National Interstate CORP
Form 10-Q
May 04, 2016
UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

Form 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended March 31, 2016

OR

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____

Commission File Number: 000-51130

National Interstate Corporation

(Exact name of registrant as specified in its charter)

Ohio 34-1607394
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

3250 Interstate Drive, Richfield, OH 44286-9000

(Address of principal executives offices) (Zip Code)

(330) 659-8900

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large Accelerated Filer Accelerated Filer

Non-Accelerated Filer (Do not check if a smaller reporting company) Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's sole class of common shares as of April 29, 2016 was 19,925,875.

<u>7. Earnings Per Common Share</u>	

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of National Interstate Corporation (the “Company”) and its subsidiaries have been prepared in accordance with U.S. generally accepted accounting principles (“GAAP”) and the instructions to Form 10-Q.

The unaudited consolidated financial statements include the accounts of the Company and its subsidiaries, National Interstate Insurance Company (“NIIC”), Vanliner Insurance Company (“VIC”), National Interstate Insurance Company of Hawaii, Inc. (“NIIC-HI”), Hudson Indemnity, Ltd. (“HIL”), Triumphe Casualty Company (“TCC”), Hudson Management Group, Ltd., National Interstate Insurance Agency, Inc. (“NIIA”), American Highways Insurance Agency, Inc., TransProtection Service Company, Explorer RV Insurance Agency, Inc. and Safety, Claims and Litigation Services, LLC. Significant intercompany transactions have been eliminated.

These interim unaudited consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015. The interim financial statements reflect all adjustments which are, in the opinion of management, necessary for the fair presentation of the results for the periods presented. Such adjustments are of a normal recurring nature. Operating results for the three months ended March 31, 2016 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2016.

The preparation of the financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Changes in circumstances could cause actual results to differ materially from those estimates.

2. Recent Accounting Pronouncements

Recent Accounting Standard, Adopted

In February 2015, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2015-02, Consolidation (Topic 810): Amendments to the Consolidation Analysis (“ASU 2015-02”). The new guidance changes the analysis a reporting entity performs to determine whether it should consolidate certain types of legal entities. The main provisions affect limited partnerships and similar legal entities, as being considered a variable interest entity (“VIE”) or voting interest entity; the evaluation of fees paid to a decision maker as a variable interest; the effect of fee arrangements on the primary beneficiary determination; and a scope exception for certain investment funds. The consolidation assessment depends on facts and circumstances surrounding each entity, but the Company’s investment funds qualify and are therefore evaluated for consolidation under the VIE model. The Company adopted this guidance effective January 1, 2016. The adoption of ASU 2015-02 did not have an impact on the Company’s results of operations or financial position. Refer to Note 13 - “Variable Interest Entities” for further discussion and related disclosures.

Recent Account Standards, Not Yet Adopted

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers (“ASU 2014-09”) to clarify the principles for recognizing revenue. This standard is intended to help reduce diversity in practice and enhance comparability between entities related to revenue recognition. While insurance contracts are not within the scope of this updated guidance, the Company's fee

Table of Contents

income related to claim and loss prevention services will be subject to this updated guidance. ASU 2014-09 is effective for the quarter ending March 31, 2018. The Company is in the process of assessing the impact the adoption of this guidance will have on its consolidated financial statements and related disclosures.

In May 2015, the FASB issued ASU No. 2015-09, Financial Services - Insurance (Topic 944): Disclosures about Short-Duration Contracts (“ASU 2015-09”). The FASB issued ASU 2015-09 to enhance disclosure requirements for short-duration insurance contracts and to increase transparency regarding significant estimates made in measuring liabilities for unpaid claims and claim adjustment expenses. The ASU is also intended to improve comparability by requiring consistent disclosure information as well as provide financial statement users with additional information to facilitate analysis of the amount, timing, and uncertainty of claims cash flows. The new disclosures will be effective for fiscal years beginning after December 15, 2015 and interim periods within annual periods beginning after December 15, 2016. The Company will incorporate the required disclosures upon adoption with its annual financial statements as of December 31, 2016 and interim statements beginning with the first quarter of 2017. The new guidance does not affect the existing recognition or measurement guidance, and therefore will have no impact on the Company's financial condition or results of operations.

In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments - Overall (Topic 825) (“ASU 2016-01”), which, among other things, will require all equity securities currently classified as “available-for-sale” to be reported at fair value, with holding gains and losses recognized in net income instead of accumulated other comprehensive income (“AOCI”). The Company will be required to adopt this guidance effective January 1, 2018. The Company is in the process of assessing the potential impact the adoption of this guidance will have on its consolidated financial statements.

In February 2016, FASB issued ASU No. 2016-02, Leases (Topic 842) (“ASU 2016-02”). The ASU will require organizations that lease assets, referred to as “lessees,” to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases. Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months. Consistent with current GAAP, the recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. The new guidance will require both types of leases to be recognized on the balance sheet. The Company will be required to adopt this guidance effective January 1, 2019. The Company is in the process of assessing the potential impact the adoption of this guidance will have on its consolidated financial statements.

In March 2016, FASB issued ASU No. 2016-09, Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting (“ASU No. 2016-09”), which is designed to make accounting for share-based payment transactions less complex for public and private companies. ASU No. 2016-09 affects all organizations that issue share-based payment awards to their employees and simplifies several aspects of the accounting for share-based payment award transactions, including, income tax consequences, classification of awards as either equity or liabilities and classification on the statement of cash flows. The Company will be required to adopt this guidance effective January 1, 2017. The updated guidance is not expected to have a material effect on the Company's results of operations or financial position.

3. Fair Value Measurements

The Company must determine the appropriate level in the fair value hierarchy for each applicable measurement. The fair value hierarchy prioritizes the inputs, which refer broadly to assumptions market participants would use in pricing an asset or liability, into three levels. It gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The level in the fair value hierarchy within which a fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's management is responsible for the valuation process and uses data from outside sources (including nationally recognized pricing services and broker/dealers) in establishing fair value.

Pricing services use a variety of observable inputs to estimate the fair value of fixed maturities that do not trade on a daily basis. These inputs include, but are not limited to, recent reported trades, benchmark yields, issuer spreads, bids or offers, reference data and measures of volatility. Included in the pricing of mortgage-backed securities are estimates

of the rate of future prepayments and defaults of principal over the remaining life of the underlying collateral. Inputs from brokers and independent financial institutions include, but are not limited to, yields or spreads of comparable investments which have recent trading activity, credit quality, duration, credit enhancements, collateral value and estimated cash flows based on inputs including delinquency rates, estimated defaults and losses and estimates of the rate of future prepayments. Valuation techniques utilized by pricing services and prices obtained from external sources are reviewed by the Company's internal and affiliated investment professionals who are familiar with the securities being priced and the markets in which they trade to ensure the fair value determination is representative of an exit price. To validate the appropriateness of the prices obtained, the Company's internal investment professionals, who report to the Chief Investment Officer, compare the valuation received to independent third party pricing sources and consider widely published indices (as benchmarks), recent trades, changes in interest rates, general economic conditions and the credit

Table of Contents

quality of the specific issuers. If the Company believes that significant discrepancies exist, the Company will perform additional procedures, which may include specific inquiry of the pricing source, to resolve the discrepancies.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical securities that the reporting entity has the ability to access at the measurement date. Level 2 inputs are inputs other than quoted prices within Level 1 that are observable for the security, either directly or indirectly. Level 2 inputs include quoted prices for similar securities in active markets, quoted prices for identical or similar securities that are not active and observable inputs other than quoted prices, such as interest rate and yield curves. Level 3 inputs are unobservable inputs for the asset or liability. Level 1 primarily consists of publicly traded equity securities and highly liquid, direct obligations of the U.S.

Government whose fair value is based on quoted prices that are readily and regularly available in an active market.

Level 2 primarily consists of financial instruments whose fair value is based on quoted prices in markets that are not active and include U.S. government agency securities, fixed maturity investments and nonredeemable preferred stocks that are not actively traded. At March 31, 2016, Level 2 included \$227.0 million of securities, which are valued based upon a non-binding broker quote and validated with other observable market data by management. Level 3 consists of financial instruments that are not traded in an active market, whose fair value is estimated by management based on inputs from independent financial institutions, which include non-binding broker quotes. The Company believes these estimates reflect fair value, but the Company is unable to verify inputs to the valuation methodology. The Company obtained at least one quote or price per instrument from its brokers and pricing services for all Level 3 securities and did not adjust any quotes or prices that it obtained. The Company's internal and affiliated investment professionals review these broker quotes using any recent trades, if such information is available, or market prices of similar investments. The Company primarily uses the market approach valuation technique for all investments.

The following table presents the Company's investment portfolio, categorized by the level within the fair value hierarchy in which the fair value measurements fell as of March 31, 2016.

	Level 1	Level 2	Level 3	Total
	(Dollars in thousands)			
Fixed maturities:				
U.S. Government and government agency obligations	\$4,229	\$173,927	\$—	\$178,156

Cash and cash equivalents	50,400	—	—	50,400
Total fixed maturities, equity securities and cash and cash equivalents at fair value	\$135,156	\$1,066,550	\$32,261	\$1,233,967

Table of Contents

The following table presents the Company's investment portfolio, categorized by the level within the fair value hierarchy in which the fair value measurements fell as of December 31, 2015.

