### 5.1. Salaries and payroll charges and Pension plan obligations

There was an increase of R\$ 331.1 million in 3Q17, mainly due to:

- Increase of R\$ 34.5 million, mostly due to the 1% increase related to the Career and Salary Plan since December 2016 and the 3.71% pay rise in May 2017; and
- Migration of 3,572 participants from the Defined Benefit Plan (G1) to the Defined Contribution Plan (Sabesprev Mais) in 3Q16, generating an early reduction of R\$ 334.2 million in the actuarial deficit, offset by an incentive and extraordinary contribution of R\$ 26.8 million, resulting in a net reduction of R\$ 307.4 million in expenses in that period.

## 5.2. Services

Services expenses totaled R\$ 288.4 million, R\$ 58.7 million less than the R\$ 347.1 million recorded in 3Q16. This decline was distributed in several items, including:

- Marketing campaigns, in the amount of R\$ 10.9 million;
- Nautical services related to the application of chemicals in the water reservoirs, in the amount of R\$ 10.1 million;
- Leasing of machinery and equipment, in the amount of R\$ 4.3 million; and
- Telephony, in the amount of R\$ 3.2 million.

## 5.3. Electricity

Electricity expenses totaled R\$ 203.6 million in 3Q17, a decrease of R\$ 21.1 million or 9.4% in comparison to the R\$ 224.7 million in 3Q16. The main factors that contributed to this decrease were:

PAGE 17 of 84

ITR – Quarterly Information Form – 9/30/2017 - CIA SANEAMENTO BÁSICO      Version : 1  
ESTADO SÃO PAULO

- Average reduction of 12.1% in the free market tariffs, with an 14.6% increase in consumption;
- Average reduction of 29.4% in the grid market tariff (TUSD), with a 19.6% rise in consumption; and
- Average reduction of 3.0% in the regulated market tariffs, with a 3.0%.decrease in consumption.

In 3Q17, the free market accounted for 35.2% of the total electricity consumed by the Company, the grid market accounted for 31.9% and the regulated market accounted for 32.9% of total consumption.

#### **5.4. General expenses**

General expenses decreased R\$ 64.9 million, or 26.0%, totaling R\$ 184.4 million in 3Q17, versus the R\$ 249.3 million recorded in 3Q16, mainly due to the following reasons:

- Higher provisioning for lawsuits in 3Q16, totaling R\$ 31.6 million; and
- Non-recurring provisioning of R\$ 38.1 million in 3Q16, related to the agreement with Empresa Metropolitana de Águas e Energia – EMAE.

#### **5.5. Depreciation and amortization**

Depreciation and amortization increased R\$ 44.3 million or 15.8%, reaching R\$ 324.5 million in 3Q17 in comparison to the R\$ 280.2 million recorded in 3Q16, largely due to the beginning of operations of intangible assets, in the amount of R\$ 1.6 billion.

**5.6. Allowance for doubtful accounts**

The allowance for doubtful accounts fell R\$ 124.1 million, mainly due to lower default rates in the period.

**6. Other operating revenue (expenses), net**

There was an R\$ 8.3 million increase in this line, mostly due to the payment of R\$ 9.2 million received under the Water Basin Clean up Program.

<b>Financial expenses, net of income</b>	<b>(44.5)</b>	<b>(91.7)</b>	<b>47.2</b>	<b>(51.5)</b>

### 7.1.1. Financial expenses

Decrease of R\$ 26.5 million, mainly due to the following events:

- Interest and charges on domestic loans and financing: decline of R\$ 8.1 million, mainly due to the lower CDI rate in 3Q17, compared with 3Q16 (8.14% and 14.13%, respectively); and
- Other financial expenses: reduction of R\$ 18.6 million, mostly due to lower provisioning for interest on court proceedings in 3Q17.

### 7.1.2. Financial income

Financial income moved up R\$ 20.7 million, mostly due to the higher recognition of interest on installment agreements in 3Q17.

