restructuring charges for the year ended December 31, 2009	Total restructuring charges since inception (1)(2)
Citicorp	$ 75	$ 31	$ 832
Citi Holdings	1	27	252
Corporate/Other	93	28	336
Total Citigroup (pretax)	$ 169	$ 86	$ 1,420

(1) Amounts shown net of $196 million related to changes in estimates recorded during 2009.

(2) Excludes pension curtailment charges of $51 million recorded during the fourth quarter of 2008.

For the year ended December 31, 2008

In millions of dollars	Total restructuring reserve balance as of December 31, 2008	Total restructuring charges (1)
Citicorp	$ 789	$ 890
Citi Holdings	184	267
Corporate/Other	338	373
Total Citigroup (pretax)	$ 1,311	$ 1,530

(1) Represents the total charges incurred since inception and excludes pension curtailment charges of $51 million recorded during 2008.

11. INCOME TAXES

In millions of dollars	2009	2008	2007
Current			
Federal	$(1,711)	$ (4,582)	$(2,260)
Foreign	3,101	4,762	3,566
State	(414)	29	75
Total current income taxes	$ 976	$ 209	$ 1,381
Deferred			
Federal	$(6,892)	$(16,583)	$(2,109)
Foreign	(182)	(1,794)	(1,042)
State	(635)	(2,158)	(776)
Total deferred income taxes	$(7,709)	$(20,535)	$(3,927)
Provision (benefit) for income tax on continuing operations before noncontrolling interests (1)	$(6,733)	$(20,326)	$(2,546)
Provision (benefit) for income taxes on discontinued operations	(106)	(79)	344
Provision (benefit) for income taxes on cumulative effect of accounting changes	—	—	(109)
Income tax expense (benefit) reported in stockholders' equity related to:			
Foreign currency translation	(415)	(2,116)	565
Securities available-for-sale	2,765	(5,468)	(759)
Employee stock plans	1,351	449	(410)
Cash flow hedges	1,165	(1,354)	(1,705)
Pension liability adjustments	(513)	(918)	426
Tax on exchange offer booked to retained earnings	3,523	—	—
Income taxes before noncontrolling interests	$ 1,037	$(29,812)	$(4,194)

(1) Includes the effect of securities transactions and OTTI losses resulting in a provision (benefit) of $698 million and $(1,017) million in 2009, $238 million and $(959) million in 2008 and $409 million and $0 in 2007, respectively.

The reconciliation of the federal statutory income tax rate to the Company's effective income tax rate applicable to income from continuing operations (before noncontrolling interests and the cumulative effect of accounting changes) for the years ended December 31 was as follows:

	2009	2008	2007
Federal statutory rate	35.0%	35.0%	35.0%
State income taxes, net of federal benefit	8.4	2.7	(70.4)
Foreign income tax rate differential	26.0	1.2	(217.2)
Audit settlements (1)	4.4	—	—
Goodwill	0.5	(2.2)	0.6
Tax advantaged investments	11.8	1.8	(100.9)
Other, net	0.2	0.3	(41.2)
Effective income tax rate (2)	86.3%	38.8%	(394.1)%

(1) For 2009, relates to the conclusion of the audit of various issues in the Company's 2003 – 2005 U.S. federal tax audit and a tax benefit relating to the release of tax reserves on interchange fees.

(2) The Company recorded an income tax benefit for 2007. The effective tax rate (benefit) of (394)% primarily resulted from pretax losses in the Company's ICG and N.A. Regional Consumer Banking businesses (the U.S. is a higher tax rate jurisdiction). In addition, the tax benefits of permanent differences, including the tax benefit for not providing U.S. income taxes on the earnings of certain foreign subsidiaries that are indefinitely invested, favorably impacted the Company's effective tax rate.

Deferred income taxes at December 31 related to the following:

In millions of dollars	2009	2008
Deferred tax assets		
Credit loss deduction	$ 14,987	$ 11,242
Deferred compensation and employee benefits	3,626	4,367
Restructuring and settlement reserves	794	1,134
Unremitted foreign earnings	7,140	4,371
Investments	—	5,312
Cash flow hedges	1,906	3,071
Tax credit and net operating loss carryforwards	20,787	18,424
Intangibles	1,598	—
Other deferred tax assets	1,753	4,158
Gross deferred tax assets	$ 52,591	$ 52,079
Valuation allowance	—	—
Deferred tax assets after valuation allowance	$ 52,591	$ 52,079
Deferred tax liabilities		
Investments	$ (1,863)	$ —
Deferred policy acquisition costs and value of insurance in force	(791)	(805)
Fixed assets and leases	(677)	(2,209)
Interest related items	(683)	(543)
Intangibles	—	(2,365)
Credit valuation adjustment on Company-issued debt	(264)	(1,473)
Other deferred tax liabilities	(2,261)	(215)
Gross deferred tax liabilities	$ (6,539)	$ (7,610)
Net deferred tax asset	$ 46,052	$ 44,469

The following is a roll-forward of the Company's unrecognized tax benefits.

In millions of dollars	2009	2008	2007
Total unrecognized tax benefits at January 1,	$3,468	$3,698	$3,144
Net amount of increases for current year's tax positions	195	254	1,100
Gross amount of increases for prior years' tax positions	392	252	120
Gross amount of decreases for prior years' tax positions	(870)	(581)	(341)
Amounts of decreases relating to settlements	(104)	(21)	(349)
Reductions due to lapse of statutes of limitation	(12)	(30)	(50)
Foreign exchange, acquisitions and dispositions	10	(104)	74
Total unrecognized tax benefits at December 31,	$3,079	$3,468	$3,698

Total amount of unrecognized tax benefits at December 31, 2009, 2008 and 2007 that, if recognized, would affect the effective tax rate are $2.2 billion, $2.4 billion and $1.9 billion, respectively. The remainder of the uncertain tax positions have offsetting amounts in other jurisdictions or are temporary differences.

Interest and penalties (not included in the "unrecognized tax benefits" above) are a component of the Provision for income taxes.

	2009		2008		2007	
In millions of dollars	Pretax	Net of tax	Pretax	Net of tax	Pretax	Net of tax
Total interest and penalties in the balance sheet at January 1,	$ 663	$ 420	$618	$ 389	$532	$ 335
Total interest and penalties in the statement of operations	(250)	(154)	114	81	93	58
Total interest and penalties in the balance sheet at December 31, (1)	370	239	663	420	618	389

(1) Includes $9 million for foreign penalties.

The Company is currently under audit by the Internal Revenue Service and other major taxing jurisdictions around the world. It is thus reasonably possible that significant changes in the gross balance of unrecognized tax benefits may occur within the next 12 months but the Company does not expect such audits to result in amounts that would cause a significant change to its effective tax rate, other than the following item. The Company expects to conclude the IRS audit of its U.S. Federal consolidated income tax returns for the years 2003-2005 within the next 12 months. The gross uncertain tax positions at December 31, 2009 for the items expected to be resolved is approximately $66 million plus gross interest of $10 million. The potential tax benefit to continuing operations could be approximately $72 million.

The following are the major tax jurisdictions in which the Company and its affiliates operate and the earliest tax year subject to examination:

Jurisdiction	Tax year
United States	2003
Mexico	2008
New York State and City	2005
United Kingdom	2007
Japan	2006
Brazil	2005
Singapore	2003
Hong Kong	2004
Ireland	2005

Foreign pretax earnings approximated $6.8 billion in 2009, $10.3 billion in 2008, and $9.1 billion in 2007 ($0.6 billion loss, $4.4 billion profit, and $0.8 billion profit of which, respectively, are in discontinued operations). As a U.S. corporation, Citigroup and its U.S. subsidiaries are subject to U.S. taxation currently on all foreign pretax earnings earned by a foreign branch. Pretax earnings of a foreign subsidiary or affiliate are subject to U.S. taxation when effectively repatriated. The Company provides income taxes on the undistributed earnings of non-U.S. subsidiaries except to the extent that such earnings are indefinitely invested outside the United States. At December 31, 2009, $27.3 billion of accumulated undistributed earnings of non-U.S. subsidiaries were indefinitely invested. At the existing U.S. federal income tax rate, additional taxes (net of U.S. foreign tax credits) of $7.4 billion would have to be provided if such earnings were remitted currently. The current year’s effect on the income tax expense from continuing operations is included in the “Foreign income tax rate differential” line in the reconciliation of the federal statutory rate to the Company’s effective income tax rate.

Income taxes are not provided for on the Company’s savings bank base year bad debt reserves that arose before 1988 because under current U.S. tax rules such taxes will become payable only to the extent such amounts are distributed in excess of limits prescribed by federal law. At December 31, 2009, the amount of the base year reserves totaled approximately $358 million (subject to a tax of $125 million).

The Company has no valuation allowance on deferred tax assets at December 31, 2009 and December 31, 2008.

In billions of dollars

Jurisdiction/Component	DTA Balance December 31, 2009	DTA Balance December 31, 2008

New York City NOL carryforwards		
2028	$	3.7
2029		1.2
Total New York City NOL carryforwards (1)	$	4.9

(1) Pretax.

With respect to the New York NOLs, the Company has recorded a net deferred tax asset of $0.9 billion, along with less significant net operating losses in various other states for which the Company has recorded a deferred tax asset of $0.4 billion and which expire between 2012 and 2029. In addition, the Company has recorded deferred tax assets in foreign subsidiaries, for which an assertion has been made that the earnings have been indefinitely reinvested, for net operating loss carryforwards of $607 million (which expire 2012 - 2019) and $69 million (with no expiration).

Although realization is not assured, the Company believes that the realization of the recognized net deferred tax asset of $46.1 billion is more likely than not based on expectations as to future taxable income in the jurisdictions in which the DTAs arise and available tax planning strategies, as defined in ASC 740, Income Taxes, (formerly SFAS 109) that could be implemented if necessary to prevent a carryforward from expiring. Included in the net U.S. Federal DTA of $36.3 billion are $5 billion in DTLs that will reverse in the relevant carryforward period and may be used to support the DTA , and $0.5 billion in compensation deductions, which reduced additional paid-in capital in January, 2010 and for which no adjustment was permitted to such DTA at December 31, 2009 because the related stock compensation was not yet deductible to the Company. In general, the Company would need to generate approximately $86 billion of taxable income during the respective carryforward periods to fully realize its U.S. Federal, state and local DTAs.

As a result of the recent losses incurred, the Company is in a three-year cumulative pretax loss position at December 31, 2009. A cumulative loss position is considered significant negative evidence in assessing the realizability of a DTA. The Company has concluded that there is sufficient positive evidence to overcome this negative evidence. The positive evidence includes two means by which the Company is able to fully realize its DTA. First, the Company forecasts sufficient taxable income in the carryforward period, exclusive of tax planning strategies, even under stressed scenarios. Secondly, the Company has sufficient tax planning strategies, including potential sales of businesses and assets, in which it could realize the excess

of appreciated value over the tax basis of its assets, in an amount sufficient to fully realize its DTA. The amount of the DTA considered realizable, however, could be significantly reduced in the near term if estimates of future taxable income during the carryforward period are significantly lower than forecasted due to deterioration in market conditions.

Based upon the foregoing discussion, as well as tax planning opportunities and other factors discussed below, the U.S. Federal and New York State and City net operating loss carryforward period of 20 years provides enough time to utilize the DTAs pertaining to the existing net operating loss carryforwards and any NOL that would be created by the reversal of the future net deductions which have not yet been taken on a tax return.

The U.S. foreign tax credit carryforward period is 10 years. In addition, utilization of foreign tax credits in any year is restricted to 35% of foreign source taxable income in that year. Further, overall domestic losses that the Company has incurred of approximately $45 billion are allowed to be reclassified as foreign source income to the extent of 50% of domestic source income produced in subsequent years and such resulting foreign source income is in fact sufficient to cover the foreign tax credits being carried forward. As such, the foreign source taxable income limitation will not be an impediment to the foreign tax credit carryforward usage as long as the Company can generate sufficient domestic taxable income within the 10-year carryforward period.

Regarding the estimate of future taxable income, the Company has projected its pretax earnings, predominantly based upon the “core” businesses that the Company intends to conduct going forward. These “core” businesses have produced steady and strong earnings in the past. During 2008 and 2009, the “core” businesses were negatively affected by the large increase in consumer credit losses during this sharp economic downturn cycle. The Company has already taken steps to reduce its cost structure. Taking these items into account, the Company is projecting that it will generate sufficient pretax earnings within the 10-year carryforward period alluded to above to be able to fully utilize the foreign tax credit carryforward, in addition to any foreign tax credits produced in such period.

The Company has also examined tax planning strategies available to it which would be employed, if necessary, to prevent a carryforward from expiring. These strategies include repatriating low taxed foreign earnings for which an assertion that the earnings have been indefinitely reinvested has not been made, accelerating taxable income into or deferring deductions out of the latter years of the carryforward period with reversals to occur after the carryforward period (for example, selling appreciated intangible assets and electing straight-line depreciation), holding onto available-for-sale debt securities with losses until they mature and selling certain assets which produce tax exempt income, while purchasing assets which produce fully taxable income. In addition, the sale or restructuring of certain businesses, can produce significant taxable income within the relevant carryforward periods.

The Company's ability to utilize its deferred tax assets to offset future taxable income may be significantly limited if the Company experiences an "ownership change," as defined in Section 382 of the Internal Revenue Code of 1986, as amended (the "Code"). In general, an ownership change will occur if there is a cumulative change in Citi's ownership by "5% shareholders" (as defined in the Code) that exceeds 50 percentage points over a rolling three-year period. The common stock issued pursuant to the exchange offers in July, 2009 and the common stock and tangible equity units issued in December, 2009 as part of Citigroup's TARP repayment did not result in an ownership change under the Code. However, these common stock issuances have materially increased the risk that Citigroup will experience an ownership change in the future. On June 9, 2009, the board of directors of Citigroup adopted a tax benefits preservation plan (the "Plan"). This Plan is subject to the shareholders' approval at the 2010 Annual Meeting. The purpose of the Plan is to minimize the likelihood of an ownership change occurring for Section 382 purposes. Despite adoption of the Plan, future transactions in our stock that may not be in our control may cause Citi to experience an ownership change and thus limit the Company's ability to utilize its deferred tax asset and reduce its stockholders' equity.

12. EARNINGS PER SHARE

The following is a reconciliation of the income and share data used in the basic and diluted earnings-per-share computations for the years ended December 31:

In millions, except per-share amounts	2009	2008 (1)	2007 (1)
Income (loss) before attribution of noncontrolling interests	$ (1,066)	$ (32,029)	$ 3,192
Noncontrolling interests	95	(343)	283
Net income (loss) from continuing operations (for EPS purposes)	$ (1,161)	$ (31,686)	$ 2,909
Income (loss) from discontinued operations, net of taxes	(445)	4,002	708
Citigroup's net income (loss)	$ (1,606)	$ (27,684)	$ 3,617
Impact of the public and private preferred stock exchange offers	(3,242)	—	—
Preferred dividends	(2,988)	(1,695)	(36)
Impact of the conversion price reset related to the $12.5 billion convertible preferred stock private issuance	(1,285)	—	—
Preferred stock Series H discount accretion	(123)	(37)	—
Net income (loss) available to common shareholders	$ (9,244)	$ (29,416)	$ 3,581
Dividends allocated to participating securities, net of forfeitures	(2)	(221)	(261)
Net income (loss) allocated to common shareholders for basic EPS (2)	$ (9,246)	$ (29,637)	$ 3,320
Effect of dilutive securities	540	877	—
Net income (loss) allocated to common shareholders for diluted EPS (2)	$ (8,706)	$ (28,760)	$ 3,320
Weighted-average common shares outstanding applicable to basic EPS	11,568.3	5,265.4	4,905.8
Effect of dilutive securities			
Convertible securities	312.2	503.2	—
Options	0.2	0.3	18.2
TDECs	218.3	—	—
Adjusted weighted-average common shares outstanding applicable to diluted EPS (3)	12,099.0	5,768.9	4,924.0
Basic earnings per share (3)			
Income (loss) from continuing operations	$ (0.76)	$ (6.39)	$ 0.53
Discontinued operations	(0.04)	0.76	0.15
Net income (loss)	$ (0.80)	$ (5.63)	$ 0.68
Diluted earnings per share (3)			
Income (loss) from continuing operations	$ (0.76)	$ (6.39)	$ 0.53
Discontinued operations	(0.04)	0.76	0.14
Net income (loss)	$ (0.80)	$ (5.63)	$ 0.67

(1) The Company adopted ASC 260-10-45 to 65 (FSP EITF 03-6-1) on January 1, 2009. All prior periods have been restated to conform to the current period's presentation.

(2) Due to the net loss available to common shareholders in 2009 and 2008, loss available to common stockholders for basic EPS was used to calculate diluted EPS. Adding back the effect of dilutive securities would result in anti-dilution.

(3) Due to the net loss available to common shareholders in 2009 and 2008, basic shares were used to calculate diluted EPS. Adding dilutive securities to the denominator would result in anti-dilution.

During 2009, 2008 and 2007, weighted-average options to purchase 157.9 million, 156.1 million and 76.3 million shares of common stock, respectively, were outstanding but not included in the computation of earnings per common share, because the weighted-average exercise prices of $28.12, $41.19 and $50.40, respectively, were greater than the average market price of the Company's common stock. Additionally, warrants to purchase 210,084,034 shares of common stock issued to the U.S. Treasury as part of TARP on November 28, 2008, the warrants to purchase 188,501,414 shares of common stock issued to the U.S. Treasury as part of TARP on December 31, 2008, and the warrants to purchase 66,531,728 shares of common stock
issued to the U.S. Treasury as consideration for the loss-sharing agreement on January 15, 2009 were not included in the computation of earnings per common share, because the warrants' exercise prices were greater than the average market price of the Company's common stock. In addition, equity awards granted under the Management Committee Long-Term Incentive Plan (MC LTIP) of approximately 3 million, 8 million and 16 million in 2009, 2008 and 2007, respectively, were not included in the computation of earnings per common share because the performance targets under the terms of the awards were not met.

13. FEDERAL FUNDS/SECURITIES BORROWED, LOANED, AND SUBJECT TO REPURCHASE AGREEMENTS

Federal funds sold and securities borrowed or purchased under agreements to resell, at their respective fair values, consisted of the following:

In millions of dollars at December 31,	2009	2008
Federal funds sold	$ 4	$ —
Securities purchased under agreements to resell	105,165	78,701
Deposits paid for securities borrowed	116,853	105,432
Total	$ 222,022	$ 184,133

Federal funds purchased and securities loaned or sold under agreements to repurchase, at their respective fair values, consisted of the following:

In millions of dollars at December 31,	2009	2008
Federal funds purchased	$ 2,877	$ 5,755
Securities sold under agreements to repurchase	125,561	177,585
Deposits received for securities loaned	25,843	21,953
Total	$ 154,281	$ 205,293

The resale and repurchase agreements represent collateralized financing transactions used to generate net interest income and facilitate trading activity. These instruments are collateralized principally by government and government-agency securities and generally have terms ranging from overnight to up to a year.

It is the Company's policy to take possession of the underlying collateral, monitor its market value relative to the amounts due under the agreements and, when necessary, require prompt transfer of additional collateral or reduction in the balance in order to maintain contractual margin protection. In the event of counterparty default, the financing agreement provides the Company with the right to liquidate the collateral held.

The majority of the resale and repurchase agreements are recorded at fair value. The remaining portion is carried at the amount of cash initially advanced or received, plus accrued interest, as specified in the respective agreements. Resale agreements and repurchase agreements are reported net by counterparty, when applicable. Excluding the impact of the allowable netting, resale agreements totaled $166.0 billion and $114.0 billion at December 31, 2009 and 2008, respectively.

A majority of the deposits paid for securities borrowed and deposits received for securities loaned are recorded at the amount of cash advanced or received and are collateralized principally by government and government-agency securities and corporate debt and equity securities. The remaining portion is recorded at fair value as the Company elected fair value options for certain securities borrowed and loaned portfolios. With respect to securities loaned, the Company receives cash collateral in an amount generally in excess of the market value of securities loaned. The Company monitors the market value of securities borrowed and securities loaned daily, and additional collateral is obtained as necessary. Securities borrowed and securities loaned are reported net by counterparty, when applicable.

14. BROKERAGE RECEIVABLES AND BROKERAGE PAYABLES

The Company has receivables and payables for financial instruments purchased from and sold to brokers, dealers and customers. The Company is exposed to risk of loss from the inability of brokers, dealers or customers to pay for purchases or to deliver the financial instruments sold, in which case the Company would have to sell or purchase the financial instruments at prevailing market prices. Credit risk is reduced to the extent that an exchange or clearing organization acts as a counterparty to the transaction.

The Company seeks to protect itself from the risks associated with customer activities by requiring customers to maintain margin collateral in compliance with regulatory and internal guidelines. Margin levels are monitored daily, and customers deposit additional collateral as required. Where customers cannot meet collateral requirements, the Company will liquidate sufficient underlying financial instruments to bring the customer into compliance with the required margin level.

Exposure to credit risk is impacted by market volatility, which may impair the ability of clients to satisfy their obligations to the Company. Credit limits are established and closely monitored for customers and brokers and dealers engaged in forwards, futures and other transactions deemed to be credit sensitive.

Brokerage receivables and brokerage payables, which arise in the normal course of business, consisted of the following at December 31:

In millions of dollars	2009	2008
Receivables from customers	$24,721	$26,297
Receivables from brokers, dealers, and clearing organizations	8,913	17,981
Total brokerage receivables	$33,634	$44,278
Payables to customers	$41,262	$54,167
Payables to brokers, dealers, and clearing organizations	19,584	16,749
Total brokerage payables	$60,846	$70,916

15. TRADING ACCOUNT ASSETS AND LIABILITIES

Trading account assets and Trading account liabilities, at fair value, consisted of the following at December 31:

In millions of dollars	2009	2008
Trading account assets		
Mortgage-backed securities		
U.S. government sponsored agency guaranteed	$ 20,638	$ 32,981
Prime	1,156	1,416
Alt-A	1,229	913
Subprime	9,734	14,552
Non-U.S. residential	2,368	2,447
Commercial	3,455	2,501
Total mortgage-backed securities	$ 38,580	$ 54,810
U.S. Treasury and federal agencies		
U.S. Treasuries	$ 28,938	$ 7,370
Agency and direct obligations	2,041	4,017
Total U.S. Treasury and federal agencies	$ 30,979	$ 11,387
State and municipal securities	$ 7,147	$ 9,510
Foreign government securities	72,769	57,422
Corporate	51,985	54,654
Derivatives (1)	58,879	115,289
Equity securities	46,221	48,503
Other debt securities	36,213	26,060
Total trading account assets	$342,773	$377,635
Trading account liabilities		
Securities sold, not yet purchased	$ 73,406	$ 50,693
Derivatives (1)	64,106	115,107
Total trading account liabilities	$137,512	$165,800

(1) Presented net, pursuant to master netting agreements. See Note 24 to the Consolidated Financial Statements for a discussion regarding the accounting and reporting for derivatives.

16. INVESTMENTS

In millions of dollars	2009	2008
Securities available-for-sale	$239,599	$175,189
Debt securities held-to-maturity (1)	51,527	64,459
Non-marketable equity securities carried at fair value (2)	6,830	9,262
Non-marketable equity securities carried at cost (3)	8,163	7,110
Total investments	$306,119	$256,020

(1) Recorded at amortized cost.
(2) Unrealized gains and losses for non-marketable equity securities carried at fair value are recognized in earnings.
(3) Non-marketable equity securities carried at cost primarily consist of shares issued by the Federal Reserve Bank, Federal Home Loan Bank, foreign central banks and various clearing houses of which Citigroup is a member.

Securities Available-for-Sale

The amortized cost and fair value of securities available-for-sale at December 31, 2009 and December 31, 2008 were as follows:

	2009				2008 (1)			
In millions of dollars	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value	Amortized cost	Gross unrealized gains	Gross unrealized losses	Fair value

Total securities available-for-sale	$239,212	$4,085	$3,698	$239,599	$182,359	$2,244	$9,414	$175,189

(1) Reclassified to conform to the current period's presentation.

At December 31, 2009, the cost of approximately 5,000 investments in equity and fixed-income securities exceeded their fair value by $3.698 billion. Of the $3.698 billion, the gross unrealized loss on equity securities was $212 million. Of the remainder, $1.756 billion represents fixed-income investments that have been in a gross-unrealized-loss position for less than a year and, of these, 44% are rated investment grade; $1.730 billion represents fixed-income investments that have been in a gross-unrealized-loss position for a year or more and, of these, 96% are rated investment grade.

Available-for-sale mortgage-backed securities-portfolio fair value balance of $29.068 billion consists of $20.914 billion of government-sponsored agency securities, and $8.154 billion of privately sponsored securities of which the majority is backed by mortgages that are not Alt-A or subprime.

The decrease in gross unrealized losses on mortgage-backed securities was primarily related to a tightening of market spreads, reflecting a decrease in risk/liquidity premiums. The decrease in gross unrealized losses on state and municipal debt securities was the result of recovery in the municipal markets, as liquidity increased and municipal bond yields decreased.

As discussed in more detail below, the Company conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. Any credit-related impairment related to debt securities the Company does not plan to sell and

is not likely to be required to sell is recognized in the Consolidated Statement of

Income, with the non-credit-related impairment recognized in OCI. For other impaired debt securities, the entire impairment is recognized in the Consolidated Statement of Income.

The table below shows the fair value of investments in available-for-sale securities that have been in an unrealized loss position for less than 12 months or for 12 months or longer as of December 31, 2009 and 2008:

	Less than 12 months		12 months or longer		Total

Gross realized investment losses	(94)	(158)	(267)
Net realized gains (losses)	$1,996	$ 679	$1,168

Debt Securities Held-to-Maturity

During the fourth quarter of 2008, the Company reviewed portfolios of debt securities classified in Trading account assets and available-for-sale securities, and identified positions where there had been a change of intent to hold the debt securities for much longer periods of time than originally anticipated. The Company believed that the expected cash flows to be generated from holding the assets significantly exceed their

current fair value, which had been significantly and adversely impacted by the reduced liquidity in the global financial markets.

Transfers of securities out of the trading category must be rare. Citigroup made a number of transfers out of the trading and available-for-sale categories in order to better reflect the revised intentions of the Company in response to the recent significant deterioration in market conditions, which were especially acute during the fourth quarter of 2008. These rare market conditions were not foreseen at the initial purchase date of the securities. Most of the debt securities previously classified as trading were bought and held principally for the purpose of selling them in the short term, many in the context of Citigroup's acting as a market maker. At the date of acquisition, most of these positions were liquid, and the Company expected active and frequent buying and selling with the objective of generating profits on short-term differences in price. However, subsequent declines in value of these securities were primarily related to the ongoing widening of market credit spreads reflecting increased risk and liquidity premiums that buyers were demanding. As market liquidity decreased, the primary buyers for these securities typically demanded returns on investments that were significantly higher than previously experienced.

Reclassification of debt securities were made at fair value on the date of transfer. The December 31, 2008 carrying value of the securities transferred from Trading account assets and available-for-sale securities was $33.3 billion and $27.0 billion, respectively. The Company purchased an additional $4.2 billion of held-to-maturity securities during the fourth quarter of 2008, in accordance with prior commitments.

Debt Securities Held-to-Maturity

The carrying value and fair value of securities held-to-maturity (HTM) at December 31, 2009 and December 31, 2008 were as follows:

In millions of dollars	Amortized cost (1)	Net unrealized loss recognized in AOCI	Carrying value (2)	Gross unrecognized gains	Gross unrecognized losses	Fair value

(1) For securities transferred to HTM from Trading account assets, amortized cost is defined as the fair value amount of the securities at the date of transfer plus any accretion income and less any impairments recognized in earnings subsequent to transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, plus or minus any accretion or amortization of interest, less any impairment previously recognized in earnings.

(2) HTM securities are carried on the Consolidated Balance Sheet at amortized cost and the changes in the value of these securities, other than impairment charges, are not reported on the financial statements.

The net unrealized losses classified in Accumulated other comprehensive income (AOCI) relate to debt securities reclassified from AFS investments to HTM investments, and to additional declines in fair value for HTM securities that suffer credit impairment. The balance was $7.6 billion as of December 31, 2009, compared to $8.0 billion as of December 31, 2008. This balance is amortized over the remaining life of the related securities as an adjustment
of yield in a manner consistent with the accretion of discount on the same transferred debt securities. This will have no impact on the Company's net income because the amortization of the unrealized holding loss reported in equity will offset the effect on interest income of the accretion of the discount on these securities.

The table below shows the fair value of investments in HTM that have been in an unrecognized loss position for less than 12 months or for 12 months or longer as of December 31, 2009 and December 31, 2008:

In millions of dollars	Less than 12 months Fair value	Less than 12 months Gross unrecognized losses	12 months or longer Fair value	12 months or longer Gross unrecognized losses	Total Fair value	Total Gross unrecognized losses
December 31, 2009

Asset-backed securities	9,051	381	4,164	174	13,215	555
Other debt securities	439	—	5,246	127	5,685	127
Total debt securities held-to-maturity	$14,360	$1,265	$37,753	$3,090	$52,113	$4,355

Excluded from the gross unrecognized losses presented in the above table are the $7.6 billion and $8.0 billion of gross unrealized losses recorded in AOCI related to the HTM securities that were reclassified from AFS investments as of December 31, 2009 and December 31, 2008, respectively.
Approximately $6.8 billion and $5.2 billion of these unrealized losses relate to securities that have been in a loss position for 12 months or longer at December 31, 2009 and December 31, 2008, respectively.

