#### THE BANCORP, INC. AND SUBSIDIARIES

#### NOTES TO UNAUDITED CONSOLDIATED FINANCIAL STATEMENTS

Note 1. Structure of Company

The Bancorp, Inc. (the Company) is a Delaware corporation and a registered financial holding company. Its primary subsidiary is The Bancorp Bank (the Bank) which is wholly owned by the Company. The Bank is a Delaware chartered commercial bank located in Wilmington, Delaware and is a Federal Deposit Insurance Corporation (FDIC) insured institution. In its continuing operations, the Bank has four primary lines of specialty lending: security backed lines of credit (SBLOC), leasing, Small Business Administration (SBA) loans and loans generated for sale into capital markets primarily through commercial mortgage backed securities (CMBS). Through the Bank, the Company also provides banking services nationally, which include prepaid cards, private label banking, institutional banking, card payment and other payment processing and health savings accounts. European operations are comprised of three operational service subsidiaries, Transact Payment Services Group Limited, Transact Payment Services Limited and Transact Payment Services Group-Bulgaria EOOD and one subsidiary, Transact Payments Limited, which offer prepaid card and electronic money issuing services.

The Company and the Bank are subject to regulation by certain state and federal agencies and, accordingly, they are examined periodically by those regulatory authorities. As a consequence of the extensive regulation of commercial banking activities, the Company's and the Bank's businesses may be affected by state and federal legislation and regulations.

Note 2. Significant Accounting Policies

#### **Basis of Presentation**

The financial statements of the Company, as of June 30, 2015 and for the three and six month periods ended June 30, 2015 and 2014, are unaudited. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) have been condensed or omitted in this Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission. However, in the opinion of management, these interim financial statements include all necessary adjustments to fairly present the results of the interim periods presented. The unaudited interim consolidated financial statements should be read in conjunction with the audited financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014 (Form 10-K report). Note T in those financial statements present restated interim financial statements as described therein. The results of operations for the six month period ended June 30, 2015 may not necessarily be indicative of the results of operations for the full year ending December 31, 2014.

Note 3. Share-based Compensation

The Company recognizes compensation expense for stock options in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 718, Stock Based Compensation. The expense of the option is generally measured at fair value at the grant date with compensation expense recognized over the service period, which is usually the vesting period. For grants subject to a service condition, the Company utilizes the Black-Scholes option-pricing model to estimate the fair value of each option on the date of grant. The Black-Scholes model takes into consideration the exercise price and expected life of the options, the current price of the underlying stock and its expected volatility, the expected dividends on the stock and the current risk-free interest rate for the expected life of the option. The Company's estimate of the fair value of a stock option is based on expectations derived from historical experience and may not necessarily equate to its market value when fully vested. In accordance with ASC 718, the Company estimates the number of options for which the requisite service is expected to be rendered. At June 30, 2015, the Company had three stock-based compensation plans, which are more fully described in its Annual Report on Form 10-K for the year ended December 31, 2014, and the portions of the Company's Proxy Statement for 2014, incorporated therein by reference.

The Company did not grant stock options in the first six months of 2015 or 2014. There were no stock options exercised in the first six month period ended June 30, 2015 and 63,874 common stock options exercised in the six month period ended June 30, 2014. The total intrinsic value of the options exercised during the six months ended June 30, 2015 and 2014 was \$0 and \$619,000, respectively.

The Company estimated the fair value of each grant on the date of grant using the Black-Scholes options pricing model with the following weighted average assumptions:

June 30, 2015 2014 Risk-free interest rate - -

Expected dividend yield--Expected volatility--Expected lives (years)2.0-

Expected volatility is based on the historical volatility of the Company's stock and peer group comparisons over the expected life of the grant. The risk-free rate for periods within the expected life of the option is based on the U.S. Treasury strip rate in effect at the time of the grant. The life of the option is based on historical factors which include the contractual term, vesting period, exercise behavior and employee terminations. In accordance with ASC 718, stock based compensation expense for the six month period ended June 30, 2015 is based on awards that are ultimately expected to vest and has been reduced for estimated forfeitures. The Company estimates forfeitures using historical data based upon the groups identified by management.