## 7.2. Monetary and exchange rate variation on assets and liabilities

### 7.2.1. Monetary and exchange rate variation on liabilities

The effect of monetary and currency variations in 3Q17 was R\$ 361.4 million lower than in 3Q16, mainly due to:

- Reduction of R\$ 20.8 million in expenses with monetary variation on loans and financing, due to the lower variation in the IPCA in 3Q17 compared with 3Q16 (0.6% and 1.0%, respectively); and;
- Decrease of R\$ 332.4 million in exchange variation on loans and financing, as a result of the devaluation of dollar and yen against the real in 3Q17 (-4.2% and -4.5%, respectively), versus an appreciation of 1.1% and 2.7%, respectively, in 3Q16).

## 8. Income tax and social contribution

Increase of R\$ 155.9 million, mainly due to the higher taxable result reported in the period, which was mostly impacted by the devaluation of dollar and yen against the real in 3Q17, versus an appreciation in 3Q16.

## **1            Operations**

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water and sewage services on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. SABESP aims to be a world reference in the provision of sanitation services, in a sustainable, competitive and innovative manner, with a focus on customers.

As of September 30, 2017, the Company operated water and sewage services in 367 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession, program and services contracts. The Company has two partial contracts with the municipality of Mogi das Cruzes, however, since most of municipality is serviced by wholesale, it was not included in the 367 municipalities. As of September 30, 2017, the Company had 369 contracts.

SABESP is not temporarily operating in the municipalities of Macatuba and Cajobi due to judicial orders. The lawsuits are in progress and the carrying amount of these municipalities' intangible assets was R\$ 4,345 as of September 30, 2017 (R\$ 4,345 as of December 31, 2016).

As of September 30, 2017, 53 concession agreements (54 as of December 31, 2016) had expired and are being negotiated. From October 1, 2017 to 2030, 32 concession agreements will expire. Management believes that concession agreements expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By September 30, 2017, 284 program and services contracts were signed (281 contracts as of December 31, 2016).

As of September 30, 2017, the carrying amount of the underlying assets used in the 53 municipalities under negotiation totaled R\$ 6,616,613, accounting for 20.24% of the total, and the related gross revenue for the nine-month period ended September 30, 2017 totaled R\$ 1,255,378, accounting for 11.26% of the total.

The Company's operations are concentrated in the municipality of São Paulo, which represents 53.64% of the gross revenues on September 30, 2017 (55.35% on September 30, 2016) and 48.46% of intangible assets (46.57% on December 31, 2016).

On June 23, 2010, the State of São Paulo, the Municipality of São Paulo, the Company and the regulatory agency "Sanitation and Energy Regulatory Agency – ARSESP" signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services. On the same date, the State of São Paulo, the Municipality of São Paulo and SABESP signed the "Public service provision agreement of water supply and sewage services", a 30-year concession agreement which is extendable for another 30 years. This agreement involves the following activities:

ESTADO SÃO PAULO

- i. protection of the sources of water in collaboration with other agencies of the State and the City;
- ii. capture, transport and treatment of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and
- iv. adoption of other actions of basic and environmental sanitation.

The Company operates under an authorization by public deed in some municipalities in the Santos coast region and in the Ribeira Valley, where the Company started to operate after the merger of the companies that formed it. In September 2015, the Company entered into a water supply and sewage public utility services agreement with the municipality of Santos; the gross revenue calculated in the nine-month period ended September 30, 2017 totaled R\$ 251,212 (R\$ 206,908 in the period ended September 30, 2016) and the intangible asset was R\$ 299,011 on September 30, 2017 (R\$ 303,540 on December 31, 2016).