The following table presents the carrying value and fair value of HTM debt securities by contractual maturity dates as of December 31, 2009 and December 31, 2008:

In millions of dollars	December 31, 2009 Carrying value	December 31, 2009 Fair value	December 31, 2008 Carrying value	December 31, 2008 Fair value

Total debt securities held-to-maturity	$51,527	$52,998	$64,459	$ 60,377

(1)

Investments with no stated maturities are included as contractual maturities of greater than 10 years. Actual maturities may differ due to call or prepayment rights.

(2) Includes asset-backed securities and all other debt securities.

Evaluating Investments for Other-Than-Temporary Impairments

The Company conducts and documents periodic reviews of all securities with unrealized losses to evaluate whether the impairment is other than temporary. Prior to January 1, 2009, these reviews were conducted pursuant to FASB Staff Position No. FAS 115-1, The Meaning of Other-Than-Temporary Impairment and its Application to Certain Investments (now incorporated into ASC 320-10-35, Investments—Debt and Equity Securities—Subsequent Measurement). Any unrealized loss identified as other than temporary was recorded directly in the Consolidated Statement of Income. As of January 1, 2009, the Company adopted FSP FAS 115-2 and FAS 124-2 (now incorporated into ASC 320-10-35-34, Investments—Debt and Equity Securities: Recognition of an Other-Than-Temporary Impairment). This guidance amends the impairment model for debt securities; the impairment model for equity securities was not affected.

Under the new guidance for debt securities, other-than-temporary impairment is recognized in earnings for debt securities which the Company has an intent to sell or which the Company believes it is more-likely-than-not that it will be required to sell prior to recovery of the amortized cost basis. For those securities which the Company does not intend to sell or expect to be required to sell, credit-related impairment is recognized in earnings, with the non-credit-related impairment recorded in AOCI.

An unrealized loss exists when the current fair value of an individual security is less than its amortized cost basis. Unrealized losses that are determined to be temporary in nature are recorded, net of tax, in AOCI for AFS securities, while such losses related to HTM securities are not recorded, as these investments are carried at their amortized cost. For securities transferred to HTM from Trading account assets, amortized cost is defined as the fair value of the securities at the date of transfer, plus any accretion income and less any impairment recognized in earnings subsequent to transfer. For securities transferred to HTM from AFS, amortized cost is defined as the original purchase cost, plus or minus any accretion or amortization of a purchase discount or premium, less any impairment recognized in earnings subsequent to transfer.

Regardless of the classification of the securities as AFS or HTM, the Company has assessed each position for impairment.

Factors considered in determining whether a loss is temporary include:

- the length of time and the extent to which fair value has been below cost;
- the severity of the impairment;
- the cause of the impairment and the financial condition and near-term prospects of the issuer;
- activity in the market of the issuer which may indicate adverse credit conditions; and
- the Company's ability and intent to hold the investment for a period oftime sufficient to allow for any anticipated recovery.

The Company's review for impairment generally entails:

- identification and evaluation of investments that have indications of possible impairment;
- analysis of individual investments that have fair values less than amortized cost, including consideration of the length of time the investment has been in an unrealized loss position and the expected recovery period;
- discussion of evidential matter, including an evaluation of factors or triggers that could cause individual investments to qualify as having other-than-temporary impairment and those that would not support other-than-temporary impairment; and
- documentation of the results of these analyses, as required under business policies.

For equity securities, management considers the various factors described above, including its intent and ability to hold the equity security for a period of time sufficient for recovery to amortized cost. Where management lacks that intent or ability, the security's decline in fair value is deemed to be other than temporary and is recorded in earnings. AFS equity securities deemed other-than-temporarily impaired are written down to fair value, with the full difference between fair value and amortized cost recognized in earnings.

For debt securities that are not deemed to be credit impaired, management assesses whether it intends to sell or whether it is more-likely-than-not that it would be required to sell the investment before the expected recovery of the amortized cost basis. In most cases, management has asserted that it has no intent to sell and that it believes it is not likely to be required to sell the investment before recovery of its amortized cost basis. Where such an assertion has not been made, the security's decline in fair value is deemed to be other than temporary and is recorded in earnings.

For debt securities, a critical component of the evaluation for other-than-temporary impairments is the identification of credit impaired securities, where management does not expect to receive cash flows sufficient to recover the entire amortized cost basis of the security. For securities purchased and classified as AFS with the expectation of receiving full principal and interest cash flows, this analysis considers the likelihood of receiving all contractual principal and interest. For securities reclassified out of the trading category in the fourth quarter of 2008, the analysis considers the likelihood of receiving the expected principal and interest cash flows anticipated as of the date of reclassification in the fourth quarter of 2008. The extent of the Company's analysis regarding credit quality and the stress on assumptions used in the analysis have been refined for securities where the current fair value or other characteristics of the security warrant. The paragraphs below describe the Company's process for identifying credit impairment in security types with the most significant unrealized losses as of December 31, 2009.

Mortgage-backed securities

For U.S. mortgage-backed securities (and in particular for Alt-A and other mortgage-backed securities that have significant unrealized losses as a percentage of amortized cost), credit impairment is assessed using a cash flow model that estimates the cash flows on the underlying mortgages, using the security-specific collateral and transaction structure. The model estimates cash flows from the underlying mortgage loans and distributes those cash flows to various tranches of securities, considering the transaction structure and any subordination and credit enhancements that exist in that structure. The cash flow model incorporates actual cash flows on the mortgage-backed securities through the current period and then projects the remaining cash flows using a number of assumptions, including default rates, prepayment rates, and recovery rates (on foreclosed properties).

Management develops specific assumptions using as much market data as possible and includes internal estimates as well as estimates published by rating agencies and other third-party sources. Default rates are projected by considering current underlying mortgage loan performance, generally assuming the default of (1) 10% of current loans, (2) 25% of 30–59 day delinquent loans, (3) 75% of 60–90 day delinquent loans and (4) 100% of 91+ day delinquent loans. These estimates are extrapolated along a default timing curve to estimate the total lifetime pool default rate. Other assumptions used contemplate the actual collateral attributes, including geographic concentrations, rating agency loss projections, rating actions and current market prices.

The key base assumptions for mortgage-backed securities as of December 31, 2009 are in the table below:

	December 31, 2009
Prepayment rate	3–8 CRR
Loss severity (1)	45%–75%
Unemployment rate	10%
Peak-to-trough housing price decline	32.3%

(1) Loss severity rates are estimated considering collateral characteristics and generally range from 45%–60% for prime bonds, 50%–70% for Alt-A bonds, and 65%–75% for subprime bonds.

In addition, cash flow projections are developed using more stressful parameters, and management assesses the results of those stress tests (including the severity of any cash shortfall indicated and the likelihood of the stress scenarios actually occurring based on the underlying pool's characteristics and performance) to assess whether management expects to recover the amortized cost basis of the security. If cash flow projections indicate that the Company does not expect to recover its amortized cost basis, the Company recognizes the estimated credit loss in earnings.

State and municipal securities

Citigroup's AFS state and municipal bonds consist mainly of bonds that are financed through Tender Option Bond programs. The process for identifying credit impairment for bonds in this program as well as for bonds that were previously financed in this program is largely based on third-party credit ratings. Individual bond positions must meet minimum ratings requirements, which vary based on the sector of the bond issuer. The average portfolio rating, ignoring any insurance, is Aa3/AA-.

Citigroup monitors the bond issuer and insurer ratings on a daily basis. In the event of a downgrade of the bond below the Aa3/AA-, the subject bond is specifically reviewed for potential shortfall in contractual principal and interest. Citigroup has not recorded any credit impairments on bonds held as part of the Tender Option Bond program or on bonds that were previously held as part of the Tender Option Bond program.

The remainder of Citigroup's AFS state and municipal bonds, outside of the above, are specifically reviewed for credit impairment based on instrument-specific estimates of cash flows, probability of default and loss given default.

Recognition and Measurement of Other-Than-Temporary Impairment

The following table presents the total other-than-temporary impairments recognized during the 12 months ended December 31, 2009:

Other-Than-Temporary Impairments (OTTI) on Investments	Year ended December 31, 2009		
In millions of dollars	AFS	HTM	Total
Impairment losses related to securities that the Company does not intend to sell nor will likely be required to sell			
Total OTTI losses recognized during the year ended December 31, 2009	$ 468	$6,600	$7,068
Less: portion of OTTI loss recognized in AOCI (before taxes)	60	4,296	4,356
Net impairment losses recognized in earnings for securities that the Company does not intend to sell nor will likely be required to sell	$ 408	$2,304	$2,712
OTTI losses recognized in earnings for securities that the Company intends to sell or more-likely-than-not will be required to sell before recovery	194	—	194

Total impairment losses recognized in earnings	$ 602	$ 2,304	$ 2,906

The following is a 12-month roll-forward of the credit-related position recognized in earnings for AFS and HTM debt securities held as of December 31, 2009:

	Cumulative Other-Than-Temporary Impairment Credit Losses Recognized in Earnings				
In millions of dollars	December 31, 2008 balance	Credit impairments recognized in earnings on securities not previously impaired	Credit impairments recognized in earnings on securities that have been previously impaired	Reductions due to sales of credit impaired securities sold or matured	Dec. 31, 2009 balance

Investments in Alternative Investment Funds

The Company holds investments in certain hedge funds, private equity funds, fund of funds and real estate funds, and includes both funds that are managed by the Company and funds managed by third parties. These
investments are generally classified as non-marketable equity securities carried at fair value. The fair value of these investments has been estimated using the net asset value (NAV) per share of the Company's ownership interest in the funds, where it is not probable that the Company will sell an investment at a price other than NAV.

In millions of dollars at December 31, 2009	Fair value	Unfunded commitments	Redemption frequency (if currently eligible) Monthly, quarterly, annually	Redemption notice period
Hedge funds	$ 80	$ —		10–95 days
Private equity funds	1,516	702	—	—
Real estate funds (1)	123	37	—	—
Total	$1,719	$ 739		

(1) This category includes several real estate funds that invest primarily in commercial real estate in the U.S., Europe and Asia. These investments can never be redeemed with the funds. Distributions from each fund will be received as the underlying investments in the funds are liquidated. It is estimated that the underlying assets of the fund will be liquidated over a period of several years as market conditions allow. While certain assets within the portfolio may be sold, no specific assets have been identified for sale. Because it is not probable that any individual investment will be sold, the fair value of each individual investment has been estimated using the net asset value of the Company's ownership interest in the partners' capital. There is no standard redemption frequency nor is a prior notice period required. The investee fund's management must approve of the buyer before the sale of the investments can be completed.

17. LOANS

	$105,566	$129,273
Total corporate loans	$169,721	$217,489
Net unearned income (4)	(2,274)	(4,660)
Corporate loans, net of unearned income	$167,447	$212,829

(1) The Company classifies consumer and corporate loans based on the segment and sub-segment that manages the loans. See Note 1 to the Consolidated Financial Statements.
(2) Loans secured primarily by real estate.
(3) Includes loans not otherwise separately categorized.
(4) The unearned income in 2008 includes loans that were transferred in that period from the held-for-sale category to the held-for-investment category at a discount to par.

Included in the previous loan table are lending products whose terms may give rise to additional credit issues. Credit cards with below-market introductory interest rates, multiple loans supported by the same collateral (e.g., home equity loans), and interest-only loans are examples of such products. However, these products are not material to Citigroup's financial position and are closely managed via credit controls that mitigate their additional inherent risk.

Impaired loans are those where Citigroup believes it is probable that it will not collect all amounts due according to the original contractual terms of the loan. Impaired loans include corporate non-accrual loans as well as smaller-balance homogeneous loans whose terms have been modified due to the borrower's financial difficulties and Citigroup granted a concession to the borrower. Such modifications may include interest rate reductions and/or principal forgiveness. Valuation allowances for these loans are estimated considering all available evidence including, as appropriate, the present value of the expected future cash flows discounted at the loan's original contractual effective rate, the secondary market value of the loan and the fair value of collateral less disposal costs. These totals exclude smaller-balance homogeneous loans that have not been modified and are carried on a non-accrual basis, as well as substantially all loans modified for periods of 12 months or less. At December 31, 2009, loans included in those short-term programs amounted to $10.1 billion.

The following table presents information about impaired loans:

In millions of dollars at year end	2009	2008	2007

Impaired corporate loans			
Commercial and industrial	$ 6,413	$ 6,327	$ 246
Loans to financial institutions	1,794	2,635	1,122
Mortgage and real estate	4,051	407	59
Lease financing	—	35	—
Other	1,287	328	238
Total impaired corporate loans	$13,545	$ 9,732	$1,665
Impaired consumer loans (1)			
Mortgage and real estate	$10,629	$ 5,023	$ 201
Installment and other	3,853	2,903	40
Cards	2,453	1,085	—
Total impaired consumer loans	$16,935	$ 9,011	$ 241
Total (2)	$30,480	$18,743	$1,906
Impaired corporate loans with valuation allowances	$ 8,578	$ 7,300	$1,314
Impaired consumer loans with valuation allowances	16,453	8,573	—
Impaired corporate valuation allowance	$ 2,480	$ 2,698	$ 388
Impaired consumer valuation allowance	4,977	2,373	—
Total valuation allowances (3)	$ 7,457	$ 5,071	$ 388
During the year			
Average balance of impaired corporate loans	$12,990	$ 4,157	$ 967
Average balance of impaired consumer loans	14,049	5,266	—
Interest income recognized on			
Impaired corporate loans	$ 21	$ 49	$ 101
Impaired consumer loans	792	$ 276	—

(1) Prior to 2008, the Company's financial accounting systems did not separately track impaired smaller-balance, homogeneous consumer loans whose terms were modified due to the borrowers' financial difficulties and it was determined that a concession was granted to the borrower. At December 31, 2009 and 2008, such modified impaired consumer loans amounted to $15.899 and $8.151 billion, respectively. However, information derived from the Company's risk management systems indicates that the amounts of such outstanding modified loans, including those modified prior to 2008, approximated $18.1 billion, $12.3 billion and $7.0 billion at December 31, 2009, 2008 and 2007, respectively.

(2) Excludes loans purchased for investment purposes.

(3) Included in the Allowance for loan losses.

In addition, included in the loan table are purchased distressed loans, which are loans that have evidenced significant credit deterioration subsequent to origination but prior to acquisition by Citigroup. In accordance with SOP 03-3, the difference between the total expected cash flows for these loans and the initial recorded investments is recognized in income over the life of the loans using a level yield. Accordingly, these loans have been excluded from the impaired loan information presented above. In addition, per SOP 03-3, subsequent decreases to the expected cash flows for a purchased distressed loan require a build of an allowance so the loan retains its level yield. However, increases in the expected cash flows are first recognized as a reduction of any previously established allowance and then recognized as income prospectively over the remaining life of the loan by increasing the loan's level yield. Where the expected cash flows cannot be reliably estimated, the purchased distressed loan is accounted for under the cost recovery method.

The carrying amount of the purchased distressed loan portfolio at December 31, 2009 was $825 million net of an allowance of $95 million.

The changes in the accretable yield, related allowance and carrying amount net of accretable yield for 2009 are as follows:

In millions of dollars	Accretable yield	Carrying amount of loan receivable	Allowance
Beginning balance	$ 92	$ 1,510	$ 122
Purchases (1)	14	329	—
Disposals/payments received	(5)	(967)	—
Accretion	(52)	52	—
Builds (reductions) to the allowance	(21)	1	(27)
Increase to expected cash flows	10	2	—
FX/Other	(11)	(7)	—
Balance, December 31, 2009 (2)	$ 27	$ 920	$ 95

(1) The balance reported in the column "Carrying amount of loan receivable" consists of $87 million of purchased loans accounted for under the level-yield method and $242 million under the cost-recovery method. These balances represent the fair value of these loans at their acquisition date. The related total expected cash flows for the level-yield loans were $101 million at their acquisition dates.

(2) The balance reported in the column "Carrying amount of loan receivable" consists of $561 million of loans accounted for under the level-yield method and $359 million accounted for under the cost-recovery method.

18. ALLOWANCE FOR CREDIT LOSSES

In millions of dollars	2009	2008 (1)	2007 (1)
Allowance for loan losses at beginning of year	$ 29,616	$ 16,117	$ 8,940
Gross credit losses	(32,784)	(20,760)	(11,864)
Gross recoveries	2,043	1,749	1,938

Allowance for loan losses at end of year	$ 36,033	$ 29,616	$ 16,117
Allowance for credit losses on unfunded lending commitments at beginning of year (3)	$ 887	$ 1,250	$ 1,100
Provision for unfunded lending commitments	244	(363)	150
Allowance for credit losses on unfunded lending commitments at end of year (3)	$ 1,157	$ 887	$ 1,250
Total allowance for loans, leases, and unfunded lending commitments	$ 37,190	$ 30,503	$ 17,367

(1) Reclassified to conform to the current period's presentation.

(2) 2009 primarily includes reductions to the loan loss reserve of approximately $543 million related to securitizations, approximately $402 million related to the sale or transfers to held-for-sale of U.S. Real Estate Lending Loans, and $562 million related to the transfer of the U.K. Cards portfolio to held-for-sale. 2008 primarily includes reductions to the loan loss reserve of approximately $800 million related to FX translation, $102 million related to securitizations, $244 million for the sale of the German retail banking operation, $156 million for the sale of CitiCapital, partially offset by additions of $106 million related to the Cuscatlán and Bank of Overseas Chinese acquisitions. 2007 primarily includes reductions to the loan loss reserve of $475 million related to securitizations and transfers to loans held-for-sale, and reductions of $83 million related to the transfer of the U.K. CitiFinancial portfolio to held-for-sale, offset by additions of $610 million related to the acquisitions of Egg, Nikko Cordial, Grupo Cuscatlán and Grupo Financiero Uno.

(3) Represents additional credit loss reserves for unfunded corporate lending commitments and letters of credit recorded in Other liabilities on the Consolidated Balance Sheet.

19. GOODWILL AND INTANGIBLE ASSETS

Goodwill

The changes in Goodwill during 2008 and 2009 were as follows:

In millions of dollars	
Balance at December 31, 2007	$41,053
Sale of German retail bank	$ (1,047)
Sale of CitiCapital	(221)
Sale of Citigroup Global Services Limited	(85)
Purchase accounting adjustments—BISYS	(184)
Purchase of the remaining shares of Nikko Cordial—net of purchase accounting adjustments	287
Acquisition of Legg Mason Private Portfolio Group	98
Foreign exchange translation	(3,116)
Impairment of goodwill	(9,568)
Smaller acquisitions, purchase accounting adjustments and other	(85)
Balance at December 31, 2008	$27,132
Sale of Smith Barney	$ (1,146)
Sale of Nikko Cordial Securities	(558)
Sale of Nikko Asset Management	(433)
Foreign exchange translation	547
Smaller acquisitions/divestitures, purchase accounting adjustments and other	(150)
Balance at December 31, 2009	$25,392

The changes in Goodwill by segment during 2008 and 2009 were as follows:

In millions of dollars	Regional Consumer Banking	Institutional Clients Group	Citi Holdings	Corporate/ Other	Total
Balance at December 31, 2007 (1)	$19,751	$ 9,288	$ 12,014	$—	$41,053
Goodwill acquired during 2008	$ 88	$ 108	$ 1,492	$—	$ 1,688
Goodwill disposed of during 2008	—	—	(1,378)	—	(1,378)
Goodwill impaired during 2008	(6,547)	—	(3,021)	—	(9,568)
Other (1)	(4,006)	775	(1,432)	—	(4,663)
Balance at December 31, 2008 (1)	$ 9,286	$ 10,171	$ 7,675	$—	$27,132
Goodwill acquired during 2009	$ —	$ —	$ —	$—	$ —
Goodwill disposed of during 2009	—	(39)	(2,248)	—	(2,287)
Other (1)	307	225	15	—	547
Balance at December 31, 2009	$ 9,593	$ 10,357	$ 5,442	$—	$25,392

(1) Other changes in Goodwill primarily reflect foreign exchange effects on non-dollar-denominated goodwill, as well as purchase accounting adjustments.

Goodwill impairment testing is performed at a level below the business segments (referred to as a reporting unit). The changes in the organizational structure in 2009 resulted in the creation of new reporting segments. As a result, commencing with the second quarter of 2009, the Company has identified new reporting units as required under ASC 350, Intangibles—Goodwill and Other. Goodwill affected by the reorganization has been reassigned from 10 reporting units to nine, using a fair value approach. During 2009, goodwill was allocated to disposals and tested for impairment under the new reporting units. The Company performed goodwill impairment testing for all reporting units as of April 1, 2009 and July 1, 2009. Additionally, the Company performed an interim goodwill impairment test for the Local Consumer Lending—Cards reporting unit as of November 30, 2009. No goodwill was written off due to impairment in 2009.

During 2008, the share prices of financial stocks continued to be very volatile and were under considerable pressure in sustained turbulent markets. In this environment, Citigroup's market capitalization remained below book value for most of the period and the Company performed goodwill impairment testing for all reporting units as of February 28, 2008, July 1, 2008 and December 31, 2008. The results of the first step of the impairment test showed no indication of impairment in any of the reporting units at any of the periods except December 31, 2008 and, accordingly, the Company did not perform the second step of the impairment test, except for the test performed as of December 31, 2008. As of December 31, 2008, there was an indication of impairment in the North America Consumer Banking, Latin America Consumer Banking, and Local Consumer Lending—Other reporting units and, accordingly, the second step of testing was performed on these reporting units.

Based on the results of the second step of testing, at December 31, 2008, the Company recorded a $9.6 billion pretax ($8.7 billion after-tax) goodwill impairment charge in the fourth quarter of 2008, representing most of the goodwill allocated to these reporting units. The primary cause for the goodwill impairment at December 31, 2008 in the above reporting units was rapid deterioration in the financial markets, as well as in the global economic outlook particularly during the period beginning mid-November through year-end 2008. The more significant fair value adjustments in the pro forma purchase price allocation in the second step of testing were to fair value loans and debt and were made to identify and value identifiable intangibles. The adjustments to measure the assets, liabilities and intangibles were for the purpose of measuring the implied fair value of goodwill and such adjustments are not reflected in the Consolidated Balance Sheet.

The following table shows reporting units with goodwill balances and the excess of fair value as a percentage over allocated book value as of December 31, 2009.

In millions of dollars

Reporting unit (1)	Fair value as a % of allocated book value	Goodwill
North America Regional Consumer Banking	174%	$ 2,453
EMEA Regional Consumer Banking	163	255
Asia Regional Consumer Banking	303	5,533
Latin America Regional Consumer Banking	215	1,352
Securities and Banking	203	8,784
Transaction Services	2,079	1,573
Brokerage and Asset Management	161	759
Local Consumer Lending—Cards	112	4,683

(1) Local Consumer Lending—Other is excluded from the table as there is no goodwill allocated to it.

While no impairment was noted in step one of the Company'sLocal Consumer Lending—Cards reporting unit impairment test at November 30, 2009, goodwill present in that reporting unit may be particularly sensitive to further deterioration in economic conditions. Under the market approach for valuing this reporting unit, the earnings multiples and transaction multiples were selected from multiples obtained using data from guideline companies and acquisitions. The selection of the actual multiple considers operating performance and financial condition such as return on equity and net income growth of Local Consumer Lending—Cards as compared to the guideline companies and acquisitions. For the valuation under the income approach, the Company utilized a discount rate, which it believes reflects the risk and uncertainty related to the projected cash flows, and selected 2012 as the terminal year.

Small deterioration in the assumptions used in the valuations, in particular the discount rate and growth rate assumptions used in the net income projections, could significantly affect the Company's impairment evaluation and, hence, results. If the future were to differ adversely from management's best estimate of key economic assumptions and associated cash flows were to decrease by a small margin, the Company could potentially experience future material impairment charges with respect to $4,683 million of goodwill remaining in our Local Consumer Lending—Cards reporting unit. Any such charges, by themselves, would not negatively affect the Company's Tier 1, Tier 1 Common and Total Capital regulatory ratios, its Tangible Common Equity or the Company's liquidity position.

Intangible Assets
The components of intangible assets were as follows:

In millions of dollars	December 31, 2009 Gross carrying amount	Accumulated amortization	Net carrying amount	December 31, 2008 Gross carrying amount	Accumulated amortization	Net carrying amount
Purchased credit card relationships	$ 8,148	$ 4,838	$ 3,310	$ 8,443	$ 4,513	$ 3,930
Core deposit intangibles	1,373	791	582	1,345	662	683
Other customer relationships	675	176	499	4,031	168	3,863
Present value of future profits	418	280	138	415	264	151
Indefinite-lived intangible assets	569	—	569	1,474	—	1,474
Other (1)	4,977	1,361	3,616	5,343	1,285	4,058
Intangible assets (excluding MSRs)	$16,160	$ 7,446	$ 8,714	$21,051	$ 6,892	$14,159
Mortgage servicing rights (MSRs)	6,530	—	6,530	5,657	—	5,657
Total intangible assets	$22,690	$ 7,446	$15,244	$26,708	$ 6,892	$19,816

(1) Includes contract-related intangible assets.

In 2009, Citigroup added $302 million in other intangibles, with a weighted-average amortization period of 13 years.

Intangible assets amortization expense was $1,179 million, $1,427 million and $1,267 million for 2009, 2008 and 2007, respectively. Intangible assets amortization expense is estimated to be $991 million in 2010, $934 million in 2011, $887 million in 2012, $802 million in 2013, and $770 million in 2014.

The changes in intangible assets during 2009 were as follows:

In millions of dollars	Net carrying amount at December 31, 2008	Acquisitions/ divestitures	Amortization	Impairments	FX and other (1)	Net carrying amount at December 31, 2009
Purchased credit card relationships	$ 3,930	$ (72)	$ (595)	$ —	$ 47	$ 3,310
Core deposit intangibles	683	—	(115)	(3)	17	582
Other customer relationships	3,863	(3,253)	(164)	—	53	499
Present value of future profits	151	—	(13)	—	—	138
Indefinite-lived intangible assets	1,474	(967)	—	—	62	569
Other	4,058	(108)	(292)	(53)	11	3,616
Intangible assets (excluding MSRs)	$ 14,159	$ (4,400)	$ (1,179)	$ (56)	$190	$ 8,714
Mortgage servicing rights (MSRs) (2)	5,657					6,530
Total intangible assets	$ 19,816					$ 15,244

(1) Includes foreign exchange translation and purchase accounting adjustments.
(2) See Note 23 to the Consolidated Financial Statements for the roll-forward of mortgage servicing rights.

20. DEBT

Short-Term Borrowings

Short-term borrowings consist of commercial paper and other borrowings with weighted average interest rates as follows:

In millions of dollars at December 31,	2009 Balance	2009 Weighted average	2008 Balance	2008 Weighted average
Commercial paper				
Citigroup Funding Inc.	$ 9,846	0.33%	$ 28,654	1.66%
Other Citigroup subsidiaries	377	0.51	471	2.02
	$10,223		$ 29,125	
Other borrowings	58,656	0.66%	97,566	2.40%
Total	$68,879		$ 126,691	

Borrowings under bank lines of credit may be at interest rates based on LIBOR, CD rates, the prime rate, or bids submitted by the banks. Citigroup pays commitment fees for its lines of credit.

Some of Citigroup's non-bank subsidiaries have credit facilities with Citigroup's subsidiary depository institutions, including Citibank, N.A. Borrowings under these facilities must be secured in accordance with Section 23A of the Federal Reserve Act.

CGMHI has committed financing with an unaffiliated bank. At December 31, 2009, CGMHI had drawn down the full $125 million available, which is guaranteed by Citigroup. It also has substantial borrowing agreements consisting of facilities that CGMHI has been advised are available, but where no contractual lending obligation exists. These arrangements are reviewed on an ongoing basis to ensure flexibility in meeting CGMHI's short-term requirements.

Long-Term Debt

In millions of dollars at December 31,	Weighted average coupon	Maturities	Balances 2009	Balances 2008
Citigroup parent company				
Senior notes (1)	4.11%	2010-2098	$ 149,751	$ 138,014
Subordinated notes	5.25	2010-2036	28,708	30,216

Citigroup Global Markets Holdings Inc.				
Senior notes	1.94	2010-2097	13,422	20,619
Subordinated notes			—	4
Citigroup Funding Inc. (3)				
Senior notes	3.21	2010-2051	55,499	37,375
Total			$ 364,019	$ 359,593
Senior notes			$ 312,581	$ 301,628
Subordinated notes			31,768	33,615
Junior subordinated notes relating to trust preferred securities			19,345	24,060
Other			325	290
Total			$ 364,019	$ 359,593

(1) Includes $250 million of notes maturing in 2098.

(2) At December 31, 2009 and 2008, collateralized advances from the Federal Home Loan Bank are $24.1 billion and $67.4 billion, respectively.

(3)

Includes Principal-Protected Trust Securities (Safety First Trust Securities) with carrying values of $528 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3, 2007-4, 2008-1, 2008-2, 2008-3, 2008-4, 2008-5, 2008-6, 2009-1, 2009-2, and 2009-3 (collectively, the “Safety First Trusts”) at December 31, 2009 and $452 million issued by Safety First Trust Series 2006-1, 2007-1, 2007-2, 2007-3, 2007-4, 2008-1, 2008-2, 2008-3, 2008-4, 2008-5 and 2008-6 at December 31, 2008. CFI owns all of the voting securities of the Safety First Trusts. The Safety First Trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the Safety First Trust Securities and the Safety First Trusts’ common securities. The Safety First Trusts’ obligations under the Safety First Trust Securities are fully and unconditionally guaranteed by CFI, and CFI’s guarantee obligations are fully and unconditionally guaranteed by Citigroup.

