FORWARD-LOOKING STATEMENTS

VONAGE ANNUAL REPORT 2018

Table of Contents

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains statements and other information which are deemed to be “forward-looking” within the meaning of the Private Securities Litigation Reform Act of 1995, or the Litigation Reform Act. These forward-looking statements and other information are based on our beliefs as well as assumptions made by us using information currently available.

The words “plan,” “anticipate,” “believe,” “estimate,” “expect,” “intend,” “will,” “should” and similar expressions, as they relate to us, are intended to identify forward-looking statements. Such statements reflect our current views with respect to future events, are subject to certain risks, uncertainties, and assumptions, and are not a guarantee of future performance. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in such forward-looking statements or information. In light of the significant uncertainties in these forward-looking statements, you should not place undue reliance on these forward-looking statements. The forward-looking statements and information contained in this Annual Report on Form 10-K relate to events and state our beliefs and the assumptions made by us only as to the date of this Annual Report on Form 10-K. We do not intend to update these forward-looking statements, except as required by law. In accordance with the provisions of the Litigation Reform Act, we are making investors aware that such forward-looking statements, because they relate to future events, are by their very nature subject to many important factors that could cause actual results to differ materially from those contemplated by the forward-looking statements contained in this Annual Report on Form 10-K, any exhibits to this Form 10-K and other public statements we make. Important factors that could cause such differences include, but are not limited to: the competition we face; the expansion of competition in the cloud communications market; risks related to the acquisition or integration of businesses we have acquired; our ability to adapt to rapid changes in the cloud communications market; the nascent state of the cloud communications for business market; our ability to retain customers and attract new customers cost-effectively; the risk associated with developing and maintaining effective internal sales teams and effective distribution channels; security breaches and other compromises of information security; risks associated with sales of our services to medium-sized and enterprise customers; our reliance on third-party hardware and software; our dependence on third-party facilities, equipment, systems and services; system disruptions or flaws in our technology and systems; our ability to comply with data privacy and related regulatory matters; our ability to scale our business and grow efficiently; our dependence on third party vendors; the impact of fluctuations in economic conditions, particularly on our small and medium business customers; our ability to obtain or maintain relevant intellectual property licenses or to protect our trademarks and internally developed software; restrictions in our debt agreements that may limit our operating flexibility; our ability to obtain additional financing if required; fraudulent use of our name or services; intellectual property and other litigation that have been and may be brought against us; reliance on third parties for our 911 services; uncertainties relating to regulation of business services; risks associated with legislative, regulatory or judicial actions regarding our business products; risks associated with operating abroad; risks associated with the taxation of our business; governmental regulation and taxes in our international operations; liability under anti-corruption laws or from governmental export controls or economic sanctions; our dependence on our customers' unimpeded access to broadband connections; foreign currency exchange risk; our history of net losses and ability to achieve consistent profitability in the future; our ability to fully realize the benefits of our net operating loss carry-forwards if an ownership change occurs; certain provisions of our charter documents; and other factors that are set forth in the “Risk Factors” section and other sections of this Annual Report on Form 10-K, as well as in our Quarterly Reports on Form 10-Q and amendments to these reports.

FINANCIAL INFORMATION PRESENTATION

For the financial information discussed in this Annual Report on Form 10-K, other than per share and per line amounts, dollar amounts are presented in thousands, except where noted.

PART I

ITEM 1. Business

OVERVIEW AND STRATEGY

At Vonage, our strategy is to redefine business communications. True to our roots as a technology disruptor, we are embracing technology to transform how businesses communicate to create better business outcomes. Our cloud communications platform enables businesses of all sizes to collaborate more productively and engage their customers more efficiently across any device.

We believe we have a unique set of capabilities and solutions to deliver on the full business communications value chain to help enterprises use cloud communications to improve how business gets done. Vonage offers a unique combination of unified communications, programmable communications and contact center to transform the way businesses communicate all on one platform. We build integrated solutions through programmable communications, complementing and adding more value and customizations to unified communications as a service and cloud contact center solutions.

The One Vonage microservices platform creates specific tools customers need to address the unique communications challenges their businesses face. All of our cloud communications solutions are designed to provide employees with the tools they need to connect, collaborate and be more productive internally while enabling them to engage with customers externally for a better customer experience and more meaningful relationships.

We also provide a robust set of feature-rich residential communication solutions that allow consumers to connect their home phones and mobile phones on one number and we offer attractive international long distance rates that help create a loyal base of satisfied customers.

Our business is organized under two reportable segments, Business and Consumer. Additional discussion of our reportable segments is included in Note 15, Industry Segment and Geographical Information to the Consolidated Financial Statements.

EVOLUTION OF VONAGE

Founded in 2001, Vonage became a leading provider of broadband communication services using the Company's innovative Voice over Internet Protocol, or VoIP, technology platform offering feature-rich, low-cost communication services. Beginning in November 2013 and continuing through September 2015, Vonage acquired five companies: Vocalocity, Inc., Telesphere Networks Ltd., Simple Signal Inc., gUnify LLC and iCore Networks Inc. With these acquisitions, Vonage began its execution of a pivot from a solely residential communications provider to establishing the foundation of Unified Communications as a Service, or UCaaS, available to service the needs of businesses to improve how they communicate with their customers and their employees.

In June 2016, Vonage completed the acquisition of Nexmo, Inc., a global leader in the Communications Platform as a Service, or CPaaS, sector of the cloud communications market. The acquisition of Nexmo accelerated Vonage's growth strategy to provide application program interfaces, or APIs, for text messaging and voice communications, allowing developers and enterprises to embed contextual, programmable communications into mobile apps, websites and business systems.

In August 2018, Vonage acquired TokBox Inc., an industry leader in WebRTC programmable video that enables developers and enterprises to integrate live video into websites, mobile apps and IoT devices with only a few lines of code. The acquisition of TokBox meaningfully broadened Vonage's API capabilities by adding video to its existing services in voice, SMS and IP messaging.

In October 2018, Vonage completed the acquisition of NewVoiceMedia Limited, an industry-leading cloud Contact Center as a Service, or CCaaS, provider. This acquisition enabled Vonage to combine its robust UCaaS and CPaaS solutions with NewVoiceMedia's pure-play cloud contact center offerings, culminating in the Company's ability to provide an end-to-end communication experience for a company's employees and its customers.

Table of Contents

SERVICE OFFERINGS

Business

For our Business customers, we provide innovative, cloud-based UCaaS solutions, comprised of integrated voice, text, video, data, collaboration, contact center and mobile applications over our flexible, scalable Session Initiation Protocol based VoIP network. We also offer CPaaS solutions to developers designed to enhance the way businesses communicate with their customers by embedding communications into apps, websites and business processes. In combination, our products and services permit our business customers to communicate with their customers and employees through any cloud-connected device, in any place, at any time without the often costly investment required with on-site equipment.

Our customer base spans a wide variety of industries, including manufacturing, automotive, legal, information technology, financial services, construction, real estate, engineering, healthcare, and nonprofit organizations.

We have a robust set of product families tailored to serve the full range of the business value chain, from the small to medium-sized business, or SMB, market, through mid-market and enterprise markets. We provide customers with multiple deployment options, designed to provide the reliability and quality of service they demand. We provide customers the ability to integrate our cloud communications platform with many cloud-based productivity and customer relationship management, or CRM, solutions, including Google's G Suite, Zendesk, Salesforce's Sales Cloud, Oracle, and Clio. Vonage strives to integrate the entire business communications value chain with our ability to integrate these cloud-based workplace tools.

Our Business strategy is to support the full range of business customers, using the Company's two UCaaS product families: Vonage Business Cloud, based on our proprietary call processing platform that is purpose-built for SMB and mid-market customers; and Vonage Enterprise, based on Broadsoft's call processing platform in combination with other Vonage cloud-based solutions, which serves larger customers, from mid-market businesses through large enterprises. Our UCaaS subscription revenue generation efforts are focused on customer acquisition and retention as well as providing additional services to existing customers as they grow and scale.

With the 2018 acquisition of NewVoiceMedia, Vonage also provides customers with a robust CCaaS offering, driving intelligent interactions for customers through emerging technologies such as skills-based routing, real-time sentiment analysis and chatbots.

The following provides a more detailed description of our Business services:

Vonage Business Cloud

Vonage Business Cloud utilizes our proprietary technology platform which aims to deliver seamless, integrated cloud-based communication services. It provides a cost-effective, highly scalable, feature-rich solution, delivered over-the-top of a customer's broadband or our SmartWan solution, which provides elevated quality of service over a customer's network using SD-WAN, or software defined Wide Area Network, technology. All of our Vonage Business Cloud offerings allow free access to our mobile application. Additional features include the ability to update account profiles, manage devices, and contact call logs directly from their mobile devices. We also offer virtual extensions, which connects employees to a business phone number through their mobile phones.

Vonage Business Cloud also integrates with other third-party software applications to improve workflow and enhance productivity. Our software uses a combination of open APIs and pre-built integrations to enhance functionality with data from other third-party enterprise applications including Salesforce, Microsoft Dynamics, NetSuite, Zendesk, Oracle Sales Cloud and Hubspot. Vonage Business Cloud also provides customers with a desktop and video sharing solution with Amazon Chime. The investments we have made has enabled scalability to allow Vonage Business Cloud to serve a broader customer base.

The launch of Vonage Business Cloud was quickly followed by innovations to improve and build upon this service with new features and functionality that we believe transforms the way businesses connect, including:

- Vonage SmartWAN, which is now available to businesses using Vonage Business Cloud, optimizing the network to keep employees connected across multiple locations;
- Vonage Business Cloud Desktop Connect App, which allows employees to start their day in the redesigned Vonage Business Cloud Mobile App and switch to the desktop when they reach the office;

- Vee, our new virtual customer assistant chatbot integrated with a cloud-based unified communications solution that aids customers in managing their account services via simple natural-language text commands
- VonageFlow, our proprietary workstream collaboration solution;

3 VONAGE ANNUAL REPORT 2018

Table of Contents

- Business Inbox, which allows customers to reply to messages sent in messaging apps like Facebook Messenger, providing the ability to respond to customers in real-time directly within the app, organizing customer requests in one unified inbox; and

- CX Cloud, an advanced omni-channel contact center product suite allowing businesses to utilize Nexmo APIs to customize their interactions with customers via real-time sentiment analysis, chatbots, and interactive voice response.

Vonage Enterprise

Vonage Enterprise is a purpose-built cloud based platform for mid-market and enterprise customers, providing a complete set of enhanced unified communication and collaboration services, including: voice, data, video, mobile and contact center services. We focus on customers for whom guaranteed quality of service and uniformity of services across all locations is critical. We deliver services to this customer base over our private, nationwide, fully redundant, secure IP MPLS network using 21 network POPs that allow us to deliver dedicated, secure and private bandwidth utilizing all forms of last mile technologies including EoC and Fiber and bandwidth ranging from 1.5Mbps to 1Gbps. Services we deliver include Wide Area Networking, or WAN, Internet Access, MPLS VPN, Managed Firewall, Hosted UCaaS, Hosted Video Conferencing, Web Collaboration, Secure Instant Messaging & Presence, Mobility and Fixed Mobile Convergence.

Vonage Enterprise services include features such as Single Number Reach, which provides each user one number, available over numerous devices including desk phones, tablets and smartphones, Shared Line Appearance, Busy Lamp Field, Phone Paging, Outlook Integration, IM, Presence, and Video. Vonage also delivers SIP Trunking, over the same network, to customers using premises PBXs, with the ability to overlay UCaaS features where the premises PBX is deficient or for disaster recovery and business continuity requirements. This product also supports a hybrid deployment where some locations may be fully hosted and others may continue to use the premises PBX. Vonage Enterprise customers also have the ability to utilize our gUnify middleware layer to integrate communications with the core, SaaS-based business applications that companies use as part of their every-day workflow, such as Google for Work, Salesforce, Zendesk, and others.

Vonage Enterprise customers also receive access to a custom-built portal through which they can fully administer all services, online bill pay, manage trouble tickets, manage bandwidth and services, access detailed Call Analytics, and execute Moves, Adds and Changes.

NewVoiceMedia, Vonage's Contact Center Solution

With the 2018 acquisition of NewVoiceMedia, Vonage also provides customers with a robust CCaaS offering, driving intelligent interactions for customers through emerging technologies such as skills-based routing, real-time sentiment analysis and chatbots. NewVoiceMedia's cloud contact center solution, combined with Vonage's offering, provides an end-to-end communications experience for enhanced customer engagement and conversation. By integrating with CRMs, NewVoiceMedia delivers better omni-channel interactions and robust analytics. We intend to integrate NewVoiceMedia's cloud contact center solutions with our Vonage Business Cloud platform as well as to capitalize on the improved functionality that programmable communications naturally brings to contact center solutions.

With NewVoiceMedia, we believe that Vonage is the only cloud communication company that can combine deep CRM integrations with the full range of programmable communications used by a business's employees and its customers.

Nexmo, The Vonage API Platform

The communications industry is undergoing a major transformation from dedicated communications applications and devices to communications embedded in other applications and devices where the communications happens within the context of those applications. For example, when calling or messaging a taxi driver, consumers can do this within the taxi app which has all the necessary context such as the pickup location and payment method, resulting in a better experience for both parties. Similarly, when contacting a company consumers can communicate within the context of the company's branded mobile app or website and agents within the context of their CRM desktop application, delivering a better experience for consumers and improving productivity for contact center agents. We call this type of communications "contextual" because it is context rich and delivers a better experience. This trend is enabled by a new category of cloud communications platforms that enable software developers to build communications capabilities such as messaging and voice calling within their applications without having to build or maintain communications

infrastructure. Programmable communications via APIs enable enterprises to improve the ways they engage their customers through personalized and contextual communications for deeper engagement and more meaningful relationships.

While innovative software companies were the early adopters of cloud communication platforms, over time virtually all companies will benefit from the new approach as part of their digital transformation journey. As more startups disrupt existing industries, established enterprises will innovate with communications APIs in order to more effectively compete with the new entrants and with their traditional competitors. Over time enterprises of all sizes will adopt contextual communications to deliver better business outcomes.

4 VONAGE ANNUAL REPORT 2018

Table of Contents

Nexmo, the Vonage API Platform, abstracts the complexities of the global communications networks and delivers voice, messaging, and authentication capabilities in the form of APIs that developers can easily embed into their applications with a low risk, pay as you go business model that fosters innovation. Developers adopt our APIs via a low friction, self service model on our website where they start with a free trial account and pay for additional usage with a credit card using prepaid accounts. Our customers include digital native companies who are looking to disrupt an existing industry, enterprises undergoing digital transformation, and enterprise SaaS companies looking to enhance their products with embedded communications capabilities.

We are observing an increased need among businesses to provide their customers with the ability to connect and communicate by their customers' own preferred channels (chat, voice, SMS, social messaging, etc). The need for companies to jump between modes of communication is being driven by the customer. In a digital world, this is what customers have come to expect. These same businesses are therefore seeking the ability to implement these API tools quickly and without the need for in-house IT support or expertise.

Our platform includes the following products:

- Voice API: Our Voice API enables companies to deliver better and more flexible voice experiences when communicating with their customers within the context of their existing business workflow, backed by the quality, strength and reliability of the Vonage network in the United States and tier one carriers globally.
- SIP Trunking: Our SIP Trunking enables companies to rapidly connect their PBX to the global telecommunications networks using a pay as you go model and without having to negotiate lengthy carrier contracts.
- SMS API: Our SMS API enables companies to send and receive SMS messages within the context of their existing business workflows. Our direct to carrier approach and patented Adaptive Routing algorithm enables us to deliver messages reliably and with low latency, globally.
- Verify: Our Verify API enables companies to deploy two-factor-authentication for their applications to help them acquire genuine customers and to protect against fraud. With a single API call, Verify delivers messages via SMS and voice calls if required to ensure high conversion rates. In addition, customers pay only for successful authentications.
- Number Insight: Our Number Insight API enables companies to get real time intelligence on phone numbers anywhere in the world to ensure numbers are valid and reachable and to discover other insights such as carrier information, roaming status whether a landline or mobile, and caller name.
- Virtual Phone Numbers: We offer phone numbers that are local all over the world enabling our customers to have a local presence globally. We also offer toll free numbers and short codes in the United States and Canada. Our numbers can be provisioned and de-provisioned programmatically to enable maximum utilizations.
- Messages API and Dispatch API: Together they enable brands to engage with their customers wherever they prefer, elevating customer communications by meeting customers on the channels they find most engaging.
- Video API: Our programmable video enables developers, independent software vendors, and enterprises to incorporate highly scalable point-to-point and multi-party video into websites, mobile applications and IoT devices with only a few lines of code.

