ALTANA delivers dynamic 1st half-year 2006

ALTANA Pharma: Sales +13%, operating return 30%

ALTANA Chemie: Sales +56%, operating return 19%

Outlook for 2006 confirmed: On the way to 11th record year in succession

Bad Homburg, August 2, 2006 ALTANA AG (NYSE: AAA, FSE: ALT) increased first-half consolidated sales in 2006 by 24% to 1.93 billion. This growth is due to the very good operating performance of ALTANA Pharma and ALTANA Chemie. The acquisition of the ECKART Group also contributed to this excellent development. Adjusted for currency and acquisition/divestment effects, operating sales increased by 10%. Our first half-year performance provides impressive confirmation that we are on the way to achieving our ambitious growth goals set for the whole of 2006, commented Dr. Nikolaus Schweickart, President and CEO of ALTANA AG.

Good growth rates were achieved in international markets, in particular. 1.6 billion of the total sales were generated outside Germany. This is equivalent to an increase of 28% on the prior year and a foreign sales share of 84%.

Domestic sales in the first half-year amounted to 305 million, up 10% on the prior year's figure. Particularly strong growth figures were achieved in the market regions of North America, where sales increased by 39% to 592 million; in Latin America, with an increase in sales of 36% to 197 million, and Asia, with sales up by 37% to 188 million. European sales outside Germany climbed by 15% to 622 million.

ALTANA's earnings before taxes (EBT) rose by 8% to 382 million. This growth rate was influenced by a special effect: Earnings before taxes (EBT) in the second quarter of 2006 comprise a one-time expense amounting to 25 million for the redemption of various employee incentive programs due to the intended restructuring of the Group. Excluding this special effect, earnings before taxes (EBT) grew by 16%.

First-half operating earnings measured in terms of EBITDA totaled 466 million, 14% more than in the prior year; EBIT amounted to 379 million, up 9% on the prior year, and first-half net income totaled 244 million, up 11% on the prior year's figure.

The operating return (EBITDA) was 24.1% in the first half of 2006. The return on sales before taxes (EBT) was 19.8%. Earnings per share (EPS) rose by 11% to 1.79.

Page 2

In the period under review, ALTANA's capital expenditure on property, plant and equipment and on intangible assets rose by 42% to 93 million. The company's research expenses grew by 14% to 245 million. As of June 30, 2006, ALTANA employed about 13,500 people worldwide, an increase of 21% on the first half of 2005, mostly due to acquisitions. Of the total workforce, about 6,400 were employed in Germany and about 7,000 abroad.

ALTANA Group: Outlook for 2006 confirmed

At Group level, we anticipate growth in sales of about 20% for 2006 as a whole, with a business volume of almost 4 billion. Earnings (EBT) before special expenses for the restructuring of the Group are expected to be some 8-10% higher than last year.

The process of the long-term development of the two divisions is underway. We are right on course. We are striving to achieve a strategically long-term solution which we are discussing with potential partners. At the same time, preparations for an independent operation of the chemicals business are underway. From today's perspective, we will, as announced, take the decisive decisions and determine the direction of both processes in the course of this year, explained Dr. Nikolaus Schweickart, President and CEO of ALTANA AG.

ALTANA Pharma: Strong international business with top-level return figures

ALTANA Pharma AG, Constance, increased its sales by 13% to 1.27 billion in the first six months of 2006. Adjusted for exchange rate effects, operating growth was 10%. The core Therapeutics business reported growth in sales of 14% to 1.12 billion.

Despite burdens due to the reduction of the reference price of Pantoprazole in Germany, ALTANA Pharma succeeded in increasing first-half earnings before taxes (EBT) by 8% to 339 million. At 26.6%, ALTANA Pharma's return on sales before taxes (EBT) reached another record value. The operating return (EBITDA) was 30.0%.

With a growth of 18% to 1.08 billion, foreign business developed very satisfactorily. At the end of the first half of 2006, the share of foreign business amounted to 85%. Due to the strong first six months of 2005 and the reduction of the reference price of Pantoprazole in April of 2006, sales in Germany were 10% lower than in the prior year.