	Level 1	Level 2	Level 3	Total
	(Dollars in thousands)			
Fixed maturities:				
U.S. Government and government agency obligations	\$4,179	\$147,124	\$—	\$151,303
State and local government obligations	—	311,351	5,021	316,372
Residential mortgage-backed securities	—	157,403	—	157,403
Commercial mortgage-backed securities	—	14,368	—	14,368
Corporate obligations	—	194,045	7,476	201,521
Other debt obligations	—	190,515	14,846	205,361
Redeemable preferred stocks	4,162	—	498	4,660
Total fixed maturities	8,341	1,014,806	27,841	1,050,988
Equity securities:				
Common stocks	53,584	806	2,302	56,692
Nonredeemable preferred stocks	20,868	4,069	—	24,937
Total equity securities	74,452	4,875	2,302	81,629
Total fixed maturities and equity securities	82,793	1,019,681	30,143	1,132,617
Cash and cash equivalents	71,944	—	—	71,944
Total fixed maturities, equity securities and cash and cash equivalents at fair value	\$154,737	\$1,019,681	\$30,143	\$1,204,561

The tables above exclude other invested assets of \$48.6 million and \$47.9 million at March 31, 2016 and December 31, 2015, respectively. Other invested assets include investments in limited partnerships, which are accounted for under the equity method. Equity method investments are not reported at fair value.

The Company uses the end of the reporting period as its policy for determining transfers into and out of each level. During the three months ended March 31, 2016, the Company transferred three nonredeemable preferred stocks with a total fair value of \$1.2 million from Level 1 to Level 2 due to decreases in trading activity. Conversely, during the same period, the Company transferred one nonredeemable preferred stock and one common stock with fair values of \$1.1 million and \$0.6 million, respectively, from Level 2 to Level 1 due to increases in trading activity. During the three months ended March 31, 2015, the Company transferred two nonredeemable preferred stocks, with a total fair value of \$0.5 million from Level 2 to Level 1 due to increases in trading activity.

Table of Contents

The following tables present a reconciliation of the beginning and ending balances for all investments measured at fair value on a recurring basis using Level 3 inputs for the three months ended March 31, 2016 and 2015. The transfers out of Level 3 were due to increases in the availability of market observable inputs. All transfers are reflected in the table at fair value as of the end of the reporting period.

	Three Months Ended March 31, 2016				
	State and Local Government Obligations	Corporate Obligations	Other Debt Obligations	Redeemable Preferred Stocks	Common Stocks
Beginning balance at January 1, 2016	\$5,021	\$ 7,476	\$ 14,846	\$ 498	\$ 2,302
Total gains (losses):					
Included in earnings	—	31	—	—	(625)
Included in other comprehensive income	85	42	(309)	2	446
Purchases and issuances	—	2,150	389	—	—
Sales, settlements and redemptions	—	(40)	(53)	—	—
Transfers in and/or (out) of Level 3	—	—	—	—	—
Ending balance at March 31, 2016	\$5,106	\$ 9,659	\$ 14,873	\$ 500	\$ 2,123
The amount of total gains (losses) for the period included in earnings and attributable to the change in unrealized gains (losses) relating to assets still held at the reporting date	\$—	\$ —	\$ —	\$ —	\$ (625)

	Three Months Ended March 31, 2015				
	State and Local Government Obligations	Corporate Obligations	Other Debt Obligations	Redeemable Preferred Stocks	Common Stocks
Beginning balance at January 1, 2015	\$2,887	\$ 7,100	\$ 3,995	\$ 495	\$ 3,988
Total gains (losses):					
Included in earnings	—	—	—	—	—
Included in other comprehensive income	36	138	(6)	2	(183)
Purchases and issuances	—	—	1,000	—	—
Sales, settlements and redemptions	—	(88)	(2,527)	—	—
Transfers in and/or (out) of Level 3	—	—	—	—	(966)
Ending balance at March 31, 2015	\$2,923	\$ 7,150	\$ 2,462	\$ 497	\$ 2,839
The amount of total gains (losses) for the period included in earnings and attributable to the change in unrealized gains (losses) relating to assets still held at the reporting date	\$—	\$ —	\$ —	\$ —	\$ —

At March 31, 2016, the Company had 30 securities with a fair value of \$32.3 million that are included in Level 3, which represented 2.7% of its total investments reported at fair value. The significant unobservable inputs used by the brokers and pricing services in establishing fair values of the Company's Level 3 securities are primarily spreads to U.S. Treasury rates and discounts to comparable securities. The specifics of such spreads and discounts were not reasonably obtainable or made available to the Company. Significant increases (decreases) on spreads to U.S. Treasury rates and discount spreads to comparable securities would result in lower (higher) fair value measurements. Generally, a change in the assumption used for determining a spread is accompanied by market factors that warrant an

adjustment for the credit risk and liquidity premium of the security. As the total fair value of Level

12

Table of Contents

3 securities is 8.8% of the Company's shareholders' equity at March 31, 2016, reasonable changes in unobservable inputs would not have a material impact on the Company's financial position.

4. Investments

The cost or amortized cost and fair value of investments in fixed maturities and equity securities are as follows:

	Cost or Amortized Cost (Dollars in thousands)	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
March 31, 2016				
Fixed maturities:				
U.S. Government and government agency obligations	\$ 175,180	\$ 2,980	\$(4)	\$ 178,156
State and local government obligations	299,432	12,766	(62)	312,136
Residential mortgage-backed securities	163,205	5,496	(829)	167,872
Commercial mortgage-backed securities	15,465	769	(15)	16,219
Corporate obligations	211,555	5,735	(5,129)	212,161
Other debt obligations	211,442	812	(2,742)	209,512
Redeemable preferred stocks	4,514	180	(2)	4,692
Total fixed maturities	1,080,793	28,738	(8,783)	1,100,748
Equity securities:				
Common stocks	58,550	4,241	(4,686)	58,105
Nonredeemable preferred stocks	24,253	996	(535)	24,714
Total equity securities	82,803	5,237	(5,221)	82,819
Total fixed maturities and equity securities	\$ 1,163,596	\$ 33,975	\$(14,004)	\$ 1,183,567
December 31, 2015				
Fixed maturities:				
U.S. Government and government agency obligations	\$ 149,402	\$ 2,197	\$(296)	\$ 151,303
State and local government obligations	305,625	10,927	(180)	316,372
Residential mortgage-backed securities	153,191	5,407	(1,195)	157,403
Commercial mortgage-backed securities	13,703	675	(10)	14,368
Corporate obligations	204,761	4,039	(7,279)	201,521
Other debt obligations	207,034	384	(2,057)	205,361
Redeemable preferred stocks	4,514	149	(3)	4,660
Total fixed maturities	1,038,230	23,778	(11,020)	1,050,988
Equity securities:				
Common stocks	57,785	3,839	(4,932)	56,692
Nonredeemable preferred stocks	24,134	1,121	(318)	24,937
Total equity securities	81,919	4,960	(5,250)	81,629
Total fixed maturities and equity securities	\$ 1,120,149	\$ 28,738	\$(16,270)	\$ 1,132,617

The table above excludes other invested assets of \$48.6 million and \$47.9 million at March 31, 2016 and December 31, 2015, respectively. Other invested assets include investments in limited partnerships which are accounted for under the equity method. Equity method investments are not reported at fair value.

State and local government obligations represented approximately 28.4% of the Company's fixed maturity portfolio at March 31, 2016, with approximately \$272.5 million, or 87.3%, of the Company's state and local government obligations held in special revenue obligations, and the remaining amount held in general obligations. The Company's state and local government obligations portfolio is high quality, with 98.5% of such securities rated investment grade (as determined by nationally recognized agencies) at March 31, 2016. The Company had no state and local government obligations for any state, municipality or political subdivision that comprised 10% or more of the total amortized cost or fair value of such obligations at March 31, 2016.

The non-credit portion of other-than-temporary impairment charges is included in other comprehensive income. Cumulative non-credit charges taken for securities still owned were \$3.3 million at both March 31, 2016 and December 31, 2015.

Table of Contents

The amortized cost and fair value of fixed maturities at March 31, 2016, by contractual maturity, are shown below. Other debt obligations, which are primarily comprised of asset-backed securities other than mortgage-backed securities, and other securities with sinking funds, are categorized based on their average maturity. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. The average life of mortgage-backed securities is 3.8 years in the Company's investment portfolio.

Amortized cost and fair value of the fixed maturities in the Company's investment portfolio at March 31, 2016 were as follows:

	Amortized Cost	Fair Value
	(Dollars in thousands)	
Due in one year or less	\$48,897	\$49,318
Due after one year through five years	425,437	428,642
Due after five years through ten years	354,627	361,871
Due after ten years	73,162	76,826
	902,123	916,657
Mortgage-backed securities	178,670	184,091
Total	\$1,080,793	\$1,100,748

Gains and losses on the sale of investments, including other-than-temporary impairment charges and other invested assets' gains or losses, were as follows:

	Three Months Ended March 31,	
	2016	2015
	(Dollars in thousands)	
Fixed maturity gains	\$ 281	\$ 82
Fixed maturity losses	(1,289)	(23)
Equity security gains	485	709
Equity security losses	(2,526)	(93)
Other invested assets, net gains	1,904	394
Net realized (losses) gains on investments	\$(1,145)	\$ 1,069

Pre-tax net realized losses on investments of \$1.1 million for the three months ended March 31, 2016 were driven by \$3.8 million in other-than-temporary impairment charges on both equity and fixed maturity securities, which were concentrated within the financial services and energy sectors. The other-than-temporary impairment charges occurred on securities where management is uncertain of the timing and the extent of ultimate recovery. Partially offsetting these losses for the first quarter of 2016 were net gains generated by other invested assets and the sales or redemptions of securities of \$1.9 million and \$0.8 million, respectively.

Pre-tax net realized gains on investments of \$1.1 million for the three months ended March 31, 2015 were partially generated from net realized gains associated with the sales or redemptions of securities of \$0.7 million and net realized gains associated with other invested assets of \$0.4 million. The gains on equity and fixed maturity securities were primarily due to favorable market conditions that increased the value of securities over book value.