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period of time, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012, which amended Article 7-A of Law 11,578, of November 26, 2007, allowed the provision of public basic sanitation services to be executed until December 31, 2016. The Company's Management understands that in the municipalities where the concession agreements were not yet renewed, the operation is governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the Novo Mercado segment of B3 under the ticker symbol SBSP3 since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") Level III, under the SBS code, since May 2002.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andrada, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho, Attend

Ambiental and Paulista Geradora de Energia. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

In September 2017, the reservoirs of the São Paulo Metropolitan Region stored approximately 996.7 billion liters of treatment water, versus approximately 831.9 billion liters in September 2016. The month of October marks the beginning of a new hydrological year, 2017/2018 which, under normal conditions, the period from October to March presents the highest rainfall and, consequently, the highest water inflow into the reservoirs. The water year ended in September recorded rainfall indexes close to the historical average, with the Cantareira System receiving 91% of the expected rainfall, while the Alto Tietê System received 80% and the Guarapiranga System 106%. Together, these are the main systems of the São Paulo Metropolitan Region.

ESTADO SÃO PAULO

At the end of 2017 and beginning of 2018 two important projects aimed to increase water security in the São Paulo Metropolitan Region are expected to be concluded, as follows: (i) the Jaguarí-Atibainha interconnection, which will allow the transfer of an average annual outflow of 5.13 cubic meters per second (m<sup>3</sup>/s) and a maximum outflow of 8.5 m<sup>3</sup>/s from the Paraíba do Sul Basin to the Cantareira System, and which is 90.3% complete; and (ii) the construction of the São Lourenço Production System, which will expand water production and capacity by 6.4 m<sup>3</sup>/s, and which is 81.1% complete.

Management expects that with the normalization of rainfall, the generation of operating cash and the credit lines available for investment, the Company will have sufficient funds to meet its commitments and not compromise its necessary investments.

#### Corporate restructuring

As of May 12, 2017, the Board of the State Privatization Program approved:

- (i) the conducting of studies for SABESP's Capitalization (as defined below);
- (ii) the hiring, by SABESP, of the International Finance Corporation, which is associated with the World Bank;
- (iii) the execution of an agreement between SABESP and the State Government through the Water Resources and Sanitation Department and the Treasury Department, in order to define the scope of the contract and control the relationship between the parties, including a proportional expense reimbursement.

The proposed Capitalization provides for the creation of a corporation to directly control SABESP through the transfer of the shares held by the State of São Paulo to the capital stock of the new corporation. The State of São Paulo will continue holding a sufficient number of shares to ensure SABESP's control, as provided for in law. The objective of the Capitalization is to overcome a situation that restricts investments designed to preserve the expansion of activities

to ensure the universalization of basic sanitation services offered by the Company.

The Capitalization may provide for the admission of institutional investors to contribute financial resources to the capital stock of the new company, strengthening SABESP's corporate governance and business efficiency in order to promote and accelerate the universalization of sanitation services in the State of São Paulo.

As of September 15, 2017, Law 16,525 was sanctioned, enacted and published; it provides for the corporate reorganization of Companhia de Saneamento Básico de São Paulo - SABESP and sets forth other provisions.

The main provisions of the Law are:

- The objective of the Parent Company is, among others:

## **4 Risk management**

### **4.1 Financial Risk Management**

#### **Financial risk factors**

The Company's activities are affected by Brazilian economic scenario, making it exposed to market risk (exchange rate and interest rate), credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

#### **(a) Market risk**

##### **Foreign currency risk**

SABESP's foreign exchange exposure implies market risks associated with currency fluctuations, since the Company has foreign currency-denominated liabilities, mainly US dollar and yen-denominated short and long-term borrowings.

The management of SABESP's foreign currency exposure considers several current and projected economic factors, besides market conditions.

ITR – Quarterly Information Form – 9/30/2017 - CIA SANEAMENTO BÁSICO      Version : 1  
ESTADO SÃO PAULO

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated borrowings and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to hedge against this risk.