CGMHI has a syndicated five-year committed uncollateralized revolving line of credit facility with unaffiliated banks totaling $3.0 billion, which was undrawn at December 31, 2009 and matures in 2011. CGMHI also has committed long-term financing facilities with unaffiliated banks. At December 31, 2009, CGMHI had drawn down the full $900 million available under these facilities, of which $150 million is guaranteed by Citigroup. Generally, a bank can terminate these facilities by giving CGMHI one year prior notice.

CGMHI also has substantial borrowing arrangements consisting of facilities that CGMHI has been advised are available, but where no contractual lending obligation exists. These arrangements are reviewed on an ongoing basis to ensure flexibility in meeting CGMHI's short-term requirements.

The Company issues both fixed and variable rate debt in a range of currencies. It uses derivative contracts, primarily interest rate swaps, to effectively convert a portion of its fixed rate debt to variable rate debt

and variable rate debt to fixed rate debt. The maturity structure of the derivatives generally corresponds to the maturity structure of the debt being hedged. In addition, the Company uses other derivative contracts to manage the foreign exchange impact of certain debt issuances. At December 31, 2009, the Company's overall weighted average interest rate for long-term debt was 3.51% on a contractual basis and 3.91% including the effects of derivative contracts.

Aggregate annual maturities of long-term debt obligations (based on final maturity dates) including trust preferred securities are as follows:

In millions of dollars	2010	2011	2012	2013	2014	Thereafter
Citigroup parent company	$18,030	$20,435	$29,706	$17,775	$18,916	$ 92,942
Other Citigroup subsidiaries	18,710	29,316	17,214	5,177	12,202	14,675
Citigroup Global Markets Holdings Inc.	1,315	1,030	1,686	388	522	8,481
Citigroup Funding Inc.	9,107	8,875	20,738	4,792	3,255	8,732
Total	$47,162	$59,656	$69,344	$28,132	$34,895	$124,830

Long-term debt at December 31, 2009 and December 31, 2008 includes $19,345 million and $24,060 million, respectively, of junior subordinated debt. The Company formed statutory business trusts under the laws of the state of Delaware. The trusts exist for the exclusive purposes of (i) issuing trust securities representing undivided beneficial interests in the assets of the Trust; (ii) investing the gross proceeds of the trust securities in junior subordinated deferrable interest debentures (subordinated debentures) of its parent; and (iii) engaging in only those activities necessary or incidental thereto. Upon approval from the Federal Reserve, Citigroup has the right to redeem these securities.

Citigroup has contractually agreed not to redeem or purchase (i) the 6.50% Enhanced Trust Preferred securities of Citigroup Capital XV before September 15, 2056, (ii) the 6.45% Enhanced Trust Preferred securities of Citigroup Capital XVI before December 31, 2046, (iii) the 6.35% Enhanced Trust Preferred securities of Citigroup Capital XVII before March 15, 2057, (iv) the 6.829% Fixed Rate/Floating Rate Enhanced Trust Preferred securities of Citigroup Capital XVIII before June 28, 2047, (v) the 7.250% Enhanced Trust Preferred securities of Citigroup Capital XIX before August 15, 2047, (vi) the 7.875% Enhanced Trust Preferred securities of Citigroup Capital XX before December 15, 2067, and (vii) the 8.300% Fixed Rate/Floating Rate Enhanced Trust Preferred securities of Citigroup Capital XXI before December 21, 2067, unless certain conditions, described in Exhibit 4.03 to Citigroup's Current Report on Form 8-K filed on September 18, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on November 28, 2006, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on March 8, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on July 2, 2007, in Exhibit 4.02 to Citigroup's Current Report on Form 8-K filed on August 17, 2007, in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on November 27, 2007, and in Exhibit 4.2 to Citigroup's Current Report on Form 8-K filed on December 21, 2007, respectively, are met. These agreements are for the benefit of the holders of Citigroup's 6.00% junior subordinated deferrable interest debentures due 2034. Citigroup owns all of the voting securities of these subsidiary trusts. These subsidiary trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration, and repayment of the subsidiary trusts and the subsidiary trusts' common securities. These subsidiary trusts' obligations are fully and unconditionally guaranteed by Citigroup.

The following table summarizes the financial structure of each of the Company's subsidiary trusts at December 31, 2009:

Trust securities with distributions guaranteed by Citigroup In millions of dollars, except share amounts	Issuance date	Securities issued	Liquidation value	Coupon rate	Common shares issued to parent	Junior subordinated debentures owned by trust Amount (1)	Maturity	Redeemable by issuer beginning
Citigroup Capital III	Dec. 1996	194,053	$ 194	7.625%	6,003	$ 200	Dec. 1, 2036	Not redeemable

(1) Represents the proceeds received from the Trust at the date of issuance.

In each case, the coupon rate on the debentures is the same as that on the trust securities. Distributions on the trust securities and interest on the debentures are payable quarterly, except for Citigroup Capital III, Citigroup Capital XVIII and Citigroup Capital XXI on which distributions are payable semiannually.

During the third quarter of 2009, pursuant to the "Exchange Offers," Citigroup converted $5.8 billion liquidation value of trust preferred securities across Citigroup Capital III, Citigroup Capital VII, Citigroup Capital VIII,

Citigroup Capital IX, Citigroup Capital X, Citigroup Capital XI, Citigroup Capital XIV, Citigroup Capital XV, Citigroup Capital XVI, Citigroup Capital XVII, Citigroup Capital XVIII, Citigroup Capital XIX, Citigroup Capital XX and Citigroup Capital XXI to common stock and issued $27.1 billion of Citigroup Capital XXXIII trust preferred securities to the U.S. government in exchange for the Series G and I of preferred stock.

21. PREFERRED STOCK AND STOCKHOLDERS' EQUITY

The following table summarizes the Company's Preferred Stock outstanding at December 31, 2009 and December 31, 2008:

	Dividend rate	Redemption price per depositary share / preference share	Number of depositary shares	Convertible to approximate number of Citigroup common shares at December 31, 2009	Carrying value in millions of dollars December 31, 2009	December 31, 2008
Series A (1)	7.000%	$ 50	—	$ —	$ —	$ 6,880
Series B (1)	7.000%	50	—	—	—	3,000
Series C (1)	7.000%	50	—	—	—	1,000
Series D (1)	7.000%	50	—	—	—	750
Series E (2)	8.400%	1,000	121,254	—	121	6,000
Series F (3)	8.500%	25	2,863,369	—	71	2,040
Series H (4)	5.000%	1,000,000	—	—	—	23,727
Series I (5)	8.000%	1,000,000	—	—	—	19,513
Series J (1)	7.000%	50	—	—	—	450
Series K (1)	7.000%	50	—	—	—	400
Series L1 (1)	7.000%	50	—	—	—	5
Series N (1)	7.000%	50	—	—	—	15
Series T (6)	6.500%	50	453,981	672,959	23	3,169
Series AA (7)	8.125%	25	3,870,330	—	97	3,715
				672,959	$312	$70,664

(1) Issued on January 23, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Under the terms of pre-existing conversion price reset agreements with holders of Series A, B, C, D, J, K, L1 and N (the "Old Preferred Stock"), on February 17, 2009, Citigroup exchanged shares of new preferred stock Series A1, B1, C1, D1, J1, K1, L2 and N1 (the "New Preferred Stock") for an equal number of shares of Old Preferred Stock. All shares of the Old Preferred Stock were canceled. During the third quarter of 2009, pursuant to the "Exchange Offers", Citigroup converted the entire notional value of the New Preferred Stock to common stock.

(2) Issued on April 28, 2008 as depositary shares, each representing a 1/25th interest in a share of the corresponding series of Fixed Rate/Floating Rate Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after April 30, 2018. Dividends are payable semi-annually for the first 10 years until April 30, 2018 at $42.70 per depositary share and thereafter quarterly at a floating rate when, as and if declared by the Company's Board of Directors. During the third quarter of 2009, pursuant to the "Exchange Offers", Citigroup converted $5,879 million notional value of Series E Preferred Stock to common stock.

(3) Issued on May 13, 2008 and May 28, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after June 15, 2013. The dividend of $0.53 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. During the third quarter of 2009, pursuant to the "Exchange Offers", Citigroup converted $1,969 million notional value of Series F Preferred Stock to common stock.

(4) Issued on October 28, 2008 as Cumulative Preferred Stock to the United States Treasury under the Troubled Asset Relief Program. During the third quarter of 2009, pursuant to the "Exchange Offers", the entire notional value of the Preferred Stock was converted to common stock.

(5) Issued on December 31, 2008 as Cumulative Preferred Stock to the United States Treasury under the Troubled Asset Relief Program. During the third quarter of 2009, pursuant to the "Exchange Offers", the entire notional value of the Preferred Stock was converted to Citigroup Capital XXXIII trust preferred securities maturing July 30, 2039.

(6) Issued on January 23, 2008 and January 29, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Convertible Preferred Stock. Redeemable in whole or in part on or after February 15, 2015. Convertible into Citigroup common stock at a conversion rate of approximately 1,482.3503 per share, which is subject to adjustment under certain conditions. The dividend or in $0.81 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant. During the third quarter of 2009, pursuant to the "Exchange Offers", Citigroup converted $3,146 million notional value of Series T Preferred Stock to common stock.

(7) Issued on January 25, 2008 as depositary shares, each representing a 1/1,000th interest in a share of the corresponding series of Non-Cumulative Preferred Stock. Redeemable in whole or in part on or after February 15, 2018. The dividend of $0.51 per depositary share is payable quarterly when, as and if declared by the Company's Board of Directors. Redemption is subject to a capital replacement covenant. During the third quarter of 2009, pursuant to the "Exchange Offers", Citigroup converted $3,618 million notional value of Series AA Preferred Stock to common stock.

Regulatory Capital

Citigroup is subject to risk based capital and leverage guidelines issued by the Board of Governors of the Federal Reserve System (FRB). Its U.S. insured depository institution subsidiaries, including Citibank, N.A., are subject to similar guidelines issued by their respective primary federal bank regulatory agencies. These guidelines are used to evaluate capital adequacy and include the required minimums shown in the following table.

The regulatory agencies are required by law to take specific prompt actions with respect to institutions that do not meet minimum capital standards. As of December 31, 2009 and 2008, all of Citigroup's U.S. insured subsidiary depository institutions were "well capitalized."

At December 31, 2009, regulatory capital as set forth in guidelines issued by the U.S. federal bank regulators is as follows:

In millions of dollars	Required minimum	Well-capitalized minimum	Citigroup (3)	Citibank, N.A. (3)
Tier 1 Capital			$ 127,034	$ 96,833
Total Capital (1)			165,983	110,625
Tier 1 Capital ratio	4.0%	6.0%	11.67%	13.16%
Total Capital ratio (1)	8.0	10.0	15.25	15.03
Leverage ratio (2)	3.0	5.0 (3)	6.89	8.31

(1) Total Capital includes Tier 1 Capital and Tier 2 Capital.
(2) Tier 1 Capital divided by adjusted average total assets.
(3) Applicable only to depository institutions. For bank holding companies to be "well capitalized," they must maintain a minimum Leverage ratio of 3%.

Banking Subsidiaries—Constraints on Dividends

There are various legal limitations on the ability of Citigroup's subsidiary depository institutions to extend credit, pay dividends or otherwise supply funds to Citigroup and its non-bank subsidiaries. Currently, the approval of the Office of the Comptroller of the Currency, in the case of national banks, or the Office of Thrift Supervision, in the case of federal savings banks, is required if total dividends declared in any calendar year exceed amounts specified by the applicable agency's regulations. State-chartered depository institutions are subject to dividend limitations imposed by applicable state law.

In determining the dividends, each depository institution must also consider its effect on applicable risk-based capital and leverage ratio requirements, as well as policy statements of the federal regulatory agencies that indicate that banking organizations should generally pay dividends out of current operating earnings. Citigroup did not receive any dividends from its banking subsidiaries during 2009.

Non-Banking Subsidiaries

Citigroup also receives dividends from its non-bank subsidiaries. These non-bank subsidiaries are generally not subject to regulatory restrictions on dividends.

The ability of CGMHI to declare dividends can be restricted by capital considerations of its broker-dealer subsidiaries.

In millions of dollars

Subsidiary	Jurisdiction	Net capital or equivalent	Excess over minimum requirement
Citigroup Global Markets Inc.	U.S. Securities and Exchange Commission Uniform Net Capital Rule (Rule 15c3-1)	$10,886	$10,218
Citigroup Global Markets Limited	United Kingdom's Financial Services Authority	$ 6,409	$ 3,081

22. CHANGES IN ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Changes in each component of "Accumulated Other Comprehensive Income (Loss)" for the three-year period ended December 31, 2009 are as follows:

In millions of dollars	Net unrealized gains (losses) on investment securities	Foreign currency translation adjustment, net of hedges	Cash flow hedges	Pension liability adjustments	Accumul o compreher income (
Balance, January 1, 2007	$ 1,092	$(2,796)	$ (61)	$(1,786)	$ (3
Change in net unrealized gains (losses) on investment securities, net of taxes	138	—	—	—	
Less: Reclassification adjustment for net gains included in net income, net of taxes	(759)	—	—	—	
Foreign currency translation adjustment, net of taxes (1)	—	2,024	—	—	2
Cash flow hedges, net of taxes (2)	—	—	(3,102)	—	(3
Pension liability adjustment, net of taxes (3)	—	—	—	590	
Change	$ (621)	$ 2,024	$(3,102)	$ 590	$ (1
Balance, December 31, 2007	$ 471	$ (772)	$(3,163)	$(1,196)	$ (4
Change in net unrealized gains (losses) on investment securities, net of taxes	(11,422)	—	—	—	(11
Less: Reclassification adjustment for net losses included in net income, net of taxes	1,304	—	—	—	1
Foreign currency translation adjustment, net of taxes (1)	—	(6,972)	—	—	(6
Cash flow hedges, net of taxes (2)	—	—	(2,026)	—	(2
Pension liability adjustment, net of taxes (3)	—	—	—	(1,419)	(1
Change	$(10,118)	$(6,972)	$(2,026)	$(1,419)	$(20
Balance, December 31, 2008	$ (9,647)	$(7,744)	$(5,189)	$(2,615)	$(25
Cumulative effect of accounting change (ASC 320-10-35/FSP FAS 115-2 and FAS 124-2)	(413)	—	—	—	
Balance, January 1, 2009	$(10,060)	$(7,744)	$(5,189)	$(2,615)	$(25
Change in net unrealized gains (losses) on investment securities, net of taxes	5,268	—	—	—	5
Less: Reclassification adjustment for net losses included in net income, net of taxes	445	—	—	—	
Foreign currency translation adjustment, net of taxes (1)	—	(203)	—	—	
Cash flow hedges, net of taxes (2)	—	—	2,007	—	2
Pension liability adjustment, net of taxes (3)	—	—	—	(846)	
Change	$ 5,713	$ (203)	$ 2,007	$ (846)	$ 6
Balance, December 31, 2009 (4)	$ (4,347)	$(7,947)	$(3,182)	$(3,461)	$(18

(1) Reflects, among other items: the movements in the British pound, Euro, Japanese yen, Korean won, Polish zloty and Mexican peso against the U.S. dollar, and changes in related tax effects and hedges.

(2) Primarily driven by Citigroup's pay fixed/receive floating interest rate swap programs that are hedging the floating rates on deposits and long-term debt.

(3) Reflects adjustments to the funded status of pension and postretirement plans, which is the difference between the fair value of the plan assets and the projected benefit obligation.

(4) The December 31, 2009 balance of $(4.3) billion for net unrealized losses on investment securities consists of $(4.7) billion for those investments classified as held-to-maturity and $0.4 billion for those classified as available-for-sale.

23. SECURITIZATIONS AND VARIABLE INTEREST ENTITIES

Overview

Citigroup and its subsidiaries are involved with several types of off-balance-sheet arrangements, including special purpose entities (SPEs). See Note 1 to the Consolidated Financial Statements for a discussion of impending accounting changes to the accounting for transfers and servicing of financial assets and Consolidation of Variable Interest Entities, including the elimination of Qualifying SPEs.

Uses of SPEs

An SPE is an entity designed to fulfill a specific limited need of the company that organized it.

The principal uses of SPEs are to obtain liquidity and favorable capital treatment by securitizing certain of Citigroup's financial assets, to assist clients in securitizing their financial assets, and to create investment products for clients. SPEs may be organized in many legal forms including trusts, partnerships or corporations. In a securitization, the company transferring assets to an SPE converts those assets into cash before they would have been realized in the normal course of business, through the SPE's issuance of debt and equity instruments, certificates, commercial paper and other notes of indebtedness, which are recorded on the balance sheet of the SPE and not reflected on the transferring company's balance sheet, assuming applicable accounting requirements are satisfied. Investors usually have recourse to the assets in the SPE and often benefit from other credit enhancements, such as a collateral account or over-collateralization in the form of excess assets in the SPE, or from a liquidity facility, such as a line of credit, liquidity put option or asset purchase agreement. The SPE can typically obtain a more favorable credit rating from rating agencies than the transferor could obtain for its own debt issuances, resulting in less expensive financing costs. The SPE may also enter into derivative contracts in order to convert the yield or currency of the underlying assets to match the needs of the SPE investors or to limit or change the credit risk of the SPE. Citigroup may be the provider of certain credit enhancements as well as the counterparty to any related derivative contracts.

SPEs may be Qualifying SPEs (QSPEs) or Variable Interest Entities (VIEs) or neither.

Qualifying SPEs

QSPEs are a special class of SPEs that have significant limitations on the types of assets and derivative instruments they may own or enter into and the types and extent of activities and decision-making they may engage in. Generally, QSPEs are passive entities designed to purchase assets and pass through the cash flows from those assets to the investors in the QSPE. QSPEs may not actively manage their assets through discretionary sales and are generally limited to making decisions inherent in servicing activities and issuance of liabilities. QSPEs are generally exempt from consolidation by the transferor of assets to the QSPE and any investor or counterparty.

Variable interest entities

VIEs are entities that have either a total equity investment that is insufficient to permit the entity to finance its activities without additional subordinated financial support or whose equity investors lack the characteristics of a controlling financial interest (i.e., ability to make significant decisions through voting rights, right to receive the expected residual returns of the entity and obligation to absorb the expected losses of the entity). Investors that finance the VIE through debt or equity interests or other counterparties that provide other forms of support, such as guarantees, subordinated fee arrangements, or certain types of derivative contracts, are variable interest holders in the entity. The variable interest holder, if any, that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both, is deemed to be the primary beneficiary and must consolidate the VIE. Consolidation of a VIE is determined based primarily on variability generated in scenarios that are considered most likely to occur, rather than based on scenarios that are considered more remote. Certain variable interests may absorb significant amounts of losses or residual returns contractually, but if those scenarios are considered very unlikely to occur, they may not lead to consolidation of the VIE.

All of these facts and circumstances are taken into consideration when determining whether the Company has variable interests that would deem it the primary beneficiary and, therefore, require consolidation of the related VIE or otherwise rise to the level where disclosure would provide useful information to the users of the Company's financial statements. In some cases, it is qualitatively clear based on the extent of the Company's involvement or the seniority of its investments that the Company is not the primary beneficiary of the VIE. In other cases, a more detailed and quantitative analysis is required to make such a determination.

The Company generally considers the following types of involvement to be significant:

- assisting in the structuring of a transaction and retaining any amount of debt financing (e.g., loans, notes, bonds or other debt instruments) or an equity investment (e.g., common shares, partnership interests or warrants);
- writing a "liquidity put" or other liquidity facility to support the issuance of short-term notes;
- writing credit protection (e.g., guarantees, letters of credit, credit default swaps or total return swaps where the Company receives the total return or risk on the assets held by the VIE); or
- certain transactions where the Company is the investment manager and receives variable fees for services.

In various other transactions, the Company may act as a derivative counterparty (for example, interest rate swap, cross-currency swap, or purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE); may act as underwriter or placement agent; may provide administrative, trustee, or other services; or may make a market in debt securities or other instruments issued by VIEs. The Company generally considers such involvement, by itself, “not significant.”

Citigroup's involvement with QSPEs and consolidated and unconsolidated VIEs with which the Company holds significant variable interests as of December 31, 2009 and 2008 is presented below:

In millions of dollars	As of December 31, 2009				Maximum exposure to loss in significant unconsolidated VIEs (1)

(1) The definition of maximum exposure to loss is included in the text that follows.

(2) Included in Citigroup's December 31, 2009 Consolidated Balance Sheet.

(3)

Not included in Citigroup's December 31, 2009 Consolidated Balance Sheet. See "Future Applications of Accounting Standards" in Note 1 to the Consolidated Financial Statements for discussion of the impact of implementation of SFAS 166 and SFAS 167, which will cause the maximum exposure to loss in Significant unconsolidated VIEs to decrease significantly.

(4) A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant, regardless of the likelihood of loss or the notional amount of exposure.

As of December 31, 2009 (continued) Total maximum exposure to loss in significant unconsolidated VIEs (continued) (3)	In millions of dollars Total involvement with SPEs	QSPE assets	Consolidated VIE assets	Significant unconsolidated VIE assets (2)	As of December 31, 2008 (1) Maximum exposure to loss in significant unconsolidated VIE assets (3)

(1) Reclassified to conform to the current period's presentation.
(2) A significant unconsolidated VIE is an entity where the Company has any variable interest considered to be significant, regardless of the likelihood of loss or the notional amount of exposure.
(3) The definition of maximum exposure to loss is included in the text that follows.

This table does not include:

- certain venture capital investments made by some of the Company's private equity subsidiaries, as the Company accounts for these investments in accordance with the Investment Company Audit Guide;
- certain limited partnerships where the Company is the general partner and the limited partners have the right to replace the general partner or liquidate the funds;
- certain investment funds for which the Company provides investment management services and personal estate trusts for which the Company provides administrative, trustee and/or investment management services;
- VIEs structured by third parties where the Company holds securities in inventory. These investments are made on arm's-length terms; and
- transferred assets to a VIE where the transfer did not qualify as a sale and where the Company did not have any other involvement that is deemed to be a variable interest with the VIE. These transfers are accounted for as secured borrowings by the Company.

The asset balances for consolidated VIEs represent the carrying amounts of the assets consolidated by the Company. The carrying amount may represent the amortized cost or the current fair value of the assets depending on the legal form of the asset (e.g., security or loan) and the Company's standard accounting policies for the asset type and line of business.

Funding Commitments for Significant Unconsolidated VIEs—Liquidity Facilities and Loan Commitments

The following table presents the notional amount of liquidity facilities and loan commitments that are classified as funding commitments in the SPE table as of December 31, 2009:

The asset balances for unconsolidated VIEs where the Company has significant involvement represent the most current information available to the Company. In most cases, the asset balances represent an amortized cost basis without regard to impairments in fair value, unless fair value information is readily available to the Company. For VIEs that obtain asset exposures synthetically through derivative instruments (for example, synthetic CDOs), the table includes the full original notional amount of the derivative as an asset.

The maximum funded exposure represents the balance sheet carrying amount of the Company's investment in the VIE. It reflects the initial amount of cash invested in the VIE plus any accrued interest and is adjusted for any impairments in value recognized in earnings and any cash principal payments received. The maximum exposure of unfunded positions represents the remaining undrawn committed amount, including liquidity and credit facilities provided by the Company, or the notional amount of a derivative instrument considered to be a variable interest, adjusted for any declines in fair value recognized in earnings. In certain transactions, the Company has entered into derivative instruments or other arrangements that are not considered variable interests in the VIE (e.g., interest rate swaps, cross-currency swaps, or where the Company is the purchaser of credit protection under a credit default swap or total return swap where the Company pays the total return on certain assets to the SPE). Receivables under such arrangements are not included in the maximum exposure amounts.

In millions of dollars	Liquidity Facilities	Loan Commitments
Citicorp		
Citi-administered asset-backed commercial paper conduits (ABCP)	$ 20,486	$ 1,718
Third-party commercial paper conduits	353	—

Citicorp's Consolidated VIEs—Balance Sheet Classification

The following table presents the carrying amounts and classifications of consolidated assets that are collateral for consolidated VIE obligations:

In billions of dollars	December 31, 2009	December 31, 2008
Cash	$ —	$ 0.7
Trading account assets	3.7	4.3
Investments	9.8	12.5
Loans	0.1	0.5
Other assets	1.9	1.7
Total assets of consolidated VIEs	$ 15.5	$ 19.7

The following table presents the carrying amounts and classification of the third-party liabilities of the consolidated VIEs:

In billions of dollars	December 31, 2009	December 31, 2008
Short-term borrowings	$ 9.5	$ 14.2
Long-term debt	4.6	5.6
Other liabilities	0.1	0.9
Total liabilities of consolidated VIEs	$ 14.2	$ 20.7

Citi Holdings' Consolidated VIEs—Balance Sheet Classification

The following table presents the carrying amounts and classifications of consolidated assets that are collateral for consolidated VIE obligations:

In billions of dollars	December 31, 2009	December 31, 2008
Cash	$ 0.7	$ 1.2
Trading account assets	9.5	16.6
Investments	2.7	3.3
Loans	0.4	2.1
Other assets	0.5	0.7
Total assets of consolidated VIEs	$ 13.8	$ 23.9

The following table presents the carrying amounts and classification of the third-party liabilities of the consolidated VIEs:

In billions of dollars	December 31, 2009	December 31, 2008
Trading account liabilities	$ 0.2	$ 0.5
Short-term borrowings	2.6	2.8
Long-term debt	0.3	1.2
Other liabilities	1.3	2.1
Total liabilities of consolidated VIEs	$ 4.4	$ 6.6

The consolidated VIEs included in the tables above represent hundreds of separate entities with which the Company is involved. In general, the third-party investors in the obligations of consolidated VIEs have legal recourse only to the assets of the VIEs and do not have such recourse to the Company, except where the Company has provided a guarantee to the investors or is the counterparty to certain derivative transactions involving the VIE. In addition, the assets are generally restricted only to pay such liabilities. Thus, the Company's maximum legal exposure to loss related to consolidated VIEs is significantly less than the carrying value of the consolidated VIE assets due to outstanding third-party financing. Intercompany assets and liabilities are excluded from the table.

Citicorp's Significant Interests in Unconsolidated VIEs—Balance Sheet Classification

The following tables present the carrying amounts and classification of significant interests in unconsolidated VIEs:

In billions of dollars	December 31, 2009	December 31, 2008

Trading account assets	$ 3.2	$ 1.9
Investments	0.2	0.2
Loans	2.3	3.5
Other assets	0.5	0.4
Total assets of significant interests in unconsolidated VIEs	$ 6.2	$ 6.0

In billions of dollars	December 31, 2009	December 31, 2008
Long-term debt	$ 0.5	$ 0.4
Total liabilities of significant interests in unconsolidated VIEs	$ 0.5	$ 0.4

Citi Holdings' Significant Interests in Unconsolidated VIEs—Balance Sheet Classification

The following tables present the carrying amounts and classification of significant interests in unconsolidated VIEs:

In billions of dollars	December 31, 2009	December 31, 2008
Trading account assets	$ 3.1	$ 4.4
Investments	9.1	10.8
Loans	10.5	12.4
Other assets	0.1	—
Total assets of significant interests in unconsolidated VIEs	$ 22.8	$ 27.6

In billions of dollars	December 31, 2009	December 31, 2008
Trading account liabilities	$ —	$ 0.2
Other liabilities	0.4	0.6
Total liabilities of significant interests in unconsolidated VIEs	$ 0.4	$ 0.8

Credit Card Securitizations
The Company securitizes credit card receivables through trusts that are established to purchase the receivables. Citigroup sells receivables into the QSPE trusts on a non-recourse basis. Credit card securitizations are revolving securitizations; that is, as customers pay their credit card balances, the cash proceeds are used to purchase new receivables and replenish the receivables in the trust. The Company relies on securitizations to fund a significant portion of its managed North America Cards business.

The following table reflects amounts related to the Company's securitized credit card receivables:

	Citicorp		Citi Holdings	
In billions of dollars at December 31	2009	2008	2009	2008
Principal amount of credit card receivables in trusts	$78.8	$78.3	$42.3	$45.7
Ownership interests in principal amount of trust credit card receivables				
Sold to investors via trust-issued securities	66.5	68.2	28.2	30.0
Retained by Citigroup as trust-issued securities	5.0	1.2	10.1	5.4
Retained by Citigroup via non-certificated interests recorded as consumer loans	7.3	8.9	4.0	10.3
Total ownership interests in principal amount of trust credit card receivables	$78.8	$78.3	$42.3	$45.7
Other amounts recorded on the balance sheet related to interests retained in the trusts				
Other retained interests in securitized assets	$ 1.4	$ 1.2	$ 1.6	$ 2.0
Residual interest in securitized assets (1)	0.3	0.3	1.2	1.4
Amounts payable to trusts	1.2	1.0	0.8	0.7

(1) 2009 balances include net unbilled interest of $0.3 billion for Citicorp and $0.4 billion for Citi Holdings. December 31, 2008 balances included net unbilled interest of $0.3 billion for Citicorp and $0.3 billion for Citi Holdings.