At the beginning of July, ALTANA Pharma opened a new tablet production facility in Cork (Ireland). With this production facility, ALTANA Pharma has a second state-of-the-art, high-quality manufacturing site for solid formulations in addition to the site in Oranienburg (Germany). In June, a new institute for pre-clinical drug safety was opened in Barsbüttel-Willinghusen (Germany), where the previous research sites of Hamburg and Willinghusen were merged.

Gastro franchise

Pantoprazole (Pantozol® /Protonix®), the innovative gastrointestinal drug, continues to deliver a strong growth dynamic. ALTANA Pharma's own sales of Pantoprazole totaled 743 million, which translates as an increase of 13%. Worldwide market sales, all sales partners included, were up 10% to 1.47 billion in the first six months of 2006. In the U.S. market, market sales of 751 million were generated, up 11% on the prior year's figure. With a share of about 19% of prescriptions (as of July 1), Pantoprazole's market position among proton-pump inhibitors in the U.S. remains to be strong. The share of main growth driver Pantoprazole in total sales of ALTANA Pharma amounts to 58%.

Respiratory franchise

ALTANA Pharma achieved a total sales volume of 38 million with respiratory drugs in the first half of 2006. Sales of Alvesco® (Ciclesonide) totaled 7 million. This novel inhaled corticosteroid for the treatment of asthma is now approved in 38 markets worldwide and has been launched in 20 markets. Further market launches are planned this year. ALTANA Pharma is striving to achieve a sales volume of about 16 million for 2006 as a whole. New drug applications for OMNAIR™, a nasal spray with Ciclesonide for treating allergic rhinitis, were filed in the U.S. and Canada. For the Ciclesonide combination with Formoterol supplementary Phase I/Phase II-studies are necessary. Therefore the start of Phase III will happen later than initially expected.

Page 3

Imaging/OTC

With its OTC business ALTANA Pharma achieved a growth in sales of 18% to 73 million. At 54 million, sales in the Imaging business were down 8% on the prior year's level.

ALTANA Pharma: Outlook

For ALTANA Pharma we expect to achieve a growth in sales of about 10%. Pantoprazole looks set to provide growth in own sales in the double-digit percent range, while worldwide market sales, all sales partners included, are expected to grow in the high single-digit percent range. In addition to the increased expenses for Marketing & Sales associated with the market launch of Alvesco® as well as high Research & Development expenditures for Daxas®, among others, there are burdens due to the price cuts for Pantoprazole in Germany. Nevertheless, we anticipate that a growth in earnings (EBT) in a range of 5 – 8% above the prior year's record level may be achieved, thanks, in particular, to the dynamic development abroad.

ALTANA Chemie: Profitable growth on a broadened base

ALTANA Chemie AG, Wesel, achieved sales of 659 million in the first six months of 2006. This represents a 56% increase on the prior year's figure. Adjusted for exchange rate as well as acquisition and divestment effects, ALTANA Chemie achieved an operating growth of 10%.

Sales increases were achieved in all regions. Due to acquisitions, the regions of North and Latin America achieved the strongest growth: sales were up 100% to 135 million in North America; in Latin America sales rose by 66% to 34 million. Thanks in particular to the revival in demand in China, business in Asia was up by 52% to 150 million. Sales in Europe (excluding Germany) were up by 33% on the prior year to 209 million. Sales in Germany were up by 78% to 112 million.

Growth in every division

All four divisions of ALTANA Chemie contributed to the good first-half results with double-digit growth in sales. Sales in the largest division, Additives & Instruments, climbed by 16% to 214 million. Effect Pigments (ECKART), the new division consolidated as of October 1, 2005, contributed 166 million in the first six months of 2006, which is equivalent to a double-digit increase in sales (12%) in a pro forma comparison to the prior year. At just under 168 million, sales in the Electrical Insulation division were up 12% on the prior year. The Coatings & Sealants division reported a mainly acquisition-driven increase in sales of 26% to 111 million.

Sustained high profitability

In the first six months of 2006, ALTANA Chemie improved its operating earnings (EBITDA) by 62% to 123 million, slightly disproportionate to its sales performance. In addition to the new Effect Pigments division and the dynamic sales performance, the improved earnings level of Coatings & Sealants due to portfolio measures contributed to this growth in earnings. Earnings before taxes (EBT) amounted to 79 million, despite high acquisition-related depreciation and amortization, up by 47% on the prior year. The return on sales was 12.0%. The operating margin measured in terms of EBITDA amounted to 18.7%, an excellent figure in an international comparison of the specialty chemicals sector. The positioning of ALTANA Chemie forms an excellent basis for its continued and sustained growth. The integration of ECKART has almost been completed and has led to a positive earnings contribution since the company's first consolidation.