A significant amount of the Company's financial debt is indexed to the U.S. dollar and Yen, in the total amount of R\$ 5,435,102 as of September 30, 2017 (R\$ 5,692,984 as of December 31, 2016). Below, the Company's exposure to exchange risk:

	<b>September 30, 2017</b>		<b>December 31, 2016</b>	
	<b>Foreign currency</b>	<b>R\$</b>	<b>Foreign currency</b>	<b>R\$</b>
Borrowings and financing – US\$	1,193,902	3,782,282	1,241,963	4,047,682
Borrowings and financing – Yen	57,304,600	1,611,978	57,643,930	1,609,419
Interest and charges from borrowings and financing – US\$		37,480		25,114
Interest and charges from borrowings and financing – Yen		3,362		10,769
Total exposure		5,435,102		5,692,984
Borrowing cost – US\$		(28,104)		(29,650)
Borrowing cost – Yen		(3,074)		(2,971)
Total foreign currency-denominated borrowings (Note 15)		5,403,924		5,660,363

The 4.5% decrease in foreign-currency denominated debt on September 30, 2017 compared to December 31, 2016, was mainly due to the following:

- 1) Exchange rate changes, due to the 2.8% depreciation in the US dollar, from R\$ 3.2591 as of December 31, 2016 to R\$ 3.1680 as of September 30, 2017. The US dollar-denominated debt accounts for 70.2% of foreign currency-denominated debts; and
- 2) Partial amortization of the BID 713, BID 2202 and AB Loan agreements.

As of September 30, 2017, if the Brazilian real had depreciated or appreciated by 10%, in addition to the impacts mentioned above, against the US dollar and Yen with all other variables held constant, effects on results before taxes on the nine-month period ended September 30, 2017 would have been R\$ 543,510 (R\$ 569,298 for the year ended December 31, 2016), lower or higher, mainly as a result of exchange losses or gains on the translation of foreign currency-denominated loans.

Scenario I below presents the effect in income statements for the next 12 months, considering the projected rates of the U.S. dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciations of 25% and 50%, respectively, in the Brazilian real.

## Interest rate risk

This risk arises from the possibility that the Company could incur losses due to fluctuations in interest rates, increasing the financial expenses related to borrowings and financing.

The Company has not entered into any derivative contract to hedge against this risk; however continually monitors market interest rates, in order to evaluate the possible need to replace its debt.

The table below provides the Company's borrowings and financing subject to variable interest rate:

	<b>September 30, 2017</b>	<b>December 31, 2016</b>
TR(i)	1,569,328	1,535,030
CDI(ii)	1,144,391	1,082,228
TJLP(iii)	1,391,026	1,326,631
IPCA(iv)	1,714,665	1,697,452
LIBOR(v)	2,673,483	2,906,999
Interest and charges	129,017	142,644
Total	8,621,910	8,690,984

(i) TR – Interest Benchmark Rate

(ii) CDI – (Certificado de Depósito Interbancário), an interbank deposit certificate

(iii) TJLP – (Taxa de Juros a Longo Prazo), a long-term interest rate index

(iv) IPCA – (Índice Nacional de Preços ao Consumidor Amplo), a consumer price index

(v) LIBOR – London Interbank Offered Rate

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Tariff adjustments of services provided by the Company do not necessarily follow the

increases in the inflation indexes to adjust borrowings, financing and interest rates affecting indebtedness.

As of September 30, 2017, if interest rates on borrowings and financing had been 1% higher or lower with all other variables held constant, the effects on profit before taxes for the nine-month period ended September 30, 2017 would have been R\$ 86,219 (R\$ 86,910 as of December 31, 2016), lower or higher, mainly as a result of lower or higher interest expense on floating rate borrowings and financing.

**(b) Credit risk**

Credit risk arises from cash equivalents, deposits in banks and financial institutions, as well as credit exposures to wholesale basis and retail customers, including outstanding accounts receivable, restricted cash and accounts receivable from related parties. Credit risk exposure to customers is mitigated by sales to a dispersed base.