Credit Card Securitizations—Citicorp
In the years ended December 31, 2009, 2008 and 2007, the Company recorded net gains (losses) from securitization of Citicorp's credit card receivables of $349 million, $(1,007) million and $416 million, respectively. Net gains (losses) reflect the following:

- incremental gains (losses) from new securitizations;
- the reversal of the allowance for loan losses associated with receivables sold;
- net gains on replenishments of the trust assets offset by other-than-temporary impairments; and
- changes in fair value for the portion of the residual interest classified as trading assets.

The following table summarizes selected cash flow information related to Citicorp's credit card securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009	2008	2007
Proceeds from new securitizations	$ 16.3	$ 11.8	$ 19.3
Proceeds from collections reinvested in new receivables	144.4	165.6	176.7
Contractual servicing fees received	1.3	1.3	1.2
Cash flows received on retained interests and other net cash flows	3.1	3.9	5.1

As of December 31, 2009 and December 31, 2008, the residual interest in securitized credit card receivables was valued at $0 for Citicorp. Considering the residual interest was written down to $0 at December 31, 2008, key assumptions used in measuring its fair value at the date of sale or securitization are not provided for 2009, but are provided for 2008. The below table reflects these assumptions:

	2009	2008
Discount rate	N/A	13.3% to 17.4%
Constant prepayment rate	N/A	5.8% to 21.1%
Anticipated net credit losses	N/A	4.7% to 7.4%

At December 31, 2009, the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

In millions of dollars	Residual interest	Retained certificates	Other retained interests
Carrying value of retained interests	$ —	$ 5,008	$ 1,650
Discount rates			
Adverse change of 10%	$ —	$ (4)	$ (1)
Adverse change of 20%	—	(8)	(2)
Constant prepayment rate			
Adverse change of 10%	$ —	$ —	$ —
Adverse change of 20%	—	—	—
Anticipated net credit losses			
Adverse change of 10%	$ —	$ —	$ (35)
Adverse change of 20%	—	—	(69)

Managed Loans—Citicorp

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages.

Managed-basis (Managed) presentations are non-GAAP financial measures. Managed presentations include results from both the on-balance-sheet loans and off-balance-sheet loans, and exclude the impact of card securitization activity. Managed presentations assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as Citigroup's owned loans. Citigroup's management believes that Managed presentations provide a greater understanding of ongoing operations and enhance comparability of those results in prior periods as well as demonstrating the effects of unusual gains and charges in the current period. Management further believes that a meaningful analysis of the Company's financial performance requires an understanding of the factors underlying that performance and that investors find it useful to see these non-GAAP financial measures to analyze financial performance without the impact of unusual items that may obscure trends in Citigroup's underlying performance.

The following tables present a reconciliation between the Managed basis and on-balance-sheet credit card portfolios and the related delinquencies (loans which are 90 days or more past due) and credit losses, net of recoveries.

In millions of dollars, except loans in billions	December 31, 2009	December 31, 2008
Loan amounts, at period end		
On balance sheet	$ 44.0	$ 45.5
Securitized amounts	71.6	69.5
Total managed loans	$ 115.6	$ 115.0
Delinquencies, at period end		
On balance sheet	$ 1,146	$ 1,126
Securitized amounts	1,902	1,543
Total managed delinquencies	$ 3,048	$ 2,669

Credit losses, net of recoveries, for the years ended December 31,	2009	2008	2007
On balance sheet	$ 3,841	$ 2,866	$ 1,921
Securitized amounts	6,932	4,300	2,733
Total managed	$ 10,773	$ 7,166	$ 4,654

Credit Card Securitizations—Citi Holdings

The Company recorded net gains (losses) from securitization of Citi Holdings' credit card receivables of $(586) million, $(527) million, and $668 million for the years ended December 31, 2009, 2008 and 2007, respectively.

The following table summarizes selected cash flow information related to Citi Holdings' credit card securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009	2008	2007
Proceeds from new securitizations	$29.4	$16.9	$17.0
Proceeds from collections reinvested in new receivables	46.0	49.1	41.3
Contractual servicing fees received	0.7	0.7	0.9
Cash flows received on retained interests and other net cash flows	2.6	3.3	2.5

Key assumptions used in measuring the fair value of the residual interest at the date of sale or securitization of Citi Holdings' credit card receivables for the years ended December 31, 2009 and 2008, respectively, are as follows:

	December 31, 2009	December 31, 2008
Discount rate	19.7%	16.8% to 20.9%
Constant prepayment rate	6.0% to 11.0%	6.4% to 12.4%
Anticipated net credit losses	9.9% to 13.2%	6.6% to 9.9%

The constant prepayment rate assumption range reflects the projected payment rates over the life of a credit card balance, excluding new card purchases. This results in a high payment in the early life of the securitized balances followed by a much lower payment rate, which is

depicted in the disclosed range.

The effect of two negative changes in each of the key assumptions used to determine the fair value of retained interests is required to be disclosed. The negative effect of each change must be calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At December 31, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	2009
Discount rate	19.7%
Constant prepayment rate	6.2% to 10.8%
Anticipated net credit losses	13.0%
Weighted average life	11.6 months

In millions of dollars	Residual interest	Retained certificates	Other retained interests
Carrying value of retained interests	$ 786	$ 9,995	$ 2,024
Discount rates			
Adverse change of 10%	$ (42)	$ (10)	$ (6)
Adverse change of 20%	(83)	(20)	(12)
Constant prepayment rate			
Adverse change of 10%	$ (49)	$ —	$ —
Adverse change of 20%	(93)	—	—
Anticipated net credit losses			
Adverse change of 10%	$ (361)	$ —	$ (48)
Adverse change of 20%	(715)	—	(95)

Managed Loans—Citi Holdings

After securitization of credit card receivables, the Company continues to maintain credit card customer account relationships and provides servicing for receivables transferred to the trusts. As a result, the Company considers the securitized credit card receivables to be part of the business it manages.

Managed-basis (Managed) presentations are non-GAAP financial measures. Managed presentations include results from both the on-balance-sheet loans and off-balance-sheet loans, and exclude the impact of card securitization activity. Managed presentations assume that securitized loans have not been sold and present the results of the securitized loans in the same manner as Citigroup's owned loans. Citigroup's management believes that Managed presentations provide a greater understanding of ongoing operations and enhance comparability of those results in prior periods as well as demonstrating the effects of unusual gains and charges in the current period. Management further believes that a meaningful analysis of the Company's financial performance requires an understanding of the factors underlying that performance and that investors find it useful to see these non-GAAP financial measures to analyze financial performance without the impact of unusual items that may obscure trends in Citigroup's underlying performance.

The following tables present a reconciliation between the Managed basis and on-balance-sheet credit card portfolios and the related delinquencies (loans which are 90 days or more past due) and credit losses, net of recoveries.

In millions of dollars, except loans in billions	December 31, 2009	December 31, 2008
Loan amounts, at period end		
On balance sheet	$ 27.0	$ 42.0
Securitized amounts	38.8	36.4
Total managed loans	$ 65.8	$ 78.4
Delinquencies, at period end		
On balance sheet	$ 1,250	$ 1,364
Securitized amounts	1,326	1,112
Total managed delinquencies	$ 2,576	$ 2,476

Credit losses, net of recoveries, for the year ended December 31,	2009	2008	2007
On balance sheet	$4,540	$3,052	$1,956
Securitized amounts	4,590	3,107	1,995
Total managed credit losses	$9,130	$6,159	$3,951

Funding, Liquidity Facilities and Subordinated Interests

Citigroup securitizes credit card receivables through three securitization trusts—Citibank Credit Card Master Trust ("Master Trust"), which is part of Citicorp, and the Citibank OMNI Master Trust ("Omni Trust") and Broadway Credit Card Trust ("Broadway Trust"), which are part of Citi Holdings.

Master Trust issues fixed- and floating-rate term notes as well as commercial paper. Some of the term notes are issued to multi-seller

commercial paper conduits. In 2009, the Master Trust has issued $4.3 billion of notes that are eligible for the Term Asset-Backed Securities Loan Facility (TALF) program, where investors can borrow from the Federal Reserve using the trust securities as collateral. The weighted average maturity of the term notes issued by the Master Trust was 3.6 years as of December 31, 2009 and 3.8 years as of December 31, 2008.

Master Trust liabilities

In billions of dollars	December 31, 2009	December 31, 2008
Term notes issued to multi-seller CP conduits	$ 0.8	$ 1.0
Term notes issued to other third parties	51.2	56.2
Term notes retained by Citigroup affiliates	5.0	1.2
Commercial paper	14.5	11.0
Total Master Trust liabilities	$ 71.5	$ 69.4

Both Omni and Broadway Trusts issue fixed- and floating-rate term notes, some of which are purchased by multi-seller commercial paper conduits. The Omni Trust also issues commercial paper. From time to time, a portion of the Omni Trust commercial paper has been purchased by the Federal Reserve's Commercial Paper Funding Facility (CPFF). In addition, some of the multi-seller conduits that hold Omni Trust term notes have placed commercial paper with CPFF. The total amount of Omni Trust liabilities funded directly or indirectly through the CPFF was $2.5 billion at December 31, 2009 and $6.9 billion at December 31, 2008.

The weighted average maturity of the third-party term notes issued by the Omni Trust was 2.0 years as of December 31, 2009 and 0.5 years as of December 31, 2008. The weighted average maturity of the third-party term notes issued by the Broadway Trust was 2.5 years as of December 31, 2009 and 3.3 years as of December 31, 2008.

Omni Trust liabilities

In billions of dollars	December 31, 2009	December 31, 2008
Term notes issued to multi-seller commercial paper conduits	$ 13.1	$ 17.8
Term notes issued to other third parties	9.2	2.3
Term notes retained by Citigroup affiliates	9.8	5.1
Commercial paper	4.4	8.5
Total Omni Trust liabilities	$ 36.5	$ 33.7

Broadway Trust liabilities

In billions of dollars	December 31, 2009	December 31, 2008
Term notes issued to multi-seller commercial paper conduits	$ 0.5	$ 0.4
Term notes issued to other third parties	1.0	1.0
Term notes retained by Citigroup affiliates	0.3	0.3
Total Broadway Trust liabilities	$ 1.8	$ 1.7

Citibank (South Dakota), N.A. is the sole provider of full liquidity facilities to the commercial paper programs of the Master and Omni Trusts. Both of these facilities, which represent contractual obligations on the part of Citibank (South Dakota), N.A. to provide liquidity for the issued commercial paper, are made available on market terms to each of the trusts. The liquidity facilities require Citibank (South Dakota), N.A. to purchase the commercial paper issued by each trust at maturity, if the commercial paper does not roll over, as long as there are available credit enhancements outstanding, typically in the form of subordinated notes. The liquidity commitment related to the Omni Trust commercial paper programs amounted to $4.4 billion at December 31, 2009 and $8.5 billion at December 31, 2008. The liquidity commitment related to the Master Trust commercial paper program amounted to $14.5 billion at December 31, 2009 and $11.0 billion at December 31, 2008. As of December 31, 2009 and December 31, 2008, none of the Master Trust or Omni Trust liquidity commitments were drawn.

In addition, Citibank (South Dakota), N.A. provides liquidity to a third-party, non-consolidated multi-seller commercial paper conduit, which is not a VIE. The commercial paper conduit has acquired notes issued by the Omni Trust. Citibank (South Dakota), N.A. provides the liquidity facility on market terms. Citibank (South Dakota), N.A. will be required to act in its capacity as liquidity provider as long as there are available credit enhancements outstanding and if: (1) the conduit is unable to roll over its maturing commercial paper; or (2) Citibank (South Dakota), N.A. loses its A-1/P-1 credit rating. The liquidity commitment to the third-party conduit was $2.5 billion at December 31, 2009 and $3.6 billion at December 31, 2008. As of December 31, 2009 and December 31, 2008, none of this liquidity commitment was drawn.

During the first half of 2009, all three of Citigroup's primary credit card securitization trusts—Master Trust, Omni Trust, and Broadway Trust—had bonds placed on ratings watch with negative implications by rating agencies. As a result of the ratings watch status, certain actions were taken by Citi with respect to each of the trusts. In general, the actions subordinated certain senior interests in the trust assets that were retained by Citi, which effectively placed these interests below investor interests in terms of priority of payment.

As a result of these actions, based on the applicable regulatory capital rules, Citigroup began including the sold assets for all three of the credit card securitization trusts in its risk-weighted assets for purposes of calculating its risk-based capital ratios during 2009. The increase in risk-weighted

assets occurred in the quarter during 2009 in which the respective actions took place. The effect of these changes increased Citigroup's risk-weighted assets by approximately $82 billion, and decreased Citigroup's Tier 1 Capital ratio by approximately 100 basis points each as of March 31, 2009, with respect to the Master and Omni Trusts. The inclusion of the Broadway Trust increased Citigroup's risk-weighted assets by an additional approximately $900 million at June 30, 2009. All bond ratings for each of the trusts have been affirmed by the rating agencies, and no downgrades have occurred as of December 31, 2009.

Mortgage Securitizations

The Company provides a wide range of mortgage loan products to a diverse customer base. In connection with the securitization of these loans, the Company's U.S. Consumer mortgage business retains the servicing rights, which entitles the Company to a future stream of cash flows based on the outstanding principal balances of the loans and the contractual servicing fee. Failure to service the loans in accordance with contractual requirements may lead to a termination of the servicing rights and the loss of future servicing fees. In non-recourse servicing, the principal credit risk to the Company is the cost of temporary advances of funds. In recourse servicing, the servicer agrees to share credit risk with the owner of the mortgage loans, such as FNMA or FHLMC, or with a private investor, insurer or guarantor. Losses on recourse servicing occur primarily when foreclosure sale proceeds of the property underlying a defaulted mortgage loan are less than the outstanding principal balance and accrued interest of the loan and the cost of holding and disposing of the underlying property. The Company's mortgage loan securitizations are primarily non-recourse, thereby effectively transferring the risk of future credit losses to the purchasers of the securities issued by the trust. Securities and Banking and Special Asset Pool retain servicing for a limited number of their mortgage securitizations.

The Company's Consumer business provides a wide range of mortgage loan products to its customers. Once originated, the Company often securitizes these loans through the use of QSPEs. These QSPEs are funded through the issuance of Trust Certificates backed solely by the transferred assets. These certificates have the same average life as the transferred assets. In addition to providing a source of liquidity and less expensive funding, securitizing these assets also reduces the Company's credit exposure to the borrowers. These mortgage loan securitizations are primarily non-recourse. However, the Company generally retains the servicing rights and in certain instances retains investment securities, interest-only strips and residual interests in future cash flows from the trusts.

Mortgage Securitizations—Citicorp

The following tables summarize selected cash flow information related to mortgage securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009 U.S. agency-sponsored mortgages	2009 Non-agency-sponsored mortgages	2008 Agency- and non-agency-sponsored mortgages	2007 Agency- and non-agency-sponsored mortgages
Proceeds from new securitizations	$12.1	$3.6	$6.3	$40.1
Contractual servicing fees received	—	—	—	—
Cash flows received on retained interests and other net cash flows	0.1	—	0.2	0.3

Gains (losses) recognized on the securitization of U.S. agency-sponsored mortgages during 2009 were $(2) million. For the year ended December 31, 2009, gains (losses) recognized on the securitization of non-agency-sponsored mortgages were $20 million.

Agency and non-agency securitization gains (losses) for the years ended December 31, 2008 and 2007 were $(15) million and $145 million, respectively.

Key assumptions used in measuring the fair value of retained interests at the date of sale or securitization of mortgage receivables for the years ended December 31, 2009 and 2008 are as follows:

	December 31, 2009 U.S. agency-sponsored mortgages	December 31, 2009 Non-agency-sponsored mortgages	December 31, 2008 Agency- and non-agency-sponsored mortgages
Discount rate	0.6% to 46.9%	0.4% to 52.2%	5.1% to 39.4%
Constant prepayment rate	0.5% to 60.3%	2.0% to 31.3%	2.0% to 18.2%
Anticipated net credit losses	—	6.0% to 85.0%	40.0% to 85.0%

The range in the key assumptions for retained interests in Securities and Banking is due to the different characteristics of the interests retained by the Company. The interests retained by Securities and Banking range from highly rated and/or senior in the capital structure to unrated and/or residual interests.

The effect of adverse changes of 10% and 20% in each of the key assumptions used to determine the fair value of retained interests is disclosed below. The negative effect of each change is calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At December 31, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	December 31, 2009 U.S. agency-sponsored mortgages	December 31, 2009 Non-agency-sponsored mortgages
Discount rate	0.8% to 46.9%	1.4% to 39.2%
Constant prepayment rate	0.5% to 60.3%	3.0% to 30.7%
Anticipated net credit losses	N/A	50.0% to 80.0%

N/A Not applicable

Adverse change of 20%	(17)	(33)
Constant prepayment rate		
Adverse change of 10%	$ (10)	$ (3)
Adverse change of 20%	(15)	(6)

Anticipated net credit losses		
Adverse change of 10%	$ —	$ (32)
Adverse change of 20%	—	(60)

Mortgage Securitizations—Citi Holdings

The following tables summarize selected cash flow information related to mortgage securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009 U.S. agency-sponsored mortgages	2009 Non-agency-sponsored mortgages	2008 Agency- and non-agency-sponsored mortgages	2007 Agency- and non-agency-sponsored mortgages
Proceeds from new securitizations	$ 70.1	$ —	$ 81.7	$ 107.2
Contractual servicing fees received	1.3	0.1	1.4	1.7
Cash flows received on retained interests and other net cash flows	0.3	0.1	0.7	0.3

The Company did not recognize gains (losses) on the securitization of U.S. agency- and non-agency-sponsored mortgages in the year ended December 31, 2009. There were gains from the securitization of agency- and non-agency-sponsored mortgages of $73 million and $(27) million in the years ended December 31, 2008 and 2007, respectively.

Key assumptions used in measuring the fair value of retained interests at the date of sale or securitization of mortgage receivables for the years ended December 31, 2009 and 2008 are as follows:

	2009 U.S. agency-sponsored mortgages	2009 Non-agency-sponsored mortgages	2008 Agency- and non-agency-sponsored mortgages
Discount rate	7.9% to 15.0%	N/A	4.5% to 18.2%
Constant prepayment rate	2.8% to 18.2%	N/A	3.6% to 32.9%
Anticipated net credit losses	0.0% to 0.1%	N/A	—

N/A Not applicable

The range in the key assumptions for retained interests in Special Asset Pool and Local Consumer Lending is due to the different characteristics of the interests retained by the Company. The interests retained by Securities and Banking range from highly rated and/or senior in the capital structure to unrated and/or residual interests.

The effect of adverse changes of 10% and 20% in each of the key assumptions used to determine the fair value of retained interests is disclosed below. The negative effect of each change is calculated independently, holding all other assumptions constant. Because the key assumptions may not in fact be independent, the net effect of simultaneous adverse changes in the key assumptions may be less than the sum of the individual effects shown below.

At December 31, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	December 31, 2009 U.S. agency-sponsored mortgages	December 31, 2009 Non-agency-sponsored mortgages
Discount rate	11.9%	1.4% to 44.1%
Constant prepayment rate	12.6%	5.0% to 32.8%
Anticipated net credit losses	0.1%	0.3% to 70.0%
Weighted average life	6.5 years	0.1 to 9.4 years

In millions of dollars	U.S. agency-sponsored mortgages	Non-agency-sponsored mortgages
Carrying value of retained interests	$ 6,273	$ 992
Discount rates		
Adverse change of 10%	$ (227)	$ (38)
Adverse change of 20%	(439)	(74)
Constant prepayment rate		
Adverse change of 10%	$ (322)	$ (41)

Adverse change of 20%	(622)	(83)
Anticipated net credit losses		
Adverse change of 10%	$ (12)	$ (45)
Adverse change of 20%	(25)	(88)

Mortgage Servicing Rights

The fair value of capitalized mortgage servicing rights (MSRs) was $6.5 billion and $5.7 billion at December 31, 2009 and 2008, respectively. The MSRs correspond to principal loan balances of $555 billion and $662 billion as of December 31, 2009 and 2008, respectively. The following table summarizes the changes in capitalized MSRs for the years ended December 31, 2009 and 2008:

In millions of dollars	2009	2008
Balance, beginning of year	$ 5,657	$ 8,380
Originations	1,035	1,311
Purchases	—	1
Changes in fair value of MSRs due to changes in inputs and assumptions	1,546	(2,682)
Transfer to Trading account assets	—	(163)
Other changes (1)	(1,708)	(1,190)
Balance, end of year	$ 6,530	$ 5,657

(1) Represents changes due to customer payments and passage of time.

The market for MSRs is not sufficiently liquid to provide participants with quoted market prices. Therefore, the Company uses an option-adjusted spread valuation approach to determine the fair value of MSRs. This approach consists of projecting servicing cash flows under multiple interest rate scenarios and discounting these cash flows using risk-adjusted discount rates. The key assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. The model assumptions and the MSRs' fair value estimates are compared to observable trades of similar MSR portfolios and interest-only security portfolios, as available, as well as to MSR broker valuations and industry surveys. The cash flow model and underlying prepayment and interest rate models used to value these MSRs are subject to validation in accordance with the Company's model validation policies.

The fair value of the MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company economically hedges a significant portion of the value of its MSRs through the use of interest rate derivative contracts, forward purchase commitments of mortgage-backed securities and purchased securities classified as trading.

The Company receives fees during the course of servicing previously securitized mortgages. The amounts of these fees for the years ended December 31, 2009, 2008 and 2007 were as follows:

In millions of dollars	2009	2008	2007
Servicing fees	$ 1,635	$ 2,121	$ 1,683
Late fees	93	123	90
Ancillary fees	77	81	61
Total MSR fees	$ 1,805	$ 2,325	$ 1,834

These fees are classified in the Consolidated Statement of Income as Commissions and fees.

Student Loan Securitizations

Through the Company's Local Consumer Lending business within Citi Holdings, the Company maintains programs to securitize certain portfolios of student loan assets. Under these securitization programs, transactions qualifying as sales are off-balance-sheet transactions in which the loans are removed from the Consolidated Financial Statements of the Company and sold to a QSPE. These QSPEs are funded through the issuance of pass-through term notes collateralized solely by the trust assets. For these off-balance-sheet securitizations, the Company generally retains interests in the form of subordinated residual interests (i.e., interest-only strips) and servicing rights.

Under terms of the trust arrangements, the Company has no obligations to provide financial support and has not provided such support. A substantial portion of the credit risk associated with the securitized loans has been transferred to third-party guarantors or insurers either under the Federal Family Education Loan Program, authorized by the U.S. Department of Education under the Higher Education Act of 1965, as amended, or private credit insurance.

The following tables summarize selected cash flow information related to student loan securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009	2008	2007
Proceeds from new securitizations	$ —	$ 2.0	$ 2.9
Contractual servicing fees received	0.1	0.1	0.1
Cash flows received on retained interests and other net cash flows	0.2	0.1	0.1

The Company did not recognize any gains or losses during 2009. The Company recognized a gain of $1 million during the year ended December 31, 2008 and $71 million during the year ended December 31, 2007.

Key assumptions used in measuring the fair value of the residual interest at the date of sale or securitization of Citi Holdings' student loan receivables for the years ended December 31, 2009 and 2008, respectively, are as follows:

	2009	2008
Discount rate	N/A	10.6%
Constant prepayment rate	N/A	9.0%
Anticipated net credit losses	N/A	0.5%

N/A Not applicable

At December 31, 2009, the key assumptions used to value retained interests and the sensitivity of the fair value to adverse changes of 10% and 20% in each of the key assumptions were as follows:

	Retained interests
Discount rate	5.4% to 16.9%
Constant prepayment rate	0.2% to 4.4%
Anticipated net credit losses	0.3% to 0.9%
Weighted average life	4.2 to 10.3 years

In millions of dollars	Retained interests
Carrying value of retained interests	$ 997
Discount rates	
Adverse change of 10%	$ (29)
Adverse change of 20%	(57)
Constant prepayment rate	
Adverse change of 10%	$ (4)
Adverse change of 20%	(8)
Anticipated net credit losses	
Adverse change of 10%	$ (5)
Adverse change of 20%	(10)

On-Balance-Sheet Securitizations—Citi Holdings

The Company engages in on-balance-sheet securitizations. These are securitizations that do not qualify for sales treatment; thus, the assets remain on the Company's balance sheet. The following table presents the carrying amounts and classification of consolidated assets and liabilities transferred in transactions from the Consumer credit card, student loan, mortgage and auto businesses, accounted for as secured borrowings:

In billions of dollars	December 31, 2009	December 31, 2008
Cash	$ 0.7	$ 0.3
Available-for-sale securities	0.1	0.1
Loans	24.8	7.5
Allowance for loan losses	(0.2)	(0.1)
Other	0.8	—
Total assets	$ 26.2	$ 7.8
Long-term debt	$ 20.9	$ 6.3
Other liabilities	2.1	0.3
Total liabilities	$ 23.0	$ 6.6

All assets are restricted from being sold or pledged as collateral. The cash flows from these assets are the only source used to pay down the associated liabilities, which are non-recourse to the Company's general assets.

Citi-Administered Asset-Backed Commercial Paper Conduits

The Company is active in the asset-backed commercial paper conduit business as administrator of several multi-seller commercial paper conduits, and also as a service provider to single-seller and other commercial paper conduits sponsored by third parties.

The multi-seller commercial paper conduits are designed to provide the Company's customers access to low-cost funding in the commercial paper markets. The conduits purchase assets from or provide financing facilities to customers and are funded by issuing commercial paper to third-party investors. The conduits generally do not purchase assets originated by the Company. The funding of the conduit is facilitated by the liquidity support and credit enhancements provided by the Company.

As administrator to the conduits, the Company is responsible for selecting and structuring assets purchased or financed by the conduits, making decisions regarding the funding of the conduits, including determining the tenor and other features of the commercial paper issued, monitoring the quality and performance of the conduits' assets, and facilitating the operations and cash flows of the conduits. In return, the Company earns structuring fees from customers for individual transactions and earns an administration fee from the conduit, which is equal to the income from client program and liquidity fees of the conduit after payment of interest costs and other fees. This administration fee is fairly stable, since most risks and rewards of the underlying assets are passed back to the customers and, once the asset pricing is negotiated, most ongoing income, costs and fees are relatively stable as a percentage of the conduit's size.

The conduits administered by the Company do not generally invest in liquid securities that are formally rated by third parties. The assets are privately negotiated and structured transactions that are designed to be held by the conduit, rather than actively traded and sold. The yield earned by the conduit on each asset is generally tied to the rate on the commercial paper issued by the conduit, thus passing interest rate risk to the client. Each asset purchased by the conduit is structured with transaction-specific credit enhancement features provided by the third-party seller,

including over collateralization, cash and excess spread collateral accounts, direct recourse or third-party guarantees. These credit enhancements are sized with the objective of approximating a credit rating of A or above, based on the Company's internal risk ratings.

Substantially all of the funding of the conduits is in the form of short-term commercial paper, with a weighted average life generally ranging from 30 to 45 days. As of December 31, 2009 and December 31, 2008, the weighted average life of the commercial paper issued was approximately 43 days and 37 days, respectively. In addition, the conduits have issued subordinate loss notes and equity with a notional amount of approximately $76 million and varying remaining tenors ranging from six months to six years.

The primary credit enhancement provided to the conduit investors is in the form of transaction-specific credit enhancement described above. In addition, there are generally two additional forms of credit enhancement that protect the commercial paper investors from defaulting assets. First, the subordinate loss notes issued by each conduit absorb any credit losses up to their full notional amount. It is expected that the subordinate loss notes issued by each unconsolidated conduit are sufficient to absorb a majority of the expected losses from each conduit, thereby making the single investor in the subordinate loss note the primary beneficiary. Second, each conduit has obtained a letter of credit from the Company, which is generally 8–10% of the conduit's assets. The letters of credit provided by the Company total approximately $3.4 billion and are included in the Company's maximum exposure to loss. The net result across all multi-seller conduits administered by the Company is that, in the event defaulted assets exceed the transaction-specific credit enhancement described above, any losses in each conduit are allocated in the following order:

- subordinate loss note holders,
- the Company, and
- the commercial paper investors.

The Company also provides the conduits with two forms of liquidity agreements that are used to provide funding to the conduits in the event of a market disruption, among other events. Each asset of the conduit is supported by a transaction-specific liquidity facility in the form of an asset purchase agreement (APA). Under the APA, the Company has agreed to purchase non-defaulted eligible receivables from the conduit at par. Any assets purchased under the APA are subject to increased pricing. The APA is not designed to provide credit support to the conduit, as it generally does not permit the purchase of defaulted or impaired assets and generally reprices the assets purchased to consider potential increased credit risk. The APA covers all assets in the conduits and is considered in the Company's maximum exposure to loss. In addition, the Company provides the conduits with program-wide liquidity in the form of short-term lending commitments. Under these commitments, the Company has agreed to lend to the conduits in the event of a short-term disruption in the commercial paper market, subject to specified conditions. The total notional exposure under the program-wide liquidity agreement is $11.3 billion and is considered in the Company's maximum exposure to loss. The Company receives fees for providing both types of liquidity agreement and considers these fees to be on fair market terms.