Our product offerings combined with the strength of our network enable us to partner closely with our customers to ensure that they are successful through a personalized account management experience, high quality support and consulting services. The Company's CPaaS products are supported through our close relationships with tier one carriers across the globe and offer local numbers in more countries along with our private MPLS network with 21 points of presence in the United States allowing us to offer high voice quality, lower costs and increased reliability. Additionally, Nexmo has office locations all over the world, including the United States, United Kingdom, France, Germany, Hong Kong, Singapore, Japan, Korea and China. Our extensive network of developers provides customers with the ability to foster rapid innovations, including extensive developer documentation, sample codes, tutorials, libraries and free online support.

Table of Contents

Consumer

Our home telephone services are offered to customers through several service plans with different pricing structures. The service plans include basic features such as voicemail, call waiting, and call forwarding as well as unique features such as Simulring, Visual Voicemail and Extensions. We also charge for local and international calling outside of plan limits. We also charge for local and international calling outside of plan limits.

We have two primary Consumer offerings available in the United States: Vonage World and Vonage North America. Each of our Consumer calling plans provides a number of basic features including call waiting, caller ID with name, call forwarding, and voicemail. Our plans also include unlimited Vonage Visual Voicemail, which is “readable voicemail” delivered via email or SMS text message, Vonage Extensions, which extends the plan, and inbound calling, to additional phone numbers and devices, and selective call block, which allows users to block unwanted calls. We also offer, in some cases for additional fees, features such as area code selection, virtual phone number, and web-enabled voicemail. Additionally, we also provide similar product offerings to customers in both Canada and the United Kingdom.

In order to access our consumer services, a customer need only connect a standard telephone to a broadband Internet connection through a small Vonage-enabled device. After connecting the device, our customers can use their telephone to make and receive calls. Vonage-enabled devices allow customers to use the Internet connection for their computer and telephones at the same time while ensuring a high quality calling experience. We also offer a cordless multi-phone system solution. Our plug-and-play Vonage-enabled devices permit portability as customers can take their Vonage device to different locations where broadband service is available. We generally have not charged new customers for the adapters permitting use of our service.

NETWORK OPERATIONS

The Vonage network uses our customer’s existing or Vonage procured high-speed broadband Internet service to allow calls over the Internet either from a standard telephone through a Vonage-enabled device or through soft phone software or mobile client applications. Our UCaaS services are not dependent on any specific type or provider of Internet service, and our customers are free to change their Internet service provider in response to a competitive alternative, or because they have moved to a different location. For many of our Vonage Enterprise customers, our UCaaS services are delivered over the Company’s private, nationwide, fault tolerant, secure IP MPLS network under multi-year contracts to provide the high level of interconnection quality and the ability to offer service level agreements, or SLA, guaranteeing certain levels of voice service performance.

Our network is scalable and geographically distributed for robustness, high availability, and reliability across multiple call processing sites, using regional data interconnection points, where calls to non-Vonage customers are interconnected with the public switched telephone network. We periodically assess the locations of our regional data connection points in connection with efforts to improve the quality of and efficiency in delivering our service. Our interconnections with the public switched telephone network, or IP/SIP networks, are made pursuant to commercial agreements we have with several telecommunications providers. Under these agreements, we transfer calls originated by our customers to other carriers who connect the call to the called party or connect peer to peer. We have a varying degree of settlement arrangements with our carrier partners for indirect third party or direct termination of our calls. The calls are routed from our network to other carriers’ interconnected circuits at co-location facilities in which we lease space. This method of connecting to the public switched telephone or IP/SIP networks allows us to expand capacity quickly, as necessary to meet call volume, and to provide redundancy within our network.

Because Vonage’s system is standards based and not constrained to use any specific broadband service provider to connect to our customers, we can centrally manage and share resources across our customer base to minimize capital investment when entering new markets.

MARKETING

Our marketing objective is to help drive growth and revenue across our business and consumer markets. We employ an integrated multi-channel approach to marketing, whereby we evaluate and focus our efforts on efficient marketing vehicles to accomplish our goals with the greatest return on investment. To do this, we make use of both

broad-reaching and highly-targeted media channels.

For our business customers, our primary source of lead acquisition is digital marketing in the form of search engine marketing, digital advertising, social media advertising, and affiliate programs. We also utilize database marketing and lead aggregators to source business leads. We use direct marketing and account-based marketing to help source leads and create interest in our solutions. We have a significant strategy of using third-party and proprietary events to source business leads and convert prospects. For our residential customers, we have highly optimized our acquisition approach and focus mainly on digital advertising channels.

6 VONAGE ANNUAL REPORT 2018

Table of Contents

We make use of marketing research to gain consumer insights into brand, product, and service performance, and utilize those learnings to improve our messaging and media plans. Market research is also leveraged in the areas of testing, retention marketing, and product marketing to ensure we bring compelling products and services to market for our customers.

We believe our brand is a meaningful factor for customers as they consider business services. We invest in our brand in order to retain and expand our customer base and to position Vonage as a technology leader that delivers innovative, unified communication services, serving the full range of businesses and enterprises. We expect these investments to continue as we further establish Vonage as a leading business services brand and pivot beyond our residential brand heritage.

SALES AND DISTRIBUTION

Enterprise Sales

In order to continue to expand in the enterprise sales channel, which we define as businesses larger than 1,000 seats, our enterprise sales organization is positioned to provide high quality business services for Enterprise, through our fully managed solution, which utilizes BroadSoft's enterprise-grade call processing platform, with a broad portfolio of products delivered over our own private, national MPLS network, with 21 Points-of-Presence, or POPs, across the country and our own team of service delivery project managers using our proprietary provisioning tool Zeus, or with SmartWan, as well as our industry leading CPaaS products. Additionally, Contact Center solutions are commonly integrated into Enterprise solutions

Developer Ecosystem

Our API platform products are principally adopted and consumed by software developers all over the world. Given the nature of the business, we invest significant time and effort to build, recruit, and maintain developers and various software ecosystems. We have a large developer ecosystem worldwide with over 700,000 registered developers.

Field Sales and Inside Sales - SMB and Midmarket

We utilize our team of sales agents, primarily based in geographic territories comprising customers and prospects, which we refer to as our field sales team, to market and sell our business services. These field sales agents utilize a consistent, automated, highly-structured sales process to effectively educate prospective customers regarding our services. We have developed a scalable model applicable to both existing and new markets. We now have field sales presence in 20 markets within the United States and made significant expansion into new markets globally primarily supporting Nexmo. For customers in the SMB segment, we leverage an Inside Sales team to provide solutions across our cloud communications offerings.

Channel Sales

In addition to inside sales and our field sales team, we also have a dedicated team focused on channel sales who work with our channel partners to market and sell our business services, which helps to broaden our sales distribution. In 2017, we continued to develop and expand this channel program by adding new senior management, channel managers, and additional national master agents. We now have a broad and deep coverage of the U.S. market through a network of over 20,000 sub agents and resellers.

Self-Service

Customers can subscribe to our consumer services at our websites, <http://www.vonage.com>, <http://www.vonage.ca>, <http://www.vonage.co.uk> and several affiliate websites, or through multiple toll free numbers including 1-877-4VONAGE. Business customers can subscribe to our services at our websites, including <https://business.vonage.com/>, <http://www.vonagebusiness.com>, <https://enterprise.vonage.com>, and <https://www.nexmo.com>, or through toll free numbers including 1-877-862-2562 and 1-855-593-7326. Additionally, Nexmo's API enablement and developer focus lends itself to a self-service model. Our developers can register, sign up and test, and scale their businesses easily and quickly without having to engage with anyone at Nexmo. This allows customers to self-provision their accounts with the aim of improving the customer experience while reducing customer acquisition costs.

Table of Contents

INTELLECTUAL PROPERTY

We currently own over 200 issued U.S. patents as well as a number of foreign patents and pending U.S. and foreign patent applications. We routinely review our technological developments with our technology staff and business units to identify the aspects of our technology that provide us with a technological or commercial advantage and seek intellectual property and patent protection as appropriate to protect such key proprietary technology in the United States and internationally, based on our assessment in light of applicable law. Our company policies require our employees to assign intellectual property rights developed in the scope of or in relation to our business to us and to treat proprietary know-how and materials as our confidential information.

We have acquired multiple U.S. and foreign patents, and obtained licenses to numerous other patents. We are the owner of numerous United States and international trademarks and service marks and have applied for registration of our trademarks and service marks in the United States and abroad to establish and protect our brand names as part of our intellectual property strategy.

COMPETITION

In connection with our cloud communications products, we face competition from the traditional telephone and cable companies as discussed below, as well as from vendors of premises-based solutions or hosted solutions including the following:

- Independent cloud service providers;
- Premises-based business communication equipment providers;
- Hosted communication services providers;
- Traditional technology companies; and
- Emerging competitors in technology companies.

As the cloud communications market evolves, and the convergence of voice, video, messaging, mobility and data networking technologies accelerates, we may face competition in the future from companies that do not currently compete in the market, including companies that currently compete in other sectors, companies that serve consumers rather than business customers, or companies which expand their market presence to include cloud communications. We face strong competition from traditional telephone companies, cable companies, wireless companies, alternative communication providers, direct unified communications providers, legacy consumer VOIP businesses, large technology incumbents, and collaboration providers in the consumer, mobile, SMB and enterprise markets. Because most of our target customers are already purchasing communications services from one or more of these providers, our success is dependent upon our ability to attract these customers away from their existing providers. We believe that the principal competitive factors affecting our ability to attract and retain customers are price, call quality, brand awareness, customer service, network and system reliability, service features and capabilities, scalability, usability, simplicity, mobile integration and the unique ability to deliver CPaaS communications tools to business customers in addition to our UCaaS and CCaaS offerings.

There is a continuing trend toward consolidation of competitive companies, including the acquisition of alternative communication providers by Internet product and software companies with significant resources. In addition, certain of our competitors have partnered and may in the future partner with other competitors to offer products and services, leveraging their collective competitive positions. We also are subject to the risk of future disruptive technologies, which could give rise to significant new competition.

EMPLOYEES

As of December 31, 2018, we had 2,248 employees. None of our employees are subject to a collective bargaining agreement.

Table of Contents

AVAILABLE INFORMATION

We were incorporated in Delaware in May 2000 and changed our name to Vonage Holdings Corp. in February 2001. We maintain a website with the address www.vonage.com. References to our website are provided as a convenience, and the information contained on our website is not included as a part of, or incorporated by reference into, this Annual Report on Form 10-K. Other than an investor's own Internet access charges, we make available free of charge through our website our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and amendments to these reports, as soon as reasonably practicable after we have electronically filed such material with, or furnished such material to, the U.S. Securities and Exchange Commission, or SEC. Copies are also available, without charge, by writing to Vonage's Investor Relations Department at Vonage Holdings Corp., 23 Main Street, Holmdel, NJ 07733 or calling us at 732.365.1328 or sending an email through the Vonage Investor Relations website at <http://ir.vonage.com/>. Reports filed with the SEC may be viewed at www.sec.gov or obtained at the SEC Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. Information regarding the operation of the Public Reference Room may be obtained by calling the SEC at 1-800-SEC-0330.

9 VONAGE ANNUAL REPORT 2018

Table of Contents

ITEM 1A. Risk Factors

You should carefully consider the risks below, as well as all of the other information contained in this Annual Report on Form 10-K and our financial statements and the related notes included elsewhere in this Annual Report on Form 10-K, in evaluating our company and our business. Any of these risks could materially adversely affect our business, financial condition and results of operations and the trading price of our common stock.

If we are unable to compete successfully, we could lose market share and revenue.

The business cloud communications markets and consumer services market in which we participate are highly competitive. We face intense competition from a broad set of companies, including:

- software as a service companies, contact center as a service companies, other alternative communication providers, and other providers of cloud communications services; and

- traditional telephone, wireless service providers, cable companies and alternative communications providers with consumer offerings

Many of these providers are substantially larger and better capitalized than us are and have the advantage of greater name and brand name recognition and a large existing customer base. These service providers may have the ability to devote greater resources to their communications services and may be able to respond more quickly and effectively than we can to new or changing opportunities. Our competitors' financial resources may allow them to offer services at prices below cost or even for free in order to maintain and gain market share or otherwise improve their competitive positions. Some of our competitors also could use their greater financial resources to develop and market telephony and messaging services with more attractive features and more robust customer service. In addition, because of the other services our competitors provide, some of these service providers choose to offer cloud communications services as part of a bundle that includes other products, such as high speed Internet access and wireless telephone service. These bundled offers may enable our competitors to offer cloud communications services at prices with which we may not be able to compete or to offer functionality that integrates cloud communications services with their other offerings, both of which may be more desirable. As we continue the introduction of applications that integrate different forms of voice, video, and messaging services over multiple devices, we face competition from emerging competitors focused on similar integration, as well as from established alternative communication providers. Any of these competitive factors could make it more difficult for us to attract and retain customers, reduce our market share and revenues, or cause us to lower our prices or offer additional features that may result in additional costs without commensurate price increases. In order to compete with such service providers, we may have to reduce our prices, which would impair our profitability, or offer additional features that may cause us to incur additional costs without commensurate price increases. To the extent that these or other companies strengthen their offerings, we may have to reduce our prices, increase promotions, or offer additional features, which may adversely impact our revenues and profitability.

With the addition of NewVoiceMedia and our offering of cloud-based contact center services, we also compete with large legacy technology vendors that offer on-premise enterprise telephony and contact center systems and legacy on-premise software companies that come from a computer-telephony integration heritage. These companies are supplementing their traditional on-premise contact center systems with cloud offerings, either through acquisition or in-house development. Additionally, we compete with vendors that historically provided other contact center services and technologies and expanded to offer cloud contact center software. We also face competition from smaller contact center service providers with specialized contact center software offerings. Our actual and potential competitors may enjoy competitive advantages over us, including greater name recognition, longer operating histories, and larger marketing budgets, as well as greater financial or technical resources. With the introduction of new technologies and market entrants, we expect competition to intensify in the future.

In connection with our emphasis on the international long distance market for consumer customers, we face competition from low-cost international calling cards, digital calling cards and VoIP providers in addition to

traditional telephone companies, cable companies, and wireless companies. To the extent that these providers target marketing to the same ethnic segments that we target or strengthen their offerings to these segments, we may have to reduce our prices or increase promotions, which would impair our profitability, or offer additional features that may cause us to incur additional costs without commensurate price increase.

As a result of increasing competition, domestic and international telephony and messaging rates have generally decreased during the past few years, and we expect this trend to continue. Continued rate pressures or increasing cost to use our services could lessen or eliminate the pricing advantage that we maintain over certain competitors and cause customers or potential customers to select alternative providers or cause us to lower our prices, which would adversely impact our revenues and profitability.

Table of Contents

As the cloud communications services market evolves, and the convergence of voice, video, messaging, mobility and data networking technologies accelerates, we may face competition in the future from companies that do not currently compete in the cloud communications services market.

As the cloud communications services market evolves, combining voice, video, messaging and data networks, and information technology and communication applications, opportunity is created for new competitors to enter the cloud communications services market and offer competing products, including companies that currently compete in other sectors, companies that serve consumer rather than business customers, or companies which expand their market presence to include business communications. This new competition may take many forms, and may offer products and applications similar to ours. If these new competitors emerge, the cloud communications services market will become increasingly competitive and we may not be able to maintain or improve our market position. Our failure to do so could materially and adversely affect our business and results of operations.

We may face difficulties related to the acquisition or integration of businesses, which could harm our growth or operating results.

In August 2018, we acquired TokBox Inc. with the intention of integrating and adding video to our Business offerings in voice, SMS, and IP messaging. In October 2018, we completed the acquisition of NewVoiceMedia as a CCaaS provider, with the intention of combining our UCaaS and CPaaS solutions to provide an end-to-end communications experience for a company's employees and customers. In addition, we have made several acquisitions over the past several years to build our business services and continue to periodically review acquisition opportunities.

