(Zip Code)

Registrant's telephone number, including area
code:

(307) 856-9271

Not Applicable

(Former name, address and fiscal year, if changed since last
report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Company was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to rule 405 of Regulations S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

YES

NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

YES NO

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

At May 7, 2010, there were issued and outstanding 26,737,320 shares of the Company's common stock, \$.01 par value.

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)

1) Basis of Presentation

The accompanying unaudited condensed financial statements for the periods ended March 31, 2010 and March 31, 2009 have been prepared by U.S. Energy Corp. (“USE” or the “Company”) in accordance with generally accepted accounting principles (“GAAP”) in the United States of America. The Condensed Balance Sheet at December 31, 2009 was derived from audited financial statements. In the opinion of the Company, the accompanying condensed financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position of the Company for the reported periods. Entities in which the Company holds at least 20% ownership or in which there are other indicators of significant influence are generally accounted for by the equity method, whereby the Company records its proportionate share of the entities’ results of operations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted. The unaudited condensed financial statements should be read in conjunction with the Company’s December 31, 2009 Annual Report on Form 10-K. Subsequent events have been evaluated for financial reporting purposes through the date of the filing of this Form 10-Q. See Note 10.

2) Summary of Significant Accounting Policies

For detailed descriptions of the Company’s significant accounting policies, please see Form 10-K for the year ended December 31, 2009 (Note B pages 84 to 92).

We follow accounting standards set by the Financial Accounting Standards Board, commonly referred to as the “FASB.” The FASB sets generally accepted accounting principles (GAAP) that we follow to ensure we consistently report our financial condition, results of operations, and cash flows.

The FASB recognized the complexity of its standard-setting process and embarked on a revised process in 2004 that culminated in the release on July 1, 2009, of the FASB Accounting Standards Codification,TM sometimes referred to as the Codification or ASC. The Codification does not change how the Company accounts for its transactions or the nature of related disclosures made. However, when referring to guidance issued by the FASB, the Company refers to topics in the ASC. The above change was made effective by the FASB for periods ending on or after September 15, 2009.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include oil and gas reserves used for depletion and impairment considerations and the cost of future asset retirement obligations. Due to inherent uncertainties, including the future prices of oil and gas, these estimates could change in the near term and such changes could be material.

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

Oil and Gas Properties

The Company follows the full cost method in accounting for its oil and gas properties. Under the full cost method, all costs associated with the acquisition, exploration and development of oil and gas properties are capitalized and accumulated in a country-wide cost center. This includes any internal costs that are directly related to development and exploration activities, but does not include any costs related to production, general corporate overhead or similar activities. Proceeds received from disposals are credited against accumulated cost except when the sale represents a significant disposal of reserves, in which case a gain or loss is recognized. The sum of net capitalized costs and estimated future development and dismantlement costs for each cost center is depleted on the equivalent unit-of-production method, based on proved oil and gas reserves. Excluded from amounts subject to depletion are costs associated with unevaluated properties.

Under the full cost method, net capitalized costs are limited to the lower of unamortized cost reduced by the related net deferred tax liability and asset retirement obligations or the cost center ceiling. The cost center ceiling is defined as the sum of (i) estimated future net revenue, discounted at 10% per annum, from proved reserves, based on unescalated average prices per barrel of oil and per MMBtu of natural gas at the first day of each month in the 12-month period prior to the end of the reporting period and costs, adjusted for contract provisions, financial derivatives that hedge the Company's oil and gas revenue and asset retirement obligations, (ii) the cost of properties not being amortized, and (iii) the lower of cost or market value of unproved properties included in the cost being amortized, less (iv) income tax effects related to differences between the book and tax basis of the natural gas and crude oil properties. If the net book value reduced by the related net deferred income tax liability and asset retirement obligations exceeds the cost center ceiling limitation, a non-cash impairment charge is required in the period in which the impairment occurs. At March 31, 2010, the book value of the Company's oil and gas properties did not exceed the cost center ceiling.

Revenue Recognition

The Company records natural gas and oil revenue under the sales method of accounting. Under the sales method, the Company recognizes revenues based on the amount of natural gas or oil sold to purchasers, which may differ from the amounts to which the Company is entitled based on its interest in the properties. Natural gas balancing obligations as of March 31, 2010 were not significant.

Revenues from real estate operations are reported on a gross revenue basis and are recorded at the time the service is provided.

Recent Accounting Pronouncements

As of March 31, 2010, there have been no recent accounting pronouncements currently relevant to the Company in addition to those discussed on pages 90 to 92 of our Annual Report on Form 10-K for the year ended December 31, 2009. The Company continues to review current outstanding statements from the Financial Accounting Standards Board ("FASB") and does not believe that any of those statements will have a material effect on the financial statements of the Company when adopted.

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

3) Properties and Equipment

Land, buildings, improvements, machinery and equipment are carried at cost. Depreciation of buildings, improvements, machinery and equipment is provided principally by the straight-line method over estimated useful lives ranging from 3 to 45 years.

Components of Property and Equipment as of March 31, 2010 and December 31, 2009 are as follows:

	(In thousands)	
	March 31, 2010	December 31, 2009
Oil and Gas properties		
Unevaluated	\$ 4,273	\$ 3,993
Well in progress	4,449	1,367
Evaluated	30,797	24,595
	39,519	29,955
Less accumulated depreciation		
depletion and amortization	(6,208)	(3,953)
Net book value	33,311	26,002
Mining properties	21,969	21,969
Commercial real estate	24,622	24,600
Less Accumulated depreciation		
depletion and mortization	(1,637)	(1,400)
Net book value	22,985	23,200
Building, land and equipment	14,112	14,196
Less accumulated depreciation		
depletion and amortization	(4,803)	(4,895)
Net book value	9,309	9,301
Totals	\$ 87,574	\$ 80,472

Oil and Gas Exploration Activities

The Company participates in oil and gas projects as a non-operating working interest owner and has active agreements with several oil and gas exploration and production companies. Our working interest varies by project, but typically ranges from approximately 5% to 65%. These projects may result in numerous wells being drilled over the next three to five years.

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

Williston Basin, North Dakota

During the first quarter of 2010, the Company completed 3 gross wells (1.02 net) with net costs to the Company of \$4.6 million. One additional gross well (0.44 net) was being drilled at March 31, 2010 with net costs to the Company of \$1.1 million. This brings the total wells drilled through March 31, 2010 under the Drilling Participation Agreement with Brigham Oil & Gas, L.P. ("Brigham") a Delaware limited partnership wholly-owned by Brigham Exploration Company (a Delaware corporation), to 9 gross completed and producing wells (3.99 net) and one gross well (0.44 net) in progress. The remaining 5 gross initial wells under the Drilling Participation Agreement will be drilled during the balance of 2010.

As a result of participating in all 15 wells, the Company will earn the rights to drill an additional 15 wells in the Bakken formation and potentially an additional 30 wells in the Three Forks formation for a total of 60 wells if the state of North Dakota allows two wells per formation in each spacing unit. Brigham operates all of the wells. If the spacing is ultimately increased to three wells per 1,280 acre spacing unit, the potential number of drilling locations could increase to 90. The drilling of each well typically takes 30 days while the completion typically takes 21-28 days.

