Auction of the Frequencies 1.9 Mhz

On September 25, 2007, the Company, through its subsidiary VIVO S.A. was the winning bidder of the Band L lots, except for lot 16 (area of Londrina- state of Paraná) and of lot 20 (North of Brazil), after opening the proposals carried through on that date in the headquarters of ANATEL. In order to achieve this benchmark, Vivo offered 50.60% average premium over the minimum price set in the auction call notice. Vivo's offer was approximately R\$169.7 million for all Band L lots acquired. However, pursuant to the rules provided for in the auction call notice, the price to be paid refers to the remaining term of the pre-existing authorizations for each lot acquired, which term is always counted as from the date of execution of the Term of Authorization referring to this bidding process. The amount resulting from the governmental bidding for Vivo totaled R\$50.3 million, without including the lots of state of Minas Gerais.

The total amount or 10% should be paid at the time of the execution of the Terms of Authorization. The installment classified in the current assets refers to the reversal of temporary differences and amortization of goodwill expected for the next twelve months.

The deferred taxes were set up assuming its future realization, as follows:

a) Tax credit incorporated: represented by the net balance of goodwill and the provision for maintaining the integrity of the net equity (Note 6.2). Its conversion occurs proportionately to the amortization of the goodwill in its subsidiary, over a period of 5 to 10 years. Studies by outside consultants used in the Corporate Restructuring process support the recovery of the value within this period.

b) Tax loss and negative bases: represents the amount recorded by the subsidiary, which will be offset at the limit of 30% of the bases computed in the coming years and has no limitation period. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these tax bases in the amount of R\$700,126 (R\$686,064 at December 31, 2007), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes.

c) Temporary differences: realization will occur at the payment of provisions, the effective loss on bad debts or the realization of inventories, as well as upon reversal of other provisions. The Company did not record the potential deferred income and social contribution tax credit that would arise from the use of these provisions in the amount of R\$157,293 (R\$156,856 at December 31, 2007), given the uncertainty, at this time, as to the Company's ability to generate future taxable results to ensure realization of these deferred taxes

The Company prepared technical feasibility studies, approved by its Board, which indicated the full recovery of deferred tax amounts recognized at December 31, 2007, as defined by CVM instruction No. 371.

During the quarter ending March 31, 2008, no relevant fact occurred that indicated limitations to full recovery of deferred tax amounts recognised by the subsidiary.

26. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Considerations on Risks

The main market risks to which the Company and its subsidiary are exposed in the conduct of their activities are:

Total

Credit Risk: deriving from possible difficulties in collecting the amounts related to telecommunications services rendered to its customers and to sales of handsets to its dealers, as well as the risk related to short-term investments and amounts receivable from swap transactions.

Interest Rate Risk: deriving from a portion of the debt and from long positions of derivatives contracted at floating rates, and involving the risk of an increase in financial expenses due to an unfavorable change in interest rates (mainly LIBOR, TJLP and CDI).

Exchange Rate Risk: the possibility that Company and its subsidiary incur losses as a result of exchange rate variations that increase the liability balances of foreign currency loans and financing.

The Company and its subsidiary adopt an active position concerning the management of the various risks to which they are exposed, by means of a set of comprehensive initiatives, procedures and operating policies, thus mitigating the risks inherent to their activities.

Credit Risk

The credit risk involved in the rendering of telecommunications services is minimized by a strict control of the customer base and active management of customers' default, by means of clear policies regarding the sale of post-paid telephones. The subsidiary customer base has, predominantly, a prepaid system, which requires the prior loading and consequently entails no credit risk.

The credit risk in the sale of handsets is managed by a conservative credit policy, by means of modern management methods, including the application of "credit scoring" techniques, analysis of financial statements and information, and consultation to commercial data bases, as well as the automatic control of sales release integrated with the distribution module of SAP's ERP software.

The company and its subsidiary are also subject to credit risk originating from its financial investments and amounts receivable from swap transactions. The Company and its subsidiary act in a manner so as to diversify this exposure among various world-class financial institutions.

Interest rate risk

The Company and its subsidiary are exposed to the risk of increased interest rates, especially those associated with the cost of the Interbank deposit certificates (CDI), in connection with payables related to derivative transactions (currency hedge) and by loans denominated in Reais. As a way to minimize this exposure, the Company contracted swap transactions in Reais, from CDI to fixed-interest rates, in a total reference value of R\$109.5 million. The balance of financial investments, indexed to the CDI, also neutralizes this effect partially.

Furthermore, the Company and its subsidiary are also exposed to the risk of fluctuation of the TJLP, in connection with the loans obtained from BNDES. These transactions amounted to R\$667,843 at March 31, 2008. The Company and its subsidiary have no transactions with derivatives contracted to cover the TJLP risk.

