### **2. Basis of preparation and presentation of quarterly information**

#### a) Quarterly Information

The individual (parent company) and consolidated quarterly information were prepared and are presented according to the rules issued by the Brazilian Securities and Exchange Commission (CVM), the provisions of the Brazilian Corporation Law (Law 6,404/76), including provisions amended by Laws 11,638/07 and 11,941/09, as well as pronouncements, guidelines and interpretations issued by the Brazilian Committee on Accounting Pronouncements (CPC). This quarterly information was analyzed by the Fiscal Council in a meeting held at November 8, 2010 and approved by the Board of Directors at a meeting held on November 9, 2010.

During 2009 and 2010, the Brazilian Committee on Accounting Pronouncements (CPC) issued and the Brazilian Securities and Exchange Commission (CVM) approved several Technical Pronouncements,

Interpretations and Guidelines whose effectiveness is only mandatory for the fiscal year ended December 31, 2010, requiring that the companies file again the financial statements of the comparative year.

The Company decided not to exercise its eligibility concerning the quarterly information of September 30, 2010, and at its best judgment, the Company below shows a brief description of the eventual material changes to the accounting practices previously adopted for the quarterly information of September 30, 2010 and comparative period.

- CPC 15 Business Combination, approved by CVM Deliberation 580/09 of July 31, 2009: It mainly establishes the buyer's principles and requirements in a business combination. The Company expects that the figures referring to the acquisition of Globex Utilidades S.A. will change when applying this Pronouncement retrospectively to January 1, 2009, due to the new measurement of goodwill by the expectation of future profitability, resulting from the measurement of Globex's net assets by the fair value of assets acquired (including identified intangible assets) and obligations assumed.

- CPC 22 Information by Segment, approved by CVM Deliberation 582 of July 31, 2009: It sets forth that reporting shall be divided by the Company's operating segment. Operating segment is defined as an entity's component: (a) that develops business activities generating revenues and incurring in expenses; (b) whose operational results are regularly reviewed by the top manager of the Company's operations in the decision-making process; and (c) to which the financial information is available.

The Company's Management will analyze additional reporting in its financial statements resulting from the data and indicators of assets, liabilities and results identifiable for each one of its operating segments.

- CPC 24 Subsequent Event, approved by CVM Deliberation 593 of September 15, 2009: The main impact for applying this rule refers to the recording of dividends. According to CPC 24 at the end of the fiscal year, the Company shall recognize as liability only the mandatory minimum dividend established in its Bylaws. Additional minimum dividends will be recorded as liability as these are approved by the Company's appropriate bodies.

### 2. Basis of preparation and presentation of quarterly information (Continued)

- CPC 26 Presentation of the Financial Statements, approved by CVM Deliberation 595, of September 15, 2009: It sets forth the basis for presenting the financial statements, by determining the presentation overall requirements, structuring guidelines and the minimum content to be included in the financial statements. Two new requirements were added in relation to the previous practice; i) comprehensive statement of income; ii) presentation of three balance sheets in the situations in which the Company applies an accounting policy retroactively or files again items in its financial statements.

- CPC 27 Fixed Assets, approved by CVM Deliberation 583 of July 31, 2009: The Company understands that this rule may cause eventual effects on its financial statements, mainly due to said CPC that requires deducting the estimated residual value from fixed assets in order to calculate depreciation. Currently, the Company depreciates assets by their whole formation cost, not deducting the estimated residual value. The Company is assessing the useful life taking into account the residual value of its assets and will apply this change of depreciation rate retrospectively as of January 1, 2010, in compliance with IPCP 10.

CPC 38, 39 and 40 Financial Instruments: Recognition and Measurement, Presentation, Reporting, approved by CVM Deliberation 604 of November 19, 2009:

- CPC 38 Financial Instruments: Recognition and Measurement: It rules the recognition and measurement of financial instruments operations including derivatives. It shall be applied to all companies and all types of financial instruments, aside from specific exceptions. A financial instrument is any agreement originating a financial asset for an entity and a financial liability or equity instrument for another.

CPC 39 Financial Instruments: Presentation it aims at establishing the principles for presenting the financial instruments as liability or shareholders equity and offsetting the financial assets and liabilities. It applies to the classification of financial instruments, under the issuer's viewpoint, into financial assets, financial liabilities and equity instruments; the classification of corresponding interest, dividends, gains and losses; the circumstance in which the financial assets and liabilities shall be offset.

