Comments on the Company's Performance

The main factors that led to this variation were:

- Tariff increase of 8.4% since May 2016;
- Increase of 2.7% in the Company's total billed volume (2.9% in water and 2.4% in sewage);
- Bonus granted in 2Q16 amounting to R\$ 33.6 million, within the Water Consumption Reduction Incentive Program ended in April 2016; and
- Lower provisioning for loss of wholesale revenue in 2Q17, in the amount of R\$ 21.0 million, due to the payment received in the period.

The increase resulting from the above mentioned factors was partially offset by the suspension of the Contingency Tariff in April 2016, in the amount of R\$ 64.2 million in 2Q16.

3. Construction revenue

Construction revenue decreased R\$ 117.8 million or 13.1%, when compared to 2Q16. The variation was mainly due to lower investments in the municipalities served by the Company.

6.1.1. Financial expenses

Decrease of R\$ 7.9 million, mainly due to the following events:

- Interest and charges on international loans and financing: increase of R\$ 5.1 million, mainly due to the appreciation of the dollar and the yen against the real at the end of 2Q17 (4.4% and 3.5%, respectively), versus a depreciation in 2Q16 (-9.8% and -1.4%, respectively);
- Interest and charges on domestic loans and financing: reduction of R\$ 7.1 million, mainly due to a decline in the debt balance following the partial amortizations of the 10th and 15th debenture issues in January and February 2017, respectively, and the full amortization of the 19th issue in June 2017; and

Comments on the Company's Performance

- Other financial expenses: reduction of R\$ 5.9 million, mostly due to lower provisioning for interest on court proceedings in 2Q17.

6.2. Monetary and exchange rate variation on assets and liabilities

6.2.1 Monetary and exchange rate variation on liabilities

The effect of monetary and currency variations in 2Q17 was R\$ 655.3 million higher than in 2Q16, mainly due to:

- Reduction of R\$ 13.7 million in expenses with monetary variation on loans and financing, due to the lower variation in the IPCA in 2Q17 compared with 2Q16 (0.2% and 1.8%, respectively); and
- Increase of R\$ 672.9 million in exchange variation on loans and financing, as a result of the appreciation of dollar and yen against the real in 2Q17 (4.4% and 3.5%, respectively), versus a devaluation of -9.8% and -1.4%, respectively, in 2Q16.

6.2.2. Monetary and exchange rate variation on assets

Decrease of R\$ 8.4 million, mainly due to the lower monetary restatement of judicial deposits in 2Q17.

7. Income tax and social contribution

Decrease of R\$ 267.4 million, mainly due to the lower taxable result reported in the period, which was mainly impacted by the appreciation of dollar and yen against the real in 2Q17, versus a devaluation in 2Q16.

1 Operations

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water and sewage services on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. SABESP aims to be a world reference in the provision of sanitation services, in a sustainable, competitive and innovative manner, with a focus on customers.

As of June 30, 2017, the Company operated water and sewage services in 367 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession, program and services contracts. The Company has two partial contracts with the municipality of Mogi das Cruzes, however, since most of municipality is serviced by wholesale, it was not included in the 367 municipalities. As of June 30, 2017, the Company had 369 contracts.

SABESP is not temporarily operating in some municipalities due to judicial orders. The lawsuits in progress refer to Macatuba and Cajobi, and the carrying amount of these municipalities' intangible assets was R\$ 4,345 as of June 30, 2017 (R\$ 4,345 as of December 31, 2016).

As of June 30, 2017, 53 concession agreements (54 as of December 31, 2016) had expired and are being negotiated. From July 1, 2017 to 2030, 33 concession agreements will expire. Management believes that concession agreements expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By June 30, 2017, 283 program and services contracts were signed (281 contracts as of December 31, 2016).

As of June 30, 2017, the carrying amount of the underlying assets used in the 53 concessions of the municipalities under negotiation totaled R\$ 6,673,906, accounting for 20.74% of the total, and the related gross revenue for the six-month period ended June 30, 2017 totaled R\$ 904,237, accounting for 12.16% of the total.

The Company's operations are concentrated in the municipality of São Paulo, which represents 53.58% of the gross revenues on June 30, 2017 (54.25% on June 30, 2016) and 48.00% of intangible assets (46.57% on December 31, 2016).