Acquisition and integration activities require substantial management time and resources. Acquisitions of existing businesses involve substantial risks, including the risk that we may not be able to integrate the operations, personnel, services, or technologies, the potential disruption of our ongoing businesses, the diversion of management attention, the maximization of financial and strategic opportunities, the difficulty in developing or maintaining controls and procedures, and the dilution to our existing stockholders from the issuance of additional shares of common stock. We may elect to acquire additional businesses or assets in the future. However, we cannot predict or guarantee that we will be able to identify suitable acquisition candidates or consummate any acquisition. As a result of these and other risks, we may not produce anticipated revenue, profitability, or synergies.

Acquisitions may require us to issue debt or equity securities, use our cash resources, incur debt or contingent liabilities, amortize intangibles, or write-off acquisition-related expenses. If we are unable to successfully integrate any acquired businesses or assets we may not receive the intended benefits of such acquisition. In addition, we cannot predict market reactions to any acquisitions we may make or to any failure to announce any future acquisitions.

Further, while we conduct due diligence in connection with acquisition and joint venture opportunities, there may be risks or liabilities that such due diligence efforts fail to discover, are not disclosed to us, or that we inadequately assess. The discovery of material liabilities associated with acquisitions or joint venture opportunities, economic risks faced by joint venture partners, or any failure of joint venture partners to perform their obligations could adversely affect our business, results of operations, and financial condition.

If we fail to adapt to rapid changes in the market for cloud communications services, then our products and services could become obsolete.

The market for our products and services is constantly and rapidly evolving as we and our competitors introduce new and enhanced products and services and react to changes in the cloud communications services industry and customer demands. We may not be able to develop or acquire new products and plans or product and plan enhancements that compete effectively with present or emerging cloud communications services technologies or differentiate our products and plans based on functionality and performance. In addition, we may not be able to establish or maintain strategic alliances that will permit enhancement opportunities or innovative distribution methods for our products and plans.

To address these issues, we are targeting revenue growth in large, existing markets, which require us to enhance our current products and plans, and develop new products and plans on a timely basis to keep pace with market needs and satisfy the increasingly sophisticated requirements of customers. If we are unable to attract users of these services our net revenues may fail to grow as we expect.

Cloud communications services are complex, and new products and plans and enhancements to existing products and plans can require long development and testing periods. Any delays in developing and releasing new or enhanced products and plans could cause us to lose revenue opportunities and customers. Any technical flaws in products we release could diminish the innovative impact of the products and have a negative effect on customer adoption and our reputation.

11 VONAGE ANNUAL REPORT 2018

Table of Contents

We also are subject to the risk of future disruptive technologies. New products based on new technologies or new industry standards could render our existing products obsolete and unmarketable. If new technologies develop that are able to deliver competing voice and messaging services at lower prices, better or more conveniently, it could have a material adverse effect on us.

The market for our CPaaS products and platform is relatively nascent and may not experience the growth that we anticipate.

The utilization of APIs to embed contextual, programmable real time communications into mobile apps, websites and business systems workflows, remains a relatively new market, and developers and organizations may not yet recognize the need for, or benefits of, our products and platform. It is important that we are able to educate developers, organizational leaders, and other potential customers regarding our products and platform in order to help grow the market and to realize our market share. If we fail to achieve the foregoing, the market for our products and platform or our share of that market could fail to grow significantly. If the CPaaS market, or our share of that market, does not experience significant growth, then our business, results of operations and financial condition could be adversely affected.

If we are unsuccessful at retaining customers or attracting new consumer or business customers we may experience a reduction in revenue or may be required to spend more money or alter our marketing approaches to grow our customer base.

Our rate of customer terminations for our UCaaS services could increase in the future if customers are not satisfied with the quality and reliability of our network, the value proposition of our products, and the ability of our customer service to meet the needs and expectations of our customers. For our CPaaS and CCaaS customers, our ability to grow revenue depends, in part, on our ability to maintain and grow usage of our platform by new and existing customers. If we are not able to increase customer usage of our products, our revenue may decline which would adversely impact our business, results of operations and financial condition. Our CPaaS customers are charged based on their usage of our products and generally our customers do not have long-term contractual financial commitments to us, therefore, usage rates may fluctuate at any time. In addition, our agreements with business customers typically provide for service level commitments. If we are unable to meet these commitments or if we suffer extended periods of downtime for our products or platform, our business, results of operations and financial condition could be adversely affected. Our ability to attract and retain customers for our consumer services are impacted by our pricing, brand awareness, customer service, network and system reliability and service features and capabilities. Competition from traditional telephone companies, cable companies, wireless companies, alternative communication providers, low-cost international calling cards, disruptive technologies, general economic conditions, and our ability to activate and register new customers on our network also influence churn rate. A material decline in the usage of our business and consumer products could cause us to spend significantly more on sales and marketing than we currently budget in order to maintain or increase revenue from customers, which could adversely affect our business, results of operations and financial condition.

The success of our CPaaS products depends in part on attracting new customers in a cost-effective manner. The failure to do so could materially and adversely affect our business.

The success of our business relies on our ability to attract new customers in a cost effective manner by using a variety of marketing channels. We use developer events and developer evangelism, search engine marketing and optimization, and other marketing efforts such as regional customer events, email campaigns, advertising and public relations events. These methods are prioritized depending on effectiveness and efficiency, and may be altered if costs increase dramatically or if the results do not meet expectations. Alternative, less expensive channels, may not be as effective as our preferred channels. Our continued success requires that we continue to attract new customers in a cost-effective manner. If we fail to do so, our revenues may decrease and our operating results would suffer.

Our success in the cloud communications market for our business services depends in part on developing and maintaining effective distribution channels. The failure to develop and maintain these channels could materially and adversely affect our business.

A portion of our business revenue is generated through our direct sales, or “field sales,” team. This channel consists of sales agents that market and sell our business services products to customers through direct, commonly

face-to-face interaction. Our continued success requires that we continue developing and maintaining a successful sales organization. If we fail to do so, or if our sales agents are not successful in their sales efforts, our sales may decrease and our operating results would suffer.

Table of Contents

A portion of our business revenue is generated through indirect channel sales. These channels consist of third-party resellers and value-added distributors that market and sell our business services products to customers. These channels may generate an increasing portion of our business revenue in the future. Generally, we do not have long-term contracts with these third-party resellers and value-added distributors, and the loss of or reduction in sales through these third parties could materially reduce our revenues. We also compete for preference amongst our current or potential resellers with our competitors. Our continued success requires that we continue developing and maintaining successful relationships with these third-party resellers and value-added distributors. If we fail to do so, or if our resellers are not successful in their sales efforts, our sales may decrease and our operating results would suffer. Security breaches and other cybersecurity or technological risks could compromise our information systems and network and expose us to liability, which could cause our business and reputation to suffer and which could have a material adverse effect on our business, financial condition, and operating results.

There are several inherent risks to engaging in a technology business, including our reliance on our data centers and networks, and the use and interconnectivity of those networks. A significant portion of our operations relies heavily on our ability to provide secure processing, storage and transmission of confidential and other sensitive data, including intellectual property, proprietary business information, and personally identifiable information of our customers and employees, in our data centers and on our networks. The secure processing, storage, and transmission of this information is critical to our operations and business strategy. As seen in our industry and others, these activities have been, and will continue to be, subject to continually evolving cybersecurity or other technological risks. Targeted attacks, such as advanced persistent threat is prevalent throughout the Internet and associated with the theft of intellectual property and state-sponsored espionage. Due to the nature of our business and reliance on the Internet, we are susceptible to this type of attack. In addition, physical security of devices located within our offices, and/or remote devices, pose cybersecurity and other technological risks that could negatively impact our business and reputation. We also operate Internet based, worldwide data, voice, video communications, and messaging services and electronic billing, which require the transmission of confidential and at times personal or sensitive customer or employee information over public networks that may or may not support end to end security. Despite our security measures, which include the development, operation and maintenance of systems and processes that are designed to protect consumer and employee information and prevent fraudulent credit card transactions and other security breaches, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to error, malfeasance or other disruptions by a current or former employee or third-party provider and our failure to mitigate such fraud or breaches may adversely affect our operating results. Any such breach could compromise our systems and network and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, liability under laws that protect the privacy of personal information, regulatory penalties, disruption to our operations, damage to our reputation, and a loss of confidence in our products and services, and our ability to keep personally identifiable information confidential, which could adversely affect our business.

We have been subject to cybersecurity incidents from external sources including “brute force” and distributed denial of service attacks, as well as attacks that introduce fraudulent VoIP traffic. Although these incidents have not had a material adverse effect financially or on our ability to provide services, this may not continue to be the case going forward. There can be no assurance that cybersecurity incidents will not occur in the future, potentially more frequently and/or on a more significant scale.

There can be no assurance that we are adequately protecting our information or that we will not experience future incidents. The expenses associated with protecting our information could reduce our operating margins. We maintain insurance intended to cover some of these risks, however, this insurance may not be sufficient to cover all of our losses from any future breaches of our systems. In addition, third parties with which we do business may also be sources of cybersecurity or other technological risks. We outsource certain functions, which results in the storage and processing of customer information by third parties. While we engage in certain actions to reduce the exposure resulting from outsourcing, unauthorized access, loss or destruction of data or other cybersecurity incidents could occur, resulting in similar costs and consequences as those discussed above.

We make available on our website our privacy policy, which describes how we collect, use, and disclose our customers' personal information. To the extent we expand our operations into new geographies, we may become subject to local data security, privacy, data retention, and disclosure laws and regulations. It may be difficult for us to comply with these laws and regulations if they were deemed to be applicable to us. In addition, risks related to cybercrime and fraud increase when establishing a global presence.

13 VONAGE ANNUAL REPORT 2018

Table of Contents

We are subject to Payment Card Industry, or PCI, data security standards, which require periodic audits by independent third parties to assess compliance. PCI data security standards are a comprehensive set of requirements for enhancing payment account data security that was developed by the PCI Security Standards Council including American Express, Discover Financial Services, JCB International, MasterCard Worldwide, and VISA Inc., to help facilitate the broad adoption of consistent data security measures. Failure to comply with the security requirements as identified in subsequent audits or rectify a security issue may result in fines. While we believe it is unusual, restrictions on accepting payment cards, including a complete restriction, may be imposed on companies that are not compliant. Further, the law relating to the liability of providers of online payment services is currently unsettled and states may enact their own rules with which we may not comply.

We rely on third-party providers to process and guarantee payments made by Vonage and its affiliates' subscribers, up to certain limits, and we may be unable to prevent our customers from fraudulently receiving goods and services. Our liability risk will increase if a larger fraction of our Vonage transactions involve fraudulent or disputed credit card transactions. Any costs we incur as a result of fraudulent or disputed transactions could harm our business. In addition, the functionality of our current billing system relies on certain third party vendors delivering services. If these vendors are unable or unwilling to provide services, we will not be able to charge for our services in a timely or scalable fashion, which could significantly decrease our revenue and have a material adverse effect on our business, financial condition and operating results.

Sales of our business services to medium-sized and enterprise customers involve significant risks which, if not managed effectively, could materially and adversely affect our business and results of operations.

As we continue to expand our sales efforts to medium-sized and larger businesses, we may incur higher selling expense and longer, more complex, sales cycles. Customers in this market segment may also require bespoke features and integration services, increasing the complexity and expense related to the sales and delivery process. As a result, we may devote greater sales and support to these customers, which may result in increased costs and a strain on our support resources. These factors could materially and adversely affect our results of operations and our overall ability to grow our customer base.

Our ability to provide our telephony service and manage related customer accounts is dependent upon third-party facilities, equipment, and systems, the failure of which could cause delays of or interruptions to our service, damage our reputation, cause us to lose customers, limit our growth, and affect our financial condition.

Our success depends on our ability to provide quality and reliable telephony service, which is in part dependent upon the proper functioning of facilities and equipment owned and operated by third parties and is, therefore, beyond our control. Unlike traditional wireline telephone service or wireless service, our telephony service typically requires our customers to have an operative broadband Internet connection and an electrical power supply, which are provided by the customer's Internet service provider and electric utility company, respectively, and not by us. The quality of some broadband Internet connections may be too poor for customers to use our telephony services properly. In addition, if there is any interruption to a customer's broadband Internet service or electrical power supply, that customer will be unable to make or receive calls, including emergency calls, using our telephony service.

We outsource several of our network functions to third-party providers. For example, we outsource the maintenance of our regional data connection points, which are the facilities at which our network interconnects with the public switched telephone network. If our third-party service providers fail to maintain these facilities properly, or fail to respond quickly to problems, our customers may experience service interruptions. Interruptions in our service caused by third-party facilities have in the past caused and may in the future cause us to lose customers or cause us to offer substantial customer credits, which could adversely affect our revenue and profitability. If interruptions adversely affect the perceived reliability of our service, we may have difficulty attracting new customers, and our brand, reputation, and growth will be negatively impacted.

There can be no guarantee that these third party providers will be able or willing to supply services to us in the future on commercially reasonable terms, or that we will be able to engage alternative or additional providers. Our ability to provide our services may be impacted during any transition, which could have an adverse effect on our business, financial condition or results of operations.

We rely on third-party vendors that may be difficult to replace or may not perform adequately.

For our CPaaS customers, we rely on IBM Softlayer to provide substantially all of the cloud infrastructure that hosts our CPaaS products and platform. Our CPaaS customers require uninterrupted performance of this platform and we are therefore vulnerable to service interruptions third-party data center providers, such as IBM Softlayer and Amazon Web Services, or AWS. We may experience interruptions, delays and outages in third-party service and availability due to a variety of factors, including infrastructure changes, human or software errors, website hosting disruptions and capacity constraints caused by technical failures, natural disasters, fraud or security attacks. To the extent that we do not effectively address interruptions, delays and outages in Softlayer's service and availability or capacity constraints, our business, results of operations and financial condition may be adversely affected.

Table of Contents

In some cases we rely on purchased or leased hardware and software licensed from third parties in order to provide our UCaaS services. For example, Broadsoft, Inc. provides us with infrastructure, call termination and origination services, and other hardware and software in connection with our Vonage Enterprise offerings. We also integrate third-party licensed software components into our platform. This hardware and software may not continue to be available on commercially reasonable terms or pricing or may fail to continue to be updated to remain competitive. The loss of the right to use this third party hardware or software may increase our expenses or impact the provisioning of our services. The failure of this third party hardware or software could materially impact the performance of our UCaaS services and may cause material harm to our business or results of operations.

We outsource some of our cloud infrastructure to AWS which hosts certain of our products and platform. Customers of our products need to be able to access our platform at any time, without interruption or degradation of performance. AWS runs its own platform that we access, and we are, therefore, vulnerable to service interruptions at AWS. To the extent that we do not effectively address capacity constraints, either through AWS or alternative providers of cloud infrastructure, our business, results of operations and financial condition may be adversely affected. In addition, any changes in service levels from AWS may adversely affect our ability to meet our customers' requirements.

Flaws in our technology and systems or our failure to adapt our systems to any new Internet Protocol could cause delays or interruptions of service, which could damage our reputation, cause us to lose customers, and limit our growth.

Our service may be disrupted by problems with our technology and systems that we provide to customers, software or facilities and overloading of our network. As we attract new customers, we expect increased call volume that we need to manage to avoid network interruptions. Interruptions have caused and may in the future cause us to lose customers and offer substantial customer credits, which could adversely affect our revenue and profitability. Network interruptions have also impaired our ability at times to sign-up new customers and the ability of customers to manage their accounts. If service interruptions or other outages adversely affect the perceived reliability of our service or customer service, we may have difficulty attracting and retaining customers and our brand reputation and growth may suffer.

In addition, we utilize third-party Internet-based or "cloud" computing services in connection with some of our business operations. Any disruption to the Internet or to our third-party Web hosting or cloud computing providers, including technological or business-related disruptions, could adversely impact the experience of our customers and have adverse effects on our operations. In addition, fires, floods, earthquakes, power losses, telecommunications failures, and similar "Acts of God" could damage these systems and hardware or cause them to fail completely. While we do maintain redundant systems consistent with industry best practices certain events could result in downtime for our operations and could adversely affect our business.