At March 31, 2008, the subsidiary had US\$52,480 referring to the loans and financing involving floating foreign interest rates (LIBOR), that are protected against fluctuation in interest rates (LIBOR) by means of derivatives (interest rate swap).

Exchange Rate Risk

The Company and its subsidiary have contracted financial transactions with derivatives so as to protect themselves against exchange rate fluctuations affecting their loans and other liabilities in foreign currencies. The instruments generally used are swap and forward contracts

(a) UMBNDES is a monetary unit conceived by BNDES, composed of a basket of foreign currencies, main currency being the US dollar, and for this reason the Company and its subsidiary consider it in their analysis of the risk coverage against exchange rate fluctuations.

The Company and its subsidiary record gains and losses on derivative contracts as financial income or expenses, net.

The table below shows an estimate of the book value and the market value of the loans and financing, as well as of the transactions with derivatives, at March 31, 2008:

On December 21, 2001, "CRT" and Brasil Telecom S/A, sponsors of FCRT, signed a statement of commitment with a view to completely canceling any link between the sponsors, by the withdrawal of "CRT" as a sponsor, with the guarantee that this withdrawal be made strictly in accordance with applicable legislation and respecting participants rights, which was approved by the Supplementary Pension Department at December 30, 2003.

On July 31, 2007, "CRT" passed on R\$20,001 to the FCRT, finishing its participation to this plan of benefits, disentailing thus of any obligations and future contingencies.

On February 02, 2007, the process for transferring the administration of Sistel Social Security Foundation plans to Visão Prev - Society of Supplementary Pension was approved, as follows: PBS Telesp Celular, TCPPrev, PBS Tele Centro Oeste Celular, TCOPrev, PBS Telesudeste Celular, Visão Telerj Celular, Visão Telest Celular, PBS Teleleste Celular, Visão Telebahia Celular, Visão Telergipe Celular and Visão Celular CRT.

The eleven plans sponsored by the subsidiary were gradually transferred to Visão Prev until December 31, 2007, while on May 2, 2007, the transfer of the plans assets occurred.

The requirements of the Law are effective for financial statements reported for the fiscal years ended on or after January 1, 2008, including the following changes applicable to publicly held companies:

- (I) in the preparation of the financial statements, the records of accounting adjustments made exclusively to meet the accounting standards, are nontaxable or nondeductible;
- (II) in certain business combinations, assets and liabilities shall be accounted for at market value;

Accordingly, in this transitional phase, by means of its Communication to the Market dated January 14, 2008, CVM allowed the provisions of Law No. 11638/07 not to be applied to preparation of the Quarterly Information (ITR).

As a consequence, the Company's management is currently assessing the effects that Law No. 11638/2007 will produce on its financial statements for the year ending December 31, 2008, and it will take into consideration the guidelines and definitions to be issued by regulatory bodies. For the quarter ended March 31, 2008, management understands that the effects of these changes in the Quarterly Information presented cannot yet be determined.

quarterly financial information and (b) review of information and subsequent events which have or might have significant effects on the financial position and results of operations of the Company.

3. Based on our special review, we are not aware of any material modifications that should be made to the quarterly financial information (ITR) referred in the first paragraph for it to be in conformity with accounting practices adopted in Brazil applicable to the preparation of quarterly financial information (ITR), together with specific regulations established by the Brazilian Securities and Exchange Commission (CVM), including the Communication to the Market issued by CVM on January 14, 2008.
4. As mentioned in Note 31, Law No. 11638 enacted on December 28, 2007 was made effective from January 1st, 2008. This Law amended and repealed certain provisions, and introduced new ones into Law No. 6404/76 (Corporation Law), and it will cause the accounting practices adopted in Brazil to change. Although Law No. 11638 has already come into effect, the main changes introduced by it depend on regulations yet to be issued by regulatory agencies in order to be fully applied by the companies. Accordingly, in this transitional phase, by means of its Communication to the Market dated January 14, 2008, CVM allowed the provisions of Law No. 11638/07 not to be applied to preparation of the quarterly financial information (ITR). As a consequence, the accounting information contained in the consolidated and stand-alone ITRs of Vivo Participações S.A. for the quarter ended March 31, 2008 was prepared in accordance with specific instructions provided by CVM, and does not consider changes in accounting practices introduced by Law No. 11638/07.
5. The consolidated and stand-alone statements of operations of Vivo Participações S.A. for the quarter ended March 31, 2007, presented for purposes of comparison, were reviewed by other independent auditors, who issued an unqualified special review report thereon dated May 7, 2007.