Table of Contents

Realized gains (losses) and changes in unrealized appreciation (depreciation) related to fixed maturities, equity securities and other invested assets are as follows:

	Fixed Maturities	Equity Securities	Other Invested Assets	Tax Effects	Total
	(Dollars in thousands)				
Three Months Ended March 31, 2016:					
Realized before impairments	\$264	\$ 485	\$ 1,904	\$(929)	\$1,724
Realized - impairments	(1,272)	(2,526)	—	1,329	(2,469)
Change in unrealized	7,197	306	—	(2,627)	4,876
Three Months Ended March 31, 2015:					
Realized before impairments	\$74	\$ 616	\$ 394	\$(379)	\$705
Realized - impairments	(15)	—	—	5	(10)
Change in unrealized	4,202	260	—	(1,562)	2,900

Table of Contents

The following table summarizes the Company's gross unrealized losses on fixed maturities and equity securities and the length of time that individual securities have been in a continuous unrealized loss position.

	Less than Twelve Months				Twelve Months or More			
	Fair Value	Unrealized Losses	Fair Value as % of Cost	Number of Holdings	Fair Value	Unrealized Losses	Fair Value as % of Cost	Number of Holdings

Table of Contents

The gross unrealized losses on the Company's fixed maturities and equity securities portfolios decreased from \$16.3 million at December 31, 2015 to \$14.0 million at March 31, 2016. The gross unrealized losses on fixed maturity securities at March 31, 2016 were \$8.8 million and primarily consist of corporate obligations and to a lesser extent, other debt obligations and residential mortgage-backed securities. Investment grade securities represent 75.0% of all fixed maturity securities with unrealized losses. The gross unrealized losses on equity securities at March 31, 2016, consist of \$4.7 million of common stocks that have been in an unrealized loss position for less than 12 months, as well as \$0.5 million of investment grade nonredeemable preferred stocks, all of which are considered to be temporary.

At March 31, 2016, corporate obligations, with gross unrealized losses of \$5.1 million, had 68 securities that were in an unrealized loss position of \$3.5 million for less than 12 months and 9 securities with gross unrealized losses of \$1.6 million for 12 months or more. At March 31, 2016, other debt obligations, with gross unrealized losses of \$2.7 million, had 105 securities that were in an unrealized loss position of \$2.5 million for less than 12 months and 11 securities with gross unrealized losses of \$0.2 million for 12 months or more. Investment grade securities represented 82.9% of all corporate obligations and other debt obligations with unrealized losses.

At March 31, 2016, residential mortgage-backed securities, with gross unrealized losses of \$0.8 million, included 33 securities that were in an unrealized loss position of \$0.4 million for less than 12 months and 30 securities with gross unrealized losses of \$0.4 million for 12 months or more. Based on historical payment data and analysis of expected future cash flows of the underlying collateral, independent credit ratings and other facts and analysis, management believes that, based upon information currently available, the Company will recover its cost basis in all of these securities.

Management concluded that no additional charges for other-than-temporary impairment were required on the fixed maturity and equity holdings at March 31, 2016 based on several factors, including the Company's ability and current intent to hold these investments for a period of time sufficient to allow for anticipated recovery of its amortized cost, the length of time and the extent to which fair value has been below cost, analysis of company-specific financial data and the outlook for industry sectors and credit ratings. The Company believes these unrealized losses are primarily due to temporary market and sector-related factors and does not consider these securities to be other-than-temporarily impaired. If the Company's strategy was to change or these securities were determined to be other-than-temporarily impaired, the Company would recognize a write-down in accordance with its stated policy.

The following table is a progression of the amount related to credit losses on fixed maturity securities for which the non-credit portion of an other-than-temporary impairment has been recognized in other comprehensive income.

	Three Months Ended	
	March 31,	
	2016	2015
	(Dollars in thousands)	
Beginning balance	\$ 2,391	\$ 2,368
Additional credit impairments on previously impaired securities	—	15
Reductions - disposals	(6)	(8)
Ending balance	\$ 2,385	\$ 2,375

5. Income Taxes

The Company's provision for income taxes in interim periods is computed by applying its estimated full-year effective tax rate against pre-tax income for the period. The effective tax rate was 30.7% and 27.6% for the three months ended March 31, 2016 and 2015, respectively. The effective tax rate for the three months ended March 31, 2016 is lower than the 35% statutory rate primarily due to the tax effect of tax-exempt income earned.

Table of Contents

The tax effects of temporary differences that give rise to significant portions of the net deferred tax assets and liabilities in the Consolidated Balance Sheets were as follows:

	March 31, 2016	December 31, 2015
	(Dollars in thousands)	
Deferred tax assets:		
Unearned premiums	\$18,625	\$ 19,959
Unpaid losses and loss adjustment expenses	19,314	18,687
Assessments and fees payable	1,612	1,576
Realized losses on investments, primarily impairments	6,420	5,147
Accrued compensation	1,972	1,959
Limited partnership investments	—	61
Other, net	1,996	2,185
Total deferred tax assets	49,939	49,574
Deferred tax liabilities:		
Deferred policy acquisition costs	(7,889)	(7,793)
Unrealized gains on investments	(6,990)	(4,363)
Intangible assets	(2,678)	(2,678)
Limited partnership investments	(597)	—
Prepaid expenses	(308)	(279)
Other, net	(584)	(626)
Total deferred tax liabilities	(19,046)	(15,739)
Net deferred tax assets	\$30,893	\$ 33,835

Management has reviewed the recoverability of the deferred tax assets and believes that the amount will be recoverable against future earnings.

6. Share-Based Compensation

The Company grants options and other stock awards to officers and key employees of the Company under the amended and restated Long Term Incentive Plan (“LTIP”). At March 31, 2016, there were options for 180,000 shares outstanding and 729,319 of the Company’s common shares reserved for issuance under the LTIP. Options and restricted shares vest pursuant to the terms of a written grant agreement. Options must be exercised no later than the tenth anniversary of the date of grant. Restricted share awards generally cliff vest three years from the date of grant. As set forth in the LTIP, the Compensation Committee of the Board of Directors may accelerate vesting and exercisability of options. Treasury shares are used to fulfill the options exercised and other awards granted. For both the three months ended March 31, 2016 and 2015, the Company recognized share-based compensation expense of \$0.2 million with related income tax benefits of approximately \$0.1 million.

Table of Contents

7. Earnings Per Common Share

The following table sets forth the computation of basic and diluted net income per share.

	Three Months Ended March 31,	
	2016	2015
	(In thousands, except per share data)	
Net income	\$ 6,840	\$ 7,109
Weighted average shares outstanding during period	19,921	19,834
Additional shares issuable under employee common stock option plans using treasury stock method	32	47
Weighted average shares outstanding assuming exercise of stock options	19,953	19,881
Net income per share:		
Basic	\$ 0.34	\$ 0.36
Diluted	\$ 0.34	\$ 0.36

For the three months ended March 31, 2016 and 2015, there were 88,440 and 105,975, respectively, outstanding options and restricted shares excluded from diluted earnings per share because they were anti-dilutive.

8. Transactions with Related Parties

The Company's principal insurance subsidiary, NIIC, is involved in assumption of reinsurance. NIIC is a party to a reinsurance agreement, and NIIA is a party to an underwriting management agreement with Great American Insurance Company ("Great American"). As of March 31, 2016, Great American owned 51.0% of the outstanding shares of the Company. The reinsurance agreement calls for the assumption by NIIC of all of the risk on Great American's net premiums written for public transportation and recreational vehicle risks underwritten pursuant to the reinsurance agreement. NIIA provides administrative services to Great American in connection with Great American's underwriting of these risks. The Company was also previously involved in the cession of premium through reinsurance agreements with Great American to reduce exposure in certain of its property and casualty insurance programs. Effective November 2014, Great American no longer participates in such reinsurance agreements and settlement activity in 2016 is not expected to be material.

The table below summarizes the reinsurance balance and activity with Great American:

	Three Months Ended	
	March 31,	
	2016	2015
	(Dollars in thousands)	
Assumed premiums written	\$ 46	\$ 107
Assumed premiums earned	64	135
Assumed losses and loss adjustment expense incurred	(21)	54
Ceded premiums earned	—	14
Ceded losses and loss adjustment expense recoveries	162	100

	March	December
	31, 2016	31, 2015
	(Dollars in thousands)	
Payable to Great American as of period end	\$ 4	\$ 27

The Company is not substantially dependent on any individual reinsurance agreements, including the expired reinsurance agreements with Great American. The Company does not depend on these specific reinsurers to a material extent, as other reinsurers could be obtained for those treaties or the business could be retained.

During 2015, Virginia, Washington and Connecticut recreational vehicle risks previously written through Great American were transitioned to TCC, resulting in a decline in assumed premiums written and earned from Great American.

The Company has an agreement with American Money Management Corporation ("AMMC"), a wholly-owned subsidiary of American Financial Group, Inc. ("AFG"), whereby AMMC manages approximately 56.0% of the

Company's investment portfolio

19

Table of Contents

at an annual cost of 15 basis points of the portfolio's fair value. Fees for such services were approximately \$0.3 million and \$0.2 million for the three months ended March 31, 2016 and 2015, respectively.

On March 7, 2016, AFG announced that it had submitted a proposal to the Company to acquire all of the outstanding shares of Common Stock of the Company ("Common Stock") not already owned by AFG's wholly-owned subsidiary, Great American, at a purchase price of \$30.00 per share in cash. As of March 7, 2016, Great American beneficially owned 10,200,000, or approximately 51.0%, of the outstanding shares of Common Stock.

Great American or its parent, AFG, has performed for many years certain services for the Company without charge including actuarial services and on a consultative basis, as needed and as the Company requests, internal audit, legal, accounting and other support services. If Great American no longer controlled a majority of the Company's common shares, it is possible that many of these services would cease or, alternatively, be provided at an increased cost to the Company. This could impact the Company's personnel resources, require the Company to hire additional professional staff and generally increase the Company's operating expenses. Management believes, based on discussions with Great American, that these services will continue to be provided by the affiliated entity in future periods and the relative impact on operating results is not material.