ALTANA Chemie: Outlook

For ALTANA Chemie we expect a strongly acquisition-influenced growth in sales of about 40%. Growth in operating earnings (EBITDA) should develop in line with growth in sales.

There will be a conference call for analysts today, August 2, at 2 p.m. (local time, CEST). More information about the webcast, this press release and the half-year report is available at www.altana.com.

Page 5

This press release contains forward-looking statements, i.e., current estimates or expectations of future events or future results. The forward-looking statements appearing in this press release include revenue and earnings projections for the ALTANA Group and the drug Pantoprazole and information on ALTANA's plans for the further strategic process in its businesses. These statements are based on beliefs of ALTANA's management as well as assumptions made by and information currently available to ALTANA. Many factors that ALTANA is unable to predict with accuracy could cause ALTANA's actual results, performance or achievements to be materially different from those that may be expressed or implied by such forward-looking statements. These factors include ALTANA's ability to develop and launch new and innovative pharmaceutical and chemical products, price regulations for pharmaceuticals and budgeting decisions of local governments and health care providers, the level of ALTANA's investment in pharmaceuticals related R&D, the sales and marketing methods used by ALTANA to distribute its pharmaceuticals, the composition of ALTANA's pharmaceuticals portfolio, ALTANA's ability to maintain close ties with its chemicals customers, the business cycles experienced by ALTANA's chemicals customers and the prices of the raw materials used in ALTANA's chemicals business.

Forward-looking statements speak only as of the date they are made. ALTANA does not intend, and does not assume any obligation, to update forward-looking statements to reflect facts, circumstances, or events that have occurred or changed after such statements have been made.

**BUSINESS PERFORMANCE
IN THE FIRST SIX MONTHS OF 2006**

> **Group s operating growth at 10%**

> **Growth driven by specialty chemicals and pharmaceuticals business**

> **Excellent growth rates achieved in all markets**

With sales growing by 24 % to 1,933 million, ALTANA picked up on its successful performance in the first quarter of 2006. ALTANA again slightly exceeded its own sales expectations.

The pharmaceuticals and the specialty chemicals business contributed to this satisfactory development. Adjusted for acquisition and divestment effects with regard to ALTANA Chemie, sales were 12 % up on the prior year. Exchange rate effects, in particular vis-à-vis the U.S. dollar and the Latin American currencies, had a slightly positive effect on sales growth (+2 percentage points). Group operating sales rose by 10% compared to the prior year.

2 GROUP

The impetus for the growth primarily came from business outside of Germany. International business expanded by 28% to 1,628 million, while business in Germany mainly driven by specialty chemicals grew by 10% to 305 million. The share of foreign sales in total sales correspondingly amounted to 84 % (prior year: 82 %).

Nominal sales growth was particularly high in North America (39 %), Latin America (36 %), and Asia (37%). Sales in Europe climbed by 13 %. In terms of operating business, adjusted for acquisition and currency effects, all markets achieved excellent growth rates.

**EARNINGS SITUATION
OF THE ALTANA GROUP**

> **Clear double-digit growth excluding special effects**

> **Net income: 244 million (+11%)**

> **Earnings per share: 1.79**

Group earnings before taxes (EBT) rose in the first six months by 8% to 382 million. The return on sales amounted to 19.8%, compared to 22.7% in the prior year.

The growth rate is influenced by a special effect in the second quarter 2006. Earnings in Q2 comprise a onetime expense of 25 million for the discharge of various employee incentive programs, which within the framework of the planned restructuring of the Group can not be continued in their current form and were terminated due to their dependency on the dividend and share price of ALTANA AG. The one-time expense, which was primarily used to discharge bonus dividends, a longtime profit-sharing certificate model benefiting employees working in Germany, was included in the earnings of the holding company. The future earnings of the two corporate divisions will be correspondingly disencumbered by

4 GROUP

the termination of the programs. Excluding this special effect a growth in earnings of 16 % was achieved in the first six months.

On account of a lower tax rate, the net income (EAT), and the earnings per share (EPS), grew more strongly than the EBT by 11 % in each case. The EAT amounted to 244 million, while the EPS totaled 1.79.