On June 23, 2010, the State of São Paulo, the Municipality of São Paulo, the Company and the regulatory agency "Sanitation and Energy Regulatory Agency – ARSESP" signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services. On the same date, the State of São Paulo, the Municipality of São Paulo and SABESP signed the "Public service provision agreement of water supply and sewage services", a 30-year concession agreement which is extendable for another 30 years. This agreement involves the following activities:

Notes to the Interim Financial Information

- i. protection of the sources of water in collaboration with other agencies of the State and the City;
- ii. capture, transport and treatment of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and
- iv. adoption of other actions of basic and environmental sanitation.

The Company operates under an authorization by public deed in some municipalities in the Santos coast region and in the Ribeira Valley, where the Company started to operate after the merger of the companies that formed it. In September 2015, the Company entered into a water supply and sewage public utility services agreement with the municipality of Santos; the gross revenue calculated in the six-month period ended June 30, 2017 totaled R\$ 183,508 (R\$ 138,253 in the period ended June 30, 2016) and the intangible asset was R\$ 300,503 on June 30, 2017 (R\$ 303,540 on December 31, 2016).

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period of time, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012, which amended Article 7°-A of Law 11,578, of November 26, 2007, allowed the provision of public basic sanitation services to be executed until December 31, 2016.

The Company's Management understands that in the municipalities where the concession agreements were not yet renewed, the operation is governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the Novo Mercado segment of BM&FBovespa under the ticker symbol SBSP3 since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") Level III, under the SBS code, since May 2002.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andrada, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho, Attend

Ambiental and Paulista Geradora de Energia. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

As of May 31, 2017, ANA and DAEE disclosed the renewal of the concession of the Cantareira System for another 10 years. The terms of this concession define the water volume the Company is authorized to withdraw from the Cantareira System to supply the São Paulo Metropolitan Region. This concession establishes five water withdrawal bands, based on the volume of water available in the Cantareira System reservoirs: (i) if the volume of water available is higher than 60% of the reservoirs' capacity, the Company may withdraw up to 33 m³/s; (ii) if the volume of water available is between 40% and 60% of the reservoirs' capacity, the Company may withdraw up to 31 m³/s; (iii) if the volume of water available is between 30% and 40% of the reservoirs' capacity, the Company may withdraw up to 27 m³/s; (iv) if the volume of water available is between 20% and 30% of the reservoirs' capacity, the Company may withdraw up to 23 m³/s; and (v) if the volume of water available is lower than 20% of the reservoirs' capacity, the Company may withdraw up to 15.5 m³/s.

Notes to the Interim Financial Information

In June 2017, the reservoirs of the São Paulo Metropolitan Region stored approximately 1.3 trillion liters of treatment water, versus approximately 1.0 trillion liters in June 2016.

At the end of 2017 and beginning of 2018 two important projects aimed to increase water security in the São Paulo Metropolitan Region are expected to be concluded, as follows: (i) the Jaguarí-Atibainha interconnection, which will transfer up to 5.13 cubic meters per second (m³/s) from the Paraíba do Sul Basin to the Cantareira System; and (ii) the construction of the São Lourenço Production System, which will expand water production and capacity by 6.4 m³/s.

Management expects that with the normalization of rainfall, the generation of operating cash and the credit lines available for investment, the Company will have sufficient funds to meet its commitments and not compromise its necessary investments.

The interim financial information was approved by the Board of Directors on August 14, 2017.

3 Summary of significant accounting policies

The accounting policies used in the preparation of the interim financial information for the quarter ended June 30, 2017 are consistent with those used to prepare the Annual Financial Statements for the year ended December 31, 2016. These policies are disclosed in Note 3 to the Annual Financial Statements.

4 Risk management

4.1 Financial Risk Management Financial risk factors

The Company's activities are affected by Brazilian economic scenario, making it exposed to market risk (exchange rate and interest rate), credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

(a) Market risk Foreign currency risk

SABESP's foreign exchange exposure implies market risks associated with currency fluctuations, since the Company has foreign currency-denominated liabilities, mainly US dollar and yen-denominated short and long-term borrowings.

The management of SABESP's foreign currency exposure considers several current and projected economic factors, besides market conditions.