The storage, processing, and use of personal information and related data subjects us to evolving governmental laws and regulation, commercial standards, contractual obligations, and other legal obligations related to consumer and data privacy, which may have a material impact on our costs, use of our products and services, or expose us to increased liability.

Federal, state, local and foreign laws and regulations, commercial obligations and industry standards, each provide for obligations and restrictions with respect to data privacy and security, as well as the collection, storage, retention, use, processing, transmission, sharing, disclosure and protection of personal information and other customer data. The evolving nature of these obligations and restrictions dictates that differing interpretations, inconsistency or conflicts among countries or rules, and general uncertainty impact the application to our business.

These obligations and restrictions may limit our ability to collect, store, process, use, transmit and share data with our customers, employees, and third party providers, which in turn could limit the ability of our customers to collect, store, retain, protect, use, process, transmit, share and disclose data with others through our products and services. Compliance with, and other burdens imposed by, such obligations and restrictions could increase the cost of our operations and impact our ability to market our products and services through effective segmentation.

An example of data privacy and security obligations and restrictions include the European Union General Data Protection Regulation, GDPR. The GDPR was adopted in April 2016 and comprehensively regulates the processing of personal data of any individual residing in the EU. The GDPR effectively requires any company processing data of

EU individuals to develop a comprehensive privacy program. The GDPR becomes effective on May 25, 2018. In addition, in January 2017, the European Commission introduced a new proposed ePrivacy regulation that would restrict communications service provider's ability to use metadata and content from communications services. In order to become effective, the proposal needs to be adopted by the European Council and European Parliament. In October 2016, the Federal Communications Commission adopted a new privacy rules for the U.S. communications industry. These rules greatly extended the scope of FCC privacy regulation. Numerous parties have filed petitions for reconsideration at the FCC on the new privacy rules.

15 VONAGE ANNUAL REPORT 2018

Table of Contents

Failure to comply with obligations and restrictions related to applicable data protection laws, regulations, standards, and codes of conduct, as well as our own posted privacy policies and contractual commitments could subject us to lawsuits, fines, criminal penalties, statutory damages, consent decrees, injunctions, adverse publicity, loss of user confidence in our services, and loss of users, which could materially harm our business. Additionally, third-party contractors may have access to customer or employee data. If these or other third-party vendors violate obligations and restrictions related to applicable data protection laws or our policies, such violations may also put our customers' or employees' information at risk and could in turn have a material and adverse effect on our business.

Our Business segment is growing rapidly, and any inability to scale our business and grow efficiently could materially and adversely harm our business and results of operations.

As our Business segment expands, we will need to continue to improve our application architecture, integrate our products and applications across our technology platforms, integrate with third-party systems, and maintain infrastructure performance. We expect the number of users, the amount of data transferred and processed, the number of locations where our service is being used, and the volume of communications over our networks to continue to expand. To address this growth, we will need to scale our systems and customer services organization. Our ability to execute on these initiatives may impact system and network performance, customer satisfaction, and ultimately, sales and revenue. These efforts may also divert management resources. These factors may materially and adversely harm our business and results of operations.

We depend on third-party vendors to supply, configure and deliver the phones that we sell. Any delays in delivery, or failure to operate effectively with our own servers and systems, may result in delay or failure of our services, which could harm our business, financial condition and results of operations.

We rely on Yealink Inc. and Polycom, Inc. to provide, and a single fulfillment agent to configure and deliver, the phones that we offer for sale to our customers that use our UCaaS services. If these third parties are unable to deliver phones of acceptable quality or quantity, or in a timely manner, we may be forced to offer replacements at a higher cost than what is currently contracted. In addition, these phones must interoperate with our servers and systems. If either of our providers changes the operation of their phones, we may be required to engage in development efforts to ensure that the new phones interoperate with our system. The failure of our vendor-supplied phones to operate effectively with our system could impact our customers' ability to use our services and could cause customers to cancel our services, which may cause material harm to our business or results of operations.

We market our products and services to small and medium-sized businesses, which may be disproportionately impacted by fluctuations in economic conditions.

We market our products to small and medium-sized businesses. Customers in this market may be affected by economic downturns to a greater extent, and may have more limited financial resources, than larger or more established businesses. If customers in our Business markets experience financial hardship as a result of a weak economy, the demand for our services could be materially and adversely affected.

Significant foreign currency exchange rate fluctuations could adversely affect our financial results.

Because our consolidated financial statements are presented in U.S. dollars, increases or decreases in the value of the U.S. dollar relative to other currencies in which we transact business could materially adversely affect our financial results. For example, Nexmo collects revenues in Euros, and accordingly the strengthening of the U.S. dollar relative to the Euro adversely affects our revenue and operating results presented in U.S. dollars. In addition, on June 23, 2016, the United Kingdom held a referendum in which a majority of voters approved an exit from the European Union, or E.U., commonly referred to as "Brexit." As a result of the referendum, the British government is undergoing negotiations of the terms of the U.K.'s withdrawal from the E.U. Brexit has continued to cause significant volatility in global stock markets and currency exchange rate fluctuations that resulted in the strengthening of the U.S. dollar against foreign currencies in which we conduct business, such as the British Pound, Euro and other currencies. Such strengthening of the U.S. dollar relative to other currencies may adversely affect our revenue and operating results. In addition, changes to U.K. border and immigration policy could likewise occur as a result of Brexit, affecting our U.K. operation's ability to recruit and retain employees from outside the U.K.

Table of Contents

If we fail to protect unique aspects of our internally developed systems, technology, products, and software and our trademarks, we may become involved in costly litigation or our business or brand may be harmed.

Our ability to compete effectively is dependent in large part upon the maintenance and protection of systems and software that we have developed internally based on open standards. While we own over 200 issued U.S. patents as well as a number of foreign patents and over 40 pending U.S. patent applications along with a number of foreign patent applications, we cannot patent much of the technology that is important to our business. Our pending patent applications may not be granted. Any issued patent that we own may be challenged, narrowed, invalidated, or circumvented. To date, we have relied on patent, copyright and trade secret laws, as well as confidentiality procedures and licensing arrangements, to establish and protect our rights to this technology. We typically enter into confidentiality agreements with our employees, consultants, customers, partners, and vendors in an effort to control access to and distribution of technology, software, documentation, and other information. Despite these precautions, it may be possible for a third party to copy or otherwise obtain and use this technology without authorization. Policing unauthorized use of this technology is difficult. The steps we take may not prevent misappropriation of the technology we rely on. In addition, effective protection may be unavailable or limited in some jurisdictions outside the United States, Canada, and the United Kingdom. Litigation may be necessary in the future to enforce or protect our rights or to determine the validity and scope of the rights of others. That litigation could cause us to incur substantial costs and divert resources away from our daily business, which in turn could materially adversely affect our business.

The unlicensed use of our brands by third parties could harm our reputation, cause confusion among our customers, and impair our ability to market our services. To that end, we have registered numerous trademarks and service marks and have applied for registration of our trademarks and service marks in the United States and abroad to establish and protect our brand names as part of our intellectual property strategy. If our applications receive objections or are successfully opposed by third parties, it may be difficult for us to prevent third parties from using our brand without our permission. Moreover, successful opposition to our applications might encourage third parties to make additional oppositions or commence trademark infringement proceedings against us, which could be costly and time consuming to defend against. If we decide to take limited or no action to protect our trademarks, our trademark rights may be diluted and subject to challenge or invalidation, which could materially and adversely affect our brand in the marketplace.

Third parties may be capable of fraudulently using our name to obtain access to customer accounts and other personal information, use our services to commit fraud or steal our services or equipment, which could damage our reputation, limit our growth, and cause us to incur additional expenses.

Our customers have been subject to “phishing,” which occurs when a third party calls or sends an email or pop-up message to a customer that claims to be from a business or organization that provides services to the customer. The purpose of the inquiry is typically to encourage the customer to visit a bogus website designed to look like a website operated by the legitimate business or organization or provide information to the operator. At the bogus website, the operator attempts to trick the customer into divulging customer account or other personal information such as credit card information or to introduce viruses through “Trojan horse” programs to the customers’ computers. This has resulted in identity theft from our customers and the unauthorized use of Vonage services. Third parties have also used our communications services to commit fraud. Although we have engaged a third party to assist in the shutdown of purported phishing sites, if we are unable to detect and prevent “phishing,” use of our services for fraud, and similar activities, our brand reputation and growth may suffer and we may incur additional costs, including costs to increase security, or be required to credit significant amounts to customers.

Third parties also have used our communications services and obtained delivery of our equipment without paying, including by submitting fraudulent credit card information. This has resulted in our incurring the cost of providing the services, including incurring call termination fees, or providing the equipment without any corresponding revenues. We have implemented anti-fraud procedures in order to limit the expenses resulting from theft of service or equipment. If our procedures are not effective, theft of service or equipment could significantly increase our expenses and negatively impact our profitability.

The debt agreements governing our financing contain restrictions that may limit our flexibility in operating our business or executing on our acquisition strategy.

On July 31, 2018, we replaced our 2016 Credit Facility previously consisting of a \$125 million senior secured term loan and a \$325 million revolving credit facility with the 2018 Credit Facility consisting of a \$100 million senior secured term loan and a \$500 million revolving facility. The 2018 Credit Facility contains customary representations and warranties and affirmative covenants that limit our ability and/or the ability of certain of our subsidiaries to engage in specified types of transactions. These covenants and other restrictions may under certain circumstances limit, but not necessarily preclude, our and certain of our subsidiaries' ability to, among other things:

- consolidate or merge;
- create liens;
- incur additional indebtedness;

Table of Contents

dispose of assets;
consummate acquisitions;
make investments; or
pay dividends and other distributions.

Under the 2018 Credit Facility, we are required to comply with financial covenants, including the following financial covenants:

- specified maximum consolidated leverage ratio;
- specified minimum consolidated fixed coverage charge ratio, minimum cash position and maximum capital expenditures.

Our ability to comply with such financial and other covenants may be affected by events beyond our control, so we may not be able to comply with these covenants. A breach of any such covenant could result in a default under the 2018 Credit Facility. In that case, the lenders could elect to declare due and payable immediately all amounts due under the 2018 Credit Facility, including principal and accrued interest.

If we require additional capital, we may not be able to obtain additional financing on favorable terms or at all.

We may need to pursue additional financing to respond to new competitive pressures, pay extraordinary expenses such as litigation settlements or judgments or fund growth, including through acquisitions. Because of our past significant losses and our limited tangible assets, we do not fit traditional credit lending criteria, which, in particular, could make it difficult for us to obtain loans or to access the capital markets. In addition, the credit documentation for our recent financing contains affirmative and negative covenants that affect, and in many respects may significantly limit or prohibit, among other things, our and certain of our subsidiaries' ability to incur, refinance or modify indebtedness and create liens. Our credit card processors have the ability to impose significant holdbacks in certain circumstances. The reinstatement of such holdbacks likely would have a material adverse effect on our liquidity. Under our credit card processing agreements with our Visa, MasterCard, American Express, and Discover credit card processors, the credit card processor has the right, in certain circumstances, including adverse events affecting our business, to impose a holdback of our advanced payments purchased using a Visa, MasterCard, American Express, or Discover credit card, as applicable, or demand additional reserves or other security. If circumstances were to occur that would allow any of these processors to reinstate a holdback, the negative impact on our liquidity likely would be significant. In addition, our Visa and MasterCard credit card processing agreement may be terminated by the credit card processor at its discretion if we are deemed to be financially insecure. As a significant portion of payments to us are made through Visa and MasterCard credit cards, if the credit card processor does not assist in transitioning our business to another credit card processor, the negative impact on our liquidity likely would be significant. There were no cash reserves and cash-collateralized letters of credit with any credit card processors as of December 31, 2018.

We may be subject to damaging and disruptive intellectual property disputes that could materially and adversely affect our business, results of operations, and financial condition, as well as the continued viability of our company.

There has been substantial litigation in the cloud communications, UCaaS, VoIP, telecommunications, hosted services, and related industries regarding intellectual property rights and, given the rapid technological change in our industry, expansion into new technological and geographical markets, and our continual development of new products and services, we and/or our commercial partners may be subject to infringement claims from time to time. For example, we may be unaware of filed patent applications and issued patents that could include claims that might be interpreted to cover our products and services. We have been subject to patent infringement claims in the past, are currently named as a defendant in several proceedings that relate to alleged patent infringement, and from time to time we receive letters from third parties offering an opportunity for us to obtain licenses to patents that may be relevant to our business or alleging that our services infringe upon third party patents or other intellectual property. We may seek to obtain rights to third party technology in the future, but may not be able to agree upon commercially reasonable terms or at all with respect to obtaining such rights. If we are unable to extend existing licenses or are unable to obtain rights to other technology that may be commercially advantageous or necessary for our product and service offerings, we may experience a decrease in the quality of our products or services or we may lose the ability to provide our

products and services on a non-infringing basis until alternative technology or suitable alternative products and services can be developed, identified, obtained either through acquisition, license or other grants of rights, and integrated.

Parties making claims of infringement may be able to obtain injunctive or other equitable relief that could effectively block our ability to provide our services and could cause us to pay substantial royalties, licensing fees, damages or settlement fees. Our agreements with certain customers, vendors, or partners may obligate us to defend or indemnify them in connection with such claims of infringement, further increasing our costs of defense and potential liability. Although we generally limit our contractual liability regarding such obligations, we may incur significant liability with respect to them, and disputes with our customers, vendors or partners over such obligations may have an adverse relationship on our relations with those entities. The defense of

Table of Contents

any lawsuit could divert management's efforts and attention from ordinary business operations and result in time-consuming and expensive litigation, regardless of the merits of such claims. These outcomes may:

- result in the loss of a substantial number of existing customers or prohibit the acquisition of new customers;
- cause us to accelerate expenditures to preserve existing revenues;
- cause existing or new vendors to require prepayments or letters of credit;
- cause our credit card processors to demand reserves or letters of credit or make holdbacks;
- result in substantial employee layoffs;
- materially and adversely affect our brand in the marketplace and cause a substantial loss of goodwill;
- cause our stock price to decline significantly;
- materially and adversely affect our liquidity, including our ability to pay debts and other obligations as they become due;
- cause us to change our business methods or services;
- require us to cease certain business operations or offering certain products and services; and
- lead to our bankruptcy or liquidation.

We rely on third parties to provide a portion of our customer service representatives, provide aspects of our E-911 service, which differs from traditional 911 service, and initiate local number portability for our customers. If these third parties do not provide our customers with reliable, high-quality service, our reputation will be harmed and we may lose customers.

We offer our customers support 24 hours a day, seven days a week through both our comprehensive online account management website and our toll free number. Our customer support is currently provided via United States based employees as well as third party partners located in the United States, Philippines, Costa Rica, Czechoslovakia, Mexico, Poland and India. We can offer support in English, Spanish, and French Canadian. Our third-party providers generally represent us without identifying themselves as independent parties. The ability to support our customers may be disrupted by natural disasters, inclement weather conditions, civil unrest, and other adverse events in the locations where our customer support is provided.

We also contract for services required to provide E-911 services including assistance in routing emergency calls, terminating E-911 calls, operating a national call center that is available 24 hours a day, seven days a week to receive certain emergency calls, and maintaining PSAP databases for the purpose of deploying and operating E-911 services. Interruptions in service from our vendor could cause failures in our customers' access to E-911 services and expose us to liability and damage our reputation.

We also have agreements with companies that initiate our local number portability, which allow new customers to retain their existing telephone numbers when subscribing to our services.

If any of these third parties do not provide reliable, high-quality service, our reputation and our business will be harmed. In addition, industry consolidation among providers of services to us may impact our ability to obtain these services or increase our expense for these services.

Our services are subject to regulation in the United States, United Kingdom, and Canada, and in additional countries as we expand globally. Future legislative, regulatory or judicial actions could adversely affect our business and expose us to liability and limit our growth potential.

