 - Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

Edgar Filing: RESEARCH FRONTIERS INC - Form 8-K

Item 7.01 Regulation FD Disclosure

Berlin, Germany, September 24, 2014 Imagine pushing a button, tapping on your tablet or smart phone, or touching a window and having the window instantly adjust to whatever tint you wanted. All of this is now possible in windows, skylights, sunroofs, partitions and other glass or plastic products using SPD-Smart light control film technology developed by Research Frontiers (Nasdaq: REFR) the same technology currently used in homes, offices, museums, yachts and in thousands of Mercedes-Benz cars worldwide.

Research Frontiers licensee, AGC, one of the largest producers of flat glass in the world, is featuring its WONDERLITE SPD-SmartGlass train window at Innotrans 2014. Innotrans is held from September 23rd to 26th in Berlin, Germany. It is the largest international trade fair for rail transport technology with over 160,000 visitors and is held every two years in Berlin.

In addition to controlling the level of light and glare coming into a train, SPD-SmartGlass offers many other advantages. This electronically dimmable window technology provides unsurpassed thermal insulation: SPD-SmartGlass substantially rejects solar heat from entering through windows. When compared to conventional automotive glass, Mercedes-Benz reported that the use of SPD-SmartGlass significantly reduced the temperature inside the vehicle by up to 18°F/10°C. This increases passenger comfort and reduces air conditioning loads, thereby saving fuel and reducing CO2 emissions.

SPD-SmartGlass delivers other benefits to the passenger and engineer environments in a train, including excellent acoustic insulation, elimination of blinds or shades (reduced cleaning, rattling of shades and a general reduction in interior noise), and keeping an occupied or unoccupied train car cooler without using any power. It does this while providing maximum transparency and viewing opportunities when a small amount of power is applied to align nanoparticles inside a special film inside the glass. The SPD-SmartGlass solution can also be used as a partition between cars or between the engineer and passenger.

Joseph M. Harary, President and CEO of Research Frontiers noted: "We are pleased to see the product offering and user benefits for AGC's WONDERLITE brand of SPD-SmartGlass expand from automobiles to trains. SPD-SmartGlass technology is the highest performing smart window in the world. It offers very quick switching speed, wide ranges of fully variable light transmission, high levels of heat control, as well as acoustic and other energy-efficient benefits. With the large amount of glass used in a train, and the need for passengers to be connected to their outside environment while traveling, SPD-SmartGlass technology offers the ideal solution for the mass transit market."

Details are noted in the press release attached as Exhibit 99.1 to this Current Report on Form 8-K and incorporated herein by reference. This press release is also available on the Company's website at www.SmartGlass.com and at various other places on the internet.

This report and the press releases referred to herein may include statements that may constitute "forward-looking" statements as referenced in the Private Securities Litigation Reform Act of 1995. Those statements usually contain words such as "believe", "estimate", "project", "intend", "expect", or similar expressions. Any forward-looking statements are made by the Company in good faith, pursuant to the safe-harbor provisions of the Act. These forward-looking statements reflect management's current views and projections regarding economic conditions, industry environments and Company performance. Factors, which could significantly change results, include but are not limited to: sales performance, expense levels, competitive activity, interest rates, changes in the Company's financial condition and several business factors. Additional information regarding these and other factors may be included in the Company's quarterly 10-Q and 10K filings and other public documents, copies of which are available from the Company on request. By making these forward-looking statements, the Company undertakes no obligation to update these statements for revisions or changes after the date of this report.

The information in this Form 8-K or the press release reproduced herein shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, nor shall they be deemed incorporated by reference in any filing under the Securities Act of 1933, except as shall be expressly set forth by specific reference in such filing.

Item 9.01. Financial Statements and Exhibits.

(c) Exhibits.

99.1 Research Frontiers Press Release dated September 24, 2014.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