CPC 40 Financial Instruments: Reporting It introduces the need of detailed reporting on financial statements for the Company's equity and financial situation and its performance.

c) Financial instruments

The financial assets and liabilities held by the Company and its subsidiaries are recognized by their fair value upon their contracting, plus transaction costs directly related to their acquisition or issue. Financial instruments are classified according to the purpose to which they were acquired or issued under the following categories: (i) financial assets and liabilities measured at the fair value through income; and (ii) financial assets and liabilities held to maturity and (iii) loans and receivables. Their subsequent measurement occurs every balance sheet date according to the rules established for each type of classification of financial assets and liabilities.

### 3. Summary of main accounting practices (Continued)

- *Loans and receivables:* This category includes the loans granted and receivables which are non-derivative financial assets with fixed or determinable payments, not quoted on an active market. They are included as current assets, except for those with maturity exceeding 12 months after the balance sheet dates (these are classified as non-current assets). - *Assets and liabilities held to maturity:* these are financial assets that cannot be classified as loans and receivables, as they are quoted on an active market. In this case, these financial assets are acquired with the intention and financial capacity to be held in portfolio to maturity. These are valued by cost of acquisition, plus income earned against the net income for the period, using the effective interest rate method.

Derivative instruments designated as hedge accounting

c) Financial instruments (Continued)

Firstly, the derivatives are recognized by their fair value on the date a derivatives agreement is executed and subsequently are measured again at their fair value. The method to recognize the resulting gain and loss depends whether the derivative is designated or not as hedge instrument: The method depends on the nature of the item that has been hedged. The Company may designate certain derivatives, such as:

- *Fair value hedge*: the derivative financial instruments destined to mitigate the risks deriving from the exposure to the variation in fair value of hedged item shall be classified. The hedged items and related derivative financial instruments are expensed to the appropriate revenue or expense account, in the income statement.

Fair market value of financial instruments actively traded on organized markets is determined based on its market pricing calculated at the date of its respective balance sheet. If there is no market, then the fair value is determined through valuation techniques and compatible with usual practices on the market including the use of recent market arm's length transactions, benchmark to the market value of similar financial instruments, analysis of discounted cash flows or other valuation models.

d) Cash and cash equivalents

These include cash, positive balances in checking account and marketable securities redeemable within up to 90 days. Marketable securities included in cash and cash equivalents are classified into the financial assets calculated at fair value through income category.

### **3. Summary of main accounting practices (Continued)**

Expenditures for repairs and maintenance are recorded as expenses when they do not significantly affect the useful lives of related assets; or they do not aggregate to the value of assets when they materially contribute to the increase of useful lives of existing facilities and equipment.

#### **i) Leasing**

Financial leasing agreements are recorded in property and equipment against liabilities from loans and financing, by the lower amount between the present value of mandatory minimum installments of the agreement or the fair value of asset, accrued, where applicable of initial direct costs incurred on transaction. Implied interest rates recognized in loans and financing are appropriated to income for the year according to the duration of the agreement by the effective interest rate method.

If the Company does not intend to acquire the asset, the depreciation is calculated considering the least term between the effectiveness of the agreement or the assets' useful life.

j) Intangible assets

When this evidence is identified and the net book value exceeds the recoverable value, a provision is recorded for impairment by adjusting the net book value to the recoverable value. These losses are classified as other operating expenses.

Deferred income and social contribution tax assets were recorded pursuant to CVM Ruling 371/02 and take into account the expectation of generating future taxable income, based on a technical feasibility study approved by the Board of Directors.

n) Share-based compensation

Part of the compensation of the Company's main executives and managers is paid as stock option plan, measured by their fair value, calculated on the plan granting date, based on the market's pricing models, considering the share market value, the stock option exercise price and term of the agreement. ## 06.01 NOTES TO THE FINANCIAL STATEMENTS

### 3. Summary of main accounting practices (Continued)

r) Consolidated quarterly information (Continued)

Despite the fact that the Company holds interest in Novasoc that only represents 10% of its capital stock, Novasoc is effectively controlled by the Company by means of a Quotaholders Agreement, with a 99.98% interest in its income.