9. Reinsurance

Premiums and reinsurance activity consisted of the following:

	Three Months Ended	
	March 31,	
	2016	2015
	(Dollars in thousands)	
Direct premiums written	\$160,669	\$151,302
Reinsurance assumed	4,031	3,236
Reinsurance ceded	(34,742)	(30,441)
Net premiums written	\$129,958	\$124,097
Direct premiums earned	\$176,136	\$162,489
Reinsurance assumed	3,920	3,113
Reinsurance ceded	(30,642)	(27,779)
Premiums earned	\$149,414	\$137,823

The Company cedes premiums through reinsurance agreements with reinsurers to reduce exposure in certain of its property and casualty insurance programs. Ceded losses and loss adjustment expense recoveries recorded for the three months ended March 31, 2016 and 2015 were \$19.7 million and \$14.3 million, respectively. The Company remains primarily liable as the direct insurer on all risks reinsured and a contingent liability exists to the extent that the reinsurance companies are unable to meet their obligations for losses assumed. To minimize its exposure to significant losses from reinsurer insolvencies, the Company seeks to do business with reinsurers rated "A-" or better by A.M. Best Company and regularly evaluates the financial condition of its reinsurers. If a reinsurer is not rated by A.M. Best Company or their rating falls below "A-", the contract with them generally requires that they secure outstanding obligations with cash, a trust or a letter of credit that the Company deems acceptable.

10. Commitments and Contingencies

The Company and its subsidiaries are subject at times to various claims, lawsuits and legal proceedings arising in the ordinary course of business. All legal actions relating to claims made under insurance policies are considered in the establishment of the Company's loss and loss adjustment expense ("LAE") reserves. In addition, regulatory bodies, such as state insurance departments, the Securities and Exchange Commission, the Department of Labor and other regulatory bodies may make inquiries and conduct examinations or investigations concerning the Company's compliance with insurance laws, securities laws, labor laws and the Employee Retirement Income Security Act of 1974, as amended.

The Company's subsidiaries also have lawsuits pending in which the plaintiff seeks extra-contractual damages from the Company in addition to damages claimed or in excess of the available limits under an insurance policy. These lawsuits, which are in various stages, generally mirror similar lawsuits filed against other carriers in the industry. Although the Company is vigorously defending these lawsuits, the outcomes of these cases cannot be determined at

this time. In accordance with current accounting standards for loss contingencies and based upon information currently known to the Company, reserves are established for litigation when it is probable that a loss associated with a claim or proceeding has been incurred and the amount of the loss or range of loss can be reasonably estimated. As such, the Company has established loss and LAE reserves for such lawsuits as to which the Company has determined that a loss is both probable and estimable. In addition to these case reserves, the Company also establishes reserves for claims incurred but not reported to cover unknown exposures and adverse development on known exposures. Based on currently

Table of Contents

available information, the Company believes that reserves for these lawsuits are reasonable and that the amounts reserved did not have a material effect on the Company's financial condition or results of operations. However, if any one or more of these cases results in a judgment against or settlement by the Company for an amount that is significantly greater than the amount so reserved, the resulting liability could have a material effect on the Company's financial condition, cash flows and results of operations.

As a direct writer of insurance, the Company receives assessments by state funds to cover losses to policyholders of insolvent or rehabilitated companies and other authorized fees. These mandatory assessments may be partially recovered through a reduction in future premium taxes in some states over several years. At March 31, 2016 and December 31, 2015, the liability for such assessments was \$5.1 million and \$5.0 million, respectively, and will be paid over several years as assessed by the various state funds.

The Company has investments in limited partnerships which are included in the "Other invested assets" line on the Consolidated Balance Sheets. Relative to such limited partnerships, the Company has contractual agreements to invest up to an additional \$15.6 million. These limited partnership contractual agreements have expiration dates up to five years whereby the entire amounts or a portion thereof could be required to be funded at any time prior to the expiration dates.

11. Segment Information

The Company operates its business as one segment, property and casualty insurance. The Company manages this segment through a product management structure. The following table shows revenues summarized by the broader business component description, which were determined based primarily on similar economic characteristics, products and services.

	Three Months Ended	
	March 31,	
	2016	2015
	(Dollars in thousands)	
Revenue:		
Premiums earned:		
Alternative Risk Transfer	\$86,491	\$74,002
Transportation	46,145	48,252
Specialty Personal Lines	7,461	7,550
Hawaii and Alaska	5,176	4,648
Other	4,141	3,371
Total premiums earned	149,414	137,823
Net investment income	10,415	9,656
Net realized (losses) gains on investments	(1,145)	1,069
Other	673	830
Total revenues	\$159,357	\$149,378

Table of Contents

12. Accumulated Other Comprehensive Income, Net of Tax

The following table presents the changes in the Company's AOCI:

	Three Months Ended March 31,	
	2016	2015
	(Dollars in thousands)	
Beginning balance	\$ 8,105	\$ 24,483
Net unrealized gains on available-for-sale securities:		
Net unrealized holding gains on securities arising during the period, net of tax	2,894	3,266
Reclassification adjustment for net realized losses (gains) included in net income, net of tax	1,982	(366)
Other comprehensive income, net of tax	4,876	2,900
Ending balance	\$ 12,981	\$ 27,383

The following table presents amounts related to unrealized gains and losses on available-for-sale securities which were reclassified out of AOCI during the three months ended March 31, 2016 and 2015, categorized by the respective affected line items in the Consolidated Statements of Income.

	Three Months Ended March 31,	
	2016	2015
	(Dollars in thousands)	
(Decrease) increase to net realized (losses) gains on investments	\$(3,049)	\$563
(Decrease) increase to income before income taxes	(3,049)	563
(Decrease) increase to provision for income taxes	(1,067)	197
(Decrease) increase to net income	\$(1,982)	\$366

13. Variable Interest Entities

The Company invests in limited partnerships ("LPs") in anticipation of earning a rate of return that is consistent with the risk profile of the LP and to provide investment diversification. The LPs that the Company invests in are primarily hedge funds and private equity funds. Current LP investments include funds that are focused on stressed and distressed debt, publicly traded common and preferred stock, merger/arbitrage opportunities, mezzanine debt and private equity. The Company's investment funds qualify as VIEs and are therefore evaluated for consolidation under the VIE model.

The Company is required to consolidate a VIE if it is the primary beneficiary of the VIE, which is defined as having both the power to direct the activities of the VIE that most significantly impact that entity's economic performance and the obligation to absorb losses of, or receive benefits from, the entity that could potentially be significant to the VIE. In evaluating whether the Company has the power to direct the activities of a VIE that most significantly impact its economic performance, the Company considers the purpose for which the VIE was created, the importance of each of the activities in which it is engaged and our decision-making role, if any, in those activities that significantly determine the entity's economic performance as compared to other economic interest holders. In determining whether the Company has the right to receive benefits or obligation to absorb losses that could potentially be significant to the VIE, the Company evaluates all of its economic interests in the entity. This evaluation considers all relevant factors of the VIE's design including its capital structure, contractual rights to earnings (losses), as well as other contractual arrangements that have the potential to be economically significant. The evaluation of both power and benefits requires the exercise of professional judgment.

The Company does not consolidate the VIEs because as a passive investor in limited partner equity interests, the Company does not have the power to direct the activities that are considered significant to the LPs economic

performance, which are primarily related to the determination of which investments to purchase and sell. The Company's involvement with the VIEs consists of assisting in the financing of the entity and future funding commitments. The Company monitors the unconsolidated VIEs to determine if any events have occurred that could cause the Company to be considered the primary beneficiary.

Table of Contents

The aforementioned investments are accounted for under the equity method and are reported in the Company's Consolidated Balance Sheets as "Other invested assets". Income from these investments is recorded in the Company's "Net realized (losses) gains on investments" line on the Consolidated Statements of Income. Some of these investments in LPs cannot be redeemed and distributions will ultimately be received by the Company from the liquidation of the underlying investments within the funds. The Company's maximum exposure to economic loss with respect to these LP investments is limited to the investments carrying amounts reported in the Company's Consolidated Balance Sheets and any unfunded commitments, as shown below.

March 31, 2016
(Dollars in thousands)

Maximum exposure to loss in unconsolidated VIEs:

Other invested assets	\$ 48,587
Obligation to fund investments	15,580
Total	\$ 64,167

The Company does not have any implicit support arrangements with any VIE and has not provided non-contractual support as of March 31, 2016.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Forward-Looking Statements

This document, including information incorporated by reference, contains "forward-looking statements" (within the meaning of the Private Securities Litigation Reform Act of 1995). All statements, trend analyses and other information contained in this Form 10-Q relative to markets for our products and trends in our operations or financial results, as well as other statements including words such as "may," "target," "anticipate," "believe," "plan," "estimate," "expect," "intend," "project," and other similar expressions, constitute forward-looking statements. We made these statements based on our plans and current analyses of our business and the insurance industry as a whole. We caution that these statements may and often do vary from actual results and the differences between these statements and actual results can be material. Factors that could contribute to these differences include, among other things:

- general economic conditions, weakness of the financial markets and other factors, including prevailing interest rate levels and stock and credit market performance, which may affect or continue to affect (among other things) our ability to sell our products and to collect amounts due to us, our ability to access capital resources and the costs associated with such access to capital and the market value of our investments;
- our ability to obtain adequate premium rates and manage our growth strategy;
- performance of securities markets;
- our ability to attract and retain independent agents and brokers;
- customer response to new products and marketing initiatives;
- tax law and accounting changes;
- increasing competition in the sale of our insurance products and services and the retention of existing customers;
- changes in legal environment;
- legal actions brought against us;
- regulatory changes or actions, including those relating to the regulation of the sale, underwriting and pricing of insurance products and services and capital requirements;
- damage to our reputation;
- levels of natural catastrophes, terrorist events, incidents of war and other major losses;
- technology or network security disruptions;
- adequacy of insurance reserves; and
- availability of reinsurance and ability of reinsurers to pay their obligations.