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated borrowings and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to hedge against this risk.

A significant amount of the Company's financial debt is indexed to the U.S. dollar and Yen, in the total amount of R\$ 5,725,544 as of June 30, 2017 (R\$ 5,692,984 as of December 31, 2016). Below, the Company's exposure to exchange risk:

	June 30, 2017	December 31, 2016
	Foreign currency	R\$ Foreign currency R\$
Borrowings and financing – US\$	1,201,121 3,973,548	1,241,963 4,047,682

Interest and charges from borrowings and financing – US\$	24,892	25,114
Interest and charges from borrowings and financing – Yen	10,828	10,769
Total exposure	5,725,544	5,692,984
Borrowing cost – US\$	(28,277)	(29,650)
Borrowing cost – Yen	(3,055)	(2,971)
Total foreign currency-denominated borrowings (Note 15)	5,694,212	5,660,363

Notes to the Interim Financial Information

The 1% increase in foreign-currency denominated debt from June 30, 2017 to December 31, 2016 was mainly due to the following:

- 1) Exchange rate changes, due to the 1.5% increase in the US dollar, from R\$ 3.2591 as of December 31, 2016, to R\$ 3.3082 as of June 30, 2017. The US dollar-denominated debt accounts for 69.7% of foreign currency-denominated debts; and
- 2) Exchange rate changes, due to the 5.4% increase in the Yen, from R\$ 0.02792 as of December 31, 2016 to R\$ 0.02944 as of June 30, 2017.
- 3) The increase was partially offset by the amortization of the BID 713 and AB LOAN agreements.

As of June 30, 2017, if the Brazilian real had depreciated or appreciated by 10%, in addition to the impacts mentioned above, against the US dollar and Yen with all other variables held constant, effects on results before taxes on the six-month period ended June 30, 2017 would have been R\$ 572,554 (R\$ 569,298 for the year ended December 31, 2016), lower or higher, mainly as a result of exchange losses or gains on the translation of foreign currency-denominated loans.

Scenario I below presents the effect in income statements for the next 12 months, considering the projected rates of the U.S. dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciations of 25% and 50%, respectively, in the Brazilian real.

	Scenario I (Probable) (*)	Scenario II (+25%)	Scenario III (+50%)

Total effect on net financial result in R\$ - (loss)	(169,726)	(1,634,906)	(3,099,502)

(*) For the probable scenario in US dollar, the exchange rate estimated for June 30, 2018 was used, pursuant to the Focus Report-BACEN of June 30, 2017, while for the Yen, the average exchange rate was considered for the 12-month period after June 30, 2017, according to BM&FBovespa's Reference Rates report of June 30, 2017.

Notes to the Interim Financial Information

Interest rate risk

This risk arises from the possibility that the Company could incur losses due to fluctuations in interest rates, increasing the financial expenses related to borrowings and financing.

The Company has not entered into any derivative contract to hedge against this risk; however continually monitors market interest rates, in order to evaluate the possible need to replace its debt.

The table below provides the Company's borrowings and financing subject to variable interest rate:

	June 30, 2017	December 31, 2016
TR ⁽ⁱ⁾	1,535,608	1,535,030
CDI ⁽ⁱⁱ⁾	644,391	1,082,228
TJLP ⁽ⁱⁱⁱ⁾	1,426,876	1,326,631
IPCA ^(iv)	1,711,995	1,697,452
LIBOR ^(v)	2,815,677	2,906,999
Interest and charges	88,967	142,644
Total	8,223,514	8,690,984

(i) TR – Interest Benchmark Rate

(ii) CDI – (Certificado de Depósito Interbancário), an interbank deposit certificate

(iii) TJLP – (Taxa de Juros a Longo Prazo), a long-term interest rate index

(iv) IPCA – (Índice Nacional de Preços ao Consumidor Amplo), a consumer price index

(v) LIBOR – London Interbank Offered Rate

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Tariff adjustments of services provided by the Company do not necessarily follow the increases in the inflation indexes to adjust borrowings, financing and interest rates affecting indebtedness.

As of June 30, 2017, if interest rates on borrowings and financing had been 1% higher or lower with all other variables held constant, the effects on profit for the six-month period ended June 30, 2017 before taxes would have been R\$ 82,235 (R\$ 86,910 as of December 31, 2016) lower or higher, mainly as a result of a lower or higher interest expense on floating rate borrowings and financing.