Sendas Distribuidora is fully consolidated based on the Shareholders Agreement signed, which establishes that the operating and administrative management is exclusively conducted by the Company.

The following eliminations occurred during the consolidation process:

- the balances of assets and liabilities accounts among consolidated companies;
- the interest in the capital, reserves and accumulated earnings of subsidiaries; and
- revenues and expenses balances and the unrealized profit originated in transactions between the consolidated companies.

Pursuant to CVM Ruling 408/04, the Company, since the first quarter of 2005, consolidates the PAFIDC quarterly information, as it represents a special purpose entity, organized with exclusive purpose of conducting the securitization of receivables of the Company and its subsidiaries, once the Company is exposed to most of risks and benefits related to the ownership of PAFIDC subordinated quotas.

The Company's indirect investment in FIC, by means of Bellamar (35.76%) and Lake Niassa (14.24%), was valued by the equity accounting method. Pursuant to the official memorandum CVM/SNC 006/10, FIC's quarterly information is consolidated by Itaú, since the bank is responsible for the company's operating management.

The quarterly information of FIC and Investcred were audited by other independent auditors.

In relation to FIC, in the period ended September 30, 2010, total investments and equity in the earnings of this investee accounted for 0.9% and 8.7%, respectively, in relation to assets and results reported in the Company's consolidated quarterly information.

In relation to Investcred in the period ended September 30, 2010, total investments and equity in the earnings of subsidiaries and associated companies of this investee accounted for 0.1% and 0.3% respectively, in relation to the Company's consolidated quarterly information.

## **06.01 NOTES TO THE FINANCIAL STATEMENTS**

### **12. Intangible Assets (Continued)**

The Company valued the recovery of goodwill book value based on its usage value, using the cash generating units discounted cash flow method, which represent the set of tangible and intangible assets employed in the operation. The process to estimate the usage value involves the utilization of assumptions, judgments and estimates on future cash flows, growth and discount rates. The future cash flow assumptions and growth projections are based on the Company's annual budget and long-term business plan, approved by the Board of Directors, as well as comparable market data and they represent the best Management's estimate on the economic conditions to prevail during the economic useful life of cash flow generating assets.

The key assumptions used when estimating the usage value to which the assets recovery value is more sensitive are as follows:

(i) Revenues Revenues were projected based on the Company's annual budget for the following year and business plan comprising the period between 2010 and 2014;

(ii) Operating costs and expenses Costs and expenses were projected based on the Company's historical performance and its growth was projected in line with sales growth, taking into account its relationship;

(iii) Capital Investments these were estimated taking into account the infrastructure necessary to support sales growth.

The key assumptions were estimated taking into account the Company's historical performance and based on reasonable macroeconomic assumptions and compatible with external sources of information based on the financial market projections, documented and approved by the Company's Management bodies.

Consistently with the economic valuation techniques, the usage value valuation is made for a 5-year period. Revenue growth rates used are compatible with long-term macroeconomic expectations, which are yearly reviewed based on the historical performance and prospects for the sector where the Company operates.

Future cash flows estimated were discounted at a single discount rate of 9.7% this year.

The Company's intangible assets impairment test did not require the recognition of losses since the estimated usage value exceeds its net book value on the valuation date.

## 06.01 NOTES TO THE FINANCIAL STATEMENTS

### 13. Loans and financing (Continued)

#### a) Working capital financing (Continued)

The Company uses swap operations to translate U.S. dollar-denominated, yen-denominated obligations and fixed interest rate to Brazilian *reais* liabilities pegged to CDI (floating) variation.

CDI annual benchmark rate at September 30, 2010 stood at 9.25% (8.79% at June 30, 2010).

#### b) BNDES

The line of credit obtained from the National Bank for Economic and Social Development (BNDES) is subject to incidence on TJLP rate (long-term interest rate), accrued of annual interest rates. In the event the TJLP exceeds 6% p.a., the surplus will be added to the principal outstanding balance. The Company also has agreements indexed based on a basket of foreign currencies, in addition to the respective charges, plus the outstanding balance and annual interest rates. Financing is paid in monthly installments after a grace period, as mentioned below.