The forward-looking statements herein are made only as of the date of this report. We assume no obligation to publicly update any forward-looking statements.

General

We underwrite and sell traditional and alternative risk transfer (“ART”) property and casualty insurance products primarily to the passenger transportation industry, the trucking industry and moving and storage transportation companies, general commercial insurance to small businesses in Hawaii and Alaska and personal insurance to owners of recreational vehicles throughout the United States.

We have five property and casualty insurance subsidiaries: National Interstate Insurance Company (“NIIC”), Vanliner Insurance Company (“VIC” or “Vanliner”), National Interstate Insurance Company of Hawaii, Inc. (“NIIC-HI”), Triumpher Casualty Company (“TCC”), and Hudson Indemnity, Ltd. (“HIL”) and six active agency and service subsidiaries. We write our insurance policies on a direct basis through NIIC, VIC, NIIC-HI and TCC. NIIC and VIC are licensed in all 50 states and the District of Columbia. NIIC-HI is licensed in Ohio, Hawaii, Michigan and New Jersey. TCC holds licenses for multiple lines of authority, including auto-related lines, in 43 states and the District of Columbia. HIL is domiciled in the Cayman Islands and provides reinsurance for NIIC, VIC, NIIC-HI and TCC, primarily for the ART component. Insurance products are marketed through multiple distribution channels, including independent agents and brokers, program administrators, affiliated agencies and agent internet initiatives. We sell and service our insurance business through our active agency and service subsidiaries.

As of March 31, 2016, Great American Insurance Company (“Great American”) owned 51.0% of our outstanding common shares.

Results of Operations

Overview

Through the operations of our subsidiaries, we are engaged in property and casualty insurance operations. We focus on niche insurance markets where we offer specialized insurance products, services and programs designed to meet the unique needs of targeted insurance buyers that we believe are underserved by the insurance industry. Our underwriting approach is to price our products to attain an underwriting profit even if we forgo volume as a result. We derive our revenues primarily from premiums generated by our insurance policies and income from our investment portfolio. Our expenses consist primarily of losses and loss adjustment expenses (“LAE”), commissions and other underwriting expenses and other operating and general expenses.

Table of Contents

Our net income, determined in accordance with U.S. generally accepted accounting principles (“GAAP”), includes after-tax net realized (losses) gains from investments that may not be indicative of our ongoing operations. The following tables reconcile net income to net income from operations, a non-GAAP financial measure that we believe is a useful tool for investors and analysts in analyzing ongoing operating trends.

	Three Months Ended March 31,			
	2016		2015	
	Amount	Per Share	Amount	Per Share
	(Dollars in thousands, except per share data)			
Net income from operations	\$7,584	\$ 0.38	\$6,414	\$ 0.33
After-tax net realized (losses) gains from investments	(744)	(0.04)	695	0.03
Net income	\$6,840	\$ 0.34	\$7,109	\$ 0.36

We recorded net income for the three months ended March 31, 2016 of \$6.8 million (\$0.34 per share diluted) compared to net income of \$7.1 million (\$0.36 per share diluted) for the same period in 2015. The decrease in net income was primarily due to after-tax other-than-temporary impairment (“OTTI”) charges on investments, whereas the prior period was favorably impacted by after-tax net realized gains on investments. The OTTI charges were primarily from securities related to the financial services and energy sectors, where management is uncertain of the timing and the extent of ultimate recovery. Partially offsetting this decrease to net income was an increase in net investment income due to higher average invested assets. Additionally, our loss and LAE ratio of 77.3% for the three months ended March 31, 2016 compared to 78.9% for the same period in 2015 contributed favorably to net income. The decrease in the loss and LAE ratio was attributable to the absence of development on prior year loss reserves compared to unfavorable development reported in the same period last year. The unfavorable development reported last year was concentrated in our commercial auto liability line of business and was primarily attributable to products we no longer offer or customers which we no longer insure, as well as from assigned risk policies that we are obligated to write as part of the involuntary insurance market.

Our net income from operations for the three months ended March 31, 2016 was \$7.6 million (\$0.38 per share diluted) compared to net income of \$6.4 million (\$0.33 per share diluted) for the same period in 2015. The primary drivers for the period-over-period fluctuations are the same as those discussed above for the change in net income for the respective periods.

Gross Premiums Written

We operate our business as one segment, property and casualty insurance. We manage this segment through a product management structure. The following tables set forth an analysis of gross premiums written by the broader business component description, which were determined based primarily on similar economic characteristics, products and services.

	Three Months Ended March 31,			
	2016		2015	
	Amount	Percent	Amount	Percent
	(Dollars in thousands)			
Alternative Risk Transfer	\$92,818	56.4 %	\$91,193	59.0 %
Transportation	53,522	32.5 %	46,519	30.1 %
Specialty Personal Lines	9,800	6.0 %	9,220	6.0 %
Hawaii and Alaska	4,357	2.6 %	4,095	2.6 %
Other	4,203	2.5 %	3,511	2.3 %
Gross premiums written	\$164,700	100.0%	\$154,538	100.0%

Three months ended March 31, 2016 compared to March 31, 2015. During the first three months of 2016, our gross premiums written increased \$10.2 million, or 6.6%, compared to the same period in 2015 primarily due to growth within our transportation component. Gross premiums written reflect overall average rate increases on renewed business of approximately 5.0% in the current period. Gross premiums written in our transportation component

increased \$7.0 million, or 15.1%, during the first three months of 2016 compared to the same period in 2015 primarily due to the addition of new business written in our traditional trucking, ambulance and crane insurance products, as well as obtaining new business and adding coverage to our expanded limits coverage offered to trucking customers. Gross premiums written in our ART component increased \$1.6 million, or 1.8%, primarily due to new business written in several of our group ART captive programs, which includes several former accounts that returned to our company, as well as exposure growth in one of our national account ART programs. These increases were largely offset by a national account program that was not renewed and another was lost due to an acquisition in the market. The other component,

Table of Contents

which is comprised of premium from assigned risk policies that we receive from involuntary state insurance plans from the states in which our insurance company subsidiaries operate and over which we have no control, increased \$0.7 million, or 19.7%, compared to the same period in 2015.

Our ART programs, which focus on specialty or niche businesses, provide various services and coverages tailored to meet specific requirements of defined client groups and their members. These services include risk management consulting, claims administration and handling, loss control and prevention and reinsurance placement, along with providing various types of property and casualty insurance coverage. Insurance coverage is provided primarily to companies with similar risk profiles and to specified classes of business of our agent partners.

As part of our ART programs, we analyze, on a quarterly basis, members' loss performance on a policy year basis to determine if there would be an assessment premium (loss results are unfavorable to expectations) or if there would be a return of premium (loss results are favorable to expectations) to participants. Assessment premium and return of premium are recorded as adjustments to premiums written (assessments increase premiums written; returns of premium reduce premiums written). For the three months ended March 31, 2016 and 2015, we recorded net premium assessments of \$1.0 million and \$2.4 million, respectively.

Premiums Earned

We operate our business as one segment, property and casualty insurance. We manage this segment through a product management structure. The following tables show premiums earned summarized by the broader business component description, which were determined based primarily on similar economic characteristics, products and services.

	Three Months Ended March 31,		Change	
	2016	2015	Amount	Percent
(Dollars in thousands)				
Premiums earned:				
Alternative Risk Transfer	\$86,491	\$74,002	\$12,489	16.9 %
Transportation	46,145	48,252	(2,107)	(4.4)%
Specialty Personal Lines	7,461	7,550	(89)	(1.2)%
Hawaii and Alaska	5,176	4,648	528	11.4 %
Other	4,141	3,371	770	22.8 %
Total premiums earned	\$149,414	\$137,823	\$11,591	8.4 %

Three months ended March 31, 2016 compared to March 31, 2015. Our premiums earned increased \$11.6 million, or 8.4%, to \$149.4 million during the three months ended March 31, 2016 compared to \$137.8 million for the same period in 2015. The increase in premiums earned was primarily attributable to our ART component, which grew \$12.5 million, or 16.9%. Our ART component growth was primarily from the addition of one large insured to our national account ART product during the third quarter of 2015, as well as rate and exposure increases on renewed business within our group ART programs. This growth was partially offset by a slight decline in our transportation component of \$2.1 million, or 4.4%, primarily due to underwriting actions taken during the past two years in our traditional trucking and tow businesses. We have experienced growth due to new business and rate increases in our newer traditional product offerings including our home delivery, ambulance and crane and heavy haul products. The increase in our Hawaii and Alaska component of \$0.5 million, or 11.4%, is primarily due to rate increases on renewed business and new business written. Our other component, which is comprised of premium from assigned risk plans from the states in which our insurance company subsidiaries operate and over which we have no control, increased \$0.8 million, or 22.8%, compared to the same period in 2015.

Underwriting and Loss Ratio Analysis

Underwriting profitability, as opposed to overall profitability or net earnings, is measured by the combined ratio. The combined ratio is the sum of the loss and LAE ratio and the underwriting expense ratio. A combined ratio under 100% is indicative of a pre-tax underwriting profit.

Losses and LAE are a function of the amount and type of insurance contracts we write and of the loss experience of the underlying risks. We seek to establish case reserves at the maximum probable exposure based on our historical claims experience. Our ability to accurately estimate losses and LAE at the time of pricing our contracts is a critical

factor in determining our profitability. The amount reported under losses and LAE in any period includes payments in the period net of the change in reserves for unpaid losses and LAE between the beginning and the end of the period. Our underwriting expense ratio includes commissions and other underwriting expenses and other operating and general expenses, offset by other income. Commissions and other underwriting expenses consist principally of brokerage and agent commissions

Table of Contents

reduced by ceding commissions received from reinsurers, and vary depending upon the amount and types of contracts written and, to a lesser extent, premium taxes.