**ALTANA PHARMA:
SALES PERFORMANCE**

> **ALTANA Pharma posts double-digit growth (13%)**

> **Pantoprazole sales increase by 13%**

> **Highest sales growth rates in North America and Latin America**

ALTANA Pharma generated sales of 1,274 million in the first six months of 2006, 13% up on the prior year. Sales in the second quarter totaled 650 million. Adjusted for positive exchange rate effects (3 percentage points), primarily in North America and Latin America, ALTANA Pharma achieved operating growth of 10 % in the first half of the year.

Our core Therapeutics business grew by 14% to 1,117 million. The contribution of the main sales driver Pantoprazole to ALTANA Pharma's total sales continued to be 58 %. Pantoprazole generated worldwide market

6 PHARMACEUTICALS

sales of 1,474 million, 10 % higher than in the prior year. Our partner Wyeth in the important U.S. market contributed sales of 751 million (+11 %). Comprising roughly 19 % of prescriptions, our gastrointestinal medication Pantoprazole (PROTONIX®) continued to have a strong market position in the U.S. among proton pump inhibitors. Our own sales of Pantoprazole climbed by 13% to 743 million. ALVESC® (Ciclesonide), our new asthma preparation, achieved sales of 7 million in the first six months (prior year: 2 million).

Sales in Germany showed a negative development, partly on account of the strong first six months of 2005, but mainly due to the fact that the reference price of Pantoprazole was decreased in April 2006. While the sales volume in Germany, our home market, fell by 10% from the prior year, foreign business grew by 18 % to 1,081 million. In Europe excluding Germany sales rose by 7% to 413 million. The highest sales growth was recorded in North America and Latin America. In the U.S., business with Wyeth was stepped up considerably, and Fougera's special business reported growth of 15 % in U.S. dollars. Latin American business expanded, among other things due to the good performance of Pantoprazole; a favorable exchange rate development strengthened the growth in euros. The share of foreign business was 85 % at the end of the first six months (prior year: 81%).

ALTANA PHARMA:

EARNINGS TREND

> **Earnings before taxes up by 8%**

> **EBT growth excluding prior-year capital gain: +18%**

> **Return on sales at 27%**

Earnings before taxes (EBT) amounted to 339 million at the end of June, 8% higher than in the prior year. Excluding the capital gain from the termination of cooperation with Pfizer on a comparative basis with the prior year (26 million), earnings grew by 18%. Despite the first price cut affecting Pantoprazole in April 2006 in Germany, ALTANA Pharma continued to achieve a dynamic earnings performance disproportionate to the sales trend in the second quarter.

ALTANA Pharma's profitability continues to be above average. The return on sales amounted to 26.6% (2005: 27.7%), the operating margin based on EBITDA accounted for 30.0% (2005: 31.4%).

PRODUCT / PIPELINE NEWS

As of July 1, 2006, reference prices for the proton pump inhibitor reference price group formed in 2004 were lowered for the second time this year in Germany. Our product PANTOZOL® (20mg and 40mg) is affected. The price of our main sales driver will decrease this year by roughly 30% as a result of the two reference price cuts. The sales losses connected with this are taken into account in our sales and earnings forecast for 2006 as a whole.

PHARMACEUTICALS 9

The novel inhaled corticosteroid ALVESCO® has now been approved in 38 countries worldwide and is on the market in 20 countries. Further market launches are planned for this year. The application for approval of OMNAIR™, a nasal spray with Ciclesonide to treat allergic rhinitis, was submitted in the U.S. and in Canada. For the Ciclesonide combination with Formoterol supplementary phase I / phase II studies are necessary. Therefore the start of phase III will happen later than initially expected.

Patient recruitment for the two DAXAS® studies initiated in February, AURA and HERMES, which are part of the extended study program focusing on COPD indications, is proceeding according to plan. The aim of the two one-year studies is to provide proof that our innovative PDE4 inhibitor can statistically significantly reduce the exacerbation rate in patients with COPD.

ORGANIZATIONAL DEVELOPMENT

At the beginning of July, ALTANA Pharma opened a tablet production facility in Cork (Ireland), its second plant in addition to Oranienburg (Germany). The new facility will assume an important role in the worldwide production network and will extend production capacities for existing products like Pantoprazole and for future products, 67 million was invested in the facility, 56 people are employed there at present. At full operational level some 150 employees will be able to produce three billion tablets a year.