U.S. Gulf Coast

In February 2010, the Company spud a well (0.042 net), the ALMI #1, targeting a gas prospect located in south central Louisiana. Drilling was in progress at March 31, 2010, with net costs to the Company of \$303,000. See Note 10, Subsequent Events.

In February 2010, the Company spud a well (0.10 net), the Main Pass 74 #A-19, targeting an oil and gas prospect located 15 miles offshore of south east Louisiana. The operator experienced down hole difficulties during the drilling of this well and the Company recorded additional costs of \$967,000 in excess of the original drilling budget during the first quarter of 2010. Drilling was in progress at March 31, 2010, with net costs to the Company of \$3.1 million. See Note 10, Subsequent Events.

In March 2010, the Company drilled a productive well (0.048 net), the Weyerhaeuser 18 #1, targeting a gas prospect in Louisiana. The net capitalized cost to the Company through March 31, 2010 is \$85,000.

The Company is also actively pursuing the potential of acquiring additional exploration, development or production stage oil and gas properties or companies. To further this effort, the Company has engaged an investment banker to assist in finding, evaluating and if necessary, financing the potential acquisition of such assets.

Full cost pool capitalized costs are amortized over the life of production of proven properties. Capitalized costs at March 31, 2010 and December 31, 2009 which were not included in the amortized cost pool were \$8.7 and \$5.4 million, respectively. These costs consist of wells in progress, seismic costs that are being analyzed for potential drilling locations and land costs all related to unproved properties. No capitalized costs related to unproved properties are included in the amortization base at March 31, 2010 and December 31, 2009. It is anticipated that these costs will

be added to the full cost amortization pool in the next two years as properties are evaluated, drilled or abandoned.

-12-

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

Ceiling Test Analysis – The Company performs a quarterly ceiling test for each of its oil and gas cost centers, which in 2010, there was only one. The ceiling test incorporates assumptions regarding pricing and discount rates over which management has no influence in the determination of present value. In arriving at the ceiling test for the quarter ended March 31, 2010, the Company used \$69.64 per barrel for oil and \$3.983 per MMBtu for natural gas (and adjusted for property specific gravity, quality, local markets and distance from markets) to compute the future cash flows of the Company’s producing property. The discount factor used was 10%.

At March 31, 2010, the ceiling was in excess of the net capitalized costs as adjusted for related deferred income taxes and no impairment was required. Furthermore, as of March 31, 2010, there were no unproved properties that were considered to be impaired and reclassified to properties being amortized. Management will continue to review its unproved properties based on market conditions and other changes and if appropriate, unproved property amounts may be reclassified to the amortized base of properties within the full cost pool. During the quarter ended March 31, 2009, the Company recorded a \$1.1 million impairment.

Wells in Progress - Wells in progress represent the costs associated with wells that have not reached total depth or been completed as of period end. They are classified as wells in progress and withheld from the depletion calculation and the ceiling test. The costs for these wells are then transferred to evaluated property when the wells reach total depth and are cased and the costs become subject to depletion and the ceiling test calculation in future periods.

Mineral Properties

The Company capitalizes all costs incidental to the acquisition of mineral properties. Mineral exploration costs are expensed as incurred. When exploration work indicates that a mineral property can be economically developed as a result of establishing proved and probable reserves, costs for the development of the mineral property as well as capital purchases and capital construction are capitalized and amortized using units of production over the estimated recoverable proved and probable reserves. Costs and expenses related to general corporate overhead are expensed as incurred. All capitalized costs are charged to operations if the Company subsequently determines that the property is not economical due to permanent decreases in market prices of commodities, excessive production costs or depletion of the mineral resource.

Mineral properties at March 31, 2010 and December 31, 2009 reflect capitalized costs associated with the Company’s Mount Emmons molybdenum property near Crested Butte, Colorado. The Company has entered into an agreement with Thompson Creek Metals Company USA (“TCM”) to develop this property. TCM may earn up to a 75% interest in the project for the investment of \$400 million. The Company’s carrying balance in the Mount Emmons property at March 31, 2010 and December 31, 2009 is as follows:

	(In thousands)
Costs associated with Mount Emmons	
at December 31, 2009	\$ 21,969

Development costs during the
quarter

ended March 31, 2010	--
Costs at March 31, 2010	\$ 21,969

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

Real Estate

The Company evaluates its long-lived assets, which consist of commercial real estate, for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable. Impairment calculations are generally based on market appraisals. If estimated future cash flows, on an undiscounted basis, are less than the carrying amount of the related asset, an asset impairment is considered to exist. Changes in significant assumptions underlying future cash flow estimates may have a material effect on the Company's financial position and results of operations. The Company does not obtain appraisals on an ongoing basis for the property. The Company however did obtain an appraisal in 2009. Rental property conditions have not changed significantly in the area of the Company's property. At March 31, 2010 and December 31, 2009, management determined that no impairment existed on the Company's long-lived asset as the 2009 appraised value exceeded construction and carrying value and rental rates remained strong and costs within projected limits.

4) Asset Retirement Obligations

The Company accounts for its asset retirement obligations under FASB ASC 410-20, "Asset Retirement Obligations." The Company records the fair value of the reclamation liability on its inactive mining properties and its operating oil and gas properties as of the date that the liability is incurred. The Company reviews the liability each quarter and determines if a change in estimate is required as well as accretes the discounted liability on a quarterly basis for the future liability. Final determinations are made during the fourth quarter of each year. The Company deducts any actual funds expended for reclamation during the quarter in which it occurs.

The following is a reconciliation of the total liability for asset retirement obligations:

	(In thousands)	
	March 31, 2010	December 31, 2009
Beginning asset retirement obligation	\$ 211	\$ 144
Accretion of discount	4	12
Liabilities incurred	13	55
Ending asset retirement obligation	\$ 228	\$ 211
Mining properties	\$ 131	\$ 128
Oil and gas wells	97	83
Ending asset retirement obligation	\$ 228	\$ 211

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

5) Fair Value

The Company adopted Financial Accounting Standards Board Accounting Standards Codification Topic 820 “Fair Value Measurements and Disclosures” (FASB ASC 820) on January 1, 2008, as it relates to financial assets and liabilities. The Company adopted FASB ASC 820 on January 1, 2009, as it relates to nonfinancial assets and liabilities. FASB ASC 820 establishes a fair value hierarchy that prioritizes the inputs the Company to measure fair value. The three levels of the fair value hierarchy defined by FASB ASC 820 are as follows:

- Level 1 — Unadjusted quoted prices is available in active markets for identical assets or liabilities.
- Level 2 — Pricing inputs, other than quoted prices within Level 1, which are either directly or indirectly observable.
- Level 3 — Pricing inputs that are unobservable requiring the Company of valuation methodologies that result in management’s best estimate of fair value.