The maximum exposures to credit risk as of September 30, 2017 are the carrying amounts of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade receivables and accounts receivable from related parties at the end of reporting period. See additional information in Notes 6, 7, 8 and 9.

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to impairment can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. The credit quality of counterparties which are banks, such as deposits and financial investments, the Company considers the lower rating of the counterparty published by three main international rating agencies (Fitch, Moody's and S&P), according to internal policy of market risk management:

	<b>September 30, 2017</b>	<b>December 31, 2016</b>

AAA(bra)	35,908	35,452
Other (*)	9,560	549
	2,101,000	1,886,221

(\*) This category includes current accounts and investment funds in banks (the balances of which were not material).

The available credit rating information of the banks, as at September 30, 2017, in which the Company made deposit transactions and financial investments in domestic currency (R\$ - domestic rating) during the period is as follows:

<b>Banks</b>	<b>Fitch</b>	<b>Moody's</b>	<b>Standard Poor's</b>

Banco Santander Brasil S/A	-	Aaa.br	brAA-

Banco Bradesco S/A	AAA(bra)	Aa1.br	brAA-
Itaú Unibanco Holding S/A	AAA(bra)	Aa1.br	brAA-

(c) **Liquidity risk**

(b) **Credit risk**

The Company's liquidity is primarily reliant upon cash provided by operating activities, loans from Brazilian Federal and State governmental financial institutions, and financing in the domestic and international capital markets. The liquidity risk management considers the assessment of its liquidity requirements to ensure it has sufficient cash to meet its operating and capital expenditures needs, as well as the payment of debts.

The funds held by the Company are invested in interest-bearing current accounts, time deposits and securities, selecting instruments with appropriate maturity or liquidity sufficient to provide margin as determined by projections mentioned above.

The table below shows the financial liabilities of the Company, into relevant maturities, including the installment of principal and future interest to be paid according to the agreement.

#### Future interest

Future interest was calculated based on the contractual clauses for all agreements. For agreements with floating interest rate, the interest rates used correspond to the base dates above.

#### Cross default

The Company has borrowings and financing agreements including cross default clauses, i.e., the early maturity of any debt, may imply the early maturity of these agreements. The indicators are continuously monitored in order to avoid the execution of these clauses.

**(d) Sensitivity analysis on interest rate risk**

The table below shows the sensitivity analysis of the financial instruments, prepared in accordance with CVM Rule 475/2008 in order to evidence the balances of main financial assets and liabilities, calculated at a rate projected for the twelve-month period after September 30, 2017, or until the final settlement of each contract, whichever is shorter, considering a probable scenario (scenario I), appreciation of 25% (scenario II) and 50% (scenario III).

The purpose of the sensitivity analysis is to measure the impact of changes in the market over the financial instruments of the Company, considering constant all other variables. In the time of settlement the amounts can be different from those presented, due to the estimates used in the measurement.

ITR – Quarterly Information Form – 9/30/2017 - CIA SANEAMENTO BÁSICO ESTADO SÃO PAULO Version : 1

The Company monitors capital based on the leverage ratio. This ratio corresponds to net debt divided by total capital. Net debt corresponds to total borrowings and financing less cash and cash equivalents. Total capital is calculated as total equity as shown in the balance sheet plus net debt.

	<b>September 30, 2017</b>	<b>December 31, 2016</b>
Total borrowings and financing (Note 15)	11,887,771	11,964,143
(-) Cash and cash equivalents (Note 6)	(2,101,000)	(1,886,221)
Net debt	9,786,771	10,077,922
Total equity	17,263,187	15,419,211
Total capital	27,049,958	25,497,133
Leverage ratio	36%	40%

As of September 30, 2017, the leverage ratio decreased to 36% from the 40% as of December 31, 2016, mainly due to the increase in shareholders' equity, generated by the result recorded from January to September 2017.