10 PHARMACEUTICALS

On June 23, our new institute for pre-clinical drug safety opened in Barsbüttel-Willinghusen, where we merged our research sites previously in Hamburg and Willinghusen. The institute, which currently employs 125 people, is a center of expertise for pre-clinical drug safety and plays a key role in the research and development of innovative drugs. Some 23 million was invested in the expansion of the new building.

On May 12, the foundation stone was laid for ALTANA Pharma's new administrative building at the company headquarters in Constance. Employees are expected to move into the offices at the beginning of 2008. Until then, some 50 million will be invested in the project.

CAPITAL EXPENDITURE

Since the beginning of 2006, ALTANA Pharma had invested 44 million in property, plant and equipment. The lion's share was invested in the expansion of the headquarters in Constance, and also used for projects at the Cork, Oranienburg, and Melville sites.

EMPLOYEES

On June 30, 2006, ALTANA Pharma had a total workforce of 8,984. This is equivalent to a worldwide increase of 369 persons, or 4 % compared to the prior year. 3,809 of them worked for German companies, an increase of 4 %. 5,175 people were employed by non-German companies, accounting for 58 % of the total staff.

**ALTANA CHEMIE:
SALES PERFORMANCE**

> **Strong operating growth of 10 %**

> **New record half-year sales due to recent acquisitions**

> **Increased demand in Asia**

In the second quarter ALTANA Chemie was able to continue the excellent business performance of the first three months of the year. Nominal sales rose by 56 % to 659 million (2005: 422 million) in the first six months of 2006.

The above-average sales growth was mainly due to the recent acquisitions of ECKART, Kelstar, and RadCure.

Adjusted for acquisition and divestment effects (45 percentage points) as well as for share price fluctuations (1 percentage point), ALTANA Chemie reported operating growth of 10 % thanks to a high worldwide demand.

> **Sales by division**

in million		%	H 1 2006	H1 2005	Δ %
Additives & Instruments	1	33	214	184	16
Effect Pigments	2	25	166

Coatings & Sealants	4	17	111	88	26
Total		100	659	422	56

12 CHEMICALS

All four divisions achieved double-digit sales growth. Additives & Instruments grew by 16% (15% operating growth), Electrical Insulation by 12% (8% operating growth), and Coatings & Sealants by 26% (1% operating growth). Our new Effect Pigments division generated 166 million, exceeding expectations, despite continued very high and rising raw materials prices (in addition to crude oil also of metals like copper and zinc). Sales were 12% higher than the comparable prior-year figure.

Altana Chemie's sales outside of Germany climbed by 52% to 547 million in the first six months of financial 2006. Substantial sales increases were achieved in all regions. Due to acquisitions, the highest growth was posted in North America (+100%, 8% operating growth) and Latin America (+66%, 16% operating growth). In Europe excluding Germany sales were up by 33% in year-to-year terms (8% operating growth), totaling 209 million. Asian business was considerably better than in the first quarter; sales grew by 52% (15% operating growth) thanks in large part to the resurgent demand in China to

150 million. Sales in Germany were up by 78% (8% operating growth) to 112 million. As a result of this very dynamic development in our home market, international business accounted for 83% of total sales of the ALTANA Chemie Group, slightly below the prior-year figure (85%).

ALTANA HEMIE:

EARNINGS TREND

> Continued dynamic earnings trend

> EBITDA rises by 62%

In the first six months of 2006 ALTANA Chemie improved its operating earnings (EBITDA) by 62% to 123 million, slightly disproportionate to sales. In addition to the new Effect Pigments division and the dynamic sales performance, the improved earnings level of Coating & Sealants due to portfolio measures contributed to this growth in earnings. The EBITDA margin climbed, accordingly, from 18.0% to 18.7%.

Earnings before taxes (EBT) amounted to 79 million, despite high acquisition-related depreciation and amortization, up by 47% on the same period last year. The return on sales (EBT) fell as a result from 12.8% to 12.0 % according to plan.

CAPITAL EXPENDITURE

29 million was invested in property, plant and equipment in the first six months (prior year: 15 million), 16 million thereof at German locations, primarily of BYK Chemie and ECKART, and 13 million in other countries.