A summary of the status of the Company's equity compensation plans is presented below.

As of June 30, 2015, there was a total of \$3.3 million of unrecognized compensation cost related to unvested awards under share-based plans. This cost is expected to be recognized over a weighted average period of 1.13 years. Related compensation expense for the six months ended June 30, 2015 and 2014 was \$1.0 million and \$1.4 million respectively.

Note 4. Earnings Per Share

The Company calculates earnings per share under ASC 260, Earnings Per Share. Basic earnings per share exclude dilution and are computed by dividing income available to common shareholders by the weighted average common shares outstanding during the period. Diluted earnings per share takes into account the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock.

The following tables show the Company's earnings per share for the periods presented:

At June 30, 2015 and December 31, 2014, investment securities with a book value of approximately \$22.8 million and \$25.7 million, respectively, were pledged to secure securities sold under repurchase agreements as required or permitted by law.

Fair value of available-for-sale securities are based on the fair market value supplied by a third-party market data provider while the fair value of held-to-maturity securities are based on the present value of cash flows, which discounts expected cash flows from principal and interest using yield to maturity at the measurement date. The Company periodically reviews its investment portfolio to determine whether unrealized losses are other than temporary, based on an evaluations of the creditworthiness of the issuers/guarantors as well as the underlying collateral if applicable, in addition to the continuing performance of the securities. The amount of the credit impairment is calculated by estimating the discounted cash flows for those securities. The Company did not recognize any other-than-temporary impairment charges in the first six months of 2015.

The Company has evaluated the securities in the above tables and has concluded that none of these securities has impairment that is other-than-temporary. The Company evaluates whether a credit impairment exists by considering primarily the following factors: (a) the length of time and extent to which the fair value has been less than the amortized cost of the security, (b) changes in the financial condition, credit rating and near-term prospects of the issuer, (c) whether the issuer is current on contractually obligated interest and principal payments, (d) changes in the financial condition of the security's underlying collateral and (e) the payment structure of the security. The Company's best estimate of expected future cash flows which is used to determine the credit loss amount is a quantitative and gualitative process that incorporates information received from third-party sources along with internal assumptions and judgments regarding the future performance of the security. The Company concluded that most of the securities that are in an unrealized loss position are in a loss position because of changes in market interest rates after the securities were purchased. The securities that have been in an unrealized loss position for 12 months or longer include other securities whose market values are sensitive to market interest rates and changes in credit quality. The Company's unrealized loss for other of the debt securities, which include three single issuer trust preferred securities and one pooled trust preferred security, is primarily related to general market conditions and the resultant lack of liquidity in the market. The severity of the temporary impairments in relation to the carrying amounts of the individual investments is consistent with market developments. The Company's analysis for each investment is performed at the security level. As a result of its review, the Company concluded that other-than-temporary impairment did not exist

due to the Company's ability and intention to hold these securities to recover their amortized cost basis.

Note 6. Loans

The Company originates loans for sale to other financial institutions which issue commercial mortgage backed securities or to secondary government guaranteed loan markets. The Company has elected fair value treatment for these loans to better reflect the economics of the transactions. At June 30, 2015, the fair value of these loans held for sale was \$284.5 million and the unpaid principal balance was \$278.9 million. Included in the gain on sale of loans in the Statement of Operations were gains recognized from changes in the fair value of \$1.3 million for the six months ended June 30, 2015. There were no amounts of changes in fair value related to credit risk. Interest earned on loans held for sale during the period held are recorded in Interest Income-Loans, including fees on the Statement of Operations..

The Company analyzes credit risk prior to making loans on an individual loan basis. The Company considers relevant aspects of the borrowers' financial position and cash flow, past borrower performance, managements's knowledge of market conditions, collateral and the ratio of loan amounts to estimated collateral value in making its credit determinations.

Major classifications of loans, excluding loans held for sale, are as follows (in thousands):