### **4.3 Fair value estimates**

It is assumed that balances from trade receivables (current) and accounts payable to suppliers by carrying amount, less impairment approximate their fair values, considering the short maturity. Long-term trade receivables also approximate their fair values, as they will be adjusted by inflation and/or will bear contractual interest rates over time.

### **4.4 Financial instruments**

As of September 30, 2017 and December 31, 2016, the Company did not have financial assets classified as fair value through profit or loss, held to maturity and available for sale neither financial liabilities classified as fair value through profit or loss. The Company's financial instruments included in the borrowings and receivables category comprise cash and cash equivalents, restricted cash, trade receivables, balances with related parties, other receivables, and balances receivable from the Water National Agency – ANA. The financial instruments under the “other liabilities” category comprise accounts payable to contractors and suppliers, borrowings and financing, services payable, balances payable deriving from the Public Private Partnership-PPP and program contract commitments, which are non-derivative financial assets and liabilities with fixed or determinable payments, not quoted in an active market.

PAGE 34 of 84

The conditions and additional information referring to these financial instruments are disclosed in Note 9 to this interim financial information and Note 10 to the Annual Financial Statements of December 31, 2016. In the Annual Financial Statements, these criteria are disclosed in Note 5.4.

Considering the nature of other financial instruments, assets and liabilities of the Company, the balances recognized in the balance sheet approximate the fair values, taking into account the maturities close to the end of the reporting period, comparison of contractual interest rates with market rates in similar operations at the end of the reporting period, their nature and maturity terms.

- (i) General customers - residential and small and mid-sized companies
  
- (ii) Special customers – large consumers, commercial industries, condominiums and special billing consumers (fixed demand agreements, industrial waste, wells, etc.);
  
- (iii) Agreements - installment payments of past-due receivables, plus monetary restatement and interest, when provided for in the agreements; and
  
- (iv) Wholesale basis customers - municipal governments - This balance refers to the sale of treated water to municipalities, which are responsible for distributing to, billing and charging final customers. Some of these municipalities are questioning in court the tariffs charged by SABESP, which have full allowance for doubtful accounts. Additionally, the overdue amounts are included in the allowance for doubtful accounts.

As of August 28, 2017, the Company and the Guarulhos Water and Sewage Autonomous Service ("SAAE"), resolved to continue preparing: (i) a legal agreement for the installment payment of SAAE's debits with SABESP; and (ii) interdependence agreement to regulate wholesale water supply by SABESP.

The main items of the Proposal for the Debt Negotiation Agreement are:

I. Interdependence agreement to regulate wholesale water supply by SABESP:

- a) Creation of a guarantee of payment to SABESP for the fiduciary sale of SAAE receivables, with automatic separation of the amounts due to SABESP by the bank centralizing payments to SAAE; and
  
- b) As a result of the provision of the guarantee and the automatic payment, there will be a 20% discount on the monthly billed amount of wholesale water supply services.

II. Legal agreement for the installment payment of SAAE's debits with SABESP:

- a) Debt payment in 480 monthly installments, at an interest rate of 0.5% p.m., adjusted by the IPCA inflation index; and
  
- b) A 30% discount on the municipality's debt of R\$ 2.9 billion with SABESP, subject to timely payment during the installment period.

It is worth noting that the implementation of the items above depends on prior approval by SABESP's Board of Directors, as well as other approvals to be established by each party and obtained prior to the signature of any binding document.

As of September 30, 2017 and December 31, 2016, SABESP had contingent assets with GESP, not recorded in assets referring to the additional retirement and pension paid (Law 4,819/58), named “Disputed amounts receivable”, totaling R\$ 995,351 and R\$ 937,035, respectively.

**(c) Use of reservoirs – EMAE**

Empresa Metropolitana de Águas e Energia S.A. (“EMAE”) planned to receive for the credit and obtain financial compensation for alleged past and future losses in electricity generation, due to water collection, and compensation for costs already incurred and to be incurred with the operation, maintenance and inspection of the Guarapiranga and Billings reservoirs used by SABESP in its operations.