EMPLOYEES

4,393 people worked for ALTANA Chemie worldwide on June 30, 2006, 1,970 or 81% more than in the prior year. The increase was mainly due to acquisitions. Adjusted for acquisition and divestment effects, the number of employees changed only slightly.

1,889 ALTANA Chemie staff members, around 43% of the workforce, are employed by our foreign companies. 2,504 people worked for our German companies at the end of June.

16 GROUP**ASSET AND FINANCIAL POSITION
OF THE ALTANA GROUP**

> **Sound balance sheet structure with balance sheet volume virtually unchanged**

> **High cash flow from current operating activities**

Total mid-year assets of the ALTANA Group stood at 3,699 million, only 2% higher than at the end of 2005. The balance sheet structure hardly changed. The balance sheet growth was essentially due to the operating business performance. Inventories and trade accounts receivable increased by a total of 9 %. In the first six months of 2006 capital expenditure was roughly at the same level as depreciation and amortization, and so the long-term assets remained unchanged. The amount of securities and cash and cash equivalents decreased slightly, comprising 15 % of total assets. The structure of liabilities also remained constant to a large extent. Shareholders

> **ALTANA Group consolidated cash flow statement**

in million	H 1 2006	H 1 2005
Cash flow from operating activities	251	244
Cash flow used in investing activities	-97	-64

Net change in cash and cash equivalents	-37	83

GROUP 17

equity amounting to 2,110 million comprises 57% of total assets. The share of debt in the balance sheet volume decreased to 95.

The cash flow from operating activities climbed to 251 million (prior year; 244 million). The considerably higher earnings-related cash flow was offset by higher tied-up working capital.

The cash flow used in investing activities in the first six months of 2006, amounting to 97 million, was higher than in the prior year (64 million) due to higher investments in property, plant and equipment and intangible assets and due to acquisitions in the chemicals division.

The substantially higher cash flow used in financing activities primarily consists of the dividend payment for the prior year (150 million) and reimbursements of long-term financial liabilities (40 million).

Group liquidity, consisting of securities and cash and cash equivalents, decreased by 35 million to 569 million since the beginning of the year.

18 GROUP

THE ALTANA SHARE

> ALTANA share closes the first six months with losses compared to the first quarter

> Market capitalization at the end of the second quarter: 6.1 billion

The optimistic mood that characterized international stock market activity in the first quarter lasted into May. At the beginning of the second quarter the DAX index, driven by mergers and acquisitions, surmounted the 6,000 point mark for the first time since July 2001. Following a brief period under 6,000 points at the beginning of May, the interim report season and high dividend payments provided impetus. The mood changed within just a few days, when interest rates and inflation became key issues on the stock markets. After climbing to 6,140 points, the DAX index slid in just a few weeks to 5,292 points. As a result, the profits made on the DAX index since the end of January were completely reversed. The Dow Jones index, which had approached its all-time high of 11,750 points in 2000, fell to below 11,000 points. The DAX index was able to gain ground again in the last days of trading in June and closed as of June 30 at 5,683 points, 5.1 % higher than at the beginning of the year, outperforming the Dow Jones index, which ended the second quarter at 11,150 points, up by 4.0 %.

The good business development and the confirmation of the outlook for the year as a whole gave renewed impetus to the ALTANA share after the price had gone

GROUP 19

down at the beginning of the quarter. The ALTANA share reached its quarter high, at 51.39, on the day of the report on Q1 2006, April 27. As the quarter continued, speculations on the announced restructuring of the ALTANA Group and the decision as of July 1 to decrease the reference price for proton pump inhibitors a second time put the share under pressure. The price dipped under 50, reached its low at 42.65 and the average price in June amounted to 44. Closing the second quarter at 43.56, the price of the ALTANA share was 5.3 % lower than at the beginning of the year. On the New York Stock

> Comparative performance ALTANA/ DAX

January 1 June 30, 2006

20 GROUP

Exchange, the ALTANA share closed the quarter at U.S.\$ 55.88, up by 2.8 %, or down by 5 % expressed in euros. The share reached its high on May 1, at U.S.\$ 63.90, and its low on June 22, at U.S. \$ 53.75.