(b) Credit risk

Credit risk arises from cash equivalents, deposits in banks and financial institutions, as well as credit exposures to wholesale basis and retail customers, including outstanding accounts receivable, restricted cash and accounts receivable from related parties. Credit risk exposure to customers is mitigated by sales to a dispersed base.

The maximum exposures to credit risk as of June 30, 2017 are the carrying amounts of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade receivables and accounts receivable from related parties at the end of reporting period. See additional information in Notes 6, 7, 8 and 9.

Notes to the Interim Financial Information

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to impairment can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. The credit quality of counterparties which are banks, such as deposits and financial investments, the Company considers the lower rating of the counterparty published by three main international rating agencies (Fitch, Moody's and S&P), according to internal policy of market risk management:

	June 30, 2017	December 31, 2016
Cash at bank and short-term bank deposits

(*)This category includes current accounts and investment funds in banks (the balances of which were not material) that have no credit rating information available.

The available credit rating information of the banks, as at June 30, 2017, in which the Company made deposit transactions and financial investments in domestic currency (R\$ - domestic rating) during the period is as follows:

As of June 30, 2017 and December 31, 2016, SABESP had contingent assets with GESP, not recorded in assets referring to the additional retirement and pension paid (Law 4,819/58), named “Disputed amounts receivable”, totaling R\$ 974,438 and R\$ 937,035, respectively.

(c) Use of reservoirs – EMAE

Empresa Metropolitana de Águas e Energia S.A. (“EMAE”) planned to receive for the credit and obtain financial compensation for alleged past and future losses in electricity generation, due to water collection, and compensation for costs already incurred and to be incurred with the operation, maintenance and inspection of the Guarapiranga and Billings reservoirs used by SABESP in its operations.

Several lawsuits were filed by EMAE, among which an arbitration proceeding related to the Guarapiranga reservoir and a lawsuit related to the Billings reservoir, both pleading for financial compensation due to SABESP’s water collect for public supply, alleging that this conduct has been causing permanent and growing loss in the capacity of generating electricity of Henry Borden hydroelectric power plant, resulting in financial losses.

As of April 10, 2014, the Company issued a Notice to the Market including the information about an eventual future agreement.

As of October 28, 2016, the Company entered into an agreement based on a Private Transaction Agreement and Other Adjustments with EMAE aimed to fully and completely settle the disputes involving the two companies.

Pursuant to the terms of Clause Two of the agreement, the transaction is subject to the condition precedent of approval by the competent bodies of EMAE.

Upon ratification of the agreement, all litigation between SABESP and EMAE will cease permanently.

The agreement involves the payment by SABESP to EMAE of the following amounts:

- R\$ 6,610 annually, adjusted for inflation from the signature date of this instrument, based on the IPCA or on any other index that may replace it, to the last business day of October of each fiscal year, of which (i) the first annual payment until the last business day of October 2017 and (ii) the last payment until the last business day of October 2042; and

Notes to the Interim Financial Information

- R\$ 46,270, in five annual and successive installments, adjusted for inflation based on the IPCA, or on any other index that may replace it, the first installment of R\$ 9,254 maturing on April 30, 2017 and the remaining 4 (four) installments, of the same amount, due on every April 30 (thirty) of the subsequent years, or the first subsequent business day.

At the same time, on April 11, 2016, the Company was served with process filed by EMAE's minority shareholders against the São Paulo State. The plaintiffs of these lawsuits are seeking a decision that requires the State to prohibit SABESP from extracting water from these reservoirs without paying a financial compensation to EMAE and that allows EMAE to pump water from the reservoirs to its hydroelectric power plant. The plaintiffs of this lawsuit claim that the State, as EMA's controlling shareholder, acted against EMAE and in favor of SABESP.

On August 7, 2017, the Company was once again served with process in a citizen suit filed by Alvaro Luiz de Lima de Alvares Otero against ANEEL, EMAE and SABESP requesting the annulment of ANEEL order 3431/16, which consents to the above transaction. The plaintiff claims that the act is illegal and harmful, compromises the operational feasibility of the Henry Borden hydroelectric power plant and jeopardizes the energy security of the São Paulo State, the Southeast region and Brazil. Finally, the plaintiff requests SABESP to indemnify EMAE for said act, at an amount to be calculated in the liquidation of the award.