Our business has developed in a relatively lightly regulated environment. However, the United States, United Kingdom, and Canada have applied some traditional telephone company regulations to VoIP and continue to evaluate how VoIP should be regulated, as are other countries as we expand globally. The effects of future regulatory developments are uncertain. At the federal level in the U.S., the Federal Communications Commission has imposed certain telecommunications regulations on VoIP services including, but not limited to:

- Requirements to provide E-911 service;
- Communications Assistance for Law Enforcement Act obligations;
- Obligation to support Universal Service;
- Customer Proprietary Network Information, or CPNI, requirements;

Disability access obligations;

Local Number Portability requirements; and

- Consumer protection, including protection from unwanted telemarketing and other calls.

As we expand globally, these types of regulations are likely to be similarly enacted and enforced by local regulatory authorities.

Table of Contents

In general, the focus of interconnected VoIP telecommunications regulation is at the federal level. On November 12, 2004, the FCC issued a declaratory ruling providing that our service is subject to federal regulation and preempted the Minnesota Public Utilities Commission from imposing certain of its regulations on us. While this ruling does not exempt us from all state oversight of our service, it effectively prevents state telecommunications regulators from imposing certain burdensome and inconsistent market entry requirements and certain other state utility rules and regulations on our service. Despite this, Vonage may be subject to state and local regulatory requirements including:

• Payment of state and local E-911 fees; and
• State Universal Service support obligations.

In Canada, the Canadian Radio-Television and Telecommunications Commission, or CRTC, regulates VOIP Service. In the UK, the Office of Communications, or OFCOM, regulates voice services. Other regulatory bodies in various jurisdictions regulate services Vonage offers its customers. These regulated services are similar to those regulated in the United States discussed above. Future legislative, judicial or other regulatory actions could have a negative effect on our business. If we become subject to the rules and regulations applicable to telecommunications providers in individual states or other foreign jurisdictions, we may incur significant litigation and compliance costs, and we may have to restructure our service offerings, exit certain markets, or raise the price of our services, any of which could cause our services to be less attractive to customers. In addition, future regulatory developments could increase our cost of doing business and limit our growth.

The regulatory framework for CPaaS services continues to develop, as many existing regulations may not fully contemplate this type of service or business model; future legislative, regulatory or judicial actions impacting CPaaS could adversely affect our business and financial results of operations, increase the cost and complexity of compliance, and expose us to liability.

In many countries where we offer CPaaS products, it is not clear how CPaaS fits into the communications regulatory framework. Regulators could claim that our CPaaS products are subject to licensing and substantive communications regulatory requirements, could modify their regulations to explicitly expand the obligations to which CPaaS products are subject, or could increase the level of scrutiny and enforcement they apply.

Future legislative, judicial or other regulatory actions could have a negative effect on our business. If our CPaaS products become subject to additional rules and regulations applicable to technology or communications providers, we may incur significant litigation and compliance costs. We may also experience interruptions or limitations on the delivery and use of our CPaaS products on our platform, or incur significant losses based on the timing of customer payments and any difficulty in collecting accounts receivable from CPaaS customers. Any decreased use of our products and services or limitation on our ability to collect payments from our customers could adversely affect our business, results of operations, and financial condition.

We may also have to restructure or discontinue certain of our service offerings, exit certain markets, or raise the price of our services in response to regulatory changes or actions, any of which could cause our services to be less attractive to customers. In addition, future regulatory developments could increase our cost or complexity of doing business, limit our growth, or impact our results of operations.

Customer misuse of our CPaaS products in violation of the Telephone Consumer Protection Act may cause us to face litigation risk.

The Telephone Consumer Protection Act of 1991 restricts telemarketing and the use of automatic SMS text messages without proper consent. The scope and interpretation of the laws that are or may be applicable to the delivery of text messages are continuously evolving and developing. If we do not comply with these laws or regulations or if we become liable under these laws or regulations due to the failure of our customers to comply with these laws by obtaining proper consent, we could face liability.

Our business is subject to country-specific governmental regulation and related actions and taxes that may increase our costs or impact our product offerings.

In many countries, we are not a regulated telecommunications business subject primarily to regulations surrounding provision of emergency services and payment into universal service type funds. In some countries, providing VoIP

services is or may be illegal. We may need to change our service offerings to avoid regulation as a telecommunications business in a jurisdiction, or if we are treated as a fully regulated telecommunications business, we may be required to incur additional expenses. In addition, if governments believe that we are providing unauthorized service in their countries, they may pursue fines, penalties, or other governmental action, including criminal action, that may damage our brand and reputation. If we use a local partner to provide services in a country and the local partner does not comply with applicable governmental regulations, we may face additional regulation, liabilities, penalties or other governmental action, and our brand and reputation may be harmed. In addition to the risk of being directly subjected to regulation, decisions by foreign regulators to increase the charge for terminating international calls into their countries could cause increased costs, impact margin, and impact churn. These regulatory actions may be taken without notice and cause us to react quickly to changing market conditions. These efforts could divert

Table of Contents

management's efforts and attention from ordinary business operations which could materially and adversely affect our results of operations.

As a United States-based company, any foreign subsidiary or joint venture that we use for international operations may be subject to a variety of governmental regulations in the countries where we market our products, including tariffs, taxes and employment regulations different from those in the U.S. For example, distributions of earnings and other payments, including interest, received from our foreign subsidiaries may be subject to withholding taxes imposed by the jurisdiction in which such entities are formed or operating, which will reduce the amount of after-tax cash we can receive. In general, as a United States corporation, we may claim a foreign tax credit against our federal income tax expense for such foreign withholding taxes and for foreign income taxes paid directly by foreign corporate entities in which we own 10% or more of the voting stock. The ability to claim such foreign tax credits and to utilize net foreign losses is, however, subject to numerous limitations, and we may incur incremental tax costs as a result of these limitations or because we are not currently in a tax-paying position in the United States. We may also be required to include in our income for United States federal income tax purposes our proportionate share of certain earnings of those foreign subsidiaries that are classified as "controlled foreign corporations" without regard to whether distributions have been actually received from such subsidiaries.

Our CPaaS offerings may be subject to liability for historic and future sales, use and similar taxes, that may increase our costs or impact our product offerings.

In some United States tax jurisdictions in which we conduct operations, sales and use and telecommunications taxes could apply to our CPaaS products. Historically, we have not billed or collected these taxes from our CPaaS customers. It is possible that some tax jurisdictions may assert that such taxes are applicable to our CPaaS products, which could result in tax assessments, penalties and interest, and we may be required to collect such taxes on our CPaaS customers in the future. Such tax assessments, penalties and interest or future requirements may adversely affect our business, results of operations and financial condition. To the extent that we decide to collect such taxes from our CPaaS customers in the future, we may have some customers that question the incremental tax charges and some may seek to negotiate lower pricing from us, which could adversely affect our business, results of operations and financial condition.

The global scope of our operations may subject us to potentially adverse tax consequences.

We generally report our taxable income in various jurisdictions worldwide based upon our business operations in those jurisdictions. Intercompany relationships are subject to complex transfer pricing regulations in various jurisdictions. If revenue and taxing authorities disagree with positions we have taken we could be required to pay additional taxes, interest and penalties, which could result in one-time tax charges, higher effective tax rates, reduced cash flows and lower overall profitability of our operations. In addition, changes in tax laws of countries in which we do business could change on a prospective or retroactive basis, and any such changes could increase our liabilities for taxes, interest and penalties, and therefore could harm our business, cash flows, results of operations and financial position.

We may be exposed to liabilities under anti-corruption, export control and economic sanction regulations, and similar laws and regulations, and any determination that we violated any of these laws or regulations could have a material adverse effect on our business.

We are subject to the Foreign Corrupt Practice Act, or FCPA, the UK Bribery Act and other laws that prohibit improper payments or offers of payments to foreign governments and their officials, political parties, and/or private parties by persons and entities for the purpose of obtaining or retaining business. We have operations, agreements with third parties, and make sales internationally. In addition, we plan to expand our international operations through potential joint ventures with local partners. Our international activities create the risk of unauthorized payments or offers of payments by one of our employees, consultants, partners, sales agents or distributors, even though these parties are not always subject to our control. It is our policy to prohibit these practices by our employees, consultants, partners, sales agents or distributors, however, our existing safeguards and any future improvements may prove to be less than effective, and our employees, consultants, partners, sales agents or distributors may engage in conduct for which we might be held responsible. Violations of the FCPA, the UK Bribery Act or other laws may result in severe criminal or civil sanctions, and we may be subject to other liabilities, which could negatively affect our business,

operating results, and financial condition.

Our products and services may be subject to export control and economic sanctions regulations, including the U.S. Export Administration Regulations, U.S. Customs regulations and various economic and trade sanctions regulations administered by the U.S. Treasury Department's Office of Foreign Assets Controls. Our products and services must be offered and sold in compliance with these laws and regulations. If we do not comply with these laws or regulations or if we become liable under these laws or regulations due to the failure of our customers to comply with these laws by obtaining proper consent, we could face liability. In addition, changes in our products or services, changes in applicable regulations, or change in the target of such regulations, could also result in decreased use of our products and services, or in our decreased ability to sell our products or provide our services to existing or prospective customers with international operations. Any decreased use of our products and services or limitation

21 VONAGE ANNUAL REPORT 2018

Table of Contents

on our ability to export our products and provide our services could adversely affect our business, results of operations and financial condition.

The success of our business relies on customers' continued and unimpeded access to broadband service. Providers of broadband services may be able to block our services or charge their customers more for also using our services, which could adversely affect our revenue and growth.

Our customers must have broadband access to the Internet in order to use our service. Some providers of broadband access, including outside of the United States, may take measures that affect their customers' ability to use our service, such as degrading the quality of the data packets we transmit over their lines, giving those packets low priority, giving other packets higher priority than ours, blocking our packets entirely or attempting to charge their customers more for also using our services.

In the United States, there continues to be some uncertainty regarding whether suppliers of broadband Internet access have a legal obligation to allow their customers to access and use our service without interference. On February 26, 2015, the FCC adopted neutrality rules that would protect against interference by suppliers of broadband Internet access. On December 14, 2017, the FCC voted to reverse its 2015 neutrality rules. The FCC's recent reversal of its stance on net neutrality may have a negative long term impact on businesses such as ours who rely on the Internet to create and deliver products and services. Challenges to the FCC's ruling are underway, with public interest groups, states, local municipalities and companies seeking redress in the courts and/or through legislation.

We have incurred cumulative losses since our inception and may not achieve consistent profitability in the future. We incurred a net income attributable to Vonage of \$35,728 for the year ended December 31, 2018 and our accumulated deficit is \$611,985 from our inception through December 31, 2018. Although we have achieved profitability in prior years and believe we will achieve consistent profitability in the future, we ultimately may not be successful. We believe that our ability to achieve consistent profitability will depend, among other factors, on our ability to continue to achieve and maintain substantive operational improvements and structural cost reductions while maintaining and growing our net revenues. In addition, certain of the costs of our business are not within our control and may increase. For example, we and other telecommunications providers are subject to regulatory termination charges imposed by regulatory authorities in countries to which customers make calls.

We may be unable to fully realize the benefits of our net operating loss, or NOL, carry forwards if an ownership change occurs.

If we were to experience a "change in ownership" under Section 382 of the Internal Revenue Code, or Section 382, the NOL carryforward limitations under Section 382 would impose an annual limit on the amount of the future taxable income that may be offset by our NOL generated prior to the change in ownership. If a change in ownership were to occur, we may be unable to use a significant portion of our NOL to offset future taxable income. In general, a change in ownership occurs when, as of any testing date, there has been a cumulative change in the stock ownership of the corporation held by 5% stockholders of more than 50 percentage points over an applicable three-year period. For these purposes, a 5% stockholder is generally any person or group of persons that at any time during an applicable three-year period has owned 5% or more of our outstanding common stock. In addition, persons who own less than 5% of the outstanding common stock are grouped together as one or more "public group" 5% stockholders. Under Section 382, stock ownership would be determined under complex attribution rules and generally includes shares held directly, indirectly through intervening entities, and constructively by certain related parties and certain unrelated parties acting as a group. We have implemented a Tax Benefits Preservation Plan intended to provide a meaningful deterrent effect against acquisitions that could cause a change in ownership, however this is not a guarantee against such a change in ownership.

Our certificate of incorporation and bylaws and the agreements governing our indebtedness contain provisions that could delay or discourage a takeover attempt, which could prevent the completion of a transaction in which our stockholders could receive a substantial premium over the then-current market price for their shares.

Certain provisions of our Restated Certificate of Incorporation and our Amended and Restated By-laws may make it more difficult for, or have the effect of discouraging, a third party from acquiring control of us or changing our board of directors and management. These provisions:

permit our board of directors to issue additional shares of common stock and preferred stock and to establish the number of shares, series designation, voting powers if any, preferences, other special rights, qualifications, limitations or restrictions of any series of preferred stock;

limit the ability of stockholders to amend our Restated Certificate of incorporation and Amended and Restated By-laws, including supermajority requirements;

allow only our board of directors, Chairman of the board of directors or Chief Executive Officer to call special meetings of our stockholders;

eliminate the ability of stockholders to act by written consent;

require advance notice for stockholder proposals and director nominations; and

limit the removal of directors and the filling of director vacancies.

Table of Contents

In addition, our Restated Certificate of Incorporation and Amended and Restated By-laws were amended on June 13, 2018 to declassify our Board of Directors. The declassification of the Board will be phased in commencing with the 2019 annual meeting of stockholders and will result in the Board being fully declassified (and all Board members standing for annual elections) commencing with the 2021 annual meeting of stockholders. A classified structure will therefore remain in place during the phase-in period.

Such provisions could have the effect of depriving stockholders of an opportunity to sell their shares at a premium over prevailing market prices. Any delay or prevention of, or significant payments required to be made upon, a change of control transaction or changes in our board of directors or management could deter potential acquirors or prevent the completion of a transaction in which our stockholders could receive a substantial premium over the then-current market price for their shares.

ITEM 1B. Unresolved Staff Comments

None.

ITEM 2. Properties

Our headquarters are located in Holmdel, New Jersey. We also lease office, building space and research and development sites around the world, primarily in the United States, the United Kingdom, Israel, and Poland. We sublease a portion of office space in our Holmdel, NJ location to a third party. We believe that the facilities that we occupy are in good condition, adequate for our current needs and do not anticipate leasing any material additional space.

PART II

ITEM 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Price Range of Common Stock

Our common stock has been listed on the New York Stock Exchange under the ticker symbol “VG” since May 24, 2006.

Holdings

At January 31, 2019, we had approximately 506 stockholders of record. This number does not include beneficial owners whose shares are held in street name.

Dividends

We have never paid cash dividends on our common stock, and we do not anticipate paying any cash dividends on our common stock for at least the next 12 months. We intend to retain all of our earnings, if any, for general corporate purposes, and, if appropriate, to finance the expansion of our business.

Stock Performance Graph

The graphs below and related information shall not be deemed “soliciting material” or “filed” with the Securities and Exchange Commission or otherwise subject to the liabilities of Section 18 of the Securities Exchange Act of 1934, or the Exchange Act, nor shall such information be deemed incorporated by reference into any filing under the Securities Act of 1933, or the Securities Act, or the Exchange Act, except to the extent we specifically request that such information be treated as soliciting material or specifically incorporate such information by reference into a document filed under the Securities Act or the Exchange Act.

The graph below compares the cumulative total return of our common stock between December 31, 2013 and December 31, 2018, with the cumulative total return of (1) NASDAQ Telecommunications, (2) Russell 2000 Index, and (3) NASDAQ Computer. This graph assumes the investment of \$100 on December 31, 2013 in our common stock, NASDAQ Telecommunications, Russell 2000 Index, and NASDAQ Computer, and assumes the reinvestment of dividends, if any.

COMPARISON OF THE CUMULATIVE TOTAL RETURN ON COMMON STOCK BET

Table of Contents

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion together with "Selected Financial Data" and our consolidated financial statements and the related notes included elsewhere in this Annual Report on Form 10-K. This discussion contains forward-looking statements, which involve risks and uncertainties. Our actual results may differ materially from those we currently anticipate as a result of many factors, including the factors we describe under "Item 1A—Risk Factors," and elsewhere in this Annual Report on Form 10-K.

OVERVIEW

We are a leading provider of cloud communications services for businesses and consumers. Our business services transform the way people work and businesses operate through a portfolio of communications solutions that enable internal collaboration among employees, while also keeping companies closely connected with their customers, across any mode of communication, on any cloud-connected device. Vonage customers can choose among or combine two separate service delivery options to suit their specific cloud communication needs. They can buy Vonage Business as a subscription and they can buy our Vonage API Platform and consume our cloud communication as a service product as programmable modules, delivered via APIs. We also provide a robust suite of feature-rich residential communication solutions.