The premium generated by each of our ART insurance programs includes the premium charged related to the development of the participants' loss fund. The loss fund represents the amount of premium needed to cover the participants' expected losses in the layer of risk being ceded to the captive reinsurer. Typically, the premium and losses incurred through the funding of our captive participant's loss layer are comparable period-over-period.

However, increased member participation or assessment of premium charged on the loss fund layer through Hudson Indemnity, Ltd. ("HIL") has the potential to unfavorably impact our loss and LAE ratio, and conversely, have a favorable impact on our underwriting expense ratio, when comparing results to a prior period.

Our underwriting approach is to price our products to attain an underwriting profit even if we forgo volume as a result. We continue to achieve rate level increases on renewed business, which have averaged approximately 5.0% in the current quarter and we are applying the same pricing disciplines to our new business opportunities. We believe that the current rate level increases we are obtaining on renewal business, along with improved pricing on new business, are at levels that adequately consider industry loss cost trends.

The table below presents our net premiums earned and combined ratios for the periods indicated.

	Three Months Ended		
	March 31,		
	2016	2015	
	(Dollars in thousands)		
Gross premiums written	\$164,700	\$154,538	
Ceded reinsurance	(34,742)	(30,441)	
Net premiums written	129,958	124,097	
Change in unearned premiums, net of ceded	19,456	13,726	
Total premiums earned	\$149,414	\$137,823	
Combined ratios:			
Loss and LAE ratio excluding prior year development (accident year)	77.3	% 75.6	%
Prior year loss and LAE development	0.0	% 3.3	%
Loss and LAE ratio (calendar year) (1)	77.3	% 78.9	%
Underwriting expense ratio (2)	21.0	% 20.6	%
GAAP Combined ratio	98.3	% 99.5	%
Accident year combined ratio developed through March 31, 2016	98.3	% 97.9	%

(1) The ratio of losses and LAE to premiums earned.

(2) The ratio of the sum of commissions and other underwriting expenses and other operating expenses less other income to premiums earned.

Three months ended March 31, 2016 compared to March 31, 2015. Our loss and LAE ratio for the three months ended March 31, 2016 improved 1.6 combined ratio points to 77.3% compared to 78.9% during the same period in 2015. For the three months ended March 31, 2016, we did not record any development on prior years' loss reserves compared to \$4.6 million, or 3.3 combined ratio points, during the same period last year. The development recorded in the first quarter of 2015 was concentrated in our commercial auto liability line of business and was primarily attributable to products we no longer offer or customers which we no longer insure, as well as from assigned risk policies that we are obligated to write as part of the involuntary insurance market. Our accident year loss and LAE ratio, which represents our GAAP loss and LAE ratio less prior year development, reported during the first three months of 2016 and 2015 was 77.3% and 75.6%, respectively. Consistent with much of the industry, our current year accident loss ratio reflects results in the commercial auto liability line that are elevated primarily due to higher average claims severity.

Our current accident year loss and LAE ratio at March 31, 2016 of 77.3% compared to the developed full-year 2015 accident year loss and LAE ratio of 78.1% shows continued improvement from recent accident years and reflects the cumulative impact of rate increases on renewed business since 2013, as well as improved pricing discipline applied to new business. Our underwriting strategy involves only those business opportunities that meet our stringent pricing and

risk selection standards and we continue to take rate actions or other corrective measures on underperforming accounts or businesses. In addition to our underwriting criteria, we continuously seek to enhance our claims management and risk management tools to improve pricing and risk selection, as well as focusing on being disciplined and well managed in our reserving practices.

Table of Contents

The underwriting expense ratio for the three month period ended March 31, 2016 of 21.0% was comparable to the ratio for the same period in 2015 of 20.6%.

Net Investment Income

2016 compared to 2015. Net investment income increased \$0.8 million, or 7.9%, to \$10.4 million in the first quarter of 2016 compared to \$9.7 million for the first quarter of 2015. The increase in net investment income is primarily due to higher average invested assets.

Net Realized (Losses) Gains on Investments

2016 compared to 2015. Pre-tax net realized losses on investments were \$1.1 million for the three months ended March 31, 2016 compared to pre-tax net realized gains of \$1.1 million for the same period in 2015. The pre-tax net realized losses for the first quarter of 2016 were primarily due to OTTI charges of \$3.8 million and were concentrated on securities within the financial services and energy sectors, where management is uncertain of the timing and the extent of ultimate recovery. Partially offsetting these losses for the three months ended March 31, 2016 were net gains generated by other invested assets and from the sales or redemptions of securities of \$1.9 million and \$0.8 million, respectively. The pre-tax net realized gains for the first quarter of 2015 were partially generated from sales of securities totaling \$0.7 million, as well as net gains associated with other invested assets of \$0.4 million.

Commissions and Other Underwriting Expenses

2016 compared to 2015. For the three months ended March 31, 2016 and 2015, commissions and other underwriting expenses were \$24.5 million and \$23.0 million, or 16.4% and 16.7% as a percentage of premiums earned, respectively. The improvement in commissions and other underwriting expenses as a percentage of premiums earned reflects changes in our mix of business written.

Other Operating and General Expenses

2016 compared to 2015. For the three months ended March 31, 2016 and 2015, other operating and general expenses were \$7.6 million and \$6.2 million, respectively. The increase in these expenses is primarily attributable to an increase in personnel and information technology resources to support business decisions and to sustain continued growth. As a percentage of premiums earned, such expenses were 5.1% and 4.5% for the three months ended March 31, 2016 and 2015, respectively.

Expense on Amounts Withheld

2016 compared to 2015. We invest funds in the participant loss layer for several of our ART programs. We earn investment income and generate realized gains or losses, and incur an equal expense on the amounts owed to ART participants. "Expense on amounts withheld" represents both investment income and realized gains or losses that we remit back to ART participants. The related investment income and realized gains or losses are included in the "Net investment income" and "Net realized (losses) gains on investments" lines, respectively, on our Consolidated Statements of Income. For the three months ended March 31, 2016 and 2015, expense on amounts withheld were \$1.9 million and \$1.5 million, respectively, increasing 26.2%. Such increase was primarily due to growth experienced in our ART programs participant loss layer.

Income Taxes

2016 compared to 2015. The effective tax rate in the first quarter is adjusted to equal the estimated full-year effective tax rate of 30.7%, compared to 27.6% for the same period in 2015. The 3.1% increase in the effective tax rate is primarily driven by the estimated full-year increase in pre-tax net income over the prior period.

Financial Condition

Investments

At March 31, 2016, our investment portfolio contained \$1.1 billion in fixed maturity securities and \$82.8 million in equity securities, all carried at fair value, with unrealized gains and losses reported as a separate component of shareholders' equity, and \$48.6 million in other invested assets, which are limited partnership investments accounted for in accordance with the equity method. At March 31, 2016, we had pre-tax net unrealized gains of \$20.0 million on fixed maturities and \$16.0 thousand on equity securities. Consistent with the guidelines in our investment policy, our investment portfolio allocation is based on diversification among primarily high quality fixed maturity investments. At March 31, 2016, 89.3% of the fixed maturities in our portfolio were rated "investment grade" (credit rating of AAA to BBB-) by nationally recognized rating agencies. Investment grade securities generally bear lower degrees of risk

and corresponding lower yields than those that are unrated or non-investment grade. Although we cannot provide any assurances, we believe that, in normal market conditions, our high quality investment portfolio should generate a stable and predictable investment return.

Table of Contents

Included in fixed maturities at March 31, 2016 were \$312.1 million of state and local government obligations, which represented approximately 28.4% of our fixed maturity portfolio, with approximately \$272.5 million, or 87.3%, of our state and local government obligations held in special revenue obligations, and the remaining amount held in general obligations. Our state and local government obligations portfolio is high quality, as 98.5% of such securities were rated investment grade at March 31, 2016. We had no state and local government obligations for any state, municipality or political subdivision that comprised 10% or more of the total amortized cost or fair value of such obligations at March 31, 2016.

Included in fixed maturities at March 31, 2016 were \$184.1 million of residential and commercial mortgage-backed securities (“MBS”). MBS are subject to significant prepayment risk due to the fact that, in periods of declining interest rates, mortgages may be repaid more rapidly than scheduled as borrowers refinance higher rate mortgages to take advantage of lower rates. Summarized information for our MBS at March 31, 2016 is shown in the table below.

Agency-backed securities are those issued by a U.S. government-backed agency; Alt-A mortgages are those with risk profiles between prime and subprime. The majority of the Alt-A securities and substantially all of the subprime securities are backed by fixed-rate mortgages.

	Amortized Cost	Fair Value	Fair Value as % of Cost	Unrealized Gain
(Dollars in thousands)				
Collateral Type				
Residential:				
Agency-backed	\$83,514	\$84,925	101.7%	\$ 1,411
Non-agency prime	18,991	19,720	103.8%	729
Alt-A	26,563	27,613	104.0%	1,050
Subprime	35,097	36,567	104.2%	1,470
Commercial	14,505	15,266	105.2%	761
	\$178,670	\$184,091	103.0%	\$ 5,421

The National Association of Insurance Commissioners (“NAIC”) assigns creditworthiness designations on a scale of 1 to 6 with 1 being the highest quality and 6 being the lowest quality. The NAIC retained third-party investment management firms to assist in the determination of appropriate NAIC designations for MBS based not only on the probability of loss (which is the primary basis of ratings by the major ratings firms), but also on the severity of loss and the statutory carrying value. At March 31, 2016, 99.0% (based on statutory carrying value of \$178.7 million) of our MBS had an NAIC designation of 1 or 2.

Certain European countries, including the so-called “peripheral countries” (Greece, Portugal, Ireland, Italy and Spain) have been experiencing varying degrees of financial stress over the past few years and there remains uncertainty as to future developments and the impact on global financial markets. At March 31, 2016, less than 5% of our investments consisted of European debt and we owned no sovereign debt issued by the peripheral countries.