Finally, the Company is one of several named dealers in the commercial paper issued by the conduits and earns a market-based fee for providing such services. Along with third-party dealers, the Company makes a market in the commercial paper and may from time to time fund commercial paper pending sale to a third party. On specific dates with less liquidity in the market, the Company may hold in inventory commercial paper issued by

conduits administered by the Company, as well as conduits administered by third parties. The amount of commercial paper issued by its administered conduits held in inventory fluctuates based on market conditions and activity. As of December 31, 2009, the Company owned $70 million of the commercial paper issued by its administered conduits.

The Company is required to analyze the expected variability of the conduit quantitatively to determine whether the Company is the primary beneficiary of the conduit. The Company performs this analysis on a quarterly basis. For conduits where the subordinate loss notes or third-party guarantees are sufficient to absorb a majority of the expected loss of the conduit, the Company does not consolidate. In circumstances where the subordinate loss notes or third-party guarantees are insufficient to absorb a majority of the expected loss, the Company consolidates the conduit as its primary beneficiary due to the additional credit enhancement provided by the Company. In conducting this analysis, the Company considers three primary sources of variability in the conduit: credit risk, interest rate risk and fee variability.

The Company models the credit risk of the conduit's assets using a Credit Value at Risk (C-VAR) model. The C-VAR model considers changes in credit spreads (both within a rating class as well as due to rating upgrades and downgrades), name-specific changes in credit spreads, credit defaults and recovery rates and diversification effects of pools of financial assets. The model incorporates data from independent rating agencies as well as the Company's own proprietary information regarding spread changes, ratings transitions and losses given default. Using this credit data, a Monte Carlo simulation is performed to develop a distribution of credit risk for the portfolio of assets owned by each conduit, which is then applied on a probability-weighted basis to determine expected losses due to credit risk. In addition, the Company continuously monitors the specific credit characteristics of the conduit's assets and the current credit environment to confirm that the C-VAR model used continues to incorporate the Company's best information regarding the expected credit risk of the conduit's assets.

The Company also analyzes the variability in the fees that it earns from the conduit using monthly actual historical cash flow data to determine average fee and standard deviation measures for each conduit. Because any unhedged interest rate and foreign-currency risk not contractually passed on to customers is absorbed by the fees earned by the Company, the fee variability analysis incorporates those risks.

The fee variability and credit risk variability are then combined into a single distribution of the conduit's overall returns. This return distribution is updated and analyzed on at least a quarterly basis to ensure that the amount of the subordinate loss notes issued to third parties is sufficient to absorb greater than 50% of the total expected variability in the conduit's returns. The expected variability absorbed by the subordinate loss note investors is therefore measured to be greater than the expected variability absorbed by the Company through its liquidity arrangements and other fees earned, and the

investors in commercial paper and medium-term notes. While the notional amounts of the subordinate loss notes are quantitatively small compared to the size of the conduits, this is reflective of the fact that most of the substantive risks of the conduits are absorbed by the enhancements provided by the sellers (customers) and other third parties that provide transaction-level credit enhancement. Because these risks and related enhancements are generally required to be excluded from the analysis, the remaining risks and expected variability are quantitatively small. The calculation of variability focuses primarily on expected variability, rather than the risks associated with extreme outcomes (for example, large levels of default) that are expected to occur very infrequently. So while the subordinate loss notes are sized appropriately compared to expected losses, they do not provide significant protection against extreme or unusual credit losses. Where such credit losses occur or become expected to occur, the Company would consolidate the conduit due to the additional credit enhancement provided by the Company.

Third-Party Commercial Paper Conduits

The Company also provides liquidity facilities to single- and multi-seller conduits sponsored by third parties. These conduits are independently owned and managed and invest in a variety of asset classes, depending on the nature of the conduit. The facilities provided by the Company typically represent a small portion of the total liquidity facilities obtained by each conduit, and are collateralized by the assets of each conduit. As of December 31, 2009, the notional amount of these facilities was approximately $792 million, and $187 million was funded under these facilities.

Collateralized Debt and Loan Obligations

A collateralized debt obligation (CDO) is an SPE that purchases a pool of assets consisting of asset-backed securities and synthetic exposures through derivatives on asset-backed securities and issues multiple tranches of equity and notes to investors. A third-party manager is typically retained by the CDO to select the pool of assets and manage those assets over the term of the CDO. The Company earns fees for warehousing assets prior to the creation of a CDO, structuring CDOs and placing debt securities with investors. In addition, the Company has retained interests in many of the CDOs it has structured and makes a market in those issued notes.

A cash CDO, or arbitrage CDO, is a CDO designed to take advantage of the difference between the yield on a portfolio of selected assets, typically residential mortgage-backed securities, and the cost of funding the CDO through the sale of notes to investors. "Cash flow" CDOs are vehicles in which the CDO passes on cash flows from a pool of assets, while "market value" CDOs pay to investors the market value of the pool of assets owned by the CDO at maturity. Both types of CDOs are typically managed by a third-party asset manager. In these transactions, all of the equity and notes issued by the CDO are funded, as the cash is needed to purchase the debt securities. In a typical cash CDO, a third-party investment manager selects a

portfolio of assets, which the Company funds through a warehouse financing arrangement prior to the creation of the CDO. The Company then sells the debt securities to the CDO in exchange for cash raised through the issuance of notes. The Company's continuing involvement in cash CDOs is typically limited to investing in a portion of the notes or loans issued by the CDO and making a market in those securities, and acting as derivative counterparty for interest rate or foreign currency swaps used in the structuring of the CDO.

A synthetic CDO is similar to a cash CDO, except that the CDO obtains exposure to all or a portion of the referenced assets synthetically through derivative instruments, such as credit default swaps. Because the CDO does not need to raise cash sufficient to purchase the entire referenced portfolio, a substantial portion of the senior tranches of risk is typically passed on to CDO investors in the form of unfunded liabilities or derivative instruments. Thus, the CDO writes credit protection on select referenced debt securities to the Company or third parties and the risk is then passed on to the CDO investors in the form of funded notes or purchased credit protection through derivative instruments. Any cash raised from investors is invested in a portfolio of collateral securities or investment contracts. The collateral is then used to support the CDO's obligations on the credit default swaps written to counterparties. The Company's continuing involvement in synthetic CDOs generally includes purchasing credit protection through credit default swaps with the CDO, owning a portion of the capital structure of the CDO in the form of both unfunded derivative positions (primarily super-senior exposures discussed below) and funded notes, entering into interest-rate swap and total-return swap transactions with the CDO, lending to the CDO, and making a market in those funded notes.

A collateralized loan obligation (CLO) is substantially similar to the CDO transactions described above, except that the assets owned by the SPE (either cash instruments or synthetic exposures through derivative instruments) are corporate loans and to a lesser extent corporate bonds, rather than asset-backed debt securities.

Consolidation

The Company has retained significant portions of the "super-senior" positions issued by certain CDOs. These positions are referred to as "super-senior" because they represent the most senior positions in the CDO and, at the time of structuring, were senior to tranches rated AAA by independent rating agencies. These positions include facilities structured in the form of short-term commercial paper, where the Company wrote put options ("liquidity puts") to certain CDOs. Under the terms of the liquidity puts, if the CDO was unable to issue commercial paper at a rate below a specified maximum (generally LIBOR + 35 bps to LIBOR + 40 bps), the Company was obligated to fund the senior tranche of the CDO at a specified interest rate. As of December 31, 2009, the Company had purchased all $25 billion of the commercial paper subject to these liquidity puts.

Since inception of many CDO transactions, the subordinate tranches of the CDOs have diminished significantly in value and in rating. The declines in value of the subordinate tranches and in the super senior tranches indicate that the super-senior tranches are now exposed to a significant portion of the expected losses of the CDOs, based on current market assumptions. The Company evaluates these transactions for consolidation when reconsideration events occur.

Upon a reconsideration event, the Company is at risk for consolidation only if the Company owns a majority of either a single tranche or a group of tranches that absorb the remaining risk of the CDO. Due to reconsideration events during 2007, 2008 and 2009, the Company has consolidated 24 of the 39 CDOs/CLOs in which the Company holds a majority of the senior interests of the transaction.

The Company continues to monitor its involvement in unconsolidated VIEs and if the Company were to acquire additional interests in these vehicles or if the CDOs' contractual arrangements were to be changed to reallocate expected losses or residual returns among the various interest holders, the Company may be required to consolidate the CDOs. For cash CDOs, the net result of such consolidation would be to gross up the Company's balance sheet by the current fair value of the subordinate securities held by third parties, which amounts are not considered material. For synthetic CDOs, the net result of such consolidation may reduce the Company's balance sheet by eliminating intercompany derivative receivables and payables in consolidation.

Key Assumptions and Retained Interests—Citi Holdings

The key assumptions, used for the securitization of CDOs and CLOs during the year ended December 31, 2009, in measuring the fair value of retained interests at the date of sale or securitization are as follows:

	CDOs	CLOs
Discount rate	36.4% to 47.2%	4.3% to 6.3%

The effect of two negative changes in discount rates used to determine the fair value of retained interests is disclosed below.

In millions of dollars	CDOs	CLOs
Carrying value of retained interests	$186	$714
Discount rates		
Adverse change of 10%	$ (25)	$ (11)
Adverse change of 20%	(47)	(22)

Asset-Based Financing—Citicorp

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company. Financings in the form of debt securities or derivatives are, in most circumstances, reported in Trading account assets and accounted for at fair value through earnings.

The primary types of Citicorp's asset-based financing, total assets of the unconsolidated VIEs with significant involvement and the Company's maximum exposure to loss at December 31, 2009 are shown below. For the Company to realize that maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

In billions of dollars	Total assets	Maximum exposure
Type		
Commercial and other real estate	$ 0.5	$ —
Hedge funds and equities	5.9	3.1
Airplanes, ships and other assets	11.9	2.1
Total	$18.3	$ 5.2

Asset-Based Financing—Citi Holdings

The Company provides loans and other forms of financing to VIEs that hold assets. Those loans are subject to the same credit approvals as all other loans originated or purchased by the Company. Financings in the form of debt securities or derivatives are, in most circumstances, reported in Trading account assets and accounted for at fair value through earnings.

The primary types of Citi Holdings' asset-based financing, total assets of the unconsolidated VIEs with significant involvement and the Company's maximum exposure to loss at December 31, 2009 are shown below. For the Company to realize that maximum loss, the VIE (borrower) would have to default with no recovery from the assets held by the VIE.

In billions of dollars	Total assets	Maximum exposure
Type		
Commercial and other real estate	$36.1	$ 7.5
Hedge funds and equities	2.2	0.8

Corporate loans	8.2	7.0
Airplanes, ships and other assets	5.7	3.1
Total	$52.2	$ 18.4

The following table summarizes selected cash flow information related to asset-based financing for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009	2008	2007
Cash flows received on retained interests and other net cash flows	$ 2.7	$ 1.7	$ —

The effect of two negative changes in discount rates used to determine the fair value of retained interests is disclosed below.

In millions of dollars	Asset-based financing
Carrying value of retained interests	$ 6,981
Value of underlying portfolio	
Adverse change of 10%	$ —
Adverse change of 20%	(265)

Municipal Securities Tender Option Bond (TOB) Trusts

The Company sponsors TOB trusts that hold fixed- and floating-rate, tax-exempt securities issued by state or local municipalities. The trusts are typically single-issuer trusts whose assets are purchased from the Company and from the secondary market. The trusts issue long-term senior floating rate notes (Floaters) and junior residual securities (Residuals). The Floaters have a long-term rating based on the long-term rating of the underlying municipal bond and a short-term rating based on that of the liquidity provider to the trust. The Residuals are generally rated based on the long-term rating of the underlying municipal bond and entitle the holder to the residual cash flows from the issuing trust.

The Company sponsors three kinds of TOB trusts: customer TOB trusts, proprietary TOB trusts and QSPE TOB trusts.

- Customer TOB trusts are trusts through which customers finance investments in municipal securities and are not consolidated by the Company. Proprietary and QSPE TOB trusts, on the other hand, provide the Company with the ability to finance its own investments in municipal securities.
- Proprietary TOB trusts are generally consolidated, in which case the financing (the Floaters) is recognized on the Company's balance sheet as a liability. However, certain proprietary TOB trusts are not consolidated by the Company, where the Residuals are held by hedge funds that are consolidated and managed by the Company. The assets and the associated liabilities of these TOB trusts are not consolidated by the hedge funds (and, thus, are not consolidated by the Company) under the application of ASC 946, Financial Service—Investment Companies, which precludes consolidation of owned investments. The Company consolidates the hedge funds, because the Company holds controlling financial interests in the hedge funds. Certain of the Company's equity investmentsin the hedge funds are hedged with derivatives transactions executed by the Company with third parties referencing the returns of the hedge fund.
- QSPE TOB trusts provide the Company with the same exposure as proprietary TOB trusts and are not consolidated by the Company.

Credit rating distribution is based on the external rating of the municipal bonds within the TOB trusts, including any credit enhancement provided by monoline insurance companies or the Company in the primary or secondary markets, as discussed below. The total assets for proprietary TOB Trusts (consolidated and non-consolidated) includes $0.7 billion of assets where the Residuals are held by a hedge fund that is consolidated and managed by the Company.

The TOB trusts fund the purchase of their assets by issuing Floaters along with Residuals, which are frequently less than 1% of a trust's total funding. The tenor of the Floaters matches the maturity of the TOB trust and is equal to or shorter than the tenor of the municipal bond held by the trust, and the Floaters bear interest rates that are typically reset weekly to a new market rate (based on the SIFMA index). Floater holders have an option to tender the Floaters they hold back to the trust periodically. Customer TOB trusts issue the Floaters and Residuals to third parties. Proprietary and QSPE TOB trusts issue the Floaters to third parties and the Residuals are held by the Company.

Approximately $2.2 billion of the municipal bonds owned by TOB trusts have an additional credit guarantee provided by the Company. In all other cases, the assets are either unenhanced or are insured with a monoline insurance provider in the primary market or in the secondary market. While the trusts have not encountered any adverse credit events as defined in the underlying trust agreements, certain monoline insurance companies have experienced downgrades. In these cases, the Company has proactively managed the TOB programs by applying additional secondary market insurance on the assets or proceeding with orderly unwinds of the trusts.

The Company, in its capacity as remarketing agent, facilitates the sale of the Floaters to third parties at inception of the trust and facilitates the reset of the Floater coupon and tenders of Floaters. If Floaters are tendered and the Company (in its role as remarketing agent) is unable to find a new investor within a specified period of time, it can declare a failed remarketing (in which case the trust is unwound) or may choose to buy the Floaters into its own inventory and may continue to try to sell it to a third-party investor. While the level of the Company's inventory of

Floaters fluctuates, the Company held none of the Floater inventory related to the customer, proprietary and QSPE TOB programs as of December 31, 2009.

If a trust is unwound early due to an event other than a credit event on the underlying municipal bond, the underlying municipal bond is sold in the secondary market. If there is an accompanying shortfall in the trust's cash flows to fund the redemption of the Floaters after the sale of the underlying municipal bond, the trust draws on a liquidity agreement in an amount equal to the shortfall. Liquidity agreements are generally provided to the trust directly by the Company. For customer TOBs where the Residual is less than 25% of the trust's capital structure, the Company

has a reimbursement agreement with the Residual holder under which the Residual holder reimburses the Company for any payment made under the liquidity arrangement. Through this reimbursement agreement, the Residual holder remains economically exposed to fluctuations in value of the municipal bond. These reimbursement agreements are actively margined based on changes in value of the underlying municipal bond to mitigate the Company's counterparty credit risk. In cases where a third party provides liquidity to a proprietary or QSPE TOB trust, a similar reimbursement arrangement is made whereby the Company (or a consolidated subsidiary of the Company) as Residual holder absorbs any losses incurred by the liquidity provider. As of December 31, 2009, liquidity agreements provided with respect to customer TOB trusts totaled $6.2 billion, offset by reimbursement agreements in place with a notional amount of $4.6 billion. The remaining exposure relates to TOB transactions where the Residual owned by the customer is at least 25% of the bond value at the inception of the transaction. In addition, the Company has provided liquidity arrangements with a notional amount of $0.2 billion to QSPE TOB trusts and other non-consolidated proprietary TOB trusts described above.

The Company considers the customer and proprietary TOB trusts (excluding QSPE TOB trusts) to be VIEs. Because third-party investors hold the Residual and Floater interests in the customer TOB trusts, the Company's involvement and variable interests include only its role as remarketing agent and liquidity provider. On the basis of the variability absorbed by the customer through the reimbursement arrangement or significant residual investment, the Company does not consolidate the Customer TOB trusts. The Company's variable interests in the Proprietary TOB trusts include the Residual as well as the remarketing and liquidity agreements with the trusts. On the basis of the variability absorbed through these contracts (primarily the Residual), the Company generally consolidates the Proprietary TOB trusts. Finally, certain proprietary TOB trusts and QSPE TOB trusts are not consolidated by application of specific accounting literature. For the nonconsolidated proprietary TOB trusts and QSPE TOB trusts, the Company recognizes only its residual investment on its balance sheet at fair value and the third-party financing raised by the trusts is off balance sheet.

The following table summarizes selected cash flow information related to Citicorp's municipal bond securitizations for the years ended December 31, 2009, 2008 and 2007:

In billions of dollars	2009	2008	2007
Proceeds from new securitizations	$0.3	$1.2	$10.5
Cash flows received on retained interests and other net cash flows	0.7	0.5	—

In billions of dollars	2009	2008	2007
Proceeds from new securitizations	$ —	$0.1	$ —
Cash flows received on retained interests and other net cash flows	—	—	—

Municipal Investments

Municipal investment transactions represent partnerships that finance the construction and rehabilitation of low-income affordable rental housing. The Company generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits earned from the affordable housing investments made by the partnership.

Client Intermediation

Client intermediation transactions represent a range of transactions designed to provide investors with specified returns based on the returns of an underlying security, referenced asset or index. These transactions include credit-linked notes and equity-linked notes. In these transactions, the SPE typically obtains exposure to the underlying security, referenced asset or index through a derivative instrument, such as a total-return swap or a credit-default swap. In turn the SPE issues notes to investors that pay a return based on the specified underlying security, referenced asset or index. The SPE invests the proceeds in a financial asset or a guaranteed insurance contract (GIC) that serves as collateral for the derivative contract over the term of the transaction. The Company's involvement in these transactions includes being the counterparty to the SPE's derivative instruments and investing in a portion of the notes issued by the SPE. In certain transactions, the investor's maximum risk of loss is limited and the Company absorbs risk of loss above a specified level.

The Company's maximum risk of loss in these transactions is defined as the amount invested in notes issued by the SPE and the notional amount of any risk of loss absorbed by the Company through a separate instrument issued by the SPE. The derivative instrument held by the Company may generate a receivable from the SPE (for example, where the Company purchases credit protection from the SPE in connection with the SPE's issuance of a credit-linked note), which is collateralized by the assets owned by the SPE. These derivative instruments are not considered variable interests and any associated receivables are not included in the calculation of maximum exposure to the SPE.

Structured Investment Vehicles

Structured Investment Vehicles (SIVs) are SPEs that issue junior notes and senior debt (medium-term notes and short-term commercial paper) to fund the purchase of high quality assets. The Company acts as manager for the SIVs.

In order to complete the wind-down of the SIVs, the Company purchased the remaining assets of the SIVs in November 2008. The Company funded the purchase of the SIV assets by assuming the obligation to pay amounts due under the medium-term notes issued by the SIVs, as the medium-term notes mature.

Investment Funds

The Company is the investment manager for certain investment funds that invest in various asset classes including private equity, hedge funds, real estate, fixed income and infrastructure. The Company earns a management fee, which is a percentage of capital under management, and may earn performance fees. In addition, for some of these funds the Company has an ownership interest in the investment funds.

The Company has also established a number of investment funds as opportunities for qualified employees to invest in private equity investments. The Company acts as investment manager to these funds and may provide employees with financing on both recourse and non-recourse bases for a portion of the employees' investment commitments.

Trust Preferred Securities

The Company has raised financing through the issuance of trust preferred securities. In these transactions, the Company forms a statutory business trust and owns all of the voting equity shares of the trust. The trust issues preferred equity securities to third-party investors and invests the gross proceeds in junior subordinated deferrable interest debentures issued by the Company. These trusts have no assets, operations, revenues or cash flows other than those related to the issuance, administration and repayment of the preferred equity securities held by third-party investors. These trusts' obligations are fully and unconditionally guaranteed by the Company.

Because the sole asset of the trust is a receivable from the Company and the proceeds to the Company from the receivable exceed the Company's investment in the VIE's equity shares, the Company is not permitted to consolidate the trusts, even though the Company owns all of the voting equity shares of the trust, has fully guaranteed the trusts' obligations, and has the right to redeem the preferred securities in certain circumstances. The Company recognizes the subordinated debentures on its balance sheet as long-term liabilities.

24. DERIVATIVES ACTIVITIES

In the ordinary course of business, Citigroup enters into various types of derivative transactions. These derivative transactions include:

- Futures and forward contracts which are commitments to buy or sell at a future date a financial instrument, commodity or currency at a contracted price and may be settled in cash or through delivery.
- Swap contracts which are commitments to settle in cash at a future date or dates that may range from a few days to a number of years, based on differentials between specified financial indices, as applied to a notional principal amount.
- Option contracts which give the purchaser, for a fee, the right, but not the obligation, to buy or sell within a limited time a financial instrument, commodity or currency at a contracted price that may also be settled in cash, based on differentials between specified indices or prices.

Citigroup enters into these derivative contracts relating to interest rate, foreign currency, commodity, and other market/credit risks for the following reasons:

- Trading Purposes—Customer Needs: Citigroup offers its customers derivatives in connection with their risk-management actions to transfer, modify or reduce their interest rate, foreign exchange and other market/ credit risks or for their own trading purposes. As part of this process, Citigroup considers the customers' suitability for the risk involved and the business purpose for the transaction. Citigroup also manages its derivative-risk positions through offsetting trade activities, controls focused on price verification, and daily reporting of positions to senior managers.
- Trading Purposes—Own Account: Citigroup trades derivatives for its own account and as an active market maker. Trading limits and price verification controls are key aspects of this activity.
- Hedging: Citigroup uses derivatives in connection with its risk-management activities to hedge certain risks or reposition the risk profile of the Company. For example, Citigroup may issue fixed-rate long-term debt and then enter into a receive-fixed, pay-variable-rate interest rate swap with the same tenor and notional amount to convert the interest payments to a net variable-rate basis. This strategy is the most common form of an interest rate hedge, as it minimizes interest cost in certain yield curve environments. Derivatives are also used to manage risks inherent in specific groups of on-balance-sheet assets and liabilities, including investments, corporate and consumer loans, deposit liabilities, as well as other interest-sensitive assets and liabilities. In addition, foreign-exchange contracts are used to hedge non-U.S.-dollar-denominated debt, foreign-currency-denominated available-for-sale securities, net capital exposures and foreign-exchange transactions.

Derivatives may expose Citigroup to market, credit or liquidity risks in excess of the amounts recorded on the Consolidated Balance Sheet. Market risk on a derivative product is the exposure created by potential fluctuations in interest rates, foreign-exchange rates and other factors and is a function of the type of product, the volume of transactions, the tenor and terms of the agreement, and the underlying volatility. Credit risk is the exposure to loss in the event of nonperformance by the other party to the transaction where the value of any collateral held is not adequate to cover such losses. The recognition in earnings of unrealized gains on these transactions is subject to management's assessment as to collectability. Liquidity risk is the potential exposure that arises when the size of the derivative position may not be able to be rapidly adjusted in periods of high volatility and financial stress at a reasonable cost.

Information pertaining to the volume of derivative activity is provided in the tables below. The notional amounts, for both long and short derivative positions, of Citigroup's derivative instruments as of December 31, 2009 are presented in the table below.

(1) Derivatives in hedge accounting relationships accounted for under ASC 815 (SFAS 133) are recorded in either Other assets/liabilities or Trading account assets/liabilities on the Consolidated Balance Sheet.

(2) Management hedges represent derivative instruments used in certain economic hedging relationships that are identified for management purposes, but for which hedge accounting is not applied. These derivatives are recorded in Other assets/liabilities on the Consolidated Balance Sheet.

(3) Credit derivatives are arrangements designed to allow one party (protection buyer) to transfer the credit risk of a “reference asset” to another party (protection seller). These arrangements allow a protection seller to assume the credit risk associated with the reference asset without directly purchasing that asset. The Company has entered into credit derivatives positions for purposes such as risk management, yield enhancement, reduction of credit concentrations and diversification of overall risk.

Derivative Mark-to-Market (MTM) Receivables/Payables

In millions of dollars at December 31, 2009	Derivatives classified in trading account assets/liabilities (1)		Derivatives classified in other assets/liabilities	
	Assets	Liabilities	Assets	Liabilities

Net receivables/payables	$ 58,879	$ 64,106	$ 8,291	$ 10,448

(1) The trading derivatives fair values are presented in Note 15 to the Consolidated Financial Statements.
(2) The credit derivatives trading assets are composed of $68,558 million related to protection purchased and $24,234 million related to protection sold as of December 31, 2009. The credit derivatives trading liabilities are composed of $24,162 million related to protection purchased and $58,262 million related to protection sold as of December 31, 2009.

All derivatives are reported on the balance sheet at fair value. In addition, where applicable, all such contracts covered by master netting agreements are reported net. Gross positive fair values are netted with gross negative fair values by counterparty pursuant to a valid master netting agreement. In addition, payables and receivables in respect of cash collateral received from or paid to a given counterparty are included in this netting. However, non-cash collateral is not included.

As of December 31, 2009, the amount of payables in respect of cash collateral received that was netted with unrealized gains from derivatives was $30 billion, while the amount of receivables in respect of cash collateral paid that was netted with unrealized losses from derivatives was $41 billion.

The amounts recognized in Principal transactions in the Consolidated Statement of Income for the year ended December 31, 2009 related to derivatives not designated in a qualifying hedging relationship as well as the underlying non-derivative instruments are included in the table below. Citigroup has elected to present this disclosure by business classification, showing derivative gains and losses related to its trading activities together with gains and losses related to non-derivative instruments within the same trading portfolios, as this better represents the way these portfolios are risk managed.

In millions of dollars for the year ended December 31, 2009	Principal transactions gains (losses) (1)
Interest rate contracts	$ 4,075
Foreign exchange contracts	2,762
Equity contracts	(334)
Commodity and other contracts	924
Credit derivatives	(3,495)
Total (1)	$ 3,932

(1) Also see Note 7 to the Consolidated Financial Statements.

The amounts recognized in Other revenue in the Consolidated Statement of Income for the year ended December 31, 2009 related to derivatives not designated in a qualifying hedging relationship and not recorded within
Trading account assets or Trading account liabilities are shown below. The table below does not include the offsetting gains/losses on the hedged items, which amounts are also recorded in Other revenue.

In millions of dollars for the year ended December 31, 2009	Gains (losses) included in Other revenue
Interest rate contracts	$ (327)
Foreign exchange contracts	3,851
Equity contracts	(7)
Commodity and other contracts	—
Credit derivatives	—
Total (1)	$ 3,517

(1) Non-designated derivatives are derivative instruments not designated in qualifying hedging relationships.

Accounting for Derivative Hedging

Citigroup accounts for its hedging activities in accordance with ASC 815, Derivatives and Hedging (formerly SFAS 133). As a general rule, hedge accounting is permitted for those situations where the Company is exposed to a particular risk, such as interest-rate or foreign-exchange risk, that causes changes in the fair value of an asset or liability, or variability in the expected future cash flows of an existing asset, liability or a forecasted transaction that may affect earnings.

Derivative contracts hedging the risks associated with the changes in fair value are referred to as fair value hedges, while contracts hedging the risks affecting the expected future cash flows are called cash flow hedges. Hedges that utilize derivatives or debt instruments to manage the foreign exchange risk associated with equity investments in non-U.S.-dollar functional currency foreign subsidiaries (net investment in a foreign operation) are called net investment hedges.

If certain hedging criteria specified in ASC 815 are met, including testing for hedge effectiveness, special hedge accounting may be applied. The hedge effectiveness assessment methodologies for similar hedges are performed in a similar manner and are used consistently throughout the hedging relationships. For fair value hedges, the changes in value of the hedging derivative, as well as the changes in value of the related hedged item due to the risk being hedged, are reflected in current earnings. For cash flow hedges and net investment hedges, the changes in value of the hedging derivative are reflected in Accumulated other comprehensive income (loss) in Citigroup's stockholders' equity, to the extent the hedge is effective. Hedge ineffectiveness, in either case, is reflected in current earnings.

For asset/liability management hedging, the fixed-rate long-term debt may be recorded at amortized cost under current U.S. GAAP. However, by electing to use ASC 815 (SFAS 133) hedge accounting, the carrying value of the debt is adjusted for changes in the benchmark interest rate, with any such changes in value recorded in current earnings. The related interest-rate swap is also recorded on the balance sheet at fair value, with any changes
in fair value reflected in earnings. Thus, any ineffectiveness resulting from the hedging relationship is recorded in current earnings. Alternatively, an economic hedge, which does not meet the ASC 815 hedging criteria, would involve only recording the derivative at fair value on the balance sheet, with its associated changes in fair value recorded in earnings. The debt would continue to be carried at amortized cost and, therefore, current earnings would be impacted only by the interest rate shifts and other factors that cause the change in the swap's value and the underlying yield of the debt. This type of hedge is undertaken when hedging requirements cannot be achieved or management decides not to apply ASC 815 hedge accounting. Another alternative for the Company would be to elect to carry the debt at fair value under the fair value option. Once the irrevocable election is made upon issuance of the debt, the full change in fair value of the debt would be reported in earnings. The related interest rate swap, with changes in fair value, would also be reflected in earnings, and provides a natural offset to the debt's fair value change. To the extent the two offsets would not be exactly equal, the difference would be reflected in current earnings. This type of economic hedge is undertaken when the Company prefers to follow this simpler method that achieves generally similar financial statement results to an ASC 815 fair value hedge.