Business

For our Business customers, we provide innovative, cloud-based Unified Communications as a Service, or UCaaS, solutions, comprised of integrated voice, text, video, data, collaboration, and mobile applications over our flexible, scalable Session Initiation Protocol based Voice over Internet Protocol, or VoIP, network. We also offer CPaaS solutions designed to enhance the way businesses communicate with their customers by embedding communications into apps, websites and business processes. In August 2018, the Company completed the acquisition of TokBox which added video functionality to the CPaaS suite of services available to its customers. In combination, our products and services permit our business customers to communicate with their customers and employees through any cloud-connected device, in any place, at any time without the often costly investment required with on-site equipment. We have a robust set of product families tailored to serve the full range of the business value chain, from the SMB market, through mid-market and enterprise markets. We provide customers with multiple deployment options, designed to provide the reliability and quality of service they demand. We provide customers the ability to integrate our cloud communications platform with many cloud-based productivity and CRM solutions, including Google's G Suite, Zendesk, Salesforce's Sales Cloud, Oracle, and Clio. With our ability to integrate these cloud-based, workplace tools, Vonage integrates the entire business communications value chain - from employee communications that maximize productivity to the direct engagement with customers that CPaaS provides. When combined with our MPLS network, as well as voice services over customers' broadband networks via our SmartWan solution, we create a differentiated offering. On October 31, 2018, the Company completed the acquisition of NewVoiceMedia, a leading provider of Contact Center as a Service, or CCaaS, solutions allowing the Company to compliment its existing suite of cloud communications services available to its customers.

Consumer

For our Consumer customers, we enable users to access and utilize our services and features, via their existing internet connections, including over 3G/4G, LTE, Cable, or DSL broadband networks. This technology enables us to offer our Consumer customers attractively priced voice and messaging services and other features around the world on a variety of devices. Our Consumer strategy is focused on the continued penetration of our core North American markets, where we will continue to provide value in international long distance and target under-served segments.

Services outside of the United States

We currently have UCaaS and consumer operations in the United States, United Kingdom, and Canada and believe that our low-cost Internet based communications platform enables us to cost effectively deliver voice and messaging services to other locations throughout the world. Through Nexmo, we have operations in the United States, United

Kingdom, Hong Kong, and Singapore, and provide CPaaS solutions to our customers located in many countries around the world.

Trends in Our Industry

A number of trends in our industry have a significant effect on our results of operations and are important to an understanding of our financial statements.

28 VONAGE ANNUAL REPORT 2018

Table of Contents

Competitive landscape. We face intense competition from traditional telephone companies, wireless companies, cable companies, and alternative communication providers. Most traditional wireline and wireless telephone service providers and cable companies are substantially larger and better capitalized than we are and have the advantage of a large existing customer base. In addition, because our competitors provide other services, they often choose to offer VoIP services or other voice services as part of a bundle that includes other products, such as video, high speed Internet access, and wireless telephone service, which we do not offer. We also compete against alternative communication providers. Some of these service providers have chosen to sacrifice telephony revenue in order to gain market share and have offered their services at low prices or for free. As we continue to introduce applications that integrate different forms of voice and messaging services over multiple devices, we are facing competition from emerging competitors focused on similar integration, as well as from alternative voice communication providers. We also are subject to the risk of future disruptive technologies. In connection with our emphasis on the international long distance market in the United States, we face competition from low-cost international calling cards and VoIP providers in addition to traditional telephone companies, cable companies, and wireless companies, each of which may implement promotional pricing targeting international long distance callers.

Regulation. Our business has developed in a relatively lightly regulated environment. For further discussion regarding regulatory issues which impacts the Company, refer to "Regulation" in Note 11, Commitments and Contingencies to our financial statements.

Key Operating Data

The table below includes key operating data that our management uses to measure the growth and operating performance of the Business segment:

Business	For the Years Ended					
	December 31,					
	2018	2017	2016			
Service revenues per customer	\$358	\$327	\$312			
Business revenue churn	1.1	% 1.2	% 1.3	%		

Service revenues per customer. Service revenues per customer for a particular period is calculated by dividing the average monthly service revenues for the period by the average number of customers over the number of months in the period. The average number of customers is the number of customers on the first day of the period, plus the number of customers on the last day of the period, divided by two. Service revenues excludes revenues from trading and auction customers. Service revenues per customer increased from \$327 for 2017 to \$358 for 2018 primarily driven by the Company's successful efforts to attract larger business customers and to expand services provided to our existing business customers.

Business revenue churn. Business revenue churn is calculated by dividing the revenue from customers or customer locations that have been confirmed to be foregone during a period by the simple average of the total revenue from all customers in that period. Revenue for purposes of determining Business revenue churn is service revenue excluding revenue from our trading and auction customers, and usage in excess of a customer's contracted service plan, regulatory fees charged to customers, and credits. The simple average of total revenue from all customers during the period is the total revenue as defined herein on the first day of the period, plus the total revenue as defined herein on the last day of the period, divided by two. Terminations, as used in the calculation of churn statistics, do not include customers terminated during the period if termination occurred within the first month after activation. Other companies may calculate business revenue churn differently, and their business revenue churn data may not be directly comparable to ours. Business revenue churn decreased slightly from 1.2% in 2017 to 1.1% in 2018. Our revenue churn will fluctuate over time due to economic conditions, seasonality in certain customer's operations, loss of customers who are acquired, and competitive pressures including promotional pricing. We are continuing to invest in our overall quality of service which includes customer care headcount and systems, billing systems, on-boarding processes and self-service options to ensure we scale our processes to our growth and continue to improve the overall customer experience.

Edgar Filing: VONAGE HOLDINGS CORP - Form 10-K

The table below includes key operating data that our management uses to measure the growth and operating performance of the Consumer segment:

Consumer	For the Years Ended		
	December 31,		
	2018	2017	2016
Average monthly revenues per subscriber line	\$26.42	\$ 26.19	\$ 26.43
Subscriber lines (at period end)	1,287,649	1,492,067	1,711,366
Customer churn	1.8	% 2.0	% 2.2

29 VONAGE ANNUAL REPORT 2018

Table of Contents

Average monthly revenues per subscriber line. Average monthly revenues per subscriber line for a particular period is calculated by dividing our revenues for that period by the simple average number of subscriber lines for the period, and dividing the result by the number of months in the period. The simple average number of subscriber lines for the period is the number of subscriber lines on the first day of the period, plus the number of subscriber lines on the last day of the period, divided by two. Our average monthly revenues per subscriber line increased from \$26.19 for 2017 to \$26.42 for 2018 due primarily to the Company's ability to retain its more tenured customers.

Subscriber lines. Our subscriber lines include, as of a particular date, all paid subscriber lines from which a customer can make an outbound telephone call on that date. Our subscriber lines include fax lines, including fax lines bundled with subscriber lines in our small office home office calling plans and soft phones, but do not include our virtual phone numbers and toll free numbers, which only allow inbound telephone calls to customers. Subscriber lines decreased from 1,492,067 as of December 31, 2017 to 1,287,649 as of December 31, 2018, reflecting planned actions to enhance the profitability of the assisted sales channel by eliminating lower performing locations and restructuring the pricing offers, and to shift investment to our business market.

Customer churn. Customer churn is calculated by dividing the number of customers that have terminated during a period by the simple average of number of customers in a given period. The simple average number of customers during the period is the number of customers on the first day of the period, plus the number of customers on the last day of the period, divided by two. Terminations, as used in the calculation of churn statistics, do not include customers terminated during the period if termination occurred within the first month after activation. Other companies may calculate customer churn differently, and their customer churn data may not be directly comparable to ours. Customer churn decreased to 1.8% for 2018 from 2.0% for 2017. The decreased was due primarily to our decision to maximize customer value by focusing marketing spend on higher return channels and away from assisted selling channels which had higher early life churn. We monitor customer churn on a daily basis and use it as an indicator of the level of customer satisfaction. Customers who have been with us for a year or more tend to have a lower churn rate than customers who have not. In addition, our customers who are international callers generally churn at a lower rate than customers who are domestic callers. Our customer churn will fluctuate over time due to economic conditions, competitive pressures including promotional pricing targeting international long distance callers, marketplace perception of our services, and our ability to provide high quality customer care and network quality and add future innovative products and services. See the discussion below for detail regarding churn impacting our business customers.

REVENUES

Revenues consist of services revenue and customer equipment and shipping fee revenue. Substantially all of our revenues are services revenue. For consumer customers in the United States, we offer domestic and international rate plans, including a variety of residential plans and mobile plans. Through our acquisitions we offer SMB, mid-market, and enterprise customers several service plans with different pricing structures and contractual requirements ranging in duration from month-to-month to three years. In addition, we provide managed equipment to business customers for which the customers pay a monthly fee. Customers also have the opportunity to purchase premium features for additional fees. In addition, we derive revenue from usage-based fees earned from customers using our cloud-based software products. These usage-based software products include our messaging, voice, Verify and chat APIs.

Usage-based fees include number of text messages sent or received using our messaging APIs, minutes of call duration activity for our voice APIs, and number of converted authentications for our Verify API. Services revenue is offset by the cost of certain customer acquisition activities, such as rebates and promotions. In addition, in certain instances, we charge disconnect fees which are recognized as revenue at the time the disconnect fees are collected from our customer.

In the United States, we charge regulatory, compliance, E-911, and intellectual property-related recovery fees on a monthly basis to defray costs, and to cover taxes that we are charged by the suppliers of telecommunications services. In addition, we recognize revenue on a gross basis for contributions to the Federal Universal Service Fund, or USF, and related fees. All other taxes are recorded on a net basis.

Revenues are generated from sales of customer equipment directly to customers for replacement devices, or for upgrading their device at the time of customer sign-up for which we charge an additional fee. In addition, customer

equipment and shipping revenues include revenues from the sale of VoIP telephones in order to access our small and medium business services. Customer equipment and shipping revenues also include the fees that customers are charged for shipping their customer equipment to them.

OPERATING EXPENSES

Operating expenses consist of cost of revenues, sales and marketing expense, engineering and development expense, general and administrative expense, and depreciation and amortization.

Table of Contents

RESULTS OF OPERATIONS

The following table sets forth, as a percentage of consolidated operating revenues, our consolidated statement of income for the periods indicated:

Management's discussion of the results of operations for the Years Ended December 31, 2018, 2017, and 2016

The Company reported income before income taxes of \$36,525 and \$45,793 for the years ended December 31, 2018 and 2017, respectively. The decrease in income before income taxes as compared to the prior year was primarily caused by higher other operating expenses of \$31,935 as a result of increased engineering and development expenses as the Company continues to increase focus on innovation along with increased general and administrative expenses associated with the acquisitions of TokBox and NewVoiceMedia which were completed in the second half of 2018, partially offset by higher gross margin discussed below.

The Company reported income before taxes of \$45,793 and \$30,845 for the years ended December 31, 2017 and 2016, respectively. The increase in income before income taxes is largely due to a decrease in other operating expenses during the year ended December 31, 2017 of \$18,376 due to a reduction in sales and marketing associated with the Consumer segment as part of the Company's overall strategy to focus sales growth on its Business segment partially offset by lower gross margin as discussed above.

The Company reported net income of \$35,728 and net loss of \$33,933 for the years ended December 31, 2018 and 2017, respectively. The increase in net income for the year ended December 31, 2018 is primarily the result of the impact of the TCJA enacted in December 2017 resulting in income tax expense of \$79,726 for the year ended December 31, 2017 partially offset by the aforementioned decrease in income before income taxes.

The Company reported a net loss of \$33,933 for the year ended December 31, 2017 and net income of \$13,151 for the year ended December 31, 2016. The decrease in net income was largely due to the impact of the enactment of the TCJA in December 2017 resulting in income tax expense of \$79,726, partially offset by the increase in income before taxes of \$14,948 as discussed above.

We calculate gross margin as total revenues less cost of service, which primarily consists of fees that we pay to third parties on an ongoing basis in order to provide our services and costs incurred when a customer first subscribes to our service. The following table presents total revenues, cost of revenues and the composition of gross margin for the years Ended December 31, 2018, 2017 and 2016:

31 VONAGE ANNUAL REPORT 2018

Table of Contents

(in thousands, except percentages)	For the years ended December 31,			\$	%	\$	%
	2018	2017	2016	Change 2017 to 2018	Change 2017 to 2018	Change 2016 to 2017	Change 2016 to 2017

(1) Excludes depreciation and amortization of \$27,754, \$27,308, and \$28,489, respectively.

Total revenues and cost of revenues were impacted by the following trends and uncertainties:

For the year ended December 31, 2018 compared to the year ended December 31, 2017

Total revenues increased 5% for the year ended December 31, 2018 as compared to the prior year period. The increase is primarily due to business customer growth driving an increase in revenues of \$109,222, offset by declining consumer revenues of \$62,726 in connection with the continued decline of subscriber lines. The Company continues to expect that the Consumer portion of the Company's overall business will become less significant as the Company reallocates resources to increase market share in its Business communications platforms.

Cost of revenues increased 5% for the year ended December 31, 2018 as compared to the prior year period driven by increased costs incurred in servicing our business customers of \$59,758 due to an increase in customers year over year. This was partially offset by a decrease in costs in Consumer of \$37,717 as subscriber lines continues to decline resulting in lower international and long-distance termination costs.

For the year ended December 31, 2017 compared to the year ended December 31, 2016

Total revenues increased 5% for the year ended December 31, 2017 as compared to the prior year period. The increase is primarily due to Business customer growth of 33% driving an increase in revenues of \$122,570 offset by declining consumer revenues of \$75,905 in connection with the continued decline of subscriber lines. The Company continues to allocate resources toward the growth of its Business communication services and expects this trend of Business revenue growth partially offset by the declining Consumer business.

Cost of revenues increased 14% for the year ended December 31, 2017 as compared to the prior year period driven by increased costs incurred in servicing our business customers of \$84,143 due to an increase in customers along with costs associated with trading activities associated with the Company's API communication services that are recognized on a gross basis beginning in the second quarter of 2017 which were reported as net in the prior year quarter. This was offset by a decrease in costs in Consumer of \$34,339 as subscriber lines continues to decline resulting in lower international and long-distance termination costs.

(2) Excludes depreciation and amortization of \$22,554, \$20,100, and \$18,820, respectively.

For the year ended December 31, 2018 compared to the year ended December 31, 2017

The following table describes the increase in business gross margin for the year ended December 31, 2018 as compared to the year ended December 31, 2017:

	(in thousands)
Service gross margin increased 23% primarily due to continued growth of our service offerings to our Business customers consistent with our overall organic growth in our Business customer base of 14% as compared to the prior year period along with the acquisitions of TokBox in August 2018 and NewVoiceMedia in October 2018	\$ 54,547
Access and product gross margin decreased due to higher costs providing access services to Business customers during the current period	(5,078)
USF gross margin decreased mainly due to payment during the first quarter of 2018 for USF fees not collected in 2017	(5)
Increase in segment gross margin	\$ 49,464

Table of Contents

While service gross margin has increased, service gross margin percentage decreased to 54.6% for the year December 31, 2018 from 55.9% for the year ended December 31, 2017. The decrease in business service gross margin percentage is a result of the sale of a greater proportion of lower margin services across our Business segment during the year ended December 31, 2018 as compared to the same period in the prior year along with lower credits. Our gross margin percentage may continue to be impacted by changes in the mix of service offerings provided to our customers across our Business segment.

For the year ended December 31, 2017 compared to the year ended December 31, 2016

The following table describes the increase in business gross margin for the year ended December 31, 2017 as compared to the year ended December 31, 2016:

	(in thousands)
Service gross margin increased 22% primarily due to higher CPaaS gross margin of \$8,321 related to Nexmo which was acquired on June 3, 2016 along with an increase in UCaaS gross margin of \$34,351 primarily due to an increase in seats of 14% during the current year	\$ 42,672
Product gross margin decreased 322% primarily due to lower costs during the current year period	(4,256)
USF gross margin increased slightly due to the decrease in Business seats along with the acquisitions of Simple Signal and iCore	11
Increase in segment gross margin	\$ 38,427

While service gross margin has increased, service gross margin percentage decreased to 55.9% for the year December 31, 2017 from 63.1% for the year ended December 31, 2016. The decrease in business service gross margin percentage is a result of the sale of a greater proportion of lower margin services across our Business segment during the year ended December 31, 2017 as compared to the same period in the prior year. Our gross margin percentage may continue to be impacted by changes in the mix of service offerings provided to our customers across our Business segment and in different geographical regions.