At March 31, 2016, our fixed maturity securities issued by energy and commodity related entities were \$53.9 million, or 4.9% of our fixed maturity portfolio, with an unrealized loss of \$2.7 million. Approximately 70% of the fair market value of these securities were investment grade rated. Our equity securities portfolio holds \$5.1 million, or 6.2%, of energy and commodity related securities with an unrealized loss \$0.3 million.

Table of Contents

Summary information for securities with unrealized gains or losses at March 31, 2016 is shown in the following table. Approximately \$17.3 million of fixed maturities and \$3.3 million of equity securities had no unrealized gains or losses at March 31, 2016.

	Securities with Unrealized Gains (Dollars in thousands)		Securities with Unrealized Losses (Dollars in thousands)	
Fixed Maturities:				
Fair value of securities	\$844,074		\$ 239,329	
Amortized cost of securities	815,336		248,112	
Gross unrealized gain or (loss)	\$28,738		\$ (8,783))
Fair value as a % of amortized cost	103.5	%	96.5	%
Number of security positions held	731		273	
Number individually exceeding \$50,000 gain or (loss)	150		44	
Concentration of gains or (losses) by type or industry:				
U.S. Government and government agencies	\$2,980		\$ (4))
State, municipalities and political subdivisions	12,766		(62))
Residential mortgage-backed securities	5,496		(829))
Commercial mortgage-backed securities	769		(15))
Other debt obligations	812		(2,742))
Financial institutions, insurance and real estate	2,118		(1,034))
Industrial and other	3,797		(4,097))
Percent rated investment grade (a)	93.3	%	75.0	%
Equity Securities:				
Fair value of securities	\$39,508		\$ 40,030	
Cost of securities	34,271		45,251	
Gross unrealized gain or (loss)	\$5,237		\$ (5,221))
Fair value as a % of cost	115.3	%	88.5	%
Number individually exceeding \$50,000 gain or (loss)	36		27	

(a) Investment grade of AAA to BBB- by nationally recognized rating agencies.

The table below sets forth the scheduled maturities of available-for-sale fixed maturity securities at March 31, 2016, based on their fair values. Other debt obligations, which are primarily comprised of asset-backed securities other than mortgage-backed securities, and other securities with sinking funds, are categorized based on their average maturity. Actual maturities may differ from contractual maturities because certain securities may be called or prepaid by the issuers.

	Securities with Unrealized Gains		Securities with Unrealized Losses	
Maturity:				
One year or less	5.2	%	2.1	%
After one year through five years	36.2	%	46.5	%
After five years through ten years	34.5	%	27.4	%
After ten years	8.6	%	1.9	%
	84.5	%	77.9	%
Mortgage-backed securities	15.5	%	22.1	%
	100.0	%	100.0	%

Table of Contents

The table below summarizes the unrealized gains and losses on fixed maturities and equity securities by dollar amount.

	At March 31, 2016		Fair Value	
	Aggregate Fair Value	Aggregate Unrealized Gain (Loss)	as % of Cost Basis	
	(Dollars in thousands)			
Fixed Maturities:				
Securities with unrealized gains:				
Exceeding \$50,000 and for:				
Less than one year (56 issues)	\$95,352	\$ 4,022	104.4	%
One year or longer (94 issues)	204,005	15,399	108.2	%
\$50,000 or less (581 issues)	544,717	9,317	101.7	%
	\$844,074	\$ 28,738		
Securities with unrealized losses:				
Exceeding \$50,000 and for:				
Less than one year (39 issues)	\$36,278	\$ (4,493)	89.0	%
One year or longer (5 issues)	3,367	(1,310)	72.0	%
\$50,000 or less (229 issues)	199,684	(2,980)	98.5	%
	\$239,329	\$ (8,783)		
Equity Securities:				
Securities with unrealized gains:				
Exceeding \$50,000 and for:				
Less than one year (29 issues)	\$15,899	\$ 2,427	118.0	%
One year or longer (7 issues)	6,882	1,705	132.9	%
\$50,000 or less (48 issues)	16,727	1,105	107.1	%
	\$39,508	\$ 5,237		
Securities with unrealized losses:				
Exceeding \$50,000 and for:				
Less than one year (27 issues)	\$24,912	\$ (4,632)	84.3	%
\$50,000 or less (36 issues)	15,118	(589)	96.3	%
	\$40,030	\$ (5,221)		

When a decline in the value of a specific investment is considered to be other-than-temporary, a provision for impairment is charged to earnings (accounted for as a realized loss) and the cost basis of that investment is reduced. The determination of whether unrealized losses are other-than-temporary requires judgment based on subjective, as well as, objective factors. Factors considered and resources used by management include those discussed in "Management's Discussion and Analysis of Financial Condition and Results of Operations — Other-Than-Temporary Impairment."

Liquidity and Capital Resources

Our cash flows from operating, investing and financing activities as detailed in our Consolidated Statements of Cash Flows are shown below (in thousands):

	Three Months	
	Ended March 31,	
	2016	2015
Net cash provided by operating activities	\$25,221	\$30,507
Net cash used in investing activities	(43,704)	(17,297)
Net cash used in financing activities	(3,061)	(2,267)
Net (decrease) increase in cash and cash equivalents	\$(21,544)	\$10,943

Table of Contents

The liquidity requirements of our insurance subsidiaries relate primarily to the liabilities associated with their products, as well as operating costs and payments of dividends and taxes to us from insurance subsidiaries. Historically, and during the three months ended March 31, 2016, cash flows from premiums and investment income have provided sufficient funds to meet these requirements without requiring significant liquidation of investments. If our cash flows change dramatically from historical patterns, for example as a result of a decrease in premiums, an increase in claims paid or operating expenses, or financing an acquisition, we may be required to sell securities before their maturity and possibly at a loss. Our insurance subsidiaries generally hold a significant amount of highly liquid, short-term investments or cash and cash equivalents to meet their liquidity needs. Our historic pattern of using receipts from current premium writings for the payment of liabilities incurred in prior periods provides us with the option to extend the maturities of our investment portfolio beyond the estimated settlement date of our loss reserves. Funds received in excess of cash requirements are generally invested in additional marketable securities.

We believe that our insurance subsidiaries maintain sufficient liquidity to pay claims and operating expenses, as well as meet commitments in the event of unforeseen events such as reserve deficiencies, inadequate premium rates or reinsurer insolvencies. Our principal sources of liquidity are our existing cash and cash equivalents. Cash and cash equivalents decreased \$21.5 million from \$71.9 million at December 31, 2015 to \$50.4 million at March 31, 2016. We generated net cash from operations of \$25.2 million for the three months ended March 31, 2016, compared to \$30.5 million during the same period in 2015, which is primarily due to an increase in cash payments made for loss and loss adjustment expenses year-over-year partially offset by an increase in cash collected on premiums written.

Net cash used in investing activities was \$43.7 million and \$17.3 million for the three months ended March 31, 2016 and 2015, respectively. The increase in net cash used in investing activities was primarily attributable to fixed maturity security purchases exceeding sales, maturities and redemptions. Purchases of and proceeds from the redemption of fixed maturity securities were \$89.2 million and \$45.4 million, respectively, for the period ending March 31, 2016, compared to \$59.0 million and \$42.4 million, respectively, for the same period last year. The increase in purchases of fixed maturity securities was concentrated in U.S. government agency bonds and residential MBS and was primarily driven by reinvesting funds in excess of cash requirements.

Net cash used in financing activities was \$3.1 million and \$2.3 million for the three months ended March 31, 2016 and 2015, respectively. Our financing activities include those related to share-based compensation activity and dividends paid on our common shares.

We have continuing cash needs for administrative expenses, the payment of principal and interest on borrowings, shareholder dividends and taxes. Funds to meet these obligations come primarily from parent company cash, dividends and other payments from our insurance company subsidiaries.

We have a \$100.0 million unsecured credit agreement (the "Credit Agreement") that terminates in November 2017, which includes a sublimit of \$10.0 million for letters of credit. We have the ability to increase the line of credit to \$125.0 million subject to the Credit Agreement's accordion feature. Amounts borrowed bear interest at either (1) a LIBOR rate plus an applicable margin ranging from 0.75% to 1.00% based on our A.M. Best insurance group rating, or (2) a rate per annum equal to the greater of (a) the administrative agent's prime rate, (b) 0.50% in excess of the federal funds effective rate, or (c) 1.00% in excess of the one-month LIBOR rate. At March 31, 2016, we had \$12.0 million outstanding under the Credit Agreement. Based on our A.M. Best insurance group rating of "A" at March 31, 2016, the interest rate on this debt is equal to the six-month LIBOR (0.524% at March 31, 2016) plus 87.5 basis points, with interest payments due quarterly.

The Credit Agreement requires us to maintain specified financial covenants measured on a quarterly basis, including minimum consolidated net worth and a maximum debt to capital ratio. In addition, the Credit Agreement contains certain affirmative and negative covenants customary for facilities of this type, including negative covenants that limit or restrict our ability to, among other things, pay dividends, incur additional indebtedness, effect mergers or consolidations, make investments, enter into asset sales, create liens, enter into transactions with affiliates and other restrictions customarily contained in such agreements. As of March 31, 2016, we were in compliance with all covenants.

We believe that funds generated from operations, including dividends from insurance subsidiaries, parent company cash and funds available under our Credit Agreement, will provide sufficient resources to meet our liquidity

requirements for at least the next 12 months. However, if these funds are insufficient to meet fixed charges in any period, we would be required to generate cash through additional borrowings, sale of assets, sale of portfolio securities or similar transactions. If we were required to sell portfolio securities early for liquidity purposes rather than holding them to maturity, we would recognize gains or losses on those securities earlier than anticipated. If we find it necessary to borrow additional funds under our Credit Agreement in order to meet liquidity needs, we would incur additional interest expense, which could have a negative impact on our earnings. Since our ability to meet our obligations in the long-term (beyond a 12-month period) is dependent upon factors such as market changes, insurance regulatory changes and economic conditions, no assurance can be given that the available net cash flow will be sufficient to meet our long-term operating needs. We are not aware of any trends or uncertainties affecting our liquidity, including any significant future reliance on short-term financing arrangements.