Key aspects of achieving ASC 815 hedge accounting are documentation of hedging strategy and hedge effectiveness at the hedge inception and substantiating hedge effectiveness on an ongoing basis. A derivative must be highly effective in accomplishing the hedge objective of offsetting either changes in the fair value or cash flows of the hedged item for the risk being hedged. Any ineffectiveness in the hedge relationship is recognized in current earnings. The assessment of effectiveness excludes changes in the value of the hedged item that are unrelated to the risks being hedged. Similarly, the assessment of effectiveness may exclude changes in the fair value of a derivative related to time value that, if excluded, are recognized in current earnings.

Fair Value Hedges

Hedging of benchmark interest rate risk

Citigroup hedges exposure to changes in the fair value of outstanding fixed-rate issued debt and borrowings. The fixed cash flows from those financing transactions are converted to benchmark variable-rate cash flows by entering into receive-fixed, pay-variable interest rate swaps. These fair value hedge relationships use dollar-offset ratio analysis to determine whether the hedging relationships are highly effective at inception and on an ongoing basis.

Citigroup also hedges exposure to changes in the fair value of fixed-rate assets, including available-for-sale debt securities and loans. The hedging instruments used are receive-variable, pay-fixed interest rate swaps. Most of these fair value hedging relationships use dollar-offset ratio analysis to determine whether the hedging relationships are highly effective at inception and on an ongoing basis, while certain others use regression analysis.

Hedging of foreign exchange risk

Citigroup hedges the change in fair value attributable to foreign-exchange rate movements in available-for-sale securities that are denominated in currencies other than the functional currency of the entity holding the securities, which may be within or outside the U.S. The hedging instrument employed is a forward foreign-exchange contract. In this type of hedge, the change in fair value of the hedged available-for-sale security attributable to the portion of foreign exchange risk hedged is reported in earnings and not Accumulated other comprehensive income—a process that serves to offset substantially the change in fair value of the forward contract that is also reflected in earnings. Citigroup considers the premium associated with forward contracts (differential between spot and contractual forward rates) as the cost of hedging; this is excluded from the assessment of hedge effectiveness and reflected directly in earnings. Dollar-offset method is used to assess hedge effectiveness. Since that assessment is based on changes in fair value attributable to changes in spot rates on both the available-for-sale securities and the forward contracts for the portion of the relationship hedged, the amount of hedge ineffectiveness is not significant.

The following table summarizes certain information related to the Company's fair value hedges for the year ended December 31, 2009:

In millions of dollars for the year ended December 31, 2009	Gains/(losses) on fair value hedges (1)
Gain (loss) on fair value designated and qualifying hedges	
Interest rate contracts	$ (4,642)
Foreign exchange contracts	1,202
Total gain (loss) on fair value designated and qualifying hedges	$ (3,440)
Gain (loss) on the hedged item in designated and qualifying fair value hedges	
Interest rate hedges	$ 4,549
Foreign exchange hedges	(846)
Total gain (loss) on the hedged item in designated and qualifying fair value hedges	$ 3,703
Hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges	
Interest rate hedges	$ 140
Foreign exchange hedges	137
Total hedge ineffectiveness recognized in earnings on designated and qualifying fair value hedges	$ 277
Net gain (loss) excluded from assessment of the effectiveness of fair value hedges	
Interest rate contracts	$ (233)
Foreign exchange contracts	219
Total net gain/(loss) excluded from assessment of the effectiveness of fair value hedges	$ (14)

(1) Amounts are included in Other Revenue on the Consolidated Statement of Income. The accrued interest income on fair value hedges is recorded in Net Interest Revenue and is excluded from this table.

Cash Flow Hedges

Hedging of benchmark interest rate risk
Citigroup hedges variable cash flows resulting from floating-rate liabilities and roll-over (re-issuance) of short-term liabilities. Variable cash flows from those liabilities are converted to fixed-rate cash flows by entering into receive-variable, pay-fixed interest-rate swaps and receive-variable, pay-fixed forward-starting interest-rate swaps. These cash-flow hedging relationships use either regression analysis or dollar-offset ratio analysis to assess whether the hedging relationships are highly effective at inception and on an ongoing basis. Since efforts are made to match the terms of the derivatives to those of the hedged forecasted cash flows as closely as possible, the amount of hedge ineffectiveness is not significant.

Hedging of foreign exchange risk
Citigroup locks in the functional currency equivalent of cash flows of various balance sheet liability exposures, including short-term borrowings and long-term debt (and the forecasted issuances or rollover of such items) that are denominated in a currency other than the functional currency of the issuing entity. Depending on the risk-management objectives, these types of hedges are designated as either cash-flow hedges of only foreign exchange risk or cash-flow hedges of both foreign-exchange and interest rate risk, and the hedging instruments used are foreign-exchange forward contracts, cross-currency swaps and foreign-currency options. For some hedges, Citigroup matches all terms of the hedged item and the hedging derivative at inception and on an ongoing basis to eliminate hedge ineffectiveness. Citigroup does not exclude any terms from consideration when applying the matched terms method. To the extent all terms are not perfectly matched, any ineffectiveness is measured using the "hypothetical derivative method" from FASB Derivative Implementation Group Issue G7 (now ASC 815-30-35-12 through 35-32). Efforts are made to match up the terms of the hypothetical and actual derivatives used as closely as possible. As a result, the amount of hedge ineffectiveness is not significant even when the terms do not match perfectly.

Hedging total return
Citigroup generally manages the risk associated with highly leveraged financing it has entered into by seeking to sell a majority of its exposures to the market prior to or shortly after funding. The portion of the highly leveraged financing that is retained by Citigroup is hedged with a total return swap.

The hedge ineffectiveness on the cash flow hedges recognized in earnings totals $16 million for the 12 months ended December 31, 2009.

The pretax change in Accumulated other comprehensive income (loss) from cash flow hedges for year ended December 31, 2009 is presented below:

In millions of dollars	2009
Effective portion of cash flow hedges included in AOCI	
Interest rate contracts	$ 488
Foreign exchange contracts	689
Total effective portion of cash flow hedges included in AOCI	$ 1,177
Effective portion of cash flow hedges reclassified from AOCI to earnings	
Interest rate contracts	$ (1,687)
Foreign exchange contracts	(308)
Total effective portion of cash flow hedges reclassified from AOCI to earnings (1)	$ (1,995)

(1) Included primarily in Other revenue and Net interest revenue on the Consolidated Income Statement.

For cash flow hedges, any changes in the fair value of the end-user derivative remaining in Accumulated other comprehensive income (loss) on the Consolidated Balance Sheet will be included in earnings of future periods to offset the variability of the hedged cash flows when such cash flows affect earnings. The net loss associated with cash flow hedges expected to be reclassified from Accumulated other comprehensive income within 12 months of December 31, 2009 is approximately $2.1 billion. The maximum length of time over which forecasted cash flows are hedged is 10 years.

The impact of cash flow hedges on AOCI is also shown in Note 22 to the Consolidated Financial Statements.

Net Investment Hedges
Consistent with ASC 830-20, Foreign Currency Matters — Foreign Currency Transactions (formerly SFAS 52, Foreign Currency Translation), ASC 815 allows hedging of the foreign-currency risk of a net investment in a foreign operation. Citigroup uses foreign-currency forwards, options and swaps and foreign-currency-denominated debt instruments to manage the foreign-exchange risk associated with Citigroup's equity

investments in several non-U.S. dollar functional currency foreign subsidiaries. Citigroup records the change in the carrying amount of these investments in the Cumulative translation adjustment account within Accumulated other comprehensive income (loss). Simultaneously, the effective portion of the hedge of this exposure is also recorded in the Cumulative translation adjustment account and the ineffective portion, if any, is immediately recorded in earnings.

For derivatives used in net investment hedges, Citigroup follows the forward-rate method from FASB Derivative Implementation Group Issue H8 (now ASC 815-35-35-16 through 35-26), "Foreign Currency Hedges: Measuring the Amount of Ineffectiveness in a Net Investment Hedge." According to that method, all changes in fair value, including changes

related to the forward-rate component of the foreign-currency forward contracts and the time-value of foreign-currency options, are recorded in the foreign-currency Cumulative translation adjustment account. For foreign-currency denominated debt instruments that are designated as hedges of net investments, the translation gain or loss that is recorded in the foreign-currency translation adjustment account is based on the spot exchange rate between the functional currency of the respective subsidiary and the U.S. dollar, which is the functional currency of Citigroup. To the extent the notional amount of the hedging instrument exactly matches the hedged net investment and the underlying exchange rate of the derivative hedging instrument relates to the exchange rate between the functional currency of the net investment and Citigroup's functional currency (or, in the case of a non-derivative debt instrument, such instrument is denominated in the functional currency of the net investment), no ineffectiveness is recorded in earnings.

The pretax loss recorded in foreign-currency translation adjustment within Accumulated other comprehensive income (loss), related to the effective portion of the net investment hedges, is $4,560 million during the year ended December 31, 2009.

Credit Derivatives

A credit derivative is a bilateral contract between a buyer and a seller under which the seller agrees to provide protection to the buyer against the credit risk of a particular entity ("reference entity" or "reference credit"). Credit derivatives generally require that the seller of credit protection make payments to the buyer upon the occurrence of predefined credit events (commonly referred to as "settlement triggers"). These settlement triggers are defined by the form of the derivative and the reference credit and are generally limited to the market standard of failure to pay on indebtedness and bankruptcy of the reference credit and, in a more limited range of transactions, debt restructuring. Credit derivative transactions referring to emerging market reference credits will also typically include additional settlement triggers to cover the acceleration of indebtedness and the risk of repudiation or a payment moratorium. In certain transactions, protection may be provided on a portfolio of referenced credits or asset-backed securities. The seller of such protection may not be required to make payment until a specified amount of losses has occurred with respect to the portfolio and/or may only be required to pay for losses up to a specified amount.

The Company makes markets in and trades a range of credit derivatives, both on behalf of clients as well as for its own account. Through these contracts, the Company either purchases or writes protection on either a single name or a portfolio of reference credits. The Company uses credit derivatives to help mitigate credit risk in its corporate and consumer loan portfolio and other cash positions, to take proprietary trading positions, and to facilitate client transactions.

The range of credit derivatives sold includes credit default swaps, total return swaps and credit options.

A credit default swap is a contract in which, for a fee, a protection seller agrees to reimburse a protection buyer for any losses that occur due to a credit event on a reference entity. If there is no credit default event or settlement trigger, as defined by the specific derivative contract, then the protection seller makes no payments to the protection buyer and receives only the contractually specified fee. However, if a credit event occurs as defined in the specific derivative contract sold, the protection seller will be required to make a payment to the protection buyer.

A total return swap transfers the total economic performance of a reference asset, which includes all associated cash flows, as well as capital appreciation or depreciation. The protection buyer receives a floating rate of interest and any depreciation on the reference asset from the protection seller and, in return, the protection seller receives the cash flows associated with the reference asset plus any appreciation. Thus, according to the total return swap agreement, the protection seller will be obligated to make a payment anytime the floating interest rate payment and any depreciation of the reference asset exceed the cash flows associated with the underlying asset. A total return swap may terminate upon a default of the reference asset subject to the provisions of the related total return swap agreement between the protection seller and the protection buyer.

A credit option is a credit derivative that allows investors to trade or hedge changes in the credit quality of the reference asset. For example, in a credit spread option, the option writer assumes the obligation to purchase or sell the reference asset at a specified "strike" spread level. The option purchaser buys the right to sell the reference asset to, or purchase it from, the option writer at the strike spread level. The payments on credit spread options depend either on a particular credit spread or the price of the underlying credit-sensitive asset. The options usually terminate if the underlying assets default.

A credit-linked note is a form of credit derivative structured as a debt security with an embedded credit default swap. The purchaser of the note writes credit protection to the issuer, and receives a return which will be negatively affected by credit events on the underlying reference credit. If the reference entity defaults, the purchaser of the credit-linked note may assume the long position in the debt security and any future cash flows from it, but will lose the amount paid to the issuer of the credit-linked note. Thus the maximum amount of the exposure is the carrying amount of the credit-linked note. As of December 31, 2009 and December 31, 2008, the amount of credit-linked notes held by the Company in trading inventory was immaterial.

The following tables summarize the key characteristics of the Company's credit derivative portfolio as protection seller as of December 31, 2009 and December 31, 2008:

In millions of dollars as of December 31, 2009	Maximum potential amount of future payments	Fair value payable (1)
By industry/counterparty		
Bank	$ 807,484	$34,666
Broker-dealer	340,949	16,309
Monoline	33	—
Non-financial	13,221	262
Insurance and other financial institutions	52,366	7,025
Total by industry/counterparty	$ 1,214,053	$58,262
By instrument		
Credit default swaps and options	$ 1,213,208	$57,987
Total return swaps and other	845	275
Total by instrument	$ 1,214,053	$58,262
By rating		
Investment grade	$ 576,930	9,632
Non-investment grade	339,920	28,664
Not rated	297,203	19,966
Total by rating	$ 1,214,053	$58,262

(1) In addition, fair value amounts receivable under credit derivatives sold were $24,234 million.

In millions of dollars as of December 31, 2008	Maximum potential amount of future payments	Fair value payable (1)
By industry/counterparty		
Bank	$ 943,949	$118,428
Broker-dealer	365,664	55,458
Monoline	139	91
Non-financial	7,540	2,556
Insurance and other financial institutions	125,988	21,700
Total by industry/counterparty	$ 1,443,280	$198,233
By instrument		
Credit default swaps and options	$ 1,441,375	$197,981
Total return swaps and other	1,905	252
Total by instrument	$ 1,443,280	$198,233
By rating		
Investment grade	$ 851,426	$ 83,672
Non-investment grade	410,483	87,508
Not rated	181,371	27,053
Total by rating	$ 1,443,280	$198,233

(1) In addition, fair value amounts receivable under credit derivatives sold were $5,890 million.

Citigroup evaluates the payment/performance risk of the credit derivatives to which it stands as a protection seller based on the credit rating which has been assigned to the underlying referenced credit. Where external ratings by nationally recognized statistical rating organizations (such as Moody's and S&P) are used, investment grade ratings are considered to be Baa/BBB
or above, while anything below is considered non-investment grade. The Citigroup internal ratings are in line with the related external credit rating system. On certain underlying referenced credit, mainly related to over-the-counter credit derivatives, ratings are not available, and these are included in the not-rated category. Credit derivatives written on an underlying non-investment grade referenced credit represent greater payment risk to the Company. The non-investment grade category in the table above primarily includes credit derivatives where the underlying referenced entity has been downgraded subsequent to the inception of the derivative.

The maximum potential amount of future payments under credit derivative contracts presented in the table above is based on the notional value of the derivatives. The Company believes that the maximum potential amount of future payments for credit protection sold is not representative of the actual loss exposure based on historical experience. This amount has not been reduced by the Company's rights to the underlying assets and the related cash flows. In accordance with most credit derivative contracts, should a credit event (or settlement trigger)

occur, the Company is usually liable for the difference between the protection sold and the recourse it holds in the value of the underlying assets. Thus, if the reference entity defaults, Citi will generally have a right to collect on the underlying reference credit and any related cash flows, while being liable for the full notional amount of credit protection sold to the buyer. Furthermore, this maximum potential amount of future payments for credit protection sold has not been reduced for any cash collateral paid to a given counterparty, as such payments would be calculated after netting all derivative exposures, including any credit derivatives with that counterparty in accordance with a related master netting agreement. Due to such netting processes, determining the amount of collateral that corresponds to credit derivative exposures only is not possible. The Company actively monitors open credit risk exposures, and manages this exposure by using a variety of strategies including purchased credit derivatives, cash collateral or direct holdings of the referenced assets. This risk mitigation activity is not captured in the table above.

Credit-Risk-Related Contingent Features in Derivatives

Certain derivative instruments contain provisions that require the Company to either post additional collateral or immediately settle any outstanding liability balances upon the occurrence of a specified credit-risk-related event. These events, which are defined by the existing derivative contracts, are primarily downgrades in the credit ratings of the Company and its affiliates. The fair value of all derivative instruments with credit-risk-related contingent features that are in a liability position at December 31, 2009 is $17 billion. The Company has posted $11 billion as collateral for this exposure in the normal course of business as of December 31, 2009. Each downgrade would trigger additional collateral requirements for the Company and its affiliates. In the event that each legal entity was downgraded a single notch as of December 31, 2009, the Company would be required to post additional collateral of $2.6 billion.

25. CONCENTRATIONS OF CREDIT RISK

Concentrations of credit risk exist when changes in economic, industry or geographic factors similarly affect groups of counterparties whose aggregate credit exposure is material in relation to Citigroup's total credit exposure. Although Citigroup's portfolio of financial instruments is broadly diversified along industry, product, and geographic lines, material transactions are completed with other financial institutions, particularly in the securities trading, derivatives, and foreign exchange businesses.

In connection with the Company's efforts to maintain a diversified portfolio, the Company limits its exposure to any one geographic region, country or individual creditor and monitors this exposure on a continuous basis. At December 31, 2009, Citigroup's most significant concentration of credit risk was with the U.S. government and its agencies. The Company's exposure, which primarily results from trading assets and investments issued by the U.S. government and its agencies, amounted to $126.6 billion and $93.7 billion at December 31, 2009 and 2008, respectively. The Mexican and Japanese governments and their agencies are the next largest exposures, which are rated investment grade by both Moody's and S&P. The Company's exposure to Mexico amounted to $41.4 billion and $35.0 billion at December 31, 2009 and 2008, respectively, and is composed of investment securities, loans and trading assets. The Company's exposure to Japan amounted to $31.8 billion and $29.1 billion at December 31, 2009 and 2008, respectively, and is composed of investment securities, loans and trading assets.

26. FAIR VALUE MEASUREMENT

Effective January 1, 2007, the Company adopted SFAS 157 (now ASC 820-10), which defines fair value, establishes a consistent framework for measuring fair value and expands disclosure requirements about fair value measurements. Among other things, the standard requires the Company to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. In addition, it precludes the use of block discounts when measuring the fair value of instruments traded in an active market; such discounts were previously applied to large holdings of publicly traded equity securities. It also requires recognition of trade-date gains related to certain derivative transactions whose fair value has been determined using unobservable market inputs. This guidance supersedes the guidance in Emerging Issues Task Force Issue No. 02-3, "Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities" (EITF Issue 02-3), which prohibited the recognition of trade-date gains for such derivative transactions when determining the fair value of instruments not traded in an active market.

As a result of the adoption of the standard, the Company made amendments to the techniques used in measuring the fair value of derivative and other positions. These amendments change the way that the probability of default of a counterparty is factored into the valuation of derivative positions, include for the first time the impact of Citigroup's own credit risk on derivatives and other liabilities measured at fair value, and also eliminate the portfolio servicing adjustment that is no longer necessary.

Fair Value Hierarchy

ASC 820-10 also specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's market assumptions. These two types of inputs have created the following fair-value hierarchy:

- Level 1: Quoted prices for identical instruments in active markets.
- Level 2: Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets.
- Level 3: Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

This hierarchy requires the use of observable market data when available. The Company considers relevant and observable market prices in its valuations where possible. The frequency of transactions, the size of the bid-ask spread and the amount of adjustment necessary when comparing similar transactions are all factors in determining the liquidity of markets and the relevance of observed prices in those markets.

Determination of Fair Value

For assets and liabilities carried at fair value, the Company measures such value using the procedures set out below, irrespective of whether these assets and liabilities are carried at fair value as a result of an election or whether they were previously carried at fair value.

When available, the Company generally uses quoted market prices to determine fair value and classifies such items as Level 1. In some cases where a market price is available, the Company will make use of acceptable practical expedients (such as matrix pricing) to calculate fair value, in which case the items are classified as Level 2.

If quoted market prices are not available, fair value is based upon internally developed valuation techniques that use, where possible, current market-based or independently sourced market parameters, such as interest rates, currency rates, option volatilities, etc. Items valued using such internally generated valuation techniques are classified according to the lowest level input or value driver that is significant to the valuation. Thus, an item may be classified in Level 3 even though there may be some significant inputs that are readily observable.

Where available, the Company may also make use of quoted prices for recent trading activity in positions with the same or similar characteristics to that being valued. The frequency and size of transactions and the amount of the bid-ask spread are among the factors considered in determining the liquidity of markets and the relevance of observed prices from those markets. If relevant and observable prices are available, those valuations would be classified as Level 2. If prices are not available, other valuation techniques would be used and the item would be classified as Level 3.

Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors or brokers. Vendors and brokers' valuations may be based on a variety of inputs ranging from observed prices to proprietary valuation models.

The following section describes the valuation methodologies used by the Company to measure various financial instruments at fair value, including an indication of the level in the fair value hierarchy in which each instrument is generally classified. Where appropriate, the description includes details of the valuation models, the key inputs to those models as well as any significant assumptions.

Securities purchased under agreements to resell and securities sold under agreements to repurchase

No quoted prices exist for such instruments and so fair value is determined using a discounted cash-flow technique. Cash flows are estimated based on the terms of the contract, taking into account any embedded derivative or other features. Expected cash flows are discounted using market rates appropriate to the maturity of the instrument as well as the nature and amount of collateral taken or received. Generally, such instruments are classified within Level 2 of the fair value hierarchy as the inputs used in the fair valuation are readily observable.

Trading account assets and liabilities—trading securities and trading loans

When available, the Company uses quoted market prices to determine the fair value of trading securities; such items are classified as Level 1 of the fair value hierarchy. Examples include some government securities and exchange-traded equity securities.

For bonds and secondary market loans traded over the counter, the Company generally determines fair value utilizing internal valuation techniques. Fair value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources and may apply matrix pricing for similar bonds or loans where no price is observable. If available, the Company may also use quoted prices for recent trading activity of assets with similar characteristics to the bond or loan being valued. Trading securities and loans priced using such methods are generally classified as Level 2. However, when less liquidity exists for a security or loan, a quoted price is stale or prices from independent sources vary, a loan or security is generally classified as Level 3.

Where the Company's principal market for a portfolio of loans is the securitization market, the Company uses the securitization price to determine the fair value of the portfolio. The securitization price is determined from the assumed proceeds of a hypothetical securitization in the current market, adjusted for transformation costs (i.e., direct costs other than transaction costs) and securitization uncertainties such as market conditions and liquidity. As a result of the severe reduction in the level of activity in certain securitization markets since the second half of 2007, observable securitization prices for certain directly comparable portfolios of loans have not been readily available. Therefore, such portfolios of loans are generally classified as Level 3 of the fair value hierarchy. However, for other loan securitization markets, such as those related to conforming prime fixed-rate and conforming adjustable-rate mortgage loans, pricing verification of the hypothetical securitizations has been possible, since these markets have remained active. Accordingly, these loan portfolios are classified as Level 2 in the fair value hierarchy.

Trading account assets and liabilities—derivatives

Exchange-traded derivatives are generally fair valued using quoted market (i.e., exchange) prices and so are classified as Level 1 of the fair value hierarchy.

The majority of derivatives entered into by the Company are executed over the counter and so are valued using internal valuation techniques as no quoted market prices exist for such instruments. The valuation techniques and inputs depend on the type of derivative and the nature of the underlying instrument. The principal techniques used to value these instruments are discounted cash flows, Black-Scholes and Monte Carlo simulation. The fair values of derivative contracts reflect cash the Company has paid or received (for example, option premiums paid and received).

The key inputs depend upon the type of derivative and the nature of the underlying instrument and include interest rate yield curves, foreign-exchange rates, the spot price of the underlying volatility and correlation. The item is placed in either Level 2 or Level 3 depending on the observability of the significant inputs to the model. Correlation and items with longer tenors are generally less observable.

Subprime-related direct exposures in CDOs

The Company accounts for its CDO super-senior subprime direct exposures and the underlying securities on a fair-value basis with all changes in fair value recorded in earnings. Citigroup’s CDO super-senior subprime direct exposures are not subject to valuation based on observable transactions. Accordingly, the fair value of these exposures is based on management’s best estimates based on facts and circumstances as of the date of these Consolidated Financial Statements.

Citigroup’s CDO super-senior subprime direct exposures are Level 3 assets. The valuation of the high-grade and mezzanine ABS CDO positions uses trader prices based on the underlying assets of each high-grade and mezzanine ABS CDO. Unlike the ABCP positions, the high-grade and mezzanine positions are now largely hedged through the ABX and bond short positions, which are trader priced. This results in closer symmetry in the way these long and short positions are valued by the Company. Citigroup intends to use trader marks to value this portion of the portfolio going forward so long as it remains largely hedged.

The fair values of ABCP positions are based on significant unobservable inputs. Fair value of these exposures are based on estimates of future cash flows from the mortgage loans underlying the assets of the ABS CDOs. To determine the performance of the underlying mortgage loan portfolios, the Company estimates the prepayments, defaults and loss severities based on a number of macroeconomic factors, including housing price changes, unemployment rates, interest rates and borrower and loan attributes, such as age, credit scores, documentation status, loan-to-value (LTV) ratios and debt-to-income (DTI) ratios. The model is calibrated using available mortgage loan information including historical loan performance. In addition, the methodology estimates the impact of geographic concentration of mortgages and the impact of reported fraud in the origination of subprime mortgages. An appropriate discount rate is then applied to the cash flows generated for each ABCP tranche, in order to estimate its fair value under current market conditions.

When necessary, the valuation methodology used by Citigroup is refined and the inputs used for the purposes of estimation are modified, in part, to reflect ongoing market developments. More specifically, the inputs of home price appreciation (HPA) assumptions and delinquency data were updated along with discount rates that are based upon a weighted average combination of implied spreads from single name ABS bond prices and ABX indices, as well as CLO spreads under current market conditions.

The housing-price changes were estimated using a forward-looking projection, which incorporated the Loan Performance Index. In addition, the Company’s mortgage default model also uses recent mortgage performance data, a period of sharp home price declines and high levels of mortgage foreclosures.

The valuation as of December 31, 2009 assumes that U.S. housing prices are unchanged in 2010, increase 1.1% in 2011, increase 1.4% in 2012, and increase 3% from 2013 onwards.

In addition, the discount rates were based on a weighted average combination of the implied spreads from single name ABS bond prices, ABX indices and CLO spreads, depending on vintage and asset types. To determine the discount margin, the Company applies the mortgage default model to the bonds underlying the ABX indices and other referenced cash bonds and solves for the discount margin that produces the current market prices of those instruments.

The primary drivers that currently impact the model valuations are the discount rates used to calculate the present value of projected cash flows and projected mortgage loan performance.

For most of the lending and structuring direct subprime exposures (excluding super seniors), fair value is determined utilizing observable transactions where available, other market data for similar assets in markets that are not active and other internal valuation techniques.

Investments

The investments category includes available-for-sale debt and marketable equity securities, whose fair value is determined using the same procedures described for trading securities above or, in some cases, using vendor prices as the primary source.

Also included in investments are nonpublic investments in private equity and real estate entities held by the S&B business. Determining the fair value of nonpublic securities involves a significant degree of management resources and judgment as no quoted prices exist and such securities are generally very thinly traded. In addition, there may be transfer restrictions on private equity securities. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry-specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of nonpublic securities, the Company also considers events such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions.

Private equity securities are generally classified as Level 3 of the fair value hierarchy.

Short-term borrowings and long-term debt

Where fair value accounting has been elected, the fair value of non-structured liabilities is determined by discounting expected cash flows using the appropriate discount rate for the applicable maturity. Such instruments are generally classified as Level 2 of the fair value hierarchy as all inputs are readily observable.

The Company determines the fair value of structured liabilities (where performance is linked to structured interest rates, inflation or currency risks) and hybrid financial instruments (performance linked to risks other than interest rates, inflation or currency risks) using the appropriate derivative valuation methodology (described above) given the nature of the embedded risk profile. Such instruments are classified as Level 2 or Level 3 depending on the observability of significant inputs to the model.

Market valuation adjustments

Liquidity adjustments are applied to items in Level 2 and Level 3 of the fair value hierarchy to ensure that the fair value reflects the price at which the entire position could be liquidated. The liquidity reserve is based on the bid-offer spread for an instrument, adjusted to take into account the size of the position.

Counterparty credit-risk adjustments are applied to derivatives, such as over-the-counter derivatives, where the base valuation uses market parameters based on the LIBOR interest rate curves. Not all counterparties have the same credit risk as that implied by the relevant LIBOR curve, so it is necessary to consider the market view of the credit risk of a counterparty in order to estimate the fair value of such an item.

Bilateral or “own” credit-risk adjustments are applied to reflect the Company’s own credit risk when valuing derivatives and liabilities measured at fair value. Counterparty and own credit adjustments consider the expected future cash flows between Citi and its counterparties under the terms of the instrument and the effect of credit risk on the valuation of those cash flows, rather than a point-in-time assessment of the current recognized net asset or liability. Furthermore, the credit-risk adjustments take into account the effect of credit-risk mitigants, such as pledged collateral and any legal right of offset (to the extent such offset exists) with a counterparty through arrangements such as netting agreements.