If SABESP can no longer extract water from these reservoirs, it will have to transport water from more distant places, increasing water transportation costs, which may jeopardize the Company's ability to provide an appropriate service in the region.

(d) Agreements with reduced tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA)

The Company has signed agreements with government entities related to the State Government and municipalities where it operates that benefit from a reduction of 25% in the tariff of water supply and sewage services when they are not in default. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in water consumption.

(d) Agreements with reduced tariffs with State and Municipal Government Entities that joined the Rational Water

(e) Guarantees

The State Government provides guarantees for some borrowings and financing of the Company and does not charge any fee with respect to such guarantees.

The Company has personnel assignment agreements with entities related to the State Government, whose expenses are fully passed on and monetarily reimbursed. From April to June 2017 and in the same period in 2016, the expenses related to personnel assigned by SABESP to other state government entities amounted to R\$ 2,612 and R\$ 2,962, respectively, and, from January to June 2017 and 2016, they amounted to R\$ 5,135 and R\$ 5,209, respectively.

From January to June 2017, the bonus totaled R\$ 309 (R\$ 247 from January to June 2016).

(k) Loan agreement through credit facility

The Company holds interest in certain Special Purpose Entities (SPEs), not holding the majority interest but with cast vote and power of veto in some issues, with no ability to use such power of veto in a way to affect returns over investments. Therefore, these SPEs are considered for accounting purposes as jointly-owned subsidiaries.

The credit has been overdue since May 11, 2015 and is subject to contractual default charges (inflation adjustment considering the IGP-M variation, 2% fine and default interest of 1% p.m.). The agreement has been renegotiated between the parties.

(ii) The R\$ 19,000 loan agreement originally expired on April 30, 2015, but was extended to October 30, 2015. The Company and Aquapolo Ambiental S/A are renegotiating the payment terms and the maturity of both agreements.

As a result of the renegotiations, the principal, in the amount of R\$ 30,029, and interest, in the amount of R\$ 18,955, that used to be recognized in current assets, under "other receivables", were reclassified to the same group of noncurrent assets until new payment conditions are agreed upon. (I) "Se Liga na Rede" (Connect to the Network Program)

The State Government enacted the State Law n° 14,687/12, creating the pro-connection program, destined to financially subsidize the execution of household branches necessary to connect to the sewage collecting networks, in low income households which agreed to adhere to the program. The program expenditures, except for indirect costs, construction margin and borrowing costs are financed with 80% of funds deriving from the State Government and the remaining 20% invested by SABESP, which is also liable for the execution of works. As of June 30, 2017, the program total amount was R\$ 79,525 (R\$ 79,274 as of December 31, 2016), R\$ 3,772 (R\$ 6,148 as of December 31, 2016) recorded in balances receivable from related parties, the amount of R\$ 35,166 (R\$ 34,915 as of December 31, 2016) recorded in the group of intangible assets and R\$ 40,587 (R\$ 38,211 as of December 31, 2016) reimbursed by GESP.

10 Water National Agency - ANA

The Company has agreements executed within the scope of the Hydrographic Basin Depollution Program (PRODES), also known as "Treated Sewage Purchase Program".

(I) "Se Liga na Rede" (Connect to the Network Program)

This program does not finance works or equipment, remunerates by results achieved, i.e., by effectively treated sewage. In this program, the Water National Agency (ANA) makes available funds, which are restricted to a specific current account and applied in investment funds at the Brazilian Federal Savings Banks (CEF), until the fulfillment of treated sewage volume is evidenced, as well as, the reduction of polluting cargoes of each agreement.

When resources are made available, liabilities are recorded until funds are released by ANA. After the evidence of targets stipulated in each contract, the revenue deriving from these funds is recognized, but if these targets are not met, funds will return to the National Treasury with the appropriate funds earnings. As of June 30, 2017, the balances of assets and liabilities were R\$ 82,926 (R\$ 81,221 as of December 31, 2016), and the liabilities are recorded under "other liabilities" of noncurrent liabilities.