Table of Contents

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements. As more information becomes known, these estimates and assumptions could change and impact amounts reported in the future. Management believes that the establishment of losses and LAE reserves and the determination of “other-than-temporary” impairment on investments are the two areas whereby the degree of judgment required in determining amounts recorded in the financial statements make the accounting policies critical. For a more detailed discussion of these policies, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies” in our Annual Report on Form 10-K for the year ended December 31, 2015.

Losses and LAE Reserves

Significant periods of time can elapse between the occurrence of an insured loss, the reporting of that loss to us and our final payment of that loss and its related LAE. To recognize liabilities for unpaid losses, we establish reserves as balance sheet liabilities. At both March 31, 2016 and December 31, 2015, we had \$1.0 billion of gross loss and LAE reserves, representing management’s best estimate of the ultimate loss. Management records, on a monthly and quarterly basis, its best estimate of loss reserves.

For purposes of computing the recorded loss and LAE reserves, management utilizes various data inputs as noted below, including analysis that is derived from our internal actuary, as well as a review of quarterly results performed by actuaries employed by Great American. In addition, on an annual basis, actuaries from Great American provide a Statement of Actuarial Opinion, required annually in accordance with state insurance regulations, on the statutory reserves recorded by National Interstate Insurance Company (“NIIC”), Vanliner Insurance Company (“VIC”), National Interstate Insurance Company of Hawaii, Inc. (“NIIC-HI”) and Triumpher Casualty Company (“TCC”). The actuarial analysis of NIIC’s, VIC’s, NIIC-HI’s and TCC’s net reserves as of March 31, 2016 and December 31, 2015 reflected point estimates that were within 2% of management’s recorded net reserves as of such dates. Using actuarial data along with other data inputs, management concluded that the recorded reserves appropriately reflect management’s best estimates of the liability as of March 31, 2016 and December 31, 2015.

The quarterly reviews of unpaid loss and LAE reserves by Great American actuaries are prepared using standard actuarial techniques. These may include (but may not be limited to):

- the Case Incurred Development Method;
- the Paid Development Method; and
- the Bornhuetter-Ferguson Method.

The period of time from the occurrence of a loss through the settlement of the liability is referred to as the “tail.” Generally, the same actuarial methods are considered for both short-tail and long-tail lines of business because most of them work properly for both. The methods are designed to incorporate the effects of the differing length of time to settle particular claims. For short-tail lines, more weight tends to be given to the Case Incurred and Paid Development methods, although the various methods tend to produce similar results. For long-tail lines, more judgment is involved and more weight may be given to the Bornhuetter-Ferguson method. Liability claims for long-tail lines are more susceptible to litigation and can be significantly affected by changing contract interpretation and the legal environment. Therefore, the estimation of loss reserves for these classes is more complex and subject to a higher degree of variability.

Supplementary statistical information is reviewed by the actuaries to determine which methods are most appropriate and whether adjustments are needed to particular methods. This information includes:

- open and closed claim counts;
- average case reserves and average incurred on open claims;
- closure rates and statistics related to closed and open claim percentages;
- average closed claim severity;
- ultimate claim severity;
- reported loss ratios;
- projected ultimate loss ratios; and
- loss payment patterns.

Other-Than-Temporary Impairment

Our investments are exposed to at least one of three primary sources of investment risk: credit, interest rate and market valuation risks. The financial statement risks are those associated with the recognition of impairments and income, as well as the determination

34

Table of Contents

of fair values. We evaluate whether impairments have occurred on a case-by-case basis. Management considers a wide range of factors about the security's issuer and uses its best judgment in evaluating the cause and amount of decline in the estimated fair value of the security and in assessing the prospects for near-term recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Considerations that we use in the impairment evaluation process include, but are not limited to:

- the length of time and the extent to which the market value has been below amortized cost;
- whether the issuer is experiencing significant financial difficulties;
- economic stability of an entire industry sector or subsection;
- whether the issuer, series of issuers or industry has a catastrophic type of loss;
- the extent to which the unrealized loss is credit-driven or a result of changes in market interest rates;
- historical operating, balance sheet and cash flow data;
- internally and externally generated financial models and forecasts;
- our ability and intent to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value; and
- other subjective factors, including concentrations and information obtained from regulators and rating agencies.

Under other-than-temporary impairment accounting guidance, if management can assert that it does not intend to sell an impaired fixed maturity security and it is not more likely than not that it will have to sell the security before recovery of its amortized cost basis, then an entity may separate the other-than-temporary impairments into two components: 1) the amount related to credit losses (recorded in earnings) and 2) the amount related to all other factors (recorded in other comprehensive income). The credit related portion of an other-than-temporary impairment is measured by comparing a security's amortized cost to the present value of its current expected cash flows discounted at its effective yield prior to the impairment charge. Both components are required to be shown in the Consolidated Statements of Income. If management intends to sell an impaired security, or it is more likely than not that it will be required to sell the security before recovery, an impairment charge is required to reduce the amortized cost of that security to fair value. Additional disclosures required by this guidance are contained in Note 4 - "Investments."

We closely monitor each investment that has a fair value that is below its amortized cost and make a determination each quarter for other-than-temporary impairment for each of those investments. During the three months ended March 31, 2016, we recorded other-than-temporary impairment charges of \$3.8 million in earnings on both equity and fixed maturity securities, primarily within the energy and financial services sectors. The impairment charges on equity securities of \$2.5 million were due to the uncertainty surrounding the timing and extent of ultimate recovery while impairment charges on fixed maturity securities of \$1.3 million occurred as management is uncertain of full principal repayment. There were no material other-than-temporary charges during the three months ended March 31, 2015. While it is not possible to accurately predict if or when a specific security will become impaired, given the inherent uncertainty in the market, charges for other-than-temporary impairment could be material to net income in subsequent quarters. Management believes it is not likely that future impairment charges will have a significant effect on our liquidity. See "Management's Discussion and Analysis of Financial Condition and Results of Operations - Financial Condition - Investments."

Contractual Obligations/Off-Balance Sheet Arrangements

During the first three months of 2016, our contractual obligations did not change materially from those discussed in our Annual Report on Form 10-K for the year ended December 31, 2015.

We do not have any relationships with unconsolidated entities of financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

ITEM 3. Quantitative and Qualitative Disclosures About Market Risk

As of March 31, 2016, there were no material changes to the information provided in our Annual Report on Form 10-K for the year ended December 31, 2015 under Item 7A "Quantitative and Qualitative Disclosures About Market

Risk.”

ITEM 4. Controls and Procedures

Our management is responsible for establishing and maintaining effective disclosure controls and procedures, as defined under Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. Our management, with participation of our Chief Executive

35

Table of Contents

Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e)) as of March 31, 2016. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2016, to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's ("SEC") rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

There have been no changes in our internal controls over financial reporting or in other factors that have occurred during the quarter ended March 31, 2016 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. In the ordinary course of business, we routinely enhance our information systems by either updating systems or implementing new systems such as switching to a new vendor for our human resource, payroll and benefit software needs in the first quarter of 2016.

Table of Contents

PART II – OTHER INFORMATION

ITEM 1. Legal Proceedings

There are no material changes from the legal proceedings previously reported in our Annual Report on Form 10-K for the year ended December 31, 2015. For more information regarding such legal matters please refer to Item 3 of our Annual Report on Form 10-K for the year ended December 31, 2015, Note 15 – “Commitments and Contingencies” to the Consolidated Financial Statements included therein and Note 10 – “Commitments and Contingencies” to the Consolidated Financial Statements contained in this quarterly report.

ITEM 1A. Risk Factors

There are no material changes to the risk factors previously reported in our Annual Report on Form 10-K for the year ended December 31, 2015. For more information regarding such risk factors, please refer to Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2015.

ITEM 5. Other Information

As previously announced on our Form 8-K filed with the SEC on March 11, 2016, we will hold the 2016 Annual Meeting of Shareholders (“the 2016 Annual Meeting”) on Thursday, May 5, 2016, at 9:00 a.m., Eastern Time. The record date for determining shareholders entitled to notice of, and to vote at, the 2016 Annual Meeting was March 15, 2016.

Because the 2016 Annual Meeting will be held more than 30 days before the anniversary of the 2015 annual meeting of shareholders, any shareholder proposal or director nomination for consideration at our 2016 Annual Meeting had to be submitted to the Secretary of the Company no later than 5:00 p.m., Eastern Time, on March 21, 2016. Any such shareholder proposal or director nomination had to comply with our Code of Regulations as well as all applicable statutes, rules, and regulations promulgated by the SEC or any other applicable governing body. We did not receive any shareholder proposals or director nominations for the 2016 Annual Meeting.

ITEM 6. Exhibits

3.1 Amended and Restated Articles of Incorporation ⁽¹⁾

3.2 Amended and Restated Code of Regulations ⁽¹⁾

31.1 Certification of Chief Executive Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

31.2 Certification of Chief Financial Officer pursuant to Rule 13a-14(a)/15d-14(a) of the Securities Exchange Act of 1934, as amended, as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32.1 Certification of Chief Executive Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

32.2 Certification of Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

101 The following financial information from National Interstate Corporation’s Form 10-Q for the quarter ended March 31, 2016 formatted in XBRL (Extensible Business Reporting Language):

(i) Consolidated Balance Sheet

(ii) Consolidated Statements of Income

(iii) Consolidated Statements of Comprehensive Income

(iv) Consolidated Statements of Shareholders’ Equity

(v) Consolidated Statements of Cash Flows

(vi) Notes to Consolidated Financial Statements

⁽¹⁾ These exhibits are incorporated by reference to our Registration Statement on Form S-1 (Registration No. 333-119270).