Auction rate securities

Auction rate securities (ARS) are long-term municipal bonds, corporate bonds, securitizations and preferred stocks with interest rates or dividend yields that are reset through periodic auctions. The coupon paid in the current period is based on the rate determined by the prior auction. In the event of an auction failure, ARS holders receive a “fail rate” coupon, which is specified by the original issue documentation of each ARS.

Where insufficient orders to purchase all of the ARS issue to be sold in an auction were received, the primary dealer or auction agent would traditionally have purchased any residual unsold inventory (without a contractual obligation to do so). This residual inventory would then be repaid through subsequent auctions, typically in a short timeframe. Due to this auction mechanism and generally liquid market, ARS have historically traded and were valued as short-term instruments.

Citigroup acted in the capacity of primary dealer for approximately $72 billion of ARS and continued to purchase residual unsold inventory in support of the auction mechanism until mid-February 2008. After this date, liquidity in the ARS market deteriorated significantly, auctions failed due to a lack of bids from third-party investors, and Citigroup ceased to purchase unsold inventory. Following a number of ARS refinancings, at December 31, 2009, Citigroup continued to act in the capacity of primary dealer for approximately $28.2 billion of outstanding ARS.

The Company classifies its ARS as held-to-maturity, available-for-sale and trading securities.

Prior to the Company’s first auction’s failing in the first quarter of 2008, Citigroup valued ARS based on observation of auction market prices, because the auctions had a short maturity period (7, 28 and 35 days). This generally resulted in valuations at par. Once the auctions failed, ARS could no longer be valued using observation of auction market prices. Accordingly, the fair value of ARS is currently estimated using internally developed discounted cash flow valuation techniques specific to the nature of the assets underlying each ARS.

For ARS with U.S. municipal securities as underlying assets, future cash flows are estimated based on the terms of the securities underlying each individual ARS and discounted at an estimated discount rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are estimated prepayments and refinancings, estimated fail rate coupons (i.e., the rate paid in the event of auction failure, which varies according to the current credit rating of the issuer) and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for straight issuances of other municipal securities. In order to arrive at the appropriate discount rate, these observed rates were adjusted upward to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

For ARS with student loans as underlying assets, future cash flows are estimated based on the terms of the loans underlying each individual ARS, discounted at an appropriate rate in order to estimate the current fair value. The key assumptions that impact the ARS valuations are the expected weighted average life of the structure, estimated fail rate coupons, the amount of leverage in each structure and the discount rate used to calculate the present value of projected cash flows. The discount rate used for each ARS is based on rates observed for basic securitizations with similar maturities to the loans underlying each ARS being valued. In order to arrive at the appropriate discount rate, these observed rates were adjusted upward to factor in the specifics of the ARS structure being valued, such as callability, and the illiquidity in the ARS market.

During the first quarter of 2008, ARS for which the auctions failed and where no secondary market has developed were moved to Level 3, as the assets were subject to valuation using significant unobservable inputs. The majority of ARS continue to be classified as Level 3.

Alt-A mortgage securities

The Company classifies its Alt-A mortgage securities as held-to-maturity, available-for-sale, and trading investments. The securities classified as trading and available-for-sale are recorded at fair value with changes in fair value reported in current earnings and AOCI, respectively. For these purposes, Alt-A mortgage securities are non-agency residential mortgage-backed securities (RMBS) where (1) the underlying collateral has weighted average FICO scores between 680 and 720 or (2) for instances where FICO scores are greater than 720, RMBS have 30% or less of the underlying collateral composed of full documentation loans.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of Alt-A mortgage securities utilizing internal valuation techniques. Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities with the same or similar characteristics to that being valued.

The internal valuation techniques used for Alt-A mortgage securities, as with other mortgage exposures, consider estimated housing price changes, unemployment rates, interest rates and borrower attributes. They also consider prepayment rates as well as other market indicators.

Alt-A mortgage securities that are valued using these methods are generally classified as Level 2. However, Alt-A mortgage securities backed by Alt-A mortgages of lower quality or more recent vintages are mostly classified as Level 3 due to the reduced liquidity that exists for such positions, which reduces the reliability of prices available from independent sources.

Commercial real estate exposure

Citigroup reports a number of different exposures linked to commercial real estate at fair value with changes in fair value reported in earnings, including securities, loans and investments in entities that hold commercial real estate loans or commercial real estate directly. The Company also reports securities backed by commercial real estate as Available-for-sale investments, which are carried at fair value with changes in fair-value reported in AOCI.

Similar to the valuation methodologies used for other trading securities and trading loans, the Company generally determines the fair value of securities and loans linked to commercial real estate utilizing internal valuation techniques. Fair-value estimates from internal valuation techniques are verified, where possible, to prices obtained from independent vendors. Vendors compile prices from various sources. Where available, the Company may also make use of quoted prices for recent trading activity in securities or loans with the same or similar characteristics to that being valued. Securities and loans linked to commercial real estate valued using these methodologies are generally classified as Level 3 as a result of the reduced liquidity currently in the market for such exposures.

The fair value of investments in entities that hold commercial real estate loans or commercial real estate directly is determined using a similar methodology to that used for other non-public investments in real estate held by the S&B business. The Company uses an established process for determining the fair value of such securities, using commonly accepted valuation techniques, including the use of earnings multiples based on comparable public securities, industry-specific non-earnings-based multiples and discounted cash flow models. In determining the fair value of such investments, the Company also considers events, such as a proposed sale of the investee company, initial public offerings, equity issuances, or other observable transactions. Such investments are generally classified as Level 3 of the fair-value hierarchy.

Highly leveraged financing commitments

The Company reports highly leveraged loans with a carrying value of $36 million and face amount of $468 million at December 31, 2009 as held-for-sale, which are measured on a LOCOM basis. The fair value of such exposures is determined, where possible, using quoted secondary-market prices and classified as Level 2 of the fair value hierarchy if there is a sufficient level of activity in the market and quotes or traded prices are available with suitable frequency.

However, due to the dislocation of the credit markets and the reduced market interest in higher risk/higher yield instruments since the latter half of 2007, liquidity in the market for highly leveraged financings has been limited. Therefore, a majority of such exposures are classified as Level 3 as quoted secondary market prices do not generally exist. The fair value for such exposures is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of the loan being valued.

Items Measured at Fair Value on a Recurring Basis

The following tables present for each of the fair value hierarchy levels the Company's assets and liabilities that are measured at fair value on a recurring basis at December 31, 2009 and 2008. The Company often hedges positions that have been classified in the Level 3 category with financial
instruments that have been classified as Level 1 or Level 2. In addition, the Company also hedges items classified in the Level 3 category with instruments classified in Level 3 of the fair value hierarchy. The effects of these hedges are presented gross in the following table.

In millions of dollars at December 31, 2009	Level 1	Level 2	Level 3	Gross inventory	Netting(1)	Net balance
Assets						
Federal funds sold and securities borrowed or purchased under agreements to resell	$ —	$ 138,550	$ —	$ 138,550	$ (50,713)	$ 87,837
Trading securities						
Trading mortgage-backed securities						
U.S. government-sponsored agency guaranteed	$ —	$ 19,666	$ 972	$ 20,638	$ —	$ 20,638
Prime	—	772	384	1,156	—	1,156
Alt-A	—	842	387	1,229	—	1,229
Subprime	—	736	8,998	9,734	—	9,734
Non-U.S. residential	—	1,796	572	2,368	—	2,368
Commercial	—	1,004	2,451	3,455	—	3,455
Total trading mortgage-backed securities	$ —	$ 24,816	$ 13,764	$ 38,580	$ —	$ 38,580
U.S. Treasury and federal agencies securities

Changes in Level 3 Fair Value Category

The following tables present the changes in the Level 3 fair value category for the years ended December 31, 2009 and 2008. The Company classifies financial instruments in Level 3 of the fair value hierarchy when there is reliance on at least one significant unobservable input to the valuation model. In addition to these unobservable inputs, the valuation models for Level 3 financial instruments typically also rely on a number of inputs that are readily observable either directly or indirectly. Thus, the gains and losses presented below include changes in the fair value related to both observable and unobservable inputs.

The Company often hedges positions with offsetting positions that are classified in a different level. For example, the gains and losses for assets and liabilities in the Level 3 category presented in the tables below do not reflect the effect of offsetting losses and gains on hedging instruments that have been classified by the Company in the Level 1 and Level 2 categories. In addition, the Company hedges items classified in the Level 3 category with instruments also classified in Level 3 of the fair value hierarchy. The effects of these hedges are presented gross in the following tables.

(1) Changes in fair value for available-for-sale investments (debt securities) are recorded in Accumulated other comprehensive income, while gains and losses from sales are recorded in Realized gains (losses) from sales of investments on the Consolidated Statement of Income.

(2) Unrealized gains (losses) on MSRs are recorded in Commissions and fees on the Consolidated Statement of Income.

(3) Represents the amount of total gains or losses for the period, included in earnings (and Accumulated other comprehensive income for changes in fair value for available-for-sale investments), attributable to the change in fair value relating to assets and liabilities classified as Level 3 that are still held at December 31, 2009 and 2008.

(4) Total Level 3 derivative exposures have been netted in these tables for presentation purposes only.

The following is a discussion of the changes to the Level 3 balances for each of the roll-forward tables presented above.

The significant changes from December 31, 2008 to December 31, 2009 in Level 3 assets and liabilities are due to:

- A net decrease in trading securities of $10.8 billion that was driven by:

– Net transfers of $6.5 billion, due mainly to the transfer of debt securities from Level 3 to Level 2 due to increased liquidity and pricing transparency; and
– Net settlements of $5.8 billion, due primarily to the liquidations of subprime securities of $4.1 billion.

- The change in net trading derivatives driven by:

– A net loss of $4.9 billion relating to complex derivative contracts, such as those linked to credit, equity and commodity exposures. These losses include both realized and unrealized losses during 2009 and are partially offset by gains recognized in instruments that have been classified in Levels 1 and 2; and
– Net increase in derivative assets of $4.3 billion, which includes cash settlements of derivative contracts in an unrealized loss position, notably those linked to subprime exposures.

- The decrease in Level 3 Investments of $6.9 billion primarily resulted from:

– A reduction of $5.0 billion, due mainly to paydowns on debt securities and sales of private equity investments;
– The net transfer of investment securities from Level 3 to Level 2 of $1.5 billion, due to increased availability of observable pricing inputs; and
– Net losses recognized of $0.4 billion due mainly to losses on non-marketable equity securities including write-downs on private equity investments.

- The decrease in securities sold under agreements to repurchase of $9.1 billion is driven by a $8.6 billion net transfers from Level 3 to Level 2 as effective maturity dates on structured repos have shortened.
- The decrease in long-term debt of $1.5 billion is driven mainly by $1.3 billion of net terminations of structured notes.

The significant changes from December 31, 2007 to December 31, 2008 in Level 3 are due to:

- A net decrease in trading securities and loans of $24.8 billion that was driven by:

– Net realized and unrealized losses of $28.1 billion recorded in *Principal transactions*, which was composed mostly of write-downs recognized on various trading securities including ABCP of $9 billion;
– Net transfers in of $7.4 billion, which consisted of approximately $26 billion of net transfers in from Level 2 as the availability of observable pricing inputs continued to decline due to the current credit crisis, offset by transfers out of Level 3 of approximately $19 billion primarily related to Level 3 trading inventory being reclassified to held-to-maturity investments during the fourth quarter of 2008; and
– Net settlements of trading securities of $4.2 billion.

- The shift in the net unrealized gains/(losses) from trading derivatives driven by:

– A net gain of $7.8 billion relating to complex derivative contracts, such as those linked to credit, equity and commodity exposures. These gains include both realized and unrealized gains and are partially offset by losses recognized in instruments that have been classified in Levels 1 and 2; and
– $2.2 billion in net transfers in.

- The increase in Investments of $11.2 billion primarily resulted from:

– The addition of $10.3 billion from net purchases, issuances and settlements, which included $8.7 billion in senior debt securities retained by the Company from its sale of a corporate loan portfolio that included highly leveraged loans during the second quarter of 2008, plus $3 billion of ARS securities purchased from GWM clients, in accordance with the Auction Rate Securities settlement agreement;
– The net transfer in of investment securities from Level 2 of $5.8 billion, as the availability of observable pricing inputs continued to decline due to the current credit crisis; and

– Net losses recognized of $4.9 billion which was recorded in Accumulated other comprehensive income (loss) primarily related to Alt-A MBS classified as available-for-sale investments.

- The decrease in Mortgage Servicing Rights of $2.7 billion was primarily attributed to mark-to-market losses recognized in the portfolio due to decreases in the mortgage interest rates and increases in refinancing.
- The increase in Securities sold under agreements to repurchase of $5 billion is driven by a $6.2 billion increase from net transfers in as the continued credit crisis impacted the availability of observable inputs for the underlying securities related to this liability. This was offset by a reduction from net settlements of $1.4 billion.
- The decrease in short-term borrowings of $3.7 billion is due to net transfers out of $1.8 billion as valuation methodology inputs considered to be unobservable were determined not to be significant to the overall valuation. In addition, net payments of $1.8 billion were made during the year.
- The increase in long-term debt of $2.2 billion is driven by:

– The net transfers in of $38.8 billion, substantially all of which related to the transfer of consolidated SIV debt in the first quarter of 2008, as the availability of observable inputs continued to decline due to the current crisis; offset by
– $2.2 billion in gains recognized as credit spreads widened during the year; and
– $34.3 billion decrease from net settlements/payments. Included in these settlements were $21 billion of payments made on maturing SIV debt and the replacement of $17 billion of non-recourse, consolidated SIV debt classified as Level 3 with Citigroup debt classified as Level 2. This replacement occurred in connection with the purchase of the SIV assets by the Company in November 2008.

Items Measured at Fair Value on a Nonrecurring Basis
Certain assets and liabilities are measured at fair value on a nonrecurring basis and therefore are not included in the tables above.

These include assets measured at cost that have been written down to fair value during the periods as a result of an impairment. In addition, these assets include loans held-for-sale that are measured at LOCOM that were recognized at fair value below cost at the end of the period.

The fair value of loans measured on a LOCOM basis is determined where possible using quoted secondary-market prices. Such loans are generally classified as Level 2 of the fair-value hierarchy given the level of activity in the market and the frequency of available quotes. If no such quoted price exists, the fair value of a loan is determined using quoted prices for a similar asset or assets, adjusted for the specific attributes of that loan.

The following table presents all loans held-for-sale that are carried at LOCOM as of December 31, 2009 and 2008 (in billions):

	Aggregate cost	Fair value	Level 2	Level 3
December 31, 2009	$2.5	$1.6	$0.3	$1.3
December 31, 2008	3.1	2.1	0.8	1.3

27. FAIR VALUE ELECTIONS

The Company may elect to report most financial instruments and certain other items at fair value on an instrument-by-instrument basis with changes in fair value reported in earnings. After the initial adoption, the election is made upon the acquisition of an eligible financial asset, financial liability or firm commitment or when certain specified reconsideration events occur. The fair-value election may not be revoked once an election is made.

Additionally, the transition provisions of ASC 825-10 (SFAS 159) permit a one-time election for existing positions at the adoption date with a cumulative-effect adjustment included in opening retained earnings and future changes in fair value reported in earnings.

The Company also has elected to adopt the fair value accounting provisions for certain assets and liabilities prospectively. Hybrid financial instruments, such as structured notes containing embedded derivatives that otherwise would require bifurcation, as well as certain interest-only instruments, may be accounted for at fair value if the Company makes an irrevocable election to do so on an instrument-by-instrument basis. The changes in fair value are recorded in current earnings. Additional discussion regarding the applicable areas in which fair value elections were made is presented in Note 26 to the Consolidated Financial Statements.

All servicing rights must now be recognized initially at fair value. At its initial adoption, the standard permitted a one-time irrevocable election to re-measure each class of servicing rights at fair value, with the changes in fair value recorded in current earnings. The classes of servicing rights are identified based on the availability of market inputs used in determining their fair values and the methods for managing their risks. The Company has elected fair-value accounting for its mortgage and student loan classes of servicing rights. The impact of adopting this standard was not material. See Note 23 to the Consolidated Financial Statements for further discussions regarding the accounting and reporting of mortgage servicing rights.

The following table presents, as of December 31, 2009 and 2008, the fair value of those positions selected for fair-value accounting, as well as the changes in fair value for the years ended December 31, 2009 and 2008:

(1) Reclassified to conform to current period's presentation.

(2) Reflects netting of the amounts due from securities purchased under agreements to resell and the amounts owed under securities sold under agreements to repurchase.

235

Own Credit Valuation Adjustment

The fair value of debt liabilities for which the fair value option was elected (other than non-recourse and similar liabilities) was impacted by the narrowing of the Company's credit spreads. The estimated change in the fair value of these debt liabilities due to such changes in the Company's own credit risk (or instrument-specific credit risk) was a loss of $4.226 billion and a gain of $4.558 billion for the years ended December 31, 2009 and 2008, respectively. Changes in fair value resulting from changes in instrument-specific credit risk were estimated by incorporating the Company's current observable credit spreads into the relevant valuation technique used to value each liability as described above.

During the fourth quarter of 2008, the Company changed the source of its credit spreads from those observed in the credit default swap market to those observed in the bond market. Had this modification been in place since the beginning of 2008, the change in the Company's own credit spread would have resulted in a gain of $2.49 billion and a gain of $2.02 billion for the three and twelve months ended December 31, 2008, respectively. See also Note 1 to the Consolidated Financial Statements for a discussion of the Company's correction of an error in the calculation of CVA for prior periods.

The Fair Value Option for Financial Assets and Financial Liabilities

Selected portfolios of securities purchased under agreements to resell, securities borrowed, securities sold under agreements to repurchase, securities loaned and certain non-collateralized short-term borrowings

The Company elected the fair value option retrospectively for our United States and United Kingdom portfolios of fixed-income securities purchased under agreements to resell and fixed-income securities sold under agreements to repurchase (and certain non-collateralized short-term borrowings). The fair value option was also elected prospectively in the second quarter of 2007 for certain portfolios of fixed-income securities lending and borrowing transactions based in Japan. In each case, the election was made because the related interest-rate risk is managed on a portfolio basis, primarily with derivative instruments that are accounted for at fair value through earnings. Previously, these positions were accounted for on an accrual basis.

Changes in fair value for transactions in these portfolios are recorded in Principal transactions. The related interest revenue and interest expense are measured based on the contractual rates specified in the transactions and are reported as interest revenue and expense in the Consolidated Statement of Income.

Legg Mason convertible preferred equity securities

The Legg Mason convertible preferred equity securities (Legg shares) were acquired in connection with the sale of Citigroup's Asset Management business in December 2005. Prior to the election of fair value option accounting, the shares were classified as available-for-sale securities with the unrealized loss of $232 million as of December 31, 2006 included in Accumulated other comprehensive income (loss). This unrealized loss was recorded upon election of a fair value as a reduction of January 1, 2007 Retained earnings as part of the cumulative-effect adjustment.

During the first quarter of 2008, the Company sold the remaining 8.4 million Legg shares at a pretax loss of $10.3 million ($6.7 million after-tax).

Selected letters of credit and revolving loans hedged by credit default swaps or participation notes

The Company has elected the fair value option for certain letters of credit that are hedged with derivative instruments or participation notes. Upon electing the fair value option, the related portions of the allowance for loan losses and the allowance for unfunded lending commitments were reversed. Citigroup elected the fair value option for these transactions because the risk is managed on a fair value basis and mitigates accounting mismatches.

The notional amount of these unfunded letters of credit was $1.8 billion as of December 31, 2009 and $1.4 billion as of December 31, 2008. The amount funded was insignificant with no amounts 90 days or more past due or on a non-accrual status at December 31, 2009 and 2008.

These items have been classified in Trading account assets or Trading account liabilities on the Consolidated Balance Sheet. Changes in fair value of these items are classified in Principal transactions in the Company's Consolidated Statement of Income.

Certain credit products

Citigroup has elected the fair value option for certain originated and purchased loans, including certain unfunded loan products, such as guarantees and letters of credit, executed by Citigroup's trading businesses. None of these credit products is a highly leveraged financing commitment. Significant groups of transactions include loans and unfunded loan products that are expected to be either sold or securitized in the near term, or transactions where the economic risks are hedged with derivative instruments such as purchased credit default swaps or total return swaps where the Company pays the total return on the underlying loans to a third party. Citigroup has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. Fair value was not elected for most lending transactions across the Company, including where those management objectives would not be met.

The following table provides information about certain credit products carried at fair value:

In millions of dollars	December 31, 2009 Trading assets	December 31, 2009 Loans	December 31, 2008 (1) Trading assets	December 31, 2008 (1) Loans
Carrying amount reported on the Consolidated Balance Sheet	$14,338	$945	$16,254	$2,315
Aggregate unpaid principal balance in excess of fair value	390	(44)	6,501	3
Balance of non-accrual loans or loans more than 90 days past due	312	—	77	—
Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due	267	—	190	—

(1) Reclassified to conform to current period's presentation.

In addition to the amounts reported above, $200 million and $72 million of unfunded loan commitments related to certain credit products selected for fair value accounting were outstanding as of December 31, 2009 and 2008, respectively.

Changes in fair value of funded and unfunded credit products are classified in Principal transactions in the Company's Consolidated Statement of Income. Related interest revenue is measured based on the contractual interest rates and reported as Interest revenue on trading account assets or loans depending on their balance sheet classifications. The changes in fair value for the years ended December 31, 2009 and 2008 due to instrument-specific credit risk totaled to a gain of $5.9 billion and a loss of $6.0 billion, respectively.

Certain hybrid financial instruments

The Company has elected to apply fair value accounting for certain hybrid financial assets and liabilities whose performance is linked to risks other than interest rate, foreign exchange or inflation (e.g., equity, credit or commodity risks). In addition, the Company has elected fair value accounting for residual interests retained from securitizing certain financial assets.

The Company has elected fair value accounting for these instruments because these exposures are considered to be trading-related positions and, therefore, are managed on a fair value basis. In addition, the accounting for these instruments is simplified under a fair value approach as it eliminates the complicated operational requirements of bifurcating the embedded derivatives from the host contracts and accounting for each separately. The hybrid financial instruments are classified as Trading account assets, Loans, Deposits, Trading account liabilities (for prepaid derivatives), Short-term borrowings or Long-term debt on the Company's Consolidated Balance Sheet according to their legal form, while residual interests in certain securitizations are classified as Trading account assets.

For hybrid financial instruments for which fair value accounting has been elected and that are classified as Long-term debt, the aggregate unpaid principal exceeded the aggregate fair value by $3.4 billion and $4.1 billion as of December 31, 2009 and 2008, respectively. The difference for those instruments classified as Loans is immaterial.

Changes in fair value for hybrid financial instruments, which in most cases includes a component for accrued interest, are recorded in Principal transactions in the Company's Consolidated Statement of Income. Interest accruals for certain hybrid instruments classified as trading assets are recorded separately from the change in fair value as Interest revenue in the Company's Consolidated Statement of Income.

Certain investments in private equity and real estate ventures and certain equity method investments

Citigroup invests in private equity and real estate ventures for the purpose of earning investment returns and for capital appreciation. The Company has elected the fair value option for certain of these ventures, because such investments are considered similar to many private equity or hedge fund activities in our investment companies, which are reported at fair value. The fair value option brings consistency in the accounting and evaluation of certain of these investments. All investments (debt and equity) in such private equity and real estate entities are accounted for at fair value. These investments are classified as Investments on Citigroup's Consolidated Balance Sheet.

Citigroup also holds various non-strategic investments in leveraged buyout funds and other hedge funds that previously were required to be accounted for under the equity method. The Company elected fair value accounting to reduce operational and accounting complexity. Since the funds account for all of their underlying assets at fair value, the impact of applying the equity method to Citigroup's investment in these funds was equivalent to fair value accounting. Thus, this fair value election had no impact on opening Retained earnings. These investments are classified as Other assets on Citigroup's Consolidated Balance Sheet.

Changes in the fair values of these investments are classified in Other revenue in the Company's Consolidated Statement of Income.

Certain mortgage loans

Citigroup has elected the fair value option for certain purchased and originated prime fixed-rate and conforming adjustable-rate first mortgage loans held-for-sale. These loans are intended for sale or securitization and are hedged with derivative instruments. The Company has elected the fair value option to mitigate accounting mismatches in cases where hedge accounting is complex and to achieve operational simplifications. The fair value option was not elected for loans held-for-investment, as those loans are not hedged with derivative instruments.

The following table provides information about certain mortgage loans carried at fair value:

In millions of dollars	December 31, 2009	December 31, 2008
Carrying amount reported on the Consolidated Balance Sheet	$ 3,338	$ 4,273
Aggregate fair value in excess of unpaid principal balance	55	138
Balance of non-accrual loans or loans more than 90 days past due	4	9
Aggregate unpaid principal balance in excess of fair value for non-accrual loans or loans more than 90 days past due	3	2

The changes in fair values of these mortgage loans are reported in Other revenue in the Company's Consolidated Statement of Income. The changes in fair value during the years ended December 31, 2009 and 2008 due to instrument-specific credit risk resulted in a $10 million loss and $32 million loss, respectively. Related interest income continues to be measured based on the contractual interest rates and reported as such in the Consolidated Statement of Income.

Mortgage servicing rights

The Company accounts for mortgage servicing rights (MSRs) at fair value. Fair value for MSRs is determined using an option-adjusted spread valuation approach. This approach consists of projecting servicing cash flows under multiple interest-rate scenarios and discounting these cash flows using risk-adjusted rates. The model assumptions used in the valuation of MSRs include mortgage prepayment speeds and discount rates. The fair value of MSRs is primarily affected by changes in prepayments that result from shifts in mortgage interest rates. In managing this risk, the Company hedges a significant portion of the values of its MSRs through the use of interest-rate derivative contracts, forward-purchase commitments of mortgage-backed securities, and purchased securities classified as trading. See Note 23 to the Consolidated Financial Statements for further discussions regarding the accounting and reporting of MSRs.

These MSRs, which totaled $6.5 billion and $5.7 billion as of December 31, 2009 and 2008, respectively, are classified as Mortgage servicing rights on Citigroup's Consolidated Balance Sheet. Changes in fair value of MSRs are recorded inCommissions and fees in the Company's Consolidated Statement of Income.

Certain structured liabilities

The Company has elected the fair value option for certain structured liabilities whose performance is linked to structured interest rates, inflation or currency risks ("structured liabilities"). The Company elected the fair value option, because these exposures are considered to be trading-related positions and, therefore, are managed on a fair value basis. These positions will continue to be classified as debt, deposits or derivatives (Trading account liabilities) on the Company's Consolidated Balance Sheet according to their legal form.

For those structured liabilities classified as Long-term debt for which the fair value option has been elected, the aggregate unpaid principal balance exceeded the aggregate fair value by $125 million and $671 million as of December 31, 2009 and 2008, respectively.

The change in fair value for these structured liabilities is reported in Principal transactions in the Company's Consolidated Statement of Income.

Related interest expense is measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

Certain non-structured liabilities

The Company has elected the fair value option for certain non-structured liabilities with fixed and floating interest rates ("non-structured liabilities"). The Company has elected the fair value option where the interest-rate risk of such liabilities is economically hedged with derivative contracts or the proceeds are used to purchase financial assets that will also be accounted for at fair value through earnings. The election has been made to mitigate accounting mismatches and to achieve operational simplifications. These positions are reported in Short-term borrowings and Long-term debt on the Company's Consolidated Balance Sheet.

For those non-structured liabilities classified as Short-term borrowings for which the fair value option has been elected, the aggregate unpaid principal balance exceeded the aggregate fair value of such instruments by $220 million as of December 31, 2008.

For non-structured liabilities classified as Long-term debt for which the fair value option has been elected, the aggregate unpaid principal balance exceeded the aggregate fair value by $1,542 million and $856 million as of December 31, 2009 and 2008, respectively. The change in fair value for these non-structured liabilities is reported in Principal transactions in the Company's Consolidated Statement of Income.

Related interest expense continues to be measured based on the contractual interest rates and reported as such in the Consolidated Income Statement.

28. FAIR VALUE OF FINANCIAL INSTRUMENTS

Estimated Fair Value of Financial Instruments

The table below presents the carrying value and fair value of Citigroup's financial instruments. The disclosure excludes leases, affiliate investments, pension and benefit obligations and insurance policy claim reserves. In addition, contract-holder fund amounts exclude certain insurance contracts. Also as required, the disclosure excludes the effect of taxes, any premium or discount that could result from offering for sale at one time the entire holdings of a particular instrument, excess fair value associated with deposits with no fixed maturity and other expenses that would be incurred in a market transaction. In addition, the table excludes the values of non-financial assets and liabilities, as well as a wide range of franchise, relationship and intangible values (but includes mortgage servicing rights), which are integral to a full assessment of Citigroup's financial position and the value of its net assets.