In the quarter ended September 30, 2010, the Company had two agreements entered into with BNDES at May 9, 2007, and July 28, 2009, which are indexed by TJLP.

In addition to BNDES Resolutions 665/87 (Provisions Applicable to BNDES Agreements) and 660/87 (Follow-up Rules and Instructions), the Company must observe certain debt covenants indexes calculated based on its consolidated information, in accordance with Brazilian GAAP. At March 3, 2010, the Company renegotiated the ratios to be observed, which now are as follows: (i) maintenance of a capitalization ratio (shareholders' equity/total assets) equal to or in excess of 0.30 and (ii) maintenance of a current ratio (current assets/current liabilities) equal to or in excess of 1.05. The Management effectively controls and monitors debt covenants, and has been fully performing the ratios required on a contractual basis.

The funding obtained by subsidiary Globex with financial institutions (BNDES, Banco IBM and Unibanco) includes event of early maturity related to the change in the share control. Said financial institutions have already officially declared that they will not exercise this right referring to the declaration of early maturity.

The Company adopts risk control policies and procedures, as outlined below:

a) Considerations on risk factors that may affect the business of the Company and its subsidiaries

## 06.01 NOTES TO THE FINANCIAL STATEMENTS

### 14. Financial instruments (Continued)

- *Receivables*: The credit risk related to accounts receivable is mitigated by the fact that most of sales of the Company and its subsidiaries are carried out via credit cards. In the quarter ended September 30, 2010, direct sales to individuals through post-dated checks accounted for nearly 0.43% of total sales in the period (0.31% at September 30, 2009). Credit card and/or tickets sales are mostly assigned to PAFIDC, the risk of which is related and limited to the amount of subordinated quotas held by the Company (Note 8).

#### (ii) *Interest rate risk*

The Company and its subsidiaries obtain loans and financing from major financial institutions in order to meet its cash needs for investments and growth. As a result, the Company and its subsidiaries are exposed to material interest rate fluctuation risks, mainly due to the liabilities component of derivative operations (currency hedge) and CDI-related debts. The balance of marketable securities indexed to CDI, partially offsets this effect.

(iii) *Exchange rate risk*

The Company and its subsidiaries are exposed to exchange rate fluctuations, which may result in the increase of liabilities balances of foreign currency-denominated loans. The Company and its subsidiaries use derivatives, such as swaps, which aim at annulling the exchange rate risk, turning the cost of debt into local currency and interest rates.

- *Derivative financial instruments*

The swap agreements mentioned above are classified as fair value hedges. At September 30, 2010, these agreements amount to a reference value of R\$1,997,470 (R\$1,680,720 in June 2010). Usually, these operations are contracted on a matched basis, in terms of value, term and rates, and preferably with the same financial institution, observing the limits established by the Management.

Other swap operations carried out by the Company and its subsidiaries are substantially related to debentures and BNDES loans, aiming at changing fixed and variable interest rates into variable interest rates (CDI). These instruments are classified as measured at fair value to income .

According to the Company s treasury policy, swaps with caps are not allowed, as well as margins, regret clauses, double index, flexible options or any other types of options different from traditional swaps for the hedge of debts, including for speculative purposes.

The Company s internal control environment was designed so as to ensure that transactions executed are in compliance with this treasury policy.

The Company calculates the effectiveness of these hedge operations upon their contracting and on a continued basis (at least, quarterly). Hedge operations contracted in the period ended September 30, 2010 showed effectiveness in relation to the debts, purpose of this hedge. For derivative operations qualified as hedge accounting, pursuant to CPC 14, the hedged debt is also adjusted at fair value as per fair value hedge rules.

## **06.01 NOTES TO THE FINANCIAL STATEMENTS**

### **14. Financial instruments (Continued)**

#### *(iv) Fair values of derivative financial instruments*

Fair values are calculated by projecting the future flows of operations, based on the projected CDI curves of BM&F Bovespa and carrying them at present value, using DI market rates to swaps published by BM&F Bovespa.

The market values of swaps exchange coupon x CDI were obtained by using exchange rates prevailing on the market on the date the financial information is drawn up and on rates projected by the market calculated based on the currency coupon curves. In order to determine the coupon of foreign currency indexed-positions the straight line convention of 360 consecutive days was adopted and to determine the coupon of CDI indexed-position the exponential convention of 252 business days was adopted.