(2) Excludes depreciation and amortization of \$5,200, \$7,208, and \$9,669, respectively.

For the year ended December 31, 2018 compared to the year ended December 31, 2017

The following table describes the decrease in consumer gross margin for the year ended December 31, 2018 as compared to the year ended December 31, 2017:

	(in thousands)
Service gross margin decreased primarily due to a decrease in subscriber lines of 14% resulting in lower gross margin of \$28,674 as we have reallocated resources focused on attracting business customers. This was offset by a slight increase in average revenue per customer and lower overall costs incurred by the Consumer segment resulting in increased gross margin of \$1,738	\$(26,936)
Access and product gross margin increased 29% primarily due lower equipment costs associated with sales to customers during the current year	1,953
USF gross margin decreased mainly due to payment during the year for USF fees not collected in 2017	(26)
Decrease in segment gross margin	\$(25,009)

Consumer service gross margin percentage increased to 88.0% for the year ended December 31, 2018 from 82.3% for the year ended December 31, 2017 due to lower international and domestic termination rates and the allocation of certain shared network costs to Business as that revenue becomes a greater proportion of the whole. The increase in Consumer service margin percentage is also driven by overall lower costs attributed to consumer services as the Company shifts resources towards attracting more profitable business customers.

Table of Contents

For the year ended December 31, 2017 compared to the year ended December 31, 2016

The following table describes the decrease in consumer gross margin for the year ended December 31, 2017 as compared to the year ended December 31, 2016:

	(in thousands)
Service gross margin decreased 11% primarily due to a decline in subscriber lines of 13% over the current year reflecting planned actions to enhance profitability by restructuring pricing offers and targeting customers with lower subscription acquisition costs	\$(48,575)
Higher product gross margin of 51% primarily due to lower costs incurred primarily related to retail equipment as the Company shifted away from utilizing retailers in the current year	7,009
Decrease in segment gross margin	\$(41,566)
Consumer service gross margin percentage increased to 82.3% for the year ended December 31, 2017 from 80.9% for the year ended December 31, 2016 due to overall lower costs attributed to consumer services as the Company shifts resources towards attracting more profitable business customers.

Other Operating Expenses

The following table presents our other operating expenses during the years ended December 31, 2018, 2017, and 2016, respectively:

(in thousands, except percentages)	For the years ended			\$ Change 2017 to 2018	% Change 2017 to 2018	\$ Change 2016 to 2017	% Change 2016 to 2017
	2018	2017	2016				
Sales and marketing	\$311,433	\$313,251	\$330,969	\$(1,818)	(1)%	\$(17,718)	(5)%
Engineering and development	52,139	29,630	29,759	22,509	76%	(129)	—%
General and administrative	135,324	122,537	123,304	12,787	10%	(767)	(1)%
Depreciation and amortization	70,980	72,523	72,285	(1,543)	(2)%	238	—%
Total other operating expenses	\$569,876	\$537,941	\$556,317	\$31,935	6%	\$(18,376)	(3)%

For the year ended December 31, 2018 compared to the year ended December 31, 2017

Total other operating expenses increased by \$31,935 during the year ended December 31, 2018 as compared to the year ended December 31, 2017 primarily due to the following:

Engineering and development expense increased \$22,509 or 76%, in connection with the Company's continued transformation focused on innovation especially in regards to developing further functionality related to its proprietary platform in order to support customers through the mid-market and enterprise sector.

General and administrative expense increased by \$12,787, or 10%, primarily due to acquisition related costs incurred by the Company during the second half of 2018 associated with the acquisitions of TokBox and NewVoiceMedia.

For the year ended December 31, 2017 compared to the year ended December 31, 2016

Total other operating expenses decreased \$18,376 during the year ended December 31, 2017 as compared to the year ended December 31, 2016 primarily due to the following:

Sales and marketing expense decreased by \$17,718, or 5%, due to a continued shift during 2017 in traditional marketing investments targeting Consumer customers to more selective targeted advertising focused on attracting more profitable Business customers resulting in overall fewer media marketing programs being deployed during the current year.

Other Income (Expense)

(in thousands, except percentages)	For the years ended December			\$ Change 2017 to 2018	% Change 2017 to 2018	\$ Change 2016 to 2017	% Change 2016 to 2017
	2018	2017	2016				
Interest expense	\$(15,068)	\$(14,868)	\$(13,042)	\$(200)	(1)%	\$(1,826)	(14)%
Other income (expense), net	(318)	1,270	(267)	(1,588)	(125)%	1,537	576%
	\$(15,386)	\$(13,598)	\$(13,309)	\$(1,788)	(13)%	\$(289)	(2)%

For the year ended December 31, 2018 compared to the year ended December 31, 2017

Interest expense. The increase in interest expense of \$200, or 1%, was mainly due to higher principal balances on our 2018 Credit Facility that we entered into in July 2018 and our 2016 Credit Facility that we entered into in July 2016 as compared to the prior year on our 2016 Credit Facility along with rising rates during the second half of 2018.

Other income (expense), net. Other income (expense), net decreased by \$1,588, or 125% in 2018 compared to 2017 due to the gain from the sale of the Hosted Infrastructure product line during the year ended December 31, 2017.

For the year ended December 31, 2017 compared to the year ended December 31, 2016

Interest expense. The increase in interest expense of \$1,826, or 14%, was due mainly to higher interest rates in 2017 compared to 2016, partially offset by lower principal balances, and the additional interest expense associated with our interest rate swaps arrangement.

Other income (expense), net. Other income (expense), net increased by \$1,537, or 576% in 2017 compared to 2016 due the sale of the Hosted Infrastructure product line during the second quarter of 2017 as further discussed in Note 12, Acquisitions and Dispositions.

Table of Contents

Income Taxes

(in thousands, except percentages)	For the years ended December 31,			\$	%	\$	%
	2018	2017	2016	Change 2017 to 2018	Change 2017 to 2018	Change 2016 to 2017	Change 2016 to 2017
Income tax expense	\$(797)	\$(79,726)	\$(17,694)	\$78,929	99%	\$(62,032)	(351)%
Effective tax rate	2	% 174	% 57	%			

For the year ended December 31, 2018 compared to the year ended December 31, 2017

We recognize income taxes equal to pre-tax income multiplied by our annual effective income tax rate. In addition, adjustments are recorded for discrete period items and changes to our state effective tax rate which can cause the rate to fluctuate from quarter to quarter.

During the year ended December 31, 2018, we recognized tax expense of \$797 related to U.S., state and foreign income tax expense. The Company has recorded a permanent benefit related to excess share-based stock compensation. In addition, certain acquisition related expenses incurred during 2018 are treated as a permanent difference as the expenses are not deductible for tax purposes but are a reduction of pre-tax income. The Company also recorded a permanent difference related to the impact of the Tax Cuts and Jobs Act, or TCJA, related to the excess compensation deduction pertaining to covered employees who received compensation in excess of \$1 million dollars.

During the year ended December 31, 2017, the Company recognized tax expense of \$79,726 which primarily reflects the impact of the Tax Cuts and Jobs Act, or TCJA, which was signed into law by the President of the United States on December 22, 2017. The TCJA most notably reduces the corporate tax rate from 35% to 21% along with eliminating the alternative minimum tax, or AMT, and imposes a mandatory one-time tax on foreign earnings. The Company recorded an income tax expense of \$69,378 which is primarily with the re-measurement of the Company's deferred tax balances at the 21% income tax rate. The Company has concluded that the provisional amount recorded as of December 31, 2017 is final and does not require any further adjustment.

During the year ended December 31, 2016, the Company recognized tax expense of \$17,694 which is primarily related to the contingent consideration in connection with the acquisition of Nexmo which was treated as a permanent difference as the expense is not deductible for tax purposes but is a reduction of pre-tax income.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Overview

During the years ended December 31, 2018, 2017, and 2016 we generated cash from operations. We expect to continue to balance efforts to grow our revenue while consistently achieving operating profitability. To grow our revenue, we continue to make investments in growth initiatives, marketing, application development, network quality and expansion, and customer care. Although we believe we will achieve consistent profitability in the future, we ultimately may not be successful and we may not achieve consistent profitability. We believe that cash flow from operations and cash on hand will fund our operations for at least the next twelve months.

The following table sets forth a summary of our cash flows for the periods indicated:

(dollars in thousands)	For the years ended December 31,			\$	\$
	2018	2017	2016	Change 2017 to 2018	Change 2016 to 2017
Net cash provided by operating activities	\$123,205	\$128,058	\$93,456	\$(4,853)	\$34,602
Net cash used in investing activities	(407,230)	(30,737)	(191,449)	(376,493)	160,712
Net cash provided by (used in) financing activities	258,212	(96,242)	68,054	354,454	(164,296)
Effect of exchange rate changes on cash and cash equivalents	(410)	1,319	555	(1,729)	764

Operating Activities

Cash provided by operating activities decreased to \$123,205 for the year ended December 31, 2018 compared to \$128,058 for the year ended December 31, 2017, primarily due to a decrease of \$73,071 in non-cash items offset by an increase in net income. Also attributing to the decrease in operating activities was an increase in cash used for working capital requirements of \$1,443 during the year ended December 31, 2018 as compared to the year ended December 31, 2017 primarily due payment of acquisition related expenses made during the current year.

Cash provided by operating activities increased to \$128,058 for the year ended December 31, 2017 as compared to \$93,456 for the year ended December 31, 2016 primarily due to an increase in operating income adjusted for non-cash items of \$27,817 driven by a decrease in operating expenses as compared to the year ended December 31, 2016 primarily attributable to decreased sales and marketing costs. Also attributing to the increase in operating activities was a decrease in cash used for working capital requirements of \$6,785 during the year ended December 31, 2017 as compared to the year ended December 31, 2016 primarily due to a decrease in timing of prepayments made during the current year.

Investing Activities

Cash used in investing activities for the year ended December 31, 2018 of \$407,230, which was an increase from cash used in investing activities of \$30,737 during the year ended December 31, 2017, was primarily attributable to the acquisitions of NewVoiceMedia and TokBox of \$380,484, net of cash acquired, slightly offset by a decrease in costs associated with capital expenditures and acquisition and development of software.

Cash used in investing activities for the year ended December 31, 2017 of \$30,737, which was a decrease from cash used in investing activities of \$191,449 during the year ended December 31, 2016 was primarily attributable to payments of \$163,042 made during the prior year to acquire Nexmo slightly offset by a decrease in cash provided from the maturity and sale of marketable securities of \$14,389.

Financing Activities

Cash provided by financing activities was \$258,212 for the year ended December 31, 2018 as compared to cash used in financing activities of \$96,242 during the year ended December 31, 2017. The increase in cash provided by financing activities was primarily attributable to proceeds received from the credit facilities, net of principal payments of \$373,562, slightly offset by an increase in shares withheld for payment of employee taxes and a decrease in share repurchased.

Cash used by financing activities was \$96,242 for the year ended December 31, 2017 as compared to cash provided by financing activities of \$68,054 during the year ended December 31, 2016. The decrease in cash provided by financing

activities was primarily attributable increased payments for financing arrangements net of new borrowings of \$195,188 slightly offset by fewer repurchases of common stock of \$23,360 during the current year.

Table of Contents

Sources of Liquidity

The principal sources of liquidity are derived from available borrowings under our existing financing arrangements, existing cash on hand, and cash flows from operations. As described in Note 7, Long-Term Debt and Revolving Credit Facility, to the Consolidated Financial Statements, the Company's financing arrangements consist of the 2018 Credit Facility comprised of a \$100,000 term note and a \$500,000 revolving credit facility.

Uses of Liquidity

Acquisition of Businesses

NewVoiceMedia was acquired on October 31, 2018 for \$350,179. We financed the transaction from cash on hand and through borrowings of \$335,000 through our 2018 Credit Facility. In addition, on August 1, 2018, the Company completed the acquisition of TokBox for cash of \$32,906. See Note 12, Acquisitions and Dispositions for further information regarding the Company's acquisitions during the year ended December 31, 2018.

Nexmo was acquired on June 3, 2016. Nexmo shareholders received consideration of \$231,122. Of the consideration, \$194,684 (net of cash acquired of \$16,094) was paid at close, which consisted of \$163,093 of cash (net of \$16,094 of cash acquired) and 6,823 in shares of Vonage common stock valued at \$31,591. The remaining \$36,438 of the \$231,122 purchase price was in the form of restricted cash, restricted stock and options held by Nexmo management and employees, subject to vesting requirements over time.

State and Local Sales Taxes

We have contingent liabilities for state and local sales taxes. As of December 31, 2018, we had a reserve of \$3,302. If our ultimate liability exceeds this amount, it could affect our liquidity unfavorably. However, we do not believe it will significantly impair our liquidity.

Capital Expenditures

For the year ended December 31, 2018, capital expenditures were primarily for the implementation of software solutions and purchase of network equipment as we continue to expand our network. Our capital expenditures for the year ended December 31, 2018 were \$26,746, of which \$7,714 was for software acquisition and development. The majority of these expenditures are comprised of investments in information technology and systems infrastructure, including an electronic data warehouse, online customer service, and customer management platforms. For 2019, we believe our capital and software expenditures will be approximately \$40,000.

Available Borrowings Under the 2018 Credit Facility

We maintain significant availability under our line of credit to meet our short-term liquidity requirements. As of December 31, 2018, amounts available under the 2018 Credit Facility totaled \$75 million.

On July 31, 2018, the Company entered into the 2018 Credit Facility consisting of a \$100 million senior secured term loan and a \$500 million revolving credit facility bearing interest at LIBOR plus 2.25% at closing. The 2018 Credit Facility represents a \$150 million increase from the 2016 Credit Agreement and has a maturity date of July 31, 2023. The Company used \$232 million of the proceeds from the 2018 Credit Facility plus cash on hand to retire all outstanding indebtedness under the 2016 Credit Facility and to cover transaction fees and expenses. The co-borrowers under the 2018 Credit Facility are the Company and Vonage America Inc., the Company's wholly owned subsidiary. Obligations under the 2018 Credit Facility are guaranteed, fully and unconditionally, by the Company's other United States subsidiaries and are secured by substantially all of the assets of each borrower and each guarantor.

Table of Contents**CONTRACTUAL OBLIGATIONS AND OTHER COMMERCIAL COMMITMENTS**

The table below summarizes our contractual obligations at December 31, 2018, and the effect such obligations are expected to have on our liquidity and cash flow in future periods.

(dollars in thousands)	Payments Due by Period				
	Total	1 year or less	2-3 years	4-5 years	After 5 years
	(unaudited)				
Contractual Obligations:					
2018 term note	\$95,000	\$10,000	\$20,000	\$65,000	\$—
2018 revolving credit facility	425,000	—	—	425,000	—
Interest related to 2018 term note	17,473	4,754	7,931	4,788	—
Interest related to 2018 revolving credit facility	101,228	22,150	44,228	34,850	—
Operating lease obligations net of committed sub-leases	65,198	16,591	23,361	15,338	9,908
Purchase obligations	57,173	32,177	16,475	8,521	—

Other Commercial Commitments:					
Standby letters of credit	1,516	1,516	—	—	—
Total contractual obligations and other commercial commitments	\$762,588	\$87,188	\$111,995	\$553,497	\$9,908

Credit Facility. On July 31, 2018, we entered the 2018 Credit Facility consisting of a \$100,000 term note and a \$500,000 revolving credit facility. See Note 7, Long-Term Debt and Revolving Credit Facility in the notes to the Consolidated Financial Statements.

Operating Lease Obligations. At December 31, 2018, we had future commitments for operating leases for co-location facilities mainly in the United States that accommodate a portion of our network equipment, for office spaces leased in Holmdel, New Jersey for our headquarters, as well as various other locations for field sales and administration offices, in Tel Aviv, Israel for application development, and in London United Kingdom for our UK office.