The Company’s assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the valuation of the nonfinancial assets and liabilities and their placement in the fair value hierarchy levels. The fair value of the Company’s asset retirement obligations and other accrued liabilities are determined using discounted cash flow methodologies based on inputs that are not readily available in public markets. The fair value of the asset retirement obligations and other accrued liabilities are reflected on the balance sheet as detailed below.

Description	March 31, 2010	(In thousands) Fair Value Measurements at March 31, 2010 Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

The Company's other financial instruments include cash and cash equivalents, accounts receivable, accounts payable, other current liabilities and long-term debt. The carrying amount of cash and cash equivalents, accounts receivable,

Edgar Filing: US ENERGY CORP - Form 10-Q

accounts payable and other current liabilities approximate fair value because of their immediate or short-term maturities. The carrying value of the Company's long-term debt approximates its fair market value since interest rates have remained generally unchanged from the issuance of the long-term debt. The following is the estimated fair value and carrying value of our other financial instruments at each of these dates:

Description	(In thousands)			
	March 31, 2010		December 31, 2009	
	Carry Amount	Fair Value	Carry Amount	Fair Value
Long-term debt	\$ 800	\$ 800	\$ 800	\$ 800

U.S. ENERGY CORP.

6) Long-term debt

At March 31, 2010, long term debt consists of debt related to the purchase of land which bears an interest rate of 6% per annum. The debt is due in four equal annual payments of \$200,000, plus accrued interest, beginning on January 2, 2011:

	(In thousands)	
	March 31, 2010	December 31, 2009
Debt:		
Long-term Debt		
Real estate note - collateralized by property, interest at 6%	\$ 800	\$ 800
Less current portion	(200)	(200)
Totals	\$ 600	\$ 600

7) Shareholders' Equity

Common Stock

During the three months ended March 31, 2010, the Company issued 83,945 shares of common stock. These shares consist of (a) 20,000 shares issued to officers of the Company pursuant to the 2001 Stock Compensation Plan; (b) 43,912 shares issued as a result of warrants being exercised and (c) 20,033 shares as a result of the exercise of options by employees of the Company.

The following table details the changes in common stock during the three months ended March 31, 2010:

	(Amounts in thousands, except for shares)		
	Common Stock Shares	Common Stock Amount	Additional Paid-In Capital
Balance December 31, 2009	26,418,713	\$ 264	\$ 118,998
2001 stock compensation plan	20,000	--	124
Exercise of employee stock options	20,033	--	49
Exercise of stock warrants	43,912	1	169

Edgar Filing: US ENERGY CORP - Form 10-Q

Stock Option Plans

The Board of Directors adopted, and the shareholders approved, the U.S. Energy Corp. 2001 Incentive Stock Option Plan (the "2001 ISOP") for the benefit of USE's employees. The 2001 ISOP reserves for issuance shares of the Company's common stock equal to 25% of the Company's shares of common stock issued and outstanding at any time. The 2001 ISOP has a term of 10 years.

During the three months ended March 31, 2010, the Company recognized \$252,000 in compensation expense related to employee options. The Company will recognize an additional \$1.7 million in expense over the remaining weighted average life of the outstanding options of 1.9 years. The Company computes the fair values of its options granted using the Black-Scholes pricing model.

Warrants to Others

From time to time the Company issues stock purchase warrants to non-employees for services. During the three months ended March 31, 2010, the Company recorded \$15,000 in expense for warrants issued to third parties. The Company will recognize an additional \$90,000 in expense over the life of the outstanding warrants.

The following table represents the activity in employee stock options and non-employee stock purchase warrants for the three months ended March 31, 2010:

	March 31, 2010			
	Employee Stock Options		Stock Purchase Warrants	
	Options	Weighted Average Exercise Price	Warrants	Weighted Average Exercise Price
Outstanding at beginning				
Outstanding balance at December 31, 2009	3,711,114	\$ 3.64	581,367	\$ 2.91

Exercisable at March 31, 2010	2,895,886	\$ 3.59	450,789	\$ 2.89

Weighted Average Remaining Contractual Life - Years	5.31	3.75
Aggregate intrinsic value of options / warrants outstanding	\$ 8,556,000	\$ 1,683,000

U.S. ENERGY CORP.

Notes to Condensed Financial Statements (Unaudited)
(Continued)

8) Income Taxes

The Company uses the asset and liability method of accounting for deferred income taxes. Deferred tax assets and liabilities are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities. Deferred tax assets or liabilities at the end of each period are determined using the tax rate in effect at that time.

The total future deferred income tax liability is complicated for any energy company to estimate due in part to the long-lived nature of depleting oil and gas reserves and variables such as product prices. Accordingly, the liability is subject to continual recalculation, revision of the numerous estimates required, and may change significantly in the event of such things as major acquisitions, divestitures, product price changes, changes in reserve estimates, changes in reserve lives, and changes in tax rates or tax laws.

The Internal Revenue Service has audited the Company's and subsidiaries tax returns through the year ended May 31, 2000. The Company's income tax liabilities are settled through fiscal 2000.

9) Segment Information

As of March 31, 2010, the Company had three reportable segments: Oil and Gas, Real Estate Operations, and Maintenance of Mineral Properties.

U.S. ENERGY CORP.

10) Subsequent Events

Subsequent events have been evaluated for financial reporting purposes through the date of the filing of this Form 10-Q.

On April 5, 2010, the Company received a distribution from Standard Steam Trust in the amount of \$1.1 million. This distribution is the Company's share of proceeds from the sale of one of Standard Steam Trust's geothermal prospects.

On April 6, 2010, the Company entered into a participation agreement for two prospects in Galveston County, Texas for an initial payment of \$176,600. The Company will participate as a 13.33% BCP/10% ACP working interest owner. Ultimately, several wells could be drilled on these prospects. The first well is scheduled to spud in the third quarter of 2010.

On April 6, 2010 the Company has entered into an agreement to participate on a 13.33% BCP/10% ACP in the ALMI #8 Well (Chauvin). On April 22, 2010, the Company increased its participation interest to 53.33% BCP/50% ACP. The well is scheduled to spud in the second quarter of 2010. The Company's projected share of the drilling costs is \$2.4 million.

On April 18, 2010, the Company received notice from the operator of the Main Pass 74 #A-19 well, that the well was not successful and would be plugged and abandoned. The Company's net cost in this well through March 31, 2010 is \$3.1 million. The Company's estimated share of the abandonment cost for this well is \$210,000.

On April 18, 2010, the Company received notice from the operator of the ALMI #1 well, that the well was not successful and would be plugged and abandoned. The Company's net cost in this well through March 31, 2010 is \$303,000. The Company's estimated share of the abandonment cost for this well is \$21,000.