#### **b) Analysis of sensitivity of derivative financial instruments**

CVM Ruling sets forth that publicly-held companies, supplementing the provision of item 59 of CPC 14 Financial Instruments: Recognition, Measurement and Supporting Documentation should disclose a sensitivity analysis chart, for each type of market risk deemed as relevant by the Management, originated by derivative financial instruments, to which the entity is exposed on each period closing date.

Pursuant to the provision above, according to the Management's evaluation, the most probable scenario is to realize on the maturity dates of each operation what the market has been signaling through market curves (currency and interest rates) of BM&F Bovespa. Therefore, in the probable scenario, there is no impact over the fair value of financial instruments mentioned above. For scenarios II and III, for exclusive effect of sensitivity analysis, a deterioration of 25% and 50%, respectively, was considered on derivative financial instruments until the maturity date of financial instruments.

(i) *Fair value hedge (on maturity dates)*

For derivative instruments (destined to hedge its financial debt), variations in scenarios are accompanied by respective purposes of hedge, thus, evidencing that effects are practically null.

For these operations, the Company disclosed the balance of purpose (debt) and hedged derivative financial instrument in separate items of a Sensitivity Analysis Chart, so that to inform about the net exposure of the Company, in each one of the three scenarios mentioned:

e) Stock option plan for preferred shares (Continued)

(i) *Original stock option plan*

The number of shares may vary for each beneficiary or series. The vesting right to exercise the option may occur as follows and according to the following terms: (i) 50% in the last month of third year subsequent to the granting date (1<sup>st</sup> tranche) and ii) until 50% in the last month of fifth year subsequent to the granting date (2<sup>nd</sup> tranche), and the remaining portion of the second tranche subject to restraint on alienation until the beneficiary's retirement, as per formula defined in the regulation.

Shares subject to restraint on alienation (Q), upon the options exercise are calculated using the following formula:

Where:

$Q$  = Number of shares to be encumbered by restraint on alienation.

$Q1$  = 50% of the Company total shares on the granting date.

$Pm$  = Company share market price on the exercise date.

$Pe$  = Share original exercise price, determined on the granting date, observing the terms of the Plan.

The option price is updated by reference to the General Market Price Index IGP-M variation to the date of its actual exercise, less dividends attributed for the period.

(ii) *New stock option plan for preferred shares.*

Pursuant to the resolutions at the Special Shareholders Meeting, held at December 20, 2006, the amendment to the Company's Stock Option Plan was approved, and originally approved by the Special Shareholders Meeting held at April 28, 1997.

As of 2007, the granting of stock options to the Management and employees will take place as follows:

Shares will be classified as follows: Silver and Gold, and the quantity of Gold-type shares may be decreased and/or increased (reducer or accelerator), at the discretion of the Plan management committee, in the course of 35 months following the granting date.

The price for the Silver-type share will correspond to the average of trading closing price of the Company preferred shares occurred over the last 20 trading sessions of BOVESPA, prior to the date on which the Committee resolves on the granting of option, with a 20% discount. The price for the Gold-type share will correspond to R\$0.01 and the granting of these options are additional to the Silver options, and the granting or the exercise of Gold options is not possible separately. In both cases, the prices will not be restated.

## 12.01 COMMENTS ON THE CONSOLIDATED PERFORMANCE DURING THE QUARTER

The Group's best-performing formats were Assaí and Extra Supermercados, which posted gross same-store sales growth of 19.6% and 24.1% respectively, thanks to a higher customer flow and an increase in the average ticket. In addition, new strategies to increase the number of products per ticket were implemented in all formats.

**In the first nine months of 2010**, GPA reported gross sales of R\$18,849.6 million and net sales of R\$16,943.8 million, 13.7% and 15.1% up, respectively, on the first nine months of 2009.

In same-store terms, gross sales climbed by 10.4%, giving real growth of 5.2% when deflated by the IPCA, while net sales recorded nominal growth of 11.7%. Sales of food and non-food products increased by 9.6% and 13.1%, respectively.

In 4Q10, the Company reaffirmed its commitment to its GPA Food gross sales guidance of R\$26.0 billion in 2010.