The fair value represents management's best estimates based on a range of methodologies and assumptions. The carrying value of short-term financial instruments not accounted for at fair value, as well as receivables and payables arising in the ordinary course of business, approximates fair value because of the relatively short period of time between their origination and expected realization. Quoted market prices are used when available for investments and for both trading and end-user derivatives, as well as for liabilities, such as long-term debt, with quoted prices. For performing loans not accounted for at fair value, contractual cash flows are discounted at quoted secondary market rates or estimated market rates if available. Otherwise, sales of comparable loan portfolios or current market origination rates for loans with similar terms and risk characteristics are used. For loans with doubt as to collectability, expected cash flows are discounted using an appropriate rate considering the time of collection and the premium for the uncertainty of the cash flows. This method of estimating fair value does not incorporate the exit-price concept of fair value prescribed by ASC 820-10 (SFAS No. 157). The value of collateral is also considered. For liabilities such as long-term debt not accounted for at fair value and without quoted market prices, market borrowing rates of interest are used to discount contractual cash flows.

		2009		2008
In billions of dollars at year end	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Assets				
Investments	$306.1	$307.6	$256.0	$251.9
Federal funds sold and securities borrowed or purchased under agreements to resell	222.0	222.0	184.1	184.1
Trading account assets	342.8	342.8	377.6	377.6
Loans (1)	552.5	542.8	660.9	642.7
Other financial assets (2)	290.9	290.9	316.6	316.6

		2009		2008
In billions of dollars at year end	Carrying value	Estimated fair value	Carrying value	Estimated fair value
Liabilities				
Deposits	$835.9	$834.5	$774.2	$772.9
Federal funds purchased and securities loaned or sold under agreements to repurchase	154.3	154.3	205.3	205.3
Trading account liabilities	137.5	137.5	165.8	165.8
Long-term debt	364.0	354.8	359.6	317.1
Other financial liabilities (3)	175.8	175.8	255.6	255.6

(1) The carrying value of loans is net of the Allowance for loan losses of $36.0 billion for 2009 and $29.6 billion for 2008. In addition, the carrying values exclude $2.9 billion and $3.7 billion of lease finance receivables in 2009 and 2008, respectively.

(2) Includes cash and due from banks, deposits with banks, brokerage receivables, reinsurance recoverable, mortgage servicing rights, separate and variable accounts and other financial instruments included in Other assets on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

(3) Includes brokerage payables, separate and variable accounts, short-term borrowings and other financial instruments included in Other liabilities on the Consolidated Balance Sheet, for all of which the carrying value is a reasonable estimate of fair value.

Fair values vary from period to period based on changes in a wide range of factors, including interest rates, credit quality, and market perceptions of value and as existing assets and liabilities run off and new transactions are entered into.

The estimated fair values of loans reflect changes in credit status since the loans were made, changes in interest rates in the case of fixed-rate

loans, and premium values at origination of certain loans. The carrying values (reduced by the Allowance for loan losses) exceeded the estimated fair values of Citigroup's loans, in aggregate, by $9.7 billion and by $18.2 billion in 2009 and 2008, respectively. At December 31, 2009, the carrying values, net of allowances, exceeded the estimated values by $8.2 billion and $1.5 billion for consumer loans and corporate loans, respectively.

The estimated fair values of the Company's corporate unfunded lending commitments at December 31, 2009 and 2008 were liabilities of $3.3 billion and $7.1 billion, respectively. The Company does not estimate the fair values of consumer unfunded lending commitments, which are generally cancellable by providing notice to the borrower.

29. PLEDGED ASSETS, COLLATERAL, COMMITMENTS AND GUARANTEES

Pledged Assets

At December 31, 2009 and 2008, the approximate fair values of securities sold under agreements to repurchase and other assets pledged, excluding the impact of allowable netting, were as follows:

In millions of dollars	2009	2008
For securities sold under agreements to repurchase	$237,707	$237,055
As collateral for securities borrowed for approximately equivalent value	44,095	81,740
As collateral on bank loans	188,160	144,982
To clearing organizations or segregated under securities laws and regulations	21,385	41,312
For securities loaned	36,767	51,158
Other	30,000	52,576
Total	$558,114	$608,823

In addition, included in cash and due from banks at December 31, 2009 and 2008 are $11.2 billion and $11.7 billion, respectively, of cash segregated under federal and other brokerage regulations or deposited with clearing organizations.

At December 31, 2009 and 2008, the Company had $1.9 billion and $3.1 billion, respectively, of outstanding letters of credit from third-party banks to satisfy various collateral and margin requirements.

Collateral

At December 31, 2009 and 2008, the approximate market value of collateral received by the Company that may be sold or repledged by the Company, excluding amounts netted was $346.2 billion and $340.2 billion, respectively. This collateral was received in connection with resale agreements, securities borrowings and loans, derivative transactions and margined broker loans.

At December 31, 2009 and 2008, a substantial portion of the collateral received by the Company had been sold or repledged in connection with repurchase agreements, securities sold, not yet purchased, securities borrowings and loans, pledges to clearing organizations, segregation requirements under securities laws and regulations, derivative transactions and bank loans.

In addition, at December 31, 2009 and 2008, the Company had pledged $253 billion and $236 billion, respectively, of collateral that may not be sold or repledged by the secured parties.

Lease Commitments

Rental expense (principally for offices and computer equipment) was $2.0 billion, $2.7 billion and $2.3 billion for the years ended December 31, 2009, 2008 and 2007, respectively.

Future minimum annual rentals under noncancelable leases, net of sublease income, are as follows:

In millions of dollars	
2010	$1,247
2011	1,110
2012	1,007
2013	900
2014	851
Thereafter	2,770
Total	$7,885

Guarantees

The Company provides a variety of guarantees and indemnifications to Citigroup customers to enhance their credit standing and enable them to complete a wide variety of business transactions. For certain contracts meeting the definition of a guarantee, the guarantor must recognize, at inception, a liability for the fair value of the obligation undertaken in issuing the guarantee.

In addition, the guarantor must disclose the maximum potential amount of future payments the guarantor could be required to make under the guarantee, if there were a total default by the guaranteed parties. The determination of the maximum potential future payments is based on the notional amount of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. Such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

The following tables present information about the Company’s guarantees at December 31, 2009 and December 31, 2008:

In billions of dollars at December 31, except carrying value in millions	Maximum potential amount of future payments Expire within 1 year	Expire after 1 year	Total amount outstanding	Carrying value (in millions)
2009				
Financial standby letters of credit	$ 41.4	$48.0	$ 89.4	$ 438.8
Performance guarantees	9.4	4.5	13.9	32.4
Derivative instruments considered to be guarantees	4.1	3.6	7.7	569.2
Loans sold with recourse	—	0.3	0.3	76.6
Securities lending indemnifications (1)	64.5	—	64.5	—
Credit card merchant processing (1)	59.7	—	59.7	—
Custody indemnifications and other	—	33.5	33.5	121.4
Total	$ 179.1	$89.9	$ 269.0	$ 1,238.4

(1) The carrying values of guarantees of collections of contractual cash flows, securities lending indemnifications and credit card merchant processing are not material, as the Company has determined that the amount and probability of potential liabilities arising from these guarantees are not significant.

In billions of dollars at December 31, except carrying value in millions	Maximum potential amount of future payments Expire within 1 year	Expire after 1 year	Total amount outstanding	Carrying value (in millions)
2008				
Financial standby letters of credit	$ 31.6	$62.6	$ 94.2	$ 289.0
Performance guarantees	9.4	6.9	16.3	23.6
Derivative instruments considered to be guarantees (2)	7.6	7.2	14.8	1,308.4
Guarantees of collection of contractual cash flows (1)	—	0.3	0.3	—
Loans sold with recourse	—	0.3	0.3	56.4
Securities lending indemnifications (1)	47.6	—	47.6	—
Credit card merchant processing (1)	56.7	—	56.7	—
Custody indemnifications and other	—	21.6	21.6	149.2
Total	$ 152.9	$98.9	$ 251.8	$ 1,826.6

(1) The carrying values of guarantees of collections of contractual cash flows, securities lending indemnifications and credit card merchant processing are not material, as the Company has determined that the amount and probability of potential liabilities arising from these guarantees are not significant.

(2) Reclassified to conform to the current period's presentation.

Financial standby letters of credit

Citigroup issues standby letters of credit which substitute its own credit for that of the borrower. If a letter of credit is drawn down, the borrower is obligated to repay Citigroup. Standby letters of credit protect a third party from defaults on contractual obligations. Financial standby letters of credit include guarantees of payment of insurance premiums and reinsurance risks that support industrial revenue bond underwriting and settlement of payment obligations to clearing houses, and also support options and purchases of securities or are in lieu of escrow deposit accounts. Financial standbys also backstop loans, credit facilities, promissory notes and trade acceptances.

Performance guarantees

Performance guarantees and letters of credit are issued to guarantee a customer's tender bid on a construction or systems-installation project or to guarantee completion of such projects in accordance with contract terms. They are also issued to support a customer's obligation to supply specified products, commodities, or maintenance or warranty services to a third party.

Derivative instruments considered to be guarantees

Derivatives are financial instruments whose cash flows are based on a notional amount or an underlying instrument, where there is little or no initial investment, and whose terms require or permit net settlement. Derivatives may be used for a variety of reasons, including risk management, or to enhance returns. Financial institutions often act as intermediaries for their clients, helping clients reduce their risks. However, derivatives may also be used to take a risk position.

The derivative instruments considered to be guarantees, which are presented in the tables above, include only those instruments that require Citi to make payments to the counterparty based on changes in an underlying that is related to an asset, a liability, or an equity security held by the guaranteed party. More specifically, derivative instruments considered to be guarantees include certain over-the-counter written put options where the counterparty is not a bank, hedge fund or broker-dealer (such counterparties are considered to be dealers in these markets, and may therefore not hold the
underlying instruments). However, credit derivatives sold by the Company are excluded from this presentation, as they are disclosed separately within this note below. In addition, non-credit derivative contracts that are cash settled and for which the Company is unable to assert that it is probable the counterparty held the underlying instrument at the inception of the contract also are excluded from the disclosure above.

In instances where the Company's maximum potential future payment is unlimited, the notional amount of the contract is disclosed.

Guarantees of collection of contractual cash flows

Guarantees of collection of contractual cash flows protect investors in credit card receivables securitization trusts from loss of interest relating to insufficient collections on the underlying receivables in the trusts. The notional amount of these guarantees as of December 31, 2008 was $300 million. No such guarantees were outstanding as of December 31, 2009.

Loans sold with recourse

Loans sold with recourse represent the Company's obligations to reimburse the buyers for loan losses under certain circumstances. Recourse refers to the clause in a sales agreement under which a lender will fully reimburse the buyer/investor for any losses resulting from the purchased loans. This may be accomplished by the seller's taking back any loans that become delinquent.

Securities lending indemnifications

Owners of securities frequently lend those securities for a fee to other parties who may sell them short or deliver them to another party to satisfy some other obligation. Banks may administer such securities lending programs for their clients. Securities lending indemnifications are issued by the bank to guarantee that a securities lending customer will be made whole in the event that the security borrower does not return the security subject to the lending agreement and collateral held is insufficient to cover the market value of the security.

Credit card merchant processing

Credit card merchant processing guarantees represent the Company's indirect obligations in connection with the processing of private label and bankcard transactions on behalf of merchants.

Citigroup's primary credit card business is the issuance of credit cards to individuals. In addition, the Company provides transaction processing services to various merchants with respect to bankcard and private-label cards. In the event of a billing dispute with respect to a bankcard transaction between a merchant and a cardholder that is ultimately resolved in the cardholder's favor, the third party holds the primary contingent liability to credit or refund the amount to the cardholder and charge back the transaction to the merchant. If the third party is unable to collect this amount from the merchant, it bears the loss for the amount of the credit or refund paid to the cardholder.

The Company continues to have the primary contingent liability with respect to its portfolio of private-label merchants. The risk of loss is mitigated as the cash flows between the third party or the Company and the merchant are settled on a net basis and the third party or the Company has the right to offset any payments with cash flows otherwise due to the merchant. To further mitigate this risk, the third party or the Company may require a merchant to make an escrow deposit, delay settlement, or include event triggers to provide the third party or the Company with more financial and operational control in the event of the financial deterioration of the merchant, or require various credit enhancements (including letters of credit and bank guarantees). In the unlikely event that a private-label merchant is unable to deliver products, services or a refund to its private-label cardholders, Citigroup is contingently liable to credit or refund cardholders. In addition, although a third party holds the primary contingent liability with respect to the processing of bankcard transactions, in the event that the third party does not have sufficient collateral from the merchant or sufficient financial resources of its own to provide the credit or refunds to the cardholders, Citigroup would be liable to credit or refund the cardholders.

The Company's maximum potential contingent liability related to both bankcard and private-label merchant processing services is estimated to be the total volume of credit card transactions that meet the requirements to be valid chargeback transactions at any given time. At December 31, 2009 and December 31, 2008, this maximum potential exposure was estimated to be $60 billion and $57 billion, respectively.

However, the Company believes that the maximum exposure is not representative of the actual potential loss exposure based on the Company's historical experience and its position as a secondary guarantor (in the case of bankcards). In most cases, this contingent liability is unlikely to arise,
as most products and services are delivered when purchased, and amounts are refunded when items are returned to merchants. The Company assesses the probability and amount of its contingent liability related to merchant processing based on the financial strength of the primary guarantor (in the case of bankcards) and the extent and nature of unresolved chargebacks and its historical loss experience. At December 31, 2009 and December 31, 2008, the estimated losses incurred and the carrying amounts of the Company's contingent obligations related to merchant processing activities were immaterial.

Custody indemnifications

Custody indemnifications are issued to guarantee that custody clients will be made whole in the event that a third-party subcustodian or depository institution fails to safeguard clients' assets.

Other

As of December 31, 2008, Citigroup carried a reserve of $149 million related to certain of Visa USA's litigation matters. As of December 31, 2009, the carrying value of the reserve was $121 million and was included in Other liabilities on the Consolidated Balance Sheet.

Other guarantees and indemnifications

The Company, through its credit card business, provides various cardholder protection programs on several of its card products, including programs that provide insurance coverage for rental cars, coverage for certain losses associated with purchased products, price protection for certain purchases and protection for lost luggage. These guarantees are not included in the table, since the total outstanding amount of the guarantees and the Company's maximum exposure to loss cannot be quantified. The protection is limited to certain types of purchases and certain types of losses and it is not possible to quantify the purchases that would qualify for these benefits at any given time. The Company assesses the probability and amount of its potential liability related to these programs based on the extent and nature of its historical loss experience. At December 31, 2009 and 2008, the actual and estimated losses incurred and the carrying value of the Company's obligations related to these programs were immaterial.

In the normal course of business, the Company provides standard representations and warranties to counterparties in contracts in connection with numerous transactions and also provides indemnifications that protect the counterparties to the contracts in the event that additional taxes are owed due either to a change in the tax law or an adverse interpretation of the tax law. Counterparties to these transactions provide the Company with comparable indemnifications. While such representations, warranties

and tax indemnifications are essential components of many contractual relationships, they do not represent the underlying business purpose for the transactions. The indemnification clauses are often standard contractual terms related to the Company's own performance under the terms of a contract and are entered into in the normal course of business based on an assessment that the risk of loss is remote. Often these clauses are intended to ensure that terms of a contract are met at inception (for example, that loans transferred to a counterparty in a sales transaction did in fact meet the conditions specified in the contract at the transfer date). No compensation is received for these standard representations and warranties, and it is not possible to determine their fair value because they rarely, if ever, result in a payment. In many cases, there are no stated or notional amounts included in the indemnification clauses and the contingencies potentially triggering the obligation to indemnify have not occurred and are not expected to occur. These indemnifications are not included in the table above.

In addition, the Company is a member of or shareholder in hundreds of value-transfer networks (VTNs) (payment clearing and settlement systems as well as securities exchanges) around the world. As a condition of membership, many of these VTNs require that members stand ready to backstop the net effect on the VTNs of a member's default on its obligations. The Company's potential obligations as a shareholder or member of VTN associations are excluded from the scope of FIN 45, since the shareholders and members represent subordinated classes of investors in the VTNs. Accordingly, the Company's participation in VTNs is not reported in the table and there are no amounts reflected on the Consolidated Balance Sheet as of December 31, 2009 or December 31, 2008 for potential obligations that could arise from the Company's involvement with VTN associations.

In the sale of an insurance subsidiary, the Company provided an indemnification to an insurance company for policyholder claims and other liabilities relating to a book of long-term care (LTC) business (for the entire term of the LTC policies) that is fully reinsured by another insurance company. The reinsurer has funded two trusts with securities whose fair value (approximately $3.3 billion at December 31, 2009) is designed to cover the insurance company's statutory liabilities for the LTC policies. The assets in these trusts are evaluated and adjusted periodically to ensure that the fair value of the assets continues to cover the estimated statutory liabilities related to the LTC policies, as those statutory liabilities change over time. If the reinsurer fails to perform under the reinsurance agreement for any reason, including insolvency, and the assets in the two trusts are insufficient or unavailable to the ceding insurance company, then Citigroup must indemnify the ceding insurance company for any losses actually incurred in connection with the LTC policies. Since both events would have to occur before Citi would become responsible for any payment to the ceding insurance company pursuant to its indemnification obligation and the likelihood of such events occurring is currently not probable, there is no liability reflected in the Consolidated Balance Sheet as of December 31, 2009 related to this indemnification.

At December 31, 2009 and December 31, 2008, the total carrying amounts of the liabilities related to the guarantees and indemnifications included in the table amounted to approximately $1.2 billion and $1.8 billion, respectively. The carrying value of derivative instruments is included in either Trading liabilities or Other liabilities, depending upon whether the derivative was entered into for trading or non-trading purposes. The carrying value of financial and performance guarantees is included in Other liabilities. For loans sold with recourse, the carrying value of the liability is included in Other liabilities. In addition, at December 31, 2009 and December 31, 2008, Other liabilities on the Consolidated Balance Sheet include an allowance for credit losses of $1,157 million and $887 million relating to letters of credit and unfunded lending commitments, respectively.

Collateral

Cash collateral available to the Company to reimburse losses realized under these guarantees and indemnifications amounted to $31 billion and $33 billion at December 31, 2009 and December 31, 2008, respectively. Securities and other marketable assets held as collateral amounted to $43 billion and $27 billion, respectively, the majority of which collateral is held to reimburse losses realized under securities lending indemnifications. Additionally, letters of credit in favor of the Company held as collateral amounted to $1.4 billion and $0.5 billion at December 31, 2009 and December 31, 2008, respectively. Other property may also be available to the Company to cover losses under certain guarantees and indemnifications; however, the value of such property has not been determined.

Performance risk

Citigroup evaluates the performance risk of its guarantees based on the assigned referenced counterparty internal or external ratings. Where external ratings are used, investment-grade ratings are considered to be Baa/BBB and above, while anything below is considered non-investment grade. The Citigroup internal ratings are in line with the related external rating system. On certain underlying referenced credits or entities, ratings are not available. Such referenced credits are included in the not rated category. The maximum potential amount of the future payments related to guarantees and credit derivatives sold is determined to be the notional amount of these contracts, which is the par amount of the assets guaranteed.

Presented in the tables below are the maximum potential amounts of future payments classified based upon internal and external credit ratings as of December 31, 2009 and 2008. As previously mentioned, the determination of the maximum potential future payments is based on the notional amount
of the guarantees without consideration of possible recoveries under recourse provisions or from collateral held or pledged. Such amounts bear no relationship to the anticipated losses, if any, on these guarantees.

	Maximum potential amount of future payments			
In billions of dollars as of December 31, 2009	Investment grade	Non-investment grade	Not rated	Total
Financial standby letters of credit	$49.2	$13.5	$ 26.7	$ 89.4
Performance guarantees	6.5	3.7	3.7	13.9
Derivative instruments deemed to be guarantees	—	—	7.7	7.7
Loans sold with recourse	—	—	0.3	0.3
Securities lending indemnifications	—	—	64.5	64.5
Credit card merchant processing	—	—	59.7	59.7
Custody indemnifications and other	27.7	5.8	—	33.5
Total	$83.4	$23.0	$162.6	$269.0

	Maximum potential amount of future payments			
In billions of dollars as of December 31, 2008	Investment grade	Non-investment grade	Not rated	Total
Financial standby letters of credit	$49.2	$28.6	$ 16.4	$ 94.2
Performance guarantees	5.7	5.0	5.6	16.3
Derivative instruments deemed to be guarantees	—	—	14.8	14.8
Guarantees of collection of contractual cash flows	—	—	0.3	0.3
Loans sold with recourse	—	—	0.3	0.3
Securities lending indemnifications	—	—	47.6	47.6
Credit card merchant processing	—	—	56.7	56.7
Custody indemnifications and other	18.5	3.1	—	21.6
Total	$73.4	$36.7	$141.7	$251.8

Credit Commitments and Lines of Credit

The table below summarizes Citigroup's credit commitments as of December 31, 2009 and December 31, 2008:

In millions of dollars	U.S.	Outside of U.S.	December 31, 2009	December 31, 2008
Commercial and similar letters of credit	$ 1,321	$ 5,890	$ 7,211	$ 8,215
One- to four-family residential mortgages	788	282	1,070	937
Revolving open-end loans secured by one- to four-family residential properties	20,914	3,002	23,916	25,212
Commercial real estate, construction and land development	1,185	519	1,704	2,702
Credit card lines	649,625	135,870	785,495	1,002,437
Commercial and other consumer loan commitments	167,510	89,832	257,342	309,997
Total	$ 841,343	$ 235,395	$ 1,076,738	$ 1,349,500

The majority of unused commitments are contingent upon customers' maintaining specific credit standards. Commercial commitments generally have floating interest rates and fixed expiration dates and may require payment of fees. Such fees (net of certain direct costs) are deferred and, upon exercise of the commitment, amortized over the life of the loan or, if exercise is deemed remote, amortized over the commitment period.

Commercial and similar letters of credit

A commercial letter of credit is an instrument by which Citigroup substitutes its credit for that of a customer to enable the customer to finance the purchase of goods or to incur other commitments. Citigroup issues a letter on behalf of its client to a supplier and agrees to pay the supplier upon presentation of documentary evidence that the supplier has performed in accordance with the terms of the letter of credit. When a letter of credit is drawn, the customer is then required to reimburse Citigroup.

One- to four-family residential mortgages

A one- to four-family residential mortgage commitment is a written confirmation from Citigroup to a seller of a property that the bank will advance the specified sums enabling the buyer to complete the purchase.

Revolving open-end loans secured by one- to four-family residential properties

Revolving open-end loans secured by one- to four-family residential properties are essentially home equity lines of credit. A home equity line of credit is a loan secured by a primary residence or second home to the extent of the excess of fair market value over the debt outstanding for the first mortgage.

Commercial real estate, construction and land development

Commercial real estate, construction and land development include unused portions of commitments to extend credit for the purpose of financing commercial and multifamily residential properties as well as land development projects. Both secured-by-real-estate and unsecured commitments are included in this line, as well as undistributed loan proceeds, where there is an obligation to advance for construction progress payments. However, this line only includes those extensions of credit that, once funded, will be classified as Total loans, net on the Consolidated Balance Sheet.

Credit card lines

Citigroup provides credit to customers by issuing credit cards. The credit card lines are unconditionally cancellable by the issuer.

Commercial and other consumer loan commitments

Commercial and other consumer loan commitments include overdraft and liquidity facilities, as well as commercial commitments to make or purchase loans, to purchase third-party receivables, to provide note issuance or revolving underwriting facilities and to invest in the form of equity. Amounts include $126 billion and $170 billion with an original maturity of less than one year at December 31, 2009 and December 31, 2008, respectively. In addition, included in this line item are highly leveraged financing commitments, which are agreements that provide funding to a borrower with higher levels of debt (measured by the ratio of debt capital to equity capital of the borrower) than is generally considered normal for other companies. This type of financing is commonly employed in corporate acquisitions, management buy-outs and similar transactions.

30. CONTINGENCIES

As described in “Legal Proceedings,” Citigroup and its affiliates and subsidiaries and current and former officers, directors and employees have been named, and routinely are named in the ordinary course of business, as defendants in, or as parties to, various legal actions and proceedings. In accordance with ASC 450 (formerly SFAS 5), Citigroup establishes reserves for litigation and regulatory matters when those matters present loss contingencies that both are probable and can be reasonably estimated. In view of the inherent unpredictability of litigation and regulatory matters, particularly where the damages sought are substantial or indeterminate, the investigations or proceedings are in the early stages, or the matters involve novel legal theories or a large number of parties, Citigroup cannot state with certainty the timing or ultimate resolution of litigations and regulatory matters, and the actual costs of resolving litigations and regulatory matters may be substantially higher or lower than the amounts reserved for those matters.

Subject to the foregoing, it is the opinion of Citigroup’s management, based on current knowledge and after taking into account available insurance coverage and its current legal reserves, that the eventual outcome of such matters, including the matters described in “Legal Proceedings,” would not be likely to have a material adverse effect on the consolidated financial condition of Citi. Nonetheless, given the substantial or indeterminate amounts sought in certain of these matters, and the inherent unpredictability of such matters, an adverse outcome in certain of these matters could, from time to time, have a material adverse effect on Citi’s consolidated results of operations or cash flows in particular quarterly or annual periods.

31. CITIBANK, N.A. STOCKHOLDER'S EQUITY

Comprehensive income attributable to Citibank	$ 1,971	$(19,615)	$ 1,519

(1) Represents the accounting for the transfers of assets and liabilities between Citibank, N.A. and other affiliates under the common control of Citigroup.

(2) The adjustment to the opening balances for Retained earnings and Accumulated other comprehensive income (loss) in 2009 represents the cumulative effect of initially adopting ASC 320-10-35-34 (FSP FAS 115-2 and FAS 124-2). See Note 1 to the Consolidated Financial Statements.

(3) The adjustment to opening balance for Retained earnings in 2007 represents the total of the after-tax gain (loss) amounts for the adoption of the following accounting pronouncements:

• ASC 820 (SFAS 157) for $9 million, • ASC 825 (SFAS 159) for $15 million, • ASC 840 (FSP 13-2) for $(142) million, and • ASC 740 (FIN 48) for $22 million.

See Notes 1, 26 and 27 to the Consolidated Financial Statements.

(4) The after-tax adjustment to the opening balance of Accumulated other comprehensive income (loss) in 2007 represents the reclassification of the unrealized gains (losses) related to several miscellaneous items previously reported. The related unrealized gains and losses were reclassified to Retained earnings upon the adoption of the fair-value option. See Notes 1 and 27 to the Consolidated Financial Statements for further discussions.

32. SUBSEQUENT EVENTS

LQIF Acquisition

On January 31, 2010 Citigroup elected to exercise its option to acquire approximately 8.5% of LQIF for approximately $500 million. The acquisition of the additional shares is expected to close on April 30, 2010 and will increase Citigroup's ownership in LQIF to approximately 41.5%. Citigroup retains an option to increase its ownership an additional 8.5% of LQIF in 2010 for an additional $500 million.

Venezuelan Bolivar Devaluation

The Venezuelan government enacted currency restrictions in 2003 that have restricted Citigroup's ability to obtain foreign currency in Venezuela at the official foreign currency rate. Citigroup uses the official rate to remeasure the foreign currency transactions in the financial statements of our Venezuelan subsidiaries, which have U.S. dollar functional currencies, into U.S. dollars. At December 31, 2009, Citigroup had net monetary assets denominated in bolivars and subject to the official rate of approximately $290 million.

On January 8, 2010, the Venezuelan government announced the devaluation of the official foreign currency exchange rate from 2.15 bolivars per dollar to 4.3 bolivars per dollar and the creation of a dual, subsidized exchange rate of 2.6 bolivars per dollar for the importation of certain essential goods. The devaluation in the rate is expected to result in a pretax loss to the Company of approximately $170 million in the first quarter of 2010. Additionally, revenue and net operating profit in U.S. dollar terms will be reduced on an ongoing basis.

The Company has evaluated subsequent events through February 26, 2010, which is the date its Consolidated Financial Statements were issued.

33. CONDENSED CONSOLIDATING FINANCIAL STATEMENTS SCHEDULES

These condensed Consolidating Financial Statements schedules are presented for purposes of additional analysis but should be considered in relation to the Consolidated Financial Statements of Citigroup taken as a whole.

Citigroup Parent Company

The holding company, Citigroup Inc.

Citigroup Global Markets Holdings Inc. (CGMHI)

Citigroup guarantees various debt obligations of CGMHI as well as all of the outstanding debt obligations under CGMHI's publicly issued debt.

Citigroup Funding Inc. (CFI)

CFI is a first-tier subsidiary of Citigroup, which issues commercial paper, medium-term notes and structured equity-linked and credit-linked notes, all of which are guaranteed by Citigroup.

CitiFinancial Credit Company (CCC)

An indirect wholly owned subsidiary of Citigroup. CCC is a wholly owned subsidiary of Associates. Citigroup has issued a full and unconditional guarantee of the outstanding indebtedness of CCC.

Associates First Capital Corporation (Associates)

A wholly owned subsidiary of Citigroup. Citigroup has issued a full and unconditional guarantee of the outstanding long-term debt securities and commercial paper of Associates. In addition, Citigroup guaranteed various debt obligations of Citigroup Finance Canada Inc. (CFCI), a wholly owned subsidiary of Associates. CFCI continues to issue debt in the Canadian market supported by a Citigroup guarantee. Associates is the immediate parent company of CCC.

Other Citigroup Subsidiaries

Includes all other subsidiaries of Citigroup, intercompany eliminations, and income/loss from discontinued operations.

Consolidating Adjustments

Includes Citigroup parent company elimination of distributed and undistributed income of subsidiaries, investment in subsidiaries and the elimination of CCC, which is included in the Associates column.

Condensed Consolidating Statements of Income