On April 22, 2010, the Company entered into a participation agreement on multiple prospects in Gaines County, Texas for an initial payment of sunk and land costs of \$308,500. The Company will participate as a 13.33% BCP/10% ACP working interest owner. Ultimately, several wells could be drilled on these prospects. The first well is scheduled to spud in the second quarter of 2010.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following is Management's Discussion and Analysis of significant factors that have affected the Company's liquidity, capital resources and results of operations during the three months ended March 31, 2010 and 2009. The following also updates information as to our financial condition provided in our 2009 Annual Report on Form 10-K. Statements in the following discussion maybe forward-looking and involve risk and uncertainty. The following discussion should also be read in conjunction with our condensed financial statements and notes thereto.

General Overview

The Company is involved in the exploration for and development of oil and gas, minerals and geothermal energy as well as real estate operations. The Company's primary objective in the short to mid-term is to develop and acquire oil and gas producing properties as well as advance its geothermal properties through development, joint venture or sale. The long-term goal of the Company is to participate in the development of the Mount Emmons molybdenum property in Colorado. The Company also owns a multifamily housing complex as well as various other real estate properties which provide cash flows to fund operations. The Company's primary goal is to improve shareholder value by developing long-term recurring revenues, cash flows and net income.

FASB Codification Discussion

We follow accounting standards set by the Financial Accounting Standards Board, commonly referred to as the "FASB." The FASB sets generally accepted accounting principles (GAAP) that we follow to ensure we consistently report our financial condition, results of operations, and cash flows.

The FASB recognized the complexity of its standard-setting process and embarked on a revised process in 2004 that culminated in the release on July 1, 2009, of the FASB Accounting Standards Codification,TM sometimes referred to as the Codification or ASC. The Codification does not change how the Company accounts for its transactions or the nature of related disclosures made. However, when referring to guidance issued by the FASB, the Company refers to topics in the ASC. The above change was made effective by the FASB for periods ending on or after September 15, 2009.

Liquidity and Capital Resources

At March 31, 2010, the Company had \$19.3 million in cash and cash equivalents and \$25.5 million in U.S. Treasuries with longer than 90-day maturities from date of purchase for a total of \$44.8 million or \$1.69 per outstanding common share. The Company's working capital (current assets minus current liabilities) was \$48.1 million. As discussed below in Capital Resources and Capital Requirements, the Company projects that its capital resources at March 31, 2010 will be sufficient to fund its operations and capital projects through the balance of 2010. To fund projected oil and gas exploration beyond the end of calendar 2010, it is anticipated that the Company will need to obtain additional capital. The Company is currently considering its alternatives, including financing of its real estate property in Gillette, Wyoming, reserve based lending and if necessary an additional equity raise. Additionally, the Company has in place a line of credit with a commercial bank in the amount of \$10.0 million and is actively seeking a senior, secured revolving credit facility.

The principal recurring trend which affects the Company is variable prices for commodities producible from our mineral properties, although the extent and grade of discovered minerals can mitigate or aggravate the impact of price swings. As commodities experience lower values in the market place, it is typically less expensive to acquire properties and hold them until prices raise to levels which either allow the properties to be sold or placed into production through joint venture partners, or by the Company for its own account. Availability of exploration drilling equipment and crews fluctuates with the market prices for oil and natural gas. When prices are low there is typically less exploration activity and the cost of drilling is typically reduced. Conversely, when prices are high there is typically more exploration activity and the cost of drilling typically increases.

Cash flows during the three months ended March 31, 2010:

- Operations provided \$3.0 million, Investing Activities consumed \$17.3 million and Financing Activities provided \$219,000 for a net decrease in cash of \$14.1 million during the three months ended March 31, 2010. During the three months ended March 31, 2009, Operations consumed \$1.2 million, Investing Activities provided \$14.5 million and Financing activities consumed \$18.7 million.
- For a discussion on cash provided by Operations please refer to Results of Operations below.

Investing Activities:

- Investing activities consumed cash through the acquisition and development of oil and gas properties, \$13.8 million, net investment in treasury investments, \$3.4 million, acquisition of property and equipment, \$189,000, and \$20,000 in net change in restricted investments
- Cash was provided by investing activities as a result of the Company's sale of a commercial office property, \$118,000.

Financing Activities:

- The Company received \$219,000 for the issuance of shares related to the exercise of employee options and warrants to third party consultants.

Following is a discussion regarding the Company's Capital Resources and Capital Requirements during the balance of 2010. For longer-range projections of the Company's capital resources and requirements, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Capital Resources

Sources of capital during the balance of 2010 are expected to consist of (1) the sale of oil and gas production from the Company's existing and anticipated oil and gas operations, (2) cash on hand, (3) receipts of cash for the rental of real estate properties, (4) long-term financing of the Company's multifamily housing complex, and (5) a line of credit in the amount of \$10.0 million. Additionally, the Company intends to pursue establishment of a reserve-based credit facility this year.

Oil and Gas Production

At March 31, 2010, the Company had twelve producing wells. During the first quarter of 2010, the Company received on average \$2.3 million per month from these producing wells with average operating cost of \$82,000 per month, before non cash depletion expense, for average cash flows of \$2.2 million per month from oil and gas production. The Company anticipates that cash flows from oil and gas operations will increase through the balance of 2010 as the remaining wells being drilled with Brigham Oil & Gas, L.P. ("Brigham") a Delaware limited partnership wholly-owned by Brigham Exploration Company (a Delaware corporation), begin to produce. Decreases in the price of oil and natural gas and declines in production rates however could decrease these monthly cash flow amounts.

The decline of production of the Bakken wells and the back-in provision granted Brigham after pay back of drilling costs will decrease the amount of cash flow the Company receives from the oil production in the Bakken wells. The Company will continue to search for additional drilling opportunities to replace these oil reserves and cash flows.

The ultimate amount of cash that will be derived from the production of oil and gas will be determined by the price of oil and gas, the amount of production and production costs. The ultimate life of producing wells will likewise be impacted by market prices and costs of production. The Company plans on continuing in the oil and gas exploration business and may also acquire existing oil and gas properties.

Cash on Hand

At March 31, 2010, the Company had \$19.3 million in cash and cash equivalents and \$25.5 million in U.S. Treasuries. The Company has invested its cash in interest bearing accounts, with the majority invested in U.S. Government Treasuries. During the past two years, this investment policy has insured the preservation of principal and yielded a return.

Real Estate

The Company's multi-family complex in Gillette, Wyoming had an occupancy rate of 83% at March 31, 2010, up from 80% at December 31, 2009. Revenues are approximately \$200,000 per month and net cash flow from this property is approximately \$118,000 per month. The Company will continue to focus on tenant retention and control of overhead costs in an effort to minimize the impact of the downturn in the overall housing rental market in Gillette.

Although the property is pledged as collateral for the Company's \$10 million line of credit, there is no debt against the property. The Company may seek long term financing on the property during 2010 to further its oil and gas exploration and development projects.

Commercial Bank

During January 2010, the Company entered into a \$10.0 million line of credit with a commercial bank. No borrowings have been made under this line of credit as of the date of this report. The line of credit has a variable interest rate which is tied to a national market rate with a minimum interest rate of 5.5%. The line of credit is available until January 31, 2011 at which time it may be renewed depending on the financial strength and needs of the Company. The credit line is secured by the Company's multifamily housing project and a corporate aircraft.