**In the third quarter**, GPA's consolidated gross sales grew by 15.6% year-on-year to R\$7,939.6 million, while net sales moved up by 16.6% to R\$7,100.4 million.

In same-store terms<sup>(4)</sup> (i.e. stores that have been operational for at least 12 months, therefore including those Ponto Frio stores that meet this criterion as of this quarter), gross sales grew by 12.5%, giving real growth of 7.2% when deflated by the IPCA. Net sales recorded nominal growth of 13.1% year-on-year.

**In the first nine months**, GPA recorded consolidated gross and net sales of R\$23,540.7 million and R\$21,051.8 million, up by 32.3% and 33.8%, respectively, on the same period last year.

GPA's consolidated gross sales guidance for 2010 is R\$33.0 billion and, given the year-to-date results, we expect to reach this target.

<sup>(3)</sup> Like ABRAS (the Brazilian Supermarket Association), the Company has adopted the IPCA consumer price Index as its inflation indicator, since it gives a more accurate reflection of the Company's product and brand mix.

<sup>(4)</sup> Ponto Frio's same-store concept includes physical and electronic/wholesale sales.

**In the third quarter**, GPA's gross profit totaled R\$1,443.9 million, 12.1% up year-on-year, accompanied by a gross margin of 25.9%, up by 50 bps over 3Q09 and also an improvement over the 24.8% recorded in 2Q10. (3) Reclassification in Selling, General and Administrative Expenses in 2009

The Selling and General and Administrative Expenses lines were reclassified in 2009 in order to allow for better comparisons.

**In the third quarter**, total operating expenses (including selling, general and administrative expenses) increased by 10.3% year-on-year to R\$1,027.5 million, chiefly due to four factors:

- (i) higher personnel and social benefit expenses;
- (ii) increased expenses with advertising and marketing;
- (iii) expenses with technology to support business expansion in the coming years; and
- (iv) opening of new stores

Despite these upturns, GPA managed to maintain operating expenses at 18.4% as a percentage of net sales, same level as presented in 3Q09, which demonstrates dilution of other expenses.

**In the first nine months**, total operating expenses came to R\$3,095.3 million, 13.9% more than in 9M09, representing 18.3% of net sales, 20 bps less than the 18.5% recorded in the same period last year.

**In the third quarter**, the net financial expense came to R\$102.1 million, equivalent to 1.8% of net sales, chiefly due to the increase in the net debt from R\$597 million in 3Q09 to R\$1,788 million in 3Q10 and the period upturn in the SELIC base rate (see page 7 below, [Net Debt](#))

The net financial expense of R\$102.1 million in 3Q10 was the result of three factors:

(i) interest on the net bank debt totaling R\$54.4 million, representing 1.0% of net sales, 30 bps higher than the 2Q10 ratio, fueled by the period increase in net debt and the SELIC base rate.

(ii) Discounted receivables of R\$28.2 million, equivalent to 0.5% of net sales, in line with the 2Q10 figure, despite the increase in the SELIC base rate. The average term is of 36 days and an average cost of 109.5% of CDI.

Net debt increased, as shown in the graph below, mainly due to: (i) expenditure of R\$598 million on acquisitions, including R\$471 million paid to Globex's shareholders; (ii) investments of R\$98 million in the expansion of Assaí; and (iii) a R\$194 million loan with Globex.

(1) end of period

In the first nine months, the net financial expense was R\$271.3 million, 50.5% higher than the 3Q09 expense.

**In the third quarter**, GPA's consolidated net financial expense was R\$191.7 million, equivalent to 2.7% of net sales.

It is worth noting the recognition of R\$18.0 million in non-recurring costs from Globex this quarter, due to the change in the criterion for booking the cost of discounted receivables, which are now recognized in the same month as the discount.

Excluding this non-recurring effect, the net financial expense would have been R\$173.7 million, equivalent to 2.4% of net sales.

## 12.01 COMMENTS ON THE CONSOLIDATED PERFORMANCE DURING THE QUARTER

**In the first nine months**, the net financial expense came to R\$465.2 million, or R\$415.2 million excluding the non-recurring effect of R\$ 50.0 million in 9M10.