On June 30, 2006 the market capitalization of ALTANA AG amounted to 6.1 billion. On the DAX list issued by the German stock exchange, ALTANA ranked 32 (March 31, 2006: 33) in terms of market capitalization (free float) and 28 (March 31, 2006: 28) in terms of trading volume.

OUTLOOK

**ALTANA GROUP CONFIRMS ITS SALES
AND EARNINGS FORECAST FOR 2006**

ALTANA adheres to its forecast for 2006 as a whole. Thanks to the excellent performance of our pharmaceuticals and chemicals business, we anticipate a growth in sales of about 20% and a business volume of almost 4 billion. We still aim to achieve an increase in earnings before taxes of 8% to 10%, prior to special expense in the framework of the Group restructuring.

The process of the announced restructuring of the ALTANA Group is underway. From our current perspective we anticipate to take the necessary decisions and determine the direction of both processes in the course of this year.

**ALTANA PHARMA SEES ITS YEAR S TARGETS
INFLUENCED BY HEALTH-POLICY BURDENS**

In spite of massive losses resulting from the two reference price cuts for proton pump inhibitors in Germany, ALTANA Pharma expects to achieve worldwide sales growth of roughly 10%. We still expect our own sales of our block-buster, Pantoprazole, to increase in the double-digit per-

22 GROUP

centage area and market sales in the high single-digit percentage range. In addition to the increased expenses for marketing & sales due to market launches of ALVESCO[®], as well as high research & development expenditure for DAXAS[®], among others, there are burdens due to the price cuts for Pantoprazole in Germany. Nevertheless we anticipate that earnings between 5% and 8% above the prior year may be achieved.

**ALTANA CHEMIE IS ON THE WAY
TO A GOOD BUSINESS YEAR 2006**

In the second half of the year we anticipate economic growth to slow down on a high level and expect raw materials prices to remain very high. For 2006 as a whole, ALTANA Chemie expects to post nominal sales growth of roughly 40% following the good business performance so far. We assume that operating earnings (EBITDA) will develop in the same range as sales.

**REMARKS ON THE SEMIANNUAL
FINANCIAL STATEMENTS**

ACCOUNTING PRINCIPLES

This report of the ALTANA Group for the first six months of 2006 complies with International Accounting Standard 34. Basically, the same accounting policies and valuation principles have been applied as for the preparation of the 2005 consolidated annual financial statements.

TREASURY SHARES

In connection with exercised options, ALTANA transferred 205,450 ALTANA shares to employees at strike price in the period from January 1 to June 30, 2006. A further 493 shares were sold to employees under the ALTANA Investment Plan 2005 and 3,039 shares were transferred to members of the Supervisory Board as part of the Supervisory Board compensation. An additional 16,595 shares were sold via the stock exchange to cover employee share option gains from the ALTANA Investment Plans. No ALTANA treasury shares were purchased in this period. This report is unaudited.

**DISCLAIMER FOR
FORWARD-LOOKING STATEMENTS**

This interim report contains forward-looking statements, i. e. current estimates or expectations of future events or future results. The forward looking statements appearing in this report include revenue and earnings projections for the ALTANA Group, the ALTANA Pharma and ALTANA Chemie divisions, our pharmaceutical product, Pantoprazole, ALTANA's plans for the further development of DAXAS[®] and ALTANA's assessment to take the necessary decisions and determine the direction of the process as to restructuring of the ALTANA Group in the course of this year. These statements are based on beliefs of ALTANA's management as well as assumptions made by, and information currently available to, ALTANA. Many factors that ALTANA is unable to predict with accuracy could cause ALTANA's actual results, performance or achievements to be materially different from those that may be expressed or implied by such forward-looking statements. These factors include ALTANA's ability to develop and launch new and innovative pharmaceutical and chemical products, price regulations for pharmaceuticals and budgeting decisions of local governments and healthcare providers, the level of ALTANA's investment in pharmaceuticals related R&D, the sales and marketing methods used by ALTANA to distribute its pharmaceuticals, the composition of ALTANA's pharmaceuticals portfolio, ALTANA's ability to maintain close ties with its chemicals customers, the business cycles experienced by ALTANA's chemicals customers and the prices of the raw materials used in ALTANA's chemicals business.

Forward-looking statements speak only as of the date they are made. ALTANA does not intend, and does not assume any obligation, to update forward-looking statements to reflect facts, circumstances or events that have occurred or changed after such statements have been made.