Capital Requirements

The direct capital requirements of the Company during the balance of 2010 are the funding of the drilling and completion of six to seven additional wells with Brigham in the Williston Basin, additional oil and gas exploration and development projects, acquisition of prospective oil and gas properties and/or existing production, operating and capital improvement costs of the water treatment plant at the Mount Emmons molybdenum project, operations at Remington Village, possible additional funding of geothermal operations and general and administrative costs.

Oil and Gas Exploration and Development

Bakken – Williston Basin, North Dakota

Under its agreement with Brigham, the Company is committed to drill and complete an additional six wells in the Williston Basin during 2010. The Company has budgeted \$13.2 million for these activities. The actual amount expended on the six wells will vary from the budgeted amount as a result of larger or smaller ownership interests of Brigham. Other factors which can cause actual to vary from budgeted amounts are drilling conditions, problems encountered on site and weather. The wells to be drilled in 2010 will be approximately 10,000 feet in depth with 10,000 foot laterals to be completed with 28 to 32 frac stages. Projected 8/8ths cost for each of the remaining wells is \$7,000,000.

The Company's portion of operating costs and expenses for these wells is projected to be approximately \$1.1 million for the balance of 2010.

By electing to participate in all of the initial wells available to us, we have earned the rights to drill up to 15 additional wells in the Bakken formation and an additional 30 wells in the Three Forks formation, for a total of 60 wells, if the state of North Dakota allows two wells per formation in each spacing unit. If the spacing is ultimately increased to three wells per 1,280 acre spacing unit, the potential number of drilling locations could increase to 90. Working interests earned will vary according to Brigham's initial working interest, after-payout provisions and the provisions governing each stage of the program. At our current and projected drilling rates, we expect that it will take four to six years to drill all of the wells in these units.

Gulf Coast

The Company has committed to spend \$2.4 million in dry hole costs plus an additional \$1.1 million in completion costs for a 53.33%BCP/50%ACP working interest in an additional well with PetroQuest Energy, Inc. ("PetroQuest") in the Gulf coast area. Drilling is anticipated to be completed during the second quarter of 2010. Weather and down hole problems can cause wells in this area to cost more than anticipated. The Company has drilled one successful gas well and three dry holes with PetroQuest. The Company may elect to participate in additional wells with PetroQuest during 2010.

The Company has committed to spend \$1.5 million to drill up to five inland oil and gas wells with Houston Energy L.P. ("Houston Energy") in the Permian Basin in 2010. These wells have a lower risk of weather challenges due to the fact that they are inland. Drilling of these wells is expected to commence during the second quarter of 2010.

The Company plans on spending \$1.5 million to drill four additional wells and maintain leases as well as complete interpretation of seismic data with Yuma Exploration Company, Inc. ("Yuma") in 2010.

Other

The Company has a remaining budget of \$180,000 for the maintenance of leases during the balance of 2010 as well as \$15.0 million for the acquisition of either prospective oil and gas properties or existing production.

Mount Emmons Molybdenum Property

Under the terms of its agreement with Thompson Creek Metals Company USA (“TCM”), the Company is responsible for all costs associated with operating the water treatment plant at the Mount Emmons molybdenum property. Operating costs during the balance of 2010 are projected to be approximately \$1.3 million. Included in the operating costs, the Company participates on a 50 – 50 basis with TCM to fund holding costs associated with a parcel of jointly purchased real estate in Colorado and other nominal project related maintenance and security costs at the mine site. Additionally, the Company projects capital improvement expenditures of \$1.5 million at the water treatment plant which are expected to improve its efficiency. Actual future costs could be different from those estimates made above.

Real Estate

Cash operating expenses at Remington Village are projected to be \$1.1 million for the balance of 2010. The Company does not anticipate any major capital expenditures on the property.

Geothermal Energy Projects

The Company had an investment of \$3.0 million in a geothermal company, Standard Steam Trust, LLC, (“SST”) as of December 31, 2009 representing an ownership interest of 23.8%. This investment was increased by an equity gain of \$963,000 in the first quarter of 2010, leaving a net investment at March 31, 2010 of \$3.9 million. As a result of not funding a cash call in the first quarter of 2010, the Company’s ownership interest of SST was reduced from 23.8% to 22.8%. SST plans on continuing its temperature gradient drilling and the acquisition of additional prospective geothermal properties during 2010. The Company has not budgeted any capital resources for further investment in SST during 2010 but may elect to participate in cash calls during the year. The Company is not obligated to fund cash calls and will suffer further dilution if it elects not to fund.

Reclamation Costs

At March 31, 2010, there were no reclamation projects on the Company’s mineral or oil and gas properties that would require the expenditure of cash reserves during the balance of 2010.

Results of Operations

Three Months Ended March 31, 2010 compared to 2009

The Company recorded net income after taxes of \$1.5 million, or \$0.06 per share basic and \$0.05 diluted, for the quarter ended March 31, 2010 as compared to a net loss after taxes of \$2.3 million, or \$0.11 per share basic and diluted, during the quarter ended March 31, 2009.

The Company recognized \$7.5 million in revenues during the quarter ended March 31, 2010 as compared to revenues of \$1.4 million during same period in the prior year. Tabular representation of the increases in revenues as well as the income (loss) from operations for the quarters ended March 31, 2010 and 2009 is as follows:

	(In thousands)	
	Quarter Ending	
	March 31, 2010	March 31, 2009
Revenues	\$ 7,463	\$ 1,408
Operating expenses	3,493	2,683
Depreciation, depletion and amortization	2,634	1,089
Impairment	-	1,063
	6,127	4,835
Operating income (loss)	\$ 1,336	\$ (3,427)

Revenues for the first quarter of 2010 are 430% higher than revenues for the first quarter of 2009. The increase is primarily a result of the Company's production of oil in the Williston Basin. The increased expenses are a result of the increased depletion recognized on the increased oil production during the quarter. During the quarter ended March 31, 2009, the Company recorded an impairment of \$1.1 million on its oil and gas operations due to depressed oil and gas prices during the first quarter of 2009 and only one producing well over which to spread the entire exploration cost. As a result of increased oil and gas prices during the first quarter of 2010 and additional production to amortize the full cost pool over, no impairment was required during the quarter ended March 31, 2010.

Oil and gas production from the Williston Basin has increased revenue trends and as additional wells are drilled and completed during 2010 it is believed that this trend will continue. The Company has experienced a 100% completion rate on wells drilled in the Williston Basin with good initial production flows. Future wells may not perform as well. The multi stage frac completion techniques used by the Company and Brigham are relatively new which makes long term production projections uncertain. The Company relies on professional third party reserve engineers to calculate decline curves.