### Equity Income

*FIC's result came to R\$11.7 million in the quarter*

### CONSOLIDATED

Since the third quarter of 2009, FIC (Financeira Itaú CBD) has also been operating Globex's credit cards and, given their respective shareholders' equities, GPA now retains a 36% interest in FIC, excluding Globex, while Globex retains a 14% stake. GPA's consolidated interest in FIC remains at 50%.

**In the third quarter**, FIC, including Globex's operations, accounted for 15.0% of total sales, closing the period with 7.4 million clients. Default remained under control, thanks to a rigorous credit-granting policy.

As a result, FIC's equity income was R\$11.7 million, six times more than the same period a year earlier. Of this total, R\$9.5 million went to GPA and R\$2.3 million to Globex.

This performance was in line with the Group's strategy of increasing the FIC card's share of sales, making it the best payment option in the stores and e-commerce operations, with exclusive benefits and advantages for card-holders.

**In the first nine months**, equity income, including Globex's operations, totaled R\$36.0 million, of which R\$26.4 million went to GPA and R\$9.6 million to Globex.

## Net Income

**GPA Food's net income totaled R\$138.0 million in 3Q10**

**In the third quarter**, Assaí recorded gross sales of R\$816.2 million, including the stores in São Paulo, Ceará, Rio de Janeiro, Pernambuco and Tocantins<sup>(6)</sup>, 47.5% up on 3Q09, fueled by the sales of new channels, organic growth, conversion of stores, and the format's improved operating result. Gross profit totaled R\$108.5 million, with a margin of 14.7%, 10 bps up on 3Q09.

## **12.01 COMMENTS ON THE CONSOLIDATED PERFORMANCE DURING THE QUARTER**

Total operating expenses came to R\$82.9 million, equivalent to 11.3% of net sales, very close to the 3Q09 ratio, but 80 bps down on 2Q10.

EBITDA amounted to R\$25.6 million, 46.9% up on 3Q09, with a margin of 3.5%, i.e. up by 100 bps, evidence of an improved operating performance despite the new stores under maturation.

**In the first nine months** <sup>(6)</sup>, Assaí posted gross sales of R\$2,237.3 million and net sales of R\$2,021.1 million, 49.2% and 49.6% up, respectively, on 9M09.

Gross profit totaled R\$288.0 million, with a margin of 14.2%, 10 bps down on the 14.3% margin recorded in 9M09, due to investments in competitive pricing at the beginning of 2010.

Total operating expenses came to R\$227.6 million, representing 11.3% of net sales, 90 bps less than the same period last year.

EBITDA stood at R\$60.4 million, 143.9% up year-on-year, with a margin of 3.0%, a 120 bps improvement.

(6) The Tocantins store was included in the figures for all months in 2010.

**Globex Utilidades S.A.**

***In same-store terms, gross sales increased by 39.9%***

**In the third quarter, gross sales** came to R\$ 1,720.1 million, 41.7% up on the same period in 2009, while **net sales** grew by 49.3% to R\$ 1,514.5 million.

**Gross profit** stood at R\$300.3 million, 86.9% up on the same period last year, with a gross margin of 19.8%, a 400 bps improvement.

**Total operating expenses** came to R\$223.2million, representing 14.7% of net sales, a 190 bps reduction compared to the 3Q09.

**EBITDA** was a positive R\$77.1 million, with a margin of 5.1%, versus a negative R\$8.3 million in 3Q09.

The **net financial result** was a negative R\$89.6 million. It is worth noting that, in this quarter, there was a non-recurring expense of R\$18.0 million due to the change in the criterion for booking the cost of discounted receivables. Excluding this effect, the net financial expense would reach R\$71.6 million, representing 4.7% of net sales.

**Equity income**, considering Globex's 14% interest in FIC, came to R\$2.3 million. This performance was in line with the strategy of increasing the FIC card's share of sales, making it the best payment option in the Group's stores and e-commerce operations, with exclusive benefits and advantages for card-holders.

The **net result** was a loss of R\$18.3 million, a R\$25.9 million improvement over the loss recorded in 3Q09.

Globex's **investments** totaled R\$9.4 million, less than the R\$15.9 million recorded in 3Q09. The reduction was due to the Company's decision to concentrate first on capitalizing the existing assets and maximizing the synergies with Casas Bahia.