Purchase obligations. The purchase obligations are primarily commitments to vendors who will provide local inbound services, provide customer care services, provide efax service, provide carrier operation, provide data center with technical supports, provide networks and telephone related services, provide marketing infrastructure and services, provide customer caller ID, provide electricity to our office, license patents to us, partner with us in international operations, process LNP orders, and lease office space to us. In certain cases, we may terminate these arrangements early upon payment of specified fees. These amounts do not represent our entire anticipated purchases in the future, but represent only those items for which we are contractually committed. We also purchase products and services as needed with no firm commitment. For this reason, the amounts presented do not provide a reliable indicator of our expected future cash outflows or changes in our expected cash position. See also Note 11, Commitments and Contingencies to our Consolidated Financial Statements.

SUMMARY OF CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in conformity with U.S. GAAP requires estimates and assumptions that affect the reported amounts and classifications of assets and liabilities, revenues and expenses, and the related disclosures of contingent liabilities in the consolidated financial statements and accompanying notes. The SEC has defined critical accounting policies as those policies management believes are most important to the portrayal of the Company's financial condition and results of operation and which require the Company to make its most difficult and subjective judgments, often as a result of the need to make estimates of matters that are inherently uncertain. Based on this definition, the Company has identified the following critical accounting policies and estimated addressed below. Our significant accounting policies are summarized in Note 2, Summary of Significant Accounting Policies to our Consolidated Financial Statements. The following describes our critical accounting policies and estimates:

Use of Estimates

Our consolidated financial statements and notes thereof are prepared in conformity with accounting principles generally accepted in the United States, which require management to make estimates and assumptions that affect the amounts reported and disclosed in the consolidated financial statements and the accompanying notes. Actual results could differ materially from these estimates.

41 VONAGE ANNUAL REPORT 2018

Table of Contents

We base our estimates on historical experience, available market information, appropriate valuation methodologies, and on various other assumptions that we believed to be reasonable, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Estimates are used for such items as depreciable lives for long-lived assets including intangible assets, tax provisions, uncollectible accounts, and assets and liabilities assumed in business combinations, among others. In addition, estimates are used to test long-lived assets and goodwill for impairment.

Revenue Recognition

On January 1, 2018, the Company adopted the guidance of ASC Topic 606, Revenue from Contracts with Customers using the modified retrospective method applied to those contracts which were not completed as of January 1, 2018. Our results for reporting periods beginning after January 1, 2018 are presented in accordance with the provisions under Topic 606 but any prior period amounts have not been adjusted.

Upon our adoption of Topic 606, we measure revenue based upon consideration specified by contracts with our customers. Revenue is recognized when our performance obligation under the contract is satisfied by transferring control over the product or service to the customer. We derive our revenues for our Consumer and Business segments primarily from the sale of our communication services and customer equipment as further described below. The majority of the Company's contracts with customers have a single performance obligation for service revenues. We recognize revenue with customers when control transfers, which occurs upon delivery of a service or product. For our Business segment, the typical life of a customer for service is six years. The adoption of Topic 606 did not result in a change in the timing of how the Company recognizes revenue.

Service Revenues

Substantially all of our revenues are service revenues, which are derived from monthly subscription fees under usage based or pay-per-use type billing arrangements, and contract-based services plans. For consumer customers in the United States, we offer domestic and international rate plans, including a variety of residential plans and mobile plans. For business customers, we offer small and medium business, mid-market, and enterprise customers several service plans with different pricing structures and contractual requirements ranging in duration from month-to-month to three years. In addition, we provide managed equipment to business customers for a monthly fee. Customers also have the opportunity to purchase premium features for additional fees. We also derive service revenues from per minute fees for international calls if not covered under a plan, including calls made via applications for mobile devices and other stand-alone products, and for any calling minutes in excess of a customer's monthly plan limits. For a portion of our customers, monthly subscription fees are automatically charged to customers' credit cards, debit cards or electronic check payments ("ECP"), in advance and are recognized over the following month as service is provided.

Service revenue also includes supplying messaging (SMS and Voice) services to customers as part of our CPaaS offerings. Revenue is recognized in the period when messages are sent by the customer. We also transact with providers or bulk SMS aggregators and sell services to these customers who then onsell to their customers. Since the aggregator is our customer, revenue is recognized on a gross basis with related costs included in cost of revenues. In the United States, we charge regulatory, compliance, E-911 and intellectual property-related fees on a monthly basis to defray costs and to cover taxes that we are charged by the suppliers of telecommunications services. These charges, along with the remittance to the relevant government entity, are recorded on a net basis. In addition, we charge customers Federal Universal Service Fund ("USF") fees from customers to recover our obligation to contribute to the fund, as allowed by the Federal Communications Commission ("FCC"). We recognize USF revenue on a gross basis and record the related fees in cost of revenues.

Customer Equipment and Shipping Revenues

Revenues are generated from sales of customer equipment directly to customers for replacement devices, or for upgrading their device at the time of customer sign-up for which we charge an additional fee. In addition, customer equipment and shipping revenues include revenues from the sale of VoIP telephones in order to access our small and medium business services. Customer equipment and shipping revenues also include the fees that customers are charged for shipping their customer equipment to them.

Valuation of Goodwill and Intangible Assets

As of December 31, 2018, the Company had goodwill of \$598,499 consisting of \$210,992 associated with the acquisition of NewVoiceMedia on October 31, 2018, \$20,650 associated with the acquisition of TokBox on August 1, 2018, \$142,421 associated with the acquisition of Nexmo, and \$224,436 associated with the acquisitions of iCore, Simple Signal, Telesphere and gUnify. The Company does not have any goodwill allocated to its Consumer segment as of December 31, 2018. In addition, the Company recognized intangible assets measured primarily based upon significant inputs that are not observable in the market and represent Level 3 measurements as defined by ASC 820, Fair Value Measurements. Intangible assets acquired in the settlement of litigation or by direct purchase are accounted for based upon the fair value of assets received.

Table of Contents

The Company applies ASC 805, Business Combinations and ASC 350, Intangibles - Goodwill and Other to account for goodwill and intangible assets. The Company amortizes all finite-lived intangible assets over their respective estimated useful lives while goodwill has an indefinite life and is not amortized. Goodwill and intangible assets not subject to amortization are tested for impairment on an annual basis on October 1st and, when specific circumstances dictate, between annual tests. The Company tests for goodwill at the reporting unit level, which is identified by assessing whether the components of the Company's operating segments constitute businesses for which discrete financial information is available. With respect to the annual goodwill impairment test on October 1st, the Company identified the UCaaS and CPaaS reporting units which collectively represent the Business segment as of that date. The goodwill impairment test permits evaluating qualitative information to determine if it is more than 50% likely that the fair value of a reporting unit is less than its carrying value. If such a determination is made that it is more likely than not that the fair value of a reporting unit is less than its carrying value or if the Company chooses not to utilize a qualitative approach, then the traditional two-step goodwill impairment test described below is applied. The first step, identifying a potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. If the carrying value of the reporting unit exceeds its fair value, the second step would need to be conducted; otherwise, no further steps are necessary as no potential impairment exists. The second step, measuring the impairment loss, compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. Any excess of the reporting unit goodwill carrying value over the respective implied fair value is recognized as an impairment loss.

The Company performed step zero of the goodwill impairment test, performing its qualitative assessment of macroeconomic, industry and market events and circumstances, and the overall financial performance of the UCaaS and CPaaS reporting units as of October 1st. The Company determined it was not more likely than not that the fair value of the goodwill attributed each of the reporting units was less than its carrying amount and accordingly, no impairment needed to be recognized for the year ended December 31, 2018. There were also no impairments recorded during the years ended December 31, 2017 and 2016, respectively.

We also perform a review of our purchased-intangible assets whenever events or changes in circumstances indicate that the useful life is shorter than we had originally estimated or that the carrying amount of assets may not be recoverable. If such facts and circumstances exist, we assess the recoverability of purchased-intangible assets by comparing the projected undiscounted net cash flows associated with the related asset or group of assets over their remaining lives against their respective carrying amounts. Impairments, if any, are based on the excess of the carrying amount over the fair value of those assets. If the useful life of the asset is shorter than originally estimated, we accelerate the rate of amortization and amortize the remaining carrying value over the new shorter useful life. There was no impairment of purchased-intangible assets identified for the years ended December 31, 2018, 2017, or 2016.

Income Taxes

We recognize deferred tax assets and liabilities at enacted income tax rates for the temporary differences between the financial reporting bases and the tax bases of our assets and liabilities. Any effects of changes in income tax rates or tax laws are included in the provision for income taxes in the period of enactment. Our net deferred taxes primarily consist of net operating loss carry forwards, or NOLs, intangibles and prepaids. We are required to record a valuation allowance against our net deferred tax assets if we conclude that it is more likely than not that taxable income generated in the future will be insufficient to utilize the future income tax benefit from our net deferred tax assets (namely, the NOLs) prior to expiration. We periodically review this conclusion, which requires significant management judgment. If we are able to conclude in a future period that a future income tax benefit from our net deferred tax assets has a greater than 50% likelihood of being realized, we are required in that period to reduce the related valuation allowance with a corresponding decrease in income tax expense. This would result in a non-cash benefit to our net income in the period of the determination. In subsequent periods, we would expect to recognize income tax expense equal to our pre-tax income multiplied by our effective income tax rate, an expense that was not recognized prior to the reduction of the valuation allowance.

As of December 31, 2018, we had NOLs for United States federal and state tax purposes, including those NOLs acquired as part of past business combinations, of \$578,522 and \$245,403, respectively, expiring at various times through 2037. In addition, we had NOLs for United Kingdom tax purposes of \$162,535 with no expiration date.

Under Section 382 of the Internal Revenue Code, if we undergo an “ownership change” which is generally defined as a greater than 50% change by value in our equity ownership over a three-year period, our ability to use our pre-change of control NOLs and other pre-change tax attributes against our post-change income may be limited. The Section 382 limitation is applied annually so as to limit the use of our pre-change NOLs to an amount that generally equals the value of our stock immediately before the ownership change multiplied by a designated federal long-term tax-exempt rate. At December 31, 2018, there were no limitations on the use of our NOLs except for the NOLs of Vocalocity as of the date of acquisition for which the Company has reflected in the deferred tax asset.

43 VONAGE ANNUAL REPORT 2018

Table of Contents

Capitalized Software

Capitalized costs include external consulting fees and payroll related cost for employees who are directly associated with, and who devote time to, the Company's internal-use software projects. Capitalization begins when the planning stage is complete, and continues during the application development stage. Capitalization ceases when the software has been tested and is ready for its intended use. Accordingly, internal and external costs incurred during the preliminary project stage, post implementation operation stage and ongoing maintenance are expensed as incurred. The Company amortizes completed internal-use software that is used on its network to expense over its estimated useful life.

Business Combinations

We account for acquired businesses treated as a business combination using the acquisition method of accounting, which requires that assets acquired and liabilities assumed be recorded at the date of acquisition at their respective fair values. Any excess of the purchase price over the estimated fair values of the net assets acquired is recorded as goodwill. Acquisition-related costs are expensed as incurred in the consolidated financial statements. Significant judgments are used in determining the estimated fair values assigned to the assets acquired and liabilities assumed and in determining estimates of useful lives of long-lived assets acquired. Estimates of the fair values of assets acquired and liabilities assumed are based upon assumptions believed to be reasonable, and when appropriate, include assistance from independent third-party appraisal firms.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements.

Table of Contents

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to financial market risks, including changes in currency exchange rates and interest rates.

Foreign Exchange Risk

We sell our products and services primarily in the United States, Canada, the European Union, and Asia. A portion of our sales denominated in Euros, the Canadian Dollar, and the British Pound, which are affected by changes in currency exchange rates. Our financial results could be affected by changes in foreign currency exchange rates, although foreign exchange risks have not been material to our financial position or results of operations to date. We prepared a sensitivity analysis to determine the impact of hypothetical changes foreign currency exchange rates have on our results of operations. The foreign currency rate analysis assumed a uniform movement in currencies by 10% relative to the U.S. Dollar on our results. Based upon the results of this analysis, a 10% change in currency rates would have resulted in an increase or decrease in our earnings for the year ended December 31, 2018 of approximately \$1.6 million.

Interest Rate and Debt Risk

Our exposure to market risk for changes in interest rates primarily relates to our long-term debt. In order to hedge the variability of expected future cash interest payments related to our credit facilities we have entered into three interest rate swap agreements which were executed on July 14, 2017. The swaps have an aggregate notional amount of \$150 million and are effective on July 31, 2017 through June, 3, 2020. Under the swaps our interest rate is fixed at 4.7%. The interest rate swaps will be accounted for as cash flow hedges in accordance with ASC 815, Derivatives and Hedging.

As of December 31, 2018, if the interest rate on our variable rate debt changed by 1% on our 2018 term note, our annual debt service payment would change by approximately \$700. As of December 31, 2018, if the interest rate on our variable rate debt changed by 1% on our 2018 revolving credit facility, our annual debt service payment would change by approximately \$3,000.

ITEM 8. Financial Statements and Supplementary Data

The financial statements and schedules required by this Item are listed in Part IV, Item 15 in this Annual Report on Form 10-K.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Table of Contents

ITEM 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, or the Exchange Act, as amended, as of the end of the period covered by this Annual Report on Form 10-K. Based on the evaluation of our disclosure controls and procedures as of December 31, 2018, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control Over Financial Reporting

We have implemented significant phases of reporting and transaction system upgrades and are in initial stages of consolidating and upgrading additional transaction systems. Controls over installed and upgraded applications have not changed significantly but may in planned future phases of system and application implementations. There were no other changes to controls during the quarter ended December 31, 2018 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

Inherent Limitations over Internal Controls

The Company's controls and other procedures are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized, and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate, to allow timely decisions regarding required disclosure. Our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives, and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Table of Contents

Management's Report on Internal Control Over Financial Reporting

February 27, 2019

To the Stockholders of Vonage Holdings Corp.:

Our management is responsible for establishing and maintaining adequate internal control over financial reporting for the company. Internal control over financial reporting is defined in Rules 13a-15(f) and 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, our principal executive and principal financial officers and effected by our board of directors, management, and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

• Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the company;

• Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of our management and directors; and

• Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of our internal control over financial reporting as of December 31, 2018. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework (2013).

We completed the acquisition of Telefonica Digital Inc. and its subsidiaries, or Tokbox, on August 1, 2018 and the acquisition of NewVoiceMedia Limited and its subsidiaries, or NewVoiceMedia, on October 31, 2018. As part of our ongoing integration of TokBox and NewVoiceMedia we are continuing to incorporate our controls and procedures into these subsidiaries to augment our company-wide controls to reflect the risks inherent in these acquisitions. As permitted by the SEC guidance for newly acquired businesses, our Management Report over Internal Control over Financial Reporting for the year ended December 31, 2018 includes a scope exception that excludes TokBox and NewVoiceMedia in order for management to have sufficient time to evaluate and implement our internal controls over the operations of these subsidiaries. These businesses represent 16% of total assets and 1% of total revenues of the consolidated financial statement amounts as of and for the year ended December 31, 2018. Our management plans to fully integrate the operations of these businesses into its assessment of the effectiveness of our internal controls over financial reporting in 2019.

Based on our assessment, our Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2018, our internal control over financial reporting was effective.

Our independent registered public accounting firm has issued an attestation report on our internal control over financial reporting. This report appears on page F-4.

PART IV

ITEM 15. Exhibits, Financial Statement Schedules

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of
Vonage Holdings Corp.

Opinion on the Financial Statement Schedule

We have audited the consolidated financial statements of Vonage Holdings Corp. (the "Company") as of December 31, 2018 and 2017, and for each of the two years in the period ended December 31, 2018, and the Company's internal control over financial reporting as of December 31, 2018, and have issued our reports thereon dated February 27, 2019 (which report on the consolidated financial statements expresses an unqualified opinion and includes an explanatory paragraph regarding the adoption of new accounting standards); such reports are included elsewhere in this Form 10-K. Our audit also included the financial statement schedule of the Company listed in the Index at Item 15. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statement schedule based on our audit. In our opinion, such financial statement schedule, when considered in relation to the financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.