Oil and gas operations produced net operating income of \$4.3 million during the quarter ended March 31, 2010 as compared to a loss of \$1.2 million from oil and gas operations during the quarter ended March 31, 2009. The following table details the results of operations from the oil and gas sector for the quarters ended March 31, 2010 and 2009:

	(In thousands)	
	Quarter Ending	
	March 31, 2010	March 31, 2009
Oil & Gas		
Revenues	\$ 6,824	\$ 674

Edgar Filing: US ENERGY CORP - Form 10-Q

Depreciation, depletion and amortization	2,255	713
Impairment	-	1,063
	2,500	1,875
Operating income (loss)	\$ 4,324	\$ (1,201)

The following table summarizes production volumes, average sales prices and operating revenues for the quarters ended March 31, 2010 and 2009:

	Three Months Ended		2010 Period Compared to 2009 Period	
	March 31, 2010	2009	Increase (Decrease)	Increase (Decrease) %
Production volumes				
Oil and condensate (Bbls)	88,326	3,618	84,708	2341 %
Natural gas (Mcf)	166,402	119,259	47,143	40 %
Average sales prices				
Oil and condensate (per Bbl)	\$ 65.62	\$ 38.15	\$ 27.47	72 %
Natural gas (per Mcf)	6.18	4.94	1.24	25 %
Operating revenues (in thousands)				
Oil and condensate	\$ 5,796	\$ 121	\$ 5,675	4690 %
Natural gas	1,028	553	475	86 %
Total operating revenue	6,824	674	6,150	912 %
Lease operating expense	(245)	(99)	(146)	147 %
Impairment	--	(1,063)	1,063	-100 %
Income before				
DD&A	6,579	(488)	7,067	1448 %
DD&A	(2,255)	(713)	1,542	216 %
Income (loss)	\$ 4,324	\$ (1,201)	\$ 5,525	460 %

The Company plans to drill and complete an additional six to seven wells (including one off set well) in the Williston Basin during 2010. Factors that could affect the income from operations in the balance of 2010 on wells to be drilled are:

- Lower working interests in the wells due to lower ownership interest in the leases held by Brigham
- Brigham has elected to participate at 50% which will reduce both the cost to the Company as well as the revenues if the wells are successful
- Lower market prices for oil and gas during 2010
- Higher drilling and operating expenses

- Steeper decline rates than currently anticipated
- Mechanical and geological problems with the wells

-29-

The Company's other revenue producing sector is commercial real estate. A breakdown of the income from operations from commercial real estate is contained in the following table:

	(In thousands)	
	Quarter Ending	
	March 31, 2010	March 31, 2009
Real Estate		
Revenues	\$ 639	\$ 734
Operating expenses	288	280
Interest expense	-	19
Depreciation, depletion and amortization	265	232
	553	531
Operating income	\$ 86	\$ 203

The decline in revenues for the quarter ended March 31, 2010 as compared to the same period of the prior year is as a result of lower occupancy rates at Remington Village. Occupancy rates were approximately 93% at March 31, 2009 and 83% at March 31, 2010. The Company will continue to focus on tenant retention and control of overhead costs in an effort to minimize the impact of the downturn in the overall housing rental market in Gillette, Wyoming.

Mount Emmons Molybdenum Property - When the Company entered into its agreement with TCM, it agreed to pay all costs associated with the water treatment plant at the Mount Emmons molybdenum property and thereby recorded \$349,000 in costs and expenses for that facility and \$57,000 in holding costs of the Mt. Emmons molybdenum property during the quarter ended March 31, 2010. During the quarter ended March 31, 2009, the Company expended \$443,000 in operating costs related to the water treatment plant and no holding costs expenditure related to the Mt. Emmons molybdenum property.

General Administrative - General and administrative expenses increased by \$663,000 during the quarter ended March 31, 2010 over those experienced at during the quarter ended March 31, 2009. The increase is as a result of:

- \$314,000 accrual of a 2010 year-end bonus to all employees of the Company which is subject to meeting corporate and personal goals, meeting annual budget goals, increased share price and cash flow from operations. Under the Performance Compensation Plan ("PCP") adopted by the board of directors, employees can earn from 33% to 100% of their base compensation as bonuses if the terms of the PCP are met. The PCP was proposed by the Company's Compensation Committee and adopted by the full Board in April 2009. Details of the PCP are disclosed in the Company's annual proxy statement for the annual meeting to be held in June of 2010. Any bonus earned for 2010 performance will be paid during the first quarter of 2011. The PCP is being reevaluated by the Board of Directors and is subject to change. Any change to the PCP may affect the accrued amounts;
- \$184,000 noncash increase in stock compensation expense. The increase is primarily due to shares issued officers of the Company pursuant to the 2001 Stock Compensation Plan being issued at a higher price than those issued in the first quarter of 2009; and

- \$118,000 increase in professional services. This increase is primarily due to professional services fees related to our participation in the Williston Basin wells with Brigham.

Other income and expenses – As a result of the sale of one of Standard Steam Trust’s geothermal properties, the Company recorded an equity gain of \$963,000 from its investment in SST during the quarter ended March 31, 2010. The Company recorded an equity loss of \$91,000 for the quarter ended March 31, 2009. Equity losses from the investment in SST are expected to continue until such time as SST properties are sold, equity losses reduce the Company’s investment to zero or the Company sells its investment.

The Company recorded a gain on sale of assets of \$115,000 during the quarter ended March 31, 2010. The gain was primarily related to the sale of an office building that the Company previously held as rental property. The Company recorded a gain on sale of assets of \$5,000 during the quarter ended March 31, 2009.

Interest income decreased from \$87,000 during the quarter ended March 31, 2009 to \$59,000 during the quarter ended March 31, 2010. The decrease is a result of lower amounts of cash invested in interest bearing instruments and lower interest received on those investments.

Interest expense of \$17,000 during the quarter ended March 31, 2010 was related primarily to the financing of a property purchased with TCM near the Mount Emmons property. Interest expense of \$38,000 during the quarter ended March 31, 2009 related primarily to the construction loan for Remington Village which was fully repaid in January 2009 and the financing of a property purchased with TCM near the Mount Emmons property.

The Company therefore recorded net income after taxes of \$1.5 million, or \$0.06 per share basic and \$0.05 per share diluted, during the quarter ended March 31, 2010 as compared to a net loss after taxes of \$2.3 million, or \$0.11 per share basic and diluted, during the quarter ended March 31, 2009.

Critical Accounting Policies

For detailed descriptions of Company’s significant accounting policies, please see pages 67 to 70 of the Company’s Annual Report on Form 10K for the year ended December 31, 2009.

Mineral Properties - The Company capitalizes all costs incidental to the acquisition of mineral properties. Mineral exploration costs are expensed as incurred. When exploration work indicates that a mineral property can be economically developed as a result of establishing proved and probable reserves, costs for the development of the mineral property as well as capital purchases and capital construction are capitalized and amortized using units of production over the estimated recoverable proved and probable reserves. Costs and expenses related to general corporate overhead are expensed as incurred. All capitalized costs are charged to operations if the Company subsequently determines that the property is not economical due to permanent decreases in market prices of commodities, excessive production costs or depletion of the mineral resource.