Several lawsuits were filed by EMAE, among which an arbitration proceeding related to the Guarapiranga reservoir and a lawsuit related to the Billings reservoir, both pleading for financial compensation due to SABESP’s water collect for public supply, alleging that this conduct has been causing permanent and growing loss in the capacity of generating electricity of Henry Borden hydroelectric power plant, resulting in financial losses.

As of April 10, 2014, the Company issued a Notice to the Market including the information about an eventual future agreement.

As of October 28, 2016, the Company entered into an agreement based on a Private Transaction Agreement and Other Adjustments with EMAE aimed to fully and completely settle the disputes involving the two companies.

Pursuant to the terms of Clause Two of the agreement, the transaction was subject to the condition precedent of approval by the competent bodies of EMAE. However, on October 19, 2017, SABESP and EMAE entered into the First Amendment to the Private Transaction Agreement and Other Covenants to remove the condition precedent related to the need for approval of the Agreement by EMAE's shareholders' meeting; the other terms and conditions of the transaction were maintained.

All litigation between SABESP and EMAE will cease permanently after ratification of the agreement, which has already occurred on the Arbitration Chamber.

The agreement involves the payment by SABESP to EMAE of the following amounts:

ITR – Quarterly Information Form – 9/30/2017 - CIA SANEAMENTO BÁSICO      Version : 1  
ESTADO SÃO PAULO

- R\$ 6,610 annually, adjusted for inflation from the signature date of this instrument, based on the IPCA or on any other index that may replace it, to the last business day of October of each fiscal year, of which (i) the first annual payment until the last business day of October 2017 and (ii) the last payment until the last business day of October 2042; and

- R\$ 46,270, in five annual and successive installments, adjusted for inflation based on the IPCA, or on any other index that may replace it, the first installment of R\$ 9,254 maturing on April 30, 2017 which was paid after occurrence of the conditions precedent, and the remaining 4 (four) installments, of the same amount, due on every April 30 (thirty) of the subsequent years, or the first subsequent business day.

In October 2017, the first installments mentioned above were paid.

At the same time, on April 11, 2016, the Company was served with process filed by EMAE's minority shareholders against the São Paulo State. The plaintiffs of these lawsuits are seeking a decision that requires the State to prohibit SABESP from extracting water from these reservoirs without paying a financial compensation to EMAE and that allows EMAE to pump water from the reservoirs to its hydroelectric power plant. The plaintiffs of this lawsuit claim that the State, as EMA's controlling shareholder, acted against EMAE and in favor of SABESP.

As of August 7, 2017, the Company was once again served with process in a citizen suit filed by Alvaro Luiz de Lima de Alvares Otero against ANEEL, EMAE and SABESP requesting the annulment of ANEEL order 3,431/16, which consents to the above transaction. The plaintiff claims that the act is illegal and harmful, compromises the operational feasibility of the Henry Borden hydroelectric power plant and jeopardizes the energy security of the São Paulo State, the Southeast region and Brazil. Finally, the plaintiff requests SABESP to indemnify EMAE, at an amount to be calculated.

If SABESP can no longer extract water from these reservoirs, it will have to transport water from more distant places, increasing water transportation costs, which may jeopardize the Company's ability to provide an appropriate service in the region.

**(d) Agreements with reduced tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA)**

The Company has signed agreements with government entities related to the State Government and municipalities where it operates that benefit from a reduction of 25% in the tariff of water supply and sewage services when they are not in default. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in water consumption.

**(e) Guarantees**

The State Government provides guarantees for some borrowings and financing of the Company and does not charge any fee with respect to such guarantees.

Therefore, these SPEs are considered for accounting purposes as jointly-owned subsidiaries.

The program expenditures, except for indirect costs, construction margin and borrowing costs are financed with 80% of funds deriving from the State Government and the remaining 20% invested by SABESP, which is also liable for the execution of works.