Mineral properties at March 31, 2010 and December 31, 2009 reflect capitalized costs associated with the Company’s Mount Emmons molybdenum property near Crested Butte, Colorado. The Company has entered into an agreement with TCM to develop this property. TCM may earn up to a 75% interest in the project for the investment of \$400 million. The Company has received two of the six anticipated annual payments in the amount of \$1.0 million each. These payments were applied as a reduction of the Company’s investment in the Mount Emmons property.

Molybdenum prices declined from a ten year high average price of \$34.13 per pound in July 2008 to a ten-year low average price of \$8.02 per pound in April 2009. During the first quarter of 2010, spot prices for molybdenum increased to a high of \$18.25 per pound in March 2010 and were \$17.00 per pound at March 31, 2010. The historic models prepared by third parties indicate that prices for molybdenum could decrease even lower than \$10.00 and the property would still be economical given the carried investment amount of \$22.0 million at March 31, 2010 and \$22.0 million at December 31, 2009, respectively. No impairment was therefore taken during either period on the Mount Emmons molybdenum property.

Oil and Gas Properties - The Company follows the full cost method in accounting for its oil and gas properties. Under the full cost method, all costs associated with the acquisition, exploration and development of oil and gas properties are capitalized and accumulated in a country-wide cost center. This includes any internal costs that are directly related to development and exploration activities, but does not include any costs related to production, general corporate overhead or similar activities. Proceeds received from disposals are credited against accumulated cost except when the sale represents a significant disposal of reserves, in which case a gain or loss is recognized. The sum of net capitalized costs and estimated future development and dismantlement costs for each cost center is depleted on the equivalent unit-of-production method, based on proved oil and gas reserves. Excluded from amounts subject to depletion are costs associated with unevaluated properties.

Under the full cost method, net capitalized costs are limited to the lower of unamortized cost reduced by the related net deferred tax liability and asset retirement obligations or the cost center ceiling. The cost center ceiling is defined as the sum of (i) estimated future net revenue, discounted at 10% per annum, from proved reserves, based on unescalated average prices per barrel of oil and per MMBtu of natural gas at the first of each month in the 12-month period prior to the end of the reporting period and costs, adjusted for contract provisions, financial derivatives that hedge the Company's oil and gas revenue and asset retirement obligations, (ii) the cost of properties not being amortized, (iii) the lower of cost or market value of unproved properties included in the cost being amortized less (iv) income tax effects related to tax assets directly attributable to natural gas and crude oil properties. If the net book value reduced by the related net deferred income tax liability and asset retirement obligations exceeds the cost center ceiling limitation, a non-cash impairment charge is required in the period in which the impairment occurs.

Full cost pool capitalized costs are amortized over the life of production of proven properties. Capitalized costs at March 31, 2010 and December 31, 2009 which were not included in the amortized cost pool were \$8.7 million and \$5.4 million, respectively. These costs consist of wells in progress, seismic costs that are being analyzed for potential drilling locations as well as land costs and are related to unproved properties. No capitalized costs related to unproved properties are included in the amortization base at March 31, 2010 and December 31, 2009. It is anticipated that these costs will be added to the full cost amortization pool in the next two years as properties are evaluated, drilled or abandoned.

Given the volatility of oil and gas prices, it is probable that our estimate of discounted future net cash flows from proved oil and gas reserves will change. If oil or natural gas prices decline substantially, even for only a short period of time, or if we have downward revisions to our estimated proved reserves, it is possible that write-downs of oil and gas properties could occur in the future.

Long Lived Assets - Real Estate - The Company evaluates its long-lived assets, which consist of commercial real estate, for impairment when events or changes in circumstances indicate that the related carrying amount may not be recoverable. Impairment calculations are based on market appraisals. If rental rates decrease or costs increase to levels that result in estimated future cash flows, on an undiscounted basis, that are less than the carrying amount of the related asset, an asset impairment is considered to exist. Changes in significant assumptions underlying future cash flow estimates may have a material effect on the Company's financial position and results of operations. The Company does not obtain appraisals on an ongoing basis for the property. The Company however did obtain an appraisal in 2009. Rental property conditions have not changed significantly in the area of the Company's property. At March 31, 2010 and December 31, 2009, management determined that no impairment existed on the Company's long-lived asset as the 2009 appraised value exceeded construction and carrying value and rental rates remained strong and costs within projected limits.

Asset Retirement Obligations - The Company accounts for its asset retirement obligations under ASC 410-20. The Company records the fair value of the reclamation liability on its inactive mining properties as of the date that the liability is incurred. The Company reviews the liability each quarter and determines if a change in estimate is required as well as accretes the liability on a quarterly basis for the future liability. Final determinations are made during the fourth quarter of each year. The Company deducts any actual funds expended for reclamation during the quarter in which it occurs.

Future Operations

Management intends to continue seeking opportunities presented by the recent and future projected market prices for oil and natural gas. Long term, we intend to be prepared to pay our share of the holding and development costs associated with the Mount Emmons property.

Effects of Changes in Prices

Mineral operations are significantly affected by changes in commodity prices. As prices for a particular mineral increase, values for prospects for that mineral typically also increase, making acquisitions of such properties more costly and sales potentially more valuable. Conversely, a price decline could enhance acquisitions of properties containing that mineral, but could make sales of such properties more difficult. Operational impacts of changes in mineral commodity prices are common in the mining and oil and gas industries.

At March 31, 2010, the Company is receiving revenues from its oil and gas business. The Company's revenues, cash flows, future rate of growth, results of operations, financial condition and ability to finance projected acquisition of oil and gas producing assets are dependent upon prevailing prices of oil and gas.

The Company's multifamily housing revenues could be affected negatively if there was a sustained down turn in the price of coal, natural gas and oil which could affect the demand for housing in the Gillette, Wyoming area.

Forward Looking Statements

This Form 10-Q contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). All statements other than statements of historical facts included in and incorporated by reference into this Form 10-Q are forward-looking statements. These forward-looking statements are subject to certain risks, trends and uncertainties that could cause actual results to differ materially from those projected. Among those risks, trends and uncertainties are our ability to find oil and natural gas reserves that are economically recoverable, the volatility of oil and natural gas prices, declines in the values of our properties that have resulted in and may in the future result in additional ceiling test write downs, our ability to replace reserves and sustain production, our estimate of the sufficiency of our existing capital sources, our ability to raise additional capital to fund cash requirements for our participation in oil and gas properties and for future acquisitions, the uncertainties involved in estimating quantities of proved oil and natural gas reserves, in prospect development and property acquisitions or dispositions and in projecting future rates of production or future reserves, the timing of development expenditures and drilling of wells, hurricanes and other natural disasters and the operating hazards attendant to the oil and gas and minerals business. In particular, careful consideration should be given to cautionary statements made in the Company’s Risk Factors included in its Annual Report on Form 10-K and quarterly reports on Form 10-Q filed with the SEC. The Company undertakes no duty to update or revise these forward-looking statements.

When used in this Form 10-Q, the words, “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate” and expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words. Because these forward-looking statements involve risks and uncertainties, actual results could differ materially from those expressed or implied by these forward-looking statements for a number of important reasons, including those discussed under “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere in this Form 10-Q.

Off-Balance Sheet Arrangements

None.

Contractual Obligations

We had three divisions of contractual obligations at March 31, 2010: Debt to third parties of \$800,000 with interest at 6% per annum, executive retirement of \$951,000 and asset retirement obligations of \$228,000. The debt will be paid over a period of four years. The executive retirement liability will be paid out over varying periods starting after the actual retirement dates of the covered executives. The asset retirement obligations will be retired during the next 34 years. The following table shows the scheduled debt payment and expenditures for budgeted asset retirement obligations:

Contractual Obligations
March 31, 2010

	(In thousands)				
	Payments due by period				
	Total	Less than one Year	One to Three Years	Three to Five Years	More than Five Years
Long-term debt obligations	\$ 800	\$ 200	\$ 600	\$ --	\$ --
Executive retirement	\$ 951	153	130	--	668
Asset retirement obligation	\$ 228	--	--	26	202
Totals	\$ 1,979	\$ 353	\$ 730	\$ 26	\$ 870

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

None

ITEM 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As of March 31, 2010, the Company's management, including its Chief Executive Office and Chief Financial Officer, completed an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities and Exchange Act of 1934, as amended (the "Exchange Act")). Based on that evaluation the Chief Executive Officer and Chief Financial Officer concluded:

- i. That the Company's disclosure controls and procedures are designed to ensure (a) that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and (b) that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure; and
 - ii. That the Company's disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting. There has been no change in our internal control over financial reporting that occurred during the quarter ended March 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. Legal Proceedings

Appeal of Approval of Notice of Intent to Conduct Prospecting for the Mount Emmons Property

On March 8, 2008, High Country Citizens' Alliance ("HCCA") filed a request for hearing before the Colorado Land Reclamation Board ("Board") of the approval of a Notice of Intent to Conduct Prospecting Notice for the Mount Emmons molybdenum property ("NOI"), which was approved by the Division of Reclamation, Mining and Safety of the Colorado Department of Natural Resources ("DRMS") on January 3, 2008. The NOI as approved provided for continued exploration of the molybdenum deposit to update, improve and verify, in accordance with current industry standards and legal requirements, mineralization data that was collected by Amax in the late 1970's.

On May 14, 2008, the Board denied HCCA's Request for Hearing and also denied their Request for a Declaratory Order. Citing Colorado law, the Board determined that HCCA did not have standing or the right to appeal DRMS's approval of the NOI under Colorado law.

On August 28, 2008, HCCA appealed the Board's decision in Denver District Court. Plaintiff: High Country Citizen's Alliance v. Defendants: Colorado Mined Land Reclamation Board, Colorado Division of Reclamation Mining and Safety and U.S. Energy Corp., Case No.: 08CV6156 (District Court, 2d Jud. Dist., City and County of Denver). The Board has filed an answer with the Court. The DRMS and the Company (in conjunction with TCM) have both filed the responsive pleadings in addition to motions to dismiss the HCCA complaint.

No hearing date has yet been scheduled in the District Court of Colorado concerning the Colorado Division of Reclamation, Mining, and Safety's issuance of a Notice of Intent to Conduct Prospecting to the Company for the Mount Emmons Property.

Water Rights Litigation –Mount Emmons Molybdenum Property

On July 25, 2008, the Company filed an Application for Finding of Reasonable Diligence with the Water Court ("Water Diligence Application") concerning the conditional water rights associated with Mount Emmons (Case No. 2008CW81). The conditional water decree ("Decree") requires the Company to file its proposed plan of operations and associated permits with the Forest Service and BLM within six years of entry of the 2002 Decree, or within six years of the final determination in the Applicant's pending patent application, whichever occurs later. Although the BLM issued the mineral patents on April 2, 2004, the patents remained subject to a challenge by High Country Citizens' Alliance, the Town of Crested Butte, and the Board of County Commissioners of Gunnison County (collectively "Protestors"). On April 30, 2007, the United States Supreme Court made a final determination upholding BLM's issuance of the mineral patents.

The Company believes that the deadline for filing the plan of operations specified by the Decree is April 30, 2013 (six years from the final determination of issuance of the mineral patents by the United States Supreme Court). The Forest Service has indicated that the deadline should be April 2, 2010 (six years from the issuance of the mineral patents by BLM). The United States, on behalf of the Forest Service and BLM, filed a Statement of Opposition on this specific issue only. Statements of Opposition were also filed by six other parties including the City of Gunnison, the State of Colorado, and High Country Citizens' Alliance in September for various reasons, including requesting the Company be put on strict proof as to demonstrating evidence of reasonable diligence in developing the conditional water rights.

On March 26, 2010, BLM and the Forest Service signed a Stipulation with the Company, which resolved their opposition to the Company's Water Diligence Application. Pursuant to the Stipulation, the Company agreed to prepare, in consultation with the BLM and Forest Service, and file no later than April 2, 2010, an initial Plan of Operations in accordance with 36 C.F.R. Sec. 228.4(d). BLM, the Forest Service and the Company also agreed the filing of this Plan of Operations would satisfy the Decree. The Company filed the Plan of Operations on March 31, 2010.

For information on other legal proceedings in which there have been no new developments since March 31, 2010, see Item 1, Part II of the Company's Annual Report on Form 10-K filed on March 12, 2010.

ITEM 1A. Risk Factors

There have been no material changes to the risk factors discussed in Part I, "Item 1A. Risk Factors" (pages 14 to 27) in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, which could materially affect the Company's business, financial condition or future results. Additional risks and uncertainties not currently known to the Company or that it currently deems to be immaterial also may materially adversely affect its business, financial condition and/or operating results.

ITEM 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the three months ended March 31, 2010, the Company issued a total of 83,945 shares of its common stock. The shares were issued as restricted securities in reliance on the exemption available to the Company under Section 4(2) of the Securities Act of 1933. These shares were issued as new issuances pursuant to the 2001 stock compensation plan.

ITEM 3. Defaults Upon Senior Securities

(b) Reports on Form 8-K. The Company filed six reports on Form 8-K for the quarter ended March 31, 2010. The events reported were as follows:

1. The report filed on January 6, 2010, under Item 7.01 referenced the announcement of the initial production rate from its State 36-1 #1H well.
2. The report filed on January 6, 2010, under Item 7.01 referenced the \$1 million option payment by Thompson Creek Metals Company.
3. The report filed on January 21, 2010, under Item 7.01 referenced the announcement to participate in the third group of five wells with Brigham Exploration Company.
4. The report filed on January 26, 2010, under Item 7.01 referenced the announcement to participate in two Gulf Coast prospects.
5. The report filed on March 16, 2010, under Item 7.01 referenced the highlights and financial results for the year ended December 31, 2009.
6. The report filed on March 31, 2010, under Item 7.01 referenced the announcement of the presentation at the Capital Conference in Southern California.

SIGNATURES
